Three lay witnesses in affidavits executed in August, 1901, state the soldier has suffered since his discharge from all of the disabilities alleged by him. These affidavits are of the machine-made type, as shown by the fact that the language in each is exactly the same, and the writing is that of one person.

He was examined by a board of surgeons August 14, 1900, who report him as 28 years of age, 5 feet 9 inches in height, and weighing 154 pounds. This board could find no disability from which the soldier suffered, other than deafness of the right ear, for which they rate six-thirtieths.

Another board of surgeons March 25, 1902, could find no disability other than a slight tenderness of the muscles (rheumatism), for which they rated two-eighteenths, and some emaciation and slight indication of malarial poisoning, rated at four-eighteenths, and slight deafness of the right ear, no rate.

A board on November 18, 1903, found malarial poisoning warranted a rating of six-eighteenths, and deafness of the right ear rated at six-eighteenths. No other disability found. They state that the soldier has the appearance of being a sick man—malarial poisoning and its results.

The last board, which examined him May 20, 1904, states that they found chronic malarial poisoning and resulting disease of the liver and stomach, and rated it at eight-eighteenths; and rheumatism for which they rated eight-eighteenths. They found no other disabilities.

With the bill the petitioner files an affidavit in which he states that he is wholly disabled for the performance of manual labor, possesses no property, and has no income other than his pension of $6 per month.

Lay witnesses sustain his allegations.

A physician testifies March 2, 1914, that the soldier suffers from chronic malarial poisoning, varicose veins, deafness of the right ear, neurasthenia, and severe headaches, and is unable to earn any wages by labor of any kind.

From the evidence submitted your committee believe that an increase from $6 to $24 per month is fully warranted, and so recommend.

H. R. 15947. William E. Howell, 312 South Grier Street, Williamsport, Pa., served in Regular Establishment, in Company H, Thirteenth United States Infantry, from July 20, 1894, to October 19, 1897, when honorably discharged. He also served during the War with Spain from April 27, 1898, to October 29, 1898, in Company B, Twelfth Pennsylvania Volunteer Infantry. He was 21 years of age at first enlistment. (I. O. 1211717.)

The records of the War Department show he was sick in hospital in first service from December 10, 1894, to January 9, 1895; nature of illness not given, but it is stated that it was contracted in line of duty. In second service it is shown he was treated for opthalmia of right eye, headache, and chronic nicotine poisoning, due to excessive use of cigarettes and not in line of duty.

When discharged from the last service he claimed he was suffering from rheumatism of right knee. The medical officer by whom he was then examined certifies he could find no evidence of rheumatism.

On November 11, 1898, he filed a claim for pension based on rheumatism contracted while in final service during War with Spain, and disease of eyes contracted during the first service in Regular Establishment, United States Army. This claim was rejected July 20, 1902, on grounds of no record, medical or other satisfactory evidence of origin in service of rheumatism. He waived the claim as to disease of eyes prior to this adverse action.

August 11, 1902, he filed a claim based on disease of eyes, which he claims he contracted during first service in the Regular Establishment, United States Army. This claim was rejected January 5, 1904, on ground of no ratable degree of disability shown since date of filing the claim. No appeal has been taken to either action of rejection, but one effort was made to reopen the last claim rejected, but this effort was denied on ground evidence offered failed to warrant such action.

Milton Tharp, who was second lieutenant of soldier's company during the War with Spain, testifies the soldier suffered from rheumatism during that service, and also complained of heart trouble.

Comrade J. L. L. Hill testifies that during service in War with Spain soldier complained of trouble with his eyes, which were inflamed.

W. H. Spangler testifies that he is a druggist, and that since 1898 he has continually sold the soldier remedies for the disabilities he complained of, particularly disease of heart and rheumatism.

Dr. B. F. Waggenseller testifies, in 1899, that soldier was then suffering from rheumatism and disease of the heart, and had suffered from same since discharge from the United States Army a short while before.

The soldier was examined August 16, 1899, by a board of surgeons, who reported age 25 years, 5 feet 6½ inches in height, weighing 149 pounds. This board found he was suffering from chronic rheumatism, with tender and stiffened muscles, tendons, and joints, and rated it six-eighteenths. They also found disease of heart existed, and rated it six-eighteenths.

Another board, on November 1, 1899, reported soldier suffering from rheumatism and rated it at eight-eighteenths; disease of heart, rated eight-eighteenths; and disease of eyes, eight-eighteenths. They found no other disability existing.

The soldier files an affidavit with the committee, in which he states that he is partially disabled for performance of manual labor by disease of eyes, heart, and rheumatism, and that he owns no property except household goods worth less than $100.

The Member who introduced the bill, Mr. KIESS of Pennsylvania, assures the committee in a letter that he knows the soldier possesses no property.

The following medical evidence has been filed with your committee:

"This is to certify that William E. Howell, of Williamsport, Pa., is suffering from the following ailments: Rheumatism, right side affected; cause probably due to exposure, as change in weather affects him. Dampness or rain much worse, causing chill followed by slight rise in temperature.

"Inflammation of joints especially worse at time of rain or dampness. Unable to work at that time; too much pain.

"Myopia, right eye prominent and pupil enlarged; can not see object at a distance with right eye; probable cause, concentration of vision of right eye.

"Have been Mr. Howell's attendant for past seven years. Graduated, Chicago, Ill., 1901.

"D. W. LONGWELL, M. D."

The foregoing was duly executed before an authorized notary public.

From the evidence submitted your committee believe that the disabilities from which the soldier now suffers may be safely accepted as due to service, and recommend the allowance of pension at the rate of $12 per month.

## MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. WILLIAMS having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 4023. An act to correct the military record of Waldo H. Coffman.

The message from the Senate also announced that the President of the United States had approved and signed bills of the following titles:

On March 9, 1914:

S. 3454. An act authorizing the Secretary of Commerce to lease to the city of Port Angeles, Wash., certain property.

On March 12, 1914:

S. 48. An act to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

On March 13, 1914:

S. 3742. An act to authorize the Hudson River Connecting Railroad Corporation to construct a bridge across the Hudson River in the State of New York.

On March 14, 1914:

S. 3206. An act for the protection of the water supply of the city of Baker, a municipal corporation of the State of Oregon; and

S. J. Res. 90. Joint resolution to continue in effect the provisions of the act of March 9, 1906 (Stat. L., vol. 34, p. 56).

The message also announced that the Senate had agreed to the amendment of the House of Representatives to the bill (S. 4145) to authorize the Government of Porto Rico to construct two bridges across the Arecibo River near the city of Arecibo, P. R.

## PENSIONS.

The committee resumed its session.

Mr. MURRAY of Oklahoma. Mr. Chairman, I yield one minute to the gentleman from Tennessee [Mr. SIMS].

Mr. SIMS. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. DIES. By the way, Mr. Chairman, I want to revise and extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the gentleman's request?

There was on objection.

Mr. MURRAY of Oklahoma. Now I yield one minute to the gentleman from Illinois [Mr. MADDEN].

Mr. MADDEN. I ask unanimous consent, Mr. Chairman, to extend my remarks in the RECORD.

Mr. AUSTIN. Mr. Chairman, I make the same request.

Mr. LANGLEY. And I the same, Mr. Chairman.

Mr. GOULDEN. And I make the same request, Mr. Chairman.

The CHAIRMAN. Is there objection to the requests of the gentleman from Illinois [Mr. MADDEN], the gentleman from Tennessee [Mr. AUSTIN], the gentleman from Kentucky [Mr. LANGLEY], and the gentleman from New York [Mr. GOULDEN]?

There was no objection.

Mr. MURRAY of Oklahoma. Now, Mr. Chairman, I yield 10 minutes to the gentleman from North Carolina [Mr. POU].

The CHAIRMAN. The gentleman from North Carolina [Mr. POU] is recognized for 10 minutes.

Mr. POU. Mr. Chairman, there are some remarks which I had intended to submit when the river and harbor bill would be considered by the House. But finding that there would be much demand for time then, my friend from Oklahoma [Mr. MURRAY]

very kindly reserved 10 minutes of the time now under control by him. I shall therefore submit those remarks now.

I am reminded of the fact that whenever a Member or Senator says anything in behalf of good roads there are people who say: "Oh, yes; of course he is a good-roads man. Everybody is for it. Therefore he is for it." Now there is a state of affairs which may well engage the attention of every Member of this body at this time. It is this: The people of the United States not very much longer will submit quietly to the appropriation of such stupendous sums of money as are being carried by bills which we are from time to time passing, almost to the entire neglect of the good-roads system of the United States. I went into the room of the Committee on Appropriations a while ago and asked for a document, Senate document 382, of the Sixty-second Congress. A resolution was introduced a year or two ago in the Senate asking that the Secretary of the Treasury furnish a statement of all the expenditures of the Government for river and harbor work up to that time, and it turns out that up to March 6, 1912, $627,098,236.05 had been appropriated by this Government for rivers and harbors, exclusive of the Panama Canal.

Now, we are proposing to authorize the expenditure of $25,000,000 to improve our roads system. There is just as much sense, Mr. Chairman, in appropriating $627,000,000 in digging out rivers and harbors and $25,000,000 for the improvement of public roads as there would be if one of the States in the Union should appropriate $627,000,000 for the building of a great university in that State and $25,000,000 for a public-school system. [Applause.] We have got the system reversed. The larger of these appropriations should be devoted to the improvement of our public-roads system, and we should then decide what we ought to do by way of river and harbor improvement.

Now, within the next few days we are going to vote $43,000,000 to dig out rivers and harbors, and, speaking for myself alone, I will say now if there is a roll call, I am going to vote against the pending river and harbor bill. [Applause.] I will do that, not because I am opposing the improvement of the river and harbor system of the United States, but I am going to vote against the bill as a protest, because I believe we are appropriating entirely too much money for that purpose, compared with the amount we are hoping will go to improve our road system.

I find also in this document that we have appropriated up to that date $241,165,000 in digging the Panama Canal. That is all right. Every American is proud of that great achievement. But think how many Americans would have received direct benefit if we had taken that $241,000,000 and distributed that amount among the States to be used in cooperation with the States in the improvement of the good-roads system of the entire United States.

Now, the keynote of the Wilson administration was sounded when that great man—and I use the term "great man" advisedly—went before the American people and told them that if given the power, we proposed to try to subserve the interest of the average man. Too long, he said, have powerful special interests engaged the attention of the committees of Congress. In no better way can we carry out that pledge to subserve the interests of the average man—the man, for instance, who lives on the rural free-delivery route in the country—than to address ourselves to this great task of first improving the rural postal highways throughout the length and breadth of the United States.

I suppose, of course, I shall be charged wtih demagoguery in making this speech here to-day, but I care not the snap of a finger if the charge is made. I am absolutely in earnest, Mr. Chairman, in the efforts that I make here to draw the attention of this House and of the country to this great problem. I have lived in the country and know what bad roads mean. You may talk about the trust problem, Mr. Chairman, you may talk about the tariff problem, and you may talk about all these other problems that are engaging the attention of the House, but there is no problem of greater importance than the one I am speaking of here and now.

Mr. LANGLEY. Mr. Chairman, will the gentleman yield to me for a suggestion?

Mr. POU. I do.

Mr. LANGLEY. I heartily agree with the gentleman in what he is saying. He is making a splendid speech. I have been making the same line of argument for good roads for about 10 years down in Kentucky, and some of the Democrats laughed at me when I contended that the Government of the United States ought to help build good roads and predicted that it would finally do so.

Mr. POU. I am sorry that there was any Democrat in Kentucky who laughed at the gentleman when he made that sort of an argument. They should have applauded him. There was a Roman orator, Mr. Chairman, who kept crying, "Cartago delenda est," and there came a time when Carthage was destroyed. We shall keep up the fight for this legislation until we win. I do not know why this little pittance of $25,000,000 is being held up in the Senate. I hope the bill will pass; but sooner or later the men who are indifferent about this great question will find that the people are thinking about it, and if they do not fall in line and help, the time will come when the people will make them fall in line or send somebody here who will, because I believe they are in dead earnest about this great question. [Applause.] Of course I could stand here and talk all day on this proposition. At any rate, I imagine I could. I do not propose to take up more time of the House. I merely want to announce that I am against the river and harbor bill, and shall vote against the one which we are soon to consider, and shall vote against the next one, and shall keep on voting against all subsequent river and harbor bills so long as I am a Member of this House, until at least a corresponding amount of money is expended in the building up of a good-roads system in the United States. [Applause.]

Mr. GOULDEN. Mr. Chairman, will my friend from North Carolina yield?

Mr. POU. I do.

Mr. GOULDEN. Does not the gentleman think that both rivers and harbors and roads should be improved?

Mr. POU. I do.

Mr. GOULDEN. Does not the gentleman think the Government is able and that the people are willing to do both within reasonable limits?

Mr. POU. I do. I believe that heartily, and I believe that more money is going to be yielded by the income-tax law than the experts in the beginning thought would be yielded. But the point I am making is this, that we are beginning at the top, whereas we ought to begin at the bottom; that when we appropriate $43,000,000 for the digging out of rivers and harbors, the benefit that the average man gets from it is so remote that it is almost impossible to calculate it. The great railroad arteries that lead to the cities, first of all, are fed by the country roads. The country road goes to the railroad. Then the railroad goes to the city, and the great trunk line goes to the seaport. So I say, Mr. Chairman, I hope that gentlemen will consider this question very earnestly. We may as well be candid. The advocates of Government aid for good roads, if necessary, will perfect an organization here which may block the passage of future river and harbor bills unless justice is done on this great question. [Applause.]

Mr. Chairman, I do not know why the Shackleford good-roads bill, as we call it, has not been already passed by the Senate. I wish I did know. I hope they are hard at work over there trying to make it a better bill; but this I do know, if some good-roads bill is not passed by this Congress there are a lot of people in the United States who are going to demand to know why.

Of course, this is not a party question, but I want to see my party make an honest effort to subserve the interest of the greatest number of people, and, in my judgment, the best way to do this at this time is to send the Shackleford bill to the President for his signature, and then follow it up in the next Congress with a similar bill carrying an appropriation twice as large. Talk is cheap, Mr. Chairman. The time for action has come. When many of you go back home to your constituents asking for nomination or election you will find a lot of people who are going to ask you what you did to promote the building of good roads. Let us be in a position to tell them that we did something more than talk for it.

Why, Mr. Chairman, we are wasting half a billion every year killing stock and tearing up vehicles forcing them over bad mud roads. This huge sum, which would dig the Panama Canal almost twice, could be saved to the American people every year if we would provide for improving our roads system. A bad road is the most expensive luxury a people ever indulged in. And a small sum, comparatively speaking, will save this half billion every year.

I am afraid somebody is at work against the Shackleford bill. Earnest is my hope that any effort to sidetrack that measure will not be successful.

When this Congress has passed into history and we recall the list of great measures which have been written on the pages of our law books, when we contemplate that list of measures not excelled by the record of any Congress since the foundation of the Government, there will be no law which will so directly benefit the great army of toilers who live outside the towns as

the legislation for which I am pleading here and now. [Applause.]

Mr. MURRAY of Oklahoma. I yield to the gentleman from Wisconsin [Mr. BROWNE].

Mr. BROWNE of Wisconsin. Mr. Chairman, every time a pension bill has come before this body it has been the signal for bombardment all along the line of the southern Democracy. Every man who has introduced a bill for or cast his ballot in favor of a pension bill has been accused of doing so to curry favor with his soldier constituency, and yet these same Representatives would wish you to believe that they were not playing politics and did not make these speeches opposing every pension bill to be circulated in their districts as the most toothsome campaign diet that could be placed before their constituency.

These long speeches of the opponents of these pension bills have no influence upon me and will not deter me in the least from doing what I believe to be my duty.

I come from a State that had only been admitted to the Union 12 years before the war; a State whose sturdy citizenship is, and was at that time, composed of many nationalities—English, German, Scandinavian, Irish, French, and Pole, but all Americans in the broad sense of loyalty to a common country.

Wisconsin did nobly in the war for the preservation of the Union, and the part she took in it is deserving of the gratitude of every citizen of the Republic, North or South. She was nobly and honorably represented in every important battle; her soldiers were conspicuous in every campaign; nearly every fleet carried them to the assault, every southern prison confined and starved her sons, and every hospital nursed her sick and wounded troops. She sent forth nearly 100,000 of her patriotic citizens in the pride and strength of their young manhood to breast the storm which threatened to disrupt and destroy the Union of our States.

Many of this valiant army never returned to home and loved ones. They sealed their devotion to country with the crimson current of their lives. They fell on mountain tops and in the valleys, on the oceans and the rivers.

The men that returned to their homes found the flourishing business that they left destroyed, the farm grown up to weeds, their former vigorous health impaired.

I have heard eminent doctors say that the health of every man who remained any great time in the service was more or less impaired by the hardships he was obliged to encounter.

As old age creeps on the old wounds and disabilities weigh heavier, the fight for life becomes harder. God pity the man or woman that in their old age has to battle with poverty in addition to the disability of poor health.

When these men enlisted at their country's call, the property owners of this country made a solemn pledge that the soldiers, their widows and orphans, should be the chosen wards of this Government. This Government has tried to keep this sacred pledge, but nevertheless, with the high cost of living, with the infirmities of age, there are many of the most meritorious cases where the pensions received are wholly inadequate.

The State of Wisconsin has been very generous with its soldiers. It has established a beautiful home near Waupaca, Wis., where the veterans and their wives can live. The National Government contributes $3 per capita for the soldiers in this home in addition to what the State contributes, but this has been inadequate, so that the trustees of this home have been obliged to make a rule that every inmate, as a condition for entrance, has to give up a portion of his pension to the support of this home.

I believe that this Government should make a sufficiently large appropriation so that every soldier could retain his pension to use for those things that are necessary for his happiness in his old age. I believe that every soldier that enlisted has made a sufficient sacrifice to entitle him decent and comfortable support during his declining years.

I do not believe that the Committee on Pensions will be intimidated by the attacks upon it made on this floor, and will continue to report favorably upon all meritorious pension bills, and will be generous with those men who have made such a sacrifice for their country.

Mr. MURRAY of Oklahoma. I yield 10 minutes to the gentleman from Colorado [Mr. KEATING].

Mr. KEATING. Mr. Chairman, I desire to call the attention of the committee to the case of Parmelia I. Parris, widow of a veteran of the Mexican War, whose pension has been increased by this bill from $12 to $30 a month.

Mr. CALLAWAY. On what page of the report is that case?

Mr. MURRAY of Oklahoma. On page 13.

Mr. KEATING. A few minutes ago, while the gentleman from Texas [Mr. DIES] was addressing the House, I endeavored to interrupt him in order that the facts concerning this case might be laid before the House, and during the colloquy that ensued I suggested that the gentleman was misleading the committee. I made that statement because I take it for granted that before a gentleman consumes the time of this House in discussing a measure before the House he has given that measure some consideration; and I could not understand how anyone who had read this bill and the accompanying report could make the statement that the gentleman made, that under this bill we were granting this woman two pensions. The fact is, as the bill makes very clear, the pension of $30 per month is in lieu of what she is now receiving.

She is now on the pension roll as the mother of a Civil War soldier and is receiving $12 a month. This bill will increase her pension to $30 a month.

Mr. DIES. Will the gentleman yield for a question?

Mr. KEATING. Certainly.

Mr. DIES. Will the gentleman from Colorado explain this language of the report of the committee:

> The pending bill treats with the Mexican War claims, and the case is prepared to be considered as if she were now pensioned as the widow of a Mexican War soldier.

Mr. KEATING. I submit, Mr. Chairman, that the gentleman from Texas has served too long in this House to imagine that we are about to pass the report. The House is considering the bill, and the language of the bill can not be misunderstood and should not be misconstrued.

Mr. DIES. Mr. Chairman, the gentleman will not criticize me very severely for following so distinguished a committee as the Committee on Pensions in their report.

Mr. KEATING. I wish the gentleman would always follow the Committee on Pensions; and when the gentleman reads from a report of the Committee on Pensions I wish he would do that committee the justice to read all of the report, which he did not do in this instance.

But now as to the facts in this case. This woman is the widow of a Mexican War veteran. She is entitled, under the general law, to $12 a month. It has been the practice of your Committee on Pensions to increase the pensions of widows of veterans of the Mexican War to $20 per month, providing the necessity for such increase could be shown to the satisfaction of the committee. We have made no attempt to conceal that fact. It has been repeatedly stated on the floor of this House. I stated it only a few weeks ago in response to a question propounded by the gentleman from Kentucky [Mr. THOMAS], and I assured him that if a bill which he was then discussing was referred to the committee, the pension of his claimant would in all probability be increased from $12 to $20.

In this case we are giving the woman $30 a month, and why? Because she not only gave her husband to his country in the Mexican War, but she gave her son to his country in the Civil War. The records show that her husband fought in the Mexican War, and that her boy died in the Civil War. Those facts were taken into consideration by the committee when it was passing on this bill. We felt that a woman who is now past 80 years of age, in straitened circumstances, whose husband fought under the colors in the Mexican War and whose boy died under the colors in the Civil War, was entitled to $30 a month from this great Government. I do not know how the constituents of the gentleman from Texas may feel about the matter, but I am quite willing to submit this case to my constituents in Colorado, and I know they will not criticize me and they will not charge me with an attempt to put my hand into the Treasury of the United States. [Applause.]

Mr. MURRAY of Oklahoma. Does any other gentleman want time?

Mr. DIES. I yield 10 minutes to the gentleman from Texas [Mr. CALLAWAY].

Mr. CALLAWAY. Mr. Chairman, I am not going to attempt to discuss these pension cases in detail. I want to discuss this matter from the standpoint of the principle of legislation. I think, however, that the Congress of the United States has about abandoned principles of legislation and has gone into the question of distributing benefits to the different interests and organizations and individuals of this country who are sufficiently fortunate as to get the ears of Members of Congress who are willing to put in their time raiding the Federal Treasury.

I discussed the system of pensions for the soldiers in the Civil War and the Mexican War heretofore, and I would not come back to the House to discuss them now but for the fact that we are about to embark on a different system of pension legislation. We are now taking in those who served in the Spanish

War. Looking at the record of this, I see that there are 436,000 of those people, most of whom are now living. The bulk of them have wives or widows, or will have wives or widows, and we can depend on at least 436,000 of these people sooner or later to come for pensions.

Mr. Chairman, under the present law every man who was injured in the service during the Spanish War receives a pension. Every man whose health was impaired by service in the Spanish War receives a pension. The widow of every man who has died on account of injury from service in the Spanish War receives a pension, and the widow of every man who shall die from injury received during the Spanish War will receive a pension. It seems to me, Mr. Chairman, that that is as far as we should go.

But here is a proposition to pick out individuals in different localities and grant them pensions, while those with less gall or less political pull or less affidavit ability, though in the same condition, fail to connect with the Federal Treasury.

Mr. Chairman, it has always been my understanding that Democrats believe in equal laws, benefits, and opportunities for all the people. Here is a proposition to pick out Tom, Dick, and Harry from different sections of the country and grant them special benefits out of the Federal Treasury. I can not see any justification in that.

But that is not the only evil in it. Here are inducements held out to 436,000 people scattered from one end of the country to the other to besiege the Representatives in Congress to get a special benefit.

What will they do to get them? Get certificates from a doctor? Yes. There may be laymen that do not know that you can get certificates from doctors, but there is no lawyer who has had any considerable practice who does not know that doctors can be found that will give certificates. There is no man who has had experience in the courts of the country who does not know that you can get evidence that you have been injured in the service. They have got them in this bill, and there is not a member of the committee that will not say that they have not had certificates and affidavits that are false and claimants before the committee with perjured testimony. There is not a member of the committee who will say that they believe all the certificates of the doctors and all the evidence that have come before that committee.

It makes me sick to look at the pension rolls of the Civil War. I know there is perjury in the list. I know there are many men getting pensions who are not entitled to them.

Another proposition: Congressmen put in all their time in the distribution of special benefits, and they come in here every other Friday and take up the time of this House distributing special benefits. One-twelfth of the time of this House is taken up in determining whether Dick, Tom, Bill, Bob, and Sally shall have their allowance raised. It is a damnable outrage on the Federal Treasury, on the intelligent electorate of this land, on our time and energies, and it is a continuous strain on the resources of the country. [Applause.]

That is not all. The system by which this Government is distributing these benefits is all wrong. How do you get them? You get at the Congressman, get him to introduce a special bill, and drive him before the committee that distributes the special benefits. The committee determines whether or not that particular Congressman is asking for too many or too few bills. It is not a question of doing justice to the men who are claimants for pensions. Oh, no; it is not a question of the justice of granting a pension to the claimant. It is a question of whether the Congressman has a right to the pension.

Mr. Chairman, sooner or later this system must be abandoned, and then no man will be so poor as to do it reverence.

The gentleman from Missouri [Mr. RUSSELL] was conducting one of these petty peculations through the House, and the gentleman from Kentucky [Mr. THOMAS] was much wrought up because he had not been getting as many bills as had members of the committee. They never do. [Laughter.] He says: "Will the gentleman from Missouri explain how it is and why it is that the members of this committee have had 25 or 30 bills during the Congress while I have had only 5 or 6?" The gentleman from Missouri said if the gentleman from Kentucky would possess his soul in patience to the end of Congress they would do even-handed justice to him, because they were expecting to distribute these things equitably to all Members of Congress.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. CALLAWAY. Mr. Chairman, I will ask the gentleman from Oklahoma to yield me some time.

Mr. MURRAY of Oklahoma. Yes; I will give the gentleman five minutes.

Mr. CALLAWAY. On last pension day, when we had this question up, and we were complaining about this grievous outrage on the Federal Treasury, the morals of the country, and the time of the House, the gentleman from Kentucky [Mr. LANGLEY] said that he would like to have had some more pensions, but they said he had all he was entitled to.

Mr. LANGLEY. Mr. Chairman, will the gentleman pardon me——

Mr. CALLAWAY. No; I will not pardon the gentleman. [Laughter.] Mr. Chairman, I can not pardon a man who is one of these pension grabbers. I do not believe the Lord will ever pardon him, and I believe if the people understood this system of legislation they would not pardon him.

Mr. LANGLEY. The gentleman did not let me finish my request. Then, if the gentleman will not pardon me, will he yield?

Mr. CALLAWAY. Yes.

Mr. LANGLEY. The gentleman did not correctly state what I said. I said I had secured the passage of all of the bills that I had been able to get considered by the committee, and I want to say now that I would have gotten more through if I could, and that I will get through all I can——

Mr. CALLAWAY. Why did not the committee allow the gentleman more?

Mr. LANGLEY. Because I do not expect to get more than my share of consideration. There are more than 400 other Members who have to be considered.

Mr. GORDON. The gentleman probably got his share.

Mr. LANGLEY. Yes; I did. And while I have the floor, if I have the voice—for it is evident that my throat is in such condition that I can scarcely make myself heard—I desire to say I thank God that I have had the privilege of passing as many pension bills through this House for the soldiers and their dependents as I have, and I am glad that I do not feel about these pension matters as does the gentleman from Texas.

Mr. CALLAWAY. No; the gentleman does not feel about it as I do, for I believe one old soldier is as good as another old soldier. I believe one man 80 years old is as good as another man 80 years old. I believe that one man penniless is as good as another man penniless, and I believe that if one man 80 years old and penniless, who served in the war, is entitled to a pension of $40 a month, every other man under this flag, under the same circumstances, is entitled to $40 a month. I believe if one nurse, as they have in this bill, blind from some cause, is entitled to a pension of $50 a month—a nurse during the Spanish War—every other nurse should have it. A nurse in the Spanish War is no more than a nurse in a hospital; they serve the sick as best they can, they usually give their entire time and energy, and they are usually devoted to the service in which they are engaged—if one nurse who is blind is entitled to a pension of $50 a month, every nurse who is blind is entitled to a pension of $50 a month.

They are going to propose pensions for all widows of these fellows who served in the Spanish War. I want to give you an instance that came under my direct observation. A fellow served in the Spanish War, went out at 21. He was gone in that service about 18 months. He never got out of the State of Texas. I have heard him say time and again that he appreciated that service of 18 months more than he did any other 18 months of his life; it was a great education to him; it was of great benefit to him. He traveled more than he ever traveled before or since in his life. He married about a year and a half ago, and about six months ago he died. Is there any reason why that woman should have a pension? There was never any danger to that man from the time he went into the service of the United States Government until he went out. He said himself that it was worth more to him than any other 18 months of his life. He traveled further than he ever traveled before, and he wore better clothes and ate better grub than he ever ate before or since, and he earned more money per month on an average than he had ever earned before or since. He lived for a time and then died, and here is a proposition to pension his widow—pension, pension, pension. Is there any equity in that?

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. CALLAWAY. Mr. Chairman, I will ask the gentleman to yield me five more minutes.

Mr. MURRAY of Oklahoma. Very well, I will yield the gentleman five minutes, but I ask him not to ruin us in those five minutes.

Mr. CALLAWAY. Mr. Chairman, if we get these Spanish War veterans and their widows on the pension rolls, no man in this House will have children who will live to see the end of that list. The last pensioner of the Revolutionary War, I be-

lieve, played out year before last. [Laughter.] It will be at least 125 years from the end of the Civil War before we will see the last Civil War pension, and, Mr. Chairman, if we put these Spanish War veterans on in the same kind of way, it will be 150 years, because they are more learned in ways of holding on to pensions. You corrupt the electorate, you corrupt the citizenship. You hold out a temptation by providing, if they make a showing they can get a pension and they have got to have certificates from doctors, and you corrupt the doctors. They must have affidavits from their fellows, and you corrupt their fellows.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CALLAWAY. I am in hopes this House will not embark on this new scheme of legislation which will add to the enormous raid on the Treasury. [Applause.]

Mr. MURRAY of Oklahoma. Mr. Chairman, I want to make this observation with reference to the granting of pensions. The matter of the distribution of pensions is of economic value to the country. There have been times in this country when but for the pensions financial troubles would have arisen, but beyond and above that is a broader reason for them—that is, reward for services to the country. You know it is a general expression that "republics are ungrateful," and sometimes they have been so. I feel ashamed when I read the history of the American Revolution that the man who financed it, who put his name and his property behind that great cause and made it possible to keep the patriots in the field, died in prison for debt. I also feel ashamed when I read the history of George Rogers Clark, who gave to this country an empire, and in his declining years someone in Congress remembered his distinguished services and moved to give him a sword, and when the committee went to wait upon him he kept his seat, and the committee asked him if he did not have some response to make. He said, "No; take the trinket back and tell Congress when I needed a sword for my country I found one, but now I need bread"; and I want to say to this House the men who fought in the wars of this country should have a reward in their declining years. [Applause.] Every country that offers these rewards in any line prospers by those rewards. Napoleon recognized that when he instituted the Legion of Honor, a system of rewards to his soldiers for great achievements. Nor did he confine these rewards to the soldiery, but extended them to all pursuits in life. The fact that we have put into our Constitution a reward for inventions has given to the American people an inventive genius nowhere else to be found in all the governments of the world in any age in any clime. A system of rewards is wholesome for any country; it makes no difference what it costs. I was taught to believe like the gentleman who has preceded me, but when I understood the other side of the question bravely I have told those with whom I have stood in the past that I was mistaken, and I believe them to be mistaken as I believe the gentleman from Texas [Mr. CALLAWAY] is mistaken. We must give rewards to the old heroes who have fought for this Republic, and we must continue to give rewards for the old heroes who will fight in all the battles of its future. [Applause.]

I now yield five minutes to the gentleman from New York [Mr. GOULDEN].

Mr. GOULDEN. Mr. Chairman, I have been so much interested, especially in the distinguished oratory of our friends from Texas, that I concluded I would not say anything upon this subject, but my friend from Oklahoma [Mr. MURRAY], with his usual eloquence, has presented the matter in such a light that I thought it but right and proper that perhaps I should express myself upon this subject. This is my excuse for taking up the time of the committee.

First, allow me to say that I have no bills before the committee from my district and am not a member of it, but I want to compliment the members not only for this report but the care which they have shown in the others that have been submitted to this House. And I desire to compliment the committee upon doing an act that should meet the approval of every Member of this House. Less than two years ago they pensioned the widow of that brave and heroic Confederate officer who at Gettysburg on July 3, 1863, led that famous charge, Gen. George E. Pickett. He was also a veteran of the Mexican War, and what the distinguished gentlemen from Texas have said would apply to the aged widow of a most distinguished officer not only of the Confederate service but of the Mexican War. No one appreciates her pension more than that bright, noble woman. The committee undoubtedly in many other cases have had similar applications for pensions to consider.

This bill has 54 cases in it. It carries the enormous sum—and I know my friend from Texas will be somewhat surprised at this—the enormous sum of $9,228 yearly increase. I am sure it will not affect any of the good people in Texas or elsewhere to pay their proportionate share of this munificent sum.

Mr. CALLAWAY. Will the gentleman yield?

Mr. GOULDEN. With pleasure.

Mr. CALLAWAY. That is the first 50. Every two weeks there will be another bill to come in here.

Mr. GOULDEN. No; not every two weeks. The custom in the past has been one in a month or six weeks.

Mr. CALLAWAY. And when the news goes out over the country that there are 436,000 that are eligible and may get in, will they not increase until it will be $500,000 or $600,000?

Mr. GOULDEN. Not one bit of it. I think I can speak for the stirring patriotism of the young men of America, our sons, who so gallantly volunteered to carry the flag into Cuba, Porto Rico, and the Philippine Islands, and say that they will answer now, as they did when they were mustered out of the service, the great majority of them at least, namely, "There is not a single thing the matter with us," although some of them were scarcely able to walk at the time they did so.

Mr. CALLAWAY. Will the gentleman yield?

Mr. GOULDEN. With pleasure, always.

Mr. CALLAWAY. Do you not think that 90 per cent of the 436,000 would get pensions if they could get them.

Mr. GOULDEN. No. Emphatically no. I should hate to believe that of the brave young men who went to the front at the call of their country in 1898 that they so lacked in civic pride and patriotism. I should feel ashamed of the young men of the American people if they could be guilty of any such thing as that. [Applause.]

Mr. CALLAWAY. Will the gentleman yield?

The CHAIRMAN. Does the gentleman from New York yield to the gentleman from Texas?

Mr. GOULDEN. I yield to my friend always with pleasure.

Mr. CALLAWAY. Do you think that these brave young heroes that went to the Spanish War, or any of them, would present false affidavits, or perjured affidavits, and perjured certificates to the committee at present?

Mr. GOULDEN. No. Most emphatically no. I would not believe it. It is incredible.

Mr. CALLAWAY. I would say to the gentleman that a member of the committee told me they looked with very grave suspicion on many of them.

Mr. GOULDEN. That might be true. If the gentleman from Texas, who perhaps was a Spanish-American War veteran, or should have been, would present affidavits to the Pension Committee, I have no doubt, even though he might happen to be a Member of Congress, they might look with suspicion on them. I would not, I can assure the gentleman of that fact.

Now, the other gentleman from Texas [Mr. DIES] has alluded to a number of cases, and I have time to take up only two or three to which he called attention. The first of them is that of the brave Capt. Edward C. McDowell.

Mr. DIES. On what page is that?

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. MURRAY of Oklahoma. How much more time have I, Mr. Chairman?

The CHAIRMAN. About 18 minutes.

Mr. MURRAY of Oklahoma. I yield five minutes more to the gentleman from New York [Mr. GOULDEN].

The CHAIRMAN. The gentleman from New York [Mr. GOULDEN] is recognized for five minutes more.

Mr. GOULDEN. I thank the chairman. In that case the man served more than three years not only in the Spanish-American War but in other places of the volunteer forces of the country.

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?

Mr. GOULDEN. With pleasure.

Mr. CALLAWAY. I thought the war lasted only about 30 days.

Mr. GOULDEN. Oh, no. The gentleman is evidently mistaken about that. I can very readily see the reason why he did not volunteer—because the war was too short to distinguish himself. It lasted more than a year, taking in the Philippine insurrection and Cuba.

Mr. KEATING. Four years.

Mr. GOULDEN. My friend from Colorado says four years; and as he was one of the brave boys at the time, he knows. This is the case of an old Confederate soldier who had courage enough and patriotism enough to volunteer in that war and to follow the old flag for one year and one month, and now, because he is over 75 years of age and in need, the committee recommend giving him a pension of $24 per month. My friend from Texas thinks it is an undeserving case. Now, I really do not believe he thinks that.

There are one or two other cases I wish to refer to. Here is one of a widow, over 80 years old, of a Mexican War veteran. Her son was a volunteer in the Civil War and was killed in battle October 5, 1864. And this is simply changing the amount which she has been receiving from a Civil War pension of $12 a month to that of a Mexican War pension of $30 a month, following the death of her husband in 1887. Now, objection is made. I do not know why, because my friend from Texas [Mr. DIES] is usually accurate on everything except on pensions.

Mr. CALLAWAY. Will the gentleman yield?

Mr. GOULDEN. With pleasure.

Mr. CALLAWAY. The only reason for pensioning this lady is that she is 80 years old, the mother of a fellow who died in the Civil War, and the widow of a person who died in the Mexican War.

Mr. GOULDEN. That is right. Do you not think that is sufficient claim on a grateful people?

Mr. CALLAWAY. If it is, every woman who is the mother of a boy who died in the Civil War and the widow of a man who died in the Mexican War ought to have a pension of $12 a month, had she not?

Mr. GOULDEN. By all means. Every one of this class should be pensioned if in needy circumstances.

Mr. Chairman, I have only time and the desire to occupy the attention of the committee for the consideration of just one more case, and that is to be found on page 76.

Mr. HOWARD. Mr. Chairman, if the gentleman will look on page 29, he will find another case.

Mr. GOULDEN. Yes.

Mr. HOWARD. I suggest to the gentleman to look at page 29, H. R. 3311, the case of Martella M. George. Does the gentleman think under any conceivable rule that could possibly be adopted by the committee a man that had the war record that this man had in the Spanish-American War could leave a widow or a mother or children or anybody else who ought to have a pension on his account?

Mr. GOULDEN. In this and other cases I yield to the superior wisdom and judgment of the Committee on Pensions, without going into a long history of that and other items in this bill.

Mr. HOWARD. That is a very fine way of dodging.

Mr. GOULDEN. Now, Mr. Chairman, I will refer to the case on page 76, as my time will not permit me to enter into a discussion with my friend from Georgia. It was introduced by the gentleman from Pennsylvania [Mr. KREIDER] as H. R. 12964. This is a most meritorious case, and I happen to know something personally about the case. I have not the time now to read the history of it, but here is a woman completely blind, whose blindness undoubtedly originated in the Philippine Islands, where she served as a trained nurse under the Government. She was a trained nurse there for four years, and I know, as a fact, that she returned from the Philippines practically blind. I know further that she is blind to-day and that she is in need. Therefore I want to say that this is a most worthy case and one that I congratulate the committee on having reported favorably.

Mr. DIES. Mr. Chairman, will the gentleman yield?

Mr. GOULDEN. Yes.

Mr. DIES. When this good woman went into the service she was examined, and the report shows that she had practically no vision in her left eye, and her right eye was seriously affected. Yet my friend thinks she lost her sight in the service.

Mr. GOULDEN. I do. I knew her before she went to the Philippines.

Mr. GORDON. Was she blind?

Mr. GOULDEN. No; not before she went to the Philippines.

Mr. DIES. I understand she lost her sight long after she returned from the Philippines by reason of an operation.

Mr. GOULDEN. She was not blind when she went into the service, but practically so when she was sent home.

Mr. DIES. The evidence shows she was not blind when she returned until after she had undergone an operation.

Mr. GOULDEN. I take my own personal knowledge of this case as being superior even to the report of the Surgeon General.

Now, taking it all in all, this bill presents a list of cases of men and women whom this House can very well indorse. I believe it to be in the interest not only of good government, but also in the interest of rewarding those who have so faithfully served the Government in the past, and I believe if this Nation is to be preserved and our institutions are to be maintained we must show proper appreciation of those who are willing to sacrifice their lives on the altar of their country. [Applause.]

Mr. MURRAY of Oklahoma. Mr. Chairman, I yield five minutes to the gentleman from Pennsylvania [Mr. KIESS].

The CHAIRMAN. The gentleman from Pennsylvania [Mr. KIESS] is recognized for five minutes.

Mr. KIESS of Pennsylvania. Mr. Chairman, it was not my intention to make any remarks upon the pending bill, but as a member of the Committee on Pensions I feel that I should say something regarding the work of that committee and, in a way, defend its action and defend this bill.

I do not claim for the Committee on Pensions that it is infallible. In fact, no committee is infallible. I do say, however, after close association with my colleagues on the committee, that no body of men are more earnest in their work or more anxious to do the right thing, and when there is any doubt we naturally sympathize with the applicant. As you all know, the cases which we take up are those that do not come under the general pension laws. These are cases where soldiers or widows can not entirely prove their claim to the satisfaction of the Pension Department.

Mr. THOMAS. Mr. Chairman, will the gentleman yield?

Mr. KIESS of Pennsylvania. I decline to be interrupted.

The CHAIRMAN. The gentleman declines to yield.

Mr. KIESS of Pennsylvania. I have only five minutes. The evidence filed in support of these private pension bills is carefully examined, and, I believe, taken as a whole, the committee needs no apology for the bills that are reported favorably. Many claims that are unjust are refused. Certainly not all the bills that are introduced and that come before the Committee on Pensions are passed.

Now, Mr. Chairman, I do not hold any brief for doctors and nurses, but I want to say here that there is no class of people that I have more confidence in and hold in higher regard than the physicians and nurses of this country. And, speaking for my own people and for the doctors of Pennsylvania, I do not believe that our doctors would give perjured or false testimony to enable anyone to get a pension. As for the doctors of Texas, I can not speak. In fact, I know very little about Texas, but I am learning some things from the men who are sent here to represent that great State. It has been my former experience in a legislative body, and it is borne out here in Washington, that the men who are crying the loudest about the raids on the Treasury and the amount of money that is expended are the same men who are wasting hours and days of the valuable time of this great Congress in a useless discussion of unimportant matters. As for me, instead of continually speaking on the floor of this House, I am willing to save that time, which is at a great expense to the country, and allow the money to go to soldiers and sailors who fought for their country and to their widows. [Applause.]

I agree fully with the remarks that were made by the gentleman from New York [Mr. GOULDEN], and I know that I am representing the wishes of my constituents when I advocate just and fair pensions to the men who enlisted in the service of our country. [Applause.]

Mr. MURRAY of Oklahoma. Mr. Chairman, I yield five minutes to the gentleman from Pennsylvania [Mr. KREIDER].

The CHAIRMAN. The gentleman from Pennsylvania [Mr. KREIDER] is recognized for five minutes.

Mr. KREIDER. Mr. Chairman and gentlemen of the committee, in view of the fact that H. R. 12964, granting a pension to Martha R. Allwein, has been mentioned a number of times in these discussions, I think it is only right and proper that I should make a statement regarding it.

In the first place, reasons have been given by the distinguished gentleman from Texas [Mr. DIES] as to why these pension bills are brought here. As to those charges I want to plead "not guilty." There is absolutely no politics, no farming out, in this proposition, whatever. Miss Martha R. Allwein, the beneficiary of this bill—and I say this frankly—has no connection with me in any way, political or otherwise. As far as I know the people of her entire relationship are Democrats.

Mr. GOULDEN. Correct,

Mr. KREIDER. I do not think there is one in the entire family that supported me for Congress, and if I should run again I know of no one in her entire family relationship who would support me.

Mr. GOULDEN. If the gentleman will permit, right there, I wish to say that when they failed to support the gentleman they did not know him, but now that they know him and know he is capable of representing a great district in Congress, I think I am quite safe in saying that they will favor him hereafter. [Applause.]

Mr. DIES. Mr. Chairman, will the gentleman yield?

Mr. KREIDER. I want to say that I think the gentleman is incorrect when he states that this woman's eyesight was defective when she entered the service.

Mr. DIES. That fact is stated on page 77 of the report.

Mr. KREIDER. I want to call attention to the fact that the gentleman who makes that affidavit on page 77 swears that the first time he saw this woman was in 1898. I want to call attention to the fact that she volunteered and entered the service in 1904; that she was four years in the service—two years of which was spent in the Philippine Islands, during which time this cataract in the eye developed; and this operation was performed after she had been honorably discharged from the service at her own request for the express purpose of having an operation performed on the eyes, with the hope and belief that the other eye might be saved; and this affidavit to which the gentleman has referred shows that the party making it swears he did not see her until the 2d day of May, 1908.

Mr. DIES. Mr. Chairman, my friend is talking about one thing, and I am talking about another. I am talking about the report of the Surgeon General of the United States Army, in which he says that a report of this examination shows that she had practically no vision in her left eye, and also she had a mitral systolic heart murmur.

Mr. KREIDER. When was that?

Mr. DIES. This report is dated March 2, 1914.

Mr. KREIDER. It shows that she had no vision practically when she left the Army.

Mr. DIES. If my friend will indulge me, the full report says:

Prior to her appointment she was examined, on September 15, 1904, by a civilian physician in Philadelphia, who reported her free from disability. She was examined by an Army surgeon at the general hospital, San Francisco, on December 4, 1904 (eight days after her appointment), and a report of this examination shows that she had practically no vision in her left eye.

Mr. KREIDER. I am not questioning the good faith in which the report was made, but I think there is a mistake in that report. It is not reasonable to suppose that any Army officer would accept as a nurse for the United States Army a woman whose eyesight was so defective "that she had practically no vision in her left eye," or that after it had been discovered she would be kept in the service for four years and sent to the Philippine Islands, probably the worst place on earth for anyone with defective eyesight. Nor would anyone with defective eyesight accept service in these islands.

Mr. THOMAS. Mr. Chairman——

The CHAIRMAN. Does the gentleman yield?

Mr. KREIDER. Only for a moment. I have only five minutes.

Mr. THOMAS. I wish to thank the gentleman for his courtesy. I wish to ask him the same question that I desired to ask the gentleman who preceded him, whose name I do not know, and no one around me seems to know.

Mr. MURRAY of Oklahoma. It was the gentleman from Pennsylvania [Mr. KIESS].

Mr. THOMAS. There are about 50 pensions granted in this bill. I wish to ask how many of those go to members of the Pension Committee?

Mr. KREIDER. I do not know. I am not a member of the Pension Committee.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MURRAY of Oklahoma. I yield to the gentleman one minute more.

Mr. KREIDER. I want to say——

Mr. GORDON. Will you answer this——

Mr. KREIDER. No; I refuse to yield now. I want to say that this pension business should not be looked upon from the standpoint of politics or favors. The Government is to-day soliciting men to enter its service; and I, as a private individual, want to go on record as being in favor of Government liability as well as employers' liability. I have favored such a law all my life, and I believe the Government ought to take care of those who are injured while in the service of the Government or who from any cause lose their earning capacity while in the employ of the Government, whether it be in the Army or elsewhere. I believe it is no more than right that the Government should take care of its employees the same as private individuals or corporations. This woman has been made the object of an attack which is altogether due to the fact that the gentlemen are not familiar and do not understand the facts in the case. She is a woman as honest as the day; a bright, keen, intelligent woman, who is absolutely blind, and blind as the result of her service to her country. She is helpless. Her father and mother are both dead. She is without a cent to live on, and is being supported by her sister, whose husband earns his living by manual labor. [Applause.]

Mr. MURRAY of Oklahoma. Mr. Chairman, in reply to the remarks made by the gentleman from Kentucky [Mr. THOMAS], I have asked the members of the Pension Committee sitting around me if they have any claims in this bill. I wish to say that I have not had in this Congress a report of a pension claim from this committee. Mr. KIRKPATRICK has none in this bill; neither RICHARDSON, KEY of Ohio, DERSHEM, GRIEST of Iowa, AVIS, WALTERS, nor MACDONALD. Four of the committee—KEATING, SMITH, KIESS of Pennsylvania, and DALE—have one each in this bill. Mr. SELLS has two. I make this statement in justice to the committee, because of the insinuations made by the gentleman from Kentucky [Mr. THOMAS].

Mr. THOMAS. Mr. Chairman——

Mr. MURRAY of Oklahoma. I decline to yield.

Mr. THOMAS. Thank you.

Mr. MURRAY of Oklahoma. Those are all the Members whom I know anything about, and only five members of the committee have claims in this bill.

Mr. Chairman, we are ready to yield up the balance of the time.

The CHAIRMAN. All time has expired. The Clerk will read.

The Clerk read as follows:

The name of Louis K. Turner, late of Company D, Third Regiment Wisconsin Volunteer Infantry, War with Spain, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

Mr. DIES. Mr. Chairman, I move to strike out the last word. I am as sure as I live that neither the gentleman from Pennsylvania [Mr. KREIDER] nor any other gentleman wishes to do me an injustice with respect to this case of Martha R. Allwein, and I feel just as sure for myself that I wish only to state the facts. Because of what the gentleman from Pennsylvania [Mr. KREIDER] has said, I wish to state that what I have said in all these cases I have taken from the official reports and not from lay witnesses. The report of the Surgeon General of the United States Army is as follows:

Prior to her appointment she was examined, on September 15, 1904, by a civilian physician in Philadelphia, who reported her free from disability. She was examined by an Army surgeon at the general hospital, San Francisco, on December 4, 1904 (eight days after her appointment), and a report of this examination shows that she had practically no vision in her left eye.

Now, after her service to the Government was over for some time, when she was no better and probably in a little worse condition, she consulted a physician with reference to the removal of that cataract from the left eye. The doctor very frankly told her that it might cost her the sight of the other eye. The report of the physician—a Government physician, I suppose—sums up the whole matter and says she decided to accept the risk, and on May 28, 1908, they extracted, and so forth.

Boiled down, it means that she went into the service with her vision impaired—practically no vision in the left eye—served through several years as a nurse, principally in the officer's family, came out of it in a little worse condition than she went in, and then consulted the physician. She accepted the risk, the operation was performed, and she went blind. I say it had no connection with the service, and that $50 a month is out of all proportion to the amount allowed for nurses in the Civil War, which is $12 a month.

The Clerk read as follows:

The name of Martella M. George, widow of W. E. George, late of Company D, Twenty-third Regiment Kansas Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month, and $2 additional for each of four minor children until they reach the age of 16 years.

Mr. CALLAWAY. Mr. Chairman, I move to strike out the last word. I ask unanimous consent to insert in the RECORD the report on this case of Martella M. George, widow of W. E. George, Twenty-third Regiment Kansas Volunteer Infantry, War with Spain.

Mr. MURRAY of Oklahoma. I object, Mr. Chairman, for the reason that all the evidence was not put in by the clerk. I can explain why the report was written in that way. It was due to an oversight by the clerk, and in no way belongs to the committee. I object.

Mr. CALLAWAY. May I ask the gentleman a question about it?

Mr. MURRAY of Oklahoma. Yes.

Mr. CALLAWAY. Did not the committee make up the report?

Mr. MURRAY of Oklahoma. The gentleman will understand that we have to leave some things to be put in by the clerk.

Mr. CALLAWAY. Do we not understand that the report comes from the committee?

Mr. MURRAY of Oklahoma. The committee is ready to defend its report.

Mr. CALLAWAY. The gentleman says the report is not correct?

Mr. MURRAY of Oklahoma. All the evidence that we have is not in it.

Mr. CALLAWAY. The part that I want to insert in the RECORD is in the report.

Mr. MURRAY of Oklahoma. I object.

The CHAIRMAN. The gentleman from Oklahoma objects, and the Clerk will read.

The Clerk read as follows:

The name of Edward F. Smith, late of Battery H, Third Regiment United States Artillery, War with Spain, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

Mr. THOMAS. Mr. Chairman, I move to strike out the last word. Mr. Chairman, a little while ago I made inquiry as to the number of pensions in this bill which go to the constituents of the Pensions Committee. I made that inquiry in perfect good faith, for the reason that I had heard it stated that 27 of the 50 pensions in the bill go to States represented by members of the Pensions Committee. I asked the question because I desired information upon that subject, as I know that Members of this House, many of them, who have bills before the Pensions Committee have not received a single pension for their constituents.

I asked the gentleman from Oklahoma to yield to me, and he refused and yielded back his time to the chairman. He made the statement that he has not received or his constituents have not received or asked for any pensions. Well, Mr. Chairman, that is the first time that I ever knew that there was no one from the gentleman's district who fought in the Spanish-American War, because if there had been any volunteers from the gentleman's district he would have been trying to get them a pension, and doubtless would have got them all one before now from his committee, which is so generous to its own members.

Mr. Chairman, I am in favor of pension bills. I have always voted for every pension bill that has been presented to this House. I do not know whether these pensions have been properly distributed over the country or not, but that was what I was seeking information about. I am entitled to the information.

Mr. Chairman, I think that these pensions ought to be properly distributed among the Members. Of course this committee can not pension everybody. I have never had a pension reported by this committee. I have bills before it for people who should receive pensions, and the proof has been filed, and I think that I and other Members of this House should receive the same consideration at the hands of the committee as they apparently so generously accord to themselves.

The Clerk read as follows:

The name of George B. Weesner, late of Company D, Thirty-second Regiment United States Volunteer Infantry, War with Spain, and pay him a special pension at the rate of $30 per month.

Mr. DIES. Mr. Chairman, I move to strike out the last word. I want one word more, and I am not going to try the patience of the committee much longer. My friend from Pennsylvania complimented himself that he did not take up any time of Congress, but was disposed to criticize me for taking up so much valuable time on pension matters. I say to the committee that if it sincerely believes that Congress does not want these monstrosities pointed out to it, and if it was not my duty to point them out, representing 300,000 people, I would not take up the time of the committee. I do not care to make speeches as much as that. I have some information on some things of this kind, and I feel that it is my duty to point them out. Unless you indicate that you want the matters covered up so that the people will not reach the right idea, I shall continue to call attention to what I believe is the wrongful use of the power of taxation and of appropriation of the public money.

Now, with reference to what my friend said about none of the members of the committee having more bills than other Members. There is no use to get behind the bush about it; we all know the members of the committee give themselves more in the run of time than they do other Members of Congress. There is no use to talk about that. In this bill I do not know what each individual Member got, but I know that the members of the committee represent 13 States, and these 13 States got 27 bills and the balance of the States got 27. In the bill passed a little while ago the committee represented 15 States, and they got 140 bills and the balance of the United States got 63. I just throw that in because it keeps the record straight and we will know what we are doing.

Mr. HOWARD. Mr. Chairman, I move to strike out the last two words. I want to make just a few observations on this particular bill, because this is one pension bill about which I can talk and no one can accuse me of being prejudiced in my views about it. I happen to have in my possession an honorable discharge as a private soldier in the Spanish-American War [applause], and I do not possess any one thing that I prize more than I do that discharge as a private soldier in the Volunteer Army of the United States in the War with Spain. But I want to say now that under no conceivable law can I ever expect the Government of the United States to pension me or my wife or my children by virtue of that service. I will say why I do not believe they ought to do it, and I hope that if ever I apply for a pension from my Government the record that I am now making will be used against me, or if any that are near and dear to me ever make application for a pension by virtue of my humble service to my country when it needed me, that this record will be used against them, because of the fact that I did nothing but my duty as an American citizen and volunteered my service to help save my country. As was once said by Georgia's immortal Hill, "He who lets his country die, lets all things die, and all things dying curse him; but he who lets his country live, lets all things live, and all things living bless him." That is the reason I volunteered my services at the call. I wanted to help preserve with my humble services the greatest Republic that the sun of God ever shone upon, because the Government of this Republic has protected me and I wanted to contribute my mite to its protection when it called me. [Applause.]

Outside of the graft that is going on in the matter of these pensions, which is creeping into the Spanish-American pension and which has crept into this bill to-day, if I had been upon the floor and my attention had not been diverted from the bill at the time, I would have called attention to a precedent that this committee has set to-day. I have no criticism to make of the membership of this committee or anything which in their wisdom they may do, but they have set a precedent to-day in the passage of this bill which, as has been said by distinguished gentlemen on both sides of the House, will let the camel's nose into the tent, and as a result this Government will be plundered out of hundreds of thousands of dollars in the future because of the fact that you have set this precedent; and in doing so, you, gentlemen, kind hearted, big hearted, generous, and liberal, let your heart run away with your head. I refer to the case of Martella M. George, being H. R. 3311, appearing on page 29 of the report, and when you gave that woman a pension for herself and her minor children you set a precedent that is going to cost this Government hundreds of thousands of dollars, because her husband was a worthless, trifling, immoral, and licentious man.

Mr. DIES. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. Yes.

Mr. DIES. Is that the case which the gentleman from Oklahoma [Mr. MURRAY], in charge of the bill, declined to let the report of go into the CONGRESSIONAL RECORD?

Mr. HOWARD. Yes; and I do not blame him for being ashamed to let it go into the RECORD. The case ought to be stricken from this bill, and had I been in the Chamber to assert my rights at the particular moment this item was reached, I would have made the motion to strike it out—not because I have no sympathy with that woman, not because I do not sympathize with those fatherless children, but because of the fact that you open the gate for all of the worthless men that ever enlisted for what they could get out of it to come in here and draw a pension from the Government of the United States alongside of the man who did actual service, prompted by patriotic motives.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. HOWARD. Mr. Chairman, I ask unanimous consent to proceed for five minutes more, and I shall not consume any more time than that.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HOWARD. Mr. Chairman, as was said by my distinguished friend from Oklahoma [Mr. MURRAY], the only reason on earth for the existence of an Invalid Pension Committee and a Committee on Pensions is the fact that in a great many cases these committees are called upon to do equity, equity to mete out a competency to some particular soldier or the widow of some particular soldier in a case where the law covering a great class generally is deficient—a worthy and meritorious case—and these cases are based on equity, and when you deal with a case in the Committee on Pensions you should deal with it on the basis of absolute equity and nothing else, because there is no particular rule upon which you can grant a pension under the private-pension laws——

Mr. WILSON of Florida. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. Yes.

Mr. WILSON of Florida. Did this soldier marry subsequent to the Spanish-American War?

Mr. HOWARD. I have not looked into that, but I think he did.

Mr. DIES. Yes; he did.

Mr. HOWARD. I think the record shows that he married subsequent to the war.

Mr. DIES. He married in 1900.

Mr. HOWARD. He married in 1900 and he enlisted in 1898, and went out of the service shortly thereafter for disability not incident to service. I am not criticizing the committee, because if there is anyone on earth for whom I have sympathy it is a widow and little children, but we must be heartless in some things to protect the taxpayers of this country from the enormous burden that is resting upon them by virtue of the indiscriminate granting of pensions to people who really, in a great many instances, do not deserve them. Mr. Chairman, I ate hardtack until I was afraid to go out in the rain, for fear if I got wet spontaneous combustion would take place. I ate embalmed beef, and I fought mosquitoes, and that is all I had to fight. The Government did the best it could, I expect, under the circumstances, to feed me. The Government gave me shoes and good clothes to wear, and I have no hospital record save the contraction of a bad cold. But here is a man who went into the service with a disease, an awful disease, an unmentionable disease. He knew he had that disease when he went into the service, and he stayed there as long as he could hang around, and they discharged him because he was unfit for the service. Ten years after he died from typhoid fever, and an attempt is made to show that that typhoid fever was an incident to his service. They could not do that, and now they come in here and give his wife this pension for herself and these children without any evidence to support, while many worthy widows and innocent little children of worthy soldiers are alone in their penury and destitution, because they have not the ear of their Congressman. There are enough worthy cases to consume all the time this committee can devote to its duties.

Let me suggest this by way of conclusion: There is going to be a new order of things in this country from now on, and you gentlemen are going to see it. A great many of the influential citizens of this country—and I say that it is just that they should do it—are not going to pay any more money into the till indirectly, but they are going down into their pockets, and they are going to pull out the coin of the realm, and they are going to lay it on the internal collectors' table in hard cash, and then, when they commence to put down $100,000,000 or more a year out of their pockets that they ought to have put down years ago to contribute to the upkeep of this Government, these men, who know something about business methods, who have been prosperous, are going to see that the administration of this Government is administered along the lines of business principles and that it is economical and judicious in expenditures. Now, you mark my prediction.

Mr. MADDEN. Will the gentleman yield?

Mr. HOWARD. Yes.

Mr. MADDEN. I think what the gentleman says would be true but for the fact that the bill to which he refers affects only one-half of 1 per cent of the people of the United States.

Mr. HOWARD. Well, under Democratic rule from now on the people are going to make so much money that 90 per cent of them will pay this income in a few years.

Mr. LANGLEY. If the gentleman is sure of that, it is about time they started to make the money, because they have had several months' opportunity and they have not made any headway in that direction under this Democratic administration.

Mr. HOWARD. Oh, the gentleman is mistaken about that; he has acquired the habit that many gentlemen of faith have of joining the calamity howlers.

The CHAIRMAN. The time of the gentleman has expired.

The Clerk read as follows:

The name of Mary A. Dow, dependent mother of William C. Dow, late captain, Forty-third Regiment United States Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month.

Mr. THOMAS. Mr. Chairman, I move to strike out the last word. Mr. Chairman, a while ago I stated that I had never got a pension through this Pension Committee for any of my constituents, but I did get one passed in the House over the protest of the committee. That was for the widow of a Mexican soldier, Mrs. Ross. She was in the county poorhouse of Edmonson County at the time the bill was passed. Since then she has died. The bill has not yet been reported in the Senate. She was between 85 and 90 years of age. She died in a county poorhouse. She was a good old Christian woman, and I am confident has gone to a better land, where there is neither poverty nor pension committees.

Mr. MURRAY of Oklahoma. Mr. Chairman, I make the point of order the gentleman is not discussing the bill before the House or any bill before the House.

Mr. THOMAS. The gentleman is not before the House. [Laughter.]

The Clerk resumed and concluded the reading of the bill.

Mr. MURRAY of Oklahoma. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the recommendation that the bill do pass.

The motion was agreed to; accordingly the committee rose, and the Speaker having resumed the chair, Mr. BURKE of Wisconsin, Chairman of the Committee of the Whole House, reported that that committee had had under consideration the bill H. R. 14546, and had directed him to report the same to the House with the recommendation that the bill do pass.

Mr. DIES. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. DIES. I want to make the point of no quorum at such point as will secure a roll call on the bill. What time do I make it?

The SPEAKER. The gentleman can make that on the vote.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time.

The SPEAKER. The question is, Shall the bill pass?

Mr. DIES. Now, Mr. Speaker, I desire to make the point of no quorum.

The SPEAKER. The gentleman from Texas makes the point of no quorum. Evidently there is not a quorum present and the Doorkeeper will close the doors, the Sergeant-at-Arms will notify absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 230, nays 50, answered "Present" 6, not voting 146, as follows:

YEAS—230.

So the bill was passed.

The Clerk announced the following pairs:

For the session:

Mr. HOBSON with Mr. FAIRCHILD.

Mr. ADAMSON with Mr. STEVENS of Minnesota.

Mr. SCULLY with Mr. BROWNING.

Until further notice:

Mr. GORMAN with Mr. KENNEDY of Rhode Island.

Mr. GEORGE with Mr. GRIEST.

Mr. CLANCY with Mr. DUNN.

Mr. BELL of Georgia with Mr. BURKE of South Dakota.

Mr. SIMS with Mr. FESS.

Mr. PALMER with Mr. EDMONDS.

Mr. TAYLOR of Alabama with Mr. HUGHES of West Virginia.

Mr. GRIFFIN with Mr. WINSLOW.

Mr. KENNEDY of Connecticut with Mr. J. M. C. SMITH.

Mr. DALE with Mr. MARTIN.

Mr. ADAIR with Mr. BARCHFELD.

Mr. BAILEY with Mr. AINEY.

Mr. BARNHART with Mr. BARTHOLDT.

Mr. BRODBECK with Mr. BUTLER.

Mr. BURNETT with Mr. CAMPBELL.

Mr. CARLIN with Mr. BURKE of Pennsylvania.

Mr. CARTER with Mr. COOPER.

Mr. CLARK of Florida with Mr. COPLEY.

Mr. COLLIER with Mr. DILLON.

Mr. COVINGTON with Mr. GOOD.

Mr. CULLOP with Mr. FALCONER.

Mr. DAVENPORT with Mr. FARR.

Mr. DIXON with Mr. HAMILTON of Michigan.

Mr. FINLEY with Mr. HOWELL.

Mr. FITZGERALD with Mr. CALDER.

Mr. GARRETT of Tennessee with Mr. KEISTER.

Mr. WHALEY with Mr. KENT.

Mr. HAY with Mr. MERRITT.

Mr. HEFLIN with Mr. MCGUIRE of Oklahoma.

Mr. KINDEL with Mr. Moss of West Virginia.

Mr. KITCHIN with Mr. MONDELL.

Mr. KORBLY with Mr. MANAHAN.

Mr. LLOYD with Mr. MOORE.

Mr. LONERGAN with Mr. MORIN.

Mr. MCCOY with Mr. PAIGE of Massachusetts.

Mr. MITCHELL with Mr. PETERS of Maine.

Mr. MORRISON with Mr. PLUMLEY.

Mr. NEELY of West Virginia with Mr. PORTER.

Mr. OLDFIELD with Mr. PROUTY.

Mr. PETERSON with Mr. SLEMP.

Mr. RAINEY with Mr. ROBERTS of Massachusetts.

Mr. SHERWOOD with Mr. ROBERTS of Nevada.

Mr. SCULLY. Mr. Speaker, did the gentleman from New Jersey, Mr. BROWNING, vote?

The SPEAKER. He did not.

Mr. SCULLY. I have a pair with the gentleman. I voted "yea," and I wish to withdraw that vote and vote "present."

The name of Mr. SCULLY was called, and he voted "Present."

Mr. KINDEL. Mr. Speaker, I voted "yea," but I understood that I was paired with somebody, so I leave it with the pair and vote "present."

The name of Mr. KINDEL was called, and he voted "Present."

The SPEAKER. On this vote the yeas are 231, nays 49, voting "present" 6. A quorum is present. The Doorkeeper will open the doors.

On motion of Mr. MURRAY of Oklahoma, a motion to reconsider the vote by which the bill was passed was laid on the table.

## EXPOSITION AT PANAMA (H. DOC. NO. 840).

The SPEAKER laid before the House the following message from the President of the United States, which was read and, with the accompanying papers, referred to the Committee on Foreign Affairs and ordered to be printed.

*To the Senate and House of Representatives:*

I transmit herewith a report from the Secretary of State in relation to the invitation from the Government of Panama to this Government to participate in an exposition which is to open at the city of Panama on November 3, 1914, and I join with the Secretary of State in strongly recommending the authority of Congress for the acceptance of the invitation and an appropriation of $100,000 to enable suitable participation by the United States.

As the exposition will open as early as November 3 next, prompt action by Congress on the recommendation is essential to proper and adequate preparation for the participation.

WOODROW WILSON.

THE WHITE HOUSE, *March 17, 1914.*

## LEAVE OF ABSENCE.

Mr. REILLY of Connecticut, by unanimous consent, was granted leave of absence for an indefinite period of time, on account of illness.

## RIVERS AND HARBORS.

Mr. SPARKMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 13811, being the rivers and harbors bill; and pending that, I ask unanimous consent that six hours be devoted to general debate, one half of the time to be controlled by myself and the other half by the gentleman from Washington [Mr. HUMPHREY].

Mr. HUMPHREY of Washington. Mr. Speaker, reserving the right to object, I would like to ask the gentleman if he can not yield more time? I have had requests for more, and I feel I must ask that we have four hours on this side.

Mr. SPARKMAN. Will four hours, then, be satisfactory on that side?

Mr. HUMPHREY of Washington. I think we can get along with four hours, and I do not see how we can get along with any less.

Mr. SPARKMAN. Then, Mr. Speaker, I change the request to eight hours instead of six, one half to be controlled by myself and the other half by the gentleman from Washington.

The SPEAKER. The gentleman from Florida [Mr. SPARKMAN] moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 13811; and, pending that, asks unanimous consent that general debate be limited to eight hours, four hours to be controlled by himself and four hours by the gentleman from Washington [Mr. HUMPHREY]. Is there objection?

Mr. DONOVAN. Mr. Speaker, reserving the right to object, I would like to ask the chairman of the committee if he does not allow those who are opposed to the bill to have any time? I understand the gentleman from Washington [Mr. HUMPHREY] is in favor of the report. Now, that is giving all the time to one side. I asked the gentleman the other day to give me a few minutes, and he declined. I saw the gentleman from Washington [Mr. HUMPHREY], and I asked him if he was in favor of the bill, and he said he was, and he refused to give me time. Now, here is the situation: A bill comes up here carrying some $40,000,000, and the time is taken up by those who are in favor of the measure. I suggest to the chairman that such an unfair proposition should not be tolerated.

Mr. SPARKMAN. Mr. Speaker, I will say for the benefit of the gentleman that there was no intention whatever on my part to discriminate against him. As I recall, he came to me asking for time after it had all been, practically, parceled out or promised to other parties. And I will say, further, that I did not know at the time, nor do I know yet, on which side of the

question all the parties to whom I have agreed to yield time will speak; or, in other words, whether any of them are opposed to the bill or whether all are in favor of the measure. If I can find time to allot the gentleman I will be very glad to yield him such time as I may be able to spare. I will say this, however, to him, that under the five-minute rule he can no doubt get all the time he may need.

Mr. DONOVAN. Mr. Speaker, the gentleman from Washington [Mr. HUMPHREY] admitted to me that he was in favor of the bill. Now, the point is, the time is wholly closed up. They refused to give me a few minutes. Why, the other day there was a $600,000 appropriation bill, and I believe they allowed the opposition 3 minutes. I took 37 minutes. The Agriculture bill came along, and every moment of the time they took themselves and nothing for the opposition. Now, those things smack of the way they do in Russia. This is a free country. I am only a four-hundred-and-thirty-third part of this body, but I am opposed to the bill. The gentleman from Washington [Mr. HUMPHREY] gleefully gloated over the fact that he was in favor of the bill. [Applause.]

The SPEAKER. Is there objection?

Mr. DONOVAN. Mr. Speaker, I am going to insist on 15 minutes, or I am going to object.

Mr. MANN. Maybe the gentleman from Florida [Mr. SPARKMAN] will modify his request so as to give 15 minutes to the gentleman from Connecticut [Mr. DONOVAN].

Mr. SPARKMAN. Mr. Speaker, I modify my request so as to give the gentleman 15 minutes.

The SPEAKER. The gentleman from Florida [Mr. SPARKMAN] asks unanimous consent that the time for general debate be limited to 8 hours and 15 minutes, 4 hours of it to be controlled by himself and 4 by the gentleman from Washington [Mr. HUMPHREY] and 15 minutes by the gentleman from Connecticut [Mr. DONOVAN]. [Laughter.] Is there objection?

Mr. FOWLER. Mr. Speaker, reserving the right to object, I desire to ask the chairman of the committee if I may have some time to present a proposition for the Ohio River?

Mr. SPARKMAN. Why, I will say to the gentleman that I have understood for some time that he desired to make a motion, possibly, to amend the bill so as to embrace some proposition on the Ohio River, which he must do, of course, under the five-minute rule if at all, when he can doubtless get all the time he may desire. So far as I am concerned, I will see that he does get whatever reasonable time he may wish.

Mr. FOWLER. Yes; but I want to get my proposition before the Committee of the Whole House on the state of the Union before we commence to read the bill.

Mr. SPARKMAN. Will 10 minutes suffice for the gentleman?

Mr. FOWLER. No; I do not think I can do it in 10 minutes. I want 30 minutes.

Mr. SPARKMAN. I want to say, Mr. Speaker, that there are many requests for time. I would like to accommodate everybody if I could see my way clear to do so. If we had it, I would like to yield time to everyone who may desire to address the House on this or any kindred subject, but we have to draw the line somewhere. If 10 minutes will suffice for the gentleman from Illinois, I will see that he gets that much time.

Mr. FOWLER. Why not make your request for nine hours, and give Members of the House who have propositions they would like to get before the House an opportunity to do so, so that they may be fairly understood?

Mr. SPARKMAN. Well, there is a great desire to get this bill through and out of the way of other important matters that are to follow.

Mr. FOWLER. I am anxious to expedite the transaction of business, because I want Congress to adjourn, but this is an important matter to me. It is a matter of life and death to my people.

Mr. FOSTER. Mr. Speaker, it seems to me there ought to be some provision made for a division of time to men who want to get something out of the bill instead of all the time being given to those who want to get something into it. [Laughter.] I speak for the former class.

Mr. MADDEN. Did they not let in the gentleman from Connecticut [Mr. DONOVAN]?

Mr. FOSTER. Yes; for 15 minutes. But that is only 15 minutes out of 8 hours. There are others who desire to eliminate some features of the bill.

Mr. MANN. Mr. Speaker, my colleague knows, as everybody else in the House knows, that general debate on any one of these bills is not confined ordinarily to the bill, and most of the debate that relates to the bill is had during the reading of the bill under the five-minute rule, where time is usually graciously extended.

Mr. FOSTER. Then we ought to strike out a lot of this time occupied in the delivery of speeches that do not refer to the bill at all.

Mr. MANN. Perhaps so; but the right of Members to make speeches in the House has not been abridged heretofore, and will not be right away. I think probably my colleague [Mr. FOSTER] has a good case and ought to have some time. [Laughter.]

Mr. MADDEN. I can add to that that my other colleague is a very bright debater under the five-minute rule and very persuasive, and generally gets what he wants; and I commend him in the consideration of the bill under the five-minute rule, for I know that he will be able to present his case so forcibly that he will get what he wants.

Mr. FOWLER. The gentleman evidently does not refer to me. [Laughter.]

Mr. MADDEN. I refer to both of my colleagues, for that matter.

Mr. FOSTER. It is as difficult a matter to get something out of a bill as it is to get something in.

Mr. MANN. Both are impossible. [Laughter.]

The SPEAKER. Is there objection?

Mr. FOWLER. Mr. Speaker, I do not want to object, but I would like to get the opportunity to present my proposition to the committee.

Mr. MANN. I hope my friend from Florida will give my colleague [Mr. FOWLER] that extra half hour, even if the time has to be extended.

Mr. HUMPHREY of Washington. I hope, Mr. Speaker, that the gentleman from Florida will agree to that.

Mr. SPARKMAN. Say eight hours and a half.

Mr. MANN. Make it eight hours and a half and give the gentleman from Illinois [Mr. FOWLER] 15 minutes extra. That will be all right.

Mr. SPARKMAN. I will do the best I can.

Mr. FOWLER. If I can get 30 minutes, that will do. I suggest that the gentleman from Florida make his request for eight hours and three-quarters.

Mr. SPARKMAN. Mr. Speaker, I change my request, then, to eight hours and three-quarters.

The SPEAKER. The gentleman from Florida [Mr. SPARKMAN] asks unanimous consent that general debate on this bill be limited to 8 hours and 45 minutes; 4 hours to be controlled by the gentleman from Washington [Mr. HUMPHREY], 4 hours to be controlled by himself, 15 minutes by the gentleman from Connecticut [Mr. DONOVAN], and 30 minutes by the gentleman from Illinois [Mr. FOWLER]. Is there objection? [After a pause.] The Chair hears none, and it is so ordered. The question is on agreeing to the motion.

The motion was agreed to.

Mr. HULINGS. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Pennsylvania rise?

Mr. HULINGS. I rise for the purpose of asking unanimous consent to address the House for 30 minutes at the conclusion of the general debate on this bill.

The SPEAKER. The gentleman from Pennsylvania [Mr. HULINGS] asks unanimous consent to address the House for 30 minutes at the conclusion of the general debate on this bill.

Mr. HARDWICK. Reserving the right to object, Mr. Speaker, I am prompted to inform the gentleman that the Committee on Rules has arranged to report the Panama Canal bill at the conclusion of the consideration of this bill.

Mr. MANN. Mr. Speaker, as long as the matter is before the House, I would suggest that, in view of the division of time, the gentleman from Pennsylvania should have 30 minutes during the debate.

Mr. HARDWICK. Oh, yes.

Mr. MANN. I make that request—that the gentleman from Pennsylvania [Mr. HULINGS] have 30 minutes.

Mr. HARDWICK. During the general debate on this bill?

Mr. MANN. Yes; during the general debate on the river and harbor bill, in addition to the time already specified.

Mr. EDWARDS rose.

The SPEAKER. For what purpose does the gentleman rise?

Mr. EDWARDS. To reserve the right to object.

Mr. MANN. Did the gentleman object?

Mr. EDWARDS. I reserved the right to object.

Mr. HARDWICK. I thought that the gentleman withdrew his request.

The SPEAKER. No. The gentleman from Illinois made another request.

Mr. MANN. To give the gentleman from Pennsylvania [Mr. HULINGS] 30 minutes in general debate, in addition to the time already allotted.

Mr. EDWARDS. Would not that extend the general debate until nine hours and a quarter?

Mr. MANN. Yes.

The SPEAKER. That is exactly what it would do.

Mr. MANN. After all, Mr. Speaker, no provision was made directly for any member of the Progressive Party in the House. I think the request is a modest request.

The SPEAKER. The gentleman from Illinois asks unanimous consent that the gentleman from Pennsylvania [Mr. HULINGS] shall have 30 minutes in addition to this eight hours and three-quarters of general debate on the river and harbor bill. Is there objection? [After a pause.] The Chair hears none.

Mr. BARKLEY. Mr. Speaker, reserving the right to object, I should like to ask the gentleman from Pennsylvania [Mr. HULINGS] on what subject he is going to address the House?

Mr. HULINGS. I propose to address the House on the Mexican question.

Mr. BARKLEY. I object.

The SPEAKER. It is too late to object.

Mr. BARKLEY. I was on my feet asking for recognition, Mr. Speaker, at the time the Chair announced.

The SPEAKER. The Chair put the question fairly, and the gentleman had plenty of time. The Chair thinks the objection comes too late.

Mr. FOSTER. Mr. Speaker, I think the Chair did not hear the gentleman. He was on his feet.

The SPEAKER. If the gentleman from Kentucky was on his feet seeking recognition, the Chair will recognize him.

Mr. BARKLEY. I was going to reserve the right to object for the purpose of inquiring of the gentleman from Pennsylvania on what subject he intended to address the House.

Mr. HULINGS. I have already answered that question. Mr. Speaker, I have not occupied much of the time of this House. I have some observations to make which I think will come in play upon this subject—the river and harbor bill—if the House will indulge me.

Mr. BARKLEY. The gentleman does not intend to make an inflammatory speech on that subject, does he?

Mr. GOULDEN. He would not be guilty of it. [Laughter.]

Mr. HULINGS. I do not know just exactly how the spirit may move me. I hope it will be a speech worth listening to.

Mr. BARKLEY. I will withdraw my objection and trust to luck. [Applause.]

Mr. KAHN. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from California rise?

Mr. KAHN. The matter is adjusted. I was going to say that the gentleman from Pennsylvania [Mr. HULINGS] is a member of the Committee on Military Affairs and was not here when the debate on the Army bill took place.

The SPEAKER. He has already got his 30 minutes. The House resolves itself into the Committee of the Whole House on the state of the Union, and the gentleman from Missouri [Mr. ALEXANDER] will take the chair. [Applause.]

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of H. R. 13811, the river and harbor appropriation bill, which the Clerk will report.

The Clerk read the title of the bill (H. R. 13811) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. SPARKMAN. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Florida asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

Mr. SPARKMAN. Mr. Chairman, at the outset I wish to ask as a favor of the committee that I be not interrupted until I have finished the statement I desire to make touching some of the leading features of the bill, when I will be glad indeed to yield to interruptions, and to undertake to answer any questions that Members may see proper to ask.

We have spent a great deal of time upon the bill, and have given careful consideration to its preparation; and while it may not be perfect, we nevertheless consider it a good measure, and invite the closest scrutiny, together with the severest analysis, of each and all of its provisions.

The bill appropriates in cash $39,227,504, and authorizes $4,061,500 in addition, the whole aggregating $43,289,004. The authorizations are $3,000,000 for the Ohio River; $1,000,000 for the Delaware River from Allegheny Avenue, Philadelphia, to the sea; and $61,500 for Beverly Harbor, Mass. The $3,000,000 for the Ohio River is a part of the $5,000,000 required to be furnished annually under a declaration in the rivers and harbors bill passed in 1910 of an intention to complete the improvement in 12 years, the provision having been construed by the committee to mean that the amount necessary to complete the project shall be appropriated within that period.

The estimates submitted by the Chief of Engineers for the prosecution of works under way and for maintenance amount to $34,016,395, to be applied to 245 works, approximately $4,000,000 being for maintenance. The balance is to carry on projects already begun but not completed. To this amount should be added $250,000 for examinations, surveys, and contingencies, making a total of original estimates reaching $34,266,395. By carefully going over the estimates some of these items were reduced by the committee, the whole of such reductions amounting to $1,031,000. But against these reductions are quite a number of increases, aggregating $4,260,780, the chief items being $1,000,000 for the Mississippi River between Head of the Passes and the mouth of the Ohio River; $1,185,000 for Galveston Harbor, or Galveston Channel, as it is called; $125,000 for Pollock Rip Channel, Mass.; $273,380 for Harbor Beach harbor of refuge, Michigan; $167,400 for Racine Harbor, Wis.; $100,000 for Columbia River at The Dalles, Oreg. and Wash.; and an authorization of $1,000,000 for the Delaware River from Philadelphia to the sea. I wish to say, however, that this $1,000,000 is not, strictly speaking, an increase, as it is an authorization recommended by the engineers in their estimates for the bill, in addition to $1,000,000 in cash, which the measure carries for that stretch of the river.

The $1,000,000 increase for the Mississippi River was thought advisable, in view of a desire on the part of the engineers and the Mississippi River Commission to carry on the work of levee construction and revetment of the banks of the Mississippi River between the Head of Passes and the mouth of the Ohio more expeditiously than heretofore. The Mississippi River Commission had recommended an appropriation of $7,000,000, but the Chief of Engineers cut the estimate down to $6,000,000.

A much larger amount, however, was requested by local interests. A bill had been introduced during the first session of this Congress asking for $12,000,000 in cash and an authorization of $48,000,000 for the improvement of that stretch of the river, the whole to be appropriated within five years at the rate of $12,000,000 a year. An extensive hearing was had early in the session on this bill but no action has yet been taken by the committee on the measure. In the meantime there was quite an insistent demand by parties interested that, in addition to the $6,000,000 recommended by the Chief of Engineers for this bill, contract authorizations be provided for $18,000,000 more. The committee, however, concluded to only allow $7,000,000, or one million in addition to the six millions called for by the Chief. Whatever views a majority of the committee might otherwise have entertained regarding this demand for a contract authorization, it is believed the seven millions is all that could or should be allowed in the present bill, especially in view of the demand of other sections of the country for river and harbor work. Besides, seven millions is quite as much as will be expended on the work by the 4th of next March, when another bill will doubtless be passed.

In further justification of the action of the committee in allowing the additional million, I would like to call attention to the fact that the committee has inserted in the present bill a provision extending the jurisdiction of the Mississippi River Commission over levee building from the mouth of the Ohio River to Rock Island, Ill. It will be remembered that the bill of 1913 as it passed the House contained a similar provision, but this was changed in the Senate so as to authorize only a survey, which has since been had and a report thereon made to Congress by the War Department; though, in view of the act creating the Mississippi River Commission, together with subsequent legislation, I do not consider the survey a necessary basis for our action. It will be noted that the language used confines the expenditure of money above the mouth of the Ohio within the limit of authority under which levees may be constructed below the Ohio River, and that expenditures, if made at all for that purpose, must be in the interest of navigation.

The claim was made by those advocating the extension of the jurisdiction of the commission to Rock Island, Ill., that there was no just or logical way of differentiating the two stretches, and that if the activities of the Government were to be directed toward the building of levees between the Head of Passes and the mouth of the Ohio, in the interest of navigation it

should do the same thing to the section between Rock Island and the Ohio, where serious overflows are also experienced. The committee considered the two stretches very much alike, and hence extended the jurisdiction of the commission to cover both; and I can see no great harm likely to come from its action, for if the commission and the Chief of Engineers follow the provision in the bill, no money can be expended except in the interest of navigation; and if there is no such demand, none will be expended.

It has been the policy of the committee, as well as of the House, for many years to confine levee construction and revetment work to the requirements of navigation, a policy to which it has adhered in the face of strong pressure at times for appropriations to protect private property and that of municipalities from floods. I trust the House will continue to sustain the committee in its efforts to enforce this policy, for if we depart from that safe and salutary rule we will not only increase enormously our expenditures for waterway improvement, but seriously endanger our river and harbor bills. If, however, we are to embark on the policy of protecting private property against damages from floods, the task should only be entered upon after a thorough examination and survey of the work to be done, in order that the country and Congress may know in advance what the cost will be. Even then the necessary legislation should not, in my judgment, be carried in the regular river and harbor bills, but in some separate measure or measures. The former should deal alone with the matter of furnishing navigable channels for the accommodation of our commerce.

In addition to caring for the old or existing projects, 76 new projects have been adopted, requiring in all to complete $38,684,700, but of this sum we have only appropriated or authorized $5,786,829.

Among the larger items are those for East River, N. Y.; Chesapeake & Delaware Canal; Norfolk Harbor, Va.; New London Harbor, Conn.; Willapa Harbor, Wash.; Oklawaha River, Fla.; Cumberland River above Nashville, Tenn; the Sacramento and Feather Rivers and Richmond Harbor, Cal.

The most expensive are: The East River, to cost $13,400,000; Chesapeake & Delaware Canal, $6,785,710; Sacramento and San Joaquin Rivers, $586,000; and the upper Cumberland, $4,500,000. The work on the East River, being a class of work not requiring expeditious treatment, is, if the suggestions of the engineers should be followed, to run over a long period of years, something above 25, though, of course, if the demands of commerce should require greater haste, the work may, and no doubt will, be prosecuted more rapidly.

I wish to direct special attention to the project for the improvement of the Sacramento and Feather Rivers, Cal. This is a very expensive piece of work as a whole and will cost, when completed, it is estimated something over $33,000,000, the greater part of which is for flood protection and land reclamation. The engineers, however, fixed the amount to be expended by the Government in the interest of navigation at $5,800,000, which the committee thought was not out of proportion to the benefits likely to accrue to commerce, present and prospective; and hence have recommended that it be undertaken, appropriating, however, only $200,000 in this bill, and that on condition that the State of California furnish a like amount. In fact, we have adopted the project on the conditions imposed by the engineers to the effect that the State contribute an amount equal to that which the Government may be required to expend in the interest of navigation, which is fixed, as just stated, at a sum not to exceed $5,800,000. This is one of the most comprehensive and well-considered plans of river regulation and improvement that have come before our committee for many years, little, apparently, having been left to chance or for future consideration that it was possible for engineering skill to make definite and certain.

The Chesapeake & Delaware Canal connecting the waters of those two bays, is another project which the committee thought of great importance and which received favorable consideration at its hands. The connecting of these two bays by the Government has been under consideration for quite a while. Many years ago the present Chesapeake & Delaware Canal was constructed, and has since been owned and operated as a toll canal by a corporation chartered, I believe, under the laws of Pennsylvania, Maryland, and Delaware. In 1906 Congress desiring to take steps either to purchase that canal and to enlarge and operate it as a free waterway or to construct one through the same territory but over a different route, passed a joint resolution for the appointment of a commission to examine and appraise the value of the works and franchises of the Chesapeake & Delaware Canal, and also to examine and investigate the feasibility of a waterway over what is known as the Sassafras route, which traverses the narrow neck of land between the two bays a little to the southward of the present canal. Under this provision a commission was appointed known as the Agnus commission, which, having made an examination, submitted quite a voluminous report to Congress, recommending the purchase of the canal at a cost of $2,154,289.70; but the report also showed the feasibility of the Sassafras route, along which a canal can be constructed at a cost which it is estimated by the engineers will be only a little more than that estimated for the purchase of the present Chesapeake & Delaware Canal and its enlargement to the required depth and width.

Later the Secretary of War, under the provision of the rivers and harbors bill of 1909, which called for a survey of an intracoastal system from Boston, Mass., to Beaufort Inlet, N. C., including the section between the Delaware and Chesapeake Bays, caused an examination to be made of the Chesapeake & Delaware Canal and other possible routes across the intervening land, reports on which are embodied in House Document No. 391, Sixty-first Congress, second session, and in House Document No. 196, Sixty-third Congress, first session. In both of these reports the purchase of the canal was recommended, and in the last the cost, including the purchase of the existing canal, together with its enlargement to a depth of 12 feet, was placed at $8,000,000, the purchase price of the canal being fixed at $2,514,290, as was recommended by the Agnus commission. The committee, however, not agreeing with the engineers as to the amount that should be paid for the canal, but believing its actual value to be much less than the sum fixed by them, have authorized its purchase at a cost not to exceed $1,300,000, which it is believed is all it is worth.

It will be noted by anyone who has examined or who will take the trouble to examine the Agnus report that the officers of the canal company gave but little information to the members of the commission as to the value of the canal or the price at which its owners would be willing to sell. It was ascertained, however, that the canal was bonded at something like $2,600,000, which bonds were valued at about 50 cents on the dollar. Furthermore, the Government, it seems, originally contributed to the construction of the canal $450,000, for which it yet holds stock in the company. This stock, together with stock dividends received, now aggregate 14,625 shares, of the par value of $50, or $731,250 in all; besides, the canal company has owed the Government something like $51,187.50 since 1877 for cash dividends, which, together with interest, amounts now to about $150,000. It further appears that no dividends have been paid to anyone subsequent to that date.

I wish also to say that according to the Agnus report there seem to be some engineering difficulties in the way of any further deepening of the present canal; difficulties that would not, it is thought, be encountered along the Sassafras route, and which might make it advisable to adopt this latter route. I only throw this out as a suggestion, for we would doubtless in the end follow whatever recommendations the engineers may make; at least that is the usual course.

In addition to the authority to purchase the Chesapeake & Delaware Canal, the committee has recommended the adoption of two other links in the intracoastal system from Boston to Key West as extended by later surveys, the one from McClellansville to Winyah Bay, S. C., and that from Charleston to Savannah, Ga., the former to cost $20,000, the latter $100,000. The bill also adopts three other links in the intracoastal system from St. George Sound, Fla., to the Rio Grande, Tex., these being sections 5, 7, and 12, to cost, respectively, $227,000, $475,000, and $80,000. Likewise a short link or cut-off between Vermilion River and Schooner Bayou, La., to cost $37,500. Section 5 extends from Mobile Bay to the Mississippi River, a distance of 125 miles; section 7, from the Sabine River to Galveston Bay, Tex., a distance of 68 miles; and section 12, from Brazos Santiago, Tex., to Rio Grande, a distance of 9 miles. This system comprises 12 links, numbered consecutively from 1 to 12, inclusive, the whole covering a distance of 1,038 miles. Provision has heretofore been made for sections 1, 3, 8, 9, and 10, costing $1,015,335. Section 2, from St. Andrews Bay to Choctawhatchee Bay, estimated to cost $3,000,000, has not yet been recommended. The uncompleted sections from 4 to 7 and 11 to 12, inclusive, are estimated to cost $3,632,910. I desire and ask permission to submit with my remarks statements showing the different links in the proposed intracoastal waterway from Boston to Key West, showing distances, cost, proposed depths, and sections recommended, together with those unrecommended. Also a like statement of the system from St. George Sound to the Rio Grande.

The CHAIRMAN. Is there objection?

There was no objection.

[1] Already provided for. [2] Not recommended.

Sections 4 to 12, inclusive, $3,632,910 (recommended).
Sections 5, 7, 12, $780,593 (adopted).

Mr. SPARKMAN. From the first statement it will be seen that the sections of the Atlantic intracoastal system favorably reported cover the stretch from Raritan Bay, New York Harbor, to St. Johns River, Fla. It is recommended, however, by the Board and Chief of Engineers that work on the section between Raritan Bay and the Delaware River be only undertaken when compliance has been had with certain conditions. These are, in substance, that a right of way with certain specified characteristics shall be furnished. I may add that the Committee on Rivers and Harbors has no information as yet that these requirements have been or will be met, but I assume that if the advantages likely to accrue from the construction of the canal are such as have been outlined by its proponents the right of way required will be furnished.

Mr. Chairman, it is not easy to overestimate the value of these intracoastal waterways. Of course some of the links are of more importance than others, but each, in my opinion, is of sufficient value to commerce to justify its improvement by the Government in accordance with the plans outlined by the engineers. Connecting the rivers flowing into the Atlantic and the Gulf they will, when completed, furnish a system of navigable waterways more than 20,000 miles in extent and reaching nearly every section of the country east of the Rocky Mountains. Of course this work can not all be undertaken at once, nor is there any necessity for its so being undertaken. The policy should be to provide for the different sections from time to time in the order of their relative importance considering the commerce to be accommodated by them, and that, I may add, is the present intention of the Committee on Rivers and Harbors.

Mr. Chairman, of course I know that the amount carried in this bill will appear large, especially to one not familiar with the advantages accruing to the people of the country from water transportation or who is not conversant with the great demand for river and harbor improvement growing out of the rapid progress we are making along every line of material development. We are all familiar in a general way with this wonderful growth. I wish to call attention, however, to some features of this development which will illustrate the point I am making. From 1902 to 1914 the population of this country increased 27 per cent, farm products 70 per cent, products of the mine more than 67 per cent, imports of merchandise upward of 113 per cent, and exports of merchandise more than 76 per cent. Similarly and as a result of all this a marked increase occurred in freight tonnage both by rail and by water. The tonnage of the railroads during the past decade grew from 1,340,394,000 tons to 1,844,977,000 tons, an increase of more than 540,000,000 tons. But the most remarkable increase has been in our water-borne commerce. In 1910 the engineers reported this commerce, foreign and domestic, including duplication, at 625,901,653 tons, while the reports for 1913 fixed the amount at 1,002,759,000 tons, an increase in three years of more than 375,000,000 tons. But there has been no such increase, Mr. Chairman, during that period in expenditures on rivers and harbors. I will file with my remarks a statement showing the expenditures for that class of work covering the fiscal years from 1904 to 1913, inclusive, from which it will be seen that the percentage of increase during that decade has been only 23 per cent, while the increase in water-borne commerce for the past three years has been more than 60 per cent. This, Mr. Chairman, is the statement:

*Expenditures for rivers and harbors during the fiscal year ending June 30 (not including expenditures under permanent and indefinite appropriations).*

| | |
|---|---|
| 1904 | $22,320,469.15 |
| 1905 | 23,054,497.08 |
| 1906 | 22,513,605.99 |
| 1907 | 21,513,471.54 |

| 1911 | 30,062,082.02 |
| 1912 | 32,464,724.79 |
| 1913 | 36,813,778.79 |
| Total | 276,850,360.77 |
| Average per year for 10 years | 27,685,036.00 |

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?

Mr. SPARKMAN. Mr. Chairman, I prefer the gentleman would let me finish my statement.

Mr. CALLAWAY. I just want to ask one question with respect to this water-borne commerce, as to what the character of the water-borne commerce is, whether that applies to rivers and canals or to ocean-borne commerce?

Mr. SPARKMAN. It applies to all kinds of water-borne commerce, canals, rivers, harbors, coastwise, and foreign, and I may as well explain just here what I mean by duplications. By this I mean commerce carried over two or more waterways or into two or more harbors where it is counted more than once.

Another matter to which I wish to direct attention is that the amount expended in 1913 is only a little upward of $2,000,000 more than the amount expended in 1909, the year before we embarked upon the annual-bill policy, and this increase is more than covered by the amounts added to the rivers and harbors bills as a result of the floods on the lower Mississippi River in 1912 and 1913.

Now, Mr. Chairman, of course I know that increase of water-borne tonnage does not necessarily mean an increase of expenditures for river and harbor improvement. The pertinent question is, Has there been a legitimate commercial demand for the improvements making the expenditures necessary? The answer to that must be in the affirmative. There has not been a harbor developed or a river improved which has not been preceded by a demand for the work based upon the necessities of commerce. The development of the country along the rivers has made this improvement a necessity, while the increase in the dimensions and draft of ocean-going craft, in obedience to an inexorable law of economics, has made it necessary to also increase the dimensions of harbor channels on our lake shores and seacoast. Nor, Mr. Chairman, has this growth in the dimensions and draft of vessels been confined to the lume-

diate past, but has been going on for many decades and is likely to continue for many more. But I would like to call attention to this increase—to the regularity of its growth. Half a century ago an ocean-going vessel of more than 300 feet in length or more than 40 feet in width was not in existence. The bulk of the Atlantic Ocean traffic was then carried on in ships drawing less than 20 feet of water, with not a single vessel at that time exceeding 24 feet in draft, while to-day, Mr. Chairman, we have vessels more than 900 feet long, nearly 100 feet beam, and several more than 38 feet of draft. It is to this increase in the dimensions and draft of the vessels using our harbors that we have had to accommodate ourselves, and, as I have said, the end is not yet.

It is the opinion of experts, men who have given much thought to this question, that in another half a century or perhaps less ocean-going vessels will have increased 50 per cent in length, 60 per cent in width, 33⅓ per cent in draft. So it would seem that this work must go on yet awhile. So impressed have been engineers with this growth that they are now advising the governments of the world to begin now and build for the future; to lay out plans for the improvement of our rivers and harbors, especially the latter, on a basis sufficiently broad and comprehensive to accommodate this anticipated increase in the dimensions and draft of vessels. In this connection I wish to read from the remarks of Mr. J. Foster King, chief surveyor to the British Corporation for the Registry of Shipping, Glasgow, in an address delivered by him before the Twelfth International Congress of Navigation, in Philadelphia, 1912. He closed that interesting and instructive address in this language:

> Authorities responsible for the development of shipbuilding, rivers, maritime canals, and harbors of all kinds who desire to maintain their present relative position in the world will have to face the problem of meeting continuous expansion in the dimensions of future seagoing vessels at rates not less rapid than those indicated either by improvement in existing accommodations or by the creation of new deep-water ports.

To the same effect were the remarks of others at that convention, notably those of Mr. Elmer L. Corthell, of New York, a distinguished engineer, who in the course of his address said:

> That the facilities for navigation must be greatly enlarged and improved and that the engineers who design, construct, and enlarge canals and ports should fully appreciate the situation and use their important influence with the governments of the world to build wisely and amply for the future ships of the world, both commercial and naval.

That, Mr. Chairman, is what we have been doing and what we must continue to do if we are to keep step with the progress of the age.

But what of the cost? That is another pertinent question. Of course it is difficult, Mr. Chairman, for us to determine now or for anyone to say just what the future cost will be, and yet I believe that unless we are to embark upon some wild scheme of waterway improvement not connected—or, if connected at all, very remotely—with legitimate river and harbor work—I say unless we are to embark upon some such wild scheme I believe it is possible to approximate within reasonable bounds the cost of river and harbor improvement in this country within the next 25 years. Of course, if we enter upon other works having no direct or necessary relation to navigation, there is no telling where we will land. Why, there are propositions advanced, some of them now before Congress, advocated and supported by men of national repute, the adoption and the carrying out of which, it is said by competent engineers, would cost billions of dollars. But assuming we are to pursue a safe and sane policy such as we have been pursuing for the past several decades, then I believe it is easy, or at least it is not very difficult, to approximate within reasonable bounds as to what the Government will be called upon to expend in the near future, by which I mean in the next quarter of a century.

We have on the books to-day, including those taken on in this bill, about $300,000,000 of projects. One hundred and fifty million dollars in round figures, or half of it, being for four rivers—the Mississippi, the Ohio, the Missouri, and the East River in New York, the last named, however, only requiring about $13,000,000 to complete. The work on these four streams, if the plans laid down by the engineers are followed, is to extend over a period ranging from 8 to 25 years; perhaps a little beyond that. The other $150,000,000 will likely be required during the next 8 years; that is, if the plans of the engineers are carried out. Of course there will be other projects. There were before our committee about $50,000,000 of projects submitted within the past two years besides the $38,000,000 we have adopted in this bill. I do not know that all of those will meet with favorable consideration in the future; the chances are they will not; but if they should all be adopted, the amount, including those adopted and those recommended in this bill, will reach $350,000,000.

Others will be coming in from time to time—are coming in now—but looking into the future, with the information I have been able to gain as a result of my 17 years of experience in that class of work, I believe it is safe to say that not exceeding $100,000,000 more will be required during the next 25 years. That would make the total, including the amount of the projects already recommended and adopted, $450,000,000. If I am correct in this, the House can now see about what the burden will be. You say, however, those are no small figures; and they are not. But let me tell you they are not large when compared with the appropriations we have been making for some other branches of the public service—the Army and Navy, for instance.

Now, I am not one who is opposed to an efficient Army or an adequate Navy. They are, unfortunately, necessary. But there is no harm in calling attention to them and their cost; in fact, I believe that attention can not be directed too often to the great cost of the military arm of this Government. I will submit with my remarks a statement showing the appropriations for rivers and harbors during the past 10 years, as well as the appropriations for several other branches:

*Appropriations for rivers and harbors and six other branches of the public service, 1903–1914.*

| Year. | Rivers and harbors. | Post Office. | Navy. | Army. | Fortifications. | Agriculture. | Indian. |
|---|---|---|---|---|---|---|---|
| 1903 | $32,540,199.50 | $138,416,598.75 | $78,856,363.13 | $91,730,136.41 | $7,298,955.00 | $5,208,960.00 | $8,985,028.10 |
| 1904 | 20,233,150.00 | 153,511,549.75 | 81,876,791.43 | 77,888,752.83 | 7,188,416.22 | 5,978,160.00 | 8,540,405.77 |
| 1905 | 10,872,200.00 | 172,545,998.75 | 97,505,140.94 | 77,070,300.88 | 7,518,192.09 | 5,902,040.00 | 9,447,961.40 |
| 1906 | 28,726,007.41 | 181,022,093.75 | 100,336,679.94 | 70,396,631.64 | 6,747,883.00 | 6,882,690.00 | 7,923,814.34 |
| 1907 | 17,254,050.04 | 191,695,998.75 | 102,091,670.27 | 71,817,165.08 | 5,053,993.00 | 9,930,440.00 | 9,260,589.98 |
| 1908 | 43,500,813.00 | 212,091,193.00 | 98,958,907.50 | 78,634,582.75 | 6,898,011.00 | 9,447,220.00 | 10,125,076.15 |
| 1909 | 18,092,945.00 | 222,970,892.00 | 122,663,885.47 | 95,382,247.61 | 9,316,745.00 | 11,672,106.00 | 9,253,347.87 |
| 1910 | 20,190,264.00 | 234,602,370.00 | 136,935,199.65 | 101,195,883.34 | 8,170,111.00 | 12,995,635.00 | 11,864,982.48 |
| 1911 | 49,380,541.50 | 243,907,020.00 | 131,350,854.38 | 95,449,567.55 | 5,617,200.00 | 13,487,659.00 | 9,206,528.00 |
| 1912 | 30,883,419.00 | 259,134,463.00 | 126,478,338.24 | 93,374,755.97 | 5,473,707.00 | 16,900,015.00 | 8,842,136.37 |
| 1913 | 40,559,370.50 | 271,429,599.00 | 123,225,607.76 | 90,958,712.98 | 4,036,235.00 | 16,851,486.00 | 8,929,970.66 |
| 1914 | 51,118,889.00 | 285,370,271.00 | 140,860,643.53 | 94,266,145.51 | 5,218,259.00 | 17,985,945.00 | 9,486,819.67 |
| Total | 372,351,848.95 | 2,566,704,047.75 | 1,341,079,481.64 | 1,038,155,882.55 | 78,537,708.22 | 132,042,315.00 | 111,258,671.79 |

From this statement it will be seen that during the past 10 years we have appropriated for rivers and harbors $372,351,000, while for the Army and the Navy we have furnished $2,200,000,000, more than six times as much for the Army and the Navy as for rivers and harbors. If we continue that for the next 25 years, as we are likely to do—even assuming that it will not be increased, and it is likely to be increased—the sum will aggregate nearly $6,000,000,000, as against $450,000,000 fixed by me as the probable limit of river and harbor requirements during that period. And what do we get, Mr. Chairman, for the larger amount? Protection, security, perhaps; but with that great expenditure there will be no monuments erected, unless it be to military heroes, while the improvements in our rivers and harbors, to be made by the smaller expenditure, will, with relatively small amounts from year to year for maintenance, endure for the use of our growing commerce as the centuries come and go. [Applause.] The billions poured into this great sea of military preparation will be swallowed up with not a single physical monument erected on its shores for the benefit of mankind, while with the money we may expend on our rivers and harbors we will furnish the country and its commerce 30,000 miles of inland waterways, rivers, canals, and intracoastal channels, besides more than 300 harbors, large and small, the whole making the grandest system of navigable waterways in the world, and accommodating by that time perhaps more than 2,000,000,000 tons of commerce. [Applause.]

Now, Mr. Chairman, but few object, I think, to the Army or the Navy and the provisions that we are making for them. We need both, and will continue to need them, perhaps, to protect our flag from insult and our shores from hostile invasion. But whilst we are contributing billions for the Army and the

Navy and in the preparation for possible wars let us not begrudge the relatively few millions necessary to fit our rivers and harbors for the growing commerce of our country. [Applause.] We have been repaid many times over for the money we have expended on our navigable waterways. I have heard it said that for every net ton of water-borne commerce in this country there is a saving of $1 to the shippers, the producers, and the consumers throughout the land. Now, consider, Mr. Chairman, that not a single river or harbor in its natural state would have been capable of accommodating modern commerce, and that many of them even now can not fully meet modern commercial requirements, and it is easy to appreciate the great benefits that have accrued, and will continue to accrue, to the people by reason of this great work. Why, Mr. Chairman, with three years of such a saving and estimating this tonnage at 300,000,000, a conservative figure, the American people would be more than repaid the $700,000,000 expended on waterway improvement since the beginning of our Government. Let us then, Mr. Chairman, not strike down, or even retard, this great work; but rather let us carry it on conservatively but steadily to completion, assured as we may well be of the approval of an intelligent and progressive constituency. [Applause.]

Mr. Chairman, I will be glad now to yield for any questions gentlemen of the committee may see proper to propound.

Mr. MANN. Mr. Chairman——

The CHAIRMAN. Will the gentleman from Florida [Mr. SPARKMAN] yield to the gentleman from Illinois?

Mr. SPARKMAN. I will.

Mr. MANN. In reference to the Mississippi River improvement, which the gentleman has explained so fully, what benefit is there to anybody by making the improvement?

Mr. SPARKMAN. The Mississippi River?

Mr. MANN. Yes.

Mr. SPARKMAN. To what part does the gentleman refer? Does he refer to any particular part, or to the river as a whole?

Mr. MANN. The gentleman referred to the expenditure of $150,000 within the next eight years, and $100,000,000 more after a while. That is the improvement I am referring to.

Mr. SPARKMAN. Mr. Chairman, I think the people will reap a very great advantage from the improvement of that river.

Mr. MANN. What people?

Mr. SPARKMAN. The whole people. There are several stretches of that river. I suppose it is the lower reaches to which my friend is referring more particularly?

Mr. MANN. No. I am referring to the whole river. Will it be an improvement to commerce, or is it a local improvement for the benefit of the people?

Mr. SPARKMAN. So far as the Government is concerned, the improvement is solely in the interest of navigation, because in the item for the improvement of the lower river, which is under the jurisdiction of the Mississippi River Commission, extended by a provision in this bill to Rock Island, Ill., there is a provision prohibiting the engineers from spending any money on levees or revetments unless they are satisfied it will be in the interest of navigation.

Mr. MANN. If we are to spend $250,000,000 or $350,000,000 on the Mississippi River for the benefit of navigation, does the gentleman think we ought to pass tolls for the benefit of the river?

Mr. SPARKMAN. I do not.

Mr. MANN. I hope the gentleman will remember that later.

Mr. SPARKMAN. I do not believe we should charge tolls on any harbor or waterway on the Continent of America.

Mr. MANN. I agree with the gentleman as to that.

Mr. SPARKMAN. It is not necessary now to go into another discussion in regard to that matter, and——

Mr. MANN. The gentleman stated "on the Continent of America." I suppose he understands that the Isthmus of Panama is included in that designation.

Mr. SPARKMAN. I said "the Continent of America." I meant by that the continental domain of the United States.

Mr. MANN. There is no distinction in principle, so far as commerce is concerned.

Mr. SPARKMAN. I think there is.

Mr. MANN. The gentleman has a proposition up for consideration that involves the question whether we shall spend $250,000,000 on the Mississippi River in the interest of commerce, yet everybody knows that the interest on the money would pay the freight on every ton of commerce that will go on the Mississippi River, or you could send it by rail. The question is whether or not we should do that and charge tolls. I do not think we ought to.

Mr. SPARKMAN. Does the gentleman know what the tonnage on the Mississippi River is?

Mr. MANN. No; I do not know just what it is, but I know it is now far less than it used to be.

Mr. SPARKMAN. It is about 6,000,000 tons on the lower river, and——

Mr. MANN. That is about half as much as comes into a little harbor in my district.

Mr. SPARKMAN. And with 2,000,000 tons more on the upper reach makes eight or nine million in all. That is a very respectable tonnage.

Mr. MANN. I say that is half as much as comes into a harbor in my district.

Mr. HARDY. Mr. Chariman, will the gentleman allow me to ask him a question?

The CHAIRMAN. Does the gentleman from Florida yield to the gentleman from Texas?

Mr. SPARKMAN. Yes; I yield to the gentleman.

Mr. HARDY. Would not that tonnage on the Mississippi River be many times multiplied if the railroads were forbidden by a statutory law from adopting cutthroat competitive methods and if that river were allowed to carry its natural tonnage?

Mr. SPARKMAN. I think that would make considerable difference.

Mr. MANN. That would raise the freight rates. However, I believe in the principle of improving the Mississippi River.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Florida yield to the gentleman from Pennsylvania?

Mr. SPARKMAN. Yes.

Mr. MOORE. No tolls are charged on the commerce that navigates the Mississippi River?

Mr. SPARKMAN. None.

Mr. MOORE. And none, I believe, are charged anywhere else, except on the Delaware & Raritan Canal, which is owned by the Pennsylvania Railroad Co., and on the Chesapeake & Delaware Canal, which is owned by a private corporation.

Mr. SPARKMAN. There is little tonnage on the Raritan Canal, but a good deal on the Chesapeake & Delaware Canal.

Mr. Chairman, I ask unanimous consent to extend and revise my remarks in the RECORD. There are a good many papers I wanted to read here, but time will not permit. I would like to include them.

The CHAIRMAN. The gentleman from Florida [Mr. SPARKMAN] asks unanimous consent to revise and extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. SPARKMAN. Mr. Chairman, how much time have I consumed?

The CHAIRMAN. The gentleman has consumed 47 minutes.

Mr. SPARKMAN. Will the gentleman from Washington [Mr. HUMPHREY] use some of his time now?

Mr. HUMPHREY of Washington. Yes. Mr. Chairman, I yield 40 minutes to the gentleman from California [Mr. KAHN].

The CHAIRMAN. The gentleman from California [Mr. KAHN] is recognized for 40 minutes.

AGAINST REPEAL OF CANAL-TOLLS EXEMPTION.

Mr. KAHN. Mr. Chairman, on March 5, just a year and a day after his inauguration, the President appeared before a joint session of Congress in this Chamber and made an astounding plea for the repeal of that provision of the Panama Canal act of August 24, 1912, which exempts vessels engaged in the coastwise trade of the United States from payment of tolls. In fact, it was not a plea—it was a supplication.

In that address he used this remarkable language:

> We ought to reverse our action without raising the question whether we were right or wrong, and so once more deserve our reputation for generosity and the redemption of every obligation without quibble or hesitation.
>
> I ask this of you in support of the foreign policy of the administration. I shall not know how to deal with other matters of even greater delicacy and nearer consequence if you do not grant it to me in ungrudging measure.

Mr. Chairman, the President and his official advisers in the Department of State alone are responsible for the foreign policy of the administration. They alone have formulated and administered that policy. If there has been any ineptitude in the administration of that policy, they alone are responsible. What have been the fruits of that policy? Misunderstanding, distrust, vacillation, humiliation. This greatest of all the world's Republics has grown to be, in one brief year of Democratic administration, the pariah of the nations. [Applause on the Republican side.] Under the blight of its foreign policy we stand to-day isolated, deserted, alone. It is a humiliating confession, but its truth can not be gainsaid.

We are calmly told not to consider whether we be right or wrong in our interpretation of the Hay-Pauncefote treaty. As

a matter of expediency, and in order to save the face of the administration, we ought to forego our rights—so says the President—no matter what great economic or governmental principles may be involved—principles that may vitally affect the prosperity and the welfare of the American people.

We have expended $375,000,000 and sacrificed many lives in the accomplishment of the greatest of the world's engineering feats; but, according to the President, we should be generous and abjectly yield our rights in support of the foreign policy of the administration. We ought not to exercise rights of ownership; we should be content to become a simple caretaker, a mere guardian.

Mr. Chairman, it is my firm belief that no people on earth that have a due regard for the opinions of mankind would be willing to sell their birthright for such an unpalatable mess of pottage. England herself would not do it. Her history is replete with instances in which she has firmly and vigorously refused to yield her inalienable rights. Let me cite two concrete cases which illustrate that fact. In 1815, at the city of London, she entered into a convention with us to regulate the commerce and navigation between our respective countries, territories, and people, in such a manner as to render them reciprocally beneficial and satisfactory.

A paragraph of article 2 of that convention provides:

No higher or other duties or charges shall be imposed in any of the ports of the United States on British vessels than those payable in the same ports by vessels of the United States; nor in the ports of any of the Britannic Majesty's territories in Europe on the vessels of the United States than shall be payable in the same ports on British vessels.

That language is certainly clear and unequivocal, and yet neither England nor the United States ever held that provision to apply to the coastwise trade of the respective countries. Thus the port charges at Bristol, England, for an American ship entering and departing is 56 cents per ton, while a British ship in the coastwise trade of that country pays only 20 cents a ton for such charges. At Liverpool the harbor rates for entering and leaving port to an American ship in the oversea trade are 33 cents per ton, while for British coastwise vessels the charges are 9 cents per ton. At the port of London the tonnage dues for entering and clearing are likewise in favor of British coastwise vessels and against trans-Atlantic vessels. In fact, every maritime country in the world gives a preference to its own nationals engaged in its coastwise trade. And not alone have we acquiesced in England's construction of the rule under the treaty of 1815, but England on her part has never challenged our right to differentiate in favor of our coastwise vessels, notwithstanding the mandatory language used in the paragraph of article 2 of that convention which I have quoted. And comparatively recently our rights in that behalf have been distinctly and positively upheld in the case of Olsen *v.* Smith (195 U. S., 344), Mr. Justice White, now Chief Justice of the Supreme Court of the United States, having rendered the opinion of the court. I will not trespass upon your time by reading that decision. The principles involved in that case are similar in character to the principles involved in the Hay-Pauncefote treaty. So much for the convention or treaty of 1815.

But there is another instance that exhibits England's unyielding attitude when the rights of her citizens in the shipping industry are involved. In his note to Ambassador Bryce, dated November 14, 1912, Sir Edward Grey, the secretary of state for foreign affairs of Great Britain, refers to article 27 of the treaty of Washington, 1871, and says:

Your excellency will no doubt remember how strenuously the United States protested, as a violation of equal rights, against a system which Canada had introduced of a rebate of a large portion of the tolls on certain freight on the Welland Canal, provided that such freight was taken as far as Montreal, and how in the face of that protest the system was abandoned.

And thereupon his excellency makes the statement that the principle of equality is repeated in article 3 of the Hay-Pauncefote treaty.

Mr. Chairman, the fact is, Sir Edward Grey has forgotten or did not fully investigate the circumstances that compelled his Government to abandon the system of rebates that had been granted Canadian shippers and shipowners in violation of section 27 of the treaty of Washington. He is entirely mistaken when he asserts that the system was abandoned in the face of our protests. I shall show that it was retaliatory legislation on our part that compelled Great Britain to abandon her untenable position. And even in abandoning it, she reiterated her positive right to do what she had been doing under her construction of a reciprocal provision of a solemn treaty.

It is true that the Government of the United States had repeatedly protested against these rebates referred to by him in his note to the English ambassador. But did England yield, "right or wrong"? Did she exercise that spirit of generosity which our President commends so highly to our people? Did she abandon her policy "in the face of that protest," as Sir Edward claimed in his note to the British ambassador at Washington? Not at all. Let me recite briefly the facts that led to the change of heart that came over the British Government.

Under the treaty of 1871 certain canals in Canada and the United States were to be opened reciprocally to the ships and citizens of the two countries upon equal terms. The Canadian tolls were fixed annually by orders in council. Wheat and other grains passing through the Welland Canal paid a rate of 20 cents per ton. But for many years the Canadian Government allowed a rebate of 18 cents per ton when the wheat was carried eastward as far as Montreal. This made the net rate to the Canadian shipper only 2 cents per ton to that port, while the Oswego and Ogdensburg shippers paid the full 20-cent rate. These American ports naturally protested against the discrimination in favor of Montreal. Our Government sustained them and claimed it was a violation of the treaty, in that it was a denial of the equal treatment provided for therein. That was the principal cause of protest on the part of our Government, although there were several minor collateral discriminations that were also objected to.

On August 23, 1888, President Cleveland sent a powerful message to Congress upon the subject, in which he specifically called attention to Great Britain's constant discrimination against American shippers and shipowners. Did England yield and abandon her position in consequence of that message and our repeated protests? Did her Government advise Canada "we consented to the treaty; its language we accepted, if we did not originate; and we are too big, too powerful, too self-respecting a nation to interpret with too strained or refined a reading the words of our own promises just because we have power enough to give us leave to read them as we please"? Were the Canadians told that "the large thing to do is the only thing we can afford to do—a voluntary withdrawal from a position questioned and misunderstood" by the people of the United States? Did England point out to her colony that whether "right or wrong," she ought to reverse her action without question, in order that she once more might deserve a reputation for generosity and the redemption of every obligation without quibble or hesitation?

Sirs, she did none of these. She felt she was clearly within her rights under the treaty. She still continued to secure advantages for her own nationals. To our repeated demands she made repeated denials or shifted her position in some trifling particular. Nor was any attempt made by the British ministry to stampede the people of England into a withdrawal from their position on the score that the national honor was involved in her strained interpretation of the terms of the treaty. She simply allowed rebating to continue to the great detriment of American ships and shippers. For years we constantly claimed our rights. For years our claims were constantly denied.

And then Congress, in a spirit of retaliation, passed "an act to enforce reciprocal commercial relations between the United States and Canada, and for other purposes." This law, approved July 26, 1892, by President Benjamin Harrison, 21 years after the ratification of the treaty, enabled the President, because of the continued discrimination against citizens of the United States in the use of the Welland Canal, to issue his retaliatory proclamation of August 18, 1892, placing a toll of 20 cents per ton on all freight passing through the St. Marys Falls Canal in transit to any port of the Dominion of Canada. Up to that time the St. Marys Falls Canal had been free of tolls to the vessels of that country. Of course Canada could not stand the strain of this punitive legislation, and the former retaliatory proclamation was soon suspended by a second proclamation of President Harrison, dated February 21, 1893, in which he withdrew the tolls for use of the St. Marys Falls Canal upon satisfactory assurances having been given that equality with British subjects had been secured to the citizens of the United States in regard to the use of the Welland Canal. That is how the system of Canadian rebates under the treaty of 1871 was abandoned. It was not done, as Sir Edward Grey stated, in the face of our repeated protests.

Canada has never to this day admitted that her grant of rebates was inconsistent with her treaty obligations. Quite the contrary. For the British ambassador presented notes to our Secretary of State just prior to the close of the incident, and after the abandonment of the system of rebates by Canada, in which he claimed that "every obligation of the treaty has been fully and unreservedly met." His statement also holds firmly to their "contention that they were justified in adopting the tolls and rebates," and adds "the difference of opinion which exists as to the treaty rights of the two countries is to

be regretted, but it forms no ground for a charge that either country in maintaining its own views proceeds with a disregard of solemn obligations."

I commend that language to those among you who are so fearful that our national honor will be tarnished if we refuse to follow the lead of the President in abandoning an American policy adopted by a former Congress, approved by a former President of the United States, promulgated by a former Secretary of State, and fully justified by an overwhelming majority of our countrymen.

Mr. Chairman, the President himself, when he was pleading for the votes of his countrymen, approved the soundness of our position on the question of tolls exemption in the Panama Canal for American vessels engaged in the coastwise trade. Speaking to a gathering of New Jersey farmers at Washington Park in that State on August 15, 1912, he said:

> One of the great objects in cutting that great ditch across the Isthmus of Panama is to allow farmers who are near the Atlantic to ship to the Pacific by way of the Atlantic ports, to allow all the farmers on what I may, standing here, call this part of the continent, to find an outlet at ports of the Gulf or the ports of the Atlantic seaboard, and then have coastwise steamers carry their products down around through the canal and up the Pacific coast or down the coast of South America.
>
> Now, at present there are no ships to do that, and one of the bills pending—passed, I believe, yesterday by the Senate as it had passed the House—provides for free toll for American ships through that canal and prohibits any ship from passing through which is owned by any American railroad company. You see the object of that, don't you? [Applause.] We don't want the railroads to compete with themselves, because we understand that kind of competition. We want water carriage to compete with land carriage, so as to be perfectly sure that you are going to get better rates around the canal than you would across the continent.
>
> The farmers of this country are, in my judgment, just as much concerned in the policy of the United States with regard to that canal as any other class of citizens of the United States. Probably they are more concerned than any other one class, and what I am most desirous to see is the farmers of the country coming forward as partners in the great national undertakings and take a wide national, nay, international, view of these great matters, feeling all the pulses of the world that beat in the great arteries of their own life and prosperity. Everything that is done in the interest of cheap transportation is done directly for the farmer as well as for other men. So that you ought not to grudge the millions poured out for the deepening and opening of old and new waterways. * * *
>
> Our platform is not molasses to catch flies. It means business. It means what it says. It is the utterance of earnest and honest men, who intend to do business along those lines and who are not waiting to see whether they can catch votes with those promises before they determine whether they are going to act upon them or not.
>
> They know the American people are now taking notice in a way in which they never took notice before, and gentlemen who talk one way and vote another are going to be retired to very quiet and private retreat.

Surely he does not want his words to be understood as having been only "molasses to catch flies"? And yet when we contrast his preelection utterances upon this subject with his address of March 5 we can come to no other conclusion. Surely the President of the United States would not stoop to play the rôle of a mere opportunist? Surely he was sincere when, in speaking of the free-tolls plank of the last Democratic national platform, he said:

> Our platform is not molasses to catch flies. It means business. It means what it says. It is the utterance of earnest and honest men, who intend to do business along those lines and who are not waiting to see whether they can catch votes with those promises before they determine whether they are going to act upon them or not.
>
> They know the American people are now taking notice in a way in which they never took notice before, and gentlemen who talk one way and vote another are going to be retired to very quiet and private retreat.

And yet the manner in which the planks of that platform are being ripped up, one by one, might well give rise to the suspicion that they were indeed intended as "molasses to catch flies." We have seen the civil-service plank badly shattered in the provision in the urgent deficiency bill, approved by President Wilson October 22, 1913, exempting deputy internal-revenue collectors and deputy marshals from the civil-service laws and regulations. We have seen the plank compelling the publication of the names of indorsers of appointees to the Federal courts chopped into kindling wood. We are now witnessing the attempt of the President and his followers to completely destroy the plank for the exemption of coastwise ships from the tolls provision of the Panama Canal act. And all, all despite the fact that prior to the presidential election of 1912 the present Chief Executive emphatically and positively proclaimed that his party "platform is not molasses to catch flies. It means business. It means what it says. * * * And gentlemen who talk one way and vote another are going to be retired to very quiet and private retreat."

In his recent address to Congress the President said:

> Whatever may be our own differences of opinion concerning this much-debated measure, its meaning is not debated outside the United States. Everywhere else the language of the treaty is given but one interpretation, and that interpretation precludes the exemption I am asking you to repeal.

He is evidently forgetful or unmindful of the fact that some noted English authorities have asserted the absolute soundness of our position. But even if all the world held we were in the wrong and we still believed we were in the right, it ought to be our proud boast that knowing the right we dare maintain it. [Applause.]

Sirs, the principles of truth and right are eternal. They should not be discarded at the whim of those who occupy lofty stations. We can afford to be generous on occasion. We have always been generous in our treatment of the nations of the earth during all our history. As I pointed out when this exemption question was pending here in 1912, we have performed innumerable acts of altruism during our brief history. But no request of any President, based upon the mere matter of expediency, will ever deter me from doing my duty to my country in accordance with my own conception of duty to my country. [Applause.] Mr. Chairman, if, in the past, men had sacrificed their honest convictions on great principles to expediency, the world's progress would have been seriously retarded.

The patriots of the Revolutionary period could have purchased their peace with England easily, if they had been content to pay a trifling tax on tea, just to acknowledge the right of the mother country to levy such a tax. But they believed in the soundness of their doctrine, that taxation without representation is tyranny, and pledged their lives and their sacred honor to the maintenance of that doctrine. If they had, in a spirit of generosity, and as a matter of expediency, withdrawn from their position, the world might never have known the true value and benefit and glory of government of the people, by the people, and for the people. [Applause.]

Mr. Chairman, generosity is one of the noblest attributes of man; but we are taught in equity we must be just before we are generous. Sirs, that is a good, a safe, a wise rule of action, not alone for individuals but also for nations. But the gift we are now asked to make to mankind is evidently not intended to be a voluntary offering. It is to be given under duress—under coercion. It is not even a gift; it is rather to be in the nature of a fee, a price to buy the friendship of England in order that the administration may have her support in its foreign policy. And we are plainly told that unless we give it in ungrudging measure the Chief Executive shall not know how to deal with other matters of even greater delicacy and nearer consequence. Sirs, friendship thus bought is never worth the cost, for it is never lasting. Does anyone believe that we will be bettering our standing before the rest of mankind by yielding to the President's importunities? Will our action not be a confession that we have heretofore been guilty of an act of national dishonor? I, for one, deny the imputation carried in the President's recommendation. Does he believe that by tamely submitting to the demands of a competing nation for the exaction of a toll from our vessels in the coastwise trade, with which vessels under our laws those of no other country in the world may compete, we will be adding luster to American achievement? Does he believe the relinquishment, "right or wrong," without even a chance to arbitrate the question before a proper tribunal, will tend to dignify us and raise us to a higher station in the family of nations than we have heretofore occupied? If he believes these things, he will awake to a realization of the fact that he has been indulging in fatuous delusions. The real effect of his policy will result in additional demands. "There shall be no fortification of the canal" will undoubtedly be the next command. If those who contend we have no right to exempt American vessels in the coastwise trade under the Hay-Pauncefote treaty be right, I do not see, under their contention, where we get the right to fortify the canal. Fortification is the corollary of exemption. And it will be contended that the Senate, having voted down an amendment to the Hay-Pauncefote treaty providing for fortifications, the action of our Government in constructing fortifications at either end of the canal is in violation of the principles of neutralization as contemplated by the treaty, and must be discontinued.

Mr. Chairman, it is true the Senate did vote down such an amendment. It is also true that the Senate voted down the Bard amendment for the free passage through the canal of American coastwise vessels. But practically every Senator who was present at that time and has discussed the matter admits that action to have been predicated on the understanding that no such amendment was necessary, as the United States had the undoubted right to legislate for such exemption. The late Cushman K. Davis, of Minnesota, then chairman of the Committee on Foreign Relations of the Senate, so stated to his colleagues. He had the undoubted confidence of his fellow Senators. He had been one of the peace commissioners on the part of the United States in negotiating the treaty of Paris of 1898, after the War with Spain. He was regarded as

an expert in matters affecting our foreign relations, and his assurances that we had the right to legislate for free tolls for our coastwise vessels undoubtedly had the effect of causing the defeat of the Bard amendment. So it was in the matter of the canal's fortification. And to fail to properly fortify the approaches to the canal would, in my opinion, prove us guilty of criminal carelessness.

The Panama Canal will change the trade routes of the world, just as did the Suez Canal. The latter was a private enterprise, carried to a successful conclusion by Ferdinand de Lesseps, a French engineer, who had secured a concession for its construction from Saïd Pasha, Khedive of Egypt, in 1854. Subsequently England purchased the stock of Ismaïl Pasha, who had succeeded Saïd Pasha as Khedive, and thereby acquired an interest, though not a controlling one, in the Suez Canal. In 1882 a revolt against the then ruler of Egypt, Tewfik Pasha, was led by Arabi Pasha, an officer in the Egyptian Army. England sided with the Khedive, Tewfik Pasha. In the whirl of time we are apt to forget these incidents, and I deem it proper and timely to recall them at this moment, when we are nearing the completion of our Government's canal at Panama.

Wilfrid Scawen Blunt, at one time attached to the English diplomatic service, in his book entitled "Secret History of the English Occupation of Egypt," contrasting the English diplomacy of the period immediately succeeding the Crimean War with English diplomacy of more recent date, says:

> It was essentially pacific, unaggressive, and devoid of those subtleties which have since earned it a reputation of astuteness at the cost of its honesty.

And I do not doubt that the overwhelming majority of my countrymen will not question English astuteness in that country's dealing with the Panama Canal question. She was equally astute in 1882 in dealing with the Suez Canal question. That great waterway was also supposed to have been neutralized. While there was no specific treaty on the subject in 1882, it was tacitly understood and agreed by all maritime nations that the canal should be free and open to the vessels of commerce and of war of all nations on terms of entire equality. Arabi Pasha, in revolt against his sovereign, and claiming to be the rightful ruler of Egypt, had been urged by his confederates to seize the canal for strategic purposes. This Islamite chief, in response to de Lesseps's appeal against such action, replied:

> As I scrupulously respect the neutrality of the canal, especially in consideration of its being so remarkable a work, * * * I have the honor to inform you that the Egyptian Government will not violate that neutrality except at the last extremity and only in the case of the English having committed some act of hostility at Ismailia, Port Said, or some other point of the canal.

All honor to that Mohammedan chief, who respected the rights of its neutrality in refusing to attack or destroy the canal to gain even a military advantage.

England's officers also knew of the canal's neutrality. Capt. Gill, an English officer, kept a diary of his activities during the Egyptian insurrection in 1882. On August 5 he went down the canal with another officer to Suez, but stopped at Ismailia to discuss with a Mr. Pickard the best route to choose for cutting the telegraph. He learned there were three routes, one being from Gisr or Kantara, but scrupulously notes in his diary that this is objectionable as violating the neutrality of the canal. But did England eventually scruple about such a violation of neutrality? Oh, no. When it served her purpose to seize the canal for military purposes, she promptly did so. During Sunday, Monday, and Tuesday, August 20, 21, and 22, respectively, she violently took possession of the Suez Canal, and for those three days refused all vessels, even those of the canal company itself, the right of entering or leaving that waterway. She ordered all shipping tied up at the gares or widenings in the canal, notwithstanding its avowed neutrality. Contrast England's action with that of the Islamite, Arabi Pasha, and ask yourselves whether we would be doing our duty to ourselves, our country, and its future generations if we were to recede from our determination to fortify the canal. The Government of the United States had detailed Lieut. Commander C. F. Goodrich, of our Navy, now rear admiral, retired, to observe the developments and progress of that campaign. He made a long and exhaustive report to the then Secretary of the Navy, Hon. William E. Chandler, in which he quotes a telegram from M. de Lesseps, dated at Ismailia, August 19, 1882. This telegram reads:

> The English admiral at Suez informs the company's chief traffic agent that in consequence of orders from his Government he forbids, until the receipt of further orders, any ship, large or small, even the company's boats, to enter the canal, and he will resort to force to prevent any attempt to contravene these orders. The admiral, moreover, has placed a gunboat at the mouth of the canal. I have protested against this act of violence and spoliation.

This telegram was sent on the day before Admiral Hoskins, of the British Navy, despite a vigorous circular of protest from the canal company, took possession of the canal and its dependencies. Lieut. Commander Goodrich, in his report to our Government, made this observation in commenting on England's action in this matter:

> The inference to Americans is obvious that the neutrality of any canal joining the waters of the Atlantic and Pacific Oceans will be maintained, if at all, by the nation which can place and keep the strongest ships at each extremity.

In order to impress our Navy Department with the importance of this suggestion our representative italicized every word embraced in this comment.

Mr. Chairman, it seems to me that our duty is plain. We must not recede from our position, either as to free tolls for American ships in the coastwise trade or as to the fortification of the canal.

It would be much easier and far more desirable for the administration to change its foreign policy than for us to abandon our undoubted rights in the canal which we have built without foreign assistance, financial or otherwise, for the benefit of the world's commerce. It is conceded by all that we have the undoubted right to pass our ships of war through the canal free of tolls, even though we charge tolls on the warships of every other nation. In my opinion, that concession determines the entire controversy. If we can, under the treaty, favor our own ships of war, we can also favor our own ships of commerce, for the very paragraph relied on by our opponents to uphold their position speaks jointly of "the vessels of commerce and of war of all nations."

We are manifesting our generosity by charging our vessels of commerce in the foreign trade identically the same tolls that we are charging the vessels of commerce of all the great maritime nations of the world. These nations, under existing law, can not compete with our ships engaged in our coastwise trade. They are therefore not injured financially or otherwise. But the citizens of the United States, in their desire to foster genuine and legitimate competition between the railroads and the waterways of our country are amply justified in demanding that the existing law be not repealed. There must be no abject surrender. There must be no subserviency. There must be no notice to the world that while the people of the United States have always stood for fair dealing and honesty in their international relations, they will not yield, under pressure, a principle which they believe to be absolutely right. As was said on another occasion when humiliating propositions were made to the accredited representatives of this Republic when she was but a weak and struggling member of the family of nations, "Millions for defense, but not one cent for tribute." [Applause.]

Mr. HUMPHREY of Washington. Mr. Chairman, I yield 20 minutes to the gentleman from Pennsylvania [Mr. MOORE].

Mr. MOORE. Mr. Chairman, the President of the United States has asked Congress to repeal that paragraph of the Panama Canal act which provides for free tolls to American ships. In his address the President said, "I shall not know how to deal with other matters of even greater delicacy and nearer consequence if you do not grant it to me in ungrudging measure." It is evident the President's embarrassment arises from his interpretation of the Clayton-Bulwer treaty of 1850 and the carrying over of certain stipulations of that treaty into the Hay-Pauncefote treaty of 1901. As the President reads these treaties the United States will suffer in good repute at home and abroad, if it shall permit the vessels of this country to pass through the canal free of tolls while tolls are levied against the vessels of other nations.

Without citing the findings of great minds that have undertaken to interpret the treaties at variance with the President's views, it is extremely difficult, in the light of such information as the President has submitted to the House, to agree that the Government has reached the limit of its resources in diplomacy and that all doubt is to be resolved in favor of Great Britain.

The United States has undertaken peacefully and with its own money to construct a canal at Panama for the welfare of the nations of the world. That all nations shall use the canal on equal terms may be conceded as the benevolent purpose of the people of the United States in constructing the canal. Are we now to vote them out of their right to regulate and manage their internal affairs through and upon the canal? This apparently will be the effect of favorable action on the question of repeal. Not this only, but we are to concede that it is also our duty to pay the maintenance cost of the canal for the benefit of other nations forever, no matter how great the tax upon our own people may become.

The administration's policy in this regard may be consistent in honor, but, unhappily, it is also consistent in this, that

whereas we appear to have assumed the right to intervene in the internal affairs of the people of Mexico by dictating who shall be their President, therefore Great Britain has the right to intervene in our internal affairs by dictating the kind of treatment the United States shall accord to its own ships. For one, I am not prepared to admit that either policy is right, nor do I believe that up to date, in either of these transactions, the honor of this country has any very great advantage over its humiliation.

What is the duty of Congress with respect to this repeal of the free-tolls provision? So far as the House of Representatives is concerned, it is brought unfairly into this controversy, for it had no part in making the Clayton-Bulwer treaty, nor in continuing its provisions in the Hay-Pauncefote treaty. Yet the House is told by the President that it ought to undo legislation it assisted in enacting for the people whom it directly represents, because a moral obligation was laid upon the Nation in 1850 by diplomatic and senatorial action and was renewed by the same agencies in 1901.

The moral obligation by which the American Nation is supposed to be bound, and in which the Members of the House of Representatives had no voice, appears now to have carried with it the right of Great Britain to estop the representatives of the American people from giving free passage to American merchant vessels and men-of-war through a canal which the people of the United States built with their own money and to whom in the Hay-Pauncefote treaty "the exclusive right of providing for the regulation and management of the canal" was expressly conceded.

In trying to reach a solution of the question presented to us by the President, I do not intend to criticize the motives of Great Britain in holding fast to a good bargain, nor do I intend to concede that American diplomats made a bad one. The United States wanted to build the canal at Nicaragua, or Panama, and did finally build it at Panama with the acquiescence of Great Britain as expressed in the Hay-Pauncefote treaty which "superseded" the Clayton-Bulwer treaty.

We could not build the canal under the Clayton-Bulwer treaty without the consent of Great Britain, but that embargo was lifted in the Hay-Pauncefote treaty, and it was agreed "that the canal may be constructed under the auspices of the Government of the United States," and the United States "shall have and enjoy all the rights incident to such construction, as well as the exclusive right of providing for the regulation and management of the canal."

Great Britain did not object to our "exclusive right" to provide for the regulation and management of the canal, which it agreed we should construct. To that extent it put the entire burden of construction, operation, and maintenance upon the United States. Nor did it object to the acquisition by the United States of the Panama Canal Zone for the purposes of the canal; but it now insists, in effect, that the Congress of the United States has no right to exempt American ships engaged in the coastwise trade from the tolls levied upon the ships of other nations using the canal. It is upon this ground the President invokes the repeal of the free-tolls clause.

What are we going to do about it? Great Britain stands upon the paragraph of the Hay-Pauncefote treaty which says:

> The canal shall be free and open to the vessels of commerce and of war of all nations observing these rules, on terms of entire equality, so that there shall be no discrimination against any such nation.

And so forth.

The President puts it up to Congress as a question of honor. It is contended by some that England had a "mortgage" on the United States by virtue of concessions made to the United States at the time of the Clayton-Bulwer treaty, and that the Hay-Pauncefote treaty revived that "mortgage." In a memorandum to Lord Pauncefote, August 3, 1901, Lord Lansdowne, presenting Great Britain's objections to certain of Secretary Hay's amendments, referred to the Clayton-Bulwer convention as "an international compact of unquestionable validity," which he said "could not be abrogated or modified save with the consent of both parties to the contract." Further on in the same memorandum he said that while His Majesty's Government had an "earnest desire to meet the views of the United States, and would sincerely regret a failure to come to an amicable understanding," and so forth, they "preferred, as matters stood, to retain unmodified the provisions of the Clayton-Bulwer convention."

In other words, the Clayton-Bulwer treaty would stand forever, as Great Britain viewed it, whether the canal was constructed or not.

Nevertheless the United States pressed its diplomatic negotiations, and notwithstanding the 50-year-old "mortgage" which Great Britain had recorded against the United States in the Clayton-Bulwer treaty—a mortgage, by the way, which was just as effective against Great Britain as it was against us—Great Britain, in the Hay-Pauncefote treaty, did finally concede to the United States not only the right to construct the canal but yielded to "the exclusive right of providing for the regulation and management of the canal."

In making that concession, which was the one vital thing the United States contended for, Great Britain may be said to have accepted consideration for the alleged "mortgage" it held in the Clayton-Bulwer treaty, in that it received assurance of the construction without cost to itself of a canal for which it had been waiting for centuries and from which it would derive tremendous benefit. Moreover it left the United States free to provide for the "regulation and management of the canal." It is true there was to be "no discrimination against any such nation," and so forth, but still the United States was to have "the exclusive right of providing for the regulation and management of the canal."

Having thus withdrawn from or been relieved of participation in any expense of construction or operation, Great Britain conceded to the United States "the exclusive right" to regulate and manage the canal. We heard no complaint when the United States conceded to Panama by treaty the right of free passage for its vessels through the canal; neither was there complaint, so far as we know, that the United States had undertaken, at its own expense, to fortify the canal. The only question that has been raised is that of tolls, upon which the President has addressed the Congress.

Shall the bill that has been introduced for the repeal of the free-tolls paragraph be passed? For one I am not now prepared to vote for it. Valuing the honor of my country and believing it should keep its plighted word, I am not yet satisfied that my country is in the wrong or has not kept its word.

The United States in constructing the Panama Canal has accomplished the engineering marvel of the ages. It has expended its treasure and given up the lives of many of its patriotic sons in order that all the nations of the earth shall reap the advantage of it. In providing a canal from ocean to ocean the United States contributes to the commerce of the world a saving of thousands of miles of sailing delay and risk in treacherous seas. It has changed the map of the world so that the nations will be brought into closer relationship, and civilization generally will be vastly improved. In short, the United States, and the United States alone, has brought to a realization the dream of the ages in geography, in commerce, and in human achievement.

Great Britain, it is believed, will share in the advantages of this stupendous work more than will the United States. Germany also will doubtless be a greater beneficiary of commercial results. Germany and England and all other nations will have the protection of the United States in the use of the canal. They will pass through it at the expense of the United States, which constructed and owns it. Is it reasonable that any treaty drafted in the interest of universal peace, as the treaty of 1850 was supposed to have been, should be construed to bar the owner of this the world's greatest engineering undertaking from its own property?

Mr. Chairman, I do not plead for the exemption of American ships because they ought not to pay tolls; perhaps they might be made to aid in bearing the burden of operating the canal. That, however, is not the question. Shall the regulation of the American ships using the canal—ships that do not come into competition with Great Britain or any other nation—be regulated by the United States in its own way? Or, in spite of the "exclusive right of regulation and management" conceded to the United States in the Hay-Pauncefote treaty, shall that right be interfered with or questioned by Great Britain or any other nation?

I do not see how, after giving Great Britain the use of the canal "on terms of entire equality" with those of all nations, we can go further in this instance without acknowledging the right of foreign interference with those ships of Uncle Sam which seek the use of his own great maritime highway. Nor do I believe the American people will tolerate the delegation of that right to any other nation. It is for us to regulate our own ships on our own territory.

Mr. Chairman, in my opinion the administration has not exhausted all the means at its command to settle this controversy without embarrassing Congress. Unless our diplomacy is entirely awry, there is still recourse by which a national humiliation may be avoided. There is something more than "the pound of flesh denominated in the bond."

We have given much to Great Britain as recompense for any consideration she may have yielded us in 1850. We have contributed to the peace of nations in Cuba and the Philippines. We have contented ourselves with home affairs, while Great

Britain and Germany have taken the trade of South America. We have kept the foreign nations from going to war against that business. We have lowered our American tariffs to their great advantage. And, lastly, we have built a canal to link up the Atlantic and the Pacific, more apparently, for their commercial benefit than for our own. Surely we have done something to earn the "exclusive right" to regulate and manage the canal. Surely we have done enough to induce the Department of State to make another effort to relieve the United States of the perpetual obligation it is asked to impose upon itself. If the canal is good for Great Britain or any other nation and is to be subject to the supervision of Great Britain, why should all the expense of construction and maintenance be borne by the United States alone? The best peace arrangement the world has ever known presents itself in the neutralization and joint operation of the Panama Canal. This should appeal to the Department of State as a cause for further diplomatic negotiations.

If the canal is to be a world's enterprise for the use of all nations, and the United States, which owns it at a cost of $375,000,000 and operates it an annual outlay on one account or another of $25,000,000, is not to have the use of it for the ships of its own fleet, would it be inconsistent with the honor of other nations who use it to assist in paying for it? Let the Department of State think this over.

Or, if the administration still reads the treaties as binding the United States only to perpetual servitude in a hazardous and expensive enterprise, what may be said of the power of Great Britain under either the Clayton-Bulwer or Hay-Pauncefote treaties to compel the United States to open and operate the canal if it chooses to keep it closed? Here is a phase of the diplomatic situation I have not seen discussed anywhere in the treaties or correspondence. Suppose the resources of the United States should some time be found inadequate to operate the canal. Or suppose, for some other reason, the Congress should determine to close it. Is there anything in the treaties to compel the United States to operate the canal?

Or suppose the United States should undertake to grant its rights in the canal to Germany or some other power having large interests in South America. Is there anything to stop it?

These and other questions that suggest themselves to the lay mind I leave for possible diplomatic consideration, even though it be determined by those who have the power so to do to vote away the one exclusive and patriotic right which most American citizens believed to have been reserved to the United States in its monumental world benefaction—the Panama Canal. [Applause.]

Mr. SPARKMAN. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 13811) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, and had come to no resolution thereon.

### ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 746. An act for the relief of Capt. Frank Parker.

### SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 4023. An act for the relief of Waldo H. Coffman; to the Committee on Military Affairs.

### USELESS PAPERS IN THE EXECUTIVE DEPARTMENTS.

Mr. TALBOTT of Maryland, from the Joint Select Committee on the Disposition of Useless Papers in the Executive Departments, to which was referred the report of the Secretary of the Treasury (H. Doc. No. 104) and the report of the Postmaster General (H. Doc. No. 576), submitted a report (No. 398) thereon, which was ordered to be printed.

### LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. COOPER, indefinitely, on account of illness.

### ADJOURNMENT.

Mr. SPARKMAN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 54 minutes p. m.) the House adjourned until Wednesday, March 18, 1914, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of the Navy submitting an estimate of appropriation in the sum of $400,000 for high-power radio stations (H. Doc. No. 837); to the Committee on Naval Affairs and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting supplemental estimate of appropriation for salaries, office of Auditor for the Interior Department, for the fiscal year ending June 30, 1915 (H. Doc. No. 838); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Secretary of the Treasury, inviting attention to estimates for salaries, office of the Secretary, and recommending an appropriation for an executive clerk in the office of the Assistant Secretary for the fiscal year 1915 (H. Doc. No. 839); to the Committee on Appropriations and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. TAYLOR of Colorado, from the Committee on the Public Lands, to which was referred the bill (H. R. 1633) granting certain coal lands to the city of Grand Junction, Colo., reported the same with amendment, accompanied by a report (No. 399), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (H. R. 7048) making appropriation for the relief of C. Jensen for injuries sustained from forest team, reported the same without amendment, accompanied by a report (No. 400), which said bill and report were referred to the Private Calendar.

Mr. PETERS of Maine, from the Committee on Claims, to which was referred the bill (H. R. 12778) for the relief of W. D. Stoyer, administrator of the estate of Henry S. Stoyer, reported the same without amendment, accompanied by a report (No. 401), which said bill and report were referred to the Private Calendar.

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (H. R. 1138) for the relief of Helen Wakefield, reported the same without amendment, accompanied by a report (No. 402), which said bill and report were referred to the Private Calendar.

Mr. METZ, from the Committee on Claims, to which was referred the bill (H. R. 7091) for the relief of C. E. Anderson, reported the same without amendment, accompanied by a report (No. 403), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 6420) for the relief of Ella M. Ewart, reported the same without amendment, accompanied by a report (No. 404), which said bill and report were referred to the Private Calendar.

Mr. GARD, from the Committee on Military Affairs, to which was referred the bill (H. R. 5746) for the relief of Marcus L. Pelham, reported the same without amendment, accompanied by a report (No. 405), which said bill and report were referred to the Private Calendar.

Mr. MOTT, from the Committee on Claims, to which was referred the bill (H. R. 4480) to reimburse certain fire insurance companies the amounts paid by them for property destroyed by fire in suppressing the bubonic plague in the Territory of Hawaii in the years 1899 and 1900, reported the same without amendment, accompanied by a report (No. 406), which said bill and report were referred to the Private Calendar.

Also, petition of L. F. Dudley and 28 other citizens of Marengo, Ohio, in favor of House joint resolution No. 168, relating to national prohibition; to the Committee on the Judiciary.

Also, petition of Rev. F. J. Reinbarth and 25 other citizens of Wharton, Ohio, in favor of House joint resolution No. 168, relating to national prohibition; to the Committee on the Judiciary.

## SENATE.

### WEDNESDAY, *March 18, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we thank Thee for life, for the life that is more and more abundant, the life that has its center and source in Thyself. We bless Thee for the wild joy of just living, for Thou hast so adapted us in Thy providence to the world Thou hast given to us that there is joy and gladness in living the life that Thou hast committed to us. We thank Thee for intimations of the life beyond, so full, so rich, so abundant, and that so find answer in the universal heart, that there is the universal longing after immortality. We bless Thee that above all the ministries that come to us, luring us onward and upward, there is the final, highest revelation in Him who came that we might have life, and have it more abundantly. He hath said, As I live ye shall live also. So do Thou lead us to the fullest life. In His name's sake. Amen.

The Journal of yesterday's proceedings was read and approved.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a memorial of Poaling Zion Branch, No. 2, of Philadelphia, Pa., and a memorial of Nationaler Arbeiter Verband, No. 1, of Philadelphia, Pa., remonstrating against the enactment of legislation to provide an educational test for immigrants to this country, which were referred to the Committee on Immigration.

He also presented a petition of sundry citizens of New Bedford, Pa., praying for the adoption of an amendment to the Constitution to prohibit polygamy, which was referred to the Committee on the Judiciary.

Mr. BURTON presented a petition of Local Union No. 121, United Mine Workers of America, of Buffalo, Ohio, praying that an investigation be made of conditions existing in the mining district of Colorado, which was ordered to lie on the table.

He also presented a memorial of Dick Lambert Post, No. 165, Department of Ohio, Grand Army of the Republic, of Ironton, Ohio, and a memorial of Tod Post, No. 29, Grand Army of the Republic, Department of Ohio, of Youngstown, Ohio, remonstrating against any change being made in the American flag, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Toledo, Cleveland, Cincinnati, and Portsmouth, all in the State of Ohio, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of local branch of the Railway Mail Association of Cincinnati, Ohio, praying for the enactment of legislation to reimburse certain railway postal clerks who have been demoted for service reasons only, which was referred to the Committee on Post Offices and Post Roads.

He also presented petitions of sundry citizens of Medina, Seville, Bloomdale, Circleville, Columbus, Lakewood, Warsaw, Orville, Marshallville, Gloucester, Damascus, New Philadelphia, McConnelsville, Coshocton, Hicksville, Youngstown, Cleveland, Ashland, Flushing, and Middletown; of the congregations of Zion Evangelical Church of Kenmore; the Crystal Park Methodist Episcopal Church, of Canton; the Presbyterian Church of Frankfort; and the Presbyterian Church of Osborn, all in the State of Ohio, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. THORNTON. In behalf of a large number of citizens of New Orleans, La., I present memorials remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages. I move that the memorials be referred to the Committee on the Judiciary.

The motion was agreed to.

Mr. SHEPPARD presented memorials of sundry citizens of Houston and Corpus Christi, in the State of Texas, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of the Board of Trade of Pittsburgh, Pa., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. GALLINGER presented a petition of sundry citizens of East Rochester, N. H., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. OLIVER presented petitions of sundry citizens of Pennsylvania, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Pennsylvania, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented memorials of various branches of the American Continental League of Pennsylvania, remonstrating against an appropriation for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which were referred to the Committee on Foreign Relations.

He also presented petitions of various patriotic orders of Pennsylvania, praying for the enactment of legislation to further restrict immigration, which were referred to the Committee on Immigration.

Mr. CLAPP presented memorials of the Minnesota Turnbezirk of Minneapolis, and of sundry citizens of Minneapolis, Red Wing, and Lake City, all in the State of Minnesota, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. McLEAN presented a memorial of Local Grange No. 140, Patrons of Husbandry, of Plainfield, Conn., remonstrating against the free distribution of seeds by the Government, which was referred to the Committee on Agriculture and Forestry.

He also presented a memorial of Local Union No. 8, Metal Polishers, Buffers, and Platers, of Meriden, Conn., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a memorial of Local Branch, American Continental League, of Ansonia, Conn., remonstrating against an appropriation being made for the so-called "One hundred years of peace among English-speaking peoples," which was referred to the Committee on Foreign Relations.

He also presented a petition of Leeds Council, No. 16, Order United American Mechanics, of Stamford, Conn., praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

Mr. DU PONT presented the memorial of John J. Dougherty, of Wilmington, Del., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Wilmington, Del., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. LODGE presented a memorial of the American Continental League, of South Boston, Mass., remonstrating against an appropriation for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which was referred to the Committee on Foreign Relations.

He also presented a memorial of the Ancient Order of Hibernians of Essex County, Mass., remonstrating against an appropriation for the celebration of the so-called "One hundred years of peace among English-speaking peoples," and also against the repeal of the clause in the Panama Canal act exempting American coastwise vessels from the payment of tolls, which was referred to the Committee on Interoceanic Canals.

He also presented a petition of the Baptist Young People's Union, of Middleboro, Mass., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. BRANDEGEE presented a memorial of Local Union No. 8, Metal Polishers, Buffers and Platers, of Meriden, Conn., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a memorial of Local Branch, American Continental League, of Ansonia, Conn., remonstrating against an appropriation for the celebration of the so-called "One hundred years of peace among English-speaking peoples," which was referred to the Committee on Foreign Relations.

He also presented a memorial of Local Branch, Irish-American Societies of Connecticut, of Ansonia, Conn., remonstrating against the repeal of the exemption clause in the Panama Canal act, which was referred to the Committee on Interoceanic Canals.

He also presented resolutions adopted by Plainfield Grange, No. 140, Patrons of Husbandry, of Plainfield, Conn., favoring a discontinuance of the free-seed distribution by the Federal Government, which were referred to the Committee on Agriculture and Forestry.

Mr. JOHNSON presented memorials of citizens of Portland, Me., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. WEEKS presented a memorial of the Ancient Order of Hibernians, of Essex County, Mass., remonstrating against an appropriation for the celebration of "One hundred years of

peace among English-speaking peoples," which was referred to the Committee on Foreign Relations.

He also presented a petition of sundry citizens of Boston, Mass., praying for the enactment of legislation to provide for compensation for mechanics, generally known as machinists and toolmakers, employed by the United States Government, which was referred to the Committee on Education and Labor.

Mr. BRADLEY. I present 666 individual memorials from citizens of the State of Kentucky, remonstrating against the adoption of the so-called Hobson bill or any other measure looking to national prohibition. I ask that the memorials may be received and referred to the Committee on the Judiciary.

The VICE PRESIDENT. The memorials will be referred to the Committee on the Judiciary.

Mr. BRADLEY. I also present memorials from 275 citizens of the third congressional district of Kentucky, remonstrating against the passage of the joint resolution proposing an amendment to the Constitution for the prohibition of the manufacture and sale of alcoholic liquors. I ask that the memorials may be received and referred to the Committee on the Judiciary.

The VICE PRESIDENT. The memorials will be referred to the Committee on the Judiciary.

### CHESAPEAKE & DELAWARE CANAL CO.

Mr. WILLIAMS. From the Committee to Audit and Control the Contingent Expenses of the Senate I report back favorably without amendment Senate resolution 304, authorizing the Committee on Coast and Insular Survey to investigate and report on the Chesapeake & Delaware Canal Co., submitted by the Senator from Delaware [Mr. SAULSBURY] on the 17th instant. I will ask instead of the resolution going to the calendar that it may be referred to the Committee on Coast and Insular Survey. It involves a question of expenditure from the contingent fund, but on account of the substantial legislation involved it has to go to the other committee. I ask that it may be so referred.

The VICE PRESIDENT. The resolution will be referred to the Committee on Coast and Insular Survey.

### BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SHAFROTH:

A bill (S. 4942) granting an increase of pension to Lewis Stevens; to the Committee on Pensions.

By Mr. WORKS:

A bill (S. 4943) to amend section 1 of an act of Congress approved April 9, 1912 (37 Stat., 80), entitled "An act to authorize the Secretary of the Interior to secure for the United States title to patented lands in the Yosemite National Park, and for other purposes"; to the Committee on Public Lands.

A bill (S. 4944) granting an increase of pension to Lewis Stone (with accompanying papers); to the Committee on Pensions.

By Mr. SHEPPARD:

A bill (S. 4945) to regulate the collection of special taxes now provided for by law against retail dealers in liquors and wholesale dealers in liquors, and the issuance of receipts and licenses to such dealers in such manner as to restrict the issuance of such receipts and licenses to persons proposing to engage in such business in localities in which, under the laws obtaining in said locality, such business is not prohibited; to the Committee on Finance.

A bill (S. 4946) to establish an additional fish-cultural station in the State of Texas; to the Committee on Fisheries.

By Mr. THORNTON:

A bill (S. 4947) for the relief of the estate of W. B. Knight, deceased; to the Committee on Claims.

By Mr. COLT:

A bill (S. 4948) granting an increase of pension to Lucy A. Hopkins (with accompanying papers); to the Committee on Pensions.

By Mr. SHERMAN:

A bill (S. 4949) granting an increase of pension to John Howard; to the Committee on Pensions.

By Mr. DU PONT:

A bill (S. 4950) to authorize the award of medals for service in battle; to the Committee on Military Affairs.

By Mr. JOHNSON:

A bill (S. 4951) to correct the military record of Charles K. Bolster; to the Committee on Military Affairs.

A bill (S. 4952) granting an increase of pension to Charles H. Elwell (with accompanying papers); and

A bill (S. 4953) granting an increase of pension to Joseph J. Perry (with accompanying papers); to the Committee on Pensions.

### CENSORSHIP OF MOTION PICTURES.

Mr. SMITH of Georgia. I wish to introduce by request a bill providing for censorship of motion pictures. I ask unanimous consent, without having the bill read at length, that it may be printed in the RECORD. I am anxious that the people all over the country should know just what is in it and that we may have the benefit of any criticism its publicity may bring upon it. I ask that the bill be referred to the Committee on Education and Labor.

The bill (S. 4941) to establish an official national censorship of motion pictures in interstate and foreign commerce and in the District of Columbia and the Territories and all other places under national jurisdiction was read twice by its title and referred to the Committee on Education and Labor.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

A bill (S. 4941) to establish an official national censorship of motion pictures in interstate and foreign commerce and in the District of Columbia and the Territories and all other places under national jurisdiction.

*Be it enacted, etc.*, That a Federal motion picture commission is hereby created, to be a part of the United States Bureau of Education and to be composed of five commissioners appointed by the President, not more than three of whom shall be of the same political party.

SEC. 2. No commissioner shall hold any other office or position under the United States Government. Each commissioner shall hold office for six years, except that when the commission is first constituted two commissioners shall be appointed for two years, two for four years, and one for six years. Each commissioner shall thereafter be appointed for full term of six years. Any vacancy shall be filled in same manner as an original appointment. The salary of the chairman shall be $3,500 a year and of each other commissioner $3,000 a year.

SEC. 3. The commission may appoint deputy commissioners and other assistants and fix the compensation of each. Actual and necessary traveling expenses shall be allowed to those who travel on the business of the commission, which shall be provided with necessary office furniture, stationery, supplies, projecting machines, and appliances necessary for inspection of films and for manufacture of film seals.

SEC. 4. The commission shall license every film submitted to it and intended for entrance into interstate commerce unless it finds that such film is obscene, indecent, immoral, or depicts a bull fight or a prize fight, or is of such a character that its exhibition would tend to corrupt the morals of children or adults or incite to crime. The commission may license any film subject to such excisions, amplifications, or alterations as the commission may direct and require to be made. The commission may, by unanimous vote, withdraw any license at any time for cause shown.

SEC. 5. The commission may appoint advisory commissioners to advise and assist in the examination and censoring of films, who shall hold office during the pleasure of the commission and serve without compensation. No person shall be appointed an advisory commissioner who directly or indirectly has any pecuniary interest in the exhibition of motion pictures or in any film exchange or firm or corporation engaged in manufacturing motion-picture films.

SEC. 6. The commission shall adopt an appropriate seal, which shall be affixed in such manner as the commission may direct to every film approved by it. Such seal shall not be attached to any film which has been approved by the commission subject to revision until after the required changes have been made, a record of which shall be kept, and portions objected to shall be delivered into the possession of the commission.

SEC. 7. When any film has been approved the commission shall issue a certificate in the form adopted by the commission. Each certificate shall describe the film and shall bear a serial number and shall state its title and description and the day upon which it was approved by the commission, and the number of linear feet contained therein. No copyright shall be issued for any film which has not previously received the certificate and seal of this commission.

SEC. 8. The commission may, if it has licensed a film, issue a seal and certificate for each duplicate thereof without an examination of such duplicate.

SEC. 9. No person, firm, or corporation shall carry or transport any film from or into any State in interstate commerce unless such film has been licensed by the commission and the seal of the commission has been attached thereto and a true copy of the certificate accompanies it.

SEC. 10. No moving-picture film that has not been licensed by the commission and does not bear its stamp shall be exhibited in any licensed place of amusement for pay or in connection with any business in the District of Columbia or the Territories or any other place under the jurisdiction of the United States Government.

SEC. 11. In places designated in section 10 the seal of the commission attached to the film shall be exhibited on the screen before and in the same manner as such film is exhibited, and the certificate granted for a film shall be posted at or near the entrance to the place where such film is being exhibited during the exhibition thereof.

SEC. 12. The fee for the examination of each film of 1,000 feet or less shall be $3. These fees shall be paid monthly into the United States Treasury.

SEC. 13. Any change or alteration in any picture on the film after it has been licensed shall be a violation of this act and shall also void the certificate and seal issued for or attached to such film, and it shall be unlawful to exhibit it as aforesaid or transport it in interstate commerce.

SEC. 14. The commission shall annually, on or before the 1st day of January in each year, submit a written report to the United States Commissioner of Education. In this report, and by other means, the commission shall make recommendations to importers and producers of films and to the public regarding the educational and recreational uses of motion pictures.

SEC. 15. The penalty for violation of this act shall be a fine of not more than $500, or imprisonment not more than one year, or both, together with confiscation of films unlawfully changed or exhibited or transported.

SEC. 16. The sum of $25,000, or so much thereof as may be necessary, is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, for the payment of the salaries and expenses of the

commission, to be paid by the Treasurer upon the warrant of the United States Commissioner of Education, additional to what has been appropriated for the United States Bureau of Education.

SEC. 17. This act shall take effect immediately, except sections 9, 10, and 11, which shall take effect nine months from date of the approval of this act.

AMENDMENT TO NAVAL APPROPRIATION BILL.

Mr. TILLMAN submitted an amendment providing that hereafter no officer or enlisted man on the active list of the Navy or Marine Corps, and no such officer not on the active list but who is under orders to perform active duty, who shall be unable to perform such active duty, or is absent therefrom, on account of physical unfitness of any character resulting from his own misconduct shall receive pay for the period of such absence or inability to perform active duty, etc., intended to be proposed by him to the naval appropriation bill, which was referred to the Committee on Naval Affairs and ordered to be printed.

INSPECTION AND GRADING OF GRAIN.

Mr. LANE submitted an amendment intended to be proposed by him to the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes, which was ordered to lie on the table and to be printed.

POWER OF THE FEDERAL JUDICIARY.

Mr. BURTON submitted the following resolution (S. Res. 365), which was read and, with the accompanying paper, referred to the Committee on Printing:

*Resolved*, That a pamphlet entitled "The Power of the Federal Judiciary to Declare Legislation Invalid which Conflicts with the Federal Constitution," by David K. Watson, be printed as a Senate document.

HEARINGS BEFORE THE COMMITTEE ON INDIAN AFFAIRS.

Mr. ASHURST submitted the following resolution (S. Res. 366), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

*Resolved*, That the Committee on Indian Affairs, or any subcommittee thereof, be, and the same is hereby, authorized to employ a stenographer from time to time as may be necessary, to report such hearings as may be had on the pending Indian appropriation bill, such stenographer to be paid at a rate not exceeding $1 per printed page; and that the expense thereof be paid out of the contingent fund of the Senate.

PANAMA CANAL TOLLS.

The VICE PRESIDENT. The morning business is closed.

Mr. JONES. I ask leave to call up Senate resolution 288.

The VICE PRESIDENT. Is there objection?

Mr. SMITH of Arizona. What is the resolution?

Mr. JONES. The Secretary may read it.

The VICE PRESIDENT. The resolution will be read.

The Secretary read Senate resolution 288, submitted by Mr. JONES on the 6th instant, as follows:

*Resolved*, That the President be, and he is, requested, if not incompatible with the public interests, to advise the Senate what nations have protested against the passage of coastwise vessels through the Panama Canal free of tolls, what representations have been made regarding the same, and copies of all communications received from foreign countries relating thereto, together with copies of answers submitted by the United States.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. SMITH of Georgia. I suggest that the resolution be referred to the Committee on Foreign Relations.

Mr. JONES. Before that is done I desire to take a few minutes of the Senate to submit some remarks.

Mr. SMITH of Georgia. Very well.

Mr. JONES. Mr. President, I have refused to criticize the President's Mexican policy, even though I have thought and am now convinced that grave mistakes have been made in dealing with this delicate situation. The large responsibility is his, and I would not embarrass him in its solution, especially so long as his efforts are directed to preserving peace between the two countries and to keeping our armies out of Mexico. Intervention means war; war means battles and death. Battles can not be fought without men; men must come from the homes of the land, leaving sorrow, anguish, and pain. In the interest of the innocent people at home—husbands, sons, wives, mothers, and sweethearts—I have applauded every effort of the President in their behalf, and I earnestly hope that his efforts may be crowned with success, especially so long as they do not involve dishonor to our country.

As a Senator of the United States I am the representative of the people of my State and not the servant of the President. In matters of legislation and domestic concern I have as great, if not greater, responsibility than he, and I would be unfaithful to my trust if I should stifle my convictions of duty, disregard the interests of my people, and supinely follow his dictation.

Congress, by an overwhelming majority, in 1912 passed a law exempting American coastwise ships from paying tolls on going through the Panama Canal. This action was taken after long and full discussion. It was indorsed by and was in accordance with the party platform declaration of every great political party. It was expressly approved by Mr. Wilson as the candidate of the Democratic Party for President of the United States. He took particular pains to tell the farmers of the country that free tolls would be a great benefit to them in the regulation of transcontinental railroad rates, and assured them that "everything that is done in the interest of cheap transportation is done directly for the farmer as well as for other men"; and to impress them with the friendly attitude of the Democratic Party and its candidates he assured them that "our platform is not molasses to catch flies; it means business; and they who talk one way and vote another are going to be retired to a very quiet and private retreat." Our Democratic friends are most solicitous for the farmer during campaign, but he seems to be their special target in legislation.

The President must have thought then that our action in exempting coastwise ships was wise, just, beneficial, and honorable. He must have thought the meaning of the treaty clear and plain. He now urges us by special message to repeal this legislation. If we do so, it is an irrevocable act. The burden of tolls must rest forever on our coastwise ships, unless we see fit to relieve all vessels from tolls. What argument does he present; what reason does he offer for his change of view and for reversing our deliberate legislative action? Absolutely none. He says the "exemption constitutes a mistaken economic policy from every point of view." He gives no reason; he cites no facts upon which to base this assertion, so contrary to his public declaration in the last campaign. I assert that its repeal will be a great economic blunder, and will benefit the Canadian Pacific Railroad Co., Canadian interests, and the transcontinental railroad lines, and no others, and will injure more or less every other interest in this country. I shall present facts and argument proving this assertion when this proposed legislation comes up for consideration.

He says the law which we passed is "in plain contravention with the treaty with Great Britain," but presents no argument whatever sustaining that contention. It is a mere dogmatic, scholastic statement, contrary to the deliberate judgment of many of the greatest minds of the Republic and to the deliberate decision of this body by more than three-fourths majority. Had he not studied the treaty before he made his campaign speech? Was he not familiar with its "plain" terms then? Did he not then believe our action entirely consistent with our national honor? Surely so. A mere assertion to the contrary is not enough now; but he should present the reasons and the argument that has led him to change his mind and now assert that such exemption is contrary to the plain terms of the treaty.

This exemption contravenes no treaty obligations either in letter or in spirit, and therefore no question of national honor is involved. It is solely an economic one, and the interests of our own people are alone to be considered. Let me assert as positively as language will permit that those who favor this exemption are as jealous of the national honor as those who oppose it. Those who favor the repeal say that the national honor must be upheld. So do we. They confess the weakness of their position by urging the maintenance of the national honor, because no one would impair it, no matter what might be the consequences.

The Associated Chambers of Commerce of the Pacific Coast passed resolutions a short time ago with reference to this matter, and they set out our position in reference to our treaty obligations so clearly and succinctly that I desire to read the first resolution:

*Resolved by the Associated Chambers of Commerce of the Pacific Coast*, That we disclaim any intention or desire to avoid in the slightest degree any treaty obligation of the United States; that we claim for the people of the United States and for those of the Pacific coast as sensitive a regard for treaty obligations, or obligations of any other sort, as those held by the citizens of any other country, and particularly those of Great Britain, to whom we concede a high regard for all such obligations. Nevertheless, in a matter of such great importance as that under consideration, in which we feel that the interests of all the people of the Pacific coast are deeply involved, we can not concede to any foreign government the right to interpret a matter which we regard as being one entirely within the powers of the American Government, namely, that of prescribing the terms upon which American vessels may do business through an American-constructed canal with other American ports, in which business the vessels of no foreign country can or has engaged.

Again, the President says that, whatever may be our differences, the meaning of the Hay-Pauncefote treaty "is not debated outside the United States." He is mistaken. Eminent men and powerful publications in Great Britain have upheld our contention, and for 60 years Great Britain itself interpreted similar language exactly as we do in this case. It was then in her

interest, and was so interpreted. Her interest now lies in a different interpretation, and Great Britain has always been controlled, in her foreign policy especially, by the interests of her trade and her citizens. This construction also is sustained by a decision of the Supreme Court of the United States itself. Is the meaning of the treaty debated outside the United States? In the London Law Review of November, 1912, a prominent jurist concludes an article on this question as follows. I desire to say that this article may be found in the Appendix to the CONGRESSIONAL RECORD, volume 49, part 5, of the Sixty-second Congress, third session, at page 17. The article is by Edward S. Cox-Sinclair and was written after we had passed our legislation. It concludes as follows, after a very careful argument:

[From London Law Review, November, 1912.]

To sum up, it is reasonably arguable:
(a) That the United States can support its action—

That is, providing for exemption for the coastwise vessels—

on the precise words of the material articles of the treaty; that its case is strengthened by reference to the preamble and context; and that its case is difficult to challenge on ground of general justice;
(b) There is no international obligation to submit the construction of its legislative act to any process or arbitration; and
(c) That any aggrieved party has an appropriate and impartial and a competent tribunal in the Supreme Court of the United States.

There is also found in the same connection another article by a prominent English jurist, Mr. C. A. Hereshoff Bartlett, LL. B., and I desire to quote merely a few paragraphs from it. He says:

The passage of this act—

Referring to the legislation exempting American coastwise vessels from the payment of tolls—

and the affixing of his signature thereto by the President has raised such diversity of opinion, both at home and abroad, as to whether it is or is not in conflict with the Hay-Pauncefote treaty that it becomes proper to review this subject from an impartial and unprejudiced point of view, entirely aside from any question of nationality or politics.

So that, according to this writer, there seemed to be considerable debate with reference to this matter at home and abroad. As bearing upon our right to exempt our coastwise vessels from the payment of tolls, I will read at this point two or three short paragraphs from this legal writer. He says:

The Hay-Pauncefote treaty, in mentioning vessels of commerce of all nations, never contemplated such an eventuality as the United States becoming the owner of the land covered by the waters of the canal and exercising sole and sovereign power thereover, and consequently it can not be held by any just construction to apply to conditions and circumstances so completely beyond the intention and design of the treaty.

Again, the same writer says:

The treaty could never have been intended to prevent the Federal Government from arranging and regulating its domestic or coastwise commerce, and in the use and enjoyment of its own property as it saw fit.

"On terms of entire equality" was intended to prevent the United States discriminating in favor of one foreign nation against another foreign nation. The Federal Government was laying down its own rules, not for the regulation of its own ships of war and of commerce but for the ships of war and of commerce of the stranger beyond its ports, and it unhesitatingly declared that the canal that might be built under its auspices should be free and open to them on terms of entire equality. No advantage should be obtained by one foreign nation over another foreign nation; there should be no favoritism, no special benefit or privilege extended to one that should not be open alike to all foreign nations. This is what the provision means and nothing more. It would require the interpolation of terms not contained in the treaty itself to sustain any other construction.

Mr. President, it is not dishonorable to assert your rights, and it is not an argument against the exemption to assert that the Nation's honor must be upheld. It must be shown clearly that such exemption is contrary to some treaty. This is not and can not be done.

Why should we reverse ourselves? No reason is given save that others make a different contention. "We ought to reverse our action without raising the question of whether we were right or wrong" because other nations insist upon a different interpretation of our treaty. This is a surprising doctrine and would lead to most disastrous consequences. No self-respecting nation with any regard for its independence and sovereignty could follow such a doctrine and exist. It will place us at the mercy of the selfishness of every nation with which we may have a treaty.

Follow it in this case and what excuse can we offer for fortifying the Panama Canal if objection is made? None.

Follow it and on what ground can we prevent the warships of an enemy from passing through it? None.

Follow it and on what ground would we refuse to send our warships from the harbors at the entrance of the canal within 24 hours in the face of an overwhelming force of the enemy? None.

Follow it and what excuse can we give for refusing to arbitrate the question of admitting to our shores citizens of other countries, however undesirable to us? None.

Follow it and how can we refuse to submit to a court of arbitration the question of the naturalization of undesirable citizens from other countries? None.

We have passed treaties under which other nations can set up just such claims, and the doctrine of the President would inevitably compel us to accept their construction of such treaties. If we accept this doctrine now, nations will never agree with us when their interests are adverse. They will always insist on a construction favorable to their interests and citizens, and we will have to "do the large thing" and accept their contention.

Mr. President, there is more at issue now than the matter of tolls. A larger question faces us—the integrity, the vital interests, the sovereignty of the Nation are involved. The fact that we are big and powerful does not require us to be craven. A just and firm insistance on our rights will command respect and honor and insure peace. A weak and puerile submission to selfish demands will bring ridicule, contempt, and dishonor and invite aggression.

The message of the President is not only remarkable for its lack of facts, dearth of reason, and for the sublime assurance of the schoolmaster that the boys will do what he wants, but it is more remarkable in its conclusion. He says:

I ask this of you in support of the foreign policy of the administration. I shall not know how to deal with other matters of even greater delicacy and nearer consequence if you do not grant it to me in ungrudging measure.

The product of a master of English, these words mean something: "I ask this of you in support of the foreign policy of the administration." What does that mean? It is an appeal directed especially to Democrats. Can they resist the implied command, to be enforced, if need be, by the rewards and penalties of Federal patronage? It is not for them to "reason why"; it is for them to obey or politically die. I want to draw from these words a conclusion honorable to my country, but it is difficult to do so.

I again quote the President. He said:

I shall not know how to deal with other matters of even greater delicacy and nearer consequence if you do not grant it to me in ungrudging measure.

We are at peace with all the world. What serious troubles have we? What are the "other matters of even greater delicacy and nearer consequence" if not the Mexican situation? That this legislation is a part of the price that this Nation must pay to get the help of a foreign power in the adjustment of the unfortunate Mexican situation is a humiliating conclusion, but I see no escape from it. That it is a part of an understanding expressed or tacitly implied relating to Mexico is shown by the words of the message and by the circumstances surrounding its delivery.

It has been repeatedly announced that no message would be sent to Congress on the tolls question. A British subject was murdered in Mexico by rebel authorities whom Great Britain does not recognize. Our position prevents Great Britain from entering Mexico. The British minister has a long conference with the President, and immediately the newspapers say:

President Wilson announced to-night immediately following the conference with Sir Lionel Carden that he will go before Congress on Thursday (this conference was Wednesday evening) and deliver a message urging the repeal of the Panama Canal tolls exemption section. The coupling of the White House announcement on Panama tolls with the visit of Sir Lionel Carden is explained on good authority as the culmination of a series of negotiations between the Government and Great Britain for the preservation of the Monroe doctrine, threatened by the Mexican situation.

A hint is declared to have been taken from the historical fact that the Monroe doctrine was originally inspired by England. The President is said to realize that the Mexican tangle has brought about almost a parallel situation with that which existed when President Monroe announced his policy. As a result an agreement is said to have been reached with Great Britain under which the two countries will stand together against any European attempt to test out the Monroe doctrine in Mexico.

The President's quid pro quo for England's aid is the pledge of the repeal of the Panama Canal tolls act, the ratification of the general arbitration treaty upon which the Senate has recently acted favorably, and other considerations of interest to England.

It is reported that as one of the conditions Great Britain will seek reparation for its losses through Confederate bonds issued during the Civil War by a plan sanctioned by this Government, under which, if successfully applied, the burden of reparation will fall on the Southern States.

These suggestions were almost unbelievable, but what immediately followed proves that there was a basis for them. We were called together in the House of Representatives like rebellious schoolboys, and while the ambassadors from nations interested in our humiliation sat in the galleries about an applauding Secretary of State, we were told, as from the throne, that we must do this thing in support of the foreign policy of the administration or the President would "not know how to deal with other matters of even greater delicacy and nearer consequence, if you do not grant it to me in ungrudging measure."

With no information we are expected, in schoolboy fashion, to do as we are told and ask no questions.

Mr. President, what is the foreign policy that requires such humiliating, cowardly, and craven action on our part? What are the delicate matters that demand this price? What nation is to be appeased by our hasty and ungrudging submission? Why is it necessary for us to repeal a law of great domestic concern in order that some foreign unknown policy may be brought to a successful issue? Is noninterference in Mexico by foreign powers to be bought at this price? Have we become so inert, so weak, so supine, so servile, that the Monroe doctrine must be sustained and invigorated by the very powers against which it was invoked?

Are we so weak or so entangled in the meshes of our own diplomacy that the demands of England, based upon the selfish interests of the Canadian Pacific Railroad Co., must be granted, right or wrong? Have any nations besides England objected to the legislation it is proposed to repeal?

These are questions that must be answered to the satisfaction of the American people. This resolution should be passed at once and a response full and clear be forthcoming.

Mr. President, in connection with my remarks I desire, without taking the time to read it, to ask the privilege of printing the resolutions of the Valley Central Grange, No. 343, Patrons of Husbandry, of my State, which I think present the contention with reference to the Panama tolls matter as clearly and concisely as any communication I have received. I also desire to print a telegram which I have received from several prominent citizens of Spokane with reference to this matter.

The VICE PRESIDENT. In the absence of objection, permission is granted.

The matter referred to is as follows:

Whereas the East and West alike demand the freedom from tolls for our coastwise ships passing through the Panama Canal, because we have long suffered from excessive transportation charges of transcontinental railroads, and it is obvious, should American coastwise ships be compelled to pay tolls, the possibilities of a competing line of commerce will be hampered and we shall still be at the mercy of railroad corporations and will be compelled to pay in the future the present maximum transportation charges, which have worked untold hardships upon us in the past; and

Whereas the repeal from the statute books of the United States of the law exempting American coastwise ships from tolls is demanded by Canadian railroads, which are supported by American transcontinental lines, who endeavor to accomplish through diplomacy what they failed to obtain in Congress; and

Whereas the exemption from tolls of American ships engaged in coastwise trade having been indorsed at the polls two years ago by over 10,000,000 voters, a majority of the voting population of this Republic, is therefore the constitutionally expressed will of the American people; and

Whereas the Panama Canal is the achievement of the United States alone, being built entirely by American money, American effort and enterprise, it is therefore a domestic possession of the United States by virtue of property rights in the Canal Zone, fully established by purchase; and

Whereas the control of the canal is vital to the interests of the United States and involving the honor of the country since stipulation in treaty arrangements between this country and Panama, except matters in which a third nation is involved; and

Whereas it is inconceivable to the American people and highly incompatible to our honor and integrity as a nation to be called upon by pro-British pseudostatesmen to repeal a statute relating to our own domestic affairs at the behest of a foreign government: Therefore be it

*Resolved*, That Valley Central Grange, No. 343, Patrons of Husbandry, goes on record strenuously opposing the repeal of the statute granting American coastwise ships exemption from tolls in passing through the Panama Canal; and be it further

*Resolved*, That copies of this resolution be sent to our Senators and Representatives in Congress and to the Agricultural Grange News, Kent Journal and Advertiser for publication.

C. S. FOLLETT, W. M.
VICTOR GONNOSON, *Secretary*.

[Telegram.]

SPOKANE, WASH., *March 6, 1914*.

Hon. W. L. JONES,
*United States Senate, Washington, D. C.:*

We believe that conceding to England's contention on Panama Canal tolls would be a dangerous precedent, a pernicious interference with our own business, and treason to our own country.

W. D. SCOTT.
LLOYD GANDY.
GEO. W. SHAEFER.
E. H. ESHLEMAN.
H. S. CLELAND.
ZACK STEWART.
R. A. HUTCHINSON.

Mr. JONES. Mr. President, I can see no reason why this resolution should not be passed. It simply calls for any representations or communications which have come from foreign countries with reference to this matter. It seems to me that Congress ought to have these communications and ought to have this information before taking up this very important question. I hope the resolution will be passed.

Mr. SMITH of Arizona obtained the floor.

The VICE PRESIDENT. The question is on the resolution offered by the Senator from Washington. Is there objection to the present consideration of the resolution?

Mr. BRANDEGEE. I should like to have the resolution read. I was not in the Chamber when it was taken up.

The VICE PRESIDENT. The Secretary will read the resolution.

The Secretary again read the resolution.

Mr. SMITH of Georgia. I think the resolution ought to go to the Committee on Foreign Relations.

Mr. BRISTOW. It seems to me the resolution ought to be referred to the Committee on Interoceanic Canals. It relates to legislation that comes before that committee.

Mr. SMITH of Georgia. Mr. President, the resolution involves our relations with foreign countries and calls for the transmission of communications from them. Unquestionably, it seems to me, the Committee on Foreign Relations is the proper committee to consider such resolutions, and my motion is that it be referred to the Committee on Foreign Relations.

Mr. BRISTOW. Mr. President, let me inquire of the Senator from Georgia why not pass the resolution? Why should not the information be furnished the Senate?

Mr. SMITH of Georgia. I will reply to the Senator, Mr. President. I do not believe the Senate should pass upon resolutions of this character, involving our relations with foreign countries, involving investigations of this nature, without first permitting them to go to the Committee on Foreign Relations. I would rather have the benefit of their opinion. They are familiar with facts connected with our foreign relations with which many Senators are not familiar. I do not believe in acting hastily upon any such resolution. I do not believe in acting hastily upon any resolution calling for information, and especially where it pertains to foreign matters. I ask that the resolution be referred to the Committee on Foreign Relations for their report.

Mr. BRISTOW. Mr. President, if the Senator from Georgia will pardon me, this resolution simply inquires what nations have protested against the policy which Congress adopted of exempting American vessels in the coastwise trade from the payment of tolls——

Mr. SMITH of Arizona. Mr. President, I rise to a question of order.

The VICE PRESIDENT. The Senator from Arizona will state his point of order.

Mr. SMITH of Arizona. I understand I was recognized, and that this debate is proceeding entirely against my right to the floor at this time. As I understand, the matter has been disposed of on the mere suggestion of the Senator from Georgia.

Mr. CLARK of Wyoming. Oh, no.

Mr. JONES. The Senator from Georgia made a motion to refer the resolution to the Committee on Foreign Relations.

Mr. SMITH of Arizona. I did not understand that the Senator from Washington in taking the floor intended to do away with the notice given by me that I would this morning endeavor to call up Senate bill 4628. I did not understand that it was expected that debate would be precipitated upon the resolution.

Mr. JONES. The resolution came up under the routine morning business.

Mr. SMITH of Arizona. I understood the Senator from Washington was going to take 5 or 10 minutes to address the Senate, but I did not understand that a debate would be precipitated which would preclude me from taking the floor under the notice I have heretofore given in connection with a matter of some importance to me.

Mr. BRISTOW. Mr. President, I do not wish to interfere at all with the Senator from Arizona, and I therefore ask that the resolution go over without prejudice until to-morrow, as I desire to be heard upon the question of its reference to the Committee on Foreign Relations. I make the suggestion out of consideration for the notice given by the Senator from Arizona, as I do not desire in any way to interfere with his convenience.

The VICE PRESIDENT. Is there objection to the request of the Senator from Kansas that the resolution go over until to-morrow without prejudice?

Mr. SMITH of Georgia. I do not object, Mr. President.

The VICE PRESIDENT. In the absence of objection, the resolution will lie over without prejudice.

## PAYMENTS UNDER RECLAMATION PROJECTS.

Mr. SMITH of Arizona. Mr. President, pursuant to the notice given by me, I move that the Senate proceed to the consideration of the bill (S. 4628) extending the period of payment under reclamation projects, and for other purposes.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Arizona.

Mr. SMOOT. Mr. President, may I suggest to the Senator to request unanimous consent to take up the bill?

Mr. SMITH of Arizona. Such a request would force a roll call.

Mr. SMOOT. Not at all.

Mr. GALLINGER. The motion will not displace the unfinished business.

Mr. SMOOT. Is morning business concluded?

Mr. GALLINGER. Yes.

Mr. BRANDEGEE. Has morning business been closed, Mr. President?

The VICE PRESIDENT. It has been.

Mr. BRANDEGEE. Very well.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Arizona.

The motion was agreed to, and the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 4628) extending the period of payment under reclamation projects, and for other purposes, which had been reported from the Committee on Irrigation and Reclamation of Arid Land with amendments.

Mr. SMITH of Arizona. I ask that the bill may be read. I do not desire to detain the Senate at this time with any remarks on it.

The Secretary read the bill.

The first amendment of the Committee on Irrigation and Reclamation of Arid Lands was, in section 1, page 2, line 12, after the word "period," to insert:

*Provided further*, That entry may be made whenever water is available, and the initial payment be made when the charge per acre is established.

The amendment was agreed to.

The next amendment was, in section 2, page 2, line 19, after the word "charge," to insert "or the portion of the construction charge remaining unpaid," and on page 3, line 3, after the word "charge," to strike out "or the portion of the construction charge unpaid at the beginning of such installments," so as to make the section read:

SEC. 2. That any person whose land or entry has heretofore become subject to the terms and conditions of the reclamation law shall pay the construction charge, or the portion of the construction charge remaining unpaid, in 20 annual installments, the first of which shall become due and payable on December 1 of the year in which the public notice affecting this land is issued under this act, and subsequent installments on December 1 of each year thereafter. The first 4 of such installments shall each be 2 per cent, the next 2 installments shall each be 4 per cent, and the next 14 each 6 per cent of the total construction charge.

The amendment was agreed to.

The next amendment was, in section 3, line 17, after the word "fund," to insert "but no homestead entry shall be subject to contest because of such default," so as to read:

If any such applicant or entryman shall be one year in default in the payment of any installment of the construction charges and penalties, or any part thereof, his water-right application, and if he be a homestead entryman his entry also, shall be subject to cancellation, and all payments made by him forfeited to the reclamation fund, but no homestead entry shall be subject to contest because of such default.

The amendment was agreed to.

The next amendment was, in section 4, page 4, line 8, after the word "charges," to insert:

*Provided*, That the Secretary of the Interior, in his discretion, may agree that such increased construction charge shall be paid in additional annual installments, each of which shall be at least equal to the amount of the largest installment as fixed for the project by the public notice theretofore issued. And such additional installments of the increased construction charge, as so agreed upon, shall become due and payable on December 1 of each year subsequent to the year when the final installment of the construction charge under such public notice is due and payable: *Provided further*, That all such increased construction charges shall be subject to the same conditions, penalties, and suit or action as provided in section 3 of this act.

The amendment was agreed to.

The next amendment was, in section 5, page 4, line 23, before the word "construction," to strike out "annual," and in line 24, before the word "every," to strike out "charges" and insert "charge," so as to read:

SEC. 5. That in addition to the construction charge, every water-right applicant, entryman, or landowner under or upon a reclamation project shall also pay, whenever water service is available for the irrigation of his land, an operation and maintenance charge based upon the total cost of operation and maintenance of the project, or each separate unit thereof, and such charge shall be made for each acre-foot of water delivered; but each acre of irrigable land, whether irrigated or not, shall be charged with a minimum maintenance and operation charge based upon the charge for delivery of not less than one acre-foot of water.

The amendment was agreed to.

The next amendment was, in section 8, page 7, line 16, after the words "cultivation of," to strike out "one-half" and insert "one-fourth," and after the words "cultivation of," at the end of line 19, to strike out "three-fourths" and insert "one-half," so as to read:

That the Secretary of the Interior is hereby authorized to make rules and regulations governing the irrigation of the lands within any project, and may require the reclamation for agricultural purposes and the cultivation of one-fourth the irrigable area under each water-right application or entry within three full irrigation seasons after the filing of water-right application or entry, and the reclamation for agricultural purposes and the cultivation of one-half the irrigable area within five full irrigation seasons after the filing of the water-right application or entry, and shall provide for continued compliance with such requirements.

The amendment was agreed to.

Mr. SMITH of Arizona. Mr. President, I do not wish to detain the Senate or to take its time further than to say that the purpose of the bill is merely to extend the time for payment of the charges on these reclamation projects that have gone far above any of the original proposals as to the amount that would be charged, coming sometimes to three or four times as much as those making the original investigation considered necessary. The bill extends the time and provides that all future reclamation projects shall come within the first provision, putting them all on an absolutely equal footing. The committee has not been able to see how any trouble whatever would be caused to the Government or to the Reclamation Service by the proposed change.

There is another suggestion I wish to make. For a good many months the chairman of the Senate Committee on Irrigation and Reclamation of Arid Lands, the chairman of the House committee, the Secretary of the Interior, and the Reclamation Service have had this bill under the most careful scrutiny and consideration. After all these labors we have agreed upon the present measure. I trust no amendment will be offered to it, for I am free to say there is not a line or a suggestion in it that has not had the most careful scrutiny of the committees of the two Houses and the other persons already suggested.

Mr. JONES. Mr. President, the statement the Senator has just made really makes it unnecessary for me to ask him a question that I intended to ask.

I know the statement the Senator has made, with reference to the careful consideration of this bill, is in accordance with the facts. There was one amendment in which some of the people under some irrigation projects in my State, and I think in other States, were very much interested, and that is with reference to modifying to some extent the residence requirements of the reclamation law. I think that matter was given very careful consideration by the committee, and they considered it unwise to encumber this legislation with a provision of that kind.

Mr. SMITH of Arizona. Having only one purpose, and knowing that if at any time these conditions worked a hardship, with the present attitude of the department itself and of Congress we would have no difficulty in relieving that hardship, our purpose in this bill was simply to extend the time of these payments and to secure payment at that time.

Mr. JONES. In accordance with the suggestion of the Senator from Arizona, because I am as much interested in the passage of the bill as he is, I also shall not embarrass the bill by proposing that amendment at this time.

Mr. SMITH of Arizona. That is very gracious on the part of the Senator from Washington, and I thank him for it.

Mr. STERLING. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to add as a new section at the end of the bill the following:

SEC. 15. That the district courts of the United States in the several districts where the lands included within any reclamation project are situated shall have jurisdiction of all suits brought by the United States or the Secretary of the Interior for the enforcement of the provisions of this act, and jurisdiction of all suits now pending or which may be hereafter instituted by any legally organized water users' association or irrigation district in behalf of the water users and settlers thereon for the enforcement of the provisions of this act and of the provisions of the reclamation law as referred to and defined in section 1 of this act: *Provided*, That any noncompliance with or violation of the provisions of this act or of said reclamation law shall be determined and adjudged by such court in a suit brought for that purpose, under the direction of the Secretary of the Interior, before any homestead entry within such reclamation project shall be declared canceled and before any payments made thereon shall be declared forfeited.

Mr. STERLING. Mr. President, I appreciate what the Senator from Arizona [Mr. SMITH] has said in regard to the care exhibited in the preparation and consideration of this bill. I think I can anticipate, and appreciate, too, any objections that may be made by the Senator from Arizona to the proposed amendment. Yet, Mr. President, neither in the original reclamation act nor in any act amendatory of that act is any provision made for the jurisdiction of the United States courts in suits or actions growing out of the reclamation law or the enforce-

ment of the provisions of that law, and there is some question as to whether or not such courts have jurisdiction.

I think in cases of this kind, arising under the reclamation act and other laws of the United States amendatory thereof, the United States district courts should have jurisdiction. This amendment so provides, and confers jurisdiction upon such courts in all cases instituted by the Government itself, or by the Secretary of the Interior in behalf of the Government, and in all cases brought by the water-users' associations, with this proviso at the end of the amendment:

That any noncompliance with or violation of the provisions of this act or of said reclamation law shall be determined and adjudged by such court in a suit brought for that purpose, under the direction of the Secretary of the Interior, before any homestead entry within such reclamation project shall be declared canceled and before any payments made thereon shall be declared forfeited.

I know of no reason why in this class of cases, as well as in other cases, there should not be a determination by a court of competent jurisdiction as to whether there has been any act or omission upon which a declaration of forfeiture may be based. I recall that in the case of the currency bill we were very careful to have a provision that in the event a national bank did not within a period of one year manifest its intention of coming into the system its charter should be forfeited, but only after a determination by a court of competent jurisdiction that there had been a violation of or a noncompliance with the act.

I know it has been urged that since national banks put their funds into the Federal reserve banks and are at the foundation of the system they should, therefore, have the right to go into court, or that there should be first a determination by a court that there had been the commission of an act or some failure or omission which would warrant forfeiture of the charter.

Mr. President, I think it will be found that the homestead settlers in reclamation projects have for the most part invested their all in the improvements made upon the lands which they have been permitted to take in those projects. I do not believe that on a mere declaration of the Secretary of the Interior or any other administrative officer such a settler's entry should be canceled and that any or all payments made should be forfeited. He may have rights and equities there which can be properly determined only in a court of competent jurisdiction. It should not be left to the Secretary of the Interior to say absolutely and without question, "This entry shall be canceled, upon which you have expended hundreds, perhaps thousands, of dollars, in building a home and in other improvements," or, "Any payment you have made shall now be declared forfeited, simply because you have defaulted in the payment of one or two installments, and that without any judicial inquiry or investigation as to what you have done or omitted to do and without regard to conditions."

I think this amendment should be incorporated in the bill.

Mr. SUTHERLAND. Mr. President, I quite agree with what the Senator from South Dakota has said, and I am in favor of his amendment; but I wish to suggest to him a change in the phraseology of the first part.

The section begins:

That the district courts of the United States in the several districts where the lands included within any reclamation project are situated—

And so forth.

I think, expressed in that way, it is likely to result in some confusion. I suggest to the Senator that it would be better if the provision should read:

That the district court of the United States for the district where the lands or some portions of the lands included within any reclamation project are situated.

That would point out the particular district which should have jurisdiction in the given case.

Mr. STERLING. Mr. President, I think the point made by the Senator from Utah a good one, and I will accept the amendment.

The VICE PRESIDENT. The amendment to the amendment is accepted.

Mr. SMITH of Arizona. Mr. President, I trust the amendment will not be agreed to. This very question itself was considered time and time again. By adopting the amendment we would intrude into this bill a condition that absolutely does away with the principle on which it is constructed.

The bill now follows, and follows intentionally, in that particular the exact language of the original irrigation act. If we put on this bill the amendment suggested, any one gentleman who is strong enough to get up a dispute with a water-users' association can take and hold land that he never intends to use, but intends to keep in a monopolistic form until the unearned increment may possibly make him rich. He goes into court and puts up nothing; and after his dummies have held the land for two or three or four years under one of the provisions of this bill he comes in and buys from them at some particular price or they abandon the case.

The matter is always left in this bill, as it was not left in the other, in the discretion of the Secretary of the Interior. This matter of taking the case to court is a thing that naturally appeals to all of us; but it is changing a bill the purpose of which is to do one thing only, and that is to extend the time. Now, it is proposed to ingraft on it new legislation that affects the whole irrigation system from the day it started up to this hour.

I sincerely hope the Senator from South Dakota will not press his amendment, and that the bill may pass in its present form.

Mr. SUTHERLAND. Mr. President, I do not quite understand what particular provision of this amendment the Senator from Arizona objects to.

Mr. SMITH of Arizona. I object to the provision for going into the Federal court for the purpose of suing on questions that can be and have been already settled whenever they arose.

Mr. SUTHERLAND. Let us see. That is rather a broad statement.

Mr. SMITH of Arizona. I intended it to be broad.

Mr. SUTHERLAND. The provision of the amendment is:

The district court of the United States for the district where the lands or some portion of the lands included within any reclamation project are situated shall have jurisdiction of all suits brought by the United States or the Secretary of the Interior for the enforcement of the provisions of this act—

Certainly the Senator would not object to that.

Mr. SMITH of Arizona. Not so much to that part. Go on with it.

Mr. SUTHERLAND (reading):

and jurisdiction of all suits now pending or which may be hereafter instituted by any legally organized water users' association or irrigation district, in behalf of the water users and settlers thereon, for the enforcement of the provisions of this act and of the provisions of the reclamation law as referred to and defined in section 1 of this act.

That is the second branch of the provision. It does not attempt to confer any right to maintain a suit. It simply gives jurisdiction to the particular court.

Mr. SMITH of Arizona. Then why not just say that?

Mr. SUTHERLAND. If the Senator will permit me, it simply gives jurisdiction to a particular court over a class of cases with reference to which, of course, there must be a right of action. It does not confer it. Am I not correct about that?

I ask that question of the Senator from South Dakota. This amendment does not attempt to give a right of action where none exists?

Mr. STERLING. Certainly not.

Mr. SUTHERLAND. It simply gives jurisdiction to a particular court over a class of cases in which it is assumed by the amendment a right of action now exists.

Mr. SMITH of Arizona. I know; but the Senator suggests that the suit has already been brought. We do not know that it has, and I do not know what question of jurisdiction may be involved in it. Be that as it may, however, I do not object to conferring the jurisdiction, if we can confer it in these particular cases, on the Federal court to try cases arising under this act in just that many words.

Mr. SUTHERLAND. That is all this amendment does.

Mr. SMITH of Arizona. Then let us say it in those words, and I shall have no objection to it.

Mr. SUTHERLAND. That is what the amendment does say.

Mr. SMITH of Arizona. It takes a long time to say it.

Mr. SUTHERLAND. No; it says it, in my judgment, rather briefly. It simply provides that the jurisdiction—describing it—shall be in the court over suits brought by the United States or the Secretary of the Interior for the enforcement of the provisions of the act; and, in addition to that, jurisdiction of all suits now pending or which may be hereafter instituted by a water-users' association, and so on, "for the enforcement of the provisions of this act and of the provisions of the reclamation law." It does not attempt to create a right of action in the water-users' associations, but assuming a right of action to exist in certain cases under the law it confers jurisdiction over them upon these courts.

Mr. SMITH of Arizona. And of all questions arising under this act.

Mr. SUTHERLAND. Yes.

Mr. SMITH of Arizona. "In all suits and actions in law or in equity authority is hereby conferred on the Federal court within that district." I have no objection to that.

Mr. SUTHERLAND. It does not say that the right of action shall exist in any particular at all.

Mr. SMITH of Arizona. I have not the amendment before me.

Mr. SUTHERLAND. The proviso is as follows:

That any noncompliance with or violation of the provisions of this act or of said reclamation law shall be determined and adjudged by such court in a suit brought for that purpose, under the direction of the Secretary of the Interior, before any homestead entry within such reclamation project shall be declared canceled and before any payments made thereon shall be declared forfeited.

If I understand that, it simply reverses the procedure which would obtain now, namely, under the law as it exists now the Secretary would declare the forfeiture, whereupon the citizen against whom he would declare it would have a right to invoke the jurisdiction of the court to determine the question. It simply requires that the Secretary of the Interior shall bring the action in the first instance before the forfeiture can be declared.

Mr. SMITH of Arizona. There is a right created there.

Mr. SUTHERLAND. Yes; there is a right created.

Mr. SMITH of Arizona. "Any noncompliance with or violation of the provisions of this act." That means that anybody who can make a proper allegation can go into court and bring suit for noncompliance with this act. That is kept out of the court in most of these cases.

Mr. SUTHERLAND. As I understand the amendment it simply states that instead of the Secretary of the Interior being permitted to declare a forfeiture in the first instance the Secretary of the Interior shall himself invoke the jurisdiction of the court.

Mr. STERLING. I will say to the Senator that is the whole and only purpose of this proviso.

Mr. SMITH of Arizona. The reason the Senator gives is the very objection I have to the amendment. It opens the question of the whole status of the present Reclamation Service under the present law and under this proposed statute. These are not conditions where an honest man is making an effort to establish a home; it is against those who are attempting to get into these enterprises and monopolize the lands and do nothing with them except to wait for an increase of value. It is a common practice; there are many cases in my own State. It is a very ordinary case for persons to hold as much as four or five thousand acres. This is to prevent the bringing of a suit when they attempt to say you shall water this land or the water shall be carried from it to other lands. With that standing there it is a menace to the very enterprise itself.

Mr. CLARK of Wyoming. Will the Senator from Arizona yield to me for a moment?

Mr. SMITH of Arizona. Yes.

Mr. CLARK of Wyoming. Under what circumstances or conditions has a party secured even the shadow of a right to the amount of lands which the Senator has mentioned, four or five thousand acres? My understanding of the irrigation law is that it in substance makes the same limitation that the homestead law does, except that it reduces the amount of land which can be held under the law by a single individual. In other words, instead of allowing every individual to have 160 acres the project is divided into units, which may be 40 acres or 80 acres or 160 acres, depending upon the necessities of the particular project and plan. I do not understand that any man can enter any larger amount of that land than the reclamation law provides for.

Mr. SMITH of Arizona. It is very easy to explain to the Senator and his question is very natural.

Mr. GALLINGER. Before the Senator proceeds, I will suggest that in a recent debate I raised that very question, and I was assured by some Senator from one of the States where irrigation is being practiced that the lands are in very small tracts, 40 or 60 or 80 acres, and I expressed gratification that that was the fact. I was quite astounded at the suggestion which the Senator made that a man might own three or four thousand acres.

Mr. SMITH of Arizona. The very bill that I am now trying to pass in this body provides absolutely the condition of which the Senator speaks as to all future projects. The earlier projects had already men within them with patented lands, homesteads. Some men had bought quite a number of homesteads and owned farms of seven or eight hundred acres. One man on the far side of the river had a very large holding of patented land. Those lands are held by patents that the Government can not affect at all except to require, as this bill requires, that they shall put water on it or shall dispose of it or else they do not get water. The object is to divide these tracts up into small homesteads of 50 or probably 160 acres. Those have nearly all been subdivided when they find one man can not work 160 acres.

Mr. McCUMBER. I wish to ask the Senator if the original reclamation law did not limit the amount of the holding, even under private ownership, of any man to not exceeding 160 acres?

Mr. SMITH of Arizona. One hundred and sixty acres.

Mr. McCUMBER. That is my understanding.

Mr. SMITH of Arizona. But it applied to all projects thereafter.

Mr. CLARK of Wyoming. My recollection is that the irrigation law was passed solely for the purpose of irrigating land that had not been theretofore in private ownership. As a matter of fact the only constitutional way in which that law could be passed was in the matter of the Government's own land. Gradually there grew up, as there grows up in every bureau of the Government, an authority that never was conferred by law, so that now we have many projects under irrigation where the main purpose of the expenditure of public money was to irrigate private land. Of course we can not compel a man to irrigate his private farm if it comes under this irrigation project with the water from the project, neither can we take away the land that he holds by a good title within that project without due process of law.

Mr. McCUMBER. I think the Senator is in error in his conclusion that the original law did not contemplate taking in some tracts that were in private ownership that were in the water district. I think the original law did provide that they might come in upon the same conditions, because for the tracts that were irrigated they would in many instances have to run a ditch through private land; and there was a provision that the owner of the private land might also come under the project and have his land watered upon the same terms.

Mr. CLARK of Wyoming. Perhaps the Senator is right. I was simply stating my recollection. Certainly a constitutional law never could have been passed with that purpose. It might have been incidental to it, but in no other way. Of course, in the case the Senator mentions a person had land originally, to which he held the title, but there is no way I can see, by this law or any other, by which we can divest that man of his title in the land which he now has.

Mr. SUTHERLAND. Mr. President——

Mr. SMITH of Arizona. If the Senator will pardon me, we are drifting far afield.

Mr. SUTHERLAND. Before we leave this subject I should like to ask the Senator from Wyoming a question in reference to what he has said. The Senator may be quite right in saying that we could not legally provide for the irrigation of private lands by the expenditure of the funds of the General Government, but I call the Senator's attention to the fact that after the original reclamation act was passed Congress adopted an amendment to it which brought Texas under the provisions of the law, and there never have been any public lands in Texas; they are all State or private lands.

Mr. CLARK of Wyoming. I am well aware of that and of many other laws we have passed affecting the irrigation proposition that were never contemplated or thought of; and if they had been contemplated and thought of, and stated on the floor of the Senate or House, the original act never could have been passed.

Mr. SUTHERLAND. I called the Senator's attention to that for the purpose of indicating that Congress intended that private land should be brought under the operation of the law. Otherwise it would not have made its terms applicable to the State of Texas.

Mr. CLARK of Wyoming. Not when the law was originally passed, I think the Senator will find.

Mr. SUTHERLAND. I have said nothing about the original purpose of the law, but only spoke of the amendment.

Mr. CLARK of Wyoming. That is what I am talking about.

Mr. McCUMBER. Mr. President, I wish to ask the Senator from South Dakota [Mr. STERLING] a question. I have not read over the bill very carefully, but I have read over his amendment. Let me put to the Senator an ordinary case. Suppose that the Senator's amendment should pass, and the Secretary of the Interior should institute an action and it should be found by the court that the party against whom the action was instituted had forfeited his rights, under the amendment would there be anything that would allow the court to relieve him from that forfeiture? I think the court should be given the same right that is always given courts to relieve a party from a forfeiture. Suppose the entryman comes in and says, "Yes, I have technically forfeited my right, but I am ready now to pay up and be reinstated or to perform the conditions that are required of me, if the court holds that I have been in default," it sems to me there ought to be a provision in the amendment that would allow the court itself to relieve from forfeiture.

Mr. STERLING. Mr. President, I will say to the Senator from North Dakota that I had not contemplated exactly the con-

ditions that he has supposed, but I had in mind cases where it would be unjust and inequitable to declare a forfeiture where in equity there would be a defense. I will say that in drawing this proviso I was guided to some extent by the provision in the currency act, which is as follows:

Any noncompliance with or violation of this act shall, however, be determined and adjudged by any court of the United States of competent jurisdiction in a suit brought for that purpose in the district or territory in which such bank is located, under direction of the Federal Reserve Board, by the Comptroller of the Currency in his own name before the association shall be declared dissolved.

Mr. SUTHERLAND. Mr. President, it seems to me the Senator's amendment does not interfere in any way whatever with the equitable power of the court to provide in a decree that an entryman shall have a certain number of days within which to make deferred payments before the prior payments shall be forfeited and his entry canceled, because the language of the proviso is entirely in the negative. It provides:

That any noncompliance with or violation of the provisions of this act or of said reclamation law shall be determined and adjudged by such court in a suit brought for that purpose, under the direction of the Secretary of the Interior, before any homestead entry within such reclamation project shall be declared canceled and before any payments made thereon shall be declared forfeited.

In other words, as a prerequisite to declaring the homestead entry canceled or the payments forfeited, that matter shall be determined by the court. It is a necessary prerequisite to that action. But that does not interfere with the ordinary equitable power of the court to attach the usual terms.

Mr. SMITH of Arizona. Is this the object of the Senator: If a man holds two years and under the ruling, under the just obligation of the Secretary of the Interior under the bill, he can give him four more or six more, and then, at the end of the six years, he can bring a suit to ascertain whether the land shall be declared forfeited?

Mr. STERLING. That is not quite the idea.

Mr. SMITH of Arizona. That is what it will accomplish by the statement of the Senator here.

Mr. STERLING. In considering the question as to whether a man's entry should be declared canceled or any payment that he has made shall be declared forfeited, there may be a good many other questions to consider than the mere fact that he has not paid. Questions of engineering may arise and questions relating to the construction of contracts. The question as to whether the Government has done its part or not arises in this class of cases as it does not in any other class of public-land entries. The question, then, that will appeal to the court is whether, under all the facts and circumstances, there has been a forfeiture of the settler's rights.

Mr. McCUMBER. I want to reply for a moment to the suggestion made by the Senator from Utah [Mr. SUTHERLAND]. I think the Senator is in error in his construction of this proposed law. If the Senator will turn to page 3 of the bill, he will find this in the middle of the section:

If any such applicant or entryman shall be one year in default in the payment of any installment of the construction charges and penalties, or any part thereof, his water-right application, and if he be a homestead entryman his entry also, shall be subject to cancellation, and all payments made by him forfeited to the reclamation fund.

There is a direct provision that his right shall be forfeited. The question that will be submitted to the court will be simply whether or not the entryman's negligence has forfeited his right. Turning to the provision at the bottom of the amendment we find the following:

*Provided*, That any noncompliance with or violation of the provisions of this act or of said reclamation law shall be determined and adjudged by such court in a suit brought for that purpose, under the direction of the Secretary of the Interior, before any homestead entry within such reclamation project shall be declared canceled and before any payments made thereon shall be declared forfeited.

In other words, before it can be declared forfeited the court will have to determine the question whether there had been a forfeiture. I am very doubtful if, under that, the court could exercise the ordinary equity powers of a court to relieve from forfeiture upon proper conditions that would be consistent with the law. That could be accomplished by adding at the end of the amendment these words:

And the court may in its decree relieve the entryman from any forfeiture upon such terms as the court may impose, not in conflict with the purposes of this act.

Mr. SMITH of Arizona. If the Senator will permit me, that would be very objectionable. Under such a provision we would never get any enterprise at work and never get a dollar paid into it. I suggest to the Senator whether this will meet the case: "That all cases arising in law or equity under this act shall be triable in the United States district court of the State where the land is situated." Now, what more do you want? I will agree to that amendment now.

Mr. STERLING. Down to the proviso my amendment covers exactly the same thing, and it is stated about as tersely as it can be stated.

Mr. SMITH of Arizona. Will the Senator strike out the proviso and let the balance of the amendment stand?

Mr. STERLING. No, Mr. President; I am not prepared to strike out the proviso.

Mr. SMITH of Arizona. Very well. I am extremely anxious to get through with the bill before the morning hour shall close. I should like to have a vote on the amendment.

Mr. STERLING. I wish simply to say that I will accept the suggestion made by the Senator from North Dakota [Mr. McCUMBER] as an addition to be made to the proviso in order that it may be perfectly clear.

The VICE PRESIDENT. The Senator from South Dakota accepts the amendment proposed by the Senator from North Dakota. The question, then, is on the amendment proposed by the Senator from South Dakota [Mr. STERLING] as modified.

Mr. STERLING. I wish further to say, if it is not already understood, that I have also accepted the amendment suggested by the Senator from Utah [Mr. SUTHERLAND].

Mr. SMITH of Arizona. Has the question been put on the amendment proposed by the Senator from South Dakota?

The VICE PRESIDENT. The Senator from South Dakota [Mr. STERLING] has accepted the amendment proposed by the Senator from North Dakota [Mr. McCUMBER]. So the question now is on the amendment proposed by the Senator from South Dakota as modified.

Mr. SMITH of Arizona. My hearing is extremely bad this morning, and I did not catch the amendment to the amendment proposed by the Senator from North Dakota.

Mr. McCUMBER. I have sent the amendment to the Secretary's desk, and I ask that it be read.

The VICE PRESIDENT. The Secretary will read the amendment to the amendment.

The SECRETARY. At the end of the amendment proposed by Mr. STERLING it is proposed to add the following words:

And the court may in its decree relieve the entryman from any forfeiture, upon such terms as the court may impose not in conflict with the purpose of this act.

Mr. SMITH of Arizona. Mr. President, I am not going to discuss the question at any length, but I will say to the Senator that it would be almost as well not to pass this bill at all as to pass it with all these proposed limitations. They will simply, in my judgment, destroy the chance of the money being returned to the Treasury. We have been thrashing this matter over for months and months, and when the bill is about to pass Senators suggest amendments to cover individual cases. If Senators will bear with me for a moment, I want to appeal to them—this being a bill for one particular purpose and framed in the language of the old act, only it is more liberal than the old act—not to jeopardize it by seeking to attach amendments designed to give the courts jurisdiction of some particular case under which you might put in the hands of the man who does not intend to carry out the law, who does not intend to make a home, and whose only purpose is fraud, a weapon by which he could very easily accomplish his object. The Senator from South Dakota does not intend that, but that is the effect of the amendment, for under the right to sue, as proposed by his amendment, a man could refuse to pay a cent for four years, and then turn the claim over to somebody else at a high price.

Mr. McCUMBER. Mr. President, I should like to ask the Senator from Arizona what kind of a judge would he be who would give a decree preventing payment within a reasonable time? The Secretary of the Interior, under this proposed amendment, may bring suit or order suit to be brought just as quickly as the man on the outside. I know that the Senator wants to deal fairly in the matter. Let me present this case: Suppose an entryman, because of the failure of his crops or otherwise, is more than a year behind in his payments—most of them are several years behind now—although he has done the best he could, under the provisions of this bill his entry is subject to forfeiture, and everything he has paid in will belong to the water users' association.

Mr. SMITH of Arizona. It is subject to forfeiture.

Mr. McCUMBER. Under the proposed statute his failure to comply with the law would subject his entry to, and the payments he had made to, forfeiture for the benefit of the water users' association. If the court finds it to be a fact that he has failed, would the Senator from Arizona, in his desire to get money into the Treasury or into the water users' association, prevent the court from saying to that man, "If you will pay the balance within 30 days I will relieve you from the forfeiture"?

Mr. SMITH of Arizona. Would the Secretary of the Interior insist upon a forfeiture any quicker than you or I would?

Mr. McCUMBER. The Secretary of the Interior has no right under this bill to make any extension whatever of the time.

Mr. SMITH of Arizona. He has absolutely under this bill. It is left entirely to him. Then, if I may ask the Senator a question, would he allow the conditions to exist such as I have already suggested? This bill is more liberal in every respect than was the original law, as to which no complaint has been made, except as to the shortness of time in which the entrymen must repay the money.

Mr. McCUMBER. I will answer the Senator that the experience of the American people who have had to deal with public lands has been that almost universally they would prefer to try these cases before a court; and the purpose of the amendment of the Senator from South Dakota is that a court may determine the question after the party has had a hearing. I am assuming that this amendment will be adopted. If it be adopted, then the Senator must agree with me that authority ought to be given to the court to release from the forfeiture upon such terms as are not in conflict with the purpose of the act.

Mr. WORKS. Mr. President, this matter was very carefully considered by the committee of which I am a member. It is a very difficult problem to determine just what ought to be done in these cases. The people who have taken up these lands in a great many instances have not been fairly dealt with by the Government. Contracts have been made with them upon the basis of $30 an acre, for example, and before they have concluded the project the price has become $40 an acre, and even more. In some cases the price has run up as high as $60 and $75, and I think in one case it has transpired that actual cost to the entryman will be $100 an acre.

That is one side of the proposition; but the other side is that it is an exceedingly difficult matter for the Government to collect the money that is actually and justly due from the people who take up these lands. My own judgment about it is that we should be extremely liberal in the way of time; give them every opportunity to make these payments and then insist upon them being made. The Government should be protected as well as the entryman, and the money that comes into the Treasury will be carried on to other projects for the benefit of other people. It is a very well-known fact that there has been very little of the money that has been expended by the Government repaid by the people who have taken up these lands. The intention of the committee was to give ample time within which to make the payments, and then make it compulsory upon the entrymen that they should make the payments, which will be very small in amount, extending over 20 years. It seems to me that the bill is extremely liberal toward them. It was intended to be so, I know, by the committee.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from South Dakota [Mr. STERLING] as modified. [Putting the question.]

Mr. STERLING. I ask for a division.

Mr. SMITH of Arizona. I do not want a division. Let it go.

The VICE PRESIDENT. The noes seem to have it.

Mr. STERLING. I call for a division.

The question being put, there were on a division—ayes 10, noes 13; no quorum voting.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Hollis | Nelson | Smith, Ga. |
| Borah | Johnson | Norris | Smith, Md. |
| Bradley | Jones | Overman | Smith, S. C. |
| Brady | Kenyon | Page | Smoot |
| Brandegee | La Follette | Perkins | Sterling |
| Bristow | Lane | Pittman | Sutherland |
| Burton | Lea, Tenn. | Ransdell | Swanson |
| Catron | Lee, Md. | Reed | Thomas |
| Chilton | Lippitt | Saulsbury | Thornton |
| Clapp | Lodge | Shafroth | Warren |
| Clark, Wyo. | McCumber | Sheppard | West |
| Cummins | Martin, Va. | Sherman | Works |
| du Pont | Martine, N. J. | Shields | |
| Gallinger | Myers | Smith, Ariz. | |

Mr. REED. I wish to announce the necessary absence of my colleague [Mr. STONE], who is still detained at his home by illness. I will let this announcement stand for the day.

Mr. ASHURST. I wish to announce that the Senator from Arkansas [Mr. ROBINSON] is unavoidably detained from the Chamber on important public business.

Mr. OVERMAN. I wish to announce that my colleague [Mr. SIMMONS] is absent on account of sickness.

The VICE PRESIDENT. Fifty-four Senators have answered to the roll call. There is a quorum present. The question is on the amendment proposed by the Senator from South Dakota as modified.

Mr. STERLING. I ask for the yeas and nays on the amendment.

The yeas and nays were not ordered.

The amendment was rejected.

Mr. GALLINGER. Mr. President, as a friend to the reclamation projects I want to ask the Senator from Arizona two or three questions, which will take but a moment. I have not had time to study this bill, but, as I understand, it extends the time of payment by settlers on irrigation projects from 10 to 20 years.

Mr. SMITH of Arizona. Yes, sir.

Mr. GALLINGER. The original act provided that there should be a period of 10 years, the payments to be made year by year without interest. Am I correct?

Mr. SMITH of Arizona. That was the provision in the original act.

Mr. GALLINGER. This bill extends the time on the same terms?

Mr. SMITH of Arizona. Upon the same terms, except that the payments are graduated differently. The payment required is a little less the first year and grows more and more as more land is put under cultivation.

Mr. GALLINGER. I intended to ask the Senator another question, but that was answered by some Senator on this side a little while ago, when he said that very little of this money had been paid back to the Government up to the present time.

Mr. SMITH of Arizona. Very little has been paid back, because very little water has been turned on the land and very few of these projects have as yet been completed. That is the reason why more money has not been paid back to the Government, and explains why the extension provided for in the pending bill is necessary. If those who have taken up homesteads under the original reclamation act were required to make payment according to the provision of that act, it would break every one of them who is trying to acquire property.

Mr. GALLINGER. The Senator answers the question to my satisfaction, and I want to ask the Senator, in his judgment, whether or not the plan is working satisfactorily?

Mr. SMITH of Arizona. It will work satisfactorily, in my judgment, from now on; but it has not worked satisfactorily in the past, because, as the Secretary of the Interior stated in his report, both the people and the Congress were too hopeful as to what would be accomplished. Many unforeseen difficulties, engineering and otherwise, were encountered, involving a vast expense, before the farmer could get the lands ready for the water, and then when he could get the water, the expense absorbed everything that he had in the world.

Mr. GALLINGER. I find on my desk a copy of Senate bill 4934, introduced by the junior Senator from Texas [Mr. SHEPPARD], which proposes that we shall appropriate $250,000 to enable the Secretary of Agriculture to investigate the feasibility and economy of irrigation by the reservoir system, and so forth. It occurs to me, if the plan is working as well as its friends said and hoped it would, and as I have supposed it was working, that it is rather strange that we should now be asked to pass a bill appropriating a quarter of a million dollars to make further investigations as to the matter.

Mr. SMITH of Arizona. Mr. President, while I do not wish to prejudge the object sought in the bill of the Senator from Texas, because I know nothing whatever of the facts, I imagine that that bill embodies a particular pet scheme of some one and involves the international relations between Texas and Mexico.

Mr. GALLINGER. As I have said, I am a friend, as the Senator from Arizona knows, of the irrigation plan, and I have nothing further to say about it. I hope the Senator's bill will pass.

Mr. McCUMBER. Mr. President, I notice on page 3 the bill provides:

> SEC. 3. That if any water-right applicant or entryman shall fail to pay any installment of his construction charges when due there shall be added to the amount unpaid a penalty of 1 per cent thereof, and there shall be added a like penalty of 1 per cent of the amount unpaid on the first day of each month thereafter so long as such default shall continue.

In other words, if a farmer gets behind in his payments, he is to be charged 13 per cent for not being able to fulfill his contract. The Government can get all the money it desires for 3 per cent; but if the farmer, by reason of the failure of crops or otherwise, does not keep up his end, he is to be charged a penalty of what amounts to a little over 13 per cent. First, there is a 1 per cent penalty, and then there is added 1 per cent a month as long as the default continues. Does the Sen-

ator think that the necessities of the occasion demand such a heavy penalty as that?

Mr. SMITH of Arizona. That shocked me, as it did all the balance of the members of the committees of both Houses. They worked on it for about three months, however, and concluded that those hardships were not half so apt to occur as that there would be those who would intentionally avoid it. No man would permit his neighbor's property to go in default for lack of the payment of 1 per cent per month on $3. One per cent on $3 will be his first charge; and it keeps a percentage of that kind on so small a sum merely as a penalty for not doing it.

As I say, there is not a single man in the West worthy to live there who will see a neighbor going in default because his family was sick and he could not do the work or because he himself was sick and got behind. He would know something about his neighbor in such a case and would help him out. This is simply intended as a penalty, to force those to come in who would not come in otherwise.

Mr. McCUMBER. Oh, I understand that. It is just exactly the same as some of our State tax laws, which provide a penalty of 1 per cent a month. It is not done as a matter of punishment. They may accomplish something by compelling a man to pay it in time. The Senator is mistaken, however, about its being $3. The language is:

That if any water-right applicant or entryman shall fail to pay any installment of his construction charges when due—

He shall pay this amount. Now, the installment may amount to a great deal more than $3 per acre. If he should have 100 acres, it would be $300; and that would be quite an important sum.

Mr. SMITH of Arizona. The Senator is mistaken about how the installments are paid. The installments are for the water that you use. The water that you use in a month on your acre of land will be a very small amount. If you do not do this at all, if you remain in arrears all the time, there is no way of paying the charges except to put it on the shoulders of the neighbors.

Mr. McCUMBER. That is not the way it reads. It reads:

Shall fail to pay any installment of his construction charges.

Mr. SMITH of Arizona. Why, that is a part of every irrigation project. It is part of the construction charges that they have to pay. The construction charges under this bill are 2 per cent. That is what the bill says.

Mr. McCUMBER. That is based upon the acreage, of course. If the construction charges that a man had to pay amounted to $3 an acre, and he had a hundred acres, the total would be $300, would it not?

Mr. SMITH of Arizona. Yes. All I can say to the Senator in that particular is that the full committee of the Senate, composed largely of western men, and the committee of the House of Representatives, composed largely of western men, the Secretary of the Interior, the Reclamation Service, and the correspondence that I have in my office from water users' associations all concur in the conclusion that that is the only safe way. So far as I am personally concerned, therefore, I am averse to consenting to the change now, although I know how it would appeal to the Senators to put it in here. The persons I have named have put three or four months' work on this very proposition, and this bill is the result of all their labors.

Mr. McCUMBER. I should prefer, of course, a reason rather than a conclusion that we ought to make it this amount because the committee has reported it at this amount.

Mr. SMITH of Arizona. There is no difficulty in giving the reason.

Mr. McCUMBER. If we did that, of course there never would be an amendment made on the floor.

Mr. SMITH of Arizona. I will give the Senator the reason. The reason is to prevent thievery of public lands. The reason is to prevent a man coming into one of these irrigation enterprises and throwing the duties and obligations and burdens of the great, costly enterprise on other people, holding his land without putting up a cent just as long as he can hold it, going to court, having a suit about it, and staying as long as he can. If you should add the amendment we are talking about, he would never put up a cent and the improvements and the annual charges of the other people would have to be borne in bulk and distributed among those who did pay. It was to keep out that class of people, who number 5 to 1 as against those who are in default because they can not pay, that the committee acted.

Mr. McCUMBER. I confess I fail to see the connection in the argument between improper persons getting hold of this land for irrigation and a charge of 13 per cent to the honest entryman because he is in default.

To bring the matter to a focus—it may not seem a great deal to the Senate, but I think 13 per cent is a little heavy—I move to strike out "one," in line 9, page 3, after the word "of," and to insert in lieu thereof "one-half"; also, in line 10, to strike out the word "one" and insert in lieu thereof the word "one-half."

Mr. SMITH of Arizona. I will accept the amendment, so far as I am concerned, if I can speak for the committee.

Mr. SUTHERLAND. Mr. President, I have been trying to say something on this subject. I do not think the amendment ought to be accepted. I think the bill ought to remain as it is. The object of providing for a penalty of 1 per cent is to compel the payment of these installments by making it unprofitable for the person to fail to make payments. It is put in for exactly the same purpose that we provide in our tax laws that the taxpayer who does not promptly pay his taxes shall pay, in my own State, 1½ per cent. It is not based at all upon the idea of charging a reasonable interest for money. It is imposed for the purpose of a penalty, and it is imposed in order to compel the delinquent to make his payments.

The Government is not engaged in the enterprise of loaning these installments back again to the individuals. It is interested in collecting them, and it ought to impose such penalties as will enforce their payment. When a provision is put in here that it shall be only one-half of 1 per cent, it is simply to put it upon the basis of a 6 per cent loan. It had better not go in at all, as it seems to me, unless we make it a sufficient sum to operate as it is intended to operate, as a compulsion upon the delinquent to make his payments.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from North Dakota.

The amendment was rejected.

Mr. STERLING. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 11, after line 18, it is proposed to insert the following as a new section:

SEC. 16. That the district court of the United States for the district where the lands or some portion of the lands included within any reclamation project are situated shall have jurisdiction of all suits brought by the United States or the Secretary of the Interior for the enforcement of the provisions of this act, and jurisdiction of all suits now pending or which may be hereafter instituted by any legally organized water users' association or irrigation district in behalf of the water users and settlers thereon for the enforcement of the provisions of this act and of the provisions of the reclamation law as referred to and defined in section 1 of this act.

Mr. SMITH of Arizona. I have no objection to the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BORAH. I wish to ask the Senator from Arizona if he will not accept an amendment which I am going to offer here. I appreciate entirely what the Senator said with reference to the work on this bill, and I do not want to delay the vote, nor do I want to interfere with the final passage of the bill. I wish, however, to offer an amendment upon page 2, line 2, after the word "fund," to strike out "five" and insert "two," so that a charge of 2 per cent shall be made at the time the application is filed instead of a 5 per cent charge.

Mr. SMITH of Arizona. I have no objection to that.

Mr. BORAH. I offer that amendment.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 2, line 2, after the word "fund," it is proposed to strike out "five" and insert "two."

The amendment was agreed to.

Mr. NORRIS. Mr. President, I will call the Senator's attention to the fact that he ought to make a further change. By the amendment that has just been adopted he has provided for the payment of 100 per cent. The first payment was 5 per cent. That has been changed to 2 per cent. Now one of the other payments ought to be increased; otherwise you will never get all the money back.

Mr. SMITH of Arizona. I see. We will have to take care of that. Go on.

Mr. NORRIS. We have a provision now for the repayment to the Government——

Mr. SMITH of Arizona. I see the Senator's point. We will have to take care of it.

Mr. NORRIS. You can easily arrange that by increasing by 3 per cent one of the other payments, and that will make it come later on.

The VICE PRESIDENT. If there be no further amendments to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

URGENT DEFICIENCY APPROPRIATIONS.

Mr. MARTIN of Virginia. I move that the Senate proceed to the consideration of the urgent deficiency bill.

The motion was agreed to, and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 13612) making appropriations to supply urgent deficiencies in appropriations for the fiscal year 1914 and for prior years, and for other purposes.

Mr. MARTIN of Virginia. I ask unanimous consent that the formal reading of the bill be dispensed with and that it be read first for amendments, the committee amendments to be first considered.

The VICE PRESIDENT. Is there any objection? The Chair hears none. The Secretary will read the bill.

The Secretary proceeded to read the bill, which had been reported from the Committee on Appropriations, with amendments.

The first amendment of the Committee on Appropriations was, under the head of "Department of State," on page 3, after line 9, to insert:

For relief of destitute American citizens in Mexico, including transportation to their homes in the United States, to be expended under the direction and within the discretion of the Secretary of State, $40,152.47.

The amendment was agreed to.

The next amendment was, under the head of "Treasury Department," on page 4, after line 23, to insert:

Payment to Samuel Butter & Co.: To enable the Secretary of the Treasury to carry out the provisions of "An act for the relief of Samuel Butter & Co.," approved March 3, 1913, $11,709.69.

The amendment was agreed to.

The next amendment was, on page 6, line 7, after the date "nineteen hundred and fourteen," to strike out "$49,455" and insert "$74,182.50," so as to read:

Distinctive paper for United States securities: For distinctive paper for United States securities, including the same objects specified under this head in the sundry civil appropriation act for the fiscal year 1914, $74,182.50.

The amendment was agreed to.

The next amendment was, under the subhead "Public buildings, construction and sites," on page 7, after line 19, to insert:

Washington, D. C., old building, Bureau of Engraving and Printing, repairs and alterations: For repairs, painting, reenforcing floors, vault equipment, partitions, plumbing, conduit and wiring, and contingencies, to adapt the first floor of the old building of the Bureau of Engraving and Printing for the accommodation of the Stamp Division of the Internal-Revenue Bureau, which is to be transferred from the Treasury Building, $17,000.

The amendment was agreed to.

The next amendment was, on page 8, after line 2, to insert:

Washington, D. C., Treasury Building, special repairs: For changes and alterations in the basement and first and second floors of the Treasury Building, in order to provide accommodations for the Reserve Board created under the provisions of the recent currency act, $14,000.

The amendment was agreed to.

The next amendment was, under the subhead "Engraving and Printing," on page 9, line 3, after the words "plate printers' assistants," to strike out "$64,048" and insert "$96,072," so as to read:

For salaries of all necessary employees, other than plate printers and plate printers' assistants, $96,072, to be expended under the direction of the Secretary of the Treasury.

The amendment was agreed to.

The next amendment was, on page 9, line 17, after the word "employed," to strike out "$187,150" and insert "$280,725," so as to read:

For wages of plate printers, at piece rates to be fixed by the Secretary of the Treasury, not to exceed the rates usually paid for such work, including the wages of printers' assistants, when employed, $280,725, to be expended under the direction of the Secretary of the Treasury.

The amendment was agreed to.

The next amendment was, on page 10, line 8, after the words "Secretary of the Treasury," to strike out "$33,952" and insert "$50,928," so as to make the clause read:

For engravers' and printers' materials and other materials except distinctive paper, and for miscellaneous expenses, including purchase, maintenance, and driving of necessary horses and vehicles, and of horse and vehicle for official use of the director when, in writing, ordered by the Secretary of the Treasury, $50,928, to be expended under the direction of the Secretary of the Treasury.

The amendment was agreed to.

The next amendment was, under the subhead "Public Health Service," on page 10, after line 19, to insert:

For maintenance of marine hospitals, including subsistence, and for all other necessary miscellaneous expenses which are not included under special heads, $11,000.

The amendment was agreed to.

The next amendment was, at the top of page 11, to insert:

LIFE-SAVING SERVICE.

For an additional amount to reimburse the appropriation of the Life-Saving Service on account of expenditures therefrom for construction and repair work made necessary by reason of extraordinary storms, encroachment of the sea, unusually high tides, and "military necessity," and for the completion of said construction and repair work, if necessary, $38,240.

The amendment was agreed to.

The next amendment was, under the head "District of Columbia," on page 12, line 4, after "$100,000." to insert "*Provided*, That no part of this sum shall be used to pay for legal services," so as to make the clause read:

Public Utilities Commission: For necessary personal and other services and expenses in making valuations of public utilities as provided by section 8 of the District of Columbia appropriation act approved March 4, 1913, to continue available during the fiscal year 1915, $100,000: *Provided*, That no part of this sum shall be used to pay for legal services.

Mr. SMOOT. Mr. President, I should like to have the amendment just read go over for the present.

Mr. MARTIN of Virginia. I will say that since the action of the committee I have conferred with the Public Utilities Commission, and they say they have no purpose of using this money for legal services, and that it is entirely agreeable to them to have the amendment stand as it is; that they have no use for it for legal services.

Mr. SMOOT. It will not embarrass them at all?

Mr. MARTIN of Virginia. Not one particle.

Mr. SMOOT. Then I have no objection to it. I will say to the Senator that I tried to get into communication with them this morning and failed, and that is the reason I asked that the amendment go over at this time.

Mr. MARTIN of Virginia. I did get into communication with them, and was assured that they did not mean to apply the money in that way.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 13, after line 2, to insert:

Militia: For subsistence furnished Naval Battalion by Navy Department for annual cruise, July 11 to 24, 1912, inclusive, $379.99.

The amendment was agreed to.

The next amendment was, on page 13, after line 6, to insert:

To pay the Baltimore & Ohio Railroad Co., transportation and freight service furnished in connection with annual encampment, August 14 to 28, 1912, inclusive, $3,074.07.

The amendment was agreed to.

The next amendment was, on page 13, after line 10, to insert:

To pay William Phillip's Sons, cordwood furnished for use at annual encampment of 1912, $509.

The amendment was agreed to.

The next amendment was, on page 13, after line 13, to insert:

For pay of members of brigade rifle team on duty at Camp Perry, Ohio, August 13 to September 2, 1913, $1,487.34.

The amendment was agreed to.

The next amendment was, on page 13, after line 16, to insert:

In all, $5,450.40.

The amendment was agreed to.

The next amendment was, at the top of page 14, to insert:

Employment of females: To carry out the provisions of the act approved February 24, 1914, entitled "An act to regulate the hours of employment and safeguard the health of females employed in the District of Columbia," as follows: For three inspectors, two of whom shall be women, at the rate of $1,200 per annum, from April 1 to June 30, 1914, $900.

The amendment was agreed to.

The next amendment was on page 15, after line 21, to insert:

To reimburse James F. Oyster, late president of the Board of Education of the District of Columbia, for amount paid in settlement of judgment for costs in the case of Mary E. Nalle *v.* James F. Oyster et al., at law No. 55569, $183.20.

The amendment was agreed to.

The VICE PRESIDENT. The morning hour having expired, the Chair lays before the Senate the unfinished business, which will be stated.

The SECRETARY. A joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States extending the right of suffrage to women.

Mr. MARTIN of Virginia. I ask unanimous consent that the unfinished business be temporarily laid aside, and that the appropriation bill be proceeded with.

The VICE PRESIDENT. Without objection the unfinished business will be temporarily laid aside. The reading of the appropriation bill will be proceeded with.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the head of "War Department," subhead "National Home for Disabled Volunteer Soldiers," on page 18, after line 2, to insert:

Marion Branch, Marion, Ind.: For household, including the same objects specified under this head for the Central Branch in the sundry civil appropriation act for the fiscal year 1914, $8,000.

For hospital, including the same objects specified under this head for the Central Branch in the sundry civil appropriation act for the fiscal year 1914, $1,000.

The amendment was agreed to.

The next amendment was, under the head of "Military Establishment," on page 19, after line 11, to insert:

To reimburse the various appropriations for the support of the Army for sums expended, or necessary to be expended, prior to July 1, 1914, in transporting and caring for interned Mexican soldiers and refugees, $500,000, or so much thereof as may be necessary, and the expenditures heretofore made for the above-named purposes are hereby ratified and affirmed.

Mr. SMOOT. I ask that that amendment be passed over for the present.

Mr. MARTIN of Virginia. Would it not be as well to take it up now and dispose of it, unless the Senator has some good reason for its postponement?

Mr. SMOOT. I will say to the Senator that a number of Senators are at lunch who I think desire to speak upon the amendment. I do not believe it will delay the bill at all.

Mr. MARTIN of Virginia. I am willing to have the amendment passed over on that statement.

The VICE PRESIDENT. The amendment will be passed over.

The next amendment was, under the head of "Navy Department," on page 20, after line 17, to insert:

Payment to Port Graham Coal Co.: For payment to the Port Graham Coal Co., Seldovia, Alaska, for a scow rented of the company and lost by the Navy Alaskan coal expedition in Cook Inlet, Alaska, November 16, 1913, $5,000.

The amendment was agreed to.

The next amendment was, on page 21, after line 2, to insert:

To pay the claims adjusted and determined by the Navy Department, under the provisions of the naval appropriation act for the fiscal year 1913 (36 Stat. L., p. 607), on account of damages occasioned to private property by collisions with vessels of the United States Navy and for which the naval vessels were responsible, certified to Congress at its present session in House Document No. 752, $401.90.

The amendment was agreed to.

The next amendment was, under the head of "Department of the Interior," on page 25, after line 19, to insert:

PUBLIC LAND SERVICE.

Contingent expenses of land offices: For clerk hire, rent, and other incidental expenses of the district land offices, $30,000 of the unexpended balance of the appropriation for the fiscal year 1913 is continued and made available for the fiscal year 1914, and said unexpended balance shall be transferred upon the books of the Treasury and placed to the credit of the appropriation now available for contingent expenses of land offices for the fiscal year 1914.

The amendment was agreed to.

The next amendment was, under the head of "United States courts," on page 29, after line 2, to insert:

Rent of rooms: For rent of rooms for the United States courts and judicial officers, $4,655, for the balance of the fiscal year 1914, and for the purchase of necessary furniture and other like equipment for court rooms in the city of New York, $10,000; in all, $14,655, or so much thereof as may be necessary.

The amendment was agreed to.

The next amendment was, on page 29, after line 8, to insert:

The Attorney General is authorized to enter into a lease for rent of rooms for the United States courts and judicial officers in the city of New York at an annual rental, not exceeding $18,620, for a period of five years.

The amendment was agreed to.

The next amendment was, under the head of "Department of Commerce," subhead "Bureau of Lighthouses," on page 33, after line 1, to strike out "To pay the claim for damages which has been considered, adjusted, and determined be due to the claimant by the Commissioner of Lighthouses, under authority of the provisions of section 4 of the act of June 17, 1910 (36 Stats., p. 537), on account of damages occasioned by collision for which a vessel of the Lighthouse Service has been found responsible, certified to Congress at its present session in House Document No. 486, $65.38" and insert "To pay the claims for damages which have been considered, adjusted, and determined be due to the claimants by the Commissioner of Lighthouses, under authority of the provisions of section 4 of the act of June 17, 1910 (36 Stats., p. 537), on account of damages occasioned by collision for which vessels of the Lighthouse Service have been found responsible, certified to Congress at its present session in House Documents Nos. 486 and 756, $75.38."

The amendment was agreed to.

The next amendment was, under the head of "Department of Labor," at the top of page 36, to insert:

BUREAU OF LABOR STATISTICS.

For per diem, in lieu of subsistence of special agents and employees while traveling on duty away from their homes and outside of the District of Columbia, at a rate not to exceed $3 per day, and for their transportation, and for employment of experts and temporary assistance, to be paid at the rate of not exceeding $8 per day, and for traveling expenses of officers and employees, $5,000.

The amendment was agreed to.

The next amendment was, under the head of "Legislative," subhead "Senate," on page 36, after line 21, to insert:

SENATE.

To pay to Mrs. Virginia Lamar Bacon, widow of Hon. Augustus O. Bacon, late a Senator of the United States from the State of Georgia, $7,500.

The amendment was agreed to.

The next amendment was, at the top of page 37, to insert:

For compensation and mileage of Senators, $1,767.12.

The amendment was agreed to.

The next amendment was, on page 37, after line 1, to insert:

The Secretary of the Senate is hereby authorized and directed to pay to Joseph R. Sullivan $116.67 for clerical services rendered the Hon. JAMES HAMILTON LEWIS, of Illinois, from March 26 to April 16, 1913; and to Harry H. Buck $466.67 for clerical services rendered the Hon. BLAIR LEE, of Maryland, from November 4, 1913, to January 27, 1914, from the appropriation of "Salaries of officers, clerks, messengers, and others in the service of the Senate," for the fiscal year 1914.

The amendment was agreed to.

The next amendment was, on page 37, after line 12, to insert:

The Secretary of the Senate be, and he hereby is, authorized and directed to pay to Hattie A. Krueger and Lizzie Krueger, sisters of Paul R. Krueger, late clerk to the Committee on Irrigation and Reclamation of Arid Lands of the Senate, $74, being the amount due him on account of salary.

The amendment was agreed to.

The next amendment was, on page 37, after line 18, to insert:

For miscellaneous items, exclusive of labor, $50,000.

The amendment was agreed to.

The next amendment was, on page 37, after line 19, to insert:

For folding speeches and pamphlets, at a rate not exceeding $1 per thousand, $5,000.

The amendment was agreed to.

The next amendment was, on page 37, after line 21, to insert:

To reimburse the official reporters of the proceedings and debates of the Senate for expenses incurred from September 15 to December 1, 1913, for clerk hire and other extra clerical services, $1,155.

The amendment was agreed to.

The next amendment was, at the top of page 38, to insert:

Senate Office Building: For maintenance, miscellaneous items and supplies, and for all necessary personal and other services for the care and operation of the Senate Office Building, under the direction and supervision of the Senate Committee on Rules, $10,260.

The amendment was agreed to.

Mr. KENYON. Am I correct in my understanding that this reading is for committee amendments? I desire to offer an amendment, on page 38, when it is in order.

Mr. MARTIN of Virginia. The bill is being read for action on the committee amendments. When we get through with the committee amendments, and there are not many left, the Senator from Iowa will have an opportunity to present his amendment.

Mr. KENYON. Very well.

The reading of the bill was continued.

The next amendment was, under the subhead "House of Representatives," on page 39, after line 9, to insert:

For stationery for the use of the committees and officers of the House, $1,000.

The amendment was agreed to.

The next amendment was, on page 39, after line 13, to insert:

BOTANIC GARDENS.

For procuring manure, soil, tools, fuel, purchasing trees, shrubs, plants, and seeds; and for services, materials, and miscellaneous supplies, and contingent expenses in connection with repairs and improvements to Botanic Gardens, under direction of the Joint Library Committee of Congress, $3,321.35.

The amendment was agreed to.

The next amendment was, under the head of "Government Printing Office," subhead "Printing and binding," on page 41,

line 3, after the words "Treasury Department," to strike out "$20,000" and insert "$40,000," so as to make the clause read:

For printing and binding for the Treasury Department, $40,000.

The amendment was agreed to.

The next amendment was, on page 41, after line 4, to insert:

For printing and binding for the Interior Department, $15,000.

The amendment was agreed to.

The next amendment was, on page 41, line 7, after the words "Department of Labor," to strike out "$30,000" and insert "$8,000," so as to make the clause read:

For printing and binding for the Department of Labor, $8,000.

Mr. SMOOT. Mr. President, just one word in connection with this amendment. The amount of $30,000 was put in the bill on the floor of the House. An explanation was made of it there, but the head of the department, I understand, estimated for but $8,000. I notice in the hearings before the House committee the reason why $30,000 was appropriated was on account of lack of funds for printing some twenty-odd documents prepared by that department. They are very desirous of having $30,000 instead of $8,000 appropriated; but, as long as the matter will go to conference, it can be thrashed out there. If the Senate conferees should be convinced that it is absolutely necessary that $30,000 shall be appropriated, they can yield; and of course whatever amount is absolutely necessary can be provided for without any further amendment being offered at this time.

Mr. MARTIN of Virginia. It will, of course, be open for the consideration of the conference. The committee, after full consideration and discussion, reduced the amount from $30,000 to $8,000 because the Secretary of Labor had asked for only $8,000; but if any mistake has been made, or if any necessity should be shown for an additional amount, it can be taken up in conference.

The amendment was agreed to.

The reading of the bill was continued.

The next amendment was, under the head of "Judgments, Court of Claims," on page 42, line 4, after the words "Six hundred and sixteen," to insert "and Senate Document No. 441," so as to make the clause read:

For the payment of the judgments rendered by the Court of Claims, reported to Congress at its present session in House Document No. 616 and Senate Document No. 441, namely.

The amendment was agreed to.

The next amendment was, on page 42, line 7, after the words "War Department," to strike out "$4,043.89" and insert "$28,187.55," so as to make the clause read:

Under War Department, $28,187.55.

The amendment was agreed to.

The next amendment was, on page 42, line 8, after the words "Navy Department," to strike out "$4,271.10" and insert "$8,250.56," so as to make the clause read:

Under Navy Department, $8,250.56.

The amendment was agreed to.

The next amendment was, on page 42, line 11, after the words "In all," to strike out "$8,846.79" and insert "$36,969.91," so as to make the clause read:

In all, $36,969.91.

The amendment was agreed to.

The next amendment was, under the head of "Judgments in Indian depredation claims," on page 42, line 22, after the words "six hundred and fifteen," to insert "and Senate Document No. 442"; and in line 24, after the word "session," to strike out "$5,076" and insert "$13,350," so as to read:

For payment of judgments rendered by the Court of Claims in Indian depredation cases, certified to Congress in House Document No. 615 and Senate Document No. 442 at its present session, $13,350.

The amendment was agreed to.

The reading was continued to line 11, on page 44.

Mr. MARTIN of Virginia. To make the meaning clear, I move to insert a comma after the word "quartermaster's" and before "subsistence" in line 10.

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Without objection, a comma will be inserted after the word "quartermaster's."

The reading was continued.

The next amendment was, under the head of "Panama Canal," on page 45, after line 7, to insert:

For the purpose of paying the expenses of formally and officially opening the Panama Canal as provided in section 4 of the Panama Canal act, including the compensation of such persons as may be appointed by the President to provide for such opening, the President is authorized to use out of the moneys heretofore or hereafter appropriated for the construction, completion, operation, or maintenance of the Panama Canal the sum of $25,000, or so much thereof as may be necessary. The appointment of persons in the military and naval service of the United States is hereby expressly authorized: *Provided*, That if any person so appointed shall be employed in either the military or naval service of the United States the amount of compensation fixed by the President under this resolution shall be in addition to the official salary paid to such person.

The wage scale of the persons employed in the construction of the Panama Canal in effect prior to April 1, 1914, shall continue unchanged during the period of actual construction, and no claim of any person employed in connection with the construction of the Panama Canal shall be recognized or paid by the United States for longevity service or lay-over days accruing subsequently to June 30, 1909.

Authority is hereby given to employ and pay, from appropriations heretofore or hereafter made, an attorney versed in the Spanish law, and familiar with the conditions on the Isthmus in connection with the acquisition of privately owned lands in the Canal Zone, and in connection with the codification of the Canal Zone laws, at a salary not to exceed $7,200 per annum.

The amendment was agreed to.

The next amendment was, on page 54, after line 13, to insert as a new section the following:

SEC. 3. For the payment of the following claims, certified to be due by the several accounting officers of the Treasury Department under appropriations the balances of which have been exhausted or carried to the surplus fund under the provisions of section 5 of the act of June 20, 1874, and under appropriations heretofore treated as permanent, being for the service of the fiscal year 1911 and other years, unless otherwise stated, and which have been certified to Congress under section 2 of the act of July 7, 1884, as fully set forth in Senate Document No. 443, reported to Congress at its present session, there is appropriated as follows:

CLAIMS ALLOWED BY THE AUDITOR FOR THE TREASURY DEPARTMENT.

For miscellaneous expenses, Internal-Revenue Service, $4.
For refunding taxes illegally collected, $12,521.97.
For expenses of Revenue-Cutter Service, $1,204.24.
For Life-Saving Service, $599.17.
For contingent expenses, office of Director of the Mint, $128.75.
For contingent expenses, mint at Denver, 1913, $74.40.
For pay of assistant custodians and janitors, $9.50.
For fuel, lights, and water for public buildings, $3.30.
For furniture and repairs of same for public buildings, $1.68.
For repairs and preservation of public buildings, $2.
For mechanical equipment for public buildings, $48.21.
For vaults, safes, and locks for public buildings, $4.
For heating apparatus for public buildings, $68.95.

CLAIMS ALLOWED BY THE AUDITOR FOR THE WAR DEPARTMENT.

For pay, etc., of the Army, $2,322.09.
For mileage to officers and contract surgeons, $32.20.
For extra-duty pay to enlisted men as clerks, etc., at Army division and department headquarters, $1,097.20.
For subsistence of the Army, $122.70.
For regular supplies, Quartermaster's Department, $15,338.80.
For transportation of the Army and its supplies, $407.84.
For water and sewers at military posts, $145.41.
For headstones for graves of soldiers, $12.09.

CLAIMS ALLOWED BY THE AUDITOR FOR THE NAVY DEPARTMENT.

For pay of the Navy, 1912, $1,349.07.
For pay of the Navy, $3,360.20.
For pay, miscellaneous, $50.54.
For pay, Marine Corps, $964.23.
For transportation and recruiting Marine Corps, $38.34.
For contingent, Marine Corps, $17.18.
For transportation, Bureau of Navigation, $143.07.
For maintenance of naval auxiliaries, Bureau of Navigation, $8.70.
For ordnance and ordnance stores, Bureau of Ordnance, $3,249.48.

For indemnities, domestic registered mail, $30.
For compensation to postmasters, $121.38.

The amendment was agreed to.

The next amendment was, on page 60, line 1, to change the number of the section from 3 to 4.

The amendment was agreed to.

The next amendment was, on page 60, line 6, to change the number of the section from "4" to "5."

The amendment was agreed to.

The reading of the bill was concluded.

The PRESIDING OFFICER. The Secretary will state the amendment which was passed over.

The SECRETARY. On page 19, after line 11, the committee report to insert:

To reimburse the various appropriations for the support of the Army for sums expended, or necessary to be expended, prior to July 1, 1914, in transporting and caring for interned Mexican soldiers and refugees, $500,000, or so much thereof as may be necessary, and the expenditures heretofore made for the above-named purposes are hereby ratified and affirmed.

Mr. BRISTOW. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Kansas suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Bankhead | Hughes | Overman | Smith, Md. |
| Brady | Jones | Page | Smith, S. C. |
| Bristow | Kenyon | Perkins | Smoot |
| Bryan | La Follette | Poindexter | Stephenson |
| Burton | Lea, Tenn. | Pomerene | Thomas |
| Catron | Lee, Md. | Ransdell | Thompson |
| Chamberlain | McCumber | Reed | Thornton |
| Chilton | Martin, Va. | Shafroth | Tillman |
| Clark, Wyo. | Martine, N. J. | Sheppard | Townsend |
| Dillingham | Nelson | Sherman | Vardaman |
| du Pont | Newlands | Shields | Warren |
| Gronna | Norris | Smith, Ariz. | West |
| Hollis | Oliver | Smith, Ga. | Williams |

Mr. PAGE. I was requested to announce that the Senator from Montana [Mr. MYERS], the Senator from Oregon [Mr. LANE], the Senator from Minnesota [Mr. CLAPP], and the Senator from Arizona [Mr. ASHURST] are absent on business of the Senate.

Mr. OVERMAN. I wish to announce that my colleague [Mr. SIMMONS] is absent on account of sickness.

The PRESIDING OFFICER. Fifty-four Senators having answered to their names, a quorum is present.

Mr. BRISTOW. I should like to inquire of the chairman of the committee what is to be done with this $500,000 and who are to be the beneficiaries of the appropriation?

Mr. MARTIN of Virginia. I will say to the Senator I believe it is very well understood. I supposed the Senator understood it, but I am perfectly willing to explain it.

There are five or six thousand Mexican soldiers who, in battle in the Federal army, were defeated, and those five or six thousand men who were in the Federal army fled across the border for safety and came within the territory of the United States. They were taken in charge by the Army of the United States and interned in three camps—two in Texas and one in California. In taking care of the military refugees who fled for the preservation of their lives and came into our territory there have already been expended about $236,000. The Secretary of War, under the orders of the President of the United States, put them into those camps and has provided for them until about $236,000 have been expended. It will require about half a million dollars to take care of those people until the 1st day of July, the end of the present fiscal year. The Secretary of War and the Secretary of State estimated these expenses and appeared before the Committee on Appropriations and explained it to the committee very fully. The item is intended to meet that expenditure.

Mr. BRISTOW. May I ask when these refugees came across the border into the United States?

Mr. MARTIN of Virginia. I can not give the Senator the precise date, but I should say about January most of them came into our territory.

Mr. SMOOT. The 420 who are interned at San Diego, Cal., came across the border nearly one year ago—that is, last April—and the 5,325 others came across the border either in the latter part of December, 1913, or in the first part of January of this year.

Mr. MARTIN of Virginia. I take it that the date is not material, except that the Senator wanted to draw attention to the long-continued detention of these soldiers.

Mr. BRISTOW. That is what I am getting at. I want some information about it.

Mr. MARTIN of Virginia. They have been detained here. The Quartermaster General of the Army came before the committee and gave a detailed statement; but I take it that it is not necessary to go into these details more minutely than has been done.

I will say while I am on my feet, in respect to this matter, that when that item was first called to my attention it somewhat startled me. I called up the Secretary of State and desired some explanation from him. I got very briefly an explanation, but the Secretary expressed a willingness to come before the committee. In the meantime I investigated the matter myself, and I found, at least to my satisfaction and to the satisfaction of the committee, that the action which had been taken by the Government was in accordance with the long-established usage as between nations. It was not only free from any objection on the idea that it was an unfriendly act, but it was absolutely obligatory on the United States to take those men into custody, to detain them, and not to allow them to return to Mexico to further engage in war.

Mr. BRISTOW. Do I understand that the Senator from Virginia states that it is the duty of the United States to imprison these men and to prevent them from returning to their native land if they wish to do so?

Mr. MARTIN of Virginia. I do most unquestionably contend that it is the duty of the United States, according to the rules of civilized warfare and international law and usage, to detain those people and not to allow them to return to Mexico to further engage in war. It was not only the privilege of the United States to do so, but it was an obligation devolved on the United States in accordance with international usage and the rules of international law to detain them and not to allow them to return to Mexico to further engage in war. I will ask the Senator to let me read to him what the text-writers say on this subject. Hall's International Law and all the other standard works on the subject lay down this doctrine; but I have seen fit to bring to the attention of the Senate only what Moore's Digest of International Law lays down regarding it. I will read from page 1001 of that work.

Mr. VARDAMAN. From what book is the Senator from Virginia going to read?

Mr. MARTIN of Virginia. I shall read from Moore's Digest of International Law, which is recognized as a standard authority, and the language there used is almost an exact copy from Hall's Work on International Law, an English book of the very highest standing and a recognized authority on this subject all over the world.

Mr. McCUMBER. Before the Senator from Virginia reads from the volume may I ask him a question, with the permission of the Senator from Kansas?

Mr. MARTIN of Virginia. Certainly.

Mr. McCUMBER. The Senator undoubtedly laid down what is the general rule as between two separate nations; but I want to know if that same rule applies to war between people or factions of the same nation?

Mr. MARTIN of Virginia. Undoubtedly, in my judgment, it does so apply. I will call attention to the fact that the United States does not recognize any de jure government as being in existence in Mexico at all; it does not recognize the Huerta government as a de jure government, nor does it recognize the Carranza government as a de jure government. They are, however, both de facto governments; each has full control of a large territory, and each has established a government. They have put themselves in the position of belligerents, and the United States has put itself in the position of a neutral. Whenever it is a civilized war, just as much so as in the case where two independent nations are at war, whenever two belligerents are engaged in war this rule is applicable; there is no doubt in my mind whatever about that; and ex necessitate it must be in force in the case of belligerents.

Mr. McCUMBER. I do not want to go into the argument of that question just now, because I doubt if we can say that there is a real war in Mexico at the present time; it is rather a struggle between different classes of bandits; but I want to ask the Senator this question also——

Mr. MARTIN of Virginia. Let me see if I understand the Senator aright. Does he mean to say that he does not consider that there is a civil war now being carried on in Mexico?

Mr. McCUMBER. I mean to say that Mexico is overrun by bandits; I do not see anything that I would dignify by the name of "war"; but we might differ about that.

I want to direct my question to another point of the assertion of the Senator, namely, that there were 5,000 Mexican soldiers detained in this country. Did the Senator mean to say that there were 5,000 Mexican soldiers in addition to the refugees, the women and the children that you are taking care of there, or are there 5,000 in number altogether?

Mr. MARTIN of Virginia. The women and children are camp followers; the women are cooks. Under the Mexican civilization, they being a semicivilized people, according to the usage prevailing down there, they take the women along with their army, and the women who have children take their children along. There are some few children and a considerable number of women, but they are all attached to the army.

Mr. McCUMBER. Can the Senator from Virginia tell just how many actual Mexican soldiers there are now on American soil?

Mr. MARTIN of Virginia. There are about 6,000 people, including the camp followers.

Mr. McCUMBER. Does the Senator include the soldiers in the number of people?

Mr. MARTIN of Virginia. I can not give the number exactly. I think I have it here somewhere among my papers, but it can not be material. The number of soldiers is approximately 5,000.

Mr. McCUMBER. That is, altogether?

Mr. MARTIN of Virginia. No; there are 6,000 altogether.

Mr. McCUMBER. Would the Senator from Virginia say there were 5,000 soldiers and a thousand women and children?

Mr. MARTIN of Virginia. I am just stating this as a guess; perhaps that might be the number.

Mr. SMOOT. Mr. President, I will tell the Senator from North Dakota exactly the number of each class. At Fort Bliss there are to-day 1,081 women, there are 533 children, and there are 3,198 enlisted men and civilians. The department does not say how many of them are enlisted men or civilians, but states that there are 3,198 enlisted men and civilians. There are there to-day 513 officers. At San Diego, Cal., there are 3,420 enlisted men and civilians, including 6 or 7 officers.

Mr. McCUMBER. It would seem, then—I address my remark to the Senator from Virginia again—that we are not merely taking care of a lot of Mexican soldiers, if we dignify them by the name of "soldiers," but we are taking care of their families and of other refugees that may stray over. The other day it was stated that there had been about 80 births in one of these camps in a very short length of time; and the question might arise whether the Government is conducting a lying-in asylum down there for the benefit of the Mexican people. All of these matters ought to be presented to the Senate, so that we may know whether we are taking care merely of soldiers or whether we are expending a half million dollars for taking care of Mexicans who find this country a better place in which to live than is Mexico.

Mr. MARTIN of Virginia. I have an official statement here from the War Department giving all the figures, but I have not felt that it was necessary to consume the time of the Senate in reading them.

The Senator from North Dakota is putting an extreme interpretation upon our action. I do not see how he can in any fairness, in the face of the facts, talk about the Government maintaining a lying-in asylum. He understands as well as I do that these people who are straggling in here from civil life are people who are coming here seeking protection from assassination on the part of their conquerors. The Mexicans had in their army women, and some of the women had children; but most of these people are officers and soldiers regularly enlisted in the Mexican army. There are some camp followers, who, in accordance with the usage in Mexico, practically constitute a part of the army. Those women cook for the soldiers; they move from place to place with them, and are attachés or appendages of the army in Mexico.

Mr. McCUMBER. Are not most of them willing to go back to Mexico to-day?

Mr. MARTIN of Virginia. I do not know; but, in my judgment, the United States is not at liberty to permit them to go back.

Mr. McCUMBER. "Not at liberty" to permit women and children and those who are not soldiers, the civilians, to go back?

Mr. MARTIN of Virginia. I have no doubt whatever that the United States would be very willing to let the women and children go back.

Mr. McCUMBER. And the civilians?

Mr. MARTIN of Virginia. But the women and children are a part of the army; they were with those men, they came here with them, and they will not leave them; and as to the men who are soldiers, the United States is not at liberty to permit them to go back to Mexico.

Mr. VARDAMAN. Mr. President——

Mr. SMOOT. Will the Senator from Virginia permit me to ask him a question?

The PRESIDING OFFICER. To whom does the Senator from Kansas yield?

Mr. BRISTOW. I yield to the Senator from Utah [Mr. SMOOT], if that be agreeable to the Senator from Virginia.

Mr. MARTIN of Virginia. I was on the floor being interrogated by the Senator from Kansas [Mr. BRISTOW] and the Senator from North Dakota [Mr. McCUMBER], but I am perfectly willing to yield the floor and to give my views more at length later on in this discussion if it be necessary. I was simply trying to answer questions propounded to me.

Mr. BRISTOW. I should like to have the Senator proceed. I will wait until he is through with his explanation, and then I will continue my interrogatories, because I want the information.

The PRESIDING OFFICER. The Senator from Mississippi [Mr. VARDAMAN] has been on his feet for some time.

Mr. MARTIN of Virginia. The Senator from Utah interrupted me previously to the Senator from Mississippi, and I will yield to him after I have finished answering the Senator from Utah.

Mr. VARDAMAN. I was merely going to ask the Senator a question.

Mr. MARTIN of Virginia. After I get through with the Senator from Utah I will yield to the Senator from Mississippi, but I now yield to the Senator from Utah.

Mr. SMOOT. The question I desire to ask the Senator is this: Can he explain to the Senate the real reason why the State Department is holding these Mexican refugees in the United States?

Mr. MARTIN of Virginia. As I understand, the United States Government is holding these people in accordance with an obligation imposed on it by international law. It is doing exactly what every enlightened nation does in like circumstances. I will go further and say—for I see the Senator seems trying to make a little politics out of this matter——

Mr. SMOOT. Not at all.

Mr. MARTIN of Virginia. And I am very glad for him to make all the politics out of it that he can.

Mr. SMOOT. The Senator does me an injustice.

Mr. MARTIN of Virginia. Expressing simply my own opinion, I have no doubt that it is very agreeable to the administration to withhold from the conflict in Mexico soldiers from Huerta's army. But it is not doing so for that reason. It is doing so in accordance with an obligation placed upon the United States by the usage of civilized countries and by international law.

Mr. SMOOT. I am sorry the Senator made the reference to me which he did, because I had no such thought. If we are going to discuss this subject, it seems to me the Senator ought to tell the Senate frankly—and that is the object of my question—exactly what is involved in this matter. That is why I asked the question. I had no other object in view.

Mr. MARTIN of Virginia. I have told everything that is involved in the matter. The Senator was trying to get at motives which he thought were a criticism of the course pursued by the administration. I interpreted his attitude as such, and I think the overt acts which we have seen fully justify that interpretation. The Senator knows as well as I do that these people are held by this administration in accordance with what they consider their duty and the obligation imposed upon this country by the principles and rules of international law. When this band of refugees came to the territory of the United States it became obligatory on the United States to take them into custody, and it did take them into custody and put them in camps. It had a perfect right to do so, and it was its duty to put them in camps or in fortresses, or wherever it may be necessary, remote from the border, detain them, support them, and care for them until either an agreement is reached for their disposition or peace is declared, and then our Government can make claim against Mexico for the expenses incurred in caring for these people who have fled to this country for safety.

Mr. VARDAMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from Mississippi?

Mr. BRISTOW. I yield to the Senator from Mississippi.

Mr. VARDAMAN. Mr. President, the question which I was going to ask has been answered. I was going to ask the Senator from Virginia if it was the purpose of the President to hold these people until hostilities shall cease in Mexico? He has answered the question.

Mr. MARTIN of Virginia. The Senator is mistaken. I do not know what the administration is going to do. I have said what the law provides in respect to this matter.

Mr. VARDAMAN. There has been no intimation to the Senator from Virginia from the Secretary of State or from the President as to the time these refugees would be detained?

Mr. MARTIN of Virginia. The provision which was asked for by the Secretary of State was for an indefinite appropriation—not fixing any amount, and not fixing any time—but simply appropriating such an amount of money as may be necessary to care for these interns. The committee, however, saw fit to fix a limit of time and fix a limit to the amount. It was found that it would take a half million dollars to reimburse the $236,000 already expended and to continue to support these people until the 1st day of July, the end of the fiscal year. So we recommended an appropriation of the amount of money necessary to maintain these people until the 1st day of July, the end of the current fiscal year, thus departing from the request made to us, which was indefinite as to amount and as to time.

Mr. VARDAMAN. Mr. President, I understand the soldiers that are held are the ones who have sued out a writ of habeas corpus for their liberation.

Mr. MARTIN of Virginia. If any writ of habeas corpus has been sued out, I am not advised of it. The Secretary of War, who appeared before our committee, was asked the question, and he said if any writ of habeas corpus had been sued out he had no knowledge of it.

Mr. VARDAMAN. I have noticed an account of such a proceeding in the courts of Texas.

Mr. MARTIN of Virginia. Mr. President, I want to say that this question is, in its nature, an international question; and the duty of dealing with questions of that kind devolves upon the President of the United States. A condition was presented that required immediate action. It was a grave and important proposition, and the President, through his Cabinet officers—for they acted by his instructions, as they stated to the committee—determined that, in meeting this responsibility, it was incumbent upon him to take these people into custody and to detain them. I desire to say, as this involves an international question in connection with a most serious problem, it is exceedingly desirable that there shall be no division on party lines and no division on any other lines. I have myself always stood ready throughout my service in the Senate to maintain to the utmost reasonable extent the attitude of the administration in dealing with foreign questions, and I feel that the wise course for the Senate in this instance is to make this appropriation to reimburse the money actually expended and to provide for these interned Mexican soldiers for a while, until the problem can be further examined and a permanent solution of it reached.

I have no right to say that these soldiers will be maintained until peace is declared, but I say that it is an obligation imposed upon us by international law to detain them until peace is declared rather than to permit them to return to Mexico to again engage in war.

Mr. WORKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from California?

Mr. BRISTOW. I do.

Mr. WORKS. I should like to inquire of the Senator from Virginia a little about conditions in San Diego, in my State. I have not understood that there were any Mexican soldiers there, but that there were women and children there, who are really regarded as refugees. I know when I was there last summer they were being taken care of largely by the Red Cross Association and by private citizens. I can understand very well the reason why we should take care of soldiers as an international question; but the other seems to me to be a humanitarian question.

Mr. MARTIN of Virginia. I will say to the Senator that there are 426 officers and men interned at San Diego, according to the War Department report. There seem to be no women there at all; but 426 officers and men of the Mexican army.

Mr. WORKS. There must be some mistake about that, I am sure.

Mr. MARTIN of Virginia. That may be so, but that is all I know, and, as I have said, I gather that information from the official reports furnished me by the War Department.

Mr. SMOOT. Mr. President, I will say to the Senator that all we are paying for, according to the report of the department, is 420 Mexican soldiers and 6 officers. The report states that they are all soldiers and officers, as the Senator from Virginia has stated.

Mr. MARTIN of Virginia. That is all the information I can give, and it is from the official statement of the War Department.

Mr. WORKS. Of course, the question of taking care of soldiers, including officers, is one thing, and taking care of other people is quite another thing; and I wanted to ascertain the facts about it; that is all.

Mr. MARTIN of Virginia. We have the facts certified by the War Department, which show the figures I have given.

Mr. LODGE. Mr. President——

Mr. BRISTOW. I yield to the Senator from Massachusetts.

Mr. LODGE. If the Senator wishes to continue, I will wait. I merely wanted to say a word with regard to this distinction, which I think is a very important one.

Mr. BRISTOW. I shall be very glad to have the Senator from Massachusetts proceed.

Mr. MARTIN of Virginia. I merely desire to say that what I have said has been merely in answer to the questions of Senators. I have not attempted to go into a full discussion of this matter; but, later on, I will read the legal authorities bearing on this subject.

Mr. LODGE. Mr. President, there can be no question whatever about international practice in regard to the troops of belligerents coming across a neutral frontier. The practice has always been to disarm those troops and to intern them. I say "always," but certainly it has been generally the case, and I think we may say that it has always been the case of late years to disarm such troops, to intern and maintain them until the close of the war. The ground on which that practice of international law rests is, of course, the observance of neutrality; and for the purposes of neutrality you apply the same rules to belligerents engaged in civil war, after you have recognized a state of belligerency, as you do to two belligerent nations.

As to the naked right of a nation to refuse asylum, of course there can be no question whatever. It is quite within the power of any nation, for instance, to compel a ship of war of a belligerent to leave a harbor within 24 hours, even if she goes right out into the teeth of a hostile fleet. In the same way a nation can refuse to permit a beaten army to come across its frontier. Perhaps the best-known case of the sort is the case of the army of Gen. Bourbaki, in the Franco-Prussian War, when retreating through the south of France. That army, or a large portion of it, which, I think, was under the command of Gen. Clinchant, or some such officer, crossed the Swiss frontier. It was entirely within the power of Switzerland to refuse to permit them to cross their frontier and allow them either to be destroyed by the Germans or made prisoners by a superior German force, but Switzerland, and I think Belgium also in a similar case—certainly it was true in the case of Switzerland—allowed the French Army to cross its frontier. It put them in a place of safety, then disarmed and interned them, and supported them until the end of the war. I assume that the expenses were repaid by France, although I do not know that that actually happened.

Mr. OVERMAN. Mr. President, the distinguished Senator from Massachusetts [Mr. LODGE] is a member of the Committee on Foreign Relations; he is very familiar with all these matters, and speaks with authority, as we all appreciate. So I wish to call his attention to a treaty ratified in 1907, while he was a member of that committee, in which this very thing is provided for. The Hague convention submitted it to the United States, as it did to all the other civilized countries, and it was ratified and proclaimed on February 28, 1910.

Mr. LODGE. Yes; we are signatories to that convention.

Mr. OVERMAN. We are one of the signatories to that convention; and while the Senator is very familiar with the treaty, I thought I would call his attention to it. Articles 11, 12, and 13 of that treaty are as follows:

ARTICLE 11.

A neutral power which receives on its territory troops belonging to the belligerent armies shall intern them, as far as possible, at a distance from the theater of war.

It may keep them in camps and even confine them in fortresses or in places set apart for this purpose.

It shall decide whether officers can be left at liberty on giving their parole not to leave the neutral territory without permission.

ARTICLE 12.

In the absence of a special convention to the contrary, the neutral power shall supply the interned with the food, clothing, and relief required by humanity.

At the conclusion of peace the expenses caused by the internment shall be made good.

ARTICLE 13.

A neutral power which receives escaped prisoners of war shall leave them at liberty. If it allows them to remain in its territory, it may assign them a place of residence.

This really carries out the statement which the Senator said was the doctrine of international law.

Mr. LODGE. It is.

Mr. OVERMAN. And here is our solemn agreement entered into by the signatory powers.

Mr. LODGE. I was about to refer to The Hague convention. What the Senator has read is the statement of a universal practice among nations. That, of course, does not debar a nation from excluding an army of a belligerent, if it sees fit to do so, a beaten army or an army retreating across a frontier. A nation is at liberty to protect its own territory, of course; but that convention embodies our pledge to other nations in any case of this sort which may arise.

The two factions that are fighting in Mexico have been recognized as belligerents in practice by this Government, and must be treated as such. In observing neutrality between them, if one of their armies, or a portion of one of their armies, retreats across our frontier, there is only one thing to do, as it seems to me, and that is to disarm and intern them and subsequently to deal with them as the conditions may then seem to require.

I think it very important, however, Mr. President, that a distinction should be drawn between refugees and soldiers. The convention speaks only of armed men—of armies—and international law deals only with armed men. I do not mean by that to exclude the women and children who accompanied, as I am told, the Mexican army. The armies in Mexico, as we all know, are made up very largely of Indians, because the bulk of the Mexican population is Indian, and it is their habit to carry their women and children with them, and the women and children pertain to the army, so that they are not refugees in the ordinary sense; but it is the duty of no nation, as a matter of international law, to take charge of refugees generally who happen to come across the frontier. That, as the Senator from California has said, is a matter of humanity.

The wording of this provision seems to me to go rather far when it says "and refugees," without confining it to those who accompany the army, if that be necessary, in order to protect these women and children and camp followers. As the bill stands, it seems to me, with those words "and refugees," it covers any Mexican escaping, armed or unarmed, soldier or not soldier; any Mexican who chooses to come across the border and throw himself on our mercy and protection.

Mr. SMOOT. Right there, I will say to the Senator that I have a note made for the purpose of offering an amendment, so that it will read "interned Mexican soldiers and military refugees."

Mr. OVERMAN. That would be all right. I do not think there would be any objection to that.

Mr. MARTIN of Virginia. I am very willing to accept that. If there be a few exceptions, it is a case of de minimis. We all know exactly what the situation is there. It does not change the practical result one particle. I am very willing to accept the amendment.

Mr. LODGE. I think we had better make it definite, so that it will be understood that we are acting entirely along the lines of The Hague convention and international law, but not including refugees generally.

Mr. MARTIN of Virginia. I had no idea of providing for refugees except in connection with the army.

Mr. LODGE. That is what I understand it to be.

Mr. MARTIN of Virginia. And I am very willing to accept the amendment proposed by the Senator from Utah.

Mr. LODGE. But I think it would be very well to confine it in that way.

Mr. MARTIN of Virginia. The amendment simply makes specific that which was always intended.

Mr. LODGE. One word more, Mr. President. I am very much obliged to the Senator from Kansas, and I do not mean to trespass upon his time unreasonably.

There is one other point I wish to make. The whole doctrine on which this treatment of armed soldiers of one belligerent coming across a neutral frontier rests is, as I have said, the doctrine of neutrality. We can not and must not undertake to hold those soldiers or return those soldiers as a benefit or an injury to one side or another. That would at once put us on a basis of intervening. Our position would become indefensible if we were to say for a minute that we hold those men because if they were released they would go to the Huerta forces or they would go to the Carranza forces, and therefore we are holding them back. We are holding them back because we are neutral, anxious to enforce neutrality. These people have taken asylum in our territory. We therefore disarm them and hold them so that they can take no further part in the war and become neutrals, as we are.

Mr. GALLINGER. Mr. President, will the Senator from Kansas permit me for a moment?

Mr. BRISTOW. Certainly.

Mr. GALLINGER. I know very little about international law or the rules of war, but I wish to ask the Senator from Massachusetts whether the situation in Mexico is such as is described by the authorities that have been quoted by the Senator from Virginia? There is no government in Mexico recognized by the United States. It is a revolution.

Let me illustrate it further. Suppose there were a revolution in France to-day and the revolutionists were driven over into Swiss territory. Does the Senator from Massachusetts insist that that is a case that would come under the international law cited by the Senator from Virginia, and that the Swiss Government would have to take care of those people?

Mr. LODGE. Mr. President, I am afraid that opens the door to a very long explanation, but I shall try to put it in a few words.

Where there are civil troubles in a country and the body of insurgents or those who are in insurrection against the government are sufficiently strong to control part of the country and not to be amenable to the government of the other part of the country for the purposes of a neutral they are belligerents. They are not a belligerent state, but on a question like this, dealing with fugitive troops, you apply to them the same doctrine that you would apply to the troops of a belligerent state.

In Mexico the northern provinces are not under the control of the central government in the City of Mexico. They are pro tanto independent. They are recognized as belligerents by us and by all the world; that is, they are not to be treated as criminals who are simply trying to overthrow the Government, but have no power. They have reached the point of a practical belligerency. Under those circumstances we should apply to them precisely the rules that we should apply to a belligerent state. They have gone far enough for that.

Mr. GALLINGER. Of course I am not qualified to discuss that question. I have heard the international law quoted two or three times, and listened to it as it has been read, and I did in committee. It occurred to me, however, that this matter dealt with two separate nations, such as France and Germany, for instance, or England and France, and that where a portion of the army was driven across into neutral territory then the treaty and the provisions of international law would apply.

Here, however, is a country that we say has not any government. We refuse to recognize the existing government as a government. Two factions are fighting each other in a cruel and relentless way. A portion of those people are driven over into our territory. Then we apply to those people the treaty agreed to by several Governments and the principles of international law. Personally, I have failed to bring my mind to comprehend exactly our obligation in that regard.

Mr. LODGE. I think probably what the Senator from New Hampshire heard read in committee, though I do not pretend to say that it is so, was those passages in Moore's International Law which relate to the interning of troops. The language used there is "belligerent States, or belligerents." In the same way, if you will look at Hall's book, which is one of the most recent authorities, you will find, when they are dealing with this question of troops coming across a neutral frontier, that they use the word "belligerents." You must go to an entirely different part of the book and to an entirely different discussion in order to determine what constitutes a belligerent. It is not necessary that it should be a State in order to constitute a belligerent.

In our Civil War, for instance, the belligerency of the South was recognized by practically all the world, and the rules of war were held to apply, and the rules of international law were held to apply. In this case we have two factions, neither of which we have recognized as a government, but which between them have established a state of belligerency and are entitled, I think, to the application of the rules of war and of international law which would be applied to two belligerent States.

Mr. GALLINGER. One further point; and I thank the Senator from Kansas for yielding.

Under the terms of the treaty and under the provisions of international law, if France and Germany were at war and a portion of the French troops were driven into Switzerland and were taken care of there at the expense of that Government, it is perfectly understood that the Government of France would be responsible and would pay the bills. I should like to ask the Senator, however, who is going to pay these bills if we invest a million or two million dollars in this way?

Mr. LODGE. I can answer that question at once. No one except ourselves will ever pay these bills. There is no question about that.

Mr. GALLINGER. No; that is what I think.

Mr. LODGE. But it is a question of our conduct in regard to it. If I may illustrate one moment more, when this beaten army of Orozco, or whoever it was, were fleeing toward our frontier, if we had refused to admit them, as we could have done, of course we should have at once taken sides against that

fugitive army. We should have at once departed from the position of neutrality. If we had received them and held them with arms in their hands and allowed them to go back as an organized army, we should have departed from the position of neutrality the other way. That is the basis of the international theory embodied in The Hague convention of taking men, interning them, and reducing them to a condition of inaction and nonaction.

The question has been suggested, "What would be done if they wanted to go back?" I do not think that would alter in the least the attitude of the neutral nation. The object of the neutral nation is to preserve neutrality between belligerents. If the French army in Switzerland wanted to go back in order to take part against Germany, to have allowed them to depart and take part again in the conflict with Germany would have been to have taken part against Germany, because if Switzerland had not admitted them the Germany army, we may assume, would have captured them all. In the same way we may assume that if we had said to these men who came over our border that they could not come they would have all been made prisoners, or probably would have been shot. We allowed them to come over. Having given them refuge and protection, and having saved them from being defeated in battle or made prisoners, if we now turn them loose again we at once are guilty, of course, of an obvious breach of neutrality.

Mr. BRISTOW. If the Senator will permit me to inquire——

Mr. LODGE. As I am speaking in the time of the Senator from Kansas and by his courtesy, I certainly will permit him to inquire.

Mr. BRISTOW. Why should not they be paroled, the same as prisoners of war, under a pledge that they will not take further part in the conflict?

Mr. LODGE. It is a usual practice under international law to parole the officers; but usually the men, the soldiers, have no resources, and probably would have great difficulty in supporting themselves in a foreign country. The custom of paroling officers is frequently followed; and I have no doubt we could parole the soldiers if we could get sufficient guaranty that they would remain in this country and feed themselves.

Mr. SMOOT. I should like to ask the Senator one question. Would it be a violation of international law if the Government of the United States should decide to take these interned Mexican soldiers and ship them into some other part of Mexico, into the territory controlled by those under whom they were fighting? In other words, suppose those that are at Fort Bliss should be transferred to the southern part of Mexico at small expense and turned over into a territory over which Huerta has complete control?

Mr. LODGE. In order to answer that question you must go back to the point at which they crossed our frontier. If they had not crossed our frontier, they would have been lost to the side on which they were fighting. Having crossed our frontier, if we restore them to the side on which they were fighting, of course we take part with that side. Just in the same way, if instead of allowing them to cross our frontier in obedience to humanity and the practices of international law, we had refused to allow them to do so, we should have taken part with the side which was pursuing them and was going to destroy them or make them prisoners.

I am afraid we can not escape from the responsibility.

Mr. SMOOT. I will say to the Senator that I understand the policy before last April was that wherever there were refugees from Mexico, driven into our territory, they were not interned, but they were allowed to sift back into the territory to which they owed allegiance or to which they belonged.

Mr. LODGE. Those must have been civilian refugees. They could not have been regular armed troops. They could not have been soldiers.

Mr. BRISTOW. The Senator, in reply to a question that I asked as to why these men should not be paroled, said that it was frequently the custom to parole officers. Why should not these men be paroled, and then permitted to return to their own countries under the parole?

Mr. LODGE. A parole that they would not take part——

Mr. BRISTOW. That they would not take part in the fight.

Mr. LODGE. I can see no reason why that should not be done, if you can trust the parole.

Mr. OVERMAN. The only thing I want to say is that this article of the treaty only excepts officers. It says the men shall be interned. I do not know why, but it says the men shall be interned and held, but that there may be a parole of officers.

Mr. LODGE. That is the language and practice of international law, as well as the convention.

Mr. OVERMAN. This is the treaty we entered into.

Mr. BRISTOW. The inquiry I made has led to a very interesting, and to me instructive, discussion of this matter.

Mr. LODGE. On the point the Senator has just raised, if they are paroled and returned across the border, as I understand these are Huerta troops, they would be very likely to be massacred as soon as they went over. On the other hand, if we take them and deposit them in a port within the territory under the control of President Huerta, we have immediately taken a step which is distinctly favorable to him.

Mr. BRISTOW. Of course, if we parole his officers in order that they may return.

Mr. LODGE. The reason a parole is not extended to the men, I suppose, is because of the extreme difficulty of enforcing it.

Mr. BRISTOW. That may be true, of course. I can appreciate that, especially with people of this character.

Mr. MARTIN of Virginia. Exactly.

Mr. BRISTOW. We have arrived, apparently, at this conclusion; we have here a number of Huerta's soldiers who are refugees, with a lot of camp followers, and we are taking care of them. They are the troops of the Huerta government. We are unwilling to recognize the Huerta government as such. We have refused to recognize any government there. If the Huerta government were recognized for what it is, a government over a certain part of Mexico, the authority there, and if Carranza and Villa were recognized as in authority over the part of Mexico which they control, and then we interned and took care of the troops that fled across the border, we would have some right to call upon the Mexican Government to reimburse us for the money which we expended in taking care of these people who are the citizens of the so-called Mexican Republic.

The policy which the United States Government is pursuing, however, is involving us in very heavy expenses, the amount of which nobody can now foretell, and is absolutely foreclosing us from any claim upon any constituted authority whatever for reimbursement.

Mr. MARTIN of Virginia. Mr. President, will the Senator yield to me for a moment?

Mr. BRISTOW. Yes.

Mr. MARTIN of Virginia. I must express my dissent from that proposition. If the United States had recognized the Huerta government, our duty would have been exactly the same as it is now. There are two belligerents there.

Mr. BRISTOW. I recognize that.

Mr. MARTIN of Virginia. We are maintaining a position of absolute neutrality. Upon the troops of either belligerent coming on our territory under these conditions it was obligatory on the United States to pursue the course which the administration has pursued in this case. Whenever a de jure government is established in Mexico, whether it be the Carranza faction or the Huerta faction, whichever one is successful will be accountable to the United States for the expenses which we are incurring.

Mr. BRISTOW. Suppose this rebellion, as I will term it, against the constituted authority of Huerta fails. Huerta recognizes these people only as bandits, declaring that they are worth 19 cents apiece, which is the cost of rope to hang them, so the papers say. He recognizes them only as bandits, criminals, who are undertaking to overthrow constituted authority. Do I understand the Senator from Virginia to claim that if the rebellion ultimately fails we can call upon the Mexican Government to reimburse us for any assistance we may have given these "bandits" when they fled across the border?

Mr. MARTIN of Virginia. Mr. President, we shall be well justified by the rules of international law in calling on whatever Government is finally established in Mexico to pay for these expenses, and it will have to pay for them. It will be under an obligation to make them good, and will be compelled to do so.

We have observed absolute neutrality. We have done nothing for the one side or for the other side. We have met our obligations under a solemn treaty which we entered into.

It may be well, if the Senator will permit me, to read that which has been read in detached portions. I should like to read the provisions of the convention which was entered into by the civilized nations of the world, including the United States, in respect to this very matter.

Mr. BRISTOW. I shall be very glad to have the Senator read it.

Mr. MARTIN of Virginia. It was signed at The Hague on the 29th day of July, 1899. The United States is a party to it, and she bound herself by these obligations:

ART. 57. A neutral State which receives in its territory troops belonging to the belligerent armies shall intern them, as far as possible, at a distance from the theater of war.

I desire to call attention to the language used, "belligerent armies." It does not say "armies of independent nations," but "belligerent armies."

Now, let me finish reading the other section on this subject:

It can keep them in camps, and even confine them in fortresses or locations assigned for this purpose.

It shall decide whether officers may be left at liberty on giving their parole that they will not leave the neutral territory without authorization.

ART. 58. Failing a special convention, the neutral State shall supply the interned with the food, clothing, and relief required by humanity.

At the conclusion of peace the expenses caused by the internment shall be made good.

They could not be made good by the defeated army. When this convention provides that at the termination of the conflict and the establishment of peace the expenses shall be made good, it means they shall be made good by the successful faction, by the Government that is finally established.

That, I believe, is all I need read.

Mr. BRISTOW. I want to call the Senator's attention to this difference: We have not recognized either of these factions. The question that comes to my mind is not what I think we ought to have done, or what the administration may think it wants to do or does not want to do. That has not anything to do with it. If these warring factions had been regarded as belligerents, and were so considered by the Government, we would have some basis for a claim. When, however, the Government refuses to recognize either of them as belligerents, or as having any standing whatever other than bandits and murderers, it seems to me we forfeit the claim we otherwise would have.

Mr. MARTIN of Virginia. The Senator from Kansas has no authority whatever for saying that the Government has not recognized them as belligerents. The Government has refused to recognize either one as a de jure government. There are, however, two governments warring with each other in Mexico—the Huerta government and the Carranza government. Each has control of a large territory, and is levying taxes and appointing officers and conducting all of the affairs of government.

Mr. BRISTOW. Then let me inquire of the Senator why we do not recognize that condition of fact, instead of refusing to recognize it, when everybody knows it is the truth?

Mr. MARTIN of Virginia. We are recognizing it.

Mr. BRISTOW. Then we would have some basis for a claim. Now, we will spend hundreds of thousands, and probably millions, of dollars, and it seems to me we have no foundation for a claim against the Mexican Government, because we have refused to recognize that there is such a thing as an organized belligerency there on either side.

Mr. MARTIN of Virginia. The belligerency is a fact. This condition exists there. There are two separate factions. They are at war with each other. They are belligerents. We have not recognized either. We maintain a position of absolute neutrality, and will not recognize either as a de jure government; but no intelligent man can deny the fact that there is a state of belligerency; that there are two armies confronting each other; and that there are two governments in operation within the limits of the Mexican Republic.

Mr. BRISTOW. I think the Senator and I do not disagree as to what our Government ought to do as to taking sides in the controversy in Mexico. I am not suggesting that we should recognize one side as right and the other side as wrong. I am suggesting that, as a matter of fact, there are two sources of authority—governmental authority—military and civil authority. We are dealing with these two recognized authorities, and we ought, in fact, to recognize them as such and not refuse to recognize them and at the same time be compelled to tax our own people and thereby recoguize a fact which politically we refuse to recognize.

Mr. WORKS and Mr. SHAFROTH addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Kansas yield, and to whom?

Mr. BRISTOW. I yield first to the Senator from California. Then I will yield to the Senator from Colorado.

Mr. WORKS. What difference does it make whether we can recover this money back or not? The obligation rests upon us. We have assumed the authority of taking these soldiers and interning them, and they are on our hands. The question whether or not we can recover back the money is something that will have to be settled in the future. Nevertheless, I think we ought not to admit here in the Senate that some of these people will not, at some time, be responsible to us. Certainly, however, it is not necessary to settle that question now.

Mr. SHAFROTH. Mr. President——

Mr. BRISTOW. I yield now to the Senator from Colorado.

Mr. SHAFROTH. I should like to suggest to the Senator from Kansas that the principle of international law which has been read here does not prescribe, as a condition upon which it will operate, either that there shall be a declaration of neutrality or that there shall be a recognition of belligerency. It says that wherever there is a state of war existing, and soldiers from either side come over, they shall be taken and interned by the government upon whose territory they have come.

The Senator can see that if that were not the law, and if it required the recognition of belligerency, it would compel a nation, before it could ever get a recovery, to recognize as belligerents people who were not entitled to recognition as belligerents, and who, in fact, were not such. It would lead to a complication in international law which would result in recognition of belligerency where belligerency was not authorized by international law. For that reason the very principle is laid down which has been read here by the chairman of the committee, that these soldiers, whenever they come over, no matter to which side they belong, shall be taken and held. That is for the very purpose of preserving the neutrality of the nation upon whose soil they are.

Mr. BRISTOW. Referring to the suggestion of the Senator from California that it is a matter of no consequence whether we ever recover this money or not, I can not agree with him as to that. I think when we spend the money of our own people to take care of the citizens of a foreign country we ought to be able to collect that money from the foreign country, and that country ought to be held liable for the expenditure. I do not believe in taxing our own people for the benefit of others unless it is done as an act of charity. If this is a proposition of charity for these people, of course that is another thing.

Mr. MARTIN of Virginia. I call the attention of the Senator to the fact that it is a treaty obligation. It is a solemn treaty of the United States that requires us to do this.

Mr. OVERMAN. And Mexico is one of the signatory powers.

Mr. MARTIN of Virginia. In addition to the considerations of humanity and in addition to the obligations of international law, we are under treaty obligations to do it.

Mr. BRISTOW. Then we should have fortified ourselves with ample grounds for just claims against the Mexican Government when the war that is now in existence is ultimately settled.

I wish to say before I close, however—I will take my seat now in a few minutes, because I have gotten all the information I rose to elicit—that I think the camp followers ought to be excluded. If they had not been taken care of by us, they probably would have been taken care of by their friends at home. I think a great many of these people who wandered across the border did so because there is not any special reason why they should not stay where they can be supported comfortably, rather than go back and have to make their own living in their own country in its disturbed state.

Mr. WORKS. Mr. President, the Senator from Kansas evidently misunderstood my position. I did not say that it was a matter of no consequence whether this money should be paid back or not. What I said was that it was not a matter to be determined at this time. The obligation rests upon our Government to take care of those people, whom we have taken in charge. The question of repayment by the government in Mexico, when one is established, is quite another thing. I think we should insist upon the repayment of the money whenever there is a government established there; I do not care by whom it may be established.

Mr. McCUMBER. Mr. President, I should like to ask the Senator in charge of the bill if there is not some method by which we could separate those who are not soldiers and allow them to go, though they be refugees, and support only the soldiers and the families of soldiers who accompanied them. I confess it was information to me that the women and children of the soldiers accompanied them. If that be the fact, I certainly can not see how we can escape the obligation to care for the helpless ones in connection with caring for the soldiers themselves; but according to this statement there are a great many civilians, who did not belong to the army, who did not take up arms, and it does seem to me that they ought to be separated from the others, so that we will not be at any more expense than what is proper in observing the line of neutrality.

Mr. MARTIN of Virginia. Under the amendment of the Senator from Utah I think the separation of the civilians, if there be any, may be safely left to the President and those under him. It is a de minimis proposition. The Secretary of War made the statement before our committee that so far as women were there they were really attached to the army as cooks or in some capacity waiting on soldiers; that, differing from our civilization or life, they were there as servants, doing all sorts of domestic work in the camp, and especially the cooking, the

washing, and the cleaning up; that they were attachés of the army. There are no civilians in the proper sense, as I understand it, in the camps; but under the amendment of the Senator from Utah that has been covered as far as it is possible to cover it, and we may rest assured that the matter will be handled judiciously by the administration.

The VICE PRESIDENT. The Chair would inquire of the Senator from Virginia whether the committee accepted the amendment as proposed by the Senator from Utah?

Mr. MARTIN of Virginia. As far as we can we accept it. It will have to go to a vote of the Senate. We ask for its adoption.

The VICE PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. Before the word "refugees," in line 15, insert the word "military."

The VICE PRESIDENT. Without objection, the amendment to the amendment is agreed to.

Mr. SMOOT. Mr. President, I felt that it was unwise to provide an appropriation as recommended by the Secretary of State, unlimited in amount, with no time specified when the expense should cease on the part of the United States. The committee agreed with that position, but instead of making a limit effective April 1, 1914, it provided that this expense could be maintained until the 1st day of July of this year, and the appropriation carries half a million dollars for that purpose.

Under the estimate made by the department, if no other refugees come from Mexico before July 1 it will cost this Government four hundred and eighty-six thousand and some odd dollars. That is based upon an expense for each refugee of 32 cents per day.

I thought if a provision was made to pay the expense up to the 1st day of April that that would be sufficient to meet immediate requirements. The expense incurred to date amounts to about $242,000; and every day hereafter, if no more refugees cross our border, it will cost the Government over $1,900 every day as long as they are detained.

Mr. MARTIN of Virginia. Will the Senator from Utah permit me?

Mr. SMOOT. Certainly.

Mr. MARTIN of Virginia. I should like to know what the Senator thinks is going to happen in the next 12 days that we should make the appropriation only up to the 1st of April? What does the Senator expect to happen in the next 12 days that will relieve the situation?

Mr. SMOOT. If nothing happens, we could relieve the situation exactly as we are relieving it in this bill.

Mr. SHAFROTH. I should like to ask the Senator what is the difference if we do appropriate to cover the time until June 30? If it is not expended, it reverts back to the Treasury.

Mr. SMOOT. It is virtually an invitation to the State Department to continue the care of these people, and Congress says that it is perfectly willing it should be at Government expense. That is the only reason. If an amendment was adopted limiting the amount to $264,500, the amount it would take to pay the expenses of the present refugees to the 1st of April, the State Department would at least take that as a notice that Congress wanted something done in some way to relieve the Government of the United States from this daily expense of $1,900. It is for that reason, and that only, that I believe the appropriation should provide for the care of the refugees until the 1st day of April instead of July 1.

Mr. McCUMBER. What would the Senator suggest could be done in that time? What is in the line of possibility within that period?

Mr. SMOOT. Mr. President, I will frankly say that I believe the Government of the United States should send all the women and all the children, at least, to the territory from which they came and let the government which they belonged to take care of them. That should be done, at least. There are at present 1,081 women and 533 children at Fort Bliss, and there may be some at San Diego. As to the latter, of course, I can not state, because the report from the department does not give the information.

Mr. McCUMBER. The Senator heard read here but a few days ago of the most savage and brutal atrocities committed against women and children in the warfare in Mexico.

Mr. SMOOT. Those were American women and children.

Mr. McCUMBER. Would the Senator send those women and children back to the tender mercies of Villa and his contingent?

Mr. SMOOT. I do not know why the Senator asks that question. I did not even suggest such a thing. As the Senator has referred to the brutality practiced upon the women in that country by Mr. Villa and his followers, I call his attention to the fact that those were American women and children; they were not Mexican women and children. I never suggested that they be turned over to Villa. I never suggested that they be turned over to the constitutionalists. My suggestion was that our Government deliver them to the Huerta government, where they belong. That would relieve us of nearly one-half of the interned refugees and reduce the expense of the Government of the United States nearly one-half.

I understand that the Mexicans who are interned are held, not because they want to remain in the country, but, on the contrary, they want to go home; they want to return to Mexico. It seems to me it would be very good policy, if not in violation of international law, to permit it. As far as the women and children are concerned, it does seem to me that the Huerta Government ought to be compelled to take care of them.

Mr. McCUMBER. Mr. President——

Mr. SMOOT. I yield to the Senator from North Dakota.

Mr. McCUMBER. I want to say to the Senator I understood his proposition was to send them back to the place from which they came, and I understood that these refugees were from really the northern section, and at the same time belonged to the Huerta contingent—if I may call it—of the army up there. I do not understand that the refugees themselves came from the City of Mexico.

Mr. MARTIN of Virginia. They are a part of Huerta's army. They all came with the soldiers. These women and children came along as attachés of the army.

Mr. SMOOT. There is no question about that; but the Senator had reference to where they enlisted and under what government they were fighting. Of course, the women did not enlist, or the children; but the men enlisted as soldiers of the Huerta government, and I understand they came from the Huerta territory. My proposition was that the women and children be sent back to that territory—not to be driven back across the border line into the constitutionalists' territory—because I believe, myself, if that were done the most inhuman treatment and death itself would be visited upon everyone so driven out.

I am in full accord, as far as that is concerned, with the policy of the Government not to turn them over to the constitutionalists and have them slaughtered, as no doubt they would be.

But, Mr. President, I suppose there has been enough said to-day in the Senate to call the attention of the State Department to the fact that there ought to be some way arrived at by which this expense could be cut down. I do not believe we will ever get this money back, and it makes no difference to me if we never do, so far as the expense already incurred is concerned. They are here, and from a humanitarian point of view we have fed them and clothed them. I believe under the amendment I have offered to the amendment of the committee that in future civilians coming from any part of Mexico desiring the Government of the United States to take care of them will be barred. But under the amendment as it was drawn thousands and tens of thousands of Mexicans could have drifted to our territory and had us take care of them. The fare given to the present refugees by the Government of the United States is better than they are accustomed to in their own country. Without the amendment the committee amendment would be an invitation to the hungry Mexican to come to the United States and be fed and clothed as long as the war lasts. I can not say how soon the war will cease, nor can any other man tell. Last April it was predicted that the war would be over and the Huerta government would fall within a few days. The Huerta government to-day is stronger than it was then. No one can tell what the result will be in 30 days or in a year from now, nor what the future has in store for that distracted country.

For that reason, Mr. President, I am not going to offer the amendment that I intended changing the date from July 1 to April 1 and changing the amount from $500,000 to $264,500, although I do believe it would have been wiser for the Senate to have provided for the maintenance of the refugees until April 1 of this year, and thereby give notice to the State Department that we desired the present condition of affairs to cease at an early a date as possible.

Mr. SHAFROTH. Mr. President, it seems to me, from the statement which the Senator from Utah [Mr. SMOOT] has made, that he has assumed a premise which he had no right to assume, and that is that these refugees have no connection whatever with the army. There was no evidence before the committee to that effect. There is nothing to indicate that any of the persons the United States Government is taking care of are mere refugees, who had no connection with the army.

Mr. SMOOT. I call the Senator's attention to the report of the Secretary of the Treasury, and we will see whether the statement he has just made is correct or not. He will find on page 4 of that report the following statement:

JANUARY 17, 1914.

Memorandum for the Secretary of War:

1. The records of this office show that the following expenditures have been made or authorized in connection with the supply of the interned Mexican prisoners and refugees now at Marfa, Tex., or en route to El Paso, Tex.

2. Reports show that we are supplying 513 officers, 3,198 enlisted men and civilians, 1,081 women, and 533 children, making a total of 5,325.

3. In response to a telegram from Gen. Bliss, dated January 14, a copy of which was furnished this office by The Adjutant General, the following supplies have been shipped from St. Louis, Omaha, Jeffersonville, and Philadelphia depots.

He then goes on and gives the supplies ordered by Gen. Bliss and shipped from the depots he has named. The report shows that there are not only enlisted men and officers but civilians and women and children.

Mr. SMITH of Arizona. In this connection, if the Senator will permit me, if he knows anything of the Mexican army, he will know that an army generally carries about that proportion of women and children—the wives, sons, and daughters of soldiers. The whole household sometimes goes along with the army, and it is pretty hard, I imagine, to segregate the civilians from the soldiers. They are in one solid mass, and regularly form a part of an ordinary Mexican army.

Mr. SHAFROTH. I wish to call the attention of the Senator from Utah to the fact that he has read the report of January 17, 1914; but the last report——

Mr. SMOOT. The report I was reading from is dated February 24, 1914.

Mr. SHAFROTH. Yes; but the immediate memoranda are dated January 17, 1914. The memorandum which I am reading from states that there are at Fort Bliss 3,180 enlisted men—those are not women or children or civilians—officers, 426; women—it does not state whether they are connected with the army or not, but presumably they are—women, 1,256; children, evidently connected with them, 554; total number, 5,416. That is the record upon which we are acting, and that is the record upon which the appropriation is made. That is the last expression of the War Department concerning those people. There is no statement with respect to civilians. It may be that there are a few civilians there, but you can not turn back sympathizers of a cause who have been coming in with the army and expect them to go over to the territory of the enemy, where they evidently would be assassinated or annihilated. Even if there are few of them, the United States Government does have the obligation resting upon it to take care of them, at least until the few refugees who are civilians may be eliminated. Inasmuch as the amendment which has already been adopted specifies only military persons, refugees under the expenditure which we are making now can receive no benefit hereafter if they have received it in the past.

Mr. SMOOT. That is exactly what I said; and the only reason why I interrupted the Senator was because of the statement he made that there were no civilians provided for.

Mr. President, the report here of the Secretary of the Treasury, dated February 24, 1914, was the report which we considered in the committee. Not only that, but I know what report the Senator has. Gen. Aleshire handed it to the committee at the time when he was before the committee. This report is signed by Secretary McAdoo, and I believe it is absolutely correct. But, as I said to the Senator, that would make no difference to me. We have assumed the obligation and we are in debt to-day $242,000, and we have to pay that. It was only as to how far in the future we would provide for in this appropriation bill.

There is another thought that was in my mind, Mr. President. This is an urgency deficiency bill. There is another deficiency bill coming here. It will be passed, perhaps, in May or June—I hope in May, but not later than June—and if the policy that is being followed to-day is to be continued, it would not hurt anything at all to provide only until the 1st of April at this time.

Mr. WARREN. Will the Senator from Colorado allow me?

Mr. SHAFROTH. Certainly.

Mr. WARREN. Of course, their army has civilian employees, and the report that we get concerning the refugees is that all the cooks are women. Of course, civilian men are employed in transporting the army, and so forth. That will account for a certain portion of those termed "civilians."

Mr. SHAFROTH. The report which the Senator from Utah read did not specify how many were civilians. Not only that, but under the explanation which has been made it would be proper, of course, to care for those who were a part of the army that came over. This report especially states that these prisoners consist of those who crossed the frontier and then enumerates them.

The VICE PRESIDENT. The question is on the amendment of the committee as amended.

The amendment as amended was agreed to.

The VICE PRESIDENT. The bill is in Committee of the Whole and open to amendment.

Mr. OVERMAN. I ask the chairman to accept a little amendment that I offer. It is recommended by the Navy Department, and is very urgent. It involves only a small amount.

The VICE PRESIDENT. The Senator from North Carolina offers an amendment, which will be read.

The SECRETARY. On page 21, after line 11, insert the following:

Naval Militia Office—For the following, from April 1 to June 30, 1914, in addition to those now authorized and being paid from the appropriation "Arming and equipping Naval Militia," namely: Clerks—1 of class 2, 1 of class 1, 1 at $1,100, 1 at $1,000; in all, $1,175, which sum shall be paid from the appropriation "Arming and equipping Naval Militia," for the fiscal year ending June 30, 1914.

Mr. SMOOT. I should like to have the Senator explain the amendment.

Mr. OVERMAN. I have information from the Navy Department to the effect that it is impossible for them to do the work that Congress has authorized them to do with the present force. The amendment authorizes the employment of two additional clerks out of the appropriation already made and requires only $1,175. I am told by the head of the bureau that he can not do the work that Congress required him to do unless he has two more clerks.

Mr. SMOOT. Is it to apply from now until June 30, or is it to apply after June 30?

Mr. OVERMAN. To June 30, it says.

Mr. MARTIN of Virginia. I will not object to the amendment, because it can be investigated further when the bill goes to conference. I dislike to see amendments come in without having received full consideration, but under the circumstances I will not object to it.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from North Carolina.

The amendment was agreed to.

Mr. KENYON. Mr. President, on page 48, after line 10, I move to insert:

To pay to John Pepper, father of Rufus F. Pepper, late a Representative from the State of Iowa, $7,500.

Mr. President, I should like to say just a word in explanation of the amendment.

Mr. Pepper was a Representative from the second Iowa district. He was an unmarried man and died just before Christmas. This is to pay to his father the customary amount that has been paid to widows of Members of Congress who die in office.

I want to say, Mr. President, that I do not believe in the custom. I believe it is wrong to pay a year's salary to the widows of Members of Congress. I do not believe there is any law or any authority for it. There might be a reason for paying some small amount in order that the family might return home and the old status be established, but I can not really see any more reason for paying a year's salary than that we should pay a year's salary to the widow of a man who was killed in a factory somewhere. But it is the custom and has been for many years, and as long as it is the custom, until that custom is changed, it ought not to be a custom that works differently for different people. I have introduced a resolution to abolish the custom, but although it is a sort of sentiment of the Senate that the custom is wrong, I do not know when we will ever get it up.

Mr. Pepper was a poor man. His father is a poor man. There is a great deal more reason for making this appropriation for Mr. Pepper's father than there is in 7 out of 10 of the cases where the salary is voted to a widow. A year's salary has been voted at times to the widows of Senators whose estates were worth up in the millions of dollars.

Now the question is raised, I understand, why it was left out in the House. I want to say, parenthetically, that it was left out because of misinformation. I am satisfied as to the financial condition of Mr. Pepper's father; but the point was made by the committee there, I understand, that there is no precedent for voting a year's salary to anyone but the widow, at least none to vote it to the father.

Mr. WARREN. To the widow and children.

Mr. KENYON. The widow and children. I want to call attention to two or three cases. In the case of Senator Allison, from my own State, who was a widower, the salary was voted to nephews and nieces. In the case of Senator Frye the salary

for a year was voted to the daughters. In the case of Senator Mallory, of Florida, the salary was voted to nephews and nieces, who are certainly much further removed than the father.

Mr. President, I hope we will not have this custom long, and if all these items for appropriations to widows could be taken out of the bill, I would not urge the amendment or ask it at all; but if we are to have the custom, there is just as much sense in voting it to a dependent or partially dependent father or mother as there is in voting it to a widow.

Mr. WARREN. If the Senator will allow me, I am not against his amendment, but I should like to ask him whether there is any precedent exactly in point?

Mr. KENYON. I do not believe there is; but a niece or nephew is much further removed than a father or mother. Mr. Pepper's father owns a little home in Ottumwa, in our State. He is an aged man. He is too feeble to earn a living. He lives around with his children. He is a man of great pride. I would not say anything here that he could take exception to in that respect, and I ought not to have to do it, but I have letters here from people who know him well and they state the situation fairly. He can get along, living with his children and economizing, but at the same time this son who died contributed to his support. He had come up as a poor boy from a poor home and made a great success in life along lines of helping his fellow men, but not along lines of accumulating a great fortune.

I appeal to the chairman of the committee if it is right to vote a year's salary to widows who are worth, I will say in one case at least $7,000,000 and in another case over a million and a half dollars, why discriminate in the custom as to this particular man?

The House put in the bill an appropriation for the widow of Mr. Bremner and also for the widow of Mr. Wilder. Mr. Bremner's sickness and death attracted the attention of the Nation because of the hard struggle and courageous fight that he made for life. I do not want to raise any objection to that. I understand that in the other case the people are wealthy. The House put in those two items, and why they left out the other I can not understand. I ask the chairman if he has any objection to this item, and if so, what are the objections to it?

Mr. MARTIN of Virginia. Mr. President, the Senator from Iowa very well knows that it has been a long-established rule here, a rule of comity between the two Houses, that each House fix the expenditures for its own body. The Senator knows that whenever that rule is departed from it results in friction and causes trouble.

With reference to other cases that were provided for by the other House, what the Senator has said is true, but the House did not provide for the widow of the late Senator Bacon. Why? Because that was a matter for the Senate to deal with, and the Senate has dealt with it. The Senate committee did not go into the merits of this case at all, because Mr. Pepper was a Member of the other House. The committee of the House took this matter up, considered it, discussed it, passed upon it, and they declined to make this appropriation. It was again taken up on the floor of the House, discussed on the floor of the House, and the House refused to appropriate this money for the father of Mr. Pepper.

The Senator has said that this action was taken from a lack of understanding; that the House did not understand it. There are other appropriation bills; this is not an urgent matter; it is not a matter that need be done to-day or to-morrow; a general deficiency bill will come along very soon, and besides there are other appropriation bills on which this item might be put, but the proper place for it is on the general deficiency bill.

I have not the slightest indisposition to pay this amount. The Senator knows there is no purpose to discriminate against Mr. Pepper. I have not the slightest idea that any human being desires to discriminate against Mr. Pepper. But I say that the committee left the item off this bill because Mr. Pepper was a House Member, and it was a matter for the House to dispose of. It was an expenditure peculiarly within the control of the House, and, according to usage and comity and the rule, which is an excellent one, it is a matter with which the House ought to deal. If the House has made a mistake, if the House acted with imperfect information, it will be only a very few days when the House can correct the mistake. I think it ought to be left to the House to determine whether or not this appropriation shall be made.

If the Senate chooses to act differently and to violate the rule, which has become a very fixed one here, it will be perfectly agreeable to me; but in the interest of harmony and peace, and to avoid friction and trouble with the House committee and with the House itself, we left the item off. We hope the House will take it up again and do what they think is right about it; and I am sure there is not a Member of the Senate who will object to the item if the House sees fit to put it into the bill.

Mr. KENYON. Mr. President, I do not quarrel with the statement of the Senator from Virginia; but the rule which he invokes has been broken in this very bill, for on the next page the committee of which he is the distinguished chairman has inserted——

Mr. MARTIN of Virginia. To what item does the Senator from Iowa refer?

Mr. KENYON. To the item found on page 39 of the bill. I am going to read it:

For stationery for the use of the committees and officers of the House, $1,000.

So the Senate takes up the question of stationery for the House.

Mr. MARTIN of Virginia. If the Senator from Iowa will allow me to interrupt him, I will state that we had a letter from the chairman of the House committee asking us to insert that item. It is not a departure from the rule; it is a compliance with the rule. The item was omitted inadvertently in the House; and, I repeat, the chairman of the House committee asked us to put it in, and we did so. That has been the rule here ever since I have been a Member of the Senate.

If the House had said that they wanted the Pepper item inserted, we would have inserted it. We did telephone over there; we got in touch with Mr. FITZGERALD and would have been glad to have added the item if the chairman of the House committee or the House itself had said that it would be agreeable to them to have us do so, but Mr. FITZGERALD was out of the city, and we were told by the person who came to the telephone, representing him, that Mr. FITZGERALD would not send a letter or ask us to insert the item.

Mr. KENYON. Mr. President, if the House does an injustice, that is no reason why the Senate should not rectify it.

Mr. MARTIN of Virginia. If the Senator from Iowa says this was done from lack of information, the House can rectify it. The House has not done any injustice, according to the Senator, but it acted without full information. Give the information to the House committee on the next deficiency bill, and your item will go in.

Mr. KENYON. Of course, if it is passed by now, it never can, in my judgment, come up again. This is the place where such appropriations are being made and being made for the widows of Senators and Representatives. Of course, if somebody in the House, out of pique or something else—I do not know what—can succeed in having this appropriation for widows or for nieces and nephews carried through as to certain individuals and defeated as to others, it is well that we should know that, because this is a custom which, in any event, I think, will go when the American people thoroughly understand it.

Mr. President, I do think that perhaps my case is hopeless, but I feel that this is an injustice being done to this old man, who, I know, in his old age was dependent to a large extent on this boy. If, however, the Senate is so bound up by the rules of the House that we can not do justice in this body, even though they have done injustice in the other body, I can not make any other appeal, but I hope the chairman of the committee will accept the amendment, and that it may be adopted by the Senate.

Mr. MARTIN of Virginia. Mr. President, I will consent that this amendment may be adopted, so far as I am concerned.

The PRESIDING OFFICER (Mr. GRONNA in the chair). The question is on the amendment proposed by the Senator from Iowa [Mr. KENYON].

The amendment was agreed to.

Mr. JONES. Mr. President, I offer the amendment which I send to the desk, which I mentioned to the chairman of the committee [Mr. MARTIN of Virginia] yesterday.

The PRESIDING OFFICER. The amendment proposed by the Senator from Washington will be stated.

The SECRETARY. On page 34, under the heading "Department of Labor," it is proposed to insert:

Contingent expenses: For additional amounts for contingent and miscellaneous expenses for the offices and bureaus of the Department of Labor, to be available for the objects named in the appropriation for contingent expenses for the Department of Commerce and Labor contained in the act approved March 4, 1913, and for all other miscellaneous items and necessary expenses not included therein, fiscal year 1914, $10,000.

Mr. JONES. Mr. President, I simply want to say that this matter was called to my attention yesterday after the Committee on Appropriations had passed on the bill or I would have called it up in committee. I afterwards spoke to the chairman of the committee in regard to it. It seems that in the hearings the Secretary and the chief clerk of the department came before the House committee and also before the

Senate committee and stated that some of the items, especially in the contingent-expenses estimate, were absolutely necessary. For instance, I find on page 46 of the Senate hearings that Mr. Watson said:

First and most important is that in regard to naturalization certificate papers. We will require to enable us to issue the necessary petitions and certificates during the balance of the year $4,200. That is one item for which it is absolutely essential provision shall be made if we are to continue to naturalize people until the end of the fiscal year.

I have no doubt that we shall continue the naturalization of aliens, and we ought to make whatever provision is absolutely necessary for it.

Then, on page 48 I find that Secretary Wilson came before the committee, and in the first part of his statement I find this:

Senator SMOOT. I understood the Secretary to say that he appeared here in behalf of his contingent fund.

And Secretary Wilson said, at the bottom of the page:

The contingent fund, however, that we are asking for is imperative. It is needed in order that we may get the material with which the clerks that we have may be able to work.

Then on page 49 he says:

As has been stated by the chief clerk, it is essential that we should have a sufficient amount of money in the contingent fund to pay for the certificates of naturalization that will be needed during the balance of the fiscal year. The current fiscal year has been extraordinary in the number of certificates of naturalization that have been applied for. It is far in excess of any previous year. We must always depend upon the supplies of paper. It is a special paper that has to be specially provided for.

Therefore, according to the hearings, it would appear that this item is necessary and that there should be provision made for it in the contingent fund. The department asked, I believe, for some seventeen or eighteen thousand dollars, but I have only asked in the amendment proposed by me for $10,000. I do not want to appropriate any more money than is absolutely necessary for any of the departments, but this is a new department, and I do not think that we ought to hamper it, and I know the chairman of the committee does not want to hamper it. We all want to give the department what is actually necessary to carry on its work; and they say that this amount is necessary. Whether there is anything anywhere else in the bill showing that it is not necessary I do not know; but it does seem to me that on the statements which I have quoted from in the hearings we ought to make some appropriation for the contingent expenses of the Department of Labor for the rest of the year. So I have offered this amendment proposing an appropriation of $10,000.

Mr. MARTIN of Virginia. Mr. President, there has been an appropriation this year of $36,000 for the contingent expenses of this department. If we are merely going to appropriate everything that is asked for without knowing whether or not it is necessary, the Treasury of the United States will be swamped. The committee did not think this appropriation was necessary. It was considered by the committee; they were not satisfied that it ought to be allowed, and I am not satisfied that it ought to be allowed. There is nothing urgent about this matter, and there is no occasion for putting it on this bill. This is an urgent deficiency bill; it is designed to meet pressing necessities; it is to provide for paying people who are doing work for the Government and who would not otherwise be paid. There is an appropriation of $2,600,000 that is immediately needed on the Panama Canal.

The bill is designed to meet emergencies, urgent necessities, and the item referred to by the Senator from Washington is not urgent. It can wait. We excluded it from this bill simply to get further information. We were not satisfied about it. I do not say that it is wrong, but, as I have said, I was not satisfied that it was right; I am not in favor of putting it in the bill; and I can not ask the Senate to put it in now. I think it ought to be rejected until further investigation is made of it.

Mr. JONES. The Senator says the committee considered it. He means the subcommittee.

Mr. MARTIN of Virginia. The subcommittee.

Mr. JONES. It was not considered by the full committee.

Mr. MARTIN of Virginia. It was not.

Mr. JONES. I want to ask the Senator a question. As I understand, this urgent deficiency bill is to provide funds considered absolutely necessary to carry on the business of the Government to the end of the current fiscal year.

Mr. MARTIN of Virginia. It is.

Mr. JONES. How is it determined whether they are necessary? The Secretary of this department says, for instance, that this amount for certificates of naturalization is absolutely imperative. What stronger showing could be made than that?

Mr. MARTIN of Virginia. I was not satisfied that it was right; I am not satisfied now; and I hope the Senate will not put it in this bill. It can be provided for in the general deficiency bill, if it is right; and in the meantime we will give it further investigation. It can not go in the bill until I have better information and am better satisfied about it, so far as my vote is concerned.

Mr. SMOOT. Mr. President, I was very much impressed by the statement made by the Secretary of Labor in relation to the appropriation for the Bureau of Naturalization; but I looked up the question somewhat, and I found that this same matter was discussed before the Committee on Appropriations of the House, and its urgency was brought to their attention, but they decided not to put it in the bill. If the Senator has at hand the deficiency estimates, he will find, on page 26——

Mr. JONES. I have not the deficiency estimates at hand.

Mr. SMOOT. I have them here, and I will state that the House refused to put the item on this urgent deficiency bill.

Mr. JONES. That is no argument whatever for not putting it on in the Senate, because in a good many cases where the House has appropriated a certain amount we have increased it.

Mr. SMOOT. I was going to call the Senator's attention to the fact that the class of paper to which he refers comes under the Bureau of Naturalization and not under the miscellaneous expenses of the department. Another thing that I did not understand was the following statement in the estimates, under the heading "Salaries, Bureau of Naturalization":

For the purpose of carrying into effect the provisions of the act approved June 29, 1906, as amended by the act approved March 4, 1913 (37 Stat. L., pt. 1, p. 736), establishing the Bureau of Naturalization and providing for a uniform rule for the naturalization of aliens throughout the United States, namely—

Then it goes on to say:

Commissioner of Naturalization * * *, $2,500; Deputy Commissioner of Naturalization * * *, $1,750.

And then there is an estimate for a number of clerks. There is nothing there to show the need for the purchase of paper, but I understood from the head of the department that that was included. I want to say to the Senator that the regular bill carrying the appropriations for the paper for all of the departments will be over here in a short time, and so I do not think there is any real necessity for having the item put on this bill.

Mr. JONES. I want to ask the Senator a question. I find on page 6 of the bill the following item:

Dallas, Tex., post office: For new site, $250,000.

Is that urgent? Is that absolutely necessary? Has that actually been contracted for, and is it a deficiency?

Mr. SMOOT. Not only has it been contracted for, but they simply have not enough money to go ahead without this appropriation.

Mr. JONES. Can it not be taken care of in the——

Mr. SMOOT. In the public-buildings bill?

Mr. JONES. In the general deficiency bill?

Mr. SMOOT. It would only put the matter off that long.

Mr. JONES. Well, this work of the Department of Labor has also got to be done, or else we have got to stop naturalizing people. But the item to which I have referred is not the only one. There are items here of over $18,000 which are said to be really necessary. Here is what was said at the close of the hearings in the House:

It is apparent from a consideration of the foregoing tables that the department is confronted with liabilities aggregating $19,800 for the balance of the fiscal year, to meet which there is an available balance of but $1,842.57, hence the request for $17,950.

That amount is required for contingent expenses, as is shown on page 373 of the House hearings. I will not take up the time of the Senate by giving each particular item.

Mr. SMOOT. They are provided for, but not to the amount requested. The department asked for $19,500.

Mr. JONES. Nineteen thousand eight hundred dollars, and there is nothing for the contingent expenses of the Department of Labor in this bill.

Mr. SMOOT. But we have heretofore provided $36,000, and I can assure the Senator that there will be no lack of naturalization if this item does not go on the bill.

Mr. JONES. I do not understand why when a department, especially when the head of a department, comes here and says certain amounts are absolutely necessary to carry on the business of the department, we should cut them off. I do not think the chairman or any member of the committee wants to cripple the Department of Labor; and yet it has seemed to me that from the beginning we have been cutting down appropriations for that department and hampering it in every way in starting to do the work which we all hope to have done by that department. If there is any department that ought to be cared for and which ought to have the necessary appropriations to do its work, it is the new Department of Labor, from which we hope so much and which I am satisfied will bring so much good. I do not know anything about the necessity for these appropria-

tions, except as the statements are given in the hearings. The Secretary says that he needs this money; that it is imperative that the department should have it; and the chief clerk also says it is imperative they should have it. That is all I know about it.

Mr. BRISTOW. Mr. President——

Mr. JONES. I now yield to the Senator from Kansas.

Mr. BRISTOW. May I inquire if the Secretary of the Department of Labor did not spend a portion of the contingent fund provided for his department for an automobile and accessories?

Mr. JONES. I do not know.

Mr. BRISTOW. I understand so, but I may be misinformed, and I should like to inquire of the chairman of the committee if a part of the contingent fund that was appropriated for him was not expended in the purchase of an automobile, which had been refused by Congress in the original appropriation?

Mr. JONES. I do not know about that.

Mr. MARTIN of Virginia. I am not prepared to explain how the contingent fund was expended.

Mr. BRISTOW. I may have been misinformed, but I understand that was brought out in the debates in the House, and that being the case, I think we need not worry about the contingent fund being exhausted.

Mr. JONES. Of course we do not know that that is the case.

Mr. BRISTOW. I think if the Senator will read the debates in the House he will find that it is the case.

Mr. JONES. I have not had time to do that. Of course, if that has been done, we ought to have some provision that would stop anything of that kind; but when the officials of the department come here and say that the amounts estimated by them are necessary to carry on their work and they have not the money with which to do their work, it seems to me we ought to appropriate the amount required.

Mr. BRISTOW. Does not the Senator think that the money should have been expended for the purpose for which it was appropriated instead of for automobiles?

Mr. JONES. I have no doubt in the world that that ought to be done.

Mr. THOMAS. Mr. President, the Senator from Utah just now made a statement, if I correctly understood him, that an appropriation in this bill for a new site for a public building at Dallas, Tex., was an urgent deficiency appropriation. I should like to inquire how it is possible for an appropriation of that kind to be either urgent or a deficiency?

Mr. SMOOT. Mr. President, I have not a copy of the hearings, or I should like to turn to them and read to the Senator——

Mr. THOMAS. I will take the Senator's word for it. The statement was so unusual that I should really like some explanation of it. I can understand how an appropriation of money to pay for the completion of a building might be in an urgent deficiency bill, but I can not understand how the purchase of a new site for a public building can be so classified. The Senator, however, need not take the trouble to look the matter up in the hearings. His recollection is nearly always correct, according to my experience.

Mr. SMOOT. I am not positive in my recollection as to the real reasons, and I would not want to give the Senator the reasons unless I could give them with assurance.

Mr. THOMAS. Very well, then, the Senator need not answer the question; and I will not take the time to ask for any further information about it.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Washington [Mr. JONES].

Mr. BORAH. Mr. President, I ask the Senator from Washington to state the purport of his amendment. I did not catch it.

Mr. JONES. It proposes to appropriate $10,000 for the contingent expenses of the Department of Labor. They have estimated for various items, including naturalization certificate paper, $4,200; stationery, $5,125; and so on, amounting to over $18,000. The amendment which I offer only proposes to appropriate $10,000, but the department officials claim that an appropriation sufficient to cover all the items is absolutely necessary in connection with the work of the department.

Mr. BORAH. Mr. President, I do not know anything about the matter to which the Senator from Kansas [Mr. BRISTOW] has referred. I would have doubt about it as affecting the Department of Labor unless the fact were substantiated; but I have been informed from sources, which, I think, are reliable, that this increased fund is necessary for the actual work of the department. I know furthermore that this department has not been very well taken care of since it has been organized and created for the work which it necessarily has to do. While I know nothing about the facts to which the Senator from Kansas has referred, I have reason to believe that an increased appropriation of the kind is necessary for the department.

Mr. BRISTOW. Mr. President, I do not state positively, but in running through the RECORD hurriedly, I got the impression from the debate in the House that the Secretary of Labor had used the money in his contingent fund to buy an automobile, and that the chairman of the House Committee on Appropriations criticized him very severely for it. I do not speak with absolute accuracy, but that was the inference I got from running through hurriedly the House debates on that subject.

Mr. SMOOT. Mr. President, after hearing the statement of the Secretary of the Department of Labor before the subcommittee, I felt very much inclined to put in the bill as a deficiency the item of $4,200 for naturalization-certificate paper; the item of $3,550 for "machinery, including typewriters, adding machines, addressing machines, numbering machines, and parts therefor." The remainder of the nearly $19,800 asked for at the time is made up of the following items:

Stationery, $5,125; hardware, metals, cordage, and leather and saddlery, $316; dry goods, flags, and notions, $254; lumber, mill work, packing boxes, and so forth, $175; paints, oils, glass, and painters' supplies, $40; soap and cleansing materials, $96; ice, $112; and a long list of little items which we did not consider should be placed upon the urgent deficiency bill. When we came to look into the matter further we found that typewriters and adding machines had been borrowed, I suppose with the understanding that when the appropriation was made they would be paid for out of the appropriation. Therefore it is not going to hamper the work of the department, so far as these items are concerned, if the amount is omitted from this bill.

As I have said, I thought that the naturalization-certificate paper ought to be provided for in this bill; but the committee thought otherwise, owing to the fact that there is no question that the regular bill carrying these items will be passed here in ample time. So it was not considered necessary to include the item on this bill. Those are the reasons why it is not in this urgent deficiency bill. I have here a list, if the Senator cares to look at it, of every single item of estimated deficiency, or I will read it if the Senator desires me to do so.

Mr. JONES. With reference to the statements as to what the House has done, I find on page 6 of this bill the House appropriated $49,455 for distinctive paper for United States securities, while the Senate has raised it to $74,182.50; on page 10 the House appropriated $33,952 for engravers' and printers' materials, and so forth, which the Senate has raised to $50,928; and there are other items showing similar increases, so that because the House did not do a thing is not any argument why the Senate should not do it. I do not say that these increases were improper; I think they were proper. But to say that because the House did not authorize an appropriation we should not do so is no argument at all.

Mr. SMOOT. I think the Senator will admit that the increase in the items he has mentioned was not only absolutely necessary but urgent. We are printing United States notes at the Bureau of Engraving and Printing, and an order has been issued to print 1,080,000 of such notes every day. I want to call attention to the fact that, in spite of the number being printed, there is a demand all over the United States for one and two dollar notes which it is almost impossible for the Government to supply. We are engraving now 960,000 imprints every day, and it will take every dollar of the amount of money that is appropriated by this bill to provide the paper and to pay the engravers, plate printers, and other employees until June 30 of this year.

Mr. JONES. Mr. President, I do not question that at all; but here is what the Secretary of this department said:

> The contingent fund, however, that we are asking for is imperative. It is needed in order that we may get the material with which the clerks that we have may be able to work.

If he does not know what he is talking about——

Mr. BORAH. Mr. President, I think if there is a head of a department in this Government that would spend money economically, it is the head of the Labor Department. So far as I am concerned, when he makes that kind of a statement, unless there is some showing other than has been made here, I am in favor of giving him the money. There is not a more important department of the Government than this department, and there is no disposition, so far as I can see, to enlarge it or to accentuate its powers. I am in favor of supporting this amendment upon the statement of the Secretary of the Department of Labor.

Mr. SMOOT. I will say that it is imperative that an appropriation be made to purchase the necessary machinery, including typewriters, adding machines, addressing machines, num-

bering machines, and parts therefor. I admit it; and I want to say to the Senator that those very machines are being used to-day by the Department of Labor, as the department has borrowed the machines, and, as I understand, with the distinct understanding that when the general appropriation bill is made up we will take care of the items just named and they will be paid for from that general appropriation.

That is as I understand the situation. While I do not know whether I asked the head of the department at the time he was before the committee, I really think I did, and that is what you will find in his statement.

Mr. BRISTOW. Mr. President, I desire to read from the CONGRESSIONAL RECORD the debate in the House, which appears on page 3854.

Mr. SMOOT. If the Senator will pardon me, there is one item that I forgot to bring to the attention of the Senator from Colorado.

Mr. THOMAS. I have read that. It is satisfactory to me.

Mr. SMOOT. The information is satisfactory to the Senator from Colorado, is it?

Mr. THOMAS. Yes.

Mr. SMOOT. That is all I wish to say, then.

Mr. BRISTOW (reading):

Mr. FITZGERALD. Mr. Chairman, this appropriation can not be justified. When the Department of Commerce and Labor was divided and the Department of Labor created, Congress passed an act requiring the segregation of the appropriations that had been made for the conduct of the Department of Commerce and Labor between the Department of Commerce and the Department of Labor. At the last session of Congress it appeared that out of the appropriation of $60,000 for the contingent expenses of the Department of Commerce and Labor $26,100 was transferred to the Department of Labor. In addition to that, Congress at the last session appropriated $5,000 additional for the contingent expenses of the Department of Labor. At that time a request was made by the Department of Labor to authorize the Secretary of Labor to purchase three automobiles—a seven-passenger touring car for himself, at $4,500; an electric runabout for the use of himself and others, for $2,500; and an automobile truck.

The committee declined to include that authority in the bill, based upon the fact authority had never been given to any of the departments to purchase automobiles for the Secretary or others connected with the department. In some way or other the information got noised abroad that such a request had been made, and innumerable Members of this House served notice upon the committee that they would not tolerate such a situation. The authority was not given, and yet it appears that during this session of Congress an automobile has been purchased for the personal use of the Secretary of Labor.

Mr. BORAH. That does not change my mind a particle. I am not permitted to comment upon what Members of the other body say, or what they do, or what their motives are. I do know, however, that from the hour the Department of Labor was created there have been a great many people in this country who regretted that it ever was created; and they have undertaken in every possible way to hamper it in its work, and to prevent its development, and to keep it from doing that which it was created to do. I know from my own observation and from my own investigation and talk with those who are in charge of the situation that the Department of Labor has not been given an opportunity to do what it felt it ought to do. I do not know anything about this matter of automobiles.

Mr. WARREN. Mr. President, will the Senator from Idaho yield to me for a moment?

Mr. BORAH. Certainly.

Mr. WARREN. The Senator, of course, does not accuse the committee of showing any partiality against the Department of Labor?

Mr. BORAH. This committee?

Mr. WARREN. Yes.

Mr. BORAH. No; I have no knowledge that that was the case.

Mr. WARREN. On the other hand, can the Senator mention a single department to which the committee gives all they think they require or sustains them to the extent to which they wish to go in demonstration and exploitation of their department?

Mr. BORAH. I understand the Senator to ask if I can name any department that gets all it wants?

Mr. WARREN. Yes.

Mr. BORAH. No; I can not name any department that gets all it wants.

Mr. WARREN. So that is rather general.

Mr. BORAH. I can, however, name departments which have gotten money from Congress for doing things which never ought to have been done, which were without any justification in the world, and things which, in my judgment, had no connection at all with the benefit of the public service; while here is a department which is of prime concern to a class of people who have never heretofore had a real representation in the departments of the Government.

Mr. WARREN. I appreciate what the Senator says about the Department of Labor. It is important. It is one that we ought to sustain. By the same token, however, that the Senator states that the departments have spent money where they should not, it becomes the duty of the committee to go a little slowly in making these appropriations, especially in an urgent deficiency bill, when we can take care of the matter a month or two later in a general deficiency bill, and when there is no idea of either restraining or unduly hampering the department.

Mr. BRISTOW. Mr. President, I desire to say that I know nothing about the efficiency of the Secretary of Labor. I would not know him if he should enter the Chamber. I do know, however, that when a Cabinet officer is refused an appropriation for automobiles, if he then takes his contingent fund and uses it to buy one he is misappropriating public money, and he deserves the censure of Congress. I do not care what his record is on anything else.

Mr. JONES. Mr. President, I do not know, of course, what the truth is in regard to the statement the Senator has read; but I have here, on page 372 of the House hearings, an itemized statement of the expenditures from the contingent fund that the Senator describes, amounting to $36,100. It is itemized, and there is no item there that could be classed as an automobile; and I am satisfied, from the amounts given opposite the different items and the descriptions of them, that there is not any expenditure of that kind in this amount, at least. That accounts for $34,257.43 of the $36,100 set aside for the contingent fund of this department.

Mr. BORAH. Did the committee find anything in regard to the spending of this money for an automobile that ought not to have been spent?

Mr. WARREN. The committee did not pass upon it at all. The fact that he bought one, and has it, settled the matter, of course.

Mr. BORAH. Did the committee ascertain that he purchased it out of this fund from which he ought not to have purchased it?

Mr. WARREN. I do not know what fund he purchased it from.

Mr. BORAH. It may be possible that he purchased it out of money that he saved up from daily labor during the long years in which he worked.

Mr. WARREN. I wish to say to the Senator, however, that I am sure that did not prejudice the committee at all in looking over these expenditures. I did not hear a voice raised around the committee table in anything but the utmost confidence and respect for the Department of Labor and the intention to sustain it. While this happened to be picked out just now as an amendment, the Book of Estimates is full of things that we have left out in the case of all of the departments. So the committee have not differentiated at all as against the Department of Labor, and, so far as I am concerned, I never should have permitted it, if I were able to prevent it, if such an attempt had been made.

Mr. MARTIN of Virginia. Mr. President, so far as I am concerned, I should regret to see this item rejected on account of the automobile suggestion, for it seems to me we have not the information which would justify us in condemning the Secretary of Labor in connection with the purchase of an automobile. The fact is that every other Cabinet officer in this city has an automobile, and I do not see any reason why the Secretary of the Department of Labor should not have one.

Mr. BRISTOW. I want to know if every Cabinet officer has an automobile that was bought with public money and is maintained at public expense?

Mr. MARTIN of Virginia. I have no doubt of it, though I can not refer the Senator to the specific instances.

Mr. BRISTOW. The Senator ought to be better informed. I should like to have him advise me of a single one, unless it is the Secretary of Labor or the Secretary of War.

Mr. MARTIN of Virginia. They have had carriages, and I suppose they may not have gotten to automobiles yet; but that is a matter that ought to be treated on its own merits. I do not think we ought to deny an appropriation to the public service on a mere suggestion that a Cabinet officer has bought an automobile for his personal use. I do not think that it is treating the department exactly right. Neither am I prepared to condemn this appropriation.

The most the committee did was to say that they would not provide for this matter now, in the urgent deficiency appropriation bill. We may put this item in the general deficiency bill. If it is meritorious, we certainly will do it.

There is no disposition to discriminate against the Secretary of Labor. I do not know a department of the Government that is entitled to be treated more generously than the Department

of Labor. It is not out of favor with the committee at all. On the contrary, I think it is the desire of the committee to treat it with very great generosity. Certainly that is my feeling.

We turned down items for every department in this city. This is not the only one. We turned down many, some that we believed were right, that were just, and that ought to be cared for; but we did it on the ground that they ought not to be provided for in the urgent deficiency bill. This is one of the items that was turned down for that reason. We shall certainly put it in the general deficiency bill if a more thorough investigation satisfies us that it is just and right and needed for that department.

Mr. JONES. May I ask the chairman whether suggestions like that do not encourage the department to go on and incur deficiencies? We say: "Well, if you incur a deficiency, we will take care of it in the general deficiency bill."

Mr. MARTIN of Virginia. I should think it would rather discourage them to turn down their request.

Mr. JONES. But the Senator suggests: "We will take care of it in the general deficiency bill."

Mr. MARTIN of Virginia. If it is right, we will.

Mr. JONES. Yes; of course.

Mr. MARTIN of Virginia. Certainly. If we find it is just and right, we will take care of it in the general deficiency bill; but we rejected quite a number of items because we felt that the urgent deficiency bill ought to be kept within reasonable limits, and we ought not to appropriate for all the wants of the Government in such a bill. I think this item can wait, and can be investigated more thoroughly, and after investigation it certainly will be treated justly.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. KENYON. Mr. President, at the request of the Senator from Minnesota [Mr. CLAPP], who is absent from the Chamber, I offer his amendment, to be inserted at the bottom of page 37. I understand the chairman of the committee has accepted the amendment.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. At the bottom of page 37 it is proposed to insert:

That the Secretary of the Treasury be, and he hereby is, authorized and directed to pay to the officers and employees of the Senate and House of Representatives, including clerks to Members, Delegates, and Resident Commissioners, the Capitol police, and W. A. Smith, CONGRESSIONAL RECORD clerk, borne on the annual and session rolls on the 15th day of October, 1913, who are receiving an annual compensation of $2,500 or less, as reimbursement for mileage expenses and for extra services during the first session of the Sixty-third Congress, a sum equal to one-twelfth of the annual compensation then paid them by law, and to the officers and employees who are receiving an annual compensation in excess of $2,500 the sum of $200 shall be paid in lieu of mileage expenses and for extra services during the said session, the same to be paid out of any moneys in the Treasury of the United States not otherwise appropriated, and to be immediately available: *Provided*, That the clerks to Members, Delegates, and Resident Commissioners shall be paid one-twelfth of the annual compensation now received by them in the same manner as they are now paid under existing law.

Mr. SMOOT. Does that apply to the House employees as well as to those of the Senate?

Mr. KENYON. I am not prepared to say. I introduced it at the request of the Senator from Minnesota [Mr. CLAPP]. If there is any question about it, I prefer that he should answer it.

Mr. BRYAN. I raise the point of order that this amendment is out of order under the first section of Rule XVI of the Senate.

Mr. KENYON. I have sent for the Senator from Minnesota, and I should be glad if the Senator from Florida would wait until he comes to discuss the matter. There are other amendments to be proposed, I presume.

Mr. BRYAN (after a pause). I will read the part of Rule XVI to which I refer:

No amendments shall be received to any general appropriation bill the effect of which will be to increase an appropriation already contained in the bill or to add a new item of appropriation, unless it be made to carry out the provisions of some existing law, or treaty stipulation, or act, or resolution previously passed by the Senate during that session; or unless the same be moved by direction of a standing or select committee of the Senate, or proposed in pursuance of an estimate of the head of some one of the departments.

This amendment is objectionable upon all of the grounds I have stated.

The VICE PRESIDENT. The Chair will be compelled to sustain the point of order to the amendment. Are there further amendments to be proposed? If not, the bill will be reported to the Senate.

The bill was reported to the Senate as amended, and the amendments were concurred in.

Mr. KENYON. Mr. President, I desire to ask the Senator from Utah, in reference to the inquiry suggested by the Senator from Colorado—I had intended to ask the same thing—why post offices are placed in the urgent deficiency bill, and especially the item of the Dallas (Tex.) post office:

For new site, $250,000.

Why is the purchase of a new site for a post office a matter of urgent deficiency?

Mr. SMOOT. Mr. President, in a letter dated January 23, 1914, the Acting Secretary of the Treasury, Hon. John Skelton Williams, addressed the Speaker of the House of Representatives on the subject, as follows:

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
*Washington, January 23, 1914.*

The SPEAKER OF THE HOUSE OF REPRESENTATIVES,
*Washington, D. C.*

SIR: I inclose herewith another original, properly signed, of department letter dated January 16, 1914, relative to the recommendation for an appropriation, in amount $250,000, for a new site for the post office at Dallas, Tex.

It is understood that the original letter referred to has not been received at the House of Representatives, nor by the Committee on Appropriations, to which committee, presumably, it would have been referred.

Inquiry at the department to-day made it necessary, with a view to preserving the record and of showing the original action of the department, to take the necessary steps to immediately renew the original communication without delay.

Respectfully,

JNO. SKELTON WILLIAMS,
*Acting Secretary.*

Now, if the Senator will wait just a moment until I look up the hearings, I will find the other letter.

Mr. WARREN. Mr. President, while the Senator is looking up the letter to which he refers, I desire to say to the Senator from Iowa that, in the first place, there must be a limit of expenditure. Then, after that has been provided, we get estimates from the Treasury Department, usually in time to put them in the sundry civil bill. In cases where the item has been overlooked, however, or the expense has gone along faster than we expected, or where some emergency has arisen, we take up the matter in a deficiency bill and appropriate for it; but we are all the time within the limit which has been authorized by Congress, and we only provide for the earlier expenditure.

Mr. KENYON. This has been included in the public buildings bill, then?

Mr. SMOOT. Oh, certainly.

Mr. KENYON. And passed upon by the committee?

Mr. SMOOT. Yes. I wish to call the Senator's attention now to the letter of January 16, 1914, signed by Hon. John Skelton Williams, Acting Secretary of the Treasury, addressed to the Speaker of the House of Representatives. It is as follows:

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
*Washington, January 16, 1914.*

The SPEAKER OF THE HOUSE OF REPRESENTATIVES,
*Washington, D. C.*

SIR: The public-buildings act approved March 4, 1913, authorized the purchase of additional ground adjoining the post office and courthouse at Dallas, Tex., or in lieu thereof the acquisition of a new site, in either case the limit of cost not to exceed the sum of $300,000.

The department, under date of December 30, 1913, accepted a proposal in the sum of $250,000 for a new site at Dallas, Tex., and the papers conveying title thereto are now before the Attorney General for consideration.

It is anticipated that the report of the Attorney General, as required by the statutes, will be received by this department in the course of a day or two, and it is therefore necessary that prompt provision should be made for the payment of the amount involved in the acceptance above referred to.

I have the honor to recommend, therefore, the insertion of the following paragraph as a deficiency item in the deficiency bill now pending before the Committee on Appropriations, House of Representatives:

"Dallas, Tex., post office: For new site under present limit (act Mar. 4, 1913), $250,000."

Respectfully,

JNO. SKELTON WILLIAMS,
*Acting Secretary.*

Mr. KENYON. I think that is a satisfactory explanation. Has the Senator explained the other items for post offices in Texas? Texas seems to be especially favored in this bill.

Mr. SMOOT. I will say to the Senator that the subcommittee did not scrutinize very closely the items which were put into the bill by the House, because there was no question involved. Therefore I should not want to say offhand just what the reason was; but, if the Senator desires it, I will look up the matter.

Mr. KENYON. I rather suspected they were urgent political deficiencies.

Mr. SMOOT. That I can not tell.

Mr. REED. Mr. President, I simply want to make a statement. It has been charged here very broadly that the Secretary of Labor has violated the law. I have set on foot an inquiry in regard to the matter, and I think I shall be prepared to answer that charge in a few minutes. I want now, however, while the matter is fresh, to give notice of the fact that I think there is a perfect explanation of the matter to which the Senator from Kansas has referred.

Mr. BRISTOW. Mr. President, I desire to say to the Senator from Missouri that I read the statement of the chairman of the Committee on Appropriations of the House as it appeared in the CONGRESSIONAL RECORD in regard to that matter, and that was the authority I cited.

Mr. REED. But the Senator followed it with the charge that it was an absolute violation of the law.

Mr. BRISTOW. The Senator from Missouri is mistaken when he says I charged that. I made this statement, as I remember, and if I did not make it then as I make it now I intended to state that if the Secretary of Labor had used money from his contingent fund to purchase automobiles which Congress had refused to appropriate for, he deserved the censure of Congress for so doing.

Mr. REED. That is a pleasant sort of reference to make to a man on the floor of the Senate. It goes to the country as a broad and sweeping condemnation. It is true there is an "if" in it, but the "if" is bottomed upon a statement which was read here.

Now, I am not here to defend any man, but I thought it was proper to say that I thought I should have the facts regarding this matter in a few minutes, and that I thought there was an explanation, and I thought it only fair to make the statement now while the matter is new in order that there may be no misunderstanding.

Mr. BRISTOW. Mr. President, if the statements contained in the remarks of the chairman of the Committee on Appropriations of the House of Representatives are erroneous, and the Secretary of Labor did not use the public funds to purchase this automobile, then of course the criticism which is inferred from my remarks should not lie against him. I do not wish to criticize the Secretary of Labor if he has not done what it is alleged he has done.

Mr. REED. Mr. President, it does not at all follow as a necessary conclusion that even if all the Senator has said transpired the Secretary of Labor might not use the contingent fund to purchase a necessary vehicle. That fact still remains to be settled.

Mr. BRISTOW. That would depend upon the construction of "a necessary vehicle." If an automobile for personal use, which Congress refuses to permit by direct appropriation, can be purchased from the contingent fund and regarded as a necessary vehicle, those who regard it as such may approve it. I for one would not.

Mr. REED. The Senator again injects into his remarks the proposition "an automobile for personal use." It seems that some of us have an unfortunate way of stating things. I have not said that there was any automobile purchased for personal use. I do not think anybody has used that term except the Senator from Kansas.

The VICE PRESIDENT. The question is, Shall the amendments be engrossed and the bill be read a third time?

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

EXECUTIVE SESSION.

Mr. MARTIN of Virginia. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 5 o'clock and 5 minutes p. m.) the Senate adjourned until to-morrow, Thursday, March 19, 1914, at 12 o'clock meridian.

## NOMINATIONS.

*Executive nominations received by the Senate March 18, 1914.*

UNITED STATES MARSHALS.

Daniel F. Hudson, of Lander, Wyo., to be United States marshal, district of Wyoming, vice Hugh L. Patton, removed.

Thomas B. Martin, of Boise, Idaho, to be United States marshal, district of Idaho, vice Shadrach L. Hodgin, whose term has expired.

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate March 18, 1914.*

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Capt. Charles F. Pond to be a rear admiral.
Commander Edward H. Durell to be a captain.
Lieut. (Junior Grade) Frank N. Eklund to be a lieutenant.
Henry McDonald to be an assistant surgeon.
Richard M. Little to be an assistant surgeon.
Pay Inspector Frank T. Arms to be a pay director.
Asst. Paymaster Harold C. Gwynne to be a passed assistant paymaster.

POSTMASTERS.

NEW JERSEY.

Charles H. Hitchner, Elmer.

TEXAS.

S. R. Brown, McGregor.
Joe F. Coffey, Eddy.
W. H. McCurdy, Moody.
J. R. Ransone, jr., Cleburne.
F. J. Reese, Comanche.
J. P. Rodgers, Hico.

VIRGINIA.

Richard P. Barham, Petersburg.
W. C. Lauck, Luray.
John B. Norfleet, Suffolk.
L. E. Stephenson, Wakefield.

## HOUSE OF REPRESENTATIVES.

WEDNESDAY, *March 18, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Eternal God our heavenly Father, whose spirit pervades and fills all space with rays divine, from whom proceedeth life and its issues, we draw near to Thee for restraint, for encouragement, for reproof, for inspiration, that the issues of our life may not only be for our good but for the good of mankind. We realize that it is not so much what Thou hast called us to do, but it is the motive we put behind it and the way in which we do it, that counts. Fill us with Thy spirit and make us willing followers of the dictates of conscience, that we may do the right as it is thus given us to see the right. For Thine is the kingdom, and the power, and the glory forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

CHANGE OF REFERENCE.

Mr. WILSON of Florida. Mr. Speaker, I ask unanimous consent to change the reference of a bill which I introduced, H. R. 14623, providing pay for extra services performed by persons in certain navy yards, by referring it to the Committee on Claims instead of the Committee on Naval Affairs.

Mr. MANN. Is it a private or public bill?

Mr. WILSON of Florida. It is a private bill.

The SPEAKER. It is a private bill and will be referred to the Committee on Claims.

IMPORTATION OF CONVICT-MADE GOODS.

The SPEAKER. This is Calendar Wednesday. The unfinished business is the bill H. R. 14330, and the House automatically resolves itself into Committee of the Whole House on the state of the Union, with the gentleman from Illinois [Mr. FOSTER] in the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. FOSTER in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the consideration of the bill of which the Clerk will report the title.

The Clerk read as follows:

A bill (H. R. 14330) to prohibit the importation and entry of goods, wares, and merchandise made in whole or in part by convict, pauper, or detained labor, or made in whole or in part from materials which have been made in whole or in part or in any manner manipulated by convict or prison labor.

Mr. LEWIS of Maryland. Mr. Chairman, on Wednesday last it was agreed that general debate on this bill should cease in one hour upon the resumption of its consideration to-day, one half of that time to be controlled by the gentleman from Illinois [Mr. MANN] and the other half by myself. I will ask if the gentleman from Illinois is ready to use some of his time.

Mr. MANN. Mr. Chairman, this is a bill to prohibit the importation of convict or pauper made goods into the United

States. The existing law prohibits the importation of convict-made goods into the United States. The greatest friend that labor ever had in this country, in my opinion, was William McKinley, and in the McKinley Act of 1890 it was provided in section 51—

That all goods, wares, articles, and merchandise manufactured wholly or in part in any foreign country by convict labor shall not be entitled to entry at any of the ports of the United States, and the importation thereof is hereby prohibited; and the Secretary of the Treasury is authorized to prescribe such regulations as may be necessary for the enforcement of this provision.

I suppose no one knows that any convict-made goods are now being imported, because if anyone did know of such importation the goods would be seized and the importation refused.

This bill, which I favor, puts a penalty clause, however, into the law. It does not make the law any more effective, as far as the prohibition of convict-made goods is concerned, but it provides a penalty against anyone seeking to import goods and provides for the seizure of the goods. I am reminded that the other day when we passed a bill to prohibit the interstate shipment of convict-made goods, when I sought to insert a penalty in that bill gentlemen on the other side of the House voted it down, including my distinguished friend from Kansas [Mr. MURDOCK] on this side of the House.

It is claimed now that the prohibition in the existing law—and this section 51 of the McKinley Act is still the law, as it has never been repealed—it is claimed that the prohibition of importation is not wholly sufficient without the penalty clause. I am glad that the gentlemen propose to insert a penalty clause in the law, making it a little more dangerous to attempt to import convict-made goods. But I regret that the gentlemen the other day were unwilling to insert a penalty clause in the other bill in relation to interstate shipment of convict-made goods. So far as I know there is no violation of the existing law prohibiting the importation, but the bill we passed the other day in regard to interstate shipment had no teeth in it. It amounts to nothing. There is no penalty for a violation of it; in fact, no prohibition that could be enforced.

I am very glad to insert the proper penalty. I do not believe that the convicts, here or elsewhere, ought to be engaged in the manufacture of goods in competition with free labor. [Applause.] Of course the problem of taking care of the convicts is a problem yet unsolved so far as their occupation is concerned while in confinement. But having a little more feeling in favor of free labor than I have for those who are subjected to confinement for violation of the law, I am in favor of protecting free labor. [Applause.]

I wish this bill went a little further. It provides against the importation of pauper-made goods. It makes a definition of what a pauper is under the terms of the bill, but when that provision is reached in the bill I propose to offer an amendment providing that the term "pauper" shall include all adults who receive wages of less than $1 a day, so that we may protect American labor from pauper-made goods, whether the paupers are in an asylum or whether they are supposed to be free laborers. We have the right, and I think it is our duty, to protect the American laborer from competition with pauper-made goods abroad. [Applause.]

We now have a law under which goods may be brought into the United States from India, where the wages are 5 or 6 cents a day. There is just as much danger to the American laborer in the importation of these goods as there is by the importation of goods made in some eleemosynary institution in Europe or elsewhere. I hope that the gentlemen will agree to the amendment so that we may give real protection to the American laborers. We do not know of any convict-made goods coming into the country now, but we know of plenty of pauper-made goods, or goods manufactured by what we consider pauper labor. We ought to protect our people from the insidious influence of these goods in competition with American labor. [Applause.]

Mr. HUMPHREY of Washington. Mr. Chairman, will the gentleman yield?

Mr. MANN. Certainly.

Mr. HUMPHREY of Washington. I wanted to say to the gentleman that to-morrow morning I hope to show to the gentleman that we are bringing into this country 95 per cent of the shingles manufactured in British Columbia, and that 80 per cent of them are manufactured by Chinese labor.

Mr. MANN. And Hindu labor also, I suppose?

Mr. HUMPHREY of Washington. Yes; but mostly Chinese.

Mr. MANN. That is the problem we are up against. There is nothing to this bill unless it is made effective. Convict-made goods do not come into this country now. That is contrary to the laws since the days of William McKinley. Let us make the bill of some value by putting something in it that amounts to something. That is my doctrine. [Applause on the Republican side.]

I yield 10 minutes to the gentleman from Tennessee [Mr. AUSTIN].

Mr. AUSTIN. Mr. Chairman, I regret that I was absent on official business in the State of Colorado two weeks ago, when the bill was under consideration, which was finally acted upon in the House in reference to the shipment of convict-made goods in interstate commerce. I voted for that measure in the last Congress, and I was not only anxious to vote for it again but to offer an amendment to it which would prohibit the shipment of convict-made goods or convict-mined coal into any State of the American Union. Congress has been agitating this question for more than 20 years. If we have reached a point now where we have determined to write this meritorious legislation on the statute books, then I fully agree with the statement made by the minority leader [Mr. MANN] that we ought to make this law effective, and we ought to provide such penalties that men will not violate it. In the consideration of this bill we ought to go a step further. If it is wrong and unfair to the American workshop and American wage earner to place in competition with goods made in foreign lands by convicts, then it is equally so for the American Congress to permit the policy under which more than 30 States are to-day engaged in manufacturing or permitting, under the contract system, the manufacture of convict-made goods that are shipped into thirty-odd States every day in the year and sold in competition with similar articles made by honest, free American workingmen. The bill that was passed two weeks ago gives a remedy only so far as 10 or 11 States in the Union out of 48 are concerned; and if it is our duty, and it certainly is, to protect the honest workingmen in those 11 States, why should we hesitate to extend the same relief to the honest workingmen in the balance of the States in the Union?

The State of Nebraska manufactures brooms through a private contractor, who has the labor of convicts at a price of 55 cents, and who sells them in competition even with the output of factories run by the unfortunate blind of the country. There is a contracting firm that practically has a trust or monopoly in more than half a dozen States which manufactures knitted goods and overalls, shirts, and skirts, and brings that cheap convict labor into direct competition with the labor of the unfortunate wives and daughters of workingmen in our crowded tenement cities, who are compelled to work. We are encouraging and permitting the States to increase the number of convicts every year in the workshops within the walls of the penitentiaries. They commenced with one line in the production of goods and to-day they have multiplied and greatly increased the number. Why should we not, while we have the power and the opportunity, enact effective legislation that will wipe out this blot, this unjust system, a system which is unfair to the laboring man who has a family to support, and who bears his shares of the burdens and responsibilities of citizenship?

Mr. DYER. Mr. Chairman, will the gentleman yield?

Mr. AUSTIN. Yes.

Mr. DYER. Mr. Chairman, I am very much interested and in favor of the bill, as the gentleman is; but what would the gentleman do with the convicts? What employment would he give them?

Mr. AUSTIN. Mr. Chairman, I would put them on the public roads of this country to aid Congress and municipalities, counties, and States in giving a splendid free-road system in all parts of the country. [Applause.]

Mr. HAMLIN. Mr. Chairman, will the gentleman yield?

Mr. AUSTIN. Yes.

Mr. HAMLIN. The gentleman has looked into this matter carefully. About how long has this system been in vogue in this country?

Mr. AUSTIN. We have been working convicts——

Mr. HAMLIN. I mean the system of permitting private contractors to work convicts in the different prisons of the country?

Mr. AUSTIN. I can say that as far as my own State is concerned, to the shame of Tennessee, we have permitted our convicts to be used in the coal mines in competition with the honest miners for 30 or 40 years, and also a large number, several hundred, working in factories under private contractors within the walls of the penitentiary at Nashville.

Mr. HAMLIN. That has existed for a great many years. The gentleman's party has been in power for 16 years. Why did not it take some action looking to a discontinuance of that infamous system?

Mr. AUSTIN. The responsibility should be shared not only by the Republican Party, but wherever the Democratic Party is in power in a State, like Tennessee or Missouri, or any other Democratic State in the Union. That party must be charged

with full share in not putting a stop to this unfair and infamous system wherever it exists in Democratic States. [Applause on the Republican side.]

Mr. HAMLIN. The gentleman is correct about that; but this is national legislation. Why has there not been some step taken to prevent it by national legislation? Why wait until the Democratic party gets into power before this is attempted?

Mr. AUSTIN. Mr. Chairman, I am not seeking to excuse or palliate the failure of the gentleman's party or my party, but I am calling to the attention of this House the opportunity now, not for piecemeal or partial legislation on this subject, but for complete and final legislation that will make it impossible for any State in the Union to ship in interstate commerce the product of convict labor in the mine and in the workshop.

The CHAIRMAN. Does the gentleman from Tennessee yield to the gentleman from Texas?

Mr. AUSTIN. I do.

Mr. GARRETT of Texas. Do I understand my friend from Tennessee to say that the Democratic Party is in power in that State?

Mr. AUSTIN. Of course, the Legislature of Tennessee is Democratic and has been in the control of the Democratic Party for the last 30 or 40 years during the convict-lease system, with the possible exception of four or five years, and the State bought the coal lands and constructed the plant and put convicts in the coal mines when we had a Democratic legislature and a Democratic governor, who signed the bill that made that system a law.

Mr. GARRETT of Texas. Do I understand the gentleman to say that the State is Democratic now?

Mr. AUSTIN. We have a Republican governor, and we are going to reelect him in November notwithstanding the advice and admonition of President Wilson for the Democratic Party to get together and beat him. [Applause on the Republican side.] But, Mr. Chairman, let us put aside political quibbles and be a unit in this House for a proposition that ought to appeal to the fairness and justice of every man in this House who believes in giving an honest deal to the wage earners in every State in this Union.

Mr. FOWLER. Will the gentleman yield?

Mr. AUSTIN. Certainly.

Mr. FOWLER. I desire to ask the gentleman's opinion as to what disposition he would make of the criminals convicted in Federal courts. The gentleman has talked about those in State courts. Now, I would like to have the gentleman explain what system he would suggest for handling criminals who are convicted in the Federal courts?

Mr. AUSTIN. Well, we had a proposition in this House during the Sixty-second Congress to use Federal convicts in the Leavenworth Penitentiary to construct a public road from the penitentiary to the Army post near that city. There are plenty of ways and methods of utilizing Federal and State convict labor without bringing it in disgraceful competition with the blind, the women, and the children, and the unfortunate laboring men of this land. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. GORDON. Mr. Chairman, I ask that the gentleman's time be extended two minutes, as I would like to ask him a question.

The CHAIRMAN. The House has fixed the time and it can not be extended. The gentleman from Illinois and the gentleman from Maryland control the time.

Mr. LEWIS of Maryland. I yield five minutes to the gentleman from Ohio [Mr. GORDON].

Mr. GORDON. Mr. Chairman, I rise simply for the purpose of asking the gentleman from Tennessee a question, if he is willing to answer it, and I will ask it in my own time. My question is this: When you put convicts out on the public highways at work, do you not bring them in competition with American labor?

Mr. AUSTIN. Well, there is plenty of work for labor upon the public roads of this country, and we have a field not only for the honest laboring man upon the public roads but a field for the labor of convicts as well, which will come less in competition with the wage earner than anywhere else.

Mr. GORDON. But we are told everybody is out of work——

Mr. HUMPHREY of Washington. Nearly everybody.

Mr. AUSTIN. There is an unlimited field for the construction of public roads, not probably in the city of Cleveland, Ohio, but in the rural districts of this country.

Mr. GORDON. But the gentleman is bringing the convicts into competition with the farm laboring men just the same.

Mr. AUSTIN. Oh, not at all.

Mr. GORDON. Why, according to the statement you people have made on the floor of this House everybody now is out of work. Now, you propose to put the convicts at work on the public highways and bring them in competition with American labor. I say your argument is inconsistent.

Mr. AUSTIN. It may appear so to the gentleman from Ohio, but I am entirely satisfied with it.

Mr. GORDON. All right, sir. [Laughter.] I yield back the balance of my time.

The CHAIRMAN. The gentleman yields back three minutes.

Mr. LEWIS of Maryland. I yield five minutes to the gentleman from Texas [Mr. HARDY].

Mr. HARDY. Mr. Chairman, I wish to say I favor the proposition contained in this bill to prohibit the importation of foreign convict-made goods in anyway that will make effectual such prohibition. While I have taken no stock in opposition or favor of the bill, it seems to me that that part of the bill prohibiting the import of the products of pauper labor and section 9, defining the term "pauper" as one held or confined in eleemosynary institutions at public expense, in whole or in part, brings into our councils a Trojan horse. I think that it is hardly humane when we have in our country an asylum for the blind, for instance, taken care of by the charity of our people—that is, at public expense—an eleemosynary institute whose industry is sought to be utilized by the manufacture of certain products, that any country should say that the goods made by them should be prohibited from being introduced into such country. And yet in this bill we are doing that very thing. We propose to say to the unfortunates, not because you are a criminal but because you are poor, because you are old or blind or halt, and are in part taken care of by your Government, we will restrict the market of the products of the labor of your hands and cut down the price of your industry by such restriction as far as it is within our power. We will not let what you make be imported into our country.

Now, it seems to me that that is bringing in the doctrine of protection, and protection gone to seed, and this is the old cry of protection against the pauper labor of Europe, and it seems to me the question of pauper labor is amply taken care of by our tariff duties, which impose upon the products of Europe a pretty thoroughgoing tariff tax. But to single out the products of the poor and exclude them, is it right? Is it just?

Mr. HENSLEY. Will the gentleman yield?

Mr. HARDY. Certainly; because I am speaking with diffidence, loath to differ with the gentleman or the committee.

Mr. HENSLEY. The gentleman from Texas evidently has not consulted the report made in this case. He has not ascertained the fact that the Treasury Department declares that the prohibition in the present law may apply to goods wholly made by convict labor, but that it does not apply to goods partially made by convicts.

Mr. HARDY. I want to say to the gentleman that I am inclined——

Mr. HENSLEY. And from 1892 down to the present time there has been no seizure of such goods as this bill is intended to apply to, or anything done that would indicate that the present law is effective or can be enforced by the Treasury Department.

Mr. HARDY. The gentleman is talking on one thing and I am talking on another.

Mr. HENSLEY. There has been nothing done to indicate that the present prohibition has been effective at all. And now, if the gentleman will permit, on the question to which he directs his argument——

Mr. HARDY. Will the gentleman get me just a little more time?

Mr. LEWIS of Maryland. Yes; I will yield to the gentleman.

Mr. HENSLEY. I desire to say this, that I can not believe that the gentleman from Texas favors the bringing of such goods into competition with the product of the people whom he has described, where they are objects of charity and where they have been treated as objects of charity by the State, and their labor paid for in whole or in part by the State, and where the product when manufactured does not cost anything like the product that has been manufactured by free labor being employed upon it.

You can certainly appreciate what a demoralizing effect it will have upon the commerce of an article of that character. Take shoes and carpets, for instance, manufactured in a prison or in an institution where people are blind or otherwise unfortunate and those products do not cost anything like what they cost when manufactured by free labor. And then these people take that product out and put it into competition with the product of free labor, and it constitutes a disturbing element and produces a very demoralizing effect not only upon the commerce——

The CHAIRMAN. The time of the gentleman from Texas [Mr. HARDY] has expired.

Mr. LEWIS of Maryland. Mr. Chairman, I yield to the gentleman from Texas [Mr. HARDY] five additional minutes.

Mr. HENSLEY. Now, just one second. You can certainly see the effect of such competition on labor conditions in that vicinity.

Mr. HARDY. I will say to the gentleman from Missouri that no one regrets more than I to differ with him or the committee on this question, and I do it with diffidence, and it may be that a fuller understanding of the question will show me light on it. All that the gentleman has said of convict-made goods I agree with. But I want to say this, that if these eleemosynary institutions, supported by the charity or the public taxes of a country, are not allowed to use their industry in the making of products that may be sold in the markets of the world, those institutions must be supported by taxes levied on these very laboring men themselves in whose interest this bill is drawn, as well as on the public at large. Certainly if we exclude the products of the eleemosynary institutions of other countries, we may expect them to do the same by us.

Now, we have very few of these eleemosynary institutions in comparison with the number of people engaged in manufactures. We have a deaf and dumb asylum in Texas, you have one in your State, and they have them all over the country. The inmates of those asylums can do something, and under the humane laws we are beginning to enact now the proceeds of their industry are given back to them to help them to eke out a miserable, sorrowful existence; and now we are asked to say to them by our law, "Subject of charity as you are, we are not going to let your produce enter into competition with the produce of the world. We are going to restrict its market, and thereby reduce its price, and make your miserable earnings smaller still." Is it humane, and is it right?

Mr. LEWIS of Maryland. Will the gentleman yield?

Mr. HARDY. Certainly. I am seeking light on this subject, because I do not like its aspect.

Mr. LEWIS of Maryland. Of course, the effect of this bill would not be to restrict the home market.

Mr. HARDY. The gentleman says it will not restrict the home market; but we restrict the market of other institutions of that kind in other countries, and they will restrict the markets of our institutions of similar kind in our country. So it is a mutual wall that we each build up around ourselves, we for ourselves and they for themselves, the result being we will ostracize and oppress the poor and the helpless, who ought to be the object of humane consideration.

Mr. HENSLEY. Will the gentleman yield right there?

Mr. HARDY. Certainly.

Mr. HENSLEY. Does not your argument carry you to a point where you would favor the convict-made goods entering into competition with free labor?

Mr. HARDY. Now, that is the gentleman's question. I can not give him all my time. I say that I am with you for prohibiting the importation of convict-made goods not only from abroad, but I am willing to prohibit convict-made goods of our own country from entering into competition with the products of free labor.

I would work the convicts on the public roads or on public improvements for the benefit of all. Convicts are not special objects of care and consideration. They are criminals and we are meting out their penalty to them, and we are trying to do that as humanely as possible.

Mr. STEPHENS of Nebraska. Does not the gentleman believe also that a criminal is an object of humane consideration? Is he not mentally defective and subject to the same charity as a blind man?

Mr. HARDY. He is subject to humane treatment, but not to all the humanitarian consideration or that degree of care that the deaf or the dumb or the blind may be. The blind are without faults, so far as we are concerned. We surely pity them. We have not condemned them. Certainly we ought not to put them outside the pale of equal and fair treatment. The criminal has put himself in the category of having wronged humanity, and if we say he is equally subject to humanitarian consideration as the blind or the deaf or the dumb, we deny the rule of justice and should abolish all punishment for crime.

Mr. STEPHENS of Nebraska. Still, most criminals are defective mentally, and a man who is defective mentally to the extent of being criminal ought to be entitled to consideration as well as is one who is otherwise mentally unfortunate.

Mr. HARDY. If the gentleman will pursue that argument to the ultimate conclusion, he will find himself with those men who favor no punishment at all for crime, but say all crime is the result of conditions. He becomes a fatalist, believing in no merit or demerit, no virtue to be rewarded, no crime to be punished.

Mr. GARRETT of Texas. Mr. Chairman, will the gentleman yield again?

Mr. HARDY. Certainly.

Mr. GARRETT of Texas. Do I understand that by the terms of this bill goods manufactured by eleemosynary institutions, such as industrial schools for wayward boys and the like, are put on the same basis as goods made by convicts?

Mr. HARDY. They are.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. HARDY. Mr. Chairman, I simply want to add that I did not intend to talk so long.

Mr. LEWIS of Maryland. Mr. Chairman, will the gentleman from Illinois use some of his time?

Mr. MANN. I yield five minutes to the gentleman from Washington [Mr. BRYAN].

The CHAIRMAN. The gentleman from Washington [Mr. BRYAN] is recognized for five minutes.

Mr. BRYAN. Mr. Chairman, this measure is right. The elimination of the products of pauper labor, the products of those who are maintained by charity, from the ordinary channels of commerce is right. We do not want to mix our charity with our business affairs. There is an old saying that charity begins at home, and when we are endeavoring to practice charity we want it understood that we are practicing charity. It is essential, in order that charity may have its proper course and accomplish the things that are to be accomplished through charity, that there be no mixture between business and charity. If we try to make money out of our charity, our charity becomes as a sounding brass and a tinkling cymbal. It ceases to be charity. It becomes commerce. And so, if we establish our eleemosynary institutions and say that the blind shall be taken care of at the expense of the State, and we all pay our taxes and then put those blind and unfortunate people to work and use the products of their labor to compete with one particular class of society, we make that particular class pay twice. We make that class not only suffer the penalty of taxation in connection with the charity, but we also make that class suffer unjust competition against the products of labor of that class. That is unjust, and overturns the whole idea of charity.

If the State of Texas, for instance, has an institution for the blind, that institution ought to be handled by the State of Texas as a home charitable proposition. As I said, there is an old saying that charity begins at home. It is unjust and wrong for the State of Texas, for instance, to establish a great charitable institution and take in the blind and the orphans and the crippled and those who can not compete in the ordinary channels of commerce, and then ship out into other States the product of the toil of those unfortunates and make other States foot a part of their charity bill. It is all right for the States and the inhabitants thereof to compete with each other in the matter of the production of the various articles of commerce, but it is not right for one State to put over on another State its charity-made goods and make that other State pay its charity bill.

And so this measure is right. The truth is, this measure is exactly what ought to be put on our statute books. Nor does it involve the question of protection. That is not the question at all. The gentleman from Washington [Mr. HUMPHREY], my colleague over there, a while ago reduced that practically to an absurdity. When it was suggested by the gentleman from Illinois [Mr. MANN] that we should enact a measure here eliminating all kinds of products that were brought in from places where people worked at those low wages, my colleague suggested the shingle proposition, and at once put the people of British Columbia in the category of pauper labor. Of course that subject is so distantly related that it can not be considered in connection with a thing of this kind.

Charity is charity. There should be no degrees about it. There should be no half charity and half commerce, and when a man or a State or a company of men undertake to do charity they ought to do charity and not attempt to do commerce. Otherwise, as I said at the beginning, you will find one class not only contributing to charity but also being met in competition in the articles they manufacture by the products of those who are the recipients of such charity, and thereby compelled to pay twice to that cause of charity.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. LEWIS of Maryland. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. FOWLER].

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] is recognized for five minutes.

Mr. FOWLER. Mr. Chairman, this bill is a forward step in the march of progress which during the last two centuries has led labor steadily onward and upward to the plane of the inde-

pendent employee. The early dawn of civilization found labor on a very low plane. For 5,000 years labor toiled on a level with the beasts of burden, deprived of three of the greatest rights that bless mankind, which are as follows: The right to own property, the right to marry, and the right to worship a God.

That is true. For centuries labor was controlled by imperial forms of government which held it down on a low plane of civilization. But by the organization of labor into unions, by the effort of humanitarian spirits, by the effects of wise legislation initiated by men who had hearts of love and sympathy, labor gradually rose in recognition until to-day I am glad to say that labor stands in the sunlight of advantages and privileges, the same as are accorded to other callings among men.

Mr. Chairman, I repeat that this bill is a step along the line of the new freedom for labor, and it ought to be enacted into law. The opposition to labor has not been confined to a failure to pass wholesome laws for its benefit, but it has been compelled to compete with the pauper labor of every country in the world. Capital in America finding that it could not control labor as had been done in the past undertook to overcome the influence and power of organized labor by going to other countries and taking up the criminal, cheap, pauper labor and bringing it to America to compete with honest American labor to cut down the wages of American labor. What man will stand for such conduct unholy, unrighteous, intolerable?

This bill is in the direction, not of preventing the labor itself from being imported but it goes a step beyond that and prevents the importation of the products of labor made in other countries by criminals, convicts, and paupers of such countries.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. FOWLER. Mr. Chairman, I ask unanimous consent to extend my remarks on this subject.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. Six minutes.

Mr. MANN. I yield the time to the gentleman from New York [Mr. PAYNE].

The CHAIRMAN. The gentleman from New York [Mr. PAYNE] is recognized for six minutes.

Mr. PAYNE. Mr. Chairman, this is a very interesting question, but I do not think we have got to the end of it here to-day. It is a question we have had in our State for a good many years. At one time we had the old system of contracts, whereby men were let out at so much a day to work inside a prison at their trades. We had that system for a good many years, and finally it graduated into a system whereby contractors paid a stipend to the convicts for their labor on a sort of piece-price plan. Some of the convicts would accumulate money, so that when they got out of prison they would have an accumulation with which to start again in the world. Then the penologists decided that that system was vicious, and laws were passed prohibiting the payment of any money direct to the convict by the contractor. But that law was honored a good deal in the breach, perhaps more than in the observance, and some of the contractors got around it by crediting the convict every week or every month with the value of his services as they had before rated that value, and placing that as a credit on the book which they kept for that purpose; and when the convict went out he received a check from the contractor for the total of his earnings while he was in prison. Afterwards honest laborers, as we say, people who had not been convicted of crime, began to complain of the competition because of these contracts and the low wage that was paid to the State, and various schemes were put forward to solve the proposition, finally resulting in work on State account, the State going into the manufacture of furniture and other things, and the law providing that the convict-made goods should be sold to no one except for use by the State or the municipalities within the State. So that none of our prison-made goods go outside of the State. The uniforms for the National Guard are made in the State prisons. The clothing used by the prisoners, and used in the asylums and eleemosynary institutions, is largely made by the prisoners in the State prisons.

That method seemed to work to the universal satisfaction of all. The labor people were satisfied, and there has not been much complaint that has come to my ears, though I have sometimes wondered why not. Of course it is a species of competition, because outside labor would make all these goods for the municipality if they were not made within a State prison. Years ago we tried road making with some of the convicts. That was not a success. That was 20 or more years ago and we had not got into the way of building roads.

Within the past year or two the convicts have made some roads in the vicinity of the State prisons. There being a State prison at my home town, I have had more or less personal observation of the success of that plan. The convicts went out to make country roads, working with the machinery owned by the towns, the money being raised by the towns or by the counties, or both, and the convicts made turnpike roads and macadam roads, and that has been reported as being something of a success. There was no trouble from convicts escaping. I believe one did escape, but the man's fellow convicts made up a purse for a reward to get him back. They wanted to stay outdoors. They did not want to have any of their number misbehave while they were out for fear this work would be stopped. Still, as has been said, that is more or less of a competition.

Mr. CANTOR. May I say to the gentleman from New York that the reason no complaints have been made by outside labor is that the act was drawn with the cooperation of the labor unions of the State, and no complaint ever reached me during my day up there nor since. The labor unions seemed to be perfectly satisfied with the fact that this employment was confined to the manufacture of goods used by the State and by the municipalities.

Mr. PAYNE. By the State itself and its institutions.

Mr. CANTOR. Yes.

Mr. PAYNE. I have not heard any complaints. I know that the labor unions joined in with the rest of the State for the enactment of this law.

Mr. CANTOR. Other than that they were employed——

Mr. PAYNE. I do not want to give the gentleman any more of my time. Further than that, I was going to say, Mr. Chairman, I have sometimes thought the solution of this whole question would be that the State would finally pay the convicts for their work, running it on State account and paying the convicts a decent wage, so that there will not be unfair competition with outside labor.

It is perfectly horrible to contemplate prisoners locked up day after day without any work, as they were in our State during the transition from contract labor to this State system. It is horrible to think of the blind or the poor who must be supported in State institutions idling away their time day after day, with nothing to think about or to do except to bewail their sad condition, in an eleemosynary institution. They want work, and ought to get it.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. PAYNE. I should like about three minutes more.

Mr. MANN. I have given the gentleman all of my time.

Mr. LEWIS of Maryland. I give the gentleman three minutes more.

The CHAIRMAN. The gentleman from New York is recognized for three minutes.

Mr. PAYNE. If this system should be put in practice, it would take away undue competition with outside labor in the first place, because the men would be paid. You might make an allowance for their board while they were in prison and charge that to them, and credit up the balance to the convict unless he had a family. If he has a family, then give it to the family for their support. Sometimes it is a hardship in the enforcement of the criminal law, to feel that when you shut a man up his family are not only suffering in their feelings but suffering for the lack of daily food and proper shelter, while the man who ought to support them is shut up in prison. Let the money that he earns go as far as it will toward their support; or, if he has no family, there will be a fund for him that he can look forward to at the end of his term; and if there is a germ of manhood left in him, if there is a germ of honesty left in him, if there is any ambition left to make something of himself in life, he has something to look forward to that will help him out. I know of many cases under the old system where the contractor accumulated this fund for the convict, where the convict himself went out into the world, after his term expired, and with his ambition kindled because he had had a chance to do something for himself by honest labor, he went to work and made a good citizen of himself.

Some of these men discharged from prisons have remained in my own city and been employed in shops where they need skilled mechanics and have earned a good wage. Some of them, I know, have married and raised families and become good citizens. I do not know but that there is that reform now, but I have not seen much of it when there is no ambition for a convict to earn something while in prison. [Applause.]

Mr. LEWIS of Maryland. Mr. Chairman, I yield to the gentleman from Illinois [Mr. BALTZ].

Mr. BALTZ. Mr. Chairman, there is no question as to the purpose of this bill. It seeks to remedy a situation which should never have existed; and if it becomes law, will, in my opinion, result beneficially in many respects. Not only does it plainly and unequivocally prevent the importation of articles made abroad by convict labor or articles into which convict labor has entered, but it also prevents the importation of any material convict made which may be used to form a part or portion of any article manufactured or completed in this country.

In other words, if Congress enacts this bill and it is written into our statutes, our workmen and our manufacturers will not be compelled to enter into competition with the labor of foreign convicts; neither will there be danger from that source of contamination by disease from prisons, many of which are not institutions which, to say the least, are sanitariums as to health or spotless as to cleanliness.

We of this House have just indorsed legislation forbidding interstate transportation of convict-made merchandise. This action was taken in response to protests from legitimate producers, whose interests were being injured by the products of the prisons, where at least 150,000 men and women labor without compensation, with thousands of short-term prisoners adding their assistance for a greater or lesser length of time.

We did not give heed to the argument of the philanthropist or the reformer that by doing this we might add to the misery and already unsatisfactory conditions surrounding the inmates of our penal institutions; that we would thus endanger their moral, physical, and mental states by reducing their hours of labor to almost nothing, and thus increasing the hours of their confinement in small and insanitary cells. Perhaps all this is true; and the argument may apply until each Commonwealth abandons its idea of making its penal institutions self-supporting and provides some equally as healthy or better method of exercise for the inmates. This may, I believe, be done in various ways without infringing on the welfare of the laborer or the manufacturer who has not infracted a statute or in any way menaced society. I am a believer in proper methods of punishment for those whom the law says deserve it. I believe the question is one of the most vital in importance, including not only the method of restraint but the proper consideration of the care and encouragement of the punished and the career thereafter opening to him.

But our recent action in the matter of our home situation in this regard should prove to foreign nations that we intend to be consistent—aye, even more than consistent—so far as their prison product is concerned. Europe, I am told, has at least 2,000,000 convicts who are busily engaged earning their enforced bread and butter in penal institutions, where articles for home and foreign consumption are made. It is not just or fair that our gates should be open to the competition of a vast army of that character. If we recognize, as we have, the unfairness and injustice of the smaller competition of our own home institutions, we certainly can not close our eyes to the objects of this legislation. Under these circumstances I am one who believes this measure should be here indorsed without a dissenting voice.

Mr. LEWIS of Maryland. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has nine minutes.

Mr. LEWIS of Maryland. Mr. Chairman, with reference to the suggestion made by the gentleman from Texas [Mr. HARDY], which, I confess, does credit to his moral and sympathetic nature, I think it ought to be pointed out that the principle governing this subject is that competition should determine who should have the privilege of making and selling the goods, keeping in mind, of course, that natural and normal competition which results from action of the free forces of society. In an economic sense there is no difference whatever between the character of the product of the pauper detained or supported at the public expense and of a criminal detained and supported in the same way, however great and fundamentally important the ethical difference of the persons involved. The practical effect, therefore, of saying that pauper labor sustained at public expense might have a right to import its products would be to say that the State itself might enter into competition with the individual, when the right of free import of its goods would merely amount to a subsidy, paid at the cost of our own welfare, for such foreign States as maintain such pauper manufacturing institutions and succeeded in selling their wares in this country. I believe that is all I have to say with reference to this subject.

Mr. BARTLETT. May I ask the gentleman a question?

Mr. LEWIS of Maryland. Yes.

Mr. BARTLETT. The committee has not offered any amendment in which they propose to define the words "pauper labor."

Mr. LEWIS of Maryland. There is a definition in the bill proposed, and the committee thought that adequate.

Mr. BARTLETT. I have been looking for it.

Mr. BRYAN. It is on page 6, line 3.

Mr. LEWIS of Maryland. It reads:

SEC. 9. That the term "pauper" as used in this act shall be limited to those persons who are held or confined in eleemosynary institutions at the public expense in whole or in part.

Mr. BARTLETT. We frequently hear the term applied in a different way to some other subjects under discussion.

Mr. LEWIS of Maryland. And in a way that would involve all labor in any other country. Of course the act does not mean to apply the term in any such way. Now, Mr. Chairman, all time having been exhausted, I ask that the bill be read.

The CHAIRMAN. The Clerk will read the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That all goods, wares, and merchandise produced in whole or in part by convict, pauper, or prison labor, or in the production of which foreign convict, pauper, or prison labor has been employed, either directly or indirectly, in any manner and for any purpose, or in the production or manufacture of which has been used any material prepared, manipulated, or assembled by convict, pauper, or prison labor, and all materials, wholly or partly finished articles, goods, wares, or merchandise, or wrappers, or containers, or attachments of merchandise, separately, or a part of any goods, wares, and merchandise, all the foregoing upon which, or any part of which, has been employed in any manner the labor of foreign convicts, or of prisoners confined in any jail, penal institution, workhouse, or other place of restraint, detention, or occupation permitted, established, and set aside to be utilized by or for criminals or detained persons in any foreign country, and whether the same be the product of the field, the quarry, or manufacturing establishment, any part of which, or the materials entering which, have been produced, treated, manipulated, or manufactured at any State, in whole or in part, by convict, pauper, or prison labor, or by detained persons in a foreign country, shall not be entitled to entry at any of the ports of the United States, and the importation thereof is hereby prohibited; and all such materials, goods, wares, and merchandise in any manner the product, in whole or in part, of convict, pauper, or prison labor, or of persons under restraint, whose service is hired, leased, contracted for, or given with or without compensation and utilized outside of prisons, or in places of restraint or employment, whether in the field, quarry, the forest, factory, yard, or inclosure wherein such prison labor and free labor are utilized, such products, including all the products hereinbefore described, shall be deemed and held to be convict or prison produced materials and goods, and the importation thereof is hereby prohibited.

The Clerk read the following committee amendment:

Page 1, line 5, after the word "which," strike out the word "foreign."

The amendment was agreed to.

The Clerk read the following committee amendment:

Page 2, line 6, strike out the word "foreign."

The committee amendment was agreed to.

The Clerk read the following committee amendment:

Page 2, line 17, after the word "prohibited," strike out the balance of the paragraph.

Mr. MANN. Mr. Chairman, I would like to inquire of the gentleman from Maryland what is the object of striking out the latter part of this section?

Mr. LEWIS of Maryland. The committee on consideration felt that the matter stricken out added nothing to the prohibitory efficacy of the preceding part of the section, and might confuse the clarity of the proposition as a whole.

Mr. MANN. Is not there a distinction between that part of the section and the preceding part of the section?

Mr. LEWIS of Maryland. We did not find that there was a distinction of such value that the committee thought it should be retained. The committee was unanimous in rejecting that portion of the section.

Mr. MANN. Does the first part of the section which remains in cover prison labor which is utilized outside of the place of confinement?

Mr. LEWIS of Maryland. Oh, yes.

Mr. MANN. Where?

Mr. LEWIS of Maryland. Take lines 4, 5, and 6, on page 2, which read:

Or a part of any goods, wares, and merchandise, all the foregoing upon which, or any part of which, has been employed in any manner the labor of convicts, or of prisoners confined in any jail, penal institution, workhouse, or other place of restraint, detention, or occupation permitted, established, and set aside to be utilized by or for criminals or detained persons in any foreign country, etc.

Mr. MANN. I notice it provides:

Prisoners confined in any jail, penal institution, workhouse, or other place of restraint, detention, or occupation permitted, established, and set aside to be utilized by or for criminals or detained persons in any foreign country, etc.

While the part stricken out provides:

Whose service is hired, leased, contracted for, or given with or without compensation and utilized outside of prisons.

I do not find that the latter part is covered by the first part.

Mr. LEWIS of Maryland. If the gentleman will look at the first lines of the section, which read:

That all goods, wares, and merchandise produced in whole or in part by convict, pauper, or prison labor.

Mr. MANN. Oh, yes; that is descriptive of a certain class. Then follows the limitation that—

all the foregoing upon which, or any part of which, has been employed in any manner the labor of convicts, or of prisoners confined in any jail, penal institution, workhouse, or other place of restraint, detention, or occupation permitted, established, and set aside to be utilized by or for criminals or detained persons in any foreign country.

If there is any question about it—and it seems to me there is, and the author of the bill evidently thought there was—I think it should be left in. The author of the bill endeavored to cover that and the committee endeavors to strike it out.

Mr. LEWIS of Maryland. Mr. Chairman, the committee has no doubt that the bill as reported amply covers all products of convict labor. With reference to the place of detention, of course the convict is always under detention; but the act describes his product independent of the question of his domicile, and the portion stricken out we thought was a mere repetition that would confuse the clearness of the proposition rather than help it, and might be used to delimit the totality of the proposition rather than to increase it.

Mr. HULINGS. Mr. Chairman, will the gentleman yield?

Mr. LEWIS of Maryland. Yes.

Mr. HULINGS. It seems to me that very question is in debate here. If the bill should pass with this amendment, that might be debated in the court. What, then, would be the objection to eliminating all questions of that sort, to make it certain and sure?

Mr. LEWIS of Maryland. I think the retention of the rejected clause would tend to produce uncertainty rather than reduce it.

Mr. WILLIS. Mr. Chairman, will the gentleman yield?

Mr. LEWIS of Maryland. Yes.

Mr. WILLIS. I want to call the attention of the gentleman to the fact that in the part stricken out the definition is given of convict-made goods. No such definition is given in the part that remains, and I suggest to the gentleman that it might very seriously weaken the effect of this very meritorious measure if the committee strikes that out. It seems to me safer to leave that language in.

Mr. LEWIS of Maryland. I think it is not customary to include attempts at definition of convict-made goods in such bills. At least, if such attempts have been made, I am not familiar with them. I believe it better to leave that to the future and to judicial interpretation than to attempt a definition here which necessarily would be exclusive, and therefore might except from operation important particulars.

Mr. STAFFORD. Mr. Chairman, I rise to call the attention of the committee, and I hope of the country, to the fact that the principle suggested by the gentleman from New York [Mr. PAYNE] of employing convicts at a living wage and paying that compensation to the wife or dependent relative, has found expression in concrete legislation in the State of Wisconsin. Only last year our State legislature authorized the State board of control to pay to those confined in our reformatories and prisons a wage for the benefit of the prisoner or his wife or dependent relative. That recognizes the advanced idea that the products of the prisoner while confined should be utilized for his benefit or the benefit of his family. The old idea that he should be punished by incarceration without work and later on with work for the benefit of the State that imprisoned him is fast disappearing from the public mind, and this newer idea that if a person is so unfortunate as to commit a crime, punishment should not be meted out upon his family or dependent relatives is coming into vogue. The family must necessarily be supported by the State or the municipality; and if such is the fact, where can there be any objection to allowing the fruits of the labor of the unfortunate who is confined in prison to be doled out to the more unfortunate who remain at home and who are naturally dependent on him? I hope this newer idea which has so recently found expression on the statute books of my State will spread, and as we are considering this general subject at the present time, it is my expectant wish and hope that legislators in other States may take this idea to themselves and adopt the Wisconsin idea, so far as this remedial legislation is concerned.

Mr. WILLIS. Mr. Chairman, I wish to be heard briefly on this proposed committee amendment. I am in entire sympathy with this bill. I think the importation of convict-made and prison-made goods should be prohibited, and it seems to me that as the bill is drawn it accomplishes that purpose, but I doubt very much whether it will accomplish that purpose if we adopt this committee amendment. The committtee amendment to which I am opposed proposes to strike out the following important language:

And all such materials, goods, wares, and merchandise in any manner the product, in whole or in part, of convict, pauper, or prison labor, or of persons under restraint, whose service is hired, leased, contracted for, or given with or without compensation and utilized outside of prisons, or in places of restraint or employment, whether in the field, quarry, the forest, factory, yard, or inclosure wherein such prison labor and free labor are utilized, such products, including all the products hereinbefore described, shall be deemed and held to be convict or prison produced materials and goods, and the importation thereof is hereby prohibited.

I think the committee was certainly sincere in its action in recommending the adoption of the amendment, but it seems to me on further consideration it must admit it would be unsafe to adopt it, because, as the gentleman from Illinois [Mr. MANN] has pointed out, the language proposed to be stricken out in the committee amendment refers to the production of convict-made goods not only in prisons, but outside of prisons. As I read the language which is left if this amendment should be adopted, there is nothing that completely covers that case.

Furthermore, as I suggested to the chairman of the committee a few moments ago, the language which is proposed to be stricken out by this amendment defines convict-made goods. If you adopt the committee amendment, then you have left in the bill no definition of convict-made goods. I think there ought to be in the bill such a definition. Therefore, it seems to me, in view of those two considerations, first, that if you adopt the amendment proposed by the committee there is nothing which provides any definite language for goods which shall be made by convict labor outside of penal and reformatory institutions; and, second, because if you adopt the committee amendment you have stricken from the bill the very language and the only language which undertakes to define convict-made goods—it seems to me for these two reasons that the amendment should be rejected. It seems to me it is very much safer to leave the bill in the form in which it was introduced. I hope this committee amendment will be voted down. I am strongly in favor of the bill, and that is why I want the amendment voted down, because it will preserve, in my judgment, the clearness and the strength of the measure.

Mr. LEWIS of Maryland. Mr. Chairman, I appreciate, of course, the sincerity of gentlemen who differ with the committee upon this matter, but I can not appreciate the force or logic of their objection in view of the portion of the section that is retained, namely:

That all goods, wares, and merchandise produced in whole or in part by convict, pauper, or prison labor, or in the production of which convict, pauper, or prison labor has been employed, either directly or indirectly, in any manner and for any purpose——

Mr. STAFFORD. Will the gentleman yield for an interruption in that particular?

Mr. LEWIS of Maryland. Yes.

Mr. STAFFORD. Though the gentleman has read the general language, which I agree with him would exclude all articles which were manufactured in any way, directly or indirectly, by convict, pauper, or prison labor, nevertheless he fails to appreciate the fact, as pointed out by the gentleman from Illinois [Mr. MANN] and the gentleman from Ohio [Mr. WILLIS], that the clause following, which begins in line 4, page 2, is a restrictive clause, and is as follows:

all the foregoing upon which, or any part of which, has been employed in any manner the labor of convicts, or of prisoners confined in any jail, penal institution, workhouse, or other place of restraint, detention, or occupation permitted—

That is a restrictive clause that limits the effect of the general phraseology in the first part. The gentleman's whole bill will only be applicable to the persons who are found within the restrictive phrase of the section here which I have just pointed out.

Mr. LEWIS of Maryland. I think the gentleman is clearly in error in his interpretation of the sentence from which he has read. It says:

All the foregoing upon which, or any part of which, has been employed in any manner the labor of convicts.

And then comes a comma. There we have a completed thought. The bill could stop there, or it might go on——

Mr. STAFFORD. But it does not stop.

Mr. LEWIS of Maryland. I understand, but let me say to the gentleman it is evident that the lawyer's hand has been at work in the preparation of this bill. You have the prohibition stated not once but you have it stated seven or eight times in the section as it now stands. Lawyers take the precaution in filing their declarations to state the proposition in a variety of ways in order to insure the total meaning. That is done here ad nauseam, and I call the gentleman's attention to the expression here.

Or of prisoners confined in any jail, penal institution, workhouse, or other place of restraint.

If they were working in a mine that would be a place of restraint temporarily.

Mr. STAFFORD. We are trying to reach those cases where convict labor is farmed out.

Mr. LEWIS of Maryland. It goes on further to say:

Or other place of restraint, detention, or occupation permitted, established, and set aside to be utilized by or for criminals or detained persons in any foreign country.

Now, it is not a matter of great moment, I confess, as to whether the balance of this matter is treated as it was treated by the committee or not, and I make no urgent plea to the House in reference to the action of the committee, but it seems to me experience shows that when you have said enough in a statute it is wise to say no more, and having made that suggestion I close the discussion so far as I am concerned.

The CHAIRMAN. The question is on the committee amendment.

The question was taken, and the committee amendment was rejected.

Mr. KELLEY of Michigan. Mr. Chairman, I offer an amendment to this section.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, line 4, after the word "part," insert the words "by children under the age of 14 years or."

Mr. KELLEY of Michigan. Mr. Chairman, if the amendment which I have offered is adopted, the section will read——

Mr. BARTLETT. Mr. Chairman, I make the point of order upon that amendment.

SEVERAL MEMBERS. Too late.

Mr. MADDEN. Mr. Chairman, I make the point of order that the gentleman's point of order comes too late.

Mr. BARTLETT. The gentleman from Illinois does not decide that; that is for the Chair to determine. I am making the point of order.

Mr. MADDEN. And I make the point of order it is too late.

Mr. BARTLETT. I have the right to make my point of order without objection, and I ask the Chair that I may be permitted to make it.

Mr. KELLEY of Michigan. Mr. Chairman, I had started an explanation of my amendment.

The CHAIRMAN. The gentleman was discussing the amendment.

Mr. BARTLETT. But I was trying to see what the amendment was, Mr. Chairman, and it is not germane to this bill.

Mr. BRYAN. Will the gentleman insist on his point of order against a matter cutting out child labor?

Mr. BARTLETT. Mr. Chairman, I might be pardoned, if I may be permitted to say so, if I do not reply to any such demagogic question. Mr. Chairman, I attempted to get upon my feet as soon as I realized the effect of the amendment. I was listening to the amendment, and immediately the amendment was read I attempted to rise to make the point of order that the gentleman's amendment was not germane.

The CHAIRMAN. The gentleman ought to have the right to make the point of order if he rose in time.

Mr. MADDEN. I insist, Mr. Chairman, that the point of order comes too late.

The CHAIRMAN. The Chair stated, in view of the statement of the gentleman from Georgia, that he was trying to get on his feet and was a little slow in doing so, that under those circumstances the Chair would hold that the gentleman has the right to offer the point of order.

Mr. MADDEN. It is the uniform practice of the House, Mr. Chairman.

The CHAIRMAN. That is true. The gentleman from Illinois is right.

Mr. MADDEN. When the discussion of a subject begins the point of order is not allowed to stand.

The CHAIRMAN. The gentleman from Georgia [Mr. BARTLETT] states that he was endeavoring to get on his feet to obtain recognition.

Mr. BARTLETT. I am subject to all the rules of the House, of course. I realize that. I heard the amendment, but I could not realize what it was until the Clerk had read it, and the gentleman from Michigan proceeded immediately.

The CHAIRMAN. The Chair thinks——

Mr. MADDEN. Mr. Chairman, will the Chair defer to me for a moment?

The CHAIRMAN. Certainly.

Mr. BARTLETT. I hope the Chair will indulge me.

Mr. MADDEN. I would like to ask for the production of the Reporter's notes, in order to see whether the gentleman from Michigan [Mr. KELLEY] had begun to discuss the matter or not.

The CHAIRMAN. The Chair decided that the gentleman from Michigan had.

Mr. BARTLETT. I hope the gentleman from Illinois [Mr. MADDEN] will be permitted to have proof of this.

The CHAIRMAN. The Chair will state this: That the gentleman from Georgia [Mr. BARTLETT] made his point of order after the gentleman from Michigan [Mr. KELLEY] had said two or three words.

Mr. BARTLETT. Two or three words; yes.

The CHAIRMAN. The gentleman from Georgia then stated that he was trying to get on his feet, and did so, to make the point of order, and made it just as soon as he possibly could.

Mr. BARTLETT. Just as soon as I understood what the amendment was.

The CHAIRMAN. The Chair begs to say that he would hold that the gentleman from Georgia was in his rights in making the point of order.

Mr. MADDEN. Of course there is no doubt whatever that the gentleman from Georgia was endeavoring to make his point of order. Nobody denies that.

The CHAIRMAN. And then the gentleman from Illinois and somebody else followed too late.

Mr. BARTLETT. Mr. Chairman, I am perfectly willing the Chair should rule. I did try to make the point of order.

Mr. MANN. Discuss the point of order.

The CHAIRMAN. The gentleman will discuss the point of order.

Mr. BARTLETT. Mr. Chairman, I make the point of order that this is a bill to prevent the importation and entry of goods, wares, merchandise, and so forth, made by convict labor or prison labor, and that the proposition of the gentleman from Michigan is to amend it by including, as I gather it—of course I can not repeat the amendment from memory, and I would ask that the Chair have the amendment read again——

Mr. STAFFORD. "Children under 14 years of age," following the word "part," in line 4.

Mr. BARTLETT. Mr. Chairman, I say that is not germane to this bill. I have not the rules before me, nor the authorities, but I submit, Mr. Chairman, that with a proposition to prohibit altogether convict or pauper made goods, or goods made in whole or in part by convicts, the people in the workhouses, or who come under the definition of paupers, as provided by this bill, in section 9, a proposition to go further and make the terms of the bill apply to goods made in whole or in part by children under 14 years of age, or any age, is not germane. That sort of legislation upon this kind of a bill is not germane to it. That is the point of order I make.

Mr. KELLEY of Michigan. Mr. Chairman, the general purpose of this bil undoubtedly is to prevent the importation of goods into this country which are made by cheap labor. That is the only excuse of which I know for the passage of the bill at all. It is aimed at the products of cheap labor, which should not come into competition with the labor of the United States. Therefore any proposition which has the same purpose in view, namely, the prevention of the importation into this country of goods made by cheap labor, even cheaper than convict labor, is in general covered by the purposes of this bill.

Now, it is a fact, Mr. Chairman, that the cheapest labor in the world is labor performed by children under 14 years of age in foreign countries. I want to call the attention of the Chair in support of this proposition to the fact that in Japan there are 61,000 children employed in factories who are under 14 years of age, and the wages that those children are receiving will average only 7 cents a day. Now, Mr. Chairman, that is a cheaper labor than any convict labor in the world, and if the purpose of the bill and of the gentleman who introduced it is to restrict the importation of goods made by cheap labor, then the amendment which I offer comes fully within the scope and is in perfect harmony with the purpose of the bill.

And the same thing is true of India. There are 50,000 children in the factories of India, and they are working there at 5 cents a day, which is cheaper labor than any convict labor on earth. This being the case, why can not we amend this bill in such a way as will exclude the products of the cheap labor of the earth of all lines in the interest of the American workingmen?

I submit, Mr. Chairman, my amendment is germane, and that the point of order is not well taken.

Mr. BARTLETT. Mr. Chairman, I refer to Rule XVI, paragraph 7, of the House Manual and Digest, which says:

* * * and no motion or proposition on a subject different from that under consideration shall be admitted under color of amendment.

This rule was not one of general parliamentary law, but was adopted in 1789 and amended in 1822 by the Congress.

Now, there are quite a number of authorities on that subject. I refer to one on the bottom of the page, which says:

One individual proposition may not be amended by another individual proposition, even though the two belong to the same class. Thus the following are not germane: To a bill proposing the admission of one Territory into the Union, an amendment for admission of another Territory; to a bill for the relief of one individual, an amendment proposing similar relief for another.

This rule of germaneness is not one of general parliamentary law. It is one that has been adopted by Congress since the time to which I have called attention.

Now, just one word, Mr. Chairman. As long as my friend from Michigan [Mr. KELLEY] has digressed, I hope I will be pardoned for not further arguing the point of order, by saying this: That no one, Mr. Chairman, is more in favor of proper regulation by law of child labor than myself. Under the guidance of the Democratic Party and the head of the Democratic Party in my State, to which particular faction of the party I belong, we have passed laws along that line, both proper and humane, in accordance with the spirit of the age.

But this bill, Mr. Chairman, proposes to exclude goods made by convict labor and prevent the importation of goods made by those who are held in custody by their government, who are compelled to work to produce goods or wares or merchandise while they are under restraint for crime or because they are in the workhouse by reason of poverty.

The CHAIRMAN. The Chair desires to ask the gentleman from Georgia a question.

Mr. BARTLETT. Certainly.

The CHAIRMAN. Does the gentleman from Georgia understand that by this bill there is a prohibition of the importation of the products of but one class of labor?

Mr. BARTLETT. It is all in one class, but of different species.

Mr. LEWIS of Maryland. It is publicly sustained labor, in whole or in part.

Mr. BARTLETT. That is what I understand. While there may be different varieties of labor, it is of the same class.

The CHAIRMAN. What does the gentleman from Georgia say about this language?—

That all goods, wares, and merchandise produced in whole or in part by convict labor or prison labor.

Mr. BARTLETT. Well, that means the same class, Mr. Chairman, according to my construction of it.

Mr. LEWIS of Maryland. If I may interrupt——

Mr. BARTLETT. Certainly.

Mr. LEWIS of Maryland. Both are publicly sustained. The pauper in an eleemosynary institution is sustained in whole or in part by public money.

The CHAIRMAN. Does the gentleman claim that convict labor and pauper labor are not two different classes?

Mr. BARTLETT. They are different species of the same class as defined by this bill. They are both labor held in restraint by the Government, one for crime and the other in the workhouse. While it is not a crime to be poor, yet the poor are put in there by law. And section 9 of this bill defines what is meant by "pauper labor."

Mr. MADDEN. Mr. Chairman, will the gentleman yield for a question?

Mr. BARTLETT. Certainly.

Mr. MADDEN. Would the gentleman from Georgia consider a person living on 7 cents a day not a pauper?

Mr. BARTLETT. No; if they are not publicly sustained, if they are working for themselves.

Mr. MADDEN. That is true.

Mr. BARTLETT. That is what the gentleman calls the pauper labor of India and Japan when he is speaking on the tariff. But those people live upon that wage. In some portions of Japan they now have a famine and they are not able to get even 7 cents a day.

Mr. MADDEN. Would not the competition be quite as severe with so-called free labor at 7 cents a day as it would be with the so-called pauper labor that the gentleman refers to?

Mr. BARTLETT. A laborer who receives a pauper's wages from an employer is not in the same class as the laborer who receives no wages at all and whose actions are restrained by law and who works not for himself, but for the Government.

Mr. MADDEN. Might we not write a new definition of what "pauper labor" means?

Mr. BARTLETT. You gentlemen have a definition over there that has been repeated for the last 50 years when the tariff bill has been up.

Mr. GRAHAM of Illinois. If my friend will permit, is not the true definition of convicts and paupers those who labor under duress? Those who work voluntarily, no matter at what low wage, are not in the same class, because they are not under duress and are working voluntarily. Are not the two classes clearly differentiated in that way?

Mr. BARTLETT. Yes. I said, Mr. Chairman, that the bill itself defined what pauper labor is. I called attention to it, to section 9 of this bill.

Mr. MADDEN. That is where I wanted to speak.

Mr. BARTLETT. The gentleman from Maryland [Mr. LEWIS], before the reading of the bill began, in answer to my inquiry of him, called my attention to the fact that section 9 defined what the words "pauper labor" meant in the bill. Now I will yield to the gentleman from Illinois.

Mr. MADDEN. It was right there that I wished to ask the gentleman from Georgia a question. Now, since the bill has defined what pauper labor is, is it not competent for the House to broaden the definition given by the committee?

Mr. BARTLETT. No; I do not think it is. Are you willing to declare that children who are under 14 years of age fall under the category of pauper labor? I am not willing to go on record as contending that children in any European country under 14 years old, who may get as much wages as anybody not pauper laborers, shall be put in the same class as paupers. The gentleman does not want that to go out, I apprehend.

Mr. MADDEN. If we assume the right to define what a pauper is, we ought to have the right to broaden the distinction as far as we choose.

Mr. BARTLETT. I was in a foreign country myself some time ago and some laborers—the girls, probably, under 14 years of age—were receiving very handsome wages and could in no sense be called paupers. But the pauper under this bill, Mr. Chairman, a pauper laborer, is one who is confined or held in some public institution, one who works not for a wage, however great or small, but for no wage at all; whose labor, whose work, is for the public.

That is all I desire to say, Mr. Chairman.

Mr. MANN. Mr. Chairman, the rule, as the Chair is well aware, is well settled. Where a bill relates to one particular thing you can not amend it by adding another particular thing, or you can not amend it by adding a general class.

The gentleman from Georgia, I think, cited a case of that sort, where a bill related to the admission of one Territory and an amendment was offered to add another Territory. But the gentleman did not refer to the fact that where a bill proposes to admit two Territories you could add a third. The rule is just as well settled one way as the other.

Now here is a bill that is not confined to one class but to several classes, and there is a good deal closer connection between pauper labor and child labor than there is between prison labor and pauper labor.

Mr. BARTLETT. May I call the Chair's attention, in the gentleman's time, to a reference which I omitted to read?

Mr. MANN. Certainly; I yield.

Mr. BARTLETT. I read:

Thus, the following are not germane:
"* * * to a provision for extermination of the cotton-boll weevil, an amendment including the gypsy moth; to a provision for a clerk for one committee, an amendment for a clerk to another committee; to a bill prohibiting transportation of messages relative to dealing in cotton futures, an amendment adding wheat, corn"—

And so forth.

Lastly I refer to the ruling two years ago of Speaker CLARK wherein he held that to a prohibition against dealing in cotton futures an amendment prohibiting the dealing in futures in grain was not in order. I thank the gentleman for yielding to me.

Mr. MANN. That is right. I remember the decision of Speaker CLARK on that subject very well, and he said if the bill had covered two items you could add something more if you wanted to; and Speaker CLARK, in making the ruling that you could not add grain to a bill relating to cotton futures said that to a bill relating to wheat and corn you could add other articles specifically.

That is the case here. This bill does not relate to one class. It relates to several classes, and under the rule it is always construed that where you have a bill relating to several classes you can add an additional class. If this bill were confined solely to convict-made goods, the amendment would not be in order to add pauper-made goods.

But the bill itself, covering both convict-made goods and pauper-made goods, is open to the addition of another class. There is no great distinction between the class that is sought to be added and one of the classes that is in this bill. If the Chair holds that pauper-made goods are entirely distinct and separate from child-labor goods made by children under 14 years of age, the Chair will make a very strained construction of the facts, in my opinion.

Mr. LEWIS of Maryland. Mr. Chairman, in my judgment this amendment is clearly not germane to the substance and logic of the subject with which we are dealing. As suggested by the gentleman from Illinois [Mr. GRAHAM] a few moments ago, that subject is a person under duress, a person in a state of detention, a person who does not make his own labor contracts or have a voice in determining the wage he shall receive, but a prisoner in a penitentiary or a pauper in an eleemosynary, publicly sustained institution, who has his wages determined for him, and who must accept and who must work. You have, therefore, a person under duress. Now, the products of such persons is likely to disturb and thwart the fair operation of the laws of competition. It was not the policy of the Underwood law, a section of which is being amended by the proposed bill, to stop all competition, but it was its intention to promote competition. It picked out this one species of subjects and brought upon it an absolute prohibition, because this particular subject, namely, the slave of the law, who could not make his own contract and whose wages therefore do not represent a normal cost element in manufacture, is picked out and put under the ban of prohibition.

Mr. Chairman, there is another reason that goes to the merits and the good sense of this rule as to germaneness. The Committee on Labor is now considering bills on the subject of child labor and of child labor under 14 years of age. It is a very complex subject, and it will require the best thought of the best men in this country to secure proper treatment and solution.

Mr. MADDEN. Are not those men here?

Mr. LEWIS of Maryland. They are here, but they are not adequate to treat that situation to-day unless they feel very differently about it than I do, and it has received a good deal of my thought and my very deepest interest.

Now, sirs, what would be the effect of a prohibition like this upon the commerce of this country? I am speaking on the question of its germaneness now. The proponents of this proposition must accept one or the other horn of the dilemma. They must state that foreign-made goods are to a degree made by children under 14 years of age, or they must say that they are not. If they are not made in part or in whole by children under 14 years of age, then this amendment would be utterly nugatory and without effect, because there would be nothing for it to act upon. On the other hand, if, as I suspect may be true, the manufactured goods imported into this country, the commerce of other countries with our own, are partly or in whole made by the labor of children under 14 years of age, the enactment of this amendment would culminate in a complete prohibition of such foreign trade. Now, I want to ask the members of this committee if they are seriously ready this afternoon, on so small preparation, to ask that this Congress pass an enactment which will completely prohibit the importation of foreign goods? The subject of child labor is wholly distinct from the kind we are dealing with here, because, either in contemplation of law or as a matter of fact, child labor is free labor, and the price paid for it is made according to the elements and the laws of competition which obtain.

Mr. BRYAN rose.

The CHAIRMAN. The Chair is ready to rule.

Mr. GRAHAM of Illinois. Mr. Chairman, if the Chair has his mind made up I doubt if I could alter his determination.

The CHAIRMAN. The Chair would be glad to hear the gentleman.

Mr. GRAHAM of Illinois. Mr. Chairman, it seems to me very clear that the line of demarcation between the two thoughts is wide and deep; that child labor under 14, if it be detained, is included in the bill; that if it is not detained labor, it should not be included in the bill; that the line of cleavage is whether the labor is voluntary or involuntary. If it is the labor of anyone who is confined by virtue of the judgment of a court, or by any proceeding of that sort, so that he has not the right to go about freely or to contract for himself, his labor is included in this measure; but if other labor than that is sought to be included, then a new departure is taken that to my mind is clearly not germane to the thought in this bill.

Mr. WILLIS. Will the gentleman yield?

Mr. GRAHAM of Illinois. In just a moment, after I have completed the thought in my mind. Then I will yield. It is said that the labor of children in India or in China and some other countries is cheap labor. I deny that proposition. That would raise an entirely different question for discussion here. A very great industrial lord in America, Mr. Carnegie, has told us, and I think with much truth, that the highest paid labor is the cheapest labor; but my friends across the aisle confuse a low day wage with cheap labor. It is not. The dearest labor is the labor that gets the low daily wage. Those two ideas can not be confounded in this or any other measure or in the discussion of it. Now I will yield to my friend from Ohio.

Mr. WILLIS. I understand the gentleman's argument to be that this bill applies only to that labor which is under duress.

Mr. GRAHAM of Illinois. Not under duress, but under legal duress.

Mr. WILLIS. Then I invite his attention to the provisions relative to pauper labor. Does that come under the gentleman's interpretation?

Mr. FOWLER. Certainly.

Mr. GRAHAM of Illinois. So far as my knowledge goes the pauper is never confined to a public institution without some sort of proceeding, and if he leaves that place those who have control of it or who have the custody of him have the right to follow him and retake him.

Mr. MANN. It does not take a legal proceeding for a man to get into a poorhouse.

Mr. GRAHAM of Illinois. It is not necessarily a judicial proceeding in a courthouse, but it is a legal proceeding of some sort. I know of no way by which one could be sent to a poorhouse in our State without some sort of a proceeding under the law.

Mr. MANN. There are ways by which a man can get in by going and asking to get in.

Mr. GRAHAM of Illinois. Oh, yes; a man could break in like a burglar.

Mr. MANN. No; go there and be admitted.

Mr. BRYAN. Section 9 of this bill defines "pauper." It says:

SEC. 9. That the term "pauper," as used in this act, shall be limited to those persons who are held or confined in eleemosynary institutions at the public expense in whole or in part.

Mr. GRAHAM of Illinois. Yes.

Mr. BRYAN. Now, some of the very best citizens of this country are old soldiers, and we all respect and admire them. But is not a soldiers' home an eleemosynary institution, and are not the soldiers who go into those homes kept there in part at public expense, and would the gentleman say that this term would not include the output of a soldiers' home in a foreign country, if there were such a thing?

Mr. GRAHAM of Illinois. Does the gentleman himself classify the soldiers' home with the poorhouse—the home of paupers?

Mr. BRYAN. Most emphatically I do not classify them with the poorhouse, but I do say that they are eleemosynary institutions.

Mr. GRAHAM of Illinois. Under this definition?

Mr. BRYAN. I say that they are eleemosynary institutions.

Mr. GRAHAM of Illinois. Is the gentleman at all afraid that goods will be manufactured in these soldiers' homes which will in any way interfere with goods made in this country?

Mr. BRYAN. I am not afraid of that happening in this country. It might happen in a foreign country, and this only refers to foreign countries.

Mr. GRAHAM of Illinois. Does the gentleman know that there are eleemosynary institutions in other countries such as he refers to?

Mr. BRYAN. There are soldiers' homes in all countries.

Mr. GRAHAM of Illinois. Does the gentleman speak with knowledge? I am not inclined to agree with him.

Mr. BRYAN. I have no doubt about there being soldiers' homes in all the lands of the earth.

Mr. GRAHAM of Illinois. I have no knowledge of it.

Mr. BRYAN. There are plenty in Canada.

Mr. GRAHAM of Illinois. I did not know they had soldiers' homes in Canada.

Mr. BRYAN. The gentleman has not answered my question as to its including soldiers' homes.

Mr. GRAHAM of Illinois. If any foreign countries have soldiers' homes which are eleemosynary institutions and manufacture goods, why not exclude them? They would be excluded under the terms of the bill, and I see nothing wrong in that. Does the gentleman say that he would have them brought in?

Mr. BRYAN. The gentleman will admit that the bill does not include only those who are under restraint or under arrest or in prison, but may include those who are in eleemosynary institutions.

Mr. GRAHAM of Illinois. If there are eleemosynary institutions where they are compelled to remain under legal duress, I would exclude them.

Mr. BRYAN. Well, let us take the blind, not under restraint, but they are there as the wards of the State, where the State would be very glad to release them at any time. That would be including the blind, and the cripple, and the lame, and the halt, and all.

Mr. GRAHAM of Illinois. The gentleman is taking up too much of my time. If they are detained by virtue of any law, why not exclude products of all labor of that kind? I see nothing wrong in it.

Mr. HOWARD. Mr. Chairman, for the sake of orderly parliamentary procedure, I would like to make an observation or two. So far as I am personally concerned, I shall not vote for this amendment on account of the difficulty of dealing intelligently with so grave a question in this manner, as has been so clearly stated by the chairman of the Committee on Labor. But I do think, Mr. Chairman, that this amendment is germane, and my authority for so stating to the Chair is this—it seems to me that it would be a parallel case to the one that I will state to the Chair:

To a resolution embodying two distinct phases of international relationship an amendment embodying a third is germane.

They are seeking by this bill, as I understand it—and that is why I am going to vote for it—to restrain certain classes of labor from importing goods in competition with our goods manufactured by free labor. One class are those legally restrained by the State, and the other are restrained by eleemosynary institutions, and the third one the gentleman from Michigan [Mr. KELLEY] wants restrained are under the restraint of their parents. So all three classes are under restraint and all three classes are producers of cheap labor, and his amendment seeks to keep out the class of child labor which manufacture goods by children under 14 years of age, this being in conformity with the real intent of the law as to the other classes mentioned in the original bill. Therefore I think it is perfectly germane, and I think the point of order should not be sustained.

Mr. STAFFORD. Mr. Chairman, if the Chair will indulge me one minute. The title to this bill, though not an absolute basis for the construction as to its purpose, states there are three classes of goods to be prohibited—convict, pauper, and detained. If we take the first section of the bill, we find there also three classes to which the bill refers—convict, pauper, and prison-made goods. Now, if this bill relates in its general provisions, as embodied in section 1 and as confirmed by the title to the subjects stated there, why naturally the amendment offered by the gentleman from Michigan is germane and in order. There is no restriction in the bill limiting the character of pauper-made goods; that is for the bill to determine, and section 7 in nowise restricts the scope of the bill, but adds to it.

Clearly on the face of the bill in section 1 this refers to three classes—convict, pauper, and prison labor—without any idea of whether it is detained or not. It must follow that goods produced by children under 14 years of age is an absolutely germane amendment.

The CHAIRMAN. The Chair thinks that in this bill the committee enumerated the class of persons whose labor was to be restricted from entry into the United States, and under the rule which has been cited we have in this bill already convict and pauper labor, making two classes, and the Chair thinks it is germane to add another, and therefore overrules the point of order.

Mr. KELLEY of Michigan. Mr. Chairman, in support of this amendment I desire to call attention further to the fact that there are employed in Great Britain in the textile industry alone 37,000 children under the age of 14 years; that there are about an equal number in France; that there are in the neighborhood of 50,000 in Germany——

Mr. HARDY. Mr. Chairman, will the gentleman yield for a question?

Mr. KELLEY of Michigan. Yes.

Mr. HARDY. Does the gentleman know how many children in this country are engaged in raising cotton and corn and other agricultural products which we sometimes export?

Mr. KELLEY of Michigan. Mr. Chairman, I will say to the gentleman from Texas that out of the 48 States in the Union, 40 do not permit the employment of children under 14 years of age in factory, mill, or mine.

Mr. HARDY. But the gentleman is aware that if we exclude the manufactured products of our country in this manner, they might exclude our farm products from their country.

Mr. KELLEY of Michigan. The chairman of the committee already says that he has a bill under consideration to take care of domestic child labor, and we can very well wait to take up that question when that bill comes before the House.

Mr. HARDY. But if foreign countries were to adopt retaliatory tactics, it would stop all commerce, for they could keep out our cotton and grain.

Mr. KELLEY of Michigan. I think if the foreign nations could afford to adopt that program, we could very well stand it also.

Mr. HARDY. But the gentleman would not like to have it imposed on this country, would he?

Mr. KELLEY of Michigan. I am in favor of shutting out the products of all labor of the children of foreign countries, when that product is produced by children under 14 years of age.

Mr. HARDY. But your manufacturers of cotton in the East and in the South——

Mr. KELLEY of Michigan. Mr. Chairman, I do not wish to yield any further time to the gentleman, because I have only five minutes, and I want to finish my statement. The gentleman can oppose this amendment in his own time.

Mr. GRAHAM of Illinois. May I call the gentleman's attention——

Mr. KELLEY of Michigan. I can not yield just now, but if I have time I will do so later on.

Mr. GRAHAM of Illinois. I just want to suggest a subject that he may discuss.

Mr. KELLEY of Michigan. I will not do so now. I will not yield for the present.

Mr. GRAHAM of Illinois. How will we ascertain——

The CHAIRMAN. The gentleman from Michigan declines to yield.

Mr. KELLEY of Michigan. Mr. Chairman, in Italy there are 60,000 children under 14 years of age who are employed in factories, and the minimum age limit in that country is 12 years. The average wage of those children is 10 cents per day. In Belgium there are 21,000 children under the age of 14 years employed in factories. The cotton spinners of Ghent at the age of 13 receive an average of 79 cents a week; at the age of 14 they receive an average of 98 cents a week. The flax spinners of Ghent at the age of 12 receive an average of 45 cents per week; at the age of 13, 89 cents per week; and at the age of 14, $1.17 per week. Further, there are hundreds of thousands of children in southern Europe, in Asia, and in other countries employed in textile and other industries who do not receive to exceed 10 cents per day. And it does seem to me that the Congress of the United States, out of consideration for the laboring people of this country, should shut out of the customhouses of the United States the commodities made by that cheap labor. [Applause on the Republican side.]

Mr. Chairman, there has been agitation in this country going on for some time to restrict child labor, and one of the most serious obstacles standing in the way of this reform has been the fact that the product of the cheap labor of all the world, the product of the cheapest child labor in the universe, comes into the United States. Let us stop this, and the first step will be taken toward the certain elimination of child labor in the United States, it seems to me. In addition to that, we ought to prohibit the importation of goods made by these children in behalf of the workingmen generally of the United States, outside and independent of the great moral and social questions involved in the employment of young children. Of course, with all of our genius, we can compete with the countries of the world if we are willing to slide down to their scale of civilization; but, Mr. Chairman, we have boasted here that this country offers a little better chance for the man who toils; that in this country he can have a better home; that he can send his children to school; that under our flag the opportunities are better for him than anywhere else; and we have been unwilling to slide down to the basis of Japan, China, and India. It is time—and this is a splendid time—for the Congress of the United States to adopt this amendment and emphasize the position of the American people upon this question. [Applause on Republican side.]

Mr. LEWIS of Maryland. Mr. Chairman, this amendment is charged with the most incredible folly, and I hope that it will not be merely the majority of the House that saves the gentleman from Michigan from the consequences of the folly he proposes. The most superficial view of the subject shows us to what utter disaster it would lead, for it amounts, so far as one can see, to complete prohibition of foreign commerce in some articles of which this country is not a producer at all and on which it depends for its daily sustenance. Take the subject of coffee, for example. I believe that is totally a foreign product.

Mr. STAFFORD. Oh, no; we raise considerable quantities in Porto Rico.

Mr. LEWIS of Maryland. Oh, I presume the State of Wisconsin raises it, too. That State seems to raise enough of everything for everybody everywhere.

Mr. STAFFORD. It is a very versatile State.

Mr. LEWIS of Maryland. If this amendment be adopted, and it develops that children under 14 years of age in the tea and coffee producing countries of the world are employed in the

production of these products, the American people would be denied the right to drink tea or coffee if this amendment prevailed. If the conditions of which the gentleman speaks prevails in other countries—that is, of child labor being generally employed under that age—then that labor enters into nearly every product that is sold from abroad into this country, much of which is absolutely essential to our physical comfort and given to the sustenance of our lives.

It is apparent, of course, in this very case how much sense the rule of germaneness has in it. Here is a proposition that appeals to the tenderest sentiments and feelings that human beings can have.

Mr. CAMPBELL. Mr. Chairman——

The CHAIRMAN. Does the gentleman yield?

Mr. LEWIS of Maryland. I do not now yield. Some one in France, I think, some time ago exclaimed, "O Liberty, what crimes are committed in thy name!" The whole people of this country would be likely to exclaim in the same way, if this amendment became law, "O Politics, what awful disasters have been brought upon us in your name!" The amendment is rationally impossible; and if it were to go into effect it would kill our commerce and the revenues of the country might be cut in half, our Navy and our Army Establishments would be paralyzed, and the operations of the Federal Government crippled, if not entirely prostrated. A subject of this kind requires not only the sincere application of general principles, but minute, careful, and painstaking study upon the part of publicists and Members of Congress, in committee and elsewhere, in order to realize proper, just, and practical legislation upon the subject of foreign child labor. Such an amendment could only prove a most serious disaster to child-labor legislation now sincerely under consideration. I do trust that the House will vote this amendment down.

Mr. TAYLOR of Colorado. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. TAYLOR of Colorado. Is an amendment to this amendment in order?

The CHAIRMAN. If it is germane.

Mr. TAYLOR of Colorado. I desire to send to the desk an amendment——

The CHAIRMAN. An amendment to the amendment?

Mr. TAYLOR of Colorado. Yes; to be added to the amendment of the gentleman from Michigan in the body of the bill itself.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Add, at the end of the amendment, the following: "That six months from and after the passage of this act no carrier of interstate commerce"——

Mr. MANN. Mr. Chairman, I make the point of order that that amendment is not germane to the amendment offered by the gentleman from Michigan.

Mr. BARTLETT. What is the amendment?

Mr. MANN. The Clerk need not read it any further for anyone to know it is not germane.

Mr. BARTLETT. I would like to hear what it is.

The CHAIRMAN. The Chair will suggest that the Clerk read the amendment as far as the point he has just read.

Mr. BARTLETT. We would like to have it read in order to ascertain whether it is germane.

Mr. MANN. You can tell at the beginning; there is no need to read back about it.

Mr. TAYLOR of Colorado. Maybe that is true as far as the gentleman from Illinois is concerned, but it is not true as far as the rest of the committee are concerned. It seems to me that is evidently germane if the amendment of the gentleman from Michigan is germane, and therefore I offer this as an amendment, and not as a substitute, but as an amendment to the amendment.

Mr. BARTLETT. Why did the gentleman make the point of order?

Mr. MANN. Because it is impossible to insert the amendment in the bill the way the gentleman suggests. It is not germane at all.

The CHAIRMAN. Does the gentleman from Georgia want to inquire any further?

Mr. BARTLETT. I do not know what it is.

The CHAIRMAN. Let the Clerk read the part of the amendment to the point where the gentleman from Illinois made the point of order. Does the gentleman from Georgia desire to be heard?

Mr. BARTLETT. No, sir; I do not.

The CHAIRMAN. The Chair sustains the point of order.

Mr. McLAUGHLIN. Mr. Chairman, I have listened with a great deal of interest to the remarks of the gentlemen opposed to the amendment, and am interested, too, in the reasons they have given in opposition to it. They suggest difficulties in the matter of foreign trade. I have wondered if there are not some domestic difficulties, if there are not conditions existing in some of the States represented by gentlemen who have so strenuously opposed that amendment. This comes to my mind in view of the fact that two gentlemen who have strenuously opposed the amendment come from a State where there has been considerable agitation lately and an unsuccessful effort made to raise the standard of labor and to protect children from unjust and harmful conditions. In my time I ask that the Clerk read an editorial which appeared in the Rocky Mountain News relative to the agitation in Georgia and the refusal of the legislature of that State to adopt remedial laws. [Applause on the Republican side.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

DISGRACE OF GEORGIA.

The State of Georgia, splendid and progressive in many ways, has one foul blot on her escutcheon. In no State in the Union is the traffic in child labor so repellent or degrading. In no other State are children of tender age, some as low as 7 years, driven to the cotton factories to work for the pittances that enable them to exist. The laws of Georgia may sanction this crime against the child, but the greater law of humanity indicts it as a system that menaces the future of American manhood and womanhood. In Georgia the protection of the American child is prostituted to the greed for the dollar.

The other day the Georgia Legislature killed a bill providing that the working age of children be raised to 14 years. In other words, that no child should be allowed to slave in the cotton mills of the State who had not reached that age. That means that there are thousands of children under that age limit whose mentalities are dwarfed and their physical strength impaired so that the profits of the Georgia cotton manufacturers may be multiplied.

Surely not a very creditable spectacle for an American Commonwealth to permit. Surely if crime there be, it must be laid at the doors of the legislature who would rob childhood of its joys and opportunities for innocent pleasure and send into the world of stress and competition the thousands to whom they deny the equal chance of fair living that our common humanity and the American Constitution decree to be the portion of every citizen.

If this be the standard of patriotism and Americanism in Georgia, the sooner it is destroyed the better for the reputation of that State. When the lives and future of children under 14 years of age are balanced with dollars it is certainly time for some sort of authoritative interference. The National Government can pass laws of far less importance than one that will protect the little ones of this Southern State from assassination of character by a body of legislators who are a disgrace to any American State.

Mr. BARTLETT. Mr. Chairman, may I inquire the date of that, and by whom it is signed?

Mr. MURDOCK. What is the politics of that paper?

The CHAIRMAN. The Chair desires to state that this seems to be from the Rocky Mountain News of date of August 21, 1913.

Mr. BARTLETT. Is it an editorial or a communication?

The CHAIRMAN. It is an editorial.

Mr. BARTLETT. Mr. Chairman, I do not know who the Rocky Mountain News editor is, but I know that either he has not quoted correctly or has made some mistake. I do not know where he gets his facts. The gentleman from Michigan, I think, remembers on another occasion, last session, I placed in the RECORD, when some suggestion was made about child labor in Georgia, some facts on that subject, and I think this is the third time I have probably been called upon to do it. The gentleman from Michigan will remember I called his attention to it.

Mr. KELLEY of Michigan. I did not send this editorial to the desk.

Mr. BARTLETT. I thought the gentleman did.

Mr. KELLEY of Michigan. I did not send that editorial to the desk.

Mr. BARTLETT. I thought you did. [Laughter.] My good friend from Michigan [Mr. McLAUGHLIN] ought to be sure that the statements in the editorial which he presents are true before he vouches for it.

Mr. McLAUGHLIN. I was inclined to believe it was true, in view of the fact that two of the three gentlemen who so strenuously oppose the amendment are from the State of Georgia.

Mr. BARTLETT. I am not ashamed of my position, Mr. Chairman. The gentleman may be inclined to believe it is true, but if the gentleman vouches for the truth of the statement in that article, he is far off his facts. I have sent, Mr. Chairman, for the laws of the State of Georgia, which I hope to put in the RECORD. I have already done so on another occasion.

Mr. McLAUGHLIN. Will the gentleman yield?

Mr. BARTLETT. Yes.

Mr. McLAUGHLIN. Is it not true that in the State of Georgia children are permitted to work in factories at an age as low as any in the United States?

Mr. BARTLETT. No, sir. No child can work in a factory under 14 years of age, according to my recollection of the law.

Mr. McLAUGHLIN. When was the law changed to raise it from 12 to 14? I am informed the law provides for 12 years of age.

Mr. BARTLETT. The gentleman is misinformed. The gentleman is relying on information which he is conveying to the House without investigation.

Mr. McLAUGHLIN. We have not made a misstatement.

Mr. BARTLETT. If the gentleman had examined the RECORD, where I have on one or two occasions before placed the statutes of the State of Georgia in the RECORD of this House—on no less than two occasions—when I called attention to the law, and which I will endeavor to call attention to again, as soon as I can get it, he would not say that.

Now, Mr. Speaker, I do not know what other Georgia gentleman he referred to as being opposed to this child-labor amendment, as they call it, referring to child labor in foreign countries. I am opposed to this sort of legislation to prevent the import of goods made in whole or in part by child labor. It is but another effort on the part of the high protective tariff advocates in this House to endeavor to affect the tariff law indirectly. An effort was made in the Senate to place upon the tariff bill the same amendment. And the gentlemen are not so much interested in the welfare of the children in foreign countries as they are in endeavoring to affect the tariff changes which have been made by the Democratic tariff law. The gentlemen in their hearts do not yearn so much for the children of the foreigner who are working in field or mine or factory as they yearn for something to affect in some way the tariff law of the United States. And that is the purpose of it, Mr. Chairman, and not to affect the interest of the children in foreign countries or of the United States.

The CHAIRMAN. The time of the gentleman from Georgia [Mr. BARTLETT] has expired.

Mr. BARTLETT. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BARTLETT. Now, I want to repeat, Mr. Chairman, and I think I can be borne out by my colleagues here, that this statement made in this newspaper is not true. I do not know where he got his information; but he did not state any facts. It is simply an assertion without facts and without any truth in it, so far as the law of the State of Georgia is concerned. We have had a struggle, of course, in that State, like that had in Massachusetts and elsewhere, like they have in Michigan sometimes, where not only the laws for the protection of children are not enforced, but it takes a congressional investigation to protect the grown laborers that work in the mines.

Now, Mr. Chairman, the law of the State of Georgia prohibits the employment of children under 14 years of age in the factories, except under certain conditions. It also lays down other restrictions for the purpose of protecting the children under 14 years of age. I will put the law in the RECORD again. I hope the gentlemen, before they again make an assault of this sort upon the State of Georgia, will inform themselves of the facts and not rely upon the statement of some misinformed or ignorant editor in the Rocky Mountain region.

Mr. MANN. Will the gentleman yield for a question?

Mr. BARTLETT. Yes.

Mr. MANN. I hold in my hand a statement just issued by the Department of Labor. It is headed:

AGE OF LEGAL EMPLOYMENT OF CHILDREN IN THE UNITED STATES AND PRINCIPAL EUROPEAN COUNTRIES.

Legal age of employment and maximum legal hours of labor of children employed in factories for each State, January 1, 1913.

And it says:

Georgia. Age below which employment is prohibited, 12.

Now, is that a false statement?

Mr. BARTLETT. It is not in accordance with the statutes of the State of Georgia.

Mr. MANN. Well, here is the statement issued by Secretary Wilson, or by the Department of Labor. Is that department inefficient or has this matter been incorrectly stated?

Mr. BARTLETT. He is mistaken as to that. Whether he is efficient or not, I do not know.

Mr. MANN. If he is correct, the gentleman is mistaken?

Mr. BARTLETT. What year did the gentleman say that was in—1913?

Mr. MANN. January 1, 1913.

Mr. BARTLETT. That was a Republican Secretary of Labor.

Mr. MANN. No; this has just been issued by the Department of Labor.

Mr. BARTLETT. The gentleman said "in 1913."

Mr. MANN. It said "legal age of employment and maximum legal hours of labor" for each State, dated January 1, 1913.

Mr. BARTLETT. I understood the gentleman to read that from a bulletin issued in 1913.

Mr. HARDWICK. Probably some inefficient Republican official got that information up and the department published it.

Mr. MANN. Well, there is a list here of all the States. Is it possible that this department is so inefficient that it can not have these figures and facts given correctly? I assume that they are correct, and that the gentlemen themselves are mistaken about the laws of their own State. [Laughter on the Republican side.]

Mr. BARTLETT. May I ask the gentleman a question before he sits down?

Mr. MANN. Yes.

Mr. BARTLETT. Is that from the census of 1910?

Mr. MANN. This is not from a census report at all. This is recent information, down to date, issued by Secretary Wilson, Secretary of Labor, a Democratic member of the President's Cabinet. [Laughter on the Republican side.]

Mr. BARTLETT. It is recent misinformation. That is what it is.

Mr. McLAUGHLIN. It was obtained from the department yesterday.

Mr. BARTLETT. I do not care when it was obtained. It is misinformation.

Mr. McLAUGHLIN. That is Democracy up to date. [Laughter on the Republican side.]

Mr. BARTLETT. Well, Republicanism consists chiefly in making misstatements and giving misinformation to the country. [Laughter.]

Mr. HOWARD. Mr. Chairman, since into the discussion of this question of child labor in the South, Georgia has been injected by the insertion of an editorial from the Rocky Mountain News by the gentleman from Michigan [Mr. McLAUGHLIN], I want to say this, that the statement that children as young as 7 years of age ever worked in Georgia in the cotton-mill industry is an unfounded and infamous falsehood.

The law in Georgia, the act known as the Bell act, passed in 1906 or 1907—I have forgotten which—provided that no children under 10 years of age could work in any manufacturing institution in the State under any conditions whatever, but that children between the ages of 10 and 12, upon the affidavit of their mothers, could be employed, in the discretion of the judge of the court of ordinary of the county in which the application was made. That is to say, the mother had to be in a dependent condition upon the labor of her child between the age of 10 and 12, or a widow, or was required to establish the fact that she had a worthless, trifling, no-account husband who did not contribute to her support, and a good many have them in Georgia as well as in Michigan. [Laughter.] If she made an affidavit and set out the fact that she was absolutely dependent upon that child's labor for her support during the years of 10 and 12, then, under those conditions, it was discretionary with the judge of the court of ordinary of the county in which the application was made as to whether that child between 10 and 12 years of age should be allowed to work at all. Between the ages of 12 and 14 it was necessary for the child to be able to read and write and present a certificate that he or she had attended school within one year for at least 12 weeks, and if said child failed to comply with this provsion, it was excluded from the mills. Now, then, that law in Georgia is enforced.

The law of Georgia is administered, but the law in Michigan is defied. We respect the law in Georgia, and you violate the law in Michigan openly. [Applause on the Democratic side.] You deprive, not children, but you deprive American citizens and grown men of their rights and privileges. You shoot them, you murder them, you kill them like dogs, if you can not control them, and we have not resorted to that method of controlling people in Georgia yet. [Applause.]

Mr. MANN. You burn them.

Mr. HOWARD. Not as much as you do in Illinois.

Mr. TRIBBLE. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. In a moment. We have heard of it.

Mr. FOWLER. That is in Chicago.

Mr. HOWARD. Yes; and we have heard in the city of Springfield, Ill., of more negroes being lynched in one day than was ever pulled off in a Southern State in two years. [Laughter.] We have heard of it; yet, Mr. Chairman, these inflammatory newspapers are continually printing their falsehoods about

my State, when your State has done worse than we have, without one-half the provocation.

Mr. MANN. You mean the last two weeks, do you not?

Mr. HOWARD. Yet in the State of Georgia we absolutely protect the little children under 12 years of age, and these irresponsible and unscrupulous newspapers that have been circulating this infamous calumny against the State of Georgia have done it without any foundation on earth in fact. The children in the cotton mills in Georgia—those that work, the young people and the old people—have decent sanitary homes to live in, garden spots, and milch cows. Why, in Michigan and in the New England States, the idea of a cotton-mill wage earner owning a milch cow would be such a luxury that they would stabulate her in the bedroom, and the children would bow down and worship her, and the old lady of the home would kiss the cow every morning before breakfast. [Laughter.] And yet the gentleman says that in the State of Georgia we grind the existence out of little children by working them in cotton mills below the age of 7 years.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. HOWARD. Mr. Chairman, I would like to proceed for two minutes more.

The CHAIRMAN. The gentleman from Georgia [Mr. HOWARD] asks unanimous consent to proceed for two minutes. Is there objection?

There was no objection.

Mr. HOWARD. Now, I say that the people of Georgia are a law-abiding people, and when the lawmakers enact a statute the people conform to that law. But in the State of Michigan they not only violate the State laws, but they arrogate to themselves the power of usurping the Federal law, and they actually deport people in Michigan and banish them from the State. You have done that very recently, and I think the insertion in the RECORD of an editorial, reflecting upon the State of Georgia, comes with ill grace from the gentleman from Michigan [Mr. MCLAUGHLIN] when his State to-day is almost in a state of warfare and the conditions are a stench in the nostrils of all law-abiding people on account of the conduct of the great copper-mining kings.

Mr. FORDNEY. By a Democratic governor and Democratic administration.

Mr. HOWARD. Ah, the gentleman says "by a Democratic governor and a Democratic administration." What could that Democratic governor do? You have already more troops in the possession of the mine owners than the governor of Michigan has in his possession. You have a Democratic governor, thank God, for that; but the people who defy law and order, who are withholding living wages from the miner, and who are attempting to drive him like a galley slave are Republicans.

Mr. FORDNEY. What did he do?

Mr. HOWARD. What could he do? You have the biggest crowd. He says, "I do not want to declare war in my own State. I want to settle this horrible and disgraceful affair amicably." At this moment a committee of this House is in session investigating these awful conditions in the gentleman's State, investigating the efforts of those people to wring money and extort gold from the poor miners of that State.

No, Mr. Chairman; no such conditions ever existed in the Empire State of the South as exists this moment in the State of Michigan. I regret that such conditions exist there. I sincerely hope these Republican mine owners will desist in their defiance of law and order. May they learn a lesson by turning their faces to the South, and especially to the great State of Georgia, where they will find a prosperous and contented people; where we have absolute industrial peace, and where thousands of bright-eyed and rosy-cheeked little children are living witnesses of the falsehood of the editorial in the Rocky Mountain News.

Mr. FORDNEY. Without interference, it would be settled in a week.

Mr. Chairman, this discussion has reached a very wide scope, indeed. [Laughter.] The gentleman refers to the deportation of men in Michigan. When I referred to a Democratic administration in the State of Michigan, I made that reference with the greatest of respect for the present Democratic governor of that State, whom I admire for his courage, for the sincerity of his convictions, and for his honesty of purpose. The chairman of that committee, the gentleman from Maryland [Mr. LEWIS] stated that if goods made by child labor under 14 years of age in foreign countries were excluded from our markets it would, in his judgment, exclude all goods, because he knows, and so does every other man here know, that in every European country child labor under 14 years of age is employed in the production of the goods that come into the United States in competition with honest American labor, enjoying the American standard of wages and living. Yet, gentlemen on that side of the House have recently passed an immigration bill that, if enacted into law, will exclude from the United States any child under 16 years of age who is not accompanied by a parent.

It will exclude laborers from foreign countries coming to the United States seeking a home and honest employment here, and the purpose of that bill is to protect organized labor as well as unorganized labor in this country by keeping away from our shores labor from any other country in the world. Yet when it comes to this question those gentlemen are in favor of striking from this bill an amendment that will exclude from our markets the products of the cheap labor of children under 16 years of age made in any country in the world. You do not want foreigners to come here to compete with our employees in the factories or on the farms of the United States. You throw that out as a sop to the labor of which you pretend to be the friends, but in the next breath you would vote to admit into our markets the products of child labor from every country in the world, knowing that child labor, as well as adult labor, receives in the highest paid country in the world outside of the United States for their labor not more than 50 per cent of the wages paid to the same class of labor in this country. You get back to the proposition that you are not only in favor of a tariff for revenue only, but, body and soul, you are free traders when you take that position. I say the position taken by you on this question is absolutely inconsistent with the position you took on the immigration bill. [Applause on the Republican side.]

Mr. TRIBBLE. Mr. Chairman, for the benefit of gentlemen who are mistaken on this question—and some of them are honestly mistaken—I will read from the Code of Georgia. It seems to me that the gentleman who had read an article stating that children were employed in Georgia at the age of 7 owes it to himself to correct the injustice done my State. I read from the Code of Georgia, section 3145:

On and after January 1, 1908, no child under 14 years of age shall be employed or allowed to labor in or about any factory or manufacturing establishment within the State between the hours of 7 p. m and 6 a. m.

My colleague, Mr. HOWARD, has explained conditions for labor by day, under the age of 14, permitting the employment of children. The law provides that children under the age of 14 may be employed in a factory by consent of aged parents, or of a mother who is a widow and who is unable to support herself, upon the making of certain affidavits.

The Georgia Code provides as follows:

First. No such child between the ages of 14 and 18 years shall be so employed unless such child shall have attended school for 12 weeks of the preceding year, 6 weeks of which school attendance shall be consecutive, and at the end of each year, until such child shall have passed the public-school age.

Second. No child, except as heretofore provided, under 14 years of age shall be employed or allowed to labor in or about any factory or manufacturing establishment within this State unless he or she can write his or her name and simple sentences, and shall have attended school for 12 weeks of the preceding year, 6 weeks of which school attendance shall be consecutive.

Third. No child under 14 years of age shall be employed or allowed to labor in or about any factory or manufacturing establishment within this State between the hours of 7 p. m. and 6 a. m.

Fourth. No child under 12 years of age shall be so employed, or allowed to labor, unless such child be an orphan and has no other means of support, or unless a widowed mother or an aged or disabled father is dependent upon the labor of such child, in which event, before putting such child at such labor, such father shall produce and file in the office of such factory or manufacturing establishment a certificate from the ordinary of the county in which such factory is established or located, certifying under his seal of office to the facts required to be shown as herein prescribed.

Fifth. No child under 10 years of age to be employed or allowed to labor in or about any factory or manufacturing establishment within this State under any circumstances.

The gentleman from Michigan [Mr. MCLAUGHLIN] has been in manufacturing establishments in the State of Georgia. He has seen the conditions that exist in those factories, and if he will come out squarely and make a fair statement to this House I believe he will say that he did not see any children under 12 years of age employed in any factory he visited. I will ask the gentleman if it is not a fact that he has been in manufacturing establishments in Georgia himself? The gentleman refuses to speak.

Mr. MCLAUGHLIN. No, Mr. Chairman, I intend to get my own time to reply to the gentleman, and if he will permit me I will answer him then.

Mr. TRIBBLE. Mr. Chairman, I will make the statement in my place that I have been in at least one-tenth of all the cotton-manufacturing establishments in Georgia. I have been through those factories for the purpose of meeting the operatives, and I have never seen a child employed in any factory in the State of Georgia under the age of 12 or 14 years. I can safely say

that I have never seen one employed under the age of 14, and I think my colleagues on the floor of this House can make the same statement. Sectional lines should be blotted out in this House and this country. Each State should sympathize with the other States in the disposition of great economic questions. All the States have troublesome questions with which to contend. Georgia and Michigan are not alone. Georgia is able to care for herself as well as any State of the Union. We have our local problems and we have our burdens. What other State in the Union has borne the burden of education of a race that contributes almost nothing to that education and borne that burden as patiently and as well as the State of Georgia? In 1864 a great horde of slaves were turned loose upon our people. They had no property then and they have very little to-day. Yet they have an equal educational opportunity with the white children of the State of Georgia. The people of Georgia have gone down into their pockets, taken out their money, and divided it equally between the whites and blacks in educating all alike; and it is unfair, it is not right, it is not just for Members to come upon the floor of this House and criticize local conditions in our State, and they certainly should state the facts when they make a statement concerning our State laws.

Mr. MANN. Mr. Chairman, will the gentleman from Georgia do me the courtesy to loan me the book from which he read, containing the Georgia statute that he quoted?

Mr. TRIBBLE. Certainly.

Mr. MANN. I did not mean to ask the gentleman to bring it to me.

Mr. TRIBBLE. Will the gentleman read it all?

Mr. MANN. The gentleman from Georgia did not read it all. The gentleman from Georgia, for whom I have a good deal of admiration, said that some of us were honestly mistaken about the law of Georgia, and then he read this part of the statute:

> On and after January 1, 1908, no child under 14 years of age shall be employed or allowed to labor in or about any factory or manufacturing establishment within the State between the hours of 7 p. m. and 6 a. m.

The gentleman did not read those last words with the same emphasis that I have read them.

Mr. TRIBBLE. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. TRIBBLE. I will ask the gentleman to read the preceding section.

Mr. MANN. I do not ask the gentleman to make my argument.

Mr. TRIBBLE. I want to make this statement——

Mr. MANN. I prefer that the gentleman do it after I get through. I do not mean to say that the gentleman intended to give the House the impression that the law of Georgia forbids the employment of children under 14 years of age to work in any factories, but the provision which the gentleman read applies only to night work. Now, what applies to day work?

On the same page of the same book appears:

> No child under 10 years of age shall be employed or allowed to labor in or about any factory or manufacturing establishment within this State under any circumstances.

Yet we have been told by two gentlemen from Georgia that the statutes of that State prohibited employment of children under 14 years of age, and the gentleman from Michigan was denounced because an editorial from a great western paper was read, and yet here is the statute produced by the gentleman from Georgia himself not forbidding child labor under 14 years of age but only forbidding child labor under 10 years of age.

Mr. BARTLETT. Will the gentleman be kind enough to call attention to section 3144?

Mr. MANN. The gentleman from Georgia [Mr. HOWARD] gave a very lucid explanation of that, and the gentleman from Georgia [Mr. TRIBBLE] referred to it, but that does not do away with section 3143, which puts the prohibition at 10 years of age.

Now, Mr. Chairman, the Department of Labor was criticized as inaccurate; they criticized the Rocky Mountain News and said that was inaccurate. I hold in my hand a telegram which appears in the Washington Times. It may be inaccurate, I do not know. At New Orleans they are having a convention of the annual national child-labor conference. Yesterday Mr. Wiley H. Swift, of Greensboro, N. C., according to this paper, delivered a scathing denunciation of southern manufacturers who employ children. "Why it is hard to get child-labor laws in the South" was the text of Mr. Swift's statement, and it appears here as though he was a manufacturer. He goes on to complain, and refers especially to North and South Carolina, Georgia, Alabama, and Mississippi, and says that the South is far behind the standard in child-labor laws. It may be that Mr. Wiley H. Swift—his name, his residence, and address is given—it may be that he does not know anything more, according to my friend from Georgia, than does Secretary Wilson, of the Department of Labor; but, after all, I suspect he is right.

Mr. LEWIS of Maryland. Mr. Chairman, I move that further discussion on this amendment be closed in 15 minutes.

Mr. MADDEN. Oh, no; let us make it 30 minutes.

Mr. LEWIS of Maryland. Does the gentleman want to speak?

Mr. MADDEN. Yes.

Mr. LEWIS of Maryland. How about the division of time?

Mr. HENSLEY. Mr. Chairman, a parliamentary inquiry?

The CHAIRMAN. The gentleman will state it.

Mr. HENSLEY. How many speeches are permitted on an amendment without an agreement for time?

The CHAIRMAN. One for the amendment and one against.

Mr. HENSLEY. Then, Mr. Chairman, I make the point of order.

Mr. MADDEN. I hope the gentleman will not make it.

Mr. McLAUGHLIN. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

Mr. MURDOCK. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MURDOCK. Is a motion in order to strike out the last word in the amendment?

The CHAIRMAN. The Chair thinks so.

Mr. MURDOCK. Then I move to strike out the last word.

Mr. ANTHONY. Mr. Chairman, I rise to a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. ANTHONY. I make the point of order that a previous motion was before the House, made by the gentleman from Michigan [Mr. McLAUGHLIN].

Mr. McLAUGHLIN. I made a request for time.

Mr. ANTHONY. Does a parliamentary inquiry do away with the request of the gentleman from Michigan?

The CHAIRMAN. It did in this case.

Mr. MURDOCK. Mr. Chairman, one of the political curses of this country is the display of sectionalism, an example of which we have had here this afternoon. On a question of this kind this middle aisle ought to go out of existence. [Applause.] There ought not to be any difference between parties on the question of child labor. I am against child labor; I am against it in Michigan, I am against it in Georgia, I am against it in the United States. I am for a national child-labor law. [Applause.] You will never get a national child-labor law if you continue forever a quarrel based upon sectional lines.

I know enough about legislation to realize that whenever a legislator has a chance to accomplish a reform he needs to seize the opportunity when it is presented to him, and not delay. This amendment offered by the gentleman from Michigan [Mr. KELLEY] is in order; it is germane; it means business, and the men on both sides of this aisle ought to forget their partisanship this afternoon long enough to support it.

Mr. HARDWICK rose.

Mr. MURDOCK. I do not want to yield just now, but I will before I get through. This bill provides for the prohibition of the importation of convict-made and pauper-made wares or merchandise. It has as one of its great purposes the protection of labor in this country. A prohibition of child labor is not only for the purpose of the protection of the children, but it has also the purpose of protecting labor and the home. If this amendment goes into this bill, it would accomplish two purposes—one, protect the child, the decent, godly thing; and it would also protect labor in this country. [Applause.]

Now, this particular amendment will not become a law. I have served long enough in Congress to know that whenever an amendment is offered which means business, which is drastic and puts the mighty congressional hand upon one of the sore spots of this Nation, we do not get the legislation. It may be this afternoon that enough men on both sides of the aisle will vote for this amendment to put it in the bill. It will not stay in the bill. It will be knocked out in the Senate, in all likelihood; and if not knocked out in the Senate the bill will be pigeonholed and killed.

That is one of the troubles in this country; while you are fighting on sectional lines the old fight based on old prejudices Congress does not do the thing that is demanded—that is, the really remedial thing—that will bring actual correction. Now I will yield to the gentleman from Georgia.

Mr. HARDWICK. I wanted to ask the gentleman how this amendment would affect child labor in the United States.

Mr. MURDOCK. If we exclude child-labor-made goods from abroad, we will have speedily a national child-labor law in the United States.

Mr. HARDWICK. How can we have such a law under the present Constitution of the United States?

Mr. MURDOCK. We can have it under the interstate-commerce clause of the Constitution.

Mr. HARDWICK. But the courts have held otherwise.

Mr. MURDOCK. And one of the ways to bring it around speedily is to write this amendment into law.

Mr. HARDWICK. That will not affect it at all.

Mr. HENSLEY. Mr. Chairman, will the gentleman yield?

Mr. MURDOCK. Yes.

Mr. HENSLEY. The gentleman from Kansas has described the fate of this bill, providing this amendment is adhered to. I want to ask the gentleman if he is in favor of the amendment because he wants the bill to be defeated in the Senate and not become a law?

Mr. MURDOCK. I am in favor of making the membership here and at the other end of the Capitol face the music. That is what I am in favor of. [Applause on the Republican side.] I am in favor of adopting amendments here which mean business, which will do some good in the country. Let the other gentlemen face their responsibility; I will answer for my side of the case.

Mr. HENSLEY. Is the gentleman in favor of this bill?

Mr. MURDOCK. I am; and I am in favor of making it an effectual law to the last sense of the word.

Mr. LEWIS of Maryland. Mr. Chairman, I move that further debate on this amendment be confined to 25 minutes.

The motion was agreed to.

Mr. McLAUGHLIN. Mr. Chairman, first, in answer to the question asked by the gentleman from Georgia [Mr. TRIBBLE], I will say that I had an opportunity not long ago to see something of factory conditions in one of the towns of the State of Georgia, and, as far as I was able to see, they were good. What I said was not based on my personal observation, nor did I intend severely, certainly not unjustly, to arraign the State of Georgia, but here is an amendment which seems to me to be wise and ought to be adopted. The gentlemen from Georgia are the ones who are taking principal part in opposition to it, and are citing conditions in their own State to justify them. I have in my hand an editorial citing the fact that a deplorable condition in the matter of child labor had been brought to the attention of the Legislature of Georgia; that the legislature had been asked to correct the condition and had refused to do so. I had taken that statement that appeared in the newspaper as true, but if it is not, I regret that I offered it.

Mr. BARTLETT. Mr. Chairman, may I interrupt the gentleman for a moment?

Mr. McLAUGHLIN. I decline to yield at present. It seems to me the gentlemen have not been quite fair in presenting Georgia's case in their citations of law governing the age below which children in that State are not permitted to work. The law has not been correctly read. I do not accuse them of intentionally misreading or misquoting, but what they did read, what they chose to read as to child-labor laws in that State, has misled the House. The gentleman from Illinois [Mr. MANN] has read the law correctly, and has read the important sections and paragraphs which the gentlemen from Georgia inadvertently omitted.

Mr. Chairman, it is not incumbent upon me nor is it necessary for me to defend the State of Michigan from the acrimonious charges made by the gentleman from Georgia [Mr. HOWARD]. I venture, however, to say that when the committee of this House appointed a short time ago to go to Michigan to make investigation of conditions existing in the mining sections of the State makes its report it will be found that not one single charge contained in the resolution adopted by the House and directing the investigation to be made is sustained in any manner or respect whatever by the evidence. And I venture to say, also, that if the gentlemen of the investigating committee put into their report what they have learned of general conditions existing in the copper-mining section, they will say that the mining conditions of northern Michigan are the best that they have had the opportunity to observe and in their opinion are the best in the United States.

Mr. HARDWICK. Mr. Chairman, will the gentleman yield for a question?

Mr. McLAUGHLIN. My time is only five minutes. I wish to criticize the Democratic Party for its professions on the labor question and its attitude upon labor bills. The Democratic Party assumes to stand to-day as it has assumed to stand for many years, as the champion of labor, proclaiming that it is only at the hands of the Democratic Party that relief, so far as labor is concerned, can be secured. Yet when we look for labor legislation intended to alleviate conditions of labor, improving conditions under which wage earners perform their work, we find that statutes on that subject and for that purpose are conspicuous by their absence in the States which are most strongly Democratic.

My time is very limited, and I do not wish to prolong this discussion or go outside of the matter before the House; but inasmuch as the statement made by the Department of Labor has been referred to, I wish to call the attention of the House to one portion of it. The age at which children are permitted to labor and the States in which that age is low are, Alabama, 12 years; Florida, 12 years; Georgia, 12 years; Mississippi, 12 years; North Carolina, 12 years; South Carolina, 12 years; every one of them a State strongly Democratic. In no other State in the Union is the age below 14 years. And the gentlemen from the States in which the age is lowest are talking loudest and making themselves conspicuous here demanding legislation in favor of labor and trying to give the country the idea that only by legislation enacted by their party can labor conditions be improved. [Applause on the Republican side.]

If these gentlemen, or if Democrats as a party, wish to improve conditions of labor by legislation, why do they not enact laws along that line in States where they are in complete control? And it is a fact that a very large proportion of labor is of such a character and is performed under such conditions as to be amenable to State law; or if the performance of labor is in any manner influenced or controlled by law, those laws are enacted by State legislatures and not by the Federal Congress. But the Democratic Party in their national platforms declare their devotion to labor and their love of the wage earners, and promise all sorts of legislation for their benefit and protection, knowing full well that hardly one man in a hundred is so situated with respect to his employment as to be influenced in any manner whatever by Federal law. And in the States where legislatures are solidly Democratic or where the Democratic Party has complete control there is little if any attempt made to enact law for protection or uplift of men, women, or children who live by their labor.

The Democratic Party are inconsistent. They are profuse in their promises in respect of which they are unable to perform, and they fail altogether to accomplish anything in the States where they might do some good if they wished to do so.

Mr. MADDEN. Mr. Chairman, I am not going to enter into the partisan spirit that has been engendered in this discussion, but I am going to say that the world is getting better every day and that there is more tendency all along the line to a greater spirit of humanity. There is a greater disposition for better education among our people, both physical and mental, than there ever was before. There is a greater disposition to prevent the dwarfing of the oncoming generation than there ever was before, and I am very glad that such a spirit is manifest all over the country. When I was a boy I was brought up in poverty, and I was obliged to work before I was 10 years of age, and so were many other boys. That day has gone forever, and I am glad it has. The spirit of humanity is prevailing everywhere now, and the thought of the best thinkers of the world is along the line of uplifting the human race, and that the best way to do that is to help build the children up physically when they are young and mentally as they grow everyone now agrees.

We want a virile citizenship in our Nation, and we are beginning to lay the foundation for that kind of a citizenship. We have laid the foundation for universal education in America and we no longer believe in the employment of children below 16 years of age in most of the States, and I know of no better thing that can be done to give notice to the world where we stand upon this subject than to adopt the amendment offered by the gentleman from Michigan [Mr. KELLEY] on this bill. [Applause.] We have no disposition to employ the children of our own land; indeed, we prevent that by law. That being true, there is every reason why we should prevent the product of child labor coming here in direct competition with that of our labor, and this amendment will in a large measure cure the evil which is known to prevail among our people.

Mr. KINDEL. Will the gentleman yield?

Mr. MADDEN. I will.

Mr. KINDEL. How are you going to prevent that when the parcel post brings these goods from abroad to Denver and beyond in 11-pound packages at 79 cents as against $1.32 from New York? [Laughter and applause.]

Mr. MADDEN. Well, I know very well the gentleman has some kind of a difference with the Post Office Department, that he and the Postmaster General are not getting along in very close harmony; but I can not understand why his quarrel with the Post Office has anything to do with the employment of child labor.

Mr. KINDEL. It has this to do, Mr. Chairman——

Mr. MADDEN. Mr. Chairman, I refuse to yield further.

Mr. KINDEL. But the gentleman has not answered my question.

Mr. MADDEN. I have answered it the best I know how. The gentleman's question has no place in this discussion.

Mr. MURRAY of Oklahoma. Will the gentleman yield?

Mr. MADDEN. I realize the troubles of the gentleman are enormous——

Mr. MURRAY of Oklahoma. Will the gentleman yield——

Mr. MADDEN. And that it is somewhat difficult to harmonize his views with those of the Postmaster General, that he believes the express companies ought to charge more than the Post Office charges for the transportation of goods; but I do not see where that comes into the question of the employment of child labor.

Mr. MURRAY of Oklahoma. I suggest to the gentleman that the difficulty he sought to correct was he wanted children carried through the mails by the parcel post.

Mr. MADDEN. He wanted them tagged, I see; I did not know that.

Mr. KINDEL. Mr. Chairman——

Mr. MADDEN. I refuse to yield further.

Mr. KINDEL. But the gentleman makes a misstatement about me when he says that I want the express companies to charge a higher rate than the parcel post. The gentleman does not know what he is talking about.

Mr. MADDEN. Perhaps not.

Mr. KINDEL. And I will prove it.

Mr. MADDEN. The gentleman from Colorado does not know what he is talking about.

Mr. KINDEL. I can prove I do. I challenge the gentleman to disprove any facts and figures I have presented on the subject of transportation and parcel post.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MADDEN. I think the Postmaster General thinks the gentleman does not know what he is talking about. At any rate I want to emphasize what I have already said, that I believe fully in enacting a child-labor law which will not only prevent the employment of child labor in any State in the American Union, but also will prevent the importation of goods made by child labor in any other country in the world. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. BARTLETT. Mr. Chairman, I merely want to put in the RECORD again the entire law on the subject of child labor and the labor of children in factories in the State of Georgia, from which it will be seen, Mr. Chairman, that the statement made in the Rocky Mountain News, an independent newspaper, so declared to be by itself—I do not know what that means down our way, it means Republican or Bull Moose, or something of that kind, I suppose it is a Bull Moose. Now, I said that was misinformation, and I am going to prove it in a moment. My good friend from Michigan, who had the article read, at the same time had in his hand a report, or at least he said he to-day had a report of the Secretary of Labor which declared that the age of labor in factories permitted to children was 12 years, and yet with that information——

Mr. MANN. Mr. Chairman, that article was not secured by Mr. MCLAUGHLIN.

Mr. BARTLETT. But Mr. MCLAUGHLIN, in his reply to me, stated that he had it to-day.

Mr. MANN. It was furnished; it did not come through him.

Mr. BARTLETT. I do not know——

Mr. MANN. I am telling that to the gentleman because he did not know.

Mr. BARTLETT. Did not know what? [Laughter.]

Mr. MANN. The gentleman said he did not know whom it came through.

Mr. BARTLETT. I know what the gentleman meant, but some other gentlemen do not seem to know what the gentleman meant. Now, the gentleman from Michigan stated that he had the report to-day. Now, the gentleman from Michigan vouched for the statement made in a newspaper and published in Colorado, stating that the laws permitted the employment in factories of children 7 years old.

Under the law of Georgia children under the age of 10 years of age can not work in a factory at all, and under 14 years old can only work after their parents make an affidavit that their labor is necessary in order to sustain the family, which affidavit has to be approved by the probate judge; and children under 14 years can not work at all unless there is a certificate that they have attended school a certain length of time. I will put the whole law in.

I will repeat, Mr. Chairman, that the statement made in this editorial is false in its reference to the laws of the State of Georgia. The gentleman from Michigan, my good friend Mr. MCLAUGHLIN, can not vouch for the truth of the editorial or the truthfulness of the editor when he says that children 7 years old, under the laws of Georgia, are permitted to be driven to the factories to work. I stand by the statement with which I opened my remarks, namely, that that utterance, Mr. Chairman, is wholly untrue so far as Georgia is concerned, and I trust my friend from Michigan [Mr. MCLAUGHLIN] will not insist that it is correct.

Mr. Chairman, I ask unanimous consent to extend my remarks by placing in the RECORD the laws of the State of Georgia to which I have referred.

The CHAIRMAN. Is there objection?

There was no objection.

The matter referred to is as follows:

ARTICLE 4.

CHILD LABOR IN FACTORIES REGULATED.

3143. No child under 10 years of age to be employed: No child under 10 years of age shall be employed or allowed to labor in or about any factory or manufacturing establishment within this State under any circumstances.

3144. Child under 12 years: On and after January 1, 1907, no child under 12 years of age shall be employed or allowed to labor unless such child be an orphan and has no other means of support or unless a widowed mother or an aged or disabled father is dependent upon the labor of such child, in which event, before putting such child at such labor, such father shall produce and file in the office of such factory or manufacturing establishment a certificate from the ordinary of the county in which such factory or establishment is located, certifying under his seal of office to the facts required to be shown as herein prescribed: *Provided*, That no ordinary shall issue any such certificate except upon strict proof in writing and under oath clearly showing the necessary facts: *And provided further*, That no such certificate shall be granted for longer than one year nor accepted by any employer after one year from the date of such certificate.

3145. Child under 14 years: On and after January 1, 1908, no child under 14 years of age shall be employed or allowed to labor in or about any factory or manufacturing establishment within this State between the hours of 7 p. m. and 6 a. m.

3146. Educational qualification: On and after January 1, 1908, no child, except as heretofore provided, under 14 years of age shall be employed or allowed to labor in or about any factory or manufacturing establishment within this State unless he or she can write his or her name and simple sentences and shall have attended school for 12 weeks of the preceding year, 6 weeks of which school attendance shall be consecutive; and no such child, as aforesaid, between the ages of 14 and 18 years shall be so employed unless such child shall have attended school for 12 weeks of the preceding year, 6 weeks of which school attendance shall be consecutive; and at the end of each year, until such child shall have passed the public-school age, an affidavit certifying to such attendance as is required by this section shall be furnished to the employer by the parent or guardian or person sustaining parental relation to such child. The provisions of this section shall apply only to children entering such employment at the age of 14 years or less.

3147. Affidavit as to age, birth, etc.: It shall be unlawful for any owner, superintendent, agent, or any other person acting for or in behalf of any factory or manufacturing establishment to hire or employ any child unless there is first provided and placed on file in the office of such employer an affidavit signed by the parent, guardian, or person standing in parental relation thereto certifying to the age and date of birth of such child and other facts required in this article. Any person knowingly furnishing a false affidavit as to the age or as to any other facts required in this article shall be guilty of a misdemeanor.

3148. Inspection by the grand juries: The affidavit and certificates required in this article shall be open to inspection by the grand juries of any county where such factory or manufacturing establishments are located.

3149. Penalties: Any person or agent or representative of any firm or corporation who shall violate any provision of this article, or any parent, guardian, or other person standing in parental relation to a child who shall hire or place for employment or labor in or about any factory or manufacturing establishment within this State a child in violation of any provision of this article shall be guilty of a misdemeanor.

Mr. TRIBBLE. Mr. Chairman, I also wish to ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Georgia [Mr. TRIBBLE] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. LEWIS of Maryland. Mr. Chairman, I want to apologize to the committee for renewing some statements made in regard to this amendment. My apology is that there are those present now who may not have heard the former discussion.

This amendment proposes absolutely to prohibit the importation of foreign-made products in which child labor under 14 years of age has directly, indirectly, partly, or wholly contributed to the product. The probabilities are that few if any articles are imported into the United States as to which child labor under 14 years of age has not been a contributing factor. There are many articles that are imported into the United States, let me say to the committee, that are practically not the subject of cultivation or manufacture in our country at all, and are yet essential to its daily life and comfort. I mention tea and coffee as obvious ones. It may be possible for our Congress by some method of legislation to affect the legislation with regard to child labor in foreign countries. It may be possible, I say, and is worthy of grave and thorough investigation. But whether it be possible or not, certainly it will be more becoming that this Congress should legislate with regard to interstate commerce and child labor in the United States

before it undertakes to remove beams from the eyes of its neighbors over the sea. That is a problem of civilization for them to determine, I submit, and not for us. Now the Committee on Labor has before it at this very time and is holding hearings, I think, for the first time in the history of any committee in this body on legislative propositions looking toward the restriction of the employment of child labor in the different States of the Union. It would be incredible folly, I repeat, to adopt this amendment here to-day. I give notice, as one as much interested in labor legislation as anyone in this body, that the adoption of this amendment is the surest way to kill this legislation, because the country itself in 24 hours after it ascertained that the amendment had been passed would visit upon us and the bill its sorest condemnation. It is impracticable and absurd, and simply makes unholy political use of the name of "child" for party purposes. [Applause.]

Mr. GARDNER. Will the gentleman yield before he sits down?

Mr. LEWIS of Maryland. I yield.

Mr. GARDNER. Will the gentleman tell the committee in what manner it imperils this legislation?

Mr. LEWIS of Maryland. Because, as I suggested, it is utterly impracticable. This Congress, whatever it might wish, even in the sore contingencies of war, could not strike down all its foreign commerce by one single blow or in a single day. The effect of this legislation probably would be to strike down totally the tea and coffee commerce and many other articles of commerce of common everyday use.

Mr. GARDNER. Will the gentleman yield again?

Mr. LEWIS of Maryland. I have answered the gentleman's question.

Mr. GARDNER. Are tea and coffee manufactured articles?

Mr. LEWIS of Maryland. They are products of labor that would come under the provisions of this bill, as is sugar, I am reminded, although that is partially manufactured at home. There may be men in this House who hate foreign commerce and who would be willing to enact prohibitory laws against foreign commerce to kill it with a single blow, but when they use the name of "child labor" and the sentiments surrounding childhood in order to do it they are commercializing the most sacred feelings and sentiments of the heart.

Mr. BUCHANAN of Illinois. Mr. Chairman, I think it is unfortunate that this amendment has been offered to this bill.

I hold in my hand a bill introduced by the gentleman from Pennsylvania [Mr. PALMER] to prevent interstate commerce in products of child labor, and for other purposes. Now, it seems from the remarks that have been made here to-day that we are almost unanimously in favor of protecting the children from being exploited for profit in the manufacturing industries of the country. This bill would be a special act, for the reason that it equalizes the proposition throughout the United States, and to this bill, it would seem to me, the amendment that is being considered here to-day could be applied, and treat the child-labor question alike in this country as well as in foreign countries. It could not be said then that we were discriminating against any country in regard to the matter. And if the feeling is so unanimous here, and we are in favor of legislation of this sort, it seems to me after the Labor Committee gets through with its hearings on this question we could get a measure like this up by unanimous consent and be able to pass it in the near future and not load the present bill down with an amendment the utility of which is questioned.

Mr. MOORE. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Pennsylvania?

Mr. BUCHANAN of Illinois. I do.

Mr. MOORE. Does the gentleman think the Palmer child-labor bill would be effective as between the States, and that we could prohibit the transportation of child-made goods from one State to another?

Mr. BUCHANAN of Illinois. I will say to the gentleman that, in my judgment, if he wants my judgment, which probably will not amount to much to the gentleman, as I am not a lawyer, if the Federal Government have such right to legislate in regard to interstate commerce I do not see where the Constitution puts limits on it.

I voted for the amendment of my colleague [Mr. MANN] the other day, and the only objection that I heard to it was that it might be successfully attacked as to its constitutionality. I have advised with lawyers, who say it was constitutional, and I do not agree with those who thought it could be attacked successfully in that way.

Mr. MOORE. If such a law were effective as between the States, barring child-made goods, why would it not be competent to pass a law here barring the importation of goods made by children abroad?

Mr. BUCHANAN of Illinois. I did not catch that question.

Mr. MOORE. If we are capable of passing a law that would be effective preventing the shipment of child-made products from one State to another, why are we not competent to pass a law to prevent the admission into the United States of child-made products from foreign countries?

Mr. BUCHANAN of Illinois. I endeavored to make it plain that I was in favor of an amendment of that sort, or an addition of that sort being attached to this child-labor bill of Mr. PALMER'S, but do not think it properly applies to the bill under consideration.

Mr. KEATING. Mr. Chairman, will the gentleman yield for a moment.

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Colorado?

Mr. BUCHANAN of Illinois. Yes; I yield.

Mr. KEATING. Has the gentleman's attention been called to the wide difference between the Palmer bill, which attempts to regulate child labor, and the Heusley bill, which attempts to regulate the admission of the products of convict labor in this particular? The child-labor bill attempts to restrict child labor in factories and in unhealthy occupations, while the convict-labor bill is so broad that even if a convict were employed on a farm or in some healthful occupation, still the product of his labor could not be admitted to this country. There is a wide difference between the two measures.

Mr. HARDWICK. There is no legal difference.

Mr. BUCHANAN of Illinois. I think it would apply more properly to the Palmer bill than this bill, and it would affect it in a less objectionable way. I do not think the present amendment should be attached to this bill. I am as much in favor of antichild-labor legislation as anyone here, I suppose, and I have spent a good deal of time trying to secure its enactment and prohibit child labor.

Mr. GARDNER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Massachusetts?

Mr. BUCHANAN of Illinois. Yes.

Mr. GARDNER. If the gentleman is in favor of prohibiting the importation of goods made by convict labor, why does he not vote for it now? The gentleman from Maryland [Mr. LEWIS] says frankly that he is not in favor of prohibiting the importation of goods made by child labor, and for that reason opposes the insertion in this bill of an amendment which would accomplish that result.

Mr. BUCHANAN of Illinois. I am in favor of it, and at the proper time and in the proper place I favor the enactment of legislation prohibiting the shipment of the products of child labor in interstate commerce and the importation into this country of the products of child labor abroad.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BRYAN. Mr. Chairman, I offer the following substitute, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

Substitute by Mr. BRYAN:

"Page 2, line 15, after the word 'country' insert 'or any goods, wares, or merchandise which is the product of any factory where children under the age of 12 years are employed.'"

The CHAIRMAN. The Chair will announce that all time has expired.

Mr. BRYAN. Mr. Chairman, that eliminates from——

Mr. GOULDEN. Mr. Chairman, may we have the amendment read again?

The CHAIRMAN. Does the gentleman from Washington [Mr. BRYAN] offer this as a substitute for the amendment?

Mr. BRYAN. I offer it as a substitute.

The CHAIRMAN. The Clerk will again report it.

The proposed substitute was again read.

Mr. MANN. Mr. Chairman, I make the point of order that that is not a substitute.

The CHAIRMAN. The point of order is sustained.

Mr. BRYAN. Then, Mr. Chairman, I will withhold it and offer it later.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Michigan [Mr. KELLEY].

The Clerk read as follows:

Amend, page 1, line 4, after the word "part," by inserting the words "by children under the age of 14 years or."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Michigan [Mr. KELLEY].

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. MANN. I ask for a division, Mr. Chairman.

The committee divided; and there were—ayes 68, noes 74.

Mr. MANN. I ask for tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. LEWIS of Maryland and Mr. KELLEY of Michigan to act as tellers.

The committee again divided; and the tellers reported—ayes 64, noes 80.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. BRYAN. Mr. Chairman, I offer now the amendment that I offered a few moments ago, asking the Clerk to modify it by substituting "14" for "12," down in the body of the amendment.

Mr. LEWIS of Maryland. Mr. Chairman, on that amendment I ask that all discussion be closed in five minutes.

The CHAIRMAN. The gentleman from Maryland [Mr. LEWIS] asks unanimous consent that the debate on the amendment be closed in five minutes. Is there objection?

There was no objection.

Mr. BUCHANAN of Illinois. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BUCHANAN of Illinois. I wanted to inquire if the debate had not already closed on this section?

The CHAIRMAN. It has closed on the amendment. The Chair recollects that the gentleman from Maryland made the motion to close debate on this amendment. The Clerk will read.

The Clerk read as follows:

Page 2, line 15, after the word "country," insert the words "or any goods, wares, or merchandise which is the product of any factory where children under the age of 14 years are employed."

Mr. BRYAN. Mr. Chairman, this amendment, if adopted, will only restrict the importation as to manufactured articles. There can not possibly be the criticism that the distinguished chairman of the Committee on Labor has made as to tea and coffee and other agricultural products. If I could only fall upon some wording for an amendment that would satisfy the Democratic majority, I would be very glad. This amendment proposes merely to cut out from this country the articles that are produced in factories in foreign lands where child labor is employed. I hope the members of the majority will tell us how they would like the amendment drawn. I would propose a 12-year limit if I thought the majority would accept that. I hope the gentlemen will vote for my amendment, or else amend it so you can vote for it. You all claim to be against child labor.

Mr. MOORE. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Washington yield to the gentleman from Pennsylvania?

Mr. BRYAN. The whole subject has been already discussed, and I do not care to go into it extensively, as I know the House is anxious to conclude the consideration of this bill; but I will yield to the gentleman from Pennsylvania.

Mr. MOORE. Does not the gentleman think that is a specious exception, to exclude the product of children who work at tilling the soil or collecting coffee or tea, and to include the labor of those who perforce from necessity work in the mills?

Mr. BRYAN. No, Mr. Chairman.

Mr. MOORE. When it comes down to the actual hardship of child labor, what is the difference whether the child works in a factory, where it has a roof over its head, or works out in a swamp, picking huckleberries? What is the difference?

Mr. BRYAN. Mr. Chairman, there is a very substantial difference. We can not expect to regulate the indiscriminate work on farms, where the owner of the farm, the head of the family, manages things according to home rule, and where the children take part in the farm labor; but where children are assembled in a factory under certain sanitary or insanitary conditions, under certain economic conditions, then the situation is altogether different, and it is our duty to make some kind of provision; it is our duty to establish some kind of uniform rule; and that is the case with all statutes in every State for the regulation of child labor. Such laws are never applied to agricultural labor and things of that kind.

Mr. FARR. Would it not be a protection to our industry and our labor, as the gentleman intends this amendment to be?

Mr. BRYAN. I do not specialize so much on that subject as the gentleman from Pennsylvania does.

Mr. LEWIS of Maryland. Mr. Chairman, the amendment now proposed is subject to exactly the same arguments as those that have been made with reference to the preceding one. At this point I want to make a suggestion that I hope will not be without profit to all of us. It is this: So far as I know, no bill has ever been introduced in this House, and certainly no bill has been referred to the Committee on Labor, dealing with the subject of foreign child labor. Neither the Committee on Labor nor, so far as I know, any other committee of this House has ever had an opportunity to consider this subject at all. And as one keenly interested, I have a right to make my complaint, and make it with emphasis, against people who threaten the life of well-considered reform legislation by immature political suggestions, thought of, perhaps, at least spoken of, for the first time on this floor. [Applause.] Every Member of this House knows that legislation can not be wisely prepared and enacted in that way, and I want to make these strictures with regard to this amendment, as well as the one that has preceded it. [Applause.]

The CHAIRMAN. The question is upon the amendment offered by the gentleman from Washington [Mr. BRYAN].

The question being taken, on a division (demanded by Mr. MURDOCK) there were—ayes 38, noes 77.

Accordingly the amendment was rejected.

Mr. HARDY. Mr. Chairman, I move to amend section 1 of the bill by striking out the word "pauper" wherever it occurs. That will leave the measure one to prohibit the importation of the products of convict labor.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, section 1, by striking out, wherever it occurs, the word "pauper."

Mr. HARDY. Mr. Chairman, I want to call the attention of this House to the fact of how wildly we go when we start out in a certain direction. My friends on the other side of the aisle almost to a man voted a moment ago for a proposition to exclude from this country the product of all labor of children under 14 years of age. If this law were passed and a similar law passed on the other side of the water, excluding from European countries the products of all child labor of this country of children under 14 years of age, what would be the result? Simply this, that not a yard of manufactured cotton goods could go from this country across the water, because nearly every bale of cotton in the South is grown partly by child labor; that is, labor of children under 14 years of age. Not a bushel of grain could go from the West, because nearly every farm there is worked in part by persons under 14 years of age.

Mr. BRYAN. Will the gentleman yield?

Mr. HARDY. No; I have not the time. Not only that, but Europe stands with reference to her manufactures somewhat as we stand with reference to our agriculture. By what process of reasoning do we, because we may be farmers, propose to say to the inhabitants of a great city, "Your children shall not work in any gainful occupation until they are 14 years of age or, if they do, we will not permit the products of their labor to enter into international trade." That is what the bill means. The sensible, statesmanlike way for all countries to do is to handle their problems of child labor each for themselves. Why, about a hundred years ago the problem of child labor was a great one in Great Britain. They were then employing small children long hours in the day and sometimes into the night, as much as 14 hours a day. Humane people began to object, but selfish interests claimed they could not compete without these long hours of labor for children. The struggle between selfish interest and humanity was long and many pitiful conditions were proven to exist. In the end humanity won. England did not seek to regulate the child labor of foreign countries, but she adopted laws limiting the hours of labor for children and providing healthful conditions under which they might labor, and England continued to more than hold her own in her competition with the world.

Will you say for my State under what conditions our children under 14 years of age shall work? Shall I for your State undertake to say in what way you shall regulate your child labor? Is the Federal Government of all the States prepared to legislate on the child-labor question for each of the States? I for one am not; and since I am not ready here to legislate for Missouri or California or New York or Georgia and determine for them at what age or in what field or for how many hours their children may work, surely I am not prepared to try to determine these things for England or Germany.

But, Mr. Chairman, my motion is to strike out the word "pauper" from this bill so that it will not affect the products of those defined by the bill as paupers—that is, those held in eleemosynary institutions. In all these institutions the inmates may and do produce things. Certainly, we ought not to want to take away the fruits of their labor. Yet by the principles of this bill every country and every State would shut its doors against the products of such labor of every other country or State, because they were made in an eleemosynary institution. We propose to say that we will not allow such products of a foreign country to be imported into this country. What a

strange perversion of humanitarianism for the twentieth century!

Gentlemen, shut your doors to the product of convict labor, shut convict labor out of the factories and farms in your State and mine, or, if you will not do so in your State, I am willing to shut the doors of my State, against the convict-labor products of factory and farm in your State; but do not shut your doors against the products of your poor, your weak, and your helpless or of the poor and weak and helpless of any land. When you pass this bill with the word "pauper" in it you are losing sight of the humanitarianism of the age and you are standing on the ground of selfishness alone and saying, "We will not help the weary, the weak, the poor, the helpless, but we will help the strong against the helpless." I believe, Mr. Chairman, that the word "pauper" ought to be stricken from this bill, and I move that it be stricken out.

Mr. GARDNER. Mr. Chairman, I rise to oppose the gentleman's motion. The gentleman says this side of the House voted almost unanimously to exclude the products of child labor from coming into this country. That is true. With one exception we on this side, Republicans and Progressives, voted unanimously for that proposition; but for the most part you Democrats on the other side of the House voted to admit the products of foreign child labor. Now, why did you vote us down? The gentleman from Illinois [Mr. BUCHANAN] says he voted against our child-labor amendment because he thought it ought to come into some other bill, by unanimous consent, at some future time. But, said he, "I am in favor of excluding the products of child labor from this country." I am in favor of excluding the manufactures of child labor from this country, Mr. Chairman. I want to see them excluded from interstate commerce as well. I want to see child labor stopped, just as does the gentleman from Illinois. Singularly enough, the gentleman from Illinois votes with the chairman of the Committee on Labor, the gentleman from Maryland [Mr. LEWIS], but he does not agree with him. What says the gentleman from Maryland? Oh, he does not say "I want to stop the products of child labor coming here from abroad," as does the gentleman from Illinois. Not a bit of it.

The gentleman from Maryland says, "You must not exclude the products of child labor, because if you do you will put an end to commerce with foreign nations." Could anything be more fantastic than a statement like that? I admit that there may be some further amendment needed if you adopt our amendments; but you have a chance in this bill to limit child labor. You will probably never reach the Palmer bill. Very likely it is not constitutional. You will never get it up by unanimous consent, as has been suggested. The situation is very puzzling. Here we have one gentleman—the chairman of the Committee on Labor—saying that he does not want to exclude the products of child labor, while the gentleman from Illinois [Mr. BUCHANAN] says that he, on the contrary, does want such a provision, but that he will not vote for it because the gentleman from Maryland, who does not want it, says that he is not going to vote for it.

I do not know whether it is constitutional or not to forbid the transportation of the manufactures of child labor. Formerly I believed that the courts would hold it unconstitutional. To-day I am by no means so sure. The courts have changed their views a good deal of recent years. My oath of office will not permit me to vote for a bill which I know to be contrary to the Constitution; but I believe that there is a fair chance that the courts would hold the Palmer antichild-labor bill constitutional. Therefore I shall vote for it if I get the chance.

Whether or not the Constitution gives us the right to exclude the manufactures of American child labor from transportation, at all events it gives us the right to prohibit the importation of manufactures on which children have been employed. Inasmuch as I believe that child labor ought to be suppressed, I give my vote to exclude the manufactures of child labor from importation into this country.

Mr. LEWIS of Maryland. Mr. Chairman, I move that all debate on this amendment and section be concluded in five minutes.

Mr. TAYLOR of Colorado. Mr. Chairman, I want to offer an amendment.

Mr. MANN. We have another amendment on this side.

Mr. LEWIS of Maryland. Well, I will make it 10 minutes. I move that all debate on this section and amendments thereto close in 10 minutes.

The CHAIRMAN. The gentleman from Maryland asks unanimous consent that all debate on this section and all amendments thereto close in 10 minutes. Is there objection?

There was no objection.

Mr. TAYLOR of Colorado. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. There is already an amendment pending, offered by the gentleman from Texas [Mr. HARDY]. The question is on the amendment offered by the gentleman from Texas.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Colorado [Mr. TAYLOR].

The Clerk read as follows:

Page 2, line 17, after the word "prohibited," insert the following: "That the shipment or transportation in any manner or by any means whatsoever of any goods, wares, or articles of merchandise of any nature, kind, or description whatsoever, which, or any of the materials in which, are or have been made or manufactured in whole or in part by the labor of convicts or inmates of penitentiaries, prisons, jails, houses of correction, or reformatories, whether under contract or otherwise, from one State, Territory, or District of the United States, or place noncontiguous to but subject to the jurisdiction thereof, or from any foreign country into any State, Territory, or District of the United States, or place noncontiguous to but subject to the jurisdiction thereof, which said goods, wares, or articles of merchandise are intended by any person interested therein to be received, possessed, sold, disposed of, or in any manner used in violation of any law of such State, Territory, or District of the United States, or place noncontiguous to but subject to the jurisdiction thereof, is hereby prohibited."

Mr. LEWIS of Maryland. Mr. Chairman, I make the point of order that this amendment is not germane.

Mr. TAYLOR of Colorado. Mr. Chairman, on the 4th of this month the House passed a bill which provided that convict-made goods transported from one State into another should be subject to the laws of the State to which they were shipped. This pending bill provides for the prohibition of convict-made goods coming from foreign countries. The amendment I now offer prohibits the transportation of convict-made goods from one State to another. It seems to me that it is highly important and germane to this bill and that it ought to be adopted.

In my judgment, it is ten times more important in prohibiting convict-made goods going from one State to another than from coming in from foreign countries. It seems to me that what we want to-day is a law to prevent the States from shipping convict-made goods from one State to another. In other words, making States take care of their convicts and the products of their labor. We believe in Colorado in working them on the public roads and not manufacturing goods and shipping them into another State in competition with the free labor of that State. I have a bill, H. R. 4875, prohibiting the right of interstate transportation to the products of any mill, factory, or manufacturing establishment in which females employed are permitted to work more than 8 hours in any one day or more than 6 days or more than 48 hours in any one week; and if the Chairman holds that it is germane to this bill I intend to offer it as an amendment.

The amendment which I offered a few moments ago and which the Chairman ruled out on the point of order of the gentleman from Illinois [Mr. MANN] was my bill H. R. 4874, prohibiting the right of interstate transportation to the products of any factory or mine in which children under 14 years of age are employed or permitted to work.

The amendment which I now offer is my bill H. R. 4878, and which I hope will be adopted, as follows:

That the shipment or transportation in any manner or by any means whatsoever of any goods, wares, or articles of merchandise of any nature, kind, or description whatsoever, which, or any of the materials in which, are or have been made or manufactured in whole or in part by the labor of convicts or inmates of penitentiaries, prisons, jails, houses of correction, or reformatories, whether under contract or otherwise, from one State, Territory, or District of the United States, or place noncontiguous to but subject to the jurisdiction thereof, or from any foreign country into any State, Territory, or District of the United States, or place noncontiguous to but subject to the jurisdiction thereof, which said goods, wares, or articles of merchandise are intended by any person interested therein to be received, possessed, sold, disposed of, or in any manner used in violation of any law of such State, Territory, or District of the United States, or place noncontiguous to but subject to the jurisdiction thereof, is hereby prohibited.

Mr. LEWIS of Maryland. Mr. Chairman, this is the same amendment in principle that was offered and that the Chair held not germane.

The CHAIRMAN. The bill under consideration prohibits the importation of goods manufactured in a certain way by certain persons. This amendment provides for the transportation of goods between the States, and refers to domestic commerce, and therefore is not germane to the bill. The Chair sustains the point of order.

Mr. ANDERSON. Mr. Chairman, I offer the following amendment, to come in at the end of the section.

The Clerk read as follows:

And all goods, wares, and merchandise manufactured in whole or in part by the labor of children under 14 years of age, or in the manufacture of which the labor of children under 14 years of age has been employed, either directly or indirectly, in any manner and for any purpose, or in the manufacture of which has been used any material prepared, manipulated, or assembled by children under 14 years of age,

and all wholly or partly manufactured articles, goods, wares, or merchandise, or wrappers, or containers, or attachments of merchandise, separately, or a part of any goods, wares, and merchandise upon which, or any part of which, has been employed in any manner the labor of children under 14 years of age, shall not be entitled to entry at any of the ports of the United States, and the importation thereof is hereby prohibited.

Mr. LEWIS of Maryland. Mr. Chairman, I make a point of order against that.

Mr. MANN. It is not subject to a point of order; it is more limited than the other amendment that the Chair held in order.

Mr. LEWIS of Maryland. The subject has been disposed of by a vote of the House. The operation of this amendment would not be distinguished from the first one disposed of.

Mr. MANN. The first amendment, as the gentleman from Maryland stated, applied to all goods, and, as he claims, it applied to tea and coffee. It applied to all goods produced in the field. This amendment applies only to manufactured goods.

Mr. LEWIS of Maryland. The last amendment applied to manufactured goods and was ruled out.

Mr. MANN. That is still another proposition. The mere fact, by the way, that the same substance might be contained in different language does not make an amendment subject to a point of order. This amendment is in the language of the bill, modified only by the fact that it applies to manufactured goods in which child labor is used in the manufacture of and in gathering and assembling the elements used in the manufacture of goods. It is not so broad as the other amendments which have been voted upon.

The CHAIRMAN. The Chair desires to say that in his opinion this amendment is, to all intents and purposes, the same as the amendment which the committee rejected a short time ago, and therefore sustains the point of order.

Mr. MANN. Mr. Chairman, before the Chair rules, the Chair does not undertake to say that the Chair determines whether two amendments are alike? That is not for the Chair to determine. That goes to the merits of a proposition. If, as the Chair has stated, two amendments are to all intents and purposes the same, then the Chair, having ruled the other amendment in order, must rule this one in order.

The CHAIRMAN. But the Chair begs to state to the gentleman from Illinois that it is not within the power of a member of the committee to keep offering the same amendment over and over again with but one meaning, though it may be in a little different language; it means the same thing.

Mr. MANN. It is within the power of a member of the committee, when he is recognized, to offer any amendment which is germane to the bill. This is not the language of the previous amendment, and the Chair can not undertake to say whether the committee prefers one form of language rather than another form of language. Here is the same proposition that may be involved in another proposed amendment. One gentleman offers an amendment in one form of language, and the committee does not determine to use that form of language. That fact does not prevent the same identical proposition, so far as the substance is concerned, from being offered in another amendment.

Mr. HARDWICK. Mr. Chairman, will the gentleman yield?

Mr. MANN. Certainly.

Mr. HARDWICK. Will the gentleman agree to the proposition that you could not offer the identical proposition that has been defeated?

Mr. MANN. Oh, certainly you can not—not twice in the same day, at any rate.

Mr. HARDWICK. Why is not this the same thing in principle?

Mr. MANN. Why, any one can see. Here is a question in reference to child labor. The committee voted upon one proposition. Objection was made to the form of the proposition. That was the main objection that was offered.

Mr. HARDWICK. That is just the gentleman's idea. The proposition was defeated upon its merits.

Mr. MANN. The proposition that was presented was defeated.

Mr. HARDWICK. Yes.

Mr. MANN. I can not tell whether the committee will defeat the proposition when presented in a proper form, in the opinion of the committee.

Mr. HARDWICK. Can a gentleman simply change the form and present the same substantive proposition one time after another?

Mr. MANN. Certainly he can.

Mr. HARDWICK. I do not think he can.

The CHAIRMAN. The Chair thinks the first amendment was offered in connection with language already in the bill. The amendment which is now offered by the gentleman from Minnesota [Mr. ANDERSON] is in substance the same as the amendment offered before, omitting the particular language used at that particular time, but does not change the meaning of the amendment, and the Chair thinks that under the rules this amendment is not in order.

Mr. MANN. Mr. Chairman, for the reasons stated by the Chair, I most respectfully appeal from the decision of the Chair.

The CHAIRMAN. The gentleman from Illinois appeals from the decision of the Chair, and the question is, Shall the decision of the Chair stand as the judgment of the committee?

Mr. MANN. Mr. Chairman, I desire to be heard upon that. The Chair has ruled that because an amendment was voted down in committee which reads, "Insert on page 1, line 4, after the word 'pauper,' the words 'by children under the age of 14 years,'" that, therefore, you can not offer an amendment, which the Chair says is the same in substance, at the end of the section, about 15 or 20 lines in length, possibly more, forbidding the importation of manufactured goods produced in whole or in part by the labor of children under 14 years of age. The Chair gives as his reason that the amendments are substantially the same. That is to say, the Chair passes on the language which the committee may desire to use. Whoever before heard that when you are endeavoring to perfect a bill, and you have a substantive proposition under consideration, that voting down one amendment in one form of language upon that subject precludes the opportunity to vote upon another form of language on the same subject? The Chair, a very distinguished Member of this House, upon reflection himself, I think, will see that his ruling is wrong. One is not required when an amendment is offered to offer all kinds of amendments or substitutes for that amendment. In fact, you are limited under the rules to the number of amendments which may be offered and which may be pending at one time to bring the matter before the committee. The committee votes down one form of language and then the Chair rules that a more restrictive form of language can not be presented to the committee or to the House, because the Chair thinks it is the same thing. The Members of the House should have the opportunity of determining whether it is precisely the same thing in meaning when the language is different. The Chair will not pretend to say that the language is the same because it is evident that one line is not precisely the language of 20 or 30 lines. Nor is the meaning the same. The first amendment, it was contended by the gentleman from Maryland, covered farm products. That was the main argument against the first amendment. Here is an amendment restricted to manufactured articles, and if the decision of the Chair shall stand as the decision of the committee and become the parliamentary practice in this body, Congress might as well adjourn the House as soon as it meets and let the Chair write the laws.

Mr. LEWIS of Maryland. Mr. Chairman, there were two amendments dealing generally with this subject. The first one did deal with farm products, and we voted it down. The second one dealt with manufactured products, and was likewise voted down. The third one, as the Chair has stated, possesses the same effect as the second one, that has already received disposition at the hands of the committee. If a mere shifting from similes 1, 2, 3, 4, 5, 6, and 7 for dilatory purposes can be accomplished, then the House is unable to protect itself by any reasonable rule. Some authority must determine those matters, and the Chair, of course, is that authority, and I submit to the Chair that he ruled correctly in this matter and ought to be sustained.

Mr. LENROOT. Mr. Chairman, I have the highest respect for the judgment of the Chair; but I think if the Chair had carefully examined this amendment, he would not have come to the conclusion that he did, nor has the gentleman from Maryland stated the effect of the amendment offered by the gentleman from Minnesota. The amendment offered by the gentleman from Michigan applied to all goods, wares, and merchandise produced, and, as the gentleman from Illinois has well said, it was contended, and properly so, by the gentleman from Maryland that that would include products of the field as well as products of the factory. Then, later, the gentleman from Washington [Mr. BRYAN] offered an amendment making it apply only to products of the factory; in other words, manufactured articles. Now comes the gentleman from Minnesota, and his amendment applies to products of the factory—in other words, manufactured products—and also, Mr. Chairman, all material entering into that product in which child labor has been employed; so I respectfully submit and state to the committee that this amendment is absolutely different from either the amendment proposed by the gentleman from Michigan or

that proposed by the gentleman from Washington, and therefore I submit it is in order.

The CHAIRMAN. The question is, Shall the decision of the Chair stand as the judgment of the committee?

The question was taken.

The CHAIRMAN. The Chair is in doubt. Those favoring the proposition that the decision of the Chair shall stand as the judgment of the committee will rise and stand until they are counted.

The committee divided; and there were—ayes 72, noes 45.

So the decision of the Chair was sustained.

Mr. RAKER. Mr. Chairman——

Mr. LEWIS of Maryland. Mr. Chairman, has not the time expired for discussion of amendments?

The CHAIRMAN. There are five minutes remaining.

Mr. RAKER. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

After the word "prohibited," line 17, page 2, insert the following: "That all goods, wares, and merchandise produced in whole or in part by convict, pauper, or prison labor, or in the production of which convict, pauper, or prison labor has been employed, either directly or indirectly, in any manner and for any purpose, or in the production or manufacture of which has been used any material prepared, manipulated, or assembled by convict, pauper, or prison labor, and all materials, wholly or partly finished articles, goods, wares, or merchandise, or wrappers, or containers, or attachments of merchandise, separately, or a part of any goods, wares, and merchandise, all the foregoing upon which, or any part of which, has been employed in any manner the labor of convicts, or of prisoners confined in any jail, penal institution, workhouse, or other place of restraint, detention, or occupation permitted, established, and set aside to be utilized by or for criminals or detained persons in any foreign country, and whether the same be the product of the field, the quarry, or manufacturing establishment, any part of which, or the materials entering which, have been produced, created, manipulated, or manufactured at any state, in whole or in part, by convict, pauper, or prison labor, or by detained persons in any part of the United States, shall not be entitled to enter or be introduced, or attempted to be entered or introduced, into the commerce of the United States, and the entry or introduction thereof into the commerce of the United States is hereby prohibited."

Mr. HARDWICK. Mr. Chairman, I make a point of order against the amendment.

Mr. SABATH. Mr. Chairman, I make a point of order against the amendment.

Mr. HARDWICK. I make the point of order that the amendment is not germane to the pending bill; that the question has already been disposed of.

The CHAIRMAN. Does the gentleman from California desire to be heard?

Mr. HARDWICK. As I understand the amendment the gentleman proposes that the language in this bill shall be applied to interstate commerce, is that correct?

Mr. RAKER. It uses the same language as applied to section 2.

Mr. HARDWICK. And applies to interstate commerce?

Mr. RAKER. No; the purpose is, section 2 of the bill prohibits any of these goods from being used in commerce of the United States, and after, under section 3, they may be forfeited. This provision is intended to make it mandatory that they are prohibited. After sections 2 and 3 are applied, it will exclude all foreign importations under section 1 as well as interstate commerce.

Mr. HARDWICK. I understand the gentleman from California to say that he admits the amendment was to apply to the language of the bill as to interstate commerce. I take it that is what the amendment really is, and if so, it is undoubtedly not in order, because it is not germane. I can not tell from the gentleman's last statement to what it does apply.

The CHAIRMAN. The Chair begs to state the language here reads:

Or attempts to be entered or introduced into the commerce of the United States, and the entry or introduction thereof into the commerce of the United States is hereby prohibited.

The Chair thinks that means interstate commerce.

Mr. RAKER. Well, the real purpose of the amendment is to round out section 1 and to make that applicable to sections 2 and 3 of the bill.

Mr. HARDWICK. Is it to make it interstate commerce?

Mr. RAKER. I will answer that in a moment.

Mr. HARDWICK. I just wanted to know.

Mr. RAKER. I will be specific in the matter. It means any goods, wares, or merchandise manufactured in places prohibited in this section shall not enter the commerce of the United States.

Mr. HARDWICK. Does that mean interstate commerce?

Mr. RAKER. That means foreign, interstate, and all.

Mr. HARDWICK. I insist on the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. MOORE. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

Mr. LEWIS of Maryland. Mr. Chairman, I submit the time agreed to applied to debate as well as amendments on the section.

The CHAIRMAN. The Chair will state that it applied to the debate.

Mr. MOORE. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE. Will there be any time for discussion of the amendment about to be offered?

The CHAIRMAN. The Chair begs to state there are five minutes for debate on this section remaining. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, line 4, after the word "labor," insert "or labor employed for more than eight hours per day."

Mr. LEWIS of Maryland. I make a point of order, Mr. Chairman, that it is not germane.

Mr. MOORE. Mr. Chairman, will the Chair hear me for a moment on that?

The CHAIRMAN. On the point of order?

Mr. MOORE. Yes.

The CHAIRMAN. The Chair will hear the gentleman on the point of order.

Mr. MOORE. Of course, the purpose of the amendment is to prevent the importation of goods on which labor abroad has been employed for more than eight hours a day. In order to argue the point of order it seems to be necessary to state the real purpose of the amendment.

If we have the power to bar goods that are made by convict labor or by children under 14 years of age, it seems to me we also have the power to bar goods made by convict labor or by child labor that is employed for more than eight hours per day. The committee has rejected the child-labor amendment, but nevertheless if foreign child labor is employed for more than eight hours a day, as we are informed it is in Italy, in Germany, and in Great Britain, it seems entirely proper for us to say that that foreign child-labor product shall not come into this country to compete with American labor that works eight hours a day. The whole purpose of this bill is to protect the labor of this country, the child labor as well as the full-grown labor, although it is said that child labor conflicts with full-grown labor.

Now, this House has had one or two opportunities to vote whether we should admit convict-made goods from abroad to compete with free-made goods in the United States. I contend that an amendment to a labor bill which proposes to limit the imports of the product of labor in foreign countries which come unfairly into competition with the labor of the United States is not only germane but is also wholesome. Here is a chance for our friends on the other side of the Chamber, who have just voted that they will permit child-made goods to come into the United States to compete with the free-labor products of the United States, to vote down foreign-made goods made by foreign children, convicts, or any other kind of labor that works more than eight hours a day. It was voted down in the tariff-bill discussion, but here is a chance to vote upon it again.

Mr. Chairman, it seems to me this amendment is germane. I have stated what I want to say: This bill, in the interest of the labor of the United States, is to prevent certain kinds of goods passing between the States; and, if that is the purpose of the bill, surely we have a right to provide against unfair labor products coming in from foreign countries to compete with goods that pass between the States or that are sold wholly within the States.

Mr. LEWIS of Maryland. Mr. Chairman, I believe the amendment is not germane. It is not available under the rules of the House in regard to the consideration of this section—the 10 minutes within which all amendments and further debate must be restricted.

Mr. GARDNER. You can not shut off amendments.

The CHAIRMAN. The Chair does not think the gentleman from Maryland is correct in that the amendments must be limited to 10 minutes. The debate is limited to 10 minutes.

Mr. LEWIS of Maryland. I may not have succeeded in conveying my thoughts in words, but my idea was to have the debate, as well as the amendments, restricted to 10 minutes.

Mr. GARDNER. Such a motion as that would not be in order under the rules of the House. The gentleman can not shut off amendments.

Mr. FOWLER. Mr. Chairman, has the Chair ruled upon the question?

The CHAIRMAN. The Chair has not ruled yet, but is likely to do so.

Mr. FOWLER. All right. I am very anxious to have him do so.

Mr. MOORE. May I ask that the gentleman's time be extended? I would like to know what he has to say in opposition.

The CHAIRMAN. The Chair will be glad to hear from the gentleman from Illinois [Mr. FOWLER].

Mr. FOWLER. Mr. Chairman, I have no thoughts to offer with reference to the point of order. I know the Chair has made up his mind on that question. I am anxious to have a ruling.

Mr. MOORE. How do you stand on the 8-hour question? That is the point.

The CHAIRMAN. The Chair makes the statement that this bill is to provide for the prohibiting of the importation of goods made by labor of certain classes in foreign countries, and this amendment provides that that labor must be employed for only eight hours a day. While the Chair begs to state he is in hearty sympathy with any eight-hour provision, yet, as Chairman of the Committee of the Whole, he feels constrained to sustain the point of order. The Clerk will read.

The Clerk proceeded with the reading of the bill.

Mr. PAYNE. Mr. Chairman, I want to offer a new section to come in after section 1.

Mr. LEWIS of Maryland. Mr. Chairman, I submit it is now too late. The Clerk had proceeded to read.

The CHAIRMAN. The Chair thinks that it is proper the amendment should be offered. The Clerk will report the amendment.

The Clerk read as follows:

Amend, on page 3, after the word "prohibited," in line 3, by inserting the following section as a new section:

"That no goods, wares, articles, and merchandise, except immediate products of agriculture, forests, and fisheries, manufactured wholly or in part in any foreign country, principally by children under 14 years of age, in countries where they have no laws regulating child labor, shall be entitled to entry at any of the ports of the United States, and the importation thereof is hereby prohibited. Any shipment consigned for entry at any of the ports of the United States of goods, wares, articles, and merchandise "——

Mr. LEWIS of Maryland. Mr. Chairman, I make a point of order against that.

Mr. PAYNE. I wish I could inform the gentleman what it is.

Mr. LEWIS of Maryland. I make the point of order, Mr. Chairman.

Mr. PAYNE. The gentleman may learn something if he hears the whole section read.

The CHAIRMAN. The Chair will state that the gentleman has a right to make a point of order.

Mr. MANN. Oh, not until the reading is over.

Mr. PAYNE. I insist, Mr. Chairman, that the section shall be read.

Mr. MANN. What is the point of order, Mr. Chairman?

Mr. PAYNE. No one knows.

Mr. MANN. Mr. Chairman, I ask that the gentleman state what his point of order is. The gentleman made a point of order and I asked him what the point of order is. I think he should state his point of order.

Mr. LEWIS of Maryland. Mr. Chairman——

Mr. MANN. The gentleman can not take me off the floor when I am asking him to state his point of order.

Mr. LEWIS of Maryland. The point of order is that the subject matter has already been disposed of by the House.

Mr. PAYNE. It never has been disposed of. It is a new proposition.

Mr. MANN. I submit that that can not be determined until after it has been read.

Mr. LEWIS of Maryland. Also that it is dilatory.

Mr. PAYNE. Mr. Chairman, I insist that my amendment be read. It is not long, Mr. Chairman.

Mr. MANN. I submit, Mr. Chairman, the Chair can not determine whether it is the same, even with the omnipresent knowledge that the Chair has, until it has been read. [Laughter.]

Mr. TAYLOR of Colorado. The gentleman from Illinois seems to have known before it was read whether it was germane or not.

Mr. MANN. So did the Chair, and so did everybody else in the House, except the gentleman from Colorado. [Laughter.]

Mr. TAYLOR of Colorado. We did not know what it was at all, then.

The CHAIRMAN. The Clerk will report the remainder of the amendment.

The Clerk read as follows:

except immediate products of agriculture, forests, and fisheries, manufactured in any foreign country, province, or dependency, where the industrial employment of children not regulated by law shall be accompanied by an affidavit of the shipper of such merchandise or his legal agent to the effect that the merchandise covered by the invoice has not been manufactured principally by children under 14 years of age, the form of the affidavit to be prescribed by the Secretary of the Treasury, who is also authorized and directed to issue such further regulations and to collect all information pertinent thereto through cooperation with the Consular Service of the United States as may be necessary for the enforcement of the provision.

Mr. PAYNE rose.

Mr. FOWLER. Mr. Chairman, I reserve a point of order against the amendment. If the gentleman from New York wants to make a speech, I will reserve my point.

Mr. PAYNE. Mr. Chairman, I think the language is strictly in order. It is different from the other amendments that have been offered. It relates to the employment of children under 14 years of age. It proposes a method by which that is to be determined. It is entirely different from the other amendments that were said on that side of the House to be "crude and ill considered." [Laughter.] This provision was well considered. When I give the authority the gentlemen will all think so.

Mr. HOWARD. Go ahead and make your speech.

Mr. PAYNE. Mr. Chairman, is the point of order made or reserved?

The CHAIRMAN. It is reserved, as the Chair understands, unless the gentleman from Maryland [Mr. LEWIS] makes the point of order.

Mr. LEWIS of Maryland. I make the point of order, Mr. Chairman.

Mr. PAYNE. Ordinarily I would be content to wait without attempting to make a speech.

Mr. MANN. Mr. Chairman, I do not see how it is possible for the Chair to hold this amendment to be out of order. The Chair has ruled that an amendment relating to goods made by children under 14 years of age was in order on this bill, so far as concerns the importation of such goods. It is true that the Chair a while ago made an erroneous ruling, which he will take back on the first opportunity he gets hereafter [laughter], when he undertook to say that the Chair would determine whether one form of language was more suitable for a committee to adopt than another. Now, the point of order is made——

Mr. LEWIS of Maryland. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LEWIS of Maryland. Will it be in order to withdraw the point of order that I made?

The CHAIRMAN. Yes.

Mr. LEWIS of Maryland. I will do so, then.

Mr. MANN. I thought I would get results. [Laughter on the Republican side.]

The CHAIRMAN. The gentleman from Maryland withdraws his point of order.

Mr. PAYNE. Mr. Chairman, if I can borrow that amendment from the reporter, I would like to do so for a moment. It is the only copy I have.

Mr. LEWIS of Maryland. It is not debatable, Mr. Chairman. The time for debate has been used up under the resolution adopted by the House.

Mr. MADDEN. This is a new section.

Mr. LEWIS of Maryland. This is not a new section. It is an amendment to the old section.

The CHAIRMAN. The Chair understands that this is offered as a new section?

Mr. PAYNE. Yes; as a new section—section 2.

The CHAIRMAN. The gentleman will proceed.

Mr. LEWIS of Maryland. The first section has not been disposed of yet. There can not be a second section until the first has been disposed of.

Mr. PAYNE. The first section has been disposed of.

The CHAIRMAN. The Chair will state that when the first section has been disposed of and no further amendments are offered to it, the offering of a new section would be in order.

Mr. LEWIS of Maryland. If that is the proposition, that is a different matter. I move now, Mr. Chairman, that all debate on this amendment be concluded in 10 minutes.

Mr. PAYNE. That will not be in order until debate has been had.

The CHAIRMAN. The Chair will hold that that will not be in order now.

Mr. PAYNE. Now, Mr. Chairman, if I can have the attention of the gentleman from Maryland [Mr. LEWIS] and some others of the gentlemen who seem to have some severe qualms about an amendment being offered to this bill, I will say that I ought to have his and their support. When an amendment bearing some relation to this one was offered a few moments ago, the gentleman from Maryland said an amendment of that kind ought to be well considered; that it was dangerous to put it in a bill without having some committee consider it. I offer now

an amendment which has been well considered by a committee—not a committee of this House, but of the Senate—and it was put in as an amendment in the Senate to the blessed Underwood tariff bill that has created so much destruction in this country in the past few months. [Laughter on the Republican side.] This is one of the good amendments that you struck out. I do not know why it went out. I was an honorary member of the committee having it in charge [laughter], but only honorary.

Mr. GARDNER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from New York yield to the gentleman from Massachusetts?

Mr. PAYNE. Yes. I was not permitted to be present at the time it was discussed in the committee or in conference.

Mr. GARDNER. Did the gentleman say he was present at the seance?

Mr. PAYNE. I was not present.

Mr. GARDNER. He was not responsible for the manifestations? [Laughter.]

Mr. PAYNE. No; not in the slightest degree. That fact takes away the whole objection that the gentleman made to another amendment similar to this, which was offered a few minutes ago; and which would relieve the gentleman from Texas [Mr. HARDY], who was speaking here a few moments ago, who thought this side of the House was trying to put on this bill some crude amendment in order to defeat the bill in another place. The gentleman from Maryland [Mr. LEWIS] has had some worry about the danger of its being defeated in another place; but I offer an amendment that has been adopted in another place, so that there is no question about that.

I said I was not permitted to be present when this was considered in conference. I did not even hear the report of the Democratic caucus upon this amendment when they considered it before they came in here to vote. This is something that you had a right to consider some months ago. I am not going to accuse any of you of having ever considered either this or any other part of that tariff bill or the amendments of the Senate. I know your consciences were in the keeping of some one else as regards the greater part of that bill and the amendments of the Senate; but this amendment has been carefully considered in another place. Gentlemen, I want to tell you that this amendment would do the business. Why it was stricken out I do not know. I have heard some rumors that to satisfy some of the brethren it was stated that it would be taken up later and put into a new bill. The later time has come right now, and if it is ever going into a bill it ought to go into this bill. [Applause on the Republican side.] We are considering this subject now. What better time can there be?

Now, do not think you are going to fool your people when you go home when they complain to you about this child-labor business. Why, this will satisfy even the statutes of Georgia, and no man can tell whether that means 7 years or 12 years or 14 years as the lowest limit of age. It will satisfy even the utmost limits of that. It is only a step in the right direction, to be sure, but it is in the right direction.

You can not fool the labor people about this proposition. It is up before you. Let us see if you will have a solid Democratic vote on that side, with the exception of the half dozen honorable men who voted independently; and I honor the men on that side who had the courage to stand up here in the face of this Democratic clamor to stand together and to follow some one somewhere else, to follow the invisible hand that guides legislation, and tells you what to do about matters great and small. [Applause and laughter on the Republican side.] Come up here and show your independence. When you go home to your people and your labor unions ask you how you stand on a 14-year child-labor bill, tell them how you came to vote against an amendment that was well considered in the Senate and put into the Underwood tariff bill, and that only went out because you wanted to wait until the gentleman from Maryland [Mr. LEWIS] could fix up some amendment that would cover it into a bill to be brought in here in the future. Vote it in now, gentlemen. [Applause on the Republican side.]

Mr. LEWIS of Maryland. Vote, Mr. Chairman.

The CHAIRMAN. The question is upon the adoption of the amendment.

The question being taken, the Chairman announced that the noes appeared to have it.

Mr. MANN. I ask for a division.

The committee divided; and there were—ayes 43, noes 70.

Mr. MANN. I ask for tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. LEWIS of Maryland and Mr. PAYNE.

The committee again divided; and the tellers reported ayes 45, noes 68.

Accordingly the amendment was rejected.

The Clerk read as follows:

SEC. 2. That if any consigner, seller, owner, shipper, importer, consignee, agent, or other person or persons shall enter or introduce, or attempt to enter or introduce, into the commerce of the United States any prison or pauper made goods, wares, and merchandise, as defined and covered by the provisions of section 1 of this act, such prohibited articles and the package or packages in which contained shall be seized and proceedings taken against the same as hereinafter prescribed.

With the following committee amendment:

Page 3, line 4, strike out "consigner" and insert "consignor."

The amendment was agreed to.

The Clerk read as follows:

SEC. 3. That all goods, wares, and merchandise covered by section 1 of this act shall be liable to be proceeded against, probable cause having been shown, in any district court of the United States within the district where the same is found and seized, for confiscation by a process of libel for condemnation. And if any such goods, wares, and merchandise are condemned as being within the prohibition of this act, the same shall be forfeited to the United States of America and delivered to the Secretary of the Treasury for disposition as provided for in section 8 of this act.

The proceedings of such libel cases shall conform as near as may be to the proceedings in admiralty, except that either party may demand trial by jury of any issue of fact joined in any such case, and all such proceedings shall be at the suit and in the name of the United States.

Mr. WILSON of Florida. Mr. Chairman, I should like to ask the gentleman from Maryland what is meant by "pauper-made goods"?

Mr. LEWIS of Maryland. Pauper-made goods are goods made by people in eleemosynary institutions who are maintained partly or in whole at public expense. The definition is in section 9 of the bill.

The Clerk read as follows:

SEC. 4. That if any consignor, seller, owner, shipper, importer, consignee, agent, or other person or persons shall knowingly or with notice enter or introduce, or knowingly or with notice attempt to enter or introduce, into the commerce of the United States any goods, wares, or merchandise the importation of which is prohibited by this act, such person or persons shall, upon conviction, be fined for each offense a sum not exceeding $5,000, or be imprisoned for a time not exceeding two years, or both, in the discretion of the court: *Provided*, That nothing in this section shall be construed to relieve merchandise so prohibited from seizure and disposition as elsewhere provided by law.

With the following committee amendment:

Page 4, line 6, strike out the words "or with notice" and insert the words "and fraudulently."

The amendment was agreed to.

Also the following committee amendment:

Page 4, line 7, strike out the words "or with notice" and insert the words "and fraudulently."

The amendment was agreed to.

[Mr. SMITH of Minnesota addressed the committee. See Appendix.]

The Clerk read as follows:

SEC. 6. That the arrival of any goods, wares, and merchandise prohibited by this act within the territorial limits of the United States with the intent to land, or the existence of any other facts constituting a violation of this act, shall be deemed an attempt to enter and import: *Provided*, That when probable cause is shown any collector of customs that entry of any such goods, wares, and merchandise is attempted, he shall refuse entry thereof until the owner, consignee, agent, or claimant of such goods shall personally appear before him and subscribe to a declaration on entry that the merchandise is not prohibited by this act, the form of which declaration shall be prescribed and promulgated by the Secretary of the Treasury.

Mr. WILSON of Florida. Mr. Chairman, I move to strike out the last word, for the purpose of asking the gentleman from Maryland if he does not think that it may sometimes work a hardship to require the owner, consignee, agent, or claimant of such goods to personally appear and subscribe to a declaration on entry?

Mr. LEWIS of Maryland. The gentleman is referring to the requiring of affidavits?

Mr. WILSON of Florida. Yes.

Mr. LEWIS of Maryland. It simply provides that when probable cause is shown any collector of customs that entry of any such goods, wares, and merchandise is attempted, he shall refuse entry thereof until the consignee, agent, or claimant of such goods shall personally appear before him and subscribe to a declaration that the merchandise is not prohibited by this act, and so forth.

Mr. WILSON of Florida. Does that mean that the person whose name is in the bill of lading must appear?

Mr. LEWIS of Maryland. It might be any of these parties, the owner, consignee, or agent, and that might be an attorney.

Mr. WILSON of Florida. Assume this situation, that it was not consigned to the agent.

Mr. LEWIS of Maryland. It might be consigned to any party; the agent or owner or consignee would be entitled to present the case on behalf of the goods.

Mr. WILSON of Florida. Mr. Chairman, I withdraw the pro forma amendment.

Mr. STAFFORD. Mr. Chairman, I want to ask the gentleman from Maryland a question, and I move to strike out the last word. I do not know how it strikes the other members of the committee, but I call the attention of the gentleman from Maryland to this language:

That the arrival of any goods, wares, or merchandise prohibited by this act within the territorial limits of the United States with the intent to land.

You can not ascribe the intent to goods.

Mr. LEWIS of Maryland. The implication is that that is the general purpose under which the goods are moving, that it contains the intent.

Mr. STAFFORD. But the goods do not contain the intent?

Mr. LEWIS of Maryland. Mr. Chairman, I may say to the gentleman that this bill has been passed upon by the Treasury authorities, and we have taken the best advice and counsel with respect to its language that we can find.

Mr. STAFFORD. Mr. Chairman, I have great deference for the opinion of the officials of the Treasury Department, but it seems to me that this language incorporated in this section is very awkward. If it has been submitted to the Treasury officials and meets with their approval, however, I do not care to press the matter.

Mr. LEWIS of Maryland. They made some corrective suggestions and let this clause stand.

The Clerk read as follows:

SEC. 8. That the Secretary of the Treasury be, and he is hereby, authorized and empowered, whenever goods, wares, and merchandise have been delivered to him pursuant to the provisions of section 3 of this act, to dispose of the same by donation to the American National Red Cross, or other national charitable organization, to be by such organization disposed of free of charge and without sale: *Provided*, That the Secretary of the Treasury shall have authority to destroy any of the goods described in this bill if, in his judgment, such goods were made by persons affected with disease or diseases capable of being transmitted to those using the goods under the provisions of this section.

Mr. WILLIS. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 5, line 24, strike out the word "bill" and insert in lieu thereof the word "act."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Ohio.

The amendment was agreed to.

Mr. JOHNSON of South Carolina. Mr. Chairman, I move to strike out the last word. I want to ask the gentleman in charge of the bill what reason there is, after goods are confiscated for violation of the terms of this act, that the goods shall be given away instead of being disposed of as other goods that are confiscated by the Government are disposed of and the proceeds turned into the Treasury?

Mr. LEWIS of Maryland. The reason, I think, is fundamental. The object of the legislation is to remove an element of unfair competition present in convict or pauper made goods. If the Treasury, after condemning the property, were to sell it at public sale, that element of unfair competition would be repeated, because the goods would be sold below the normal cost of manufacture, and thus would enter into mischievous competition with our products.

Mr. JOHNSON of South Carolina. Let me ask the gentleman if the goods are donated to any society or charitable organization, do they not take the place of just that quantity of goods, no matter by what kind of labor those goods are made?

Mr. LEWIS of Maryland. In some possible instances that might be true, but it has been the opinion that a charitable association such as the Red Cross has a great many more demands than it has purchasing power, and that, in their hands, these goods would be used for charitable purposes, and would not become as a matter of fact elements of competitive force.

Mr. JOHNSON of South Carolina. Suppose you carry this doctrine to its legitimate conclusion. There are other laws under which property being illegally used is confiscated. The law provides that the property shall be sold and the proceeds turned into the Treasury of the United States. For violation of the oleomargarine laws, under certain conditions, the goods are sold, and that certainly comes in competition with people who are obeying the law, and yet the Congress has not gone so far as to say that rather than put these goods on the market we will just give them away. I think the gentleman is carrying the doctrine of competition too far.

Mr. LEWIS of Maryland. Is it the gentleman's argument that we should not take any step at all in this connection unless we could make it complete and applicable to all instances where the Government has property for sale in its hands derelicto?

Mr. JOHNSON of South Carolina. I do not apprehend that there are going to be very many confiscations under this law, and that any very great harm will be done to the commerce of the country if a few goods are sold because they are condemned for violating the law. I withdraw the pro forma amendment.

The Clerk read as follows:

SEC. 9. That the term "pauper," as used in this act, shall be limited to those persons who are held or confined in eleemosynary institutions at the public expense in whole or in part.

Mr. MANN. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 6, line 6, after the word "part," add the words "and to adults who receive wages at the rate of less than $1 for each day while working, whether paid by the day, the piece, or otherwise."

Mr. LEWIS of Maryland. Mr. Chairman, I make the point of order that the amendment is not germane.

Mr. MANN. Mr. Chairman, I would like to be heard upon the point of order.

The CHAIRMAN. The gentleman from Illinois.

Mr. MANN. The bill, in section 1, endeavors to prohibit the importation into this country of goods made in whole or in part by convict, prison, or pauper labor. A good many inquiries have been made during the day as to what the term "pauper labor" means. What one gentleman says is pauper labor another gentleman says is not pauper labor. The committee therefore proposed to define pauper labor by a definition.

Now, if it is within the power of the committee to consider that definition at all, it is within the power of the committee to make a definition of pauper labor. It is within the power of the committee to say that pauper labor shall be anything except the labor of millionaires, and it is equally within the power of the committee to say that pauper labor shall be as it is in fact—pauper labor. If the definition were not in the bill, it is quite probable that a motion by way of amendment would not be in order to define it, and that we would be left to determine what "pauper" means. But here is the definition in the bill. It is that the term "pauper" refers to those who are held or confined in eleemosynary institutions at public expense, in whole or in part. That covers everybody in a hospital who is maintained in whole or in part at public expense. That covers everybody in a soldiers' home; that covers everybody in a deaf and dumb asylum or a blind asylum; that covers everybody in an eleemosynary institution, although in fact it may be an institution where they are paying to be retained there. Now, that definition going away outside of the ordinary definition of a pauper, it is within the power of the committee to add to the definition, and it is certainly germane to the definition.

Mr. LEWIS of Maryland. Mr. Chairman, the word "pauper" has a legal significance. The English language imputes to its use well-understood relations for the individual. He is an individual who has to be maintained at public expense. Now, not only must he be such an individual, but under section 9 of this bill he must be "held" or "confined" in an eleemosynary institution. To seek to fix the wages of all the human beings on this planet, some fifteen hundred millions outside of ourselves, by an unconsidered amendment like this, would be simply grotesque in any situation where Republican politics are not involved. I dismiss the amendment with that suggestion.

Mr. GARDNER. Mr. Chairman, I would like to be heard on the point of order.

Mr. LLOYD. May I ask the gentleman from Maryland: Does he mean to confine "pauper" to those in eleemosynary institutions? Is it not true that in the United States we have a number of paupers who are not in an eleemosynary institution?

Mr. LEWIS of Maryland. In the legal sense of the word a pauper is one being sustained at public expense. Now, ordinarily he may be in his own house or in somebody else's house, but under this section he must also be held or confined in some eleemosynary institution.

Mr. LLOYD. I am getting at that point. Now, a man in a private house who is kept by his relatives or his friends is a pauper——

Mr. LEWIS of Maryland. He is not a pauper in the legal sense of the word. He is not a pauper unless he be kept in whole or in part at public expense.

Mr. LLOYD. If he is maintained by members of his family, in whole or in part, in the event he was not able to maintain himself, then he would not be a pauper in that sense, but if he is in a private home and maintained by members of a community in that private home he is just as much a pauper as he would be if he were on the county farm, in the county infirmary, or any eleemosynary institution.

Mr. GARDNER. Mr. Chairman, I desire to call the Chair's attention to the only rule of this House which relates to germaneness. The rule reads as follows:

And no motion or proposition on a subject different from that under consideration shall be admitted under color of amendment.

Is the gentleman's proposed amendment different from the subject under consideration? No. On the contrary, section 9 of this bill relates only to one question, and what is that question? Section 9 is solely devoted to answering a conundrum, to wit, What is a pauper? Section 9 proceeds to define the word "pauper," so that there shall be no mistake in the interpretation of this law. It makes no difference what a pauper may signify in common parlance. Section 9 supersedes common parlance. It defines the meaning of the word "pauper" as used in this bill, not in some other bill. The rule of germaneness requires that an amendment must affect the particular subject which is under consideration.

The matter now under consideration is section 9 of this bill. Section 9 provides that the term "pauper" as used in this act shall be limited to those persons who are held or confined in eleemosynary institutions at public expense in whole or in part. The amendment offered by the gentleman from Illinois seeks to enlarge that limitation; nothing more. It does not matter how foolish the amendment of the gentleman from Illinois may be; it does not matter how impossible it may be to determine what wages are in a foreign country, the vortex of order does not engulf the wisdom or the foolishness of an amendment. It relates only to its parliamentary aspect. Mr. Chairman, originally parliamentary law never prohibited amendments which were not germane. The requirement of germaneness for amendments is of comparatively recent growth in parliamentary law. Formerly no point of order against an amendment would lie simply because the amendment was not germane to the matter under debate. Any amendment could be offered, whether germane or not. In the course of time it was found necessary to limit the power of amendment so that new questions might not suddenly be thrust upon the House. For that reason this rule was adopted, that no motion or proposition on a subject different from that under consideration shall be admitted under color of amendment. But the amendment offered by the gentleman from Illinois seeks merely to amplify the definition which we ordain for the word "pauper" as it is used in this bill. Can anyone contend that such an amendment or proposition is "on a subject different from that under consideration?"

The CHAIRMAN. The Chair begs to say that section 9 of the bill is to define what a pauper is for the purpose of the act, and, as the Chair views it, however ridiculous any amendment might appear to be, that is not the question to be taken into consideration by the Chair in deciding whether this amendment is in order or not. And, taking the view of the subject that this is a definition of the term "pauper," the Chair overrules the point of order.

The question now is on the amendment offered by the gentleman from Illinois [Mr. MANN].

Mr. LEWIS of Maryland. Mr. Chairman, I understand the purport of this amendment is to include nine-tenths of the laborers of all other lands as paupers, because, I guess, the proportion is not much below for those who get a dollar or less a day, excepting, perhaps, England and the Australian colonies.

Now, the suggestions that have been made earlier in the discussion are entirely apposite to this amendment. We should not be able to import many of the actual necessaries of life into this country, articles which can only be produced in other countries and other climates, if this amendment were to prevail. It surely would without any consideration strike down nearly all of our foreign commerce. I earnestly hope that the Members of the House, instead of making politics and endeavoring to develop political advantages at the expense of this serious effort at legislation, will vote this amendment down.

Mr. Chairman, I move now that all further discussion of this section and amendments thereto be restricted to five minutes from this time.

The CHAIRMAN. The gentleman from Maryland moves that debate on this section and all amendments thereto be limited to five minutes.

The motion was agreed to.

Mr. MANN. Mr. Chairman, I do not propose to detain the committee at this late hour in the afternoon on an amendment that every man in the committee ought to be able to determine upon by the reading of it. I am in favor of protecting the American laborer and the American manufactured article from the unfair competition of the cheap and debased labor of foreign lands. [Applause.]

Mr. FOWLER. Mr. Chairman, how much time is there left?

The CHAIRMAN. Four minutes.

Mr. FOWLER. Mr. Chairman, I would not take up any time at this late hour were it not for the fact that I can look out over my own country and find labor in America in many instances toiling for long hours on a wage below a dollar a day.

Ah, some of you say "where"? Do you come from the canneries anywhere in the United States? If you do, I invite your attention to the condition of the women, girls, and boys who are laboring there from 10 to 17 hours a day on a wage of less than a dollar a day; yes, from four to five dollars a week.

Mr. BRYAN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. FOWLER. No; I decline to yield.

Mr. BRYAN. I simply want to say that the gentleman is mistaken about the State of Washington. There is no such wage paid there, and no such hours are exacted.

Mr. FOWLER. Mr. Chairman, I do not know where the gentleman comes from except what he says about it. [Laughter.] But I do know that the reports on labor in the canneries of America show that the people work there for long hours—as much as 17 hours a day—at a wage less than a dollar a day, and I invite all doubting Thomases to a careful perusal of these reports.

Mr. Chairman, my colleague from Illinois [Mr. MANN] is always interesting on certain occasions. [Laughter.] He reminds me of a story I once heard told of an old gentleman who had never seen a telescope. An itinerant vender of this wonderful instrument appeared at his door late one evening and requested lodging for the night, which was cheerfully granted. While his good wife was preparing supper her husband learned that his guest was selling hand telescopes. The old gentleman never had heard of a telescope before, and he made anxious inquiry concerning its construction and use. The itinerant vender exhibited his sample and explained its wonderful magnifying powers and the splendid opportunities it afforded in the study of astronomy, telling him that it would make the moon look a hundred times larger than its ordinary size and bring it close enough to reach with his hand. The old gentleman became much interested and implored his guest to give him an opportunity to test the accuracy of this marvelous statement. The moon soon rose in the heavens to the proper height for a good view. The itinerant vender adjusted it properly on the moon and the old gentleman took a look at it. He was perfectly charmed with its wonderful revelations. The moon appeared to be so much larger and so much nearer than usual. He grasped the telescope in his left hand, reaching out with his right, as if to lay his hand on it, and began to walk toward it, and while under the spell of the new revelations he unguardedly wandered beyond the premises into a patch of weeds close by and fell into an old deserted cistern and was drowned. The next day at his funeral, which was largely attended, his wife did not appear to be very much depressed and showed but little signs of grief, but his two grown daughters were heartbroken and seemed to be perfectly distracted. One of them on observing the unconcerned demeanor of her mother went up to her, weeping bitterly, and threw her arms around her neck and said, "Oh, mother, isn't it perfectly awful, the way in which father met his death?" The mother looked down at her daughter and said, "Gertrude, I don't think it makes very much difference. If your father had been looking after things closer to home he would be alive now." [Laughter.]

Mr. Chairman, if my colleague from Illinois had been looking after things closer to home during his long service in Congress he might have some excuse for trying to regulate the wages of labor in foreign countries. He plays politics instead of statesmanship. [Laughter.]

Mr. MANN. That is very smart, indeed.

The CHAIRMAN. The time of the gentleman from Illinois has expired. The question is on agreeing to the amendment offered by the gentleman from Illinois [Mr. MANN].

The question was taken, and the amendment was rejected.

Mr. MANN. Mr. Chairman, I offer a further amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Illinois [Mr. MANN].

The Clerk read as follows:

Page 6, line 6, after the word "part," insert "and to adults who receive wages at the rate of less than 50 cents for each day while working, whether paid by the day, the piece, or otherwise."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 10. That the Secretary of the Treasury is hereby directed to prescribe such regulations as may be necessary for the enforcement of this act, and to annually report to Congress all violations of and

prosecutions under this act, together with his decisions and recommendations in regard thereto.

Mr. LEWIS of Maryland. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. FOSTER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 14330) to prohibit the importation and entry of goods, wares, and merchandise made in whole or in part by convict, pauper, or detained labor, or made in whole or in part from materials which have been made in whole or in part or in any manner manipulated by convict or prison labor, and had come to no resolution thereon.

ENROLLED BILLS SIGNED.

The SPEAKER announced his signature to enrolled bills and joint resolution of the following titles:

S. 4145. An act to authorize the government of Porto Rico to construct two bridges across the Arecibo River near the city of Arecibo, P. I.;

S. J. Res. 114. Joint resolution for the appointment of a member of the Board of Regents of the Smithsonian Institution; and

S. 4019. An act to authorize the Tug River & Kentucky Railroad Co. to construct a bridge across the Tug Fork of the Big Sandy River at or near the mouth of Blackberry Creek, in Pike County, Ky.

EXTENSION OF REMARKS.

Mr. GARDNER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Massachusetts [Mr. GARDNER] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. LEWIS of Maryland. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 35 minutes p. m.) the House adjourned until to-morrow, Thursday, March 19, 1914, at 12 o'clock noon.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. GRAHAM of Illinois, from the Committee on the Public Lands, to which was referred the bill (S. 474) to authorize the issuance of absolute and unqualified patents to public lands in certain cases, reported the same with amendment, accompanied by a report (No. 415), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. LINTHICUM, from the Committee on Foreign Affairs, to which was referred the resolution (H. Res. 381) relating to the third Hague conference, reported the same with amendment, accompanied by a report (No. 416), which said resolution and report were referred to the House Calendar.

Mr. PROUTY, from the Committee on the District of Columbia, to which was referred the bill (H. R. 12873) relating to the assessment for taxation of real estate in the District of Columbia, and for other purposes, reported the same with amendment, accompanied by a report (No. 417), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. BORCHERS, from the Committee on Invalid Pensions, to which was referred the bill (H. R. 14738) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, reported the same without amendment, accompanied by a report (No. 414), which said bill and report were referred to the Private Calendar.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. FERGUSSON: A bill (H. R. 14739) creating the National Park of the Cliff Cities; to the Committee on the Public Lands.

By Mr. SCULLY: A bill (H. R. 14740) for the erection of a Federal building for the United States post office at Red Bank, N. J.; to the Committee on Public Buildings and Grounds.

By Mr. TEN EYCK: A bill (H. R. 14741) to provide for a survey and estimate of cost of removing Adams Island, located in the channel of the Hudson River at Troy, N. Y.; to the Committee on Rivers and Harbors.

By Mr. CLARK of Florida (by request): A bill (H. R. 14742) to establish and maintain a permanent force of park policemen for the protection of the White House and grounds and the Federal parks in the District of Columbia, under the officer in charge of public buildings and grounds; to the Committee on Military Affairs.

By Mr. GILLETT: A bill (H. R. 14743) to prohibit the free transportation of private cars by railroad companies; to the Committee on Interstate and Foreign Commerce.

By Mr. PAGE of North Carolina: A bill (H. R. 14744) for increase of cost of a site for post-office building in the city of Wadesboro, N. C.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 14745) to purchase a site for the erection of a post-office building in the city of Sanford, N. C.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 14746) for increase of cost of a site for a post-office building in the city of Rockingham, N. C.; to the Committee on Public Buildings and Grounds.

By Mr. NEELEY of Kansas: A bill (H. R. 14747) to pension widow and minor children of any officer or enlisted man who served in the War with Spain or the Philippine insurrection; to the Committee on Pensions.

Also, a bill (H. R. 14748) granting a service pension to certain defined veterans of the Civil War; to the Committee on Invalid Pensions.

By Mr. LAFFERTY: A bill (H. R. 14749) to create an interstate trade commission, to prohibit and prevent unfair competition, and to protect commerce against monopolies; to the Committee on Interstate and Foreign Commerce.

By Mr. GODWIN of North Carolina: A bill (H. R. 14750) providing for the manner in which the Official Register of the United States shall be published, and making appropriation therefor; to the Committee on Printing.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BORCHERS: A bill (H. R. 14738) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; to the Committee of the Whole House.

By Mr. BAKER: A bill (H. R. 14751) granting an increase of pension to S. Augustus Elliott; to the Committee on Invalid Pensions.

By Mr. BORLAND: A bill (H. R. 14752) granting a pension to James E. Forshee; to the Committee on Pensions.

By Mr. BRUCKNER: A bill (H. R. 14753) for the relief of George B. Gardiner; to the Committee on Military Affairs.

By Mr. CONNELLY of Kansas: A bill (H. R. 14754) granting an increase of pension to Jacob Miller; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14755) granting an increase of pension to Orrin S. Sutton; to the Committee on Invalid Pensions.

By Mr. DECKER: A bill (H. R. 14756) granting a pension to William Collins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14757) granting a pension to Parker Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14758) granting a pension to Sarah K. Elder; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14759) granting a pension to Elvina Hemphill; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14760) granting a pension to William Higombottom; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14761) granting a pension to John H. Jones; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14762) granting a pension to Naomi Landers; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14763) granting a pension to Samuel D. Lee; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14764) granting a pension to Elizabeth Luck; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14765) granting a pension to Annie McCaw; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14766) granting a pension to Mary N. McCollough; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14767) granting a pension to C. Reynolds; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14768) granting a pension to Isaac West; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14769) granting a pension to Cornelia B. Williams; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14770) granting an increase of pension to Daniel E. Alexander; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14771) granting an increase of pension to David Miller; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14772) granting an increase of pension to Hattie D. Osborn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14773) granting an increase of pension to Samuel Statler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14774) granting an increase of pension to Jacob M. Turneaure; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14775) for the relief of Hiram B. Hatton; to the Committee on Military Affairs.

Also, a bill (H. R. 14776) for the relief of Thomas McClure; to the Committee on Military Affairs.

Also, a bill (H. R. 14777) for the relief of Elbert Wells; to the Committee on Military Affairs.

By Mr. DIXON: A bill (H. R. 14778) granting an increase of pension to Michael Gannon; to the Committee on Invalid Pensions.

By Mr. EDMONDS: A bill (H. R. 14779) granting a pension to Ella V. Temple; to the Committee on Pensions.

By Mr. FOWLER: A bill (H. R. 14780) granting an increase of pension to Judy A. Turley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14781) granting an increase of pension to James P. Walters; to the Committee on Invalid Pensions.

By Mr. HELVERING: A bill (H. R. 14782) granting an increase of pension to Morton B. Fitts; to the Committee on Invalid Pensions.

By Mr. IGOE: A bill (H. R. 14783) granting an increase of pension to Mary Rahelly; to the Committee on Invalid Pensions.

By Mr. KIESS of Pennsylvania: A bill (H. R. 14784) granting a pension to Melinda Rogers; to the Committee on Invalid Pensions.

By Mr. J. R. KNOWLAND: A bill (H. R. 14785) pensioning the survivors of certain Indian wars from the year 1865 to January, 1891, inclusive, and for other purposes; to the Committee on Pensions.

By Mr. PETERS of Maine: A bill (H. R. 14786) granting a pension to Julia T. Nickerson; to the Committee on Invalid Pensions.

By Mr. RAUCH: A bill (H. R. 14787) granting a pension to John Murphy; to the Committee on Pensions.

Also, a bill (H. R. 14788) granting an increase of pension to Richard M. Clark; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14789) granting an increase of pension to John D. Green; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14790) granting an increase of pension to Woodson S. Marshall; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14791) granting an increase of pension to Sarah E. Personett; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14792) granting an increase of pension to Jasper N. Sawyer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14793) granting an increase of pension to John B. Shaver; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14794) granting an increase of pension to Samuel Woods; to the Committee on Invalid Pensions.

By Mr. TAYLOR of New York: A bill (H. R. 14795) for the relief of Theodore Herbert; to the Committee on Military Affairs.

By Mr. WHITACRE: A bill (H. R. 14796) granting a pension to Lois A. Bentz; to the Committee on Invalid Pensions.

By Mr. WILSON of Florida: A bill (H. R. 14797) to pay the several sums of money found due certain navy-yard employees by the Court of Claims; to the Committee on Claims.

By Mr. WILLIS: Papers to accompany a bill (H. R. 14736) granting a pension to James A. Dowden; to the Committee on Invalid Pensions.

Also, petition of C. K. Easterday and 35 other citizens of Delaware, Ohio, in favor of the enactment of legislation to extend the authority of the Federal Government over nonnavigable watercourses; to the Committee on Agriculture.

## SENATE.

THURSDAY, *March 19, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we thank Thee for all the processes of law and all the order of civil government which constitute us a Nation of freemen. Our slavery would be galling indeed, if we were the slaves of circumstance. We pray Thee to deliver us from that meaningless life, a life driven in bondage under the circumstances of life, which must be our fate unless we are controlled and guided and governed by the hand of God and under the guidance of a divine Providence. We pray that we may be free indeed with that freedom which Thou dost give, that we may in the realm of truth be above the processes of law and enjoy that freedom which is kinship with God. For Christ's sake. Amen.

The Journal of yesterday's proceedings was read and approved.

### EMPLOYMENT OF CONVICTS IN FOREIGN COUNTRIES.

The VICE PRESIDENT laid before the Senate a communication from the Acting Secretary of Commerce stating that with reference to a letter from the Department of Commerce dated March 13, transmitting a report from the American consul general at London, England, in regard to the employment of convicts in foreign countries, the department incloses a communication from the consular officer in question which should have accompanied the letter above referred to, which, with the accompanying paper, was referred to the Committee on Printing.

### PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a memorial of sundry citizens of Union County, N. J., remonstrating against the enactment of legislation to provide an educational test for immigrants to this country, which was referred to the Committee on Immigration.

He also presented petitions of the Christian Endeavor Society of the First Baptist Church of West Hoboken, N. J., and of the congregations of the Friends' Church and the Methodist Episcopal Church of Gillespieville, Ohio, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of the International Reform Bureau of New York City, N. Y., praying for the enactment of legislation to provide for censorship of motion pictures, which was referred to the Committee on Education and Labor.

He also presented memorials of sundry citizens of Ulster County, N. Y., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. THORNTON presented memorials of sundry citizens of New Orleans, La., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. GRONNA presented a petition of sundry citizens of Nome, N. Dak., praying for the enactment of legislation to provide an educational test for immigrants to this country, which was referred to the Committee on Immigration.

He also presented petitions of the North Dakota Total Abstinence Association, of Waddock; of the congregation of the Baptist Church at Lidgerwood, and of sundry citizens of McKinock, all in the State of North Dakota, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. CHILTON presented memorials of sundry citizens of Wheeling, W. Va., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. THOMPSON presented a petition of 75 citizens of Tyro, Kans., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. MARTINE of New Jersey. I present a large number of memorials from approximately 2,000 citizens of Newark, Essex County, N. J., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages. I ask that the memorials may be received and referred to the Committee on the Judiciary.

The VICE PRESIDENT. The memorials will be referred to the Committee on the Judiciary.

Mr. MARTINE of New Jersey presented petitions of sundry citizens of German Valley, of the Temple Baptist Church of Plainfield, and the First Baptist Church of Hoboken; of sundry citizens of Dover, Plainfield, Arlington, Chatham, Flemington, Croton, Rockaway, Atlantic Highlands, and Haddon Heights; of the Baptist Church of Croton; the Presbyterian Church of Atlantic Highlands; the Methodist Protestant Church of Hardingville; the First Methodist Episcopal Church of Arlington; the Trinity Methodist Protestant Church, of Atlantic City; the Hightstown Presbyterian Church, of Hightstown; of sundry citizens of Bloomfield, Glen Ridge, Hightstown, and Trenton; of the Centenary Methodist Episcopal Church, of Metuchen; of the Fifth District Sunday School Association, of Camden; the Pilesgrove Monthly Meeting of Friends, of Woodstown; the Grace Methodist Episcopal Church, of Red Bank; the Tabernacle Methodist Episcopal Church, of Camden; the Trinity Methodist Episcopal Church, of Millville; the Broad Street Methodist Episcopal Church, of Burlington; the Presbyterian Church of Boundbrook; the First Holland Reformed Church, of Passaic; the Finesville Methodist Episcopal Church, of Finesville; the Presbyterian Church of Pleasant Grove; the Presbyterian Church of Schooleys Mountain; the Methodist Episcopal Church of Ridgewood; the Baptist and Methodist Churches of Windsor; the Men's Club of the Baptist Church of Orange; and the First Methodist Protestant Church of Bridgeton, all in the State of New Jersey, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a petition of the congregation of the West Side Presbyterian Church, of Englewood, N. J., praying for the adoption of an amendment to the Constitution to prohibit polygamy, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Newark, East Orange, and Perth Amboy, all in the State of New Jersey, praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

He also presented memorials of sundry citizens of Trenton, Union, Weehawken, Mercerville, Hamilton Square, Elizabeth, Passaic, Jersey City, Hoboken, West Hoboken, North Bergen, West New York, Union Hill, and Bayonne, all in the State of New Jersey, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. BRANDEGEE presented petitions of Freja Lodge, No. 17, Independent Order of Good Templars, of Hartford, and of the congregations of the Congregational Church of Plantsville and the Church of the Good Shepherd, Norwich, all in the State of Connecticut, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. THOMAS presented memorials of sundry citizens of Denver, Victor, Pueblo, Colorado Springs, Trinidad, Rifle, and Leadville, all in the State of Colorado, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. LEE of Maryland presented memorials of sundry citizens of Maryland, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of the District of Columbia, remonstrating against the enactment of legislation to compel the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented petitions of sundry citizens of Maryland, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. WARREN presented resolutions adopted by the Methodist Episcopal, Protestant Episcopal, and Congregational Churches of Buffalo, Wyo., favoring the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. NORRIS presented a memorial of sundry citizens of Lincoln, Nebr., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. WEEKS presented petitions of sundry citizens of Gloucester, Rockport, Manchester, and Essex, all in the State of Massachusetts, praying for the enactment of legislation to prevent discrimination in prices and to provide for publicity of prices to dealers and to the public, which were referred to the Committee on the Judiciary.

Mr. KENYON presented memorials of the International Brotherhood of Teamsters and Chauffeurs, of Dubuque, and of sundry citizens of Dubuque and Muscatine, in the State of Iowa, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Plymouth County, Iowa, praying for the enactment of legislation to provide an educational test for immigrants to this country, which were referred to the Committee on Immigration.

Mr. PERKINS presented a memorial of Cooks' Helpers' Union No. 110, of San Francisco, Cal., remonstrating against the adoption of an admendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of the Wholesale Grocers' Association of San Francisco, Cal., praying for the enactment of legislation giving the manufacturer of proprietary articles the right to make resale price on same, which was referred to the Committee on Manufactures.

He also presented a memorial of the Business Men's Association of Riverside, Cal., remonstrating against the repeal of the exemption clause in the Panama Canal act, which was referred to the Committee on Interoceanic Canals.

He also presented a petition of the Missionary Society of the Westminster Presbyterian Church, of Sacramento, Cal., praying for the adoption of an amendment to the Constitution to prohibit polygamy, which was referred to the Committee on the Judiciary.

He also presented a memorial of the Chamber of Commerce of San Diego, Cal., remonstrating against the adoption of an amendment to the so-called Kahn Act, relating to exhibits at the Panama-Pacific Exposition, which was referred to the Committee on Industrial Expositions.

He also presented a petition of the Municipal League of Los Angeles, Cal., praying for the enactment of legislation to protect child labor, which was referred to the Committee on Education and Labor.

He also presented a petition of the Chamber of Commerce of San Jose, Cal., praying for the enactment of legislation to provide for the retirement of superannuated employees of the civil service, which was referred to the Committee on Civil Service and Retrenchment.

Mr. McLEAN presented a memorial of the Business Men's Association of Meriden, Conn., and a memorial of the board of directors of the First National Bank of Wallingford, Conn., remonstrating against the enforced dismemberment of the New Haven Railroad, which were referred to the Committee on the Judiciary.

He also presented a petition of Freja Lodge, No. 17, Independent Order of Good Templars, of Hartford, Conn., praying for the enactment of legislation to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. NELSON presented memorials of the Local Union Twin City Sign Writers, of Minneapolis; of the Minnesota Turnbezirk, of Minneapolis; and of sundry citizens of Red Wing, Goodhue, Mazeppa, Lake City, Belle Chester, and Marshall, all in the State of Minnesota, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. BURLEIGH presented a petition of Morning Light Grange, No. 19, Patrons of Husbandry, of Monroe, Me., and a petition of Augusta Grange, Patrons of Husbandry, of Augusta, Me., praying for the adoption of a system of rural credits, which were referred to the Committee on Banking and Currency.

He also presented a petition of sundry druggists of Augusta, Me., praying for the enactment of legislation to prevent discrimination in prices and to provide for the publicity of prices to the dealers and to the public, which was referred to the Committee on the Judiciary.

Mr. OWEN presented a petition of sundry citizens of Morrison and Glencoe, in the State of Oklahoma, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

### PANAMA CANAL TOLLS.

Mr. POINDEXTER. I present a memorial and ask that it may be read. It is on the subject of Panama Canal tolls, and contains a very good statement of some phases of that question. At some later time—not now—I shall speak upon the question.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

Whereas the East and West alike demand the freedom from tolls for our coastwise ships passing through the Panama Canal, because we have long suffered from excessive transportation charges of transcontinental railroads, and it is obvious should American coastwise ships be compelled to pay tolls, the possibilities of a competing line of commerce will be hampered, and we shall still be at the mercy of railroad corporations and will be compelled to pay in the future the present maximum transportation charges, which have worked untold hardships upon us in the past; and

Whereas the repeal from the statute books of the United States of the law exempting American coastwise ships from tolls is demanded by Canadian railroads, which are supported by American transcontinental lines, who endeavor to accomplish through diplomacy what they failed to obtain in Congress; and

Whereas the exemption from tolls of American ships engaged in coastwise trade having been indorsed at the polls two years ago by over 10,000,000 voters, a majority of the voting population of this Republic, is therefore the constitutionally expressed will of the American people; and

Whereas the Panama Canal is the achievement of the United States alone, being built entirely with American money, American effort and enterprise, it is therefore a domestic possession of the United States by virtue of property rights in the Canal Zone, fully established by purchase; and

Whereas the control of the canal is vital to the interests of the United States and involves the honor of the country, since a stipulation in treaty arrangements between this country and Panama except matters in which a third nation is involved; and

Whereas it is inconceivable to the American people and highly incompatible to our honor and integrity as a nation to be called upon by pro-British pseudo statesmen to repeal a statute relating to our domestic affairs at the behest of a foreign Government: Therefore be it

*Resolved*, That Valley Central Grange, No. 343, Patrons of Husbandry, goes on record strenuously opposing the repeal of the statute granting American coastwise ships exemption from tolls in passing through the Panama Canal; and be it further

*Resolved*, That copies of this resolution be sent to our Senators and Representatives in Congress and to the Agricultural Grange News, Kent Journal and Advertiser for publication.

C. S. FOLLETTE, *Worthy Master.*
VICTOR TONNASON, *Secretary.*

The VICE PRESIDENT. The memorial will be referred to the Committee on Interoceanic Canals.

### CONTRACTS OF NEW YORK COTTON EXCHANGE.

Mr. SMITH of Georgia. Mr. President, there are a number of bills pending in each House seeking to reach the kind of business conducted in the exchanges, and especially in the New York Cotton Exchange. I desire to present to the Senate two letters which bear upon this pending legislation, together with resolutions passed by bodies of men interested in the subject.

I wish to say just a word in connection with what I find to be the condition as reported in yesterday's morning papers. It appears that the New York Cotton Exchange is selling, or

was selling day before yesterday, March cotton at 12.54 cents per pound. This was middling cotton. It was selling July middling cotton of the same character at 11.77 cents per pound. In point of fact no new cotton comes in by July; only the cotton now in existence can be delivered then, and the burden is upon the man holding the cotton of carrying it until July. It is worth really about 10 points more in July than it is in March, and yet by some legerdemain of management the New York Cotton Exchange sells July at 69 points less than March, though it is worth from 10 to 15 points more than March, for it costs the interest on the value of the cotton, together with the expense of warehousing and insurance to carry cotton from March to July.

Again, spot middling cotton day before yesterday was selling in New York at 13.20, and the exchange was selling professedly the same cotton at 12.50, or 70 points less than the actual cotton was selling on the streets. It is to their system of manipulation, their system of unfair tender of the inferior graded cotton and arbitrary estimates of the differences in value between the cotton tendered and the cotton sold in settlement of their sales that enables them thus to manipulate the market and to nominally sell middling cotton at a price far below its real value. By this course the New York Cotton Exchange injures two classes of people—the producer, who has his cotton to sell, injuring him through creating a fictitiously depreciated market price for his cotton, and again the manufacturer, who, when he is selling his cloth, is confronted with what appears to be the real value of cotton fixed by the New York Cotton Exchange, when, in point of fact, the manufacturer must pay more for his cotton. The time has come when this conduct must stop or the New York Cotton Exchange should be deprived of the use of the mails and should be driven out of interstate commerce. I desire to keep this subject before the Senate, and I trust we may pass a bill before we adjourn this summer.

I send to the desk the letters and resolutions to be read. I ask first that a letter from the president of the Bibb Manufacturing Co., of Macon, Ga., with accompanying resolutions, may be read.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

MACON, GA., *February 26, 1914.*

Hon. HOKE SMITH,
*United States Senate, Washington, D. C.*

DEAR SENATOR SMITH: You have doubtless received copy of some resolutions adopted at the annual meeting of the Hard Yarn Spinners' Association at Gastonia, N. C., on February 18, with reference to regulating the contract of the New York Cotton Exchange.

While we do not fully indorse everything contained in these resolutions, we are in sympathy with their general purpose.

If the interests of those of us who are concerned with the growing and manufacture of cotton in the United States are to be protected, it is necessary that something be done in the way of regulating the form of contracts on our cotton exchanges, and particularly in New York. We think that some standard classification of cotton should be obligatory on all exchanges, and that this be so arranged that the real value of cotton tendered on contract on any exchange should be controlled by the price that such grade of cotton could be sold for readily in the market where such contract originates and where the cotton is tendered on the day of tender. In other words, it should be so that cotton delivered to a buyer on contract—in New York, for instance—could be sold immediately in New York by this buyer at the price he pays for it under the contract.

The result of such an arrangement would be to legitimatize and commercialize the cotton contract and remove it from the realm of pure speculation. As it now stands, in New York particularly, their contract is so fixed that a legitimate purchaser on the exchange who has bought a contract for the purpose of hedging a sale of goods can be sandbagged with cotton which he does not want, can not use, and can not resell in New York at the price he must pay for it under the contract. In actual practice the New York Cotton Exchange proves to be simply a big "bucket shop."

If the cotton exchanges could be commercialized as above indicated, along the lines of the Chicago Board of Trade in the matter of wheat contracts, as we understand it, the purpose desired would be accomplished. If a buyer were delivered a grade of cotton which he did not want and could not use, it could only be delivered to him at a price at which he could actually resell it at the moment of delivery.

It would seem to us that this could be accomplished and allow delivery of cotton grading nothing below a good style of good ordinary and nothing better than good middling, present American classification, leaving the contract more flexible than is proposed by the resolutions first referred to.

We think that some legislation along the lines above suggested is of vital importance and should receive early consideration at the hands of Congress. Should you desire any further information that we can furnish, we would be pleased to put our resources at your command.

Yours, very truly,

BIBB MANUFACTURING CO.,
E. T. COMER, *President.*

A resolution adopted at the annual meeting of the Hard Yarn Spinners' Association, Gastonia, N. C., February 18, 1914.

Whereas the spinning mills of the country are suffering loss on account of the disparity between New York cotton quotations and the price of actual cotton, which quotations are misleading and confusing to the trade: Therefore be it

*Resolved*, That it is the sense of this association that the present system of the New York Cotton Exchange relative to the great number of grades of cotton that can be applied for delivery on contracts is detrimental to the best interests of the farmer, manufacturer, and cotton merchant, and this should be so changed that a specific grade should be stipulated in all contracts, and that not more than three grades shall be deliverable on a contract, and these to be not more than one grade above and one grade below the stipulated grade; that the purchaser not be confined to buying a contract based on middling, as at present, but have the option of buying any grade desired, with the usual differential in price.

*Resolved further*, That we request our Senators and Representatives in Congress to enact some law for the regulation of the cotton exchanges which will afford relief from these hurtful conditions.

To-day's market price for cotton is 12.90, while actual spot cotton in the South is 14 cents. We want the market quotations to reflect actual values.

Mr. SMITH of Georgia. Here is one other letter, which is short, on the same subject, that I ask to have read.

The VICE PRESIDENT. Without objection, the letter will be read.

The Secretary read as follows:

AUGUSTA, GA., *February 26, 1914.*

Hon. HOKE SMITH,
*United States Senate, Washington, D. C.*

DEAR SIR: We are taking the liberty of sending you herewith a newspaper clipping in regard to a resolution adopted by the Vicksburg (Miss.) Cotton Exchange condemning the contract system now in use by the New York Cotton Exchange. We heartily indorse the action of the Vicksburg Cotton Exchange, and respectfully ask your cooperation in the effort to secure the passage of legislation that will force the cotton exchanges in this country to adopt a contract system that will be fair and right; one that will serve the interests of the legitimate cotton trade, and not the one devised to promote and encourage speculation.

Yours, truly,

THE JOHN P. KING MFG. CO.,
LANDON A. THOMAS, *President.*

Mr. SMITH of Georgia. I should like to have the resolutions accompanying the letter appear in the RECORD for reference and use.

The VICE PRESIDENT. Without reading?

Mr. SMITH of Georgia. It is not necessary to read them.

There being no objection, the resolution referred to was ordered to be printed in the RECORD, as follows:

Resolutions adopted by the Vicksburg Cotton Exchange condemning the contract system in use by the New York Cotton Exchange, and petitioning their Representatives in Congress to try to secure the passage of legislation that will force the cotton exchanges of this country to adopt fairer and better methods governing trading in cotton contracts.

Whereas in the opinion of the members of this exchange the form of future contract in use by the New York Cotton Exchange constitutes nothing more than a medium for gambling; that it does not represent the real value of cotton as established in the spot-cotton markets of the world; that it absolutely fails to provide a safe, trustworthy, or legitimate hedge; and that through its form and application, both unfair and arbitrary, it lends itself to gambling operations by large dealers, to the detriment and demoralization of the entire cotton trade; and

Whereas in the opinion of the members of this exchange the future contract of the New York Cotton Exchange is devoid of the essentials of a fair, just, and correct contract; that in placing in the hands of men of large capital the power to dominate the cotton market, whose operations unsettle and depress business, it is used to the great injury of the general cotton trade; and

Whereas in the opinion of the members of this exchange a fair, just, and commercial future contract should contain the following provisions, viz, the adoption of Government standards of classification, commercial differences and not fixed differences, the requiring of but one certification of each bale, and limiting the number of classifications which may be delivered on a single contract: Now, therefore, be it

*Resolved by the members of this exchange*, That we herewith petition our Senators and Representatives from this State in Congress to use their best efforts to secure the passage of legislation that will force the cotton exchanges in this country to adopt a contract system that will be fair and right, one that will serve the interests of the legitimate cotton trade and not one devised to promote and encourage speculation.

*Resolved*, That a copy of these resolutions be sent to planters, shippers, and spinners generally, with a request for their active cooperation in the effort to secure through their Representatives in Congress the desired legislation.

*Resolved*, That a copy of these resolutions be sent to Members of the Senate and House of Representatives at Washington.

S. SUSMAN, *President.*
J. H. COOK, *Secretary.*

Mr. OVERMAN. Mr. President, this is a very important matter to the cotton growers of the South and the manufacturers as well. The Senator from South Carolina [Mr. SMITH] has a bill pending that I hope the Senate will take up and pass at as early a day as possible.

To throw some light on the facts stated by the Senator from Georgia, I wish to show a remarkable statement taken from the New York Commercial of Thursday, March 5.

On that day good middling was quoted for March in New York on the market at 12.19, when for spot cotton the manufacturers had to pay 13¾, at which price it was selling in the South. If you buy good middling on the New York market they can not deliver it to you, because they have not got it. Yet they agree to sell it to you, and when you demand it they give you a low grade.

I want to read from this same paper the amount of cotton the New York warehouses have on hand. If a man wants to buy good middling at their quotation price, how many bales have they to sell? Where they are selling 70,000,000 bales a year, as was stated once before on this floor by the Senator from South Carolina [Mr. SMITH], at this time they had only 164 bales of cotton of this grade, or good middling, in the warehouses.

Mr. SMITH of Georgia. The Senator means middling?

Mr. OVERMAN. Middling. When they are compelled to deliver it, what do they do? As stated, they had on hand in New York in their warehouses only 164 bales of cotton. But what have they in addition to that? They have 10,000 fully low middling, 18,000 low middling, 10,000 below low middling, and 16,000 strict good ordinary, and 1,440 good ordinary. I ask to incorporate in this statement a table showing what cotton and the grades they had in the warehouses in New York at that time. If a man buys 500 bales good middling cotton on that market and demands the cotton, they will not deliver it, because they have only 164 bales; but they deliver him this dog-tail cotton, as the Senator from South Carolina described it, 10,000 bales of which they have on hand.

[From the New York Commercial, Thursday, March 5, 1914.]

SPOT MARKETS.

NEW YORK MIDDLING, 13 CENTS; LIVERPOOL MIDDLING, 6.95 PENCE; NEW ORLEANS MIDDLING, 12.75 CENTS.

The New York spot market was quiet yesterday, with prices remaining unchanged. Middling continued to rule at 13 cents, against 12.70 cents on the same day last year. The stock in licensed warehouses is 101,131 bales, of which 66,414 bales are certificated. Two years ago the licensed stock was 143,037 bales, of which 131,971 bales were certificated.

Grades of cotton in New York warehouses on March 3, 1914, inspected, classed, certificated, and grade guaranteed by the New York Cotton Exchange inspection fund:

| Grade. | Number bales. | Cents. |
|---|---|---|
| Fair | | 1.75 |
| Strict middling fair | 7 | 1.50 |
| Middling fair | 64 | 1.30 |
| Strict good middling | 240 | .90 |
| Fully good middling | 224 | .18 |
| Good middling | 179 | .65 |
| Barely good middling | 99 | .48 |
| Strict middling | 308 | .32 |
| Fully middling | 256 | .16 |
| Middling | 1,392 | (1) |
| Barely middling | 1,270 | .25 |
| Strict low middling | 6,554 | .50 |
| Fully low middling | 10,200 | .85 |
| Low middling | 18,723 | 1.25 |
| Strict good ordinary | 16,276 | 2.00 |
| Good ordinary | 1,481 | 3.00 |
| Strict good middling tinged | 41 | .45 |
| Good middling tinged | 753 | (2) |
| Strict middling tinged | 2,969 | .20 |
| Middling tinged | 3,598 | .40 |
| Strict low middling tinged | 1,550 | 1.25 |
| Low middling tinged | 164 | 3.00 |
| Middling stained | 86 | 1.25 |
| Total | 66,437 | |

[1] Basis. [2] Value of middling.

Revised November 19, 1913.
Inspected, but not classed, 179.

Yesterday they adopted the Government standard which is to go into effect in 1915, giving them a year to rob the people of this country. I say the bill of the Senator from South Carolina ought to be passed, and compel them to deliver what they sell.

What effect does it have upon the cotton-mill men and the cotton growers of this country? Cotton is quoted at 12 cents for May in New York, a price arbitrarily fixed by the exchange, when spot cotton is selling and the farmers are getting 14 cents for it. The manufacturer offers his goods in the market, and the buyer wishes to buy the goods from him, and he sees the quotations on the New York market at 12 cents. The buyer wants to buy at a price based on 12 cents when the manufacturer is paying 14 cents a pound for it. They fix fictitious arbitrary prices for it in order to speculate. This is a great injustice to the manufacturers as well as to the farmers in this country. The manufacturer can not sell his goods except on 12-cent cotton as quoted by the New York Exchange when the price of cotton in the actual sale is 14 cents a pound.

Therefore, I ask the Senate to take up and pass the measure the Senator from South Carolina has presented. I think it will correct the evil, and the sooner we pass it the better.

Mr. WILLIAMS. Mr. President, adding to what the Senator from North Carolina [Mr. OVERMAN] has just said, I wish to say that during this entire season spot cotton has been quoted in Memphis, Savannah, New Orleans, Charleston, and all the actual spot-cotton markets at from a cent to a cent and a half and 2 cents a pound higher than it was quoted on the New York Exchange, and it has been selling at 2 cents a pound higher in every little village in the South, showing the absolute, deliberate intent upon the part of the people of the New York Cotton Exchange to bear down the price of cotton by false quotations. They knew the quotations were false when they made them.

Mr. SMITH of South Carolina. Mr. President, I had intended this morning to call up Senate bill No. 110, in reference to trading in cotton futures, but I wish to explain to Senators who, with myself, are anxious to have this matter disposed of my reason for not doing so.

I think it has now been fairly proven by the New York Cotton Exchange that they have no right to exist so long as they practice the methods that they do practice, as referred to by the Senator from North Carolina [Mr. OVERMAN]. They showed some symptoms yesterday of coming to the right attitude in reference to cotton. I give notice now that I shall to-morrow call up the bill and seek to put it upon its passage.

The Senator from North Dakota [Mr. MCCUMBER], in his grain-inspection bill, has a bill which is almost along the same line, and I hope that we can work in conjunction on the two bills, and see if this crying evil can not be remedied. I only postpone asking the consideration of the bill to which I refer until to-morrow for the reason that those who wish to offer amendments may have an opportunity to prepare them before the beginning of the discussion of the bill.

Mr. SHAFROTH. Mr. President, I have no objection to the Senator's bill, but I have a notice on the calendar of an intention to move the consideration of a bill after the disposition of Senate joint resolution No. 1, and I do not want that notice displaced. I have been trying for the last month or two to get a hearing upon this matter, and, consequently, I want it to be heard. It proposes an amendment to the Constitution fixing the time for the convening of Congress and the terms of President and Vice President of the United States. It seems to me of great importance, and for that reason, and inasmuch as I have been so long trying to get it considered, I do not want my notice to be displaced.

Mr. SMITH of South Carolina. That, of course, is a matter to be determined by the Senate. The necessity for the legislation to which I refer is very apparent at this time. In order that Senators may understand how pressing it is, I will state that the manufacturers throughout the country are now placing their orders for the next 12 months for the consumption of raw cotton. One of the leading manufacturers of South Carolina was in my office the other day. He told me that when he went to New York and offered his samples in order to place his goods he could not get an order, for the reason that the cotton he had to buy out of which to manufacture those goods was costing anywhere from 1½ to 2 cents a pound more in his State than the price at which the identical cotton was quoted in New York. Hence, the dealers would say to him: "We do not propose to buy your cloth upon the basis of 13½ or 14 cents when cotton is quoted here in New York at a cent to a cent and a half a pound lower for the identical grades that you will convert into this cloth." Therefore, I say, right at this time, if we propose to relieve the manufacturers who have already a stock of last year's cotton, who must of necessity convert it and sell it or leave a surplus that will be detrimental to the trade of both those who sell the raw cotton and those who sell the finished product, if we are going to relieve them of the 1913 crop and relieve them from the manipulations of the market for the 1914 crop, it is necessary for us to take immediate and speedy action. I believe that the bill which I have before the Senate will accomplish that purpose.

Since I have been in the Senate I have been striving to get relief for the farmers. I could not get the active support of some of the manufacturers for the reason that up to now they had not been the victims of this pernicious system; but the moment that the New York Exchange turned upon them and, in place of it being a "hedge market," letting "futures" and "spots" run somewhat parallel, it is now a different proposition. When a man bought cotton at 13 cents as a "hedge," hoping to pay 13 cents in the South, and the "hedge" dropped from a cent to a cent and a half a pound, while the "spot" stood exactly at the same plane at which he must buy, he stood to lose from $5 to $10 on the bale on his purchase in the South. When "spot" cotton went up a cent a pound and "futures" went up, he was protected, and when "spot" cotton went down and "futures" went down he was protected, but when "futures" went down and "spot" went up he was "split." That is the complaint they are bringing now. The grower has heretofore been the victim of that practice, and now the manufacturer is also being made the victim. It is a pernicious system, and we

have no right to give them 12 months lease of life in order that they may reap a profit out of their victims, having committed themselves to a system that they know can not exist longer in this country.

Mr. McCUMBER. Mr. President, I wish to call the attention of the Senator from Colorado [Mr. SHAFROTH] to the fact that his notice in regard to the consideration of the joint resolution proposing an amendment to the Constitution relating to the terms of President and Vice President is to follow Senate bill 120, which I have stated I would ask be made the unfinished business as soon as we could get rid of the present unfinished business, either by agreement or otherwise.

Mr. President, the arguments we have just heard from the Senator from South Carolina are very familiar arguments to me; in fact, I have been making for several days exactly the same kind of argument pertaining to the same kind of practices; and I regret very much that I did not have present to hear my address Senators who are interested in the raising and marketing of cotton. Cotton and wheat are the two greatest crops in the United States which are sold in the markets. There are a greater number of bushels in the corn crop, and it has a greater value, but the corn crop is mostly fed, while the cotton crop and the wheat crop are mostly sold for the manufacture of cloth and the manufacture of flour. Both of them are sold by grades, and the manipulations in the grades are exactly the same in one system as they are in the other, the opportunities are exactly the same, and I am asking whether, in conjunction or separately, the same consideration for the farmer who produces wheat and for the miller who manufactures that wheat into flour that other Senators are asking for the farmers who produce cotton and for the manufacturers who make that cotton into cloth.

Mr. WEST. Mr. President——

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Georgia?

Mr. McCUMBER. I yield to the Senator.

Mr. WEST. I was present and heard the Senator's remarks, and I agree with his position. I trust that in the effort to relieve the situation as to cotton he will stand by the people of Georgia and the South, as we will endeavor to relieve the grain conditions in the West.

Mr. McCUMBER. The Senator from Georgia will find that I have agreed with the Senator from South Carolina all the time as to his bill, because I can see the similarity between the conditions affecting the production of cotton and the grain exchanges.

Mr. SHAFROTH. Mr. President, I wish to say, in answer to the statement made by the Senator from South Carolina [Mr. SMITH], that I have no doubt his bill is important.

Mr. GALLINGER and Mr. LODGE. Regular order!

The VICE PRESIDENT. The regular order having been called for, and Senators having the right to enforce the order, the regular order is the presentation of petitions and memorials, and nothing else is in order at the present time.

### NEW YORK, NEW HAVEN & HARTFORD RAILROAD.

Mr. BRANDEGEE. I present a resolution adopted by the Meriden Business Men's Association, of Connecticut, and ask that it be read.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

MERIDEN BUSINESS MEN'S ASSOCIATION (INC.),
*Meriden, Conn., March 17, 1914.*

DEAR SIR: The following resolution was unanimously adopted at a meeting of the Meriden Business Men's Association (Inc.), united with the board of trade, 1908:

*Resolved*, That the Meriden Business Men's Association unanimously places itself on record as emphatically opposed to any action being taken on the part of the National Government to force the dismemberment of the New York, New Haven & Hartford Railroad Co. and its allied properties, believing that the corporation as at present organized can serve the interests of New England more effectively and more economically than they could possibly be served by several independent transportation lines.

HERMAN W. MORSE, *President.*

Attest:

ALBERT A. MAY, *Secretary.*

Mr. BRANDEGEE. Mr. President, in line with that I ask to have read, if the Senate will permit me, a letter from the Bridgeport Savings Bank, which I send to the desk.

The VICE PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

BRIDGEPORT SAVINGS BANK,
*Bridgeport, Conn., March 16, 1914.*

Hon. Senator FRANK B. BRANDEGEE,
*Washington, D. C.*

DEAR SIR: I beg to inclose herewith copy of resolutions which were adopted by the board of trustees of this bank relative to the proposal of the United States officials to dismember the New Haven system.

We firmly believe that the sentiment expressed in these resolutions coincides with the general views throughout the State, and we trust that the great necessity for delay in this matter may be sufficiently impressed upon the officials having this matter in hand.

Very truly, yours,

SAMUEL M. HAWLEY, *Treasurer.*

Mr. BRANDEGEE. I also ask that the resolutions may be read.

The VICE PRESIDENT. The Secretary will read the resolutions.

The Secretary read as follows:

Whereas the prosperity and happiness of the people of the State of Connecticut are dependent upon the manufacturing, commercial, and farming industries of the State; and

Whereas these business interests are indissolubly bound up with the prosperity of the New York, New Haven & Hartford Railroad Co.; and

Whereas it is understood that an effort is being made by the officials of the United States Government to separate the New York, New Haven & Hartford Railroad from its steamship and trolley lines operating in this territory: Now therefore

*Resolved*, That the board of trustees of the Bridgeport Savings Bank firmly believe that such proposed dismemberment will seriously cripple this great transportation machine and bring great damage not only to commerce and business in this State but to individuals as well; and

*Further resolved*, That this board of trustees respectfully and earnestly request the officials of the United States Government to halt in their plan to dismember this transportation system until it can be satisfactorily determined that such dismemberment will work for the good rather than for the harm of all the people of New England.

Mr. BRANDEGEE. I ask to have read a letter which I have received from the president of the National Whaling Bank, in my home city, in relation to the same matter.

The VICE PRESIDENT. The Secretary will read as requested, in the absence of objection.

The Secretary read as follows:

NATIONAL WHALING BANK,
*New London, Conn., March 17, 1914.*

Senator FRANK B. BRANDEGEE,
*Washington, D. C.*

MY DEAR MR. BRANDEGEE: It seems to me that the Attorney General is persecuting the New Haven Railroad in a manner that is going to do great harm to all New England, to say nothing of the people who own the securities of the New Haven and Boston & Maine roads.

As apparently the only possible purchasers of the Boston & Maine are either the Grand Trunk or the Canadian Pacific, it seems to be the Attorney General's purpose to force the New Haven to sell its Boston & Maine stock at bankruptcy prices for the benefit of foreigners and at the expense of the people of New England, where a large part of the capital of the New Haven is held.

I notice in the daily papers that Boston & Maine notes are offered and have been offered for weeks on a 22.25 per cent basis and that New Haven notes are offered on an 18 per cent basis; this looks like bankruptcy, and I believe that about every individual in New England will be adversely affected if these roads drift into receivers' hands.

The savings banks of Connecticut are loaded down with the bonds of the New Haven road, to say nothing of their holdings of Boston & Maine securities, and there is considerable New Haven stock held by them.

The latest report I have of the bank commissioners of this State is the one issued for the year ending September 30, 1912, and in that report I find that the Savings Bank of New London then owned the following New Haven securities:

| | Par value. |
|---|---|
| Stock, 1,562 shares | $156,200 |
| Bonds: | |
| Convertible debenture 6s, due 1948 | 450,000 |
| Consolidated debenture 3-3½s, 1930 | 120,000 |
| Consolidated debenture 4s, 1954-1956 | 55,000 |
| Greenwich Tramway 5s, 1931 | 40,000 |
| New York & Centerville 5s, 1933 | 2,000 |
| Worcester & Connecticut Eastern 4½s, 1943 | 250,000 |

Besides they owned at that time the following securities of the Boston & Maine:

| | |
|---|---|
| 4s of 1926 | $110,000 |
| 4½s of 1944 | 40,000 |

I cite the holdings of the Savings Bank of New London to give you an idea of the popularity of these securities with New England investors in the past.

If you have any influence that you could exert to help the New Haven road to secure ample time to dispose of the properties that they hold contrary to law, I feel convinced that your efforts in their behalf would be greatly appreciated by your constituents without distinction of party preferences, and by the people of New England generally.

Very truly, yours,

BELTON A. COFF, *President.*

Mr. BRANDEGEE. I have asked the indulgence of the Senate to allow me to have these communications read this morning, because I think the Senate will bear me witness that I have taken absolutely not one minute of the time of the Senate in the discussion of any question in relation to the New Haven Railroad situation, although I suppose the people of my State are more vitally interested in that question in all its bearings than are the people of any other State in the Union. Of course, all New England is vitally interested in it. I have refrained, up to this time, from taking any part in the debates that have been held here upon the matter, from the very fact that it seemed to me that, coming from the State in which this company is most largely located, anything which I might say might be, so to speak, discounted as being the utterance not of an unprejudiced and impartial man but of one who was more or less in-

fluenced by the pressure brought to bear upon him by his own constituents.

While to a certain extent a Senator ought to be influenced by the representations and views of his own constituents, it has always been a mooted question how far in his official capacity he was justified in acting upon his individual judgment rather than upon the wishes of his constituents; and many Senators, I think, sometimes shape their conduct in compromise between the two views.

However that may be, and whatever may be my duty in this matter, I have felt that, being in the receipt of these communications and a great many others similar to those I have put in the RECORD, I ought in some way to bring the matter to the attention of the public.

This matter is not pending before the Senate in any legislative way at the present time. I know of no committee that is taking jurisdiction of the particular question raised in these communications, so I have not asked that they be referred to any committee, but I have had them read in order that they may appear in the RECORD.

I do not suppose, of course, that the Senate or Congress itself can or would direct the Department of Justice in this matter. Here is a situation which is not a newly developed situation in my section of the country, but one which has existed for quite a number of years. It has been previously investigated by other administrations, by other Attorneys General. Other suits have been instituted at times, and upon further consideration have been withdrawn or dropped.

The Attorney General doubtless has his views about whether and to what extent the New Haven road is in violation of the Sherman antitrust law or other laws. They are questions of opinion; they are questions of law. The railroad company, of course, took the best legal advice it could obtain before it came into its present condition. The advisers of the road advised it that it was not violating the law. The Attorney General probably thinks it is; and he has a bill in equity drawn, so it is reported, to file against the corporation to dismember it. Pending that, I assume the situation is that he has advised the directors of the corporation that if they will so modify their existing consolidation as to bring themselves into a condition that he thinks will not violate the law, he will not file the suit, because all he would accomplish by filing the suit, if he won it, would be accomplished voluntarily by the management of the road.

Of course the directors are placed in this situation: Many of the stockholders do not want the road dismembered. They do not think the directors have any authority to agree to a dismemberment of the road without the consent of the stockholders whom they represent. The road is in a financial condition where by a certain time it has to raise enormous sums of money to meet maturing obligations. If the Government's suit is filed, nobody will lend the road the money to refund these obligations. If the stockholders attempt to tie up the directors and prevent them from voluntarily agreeing to the demands of the Department of Justice, that creates delay and the money can not be raised, and perhaps a receivership may stare the road in the face.

In the meantime funds deposited in all the savings banks and other financial institutions of my State and of all New England, to a great extent trust estates and endowment funds of educational and charitable institutions, are invested in the securities of this road, which have already had a tremendous depreciation.

Of course a receivership would mean a further recession in the prices of all these securities and possibly would make them unmarketable. So I think the Senate will see, irrespective of the determination of the question of law whether these corporations have been put together and now exist in violation of the law, that the matter is of tremendous consequence.

The trouble about the whole situation up there is that the people who have had nothing to do with committing any violation of the law, if any has been committed, which has not yet been determined, are the sufferers; and it is liable to be a tremendous privation and disaster to these people if this situation continues. I am at a loss to know what I can do about it. These people call upon me to use any influence I may have in the proper channels, with the proper officials, to prevent the dismemberment of this road, and they give their reasons why they think it would be undesirable. I have not felt like making any attempt to bring any influence to bear upon the Attorney General or upon the President as to what their conduct should be in this matter.

The Attorney General is the legal adviser of the Government. It is his business to enforce the Sherman law. What does seem rather hard is that, owing to the financial stress of the New Haven road and the time limits within which these great sums of money must be raised, and the refusal of capital to loan money to this corporation, it may be at any minute put in the hands of a receiver or may be dismembered, and the security upon which people have loaned their money utterly taken from them. The result is that the stockholders' property may have to be sacrificed at the opinion of one man on a question of law without the judgment of any tribunal as to whether or not they are in violation of the law, as alleged in the bill to be filed by the Attorney General.

Unquestionably it is proper for the Attorney General to consider filing a suit. The fact is that under the present circumstances the directors have no discretion in the matter. They are entrapped. They are between the upper and the nether millstones. They are the trustees and the custodians of the property of the stockholders and of other trustees. If they agree to part with millions of dollars of property of their cestui quis trust without making any effort to find whether they are legally compelled to part with it or not, they will be censured by all their stockholders. If they do not agree to part with it, they will be haled into court and prosecuted as a trust; and what other proceedings may be held in abeyance nobody knows. That is the position of the directors.

If the stockholder exerts his right to attempt to protect his property by saying "I will not permit the directors to allow this road to be broken up upon somebody's mere assertion that a road beginning in Boston and running down to Maine on the Canadian line is a competitive road with one beginning in Boston and running west down to New York"—if he says "I will not permit the directors to allow this to be done on the ground that the roads are competitive, when, in fact, they run in opposite directions and are not parallel with each other," then the suit is to be filed by the Government, and they are tied up in court for years, and the property is ruined.

As I say, I have not had any talk with the Attorney General. I have not felt like even mentioning the subject to him, and I have not done so, nor to the President. I did feel, however, that in view of this most embarrassing situation of the whole transportation system—rail, water, and trolley—in New England, I wanted to put into the RECORD the expression of responsible commercial bodies and banks, boards of trade, and individuals in my State, if it shall do no more than to advise the Senate and the Attorney General and the administration that in whatever course is taken in the premises they should be governed by the utmost circumspection.

I do not know whether in the past any violations of the law have been committed by this road, either in their organization, or in their subsequent transactions, or in their practices. The Senate has already authorized the Interstate Commerce Commission to investigate the whole question of the financial transactions of this road and their subsidiaries and all their branches. The result of that will no doubt be laid before us later.

I have no defense to make if anything wrong has been done. I make no excuse or apology for it. I know of no wrong having been done. I do not know anything about it. I read in the newspapers statements about the matter, but my judgment will be influenced by the evidence in the case. Until that is given I hold my opinion in abeyance, and I do not propose to prejudge anybody or any corporation as guilty until it is proved guilty. As long as they are a legitimate business company, and the prosperity of a great section of the country is dependent upon them, I think, in justice to every interest and everybody, that this matter should be proceeded with not in the spirit of malice or of any vindictiveness but as wise men ought to handle a tremendously important, vital, and far-reaching question.

Mr. SHAFROTH obtained the floor.

Mr. GALLINGER. I ask for the regular order.

Mr. SHAFROTH. I ask unanimous consent to say a few words with relation to the proposition of the Senator from South Carolina [Mr. SMITH].

Mr. GALLINGER. I must object.

The VICE PRESIDENT. There being objection, the Chair is compelled to enforce Rule VII.

Mr. THOMAS. Mr. President, up until now I have not taken any part in the discussion that has been held here on one or two occasions concerning the affairs of the New York, New Haven & Hartford Railroad——

The VICE PRESIDENT. There being an objection, the Chair is compelled to enforce Rule VII.

Mr. THOMAS. I did not understand that any objection was made to what I was about to say, but to what my colleague wished to say.

Mr. GALLINGER. I simply asked for the regular order. I have been waiting an hour to present a matter to the Senate.

Mr. THOMAS. Very well, Mr. President.

The VICE PRESIDENT. The regular order is the presentation of petitions and memorials. If there are no further petitions to be presented, reports of committees are next in order.

REPORTS OF COMMITTEES.

Mr. RANSDELL. From the Committee on Agriculture and Forestry I report back favorably, without amendment, the joint resolution (H. J. Res. 204) authorizing the Secretary of Agriculture to make exhibits at Forest Products Expositions to be held in Chicago, Ill., and New York, N. Y., and I submit a report (No. 352) thereon.

I ask unanimous consent that the joint resolution be taken up immediately. It proposes to appropriate $10,000 to enable the Secretary of Agriculture to make such exhibits as may be convenient and practicable at the expositions to be held in Chicago and New York. Unless it is acted on promptly it will be impossible to have the work properly done. The House has already passed the joint resolution.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

Mr. GALLINGER. Let it be read.

Mr. SMOOT. I ask that it may go over.

The VICE PRESIDENT. The joint resolution will be placed on the calendar.

Mr. RANSDELL, from the Committee on Commerce, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 2806) relative to the appointment, pay, and rank of chief warrant officers in the Revenue-Cutter Service (Rept. No. 353); and

A bill (S. 1802) construing the provisions of section 8 of the act entitled "An act to improve the efficiency of the personnel of the Revenue-Cutter Service," approved April 16, 1908 (Rept. No. 354).

Mr. SMITH of South Carolina. From the Committee on Immigration I report back favorably, with amendments, the bill (H. R. 6060) to regulate the immigration of aliens to and the residence of aliens in the United States, and I submit a report (No. 355) thereon.

The VICE PRESIDENT. The bill will be placed on the calendar.

Mr. SMITH of South Carolina. I ask that certain letters from the Department of Labor relating to the bill may be printed as a Senate document.

The VICE PRESIDENT. Is there objection to printing the letters as a document? The Chair hears none, and it is so ordered. (S. Doc. No. 451.)

LABELING OF ARTICLES OF CLOTHING.

Mr. MYERS. I move that the Committee on Interstate Commerce be discharged from the further consideration of the bill (S. 646) providing for the labeling and tagging of all fabrics and articles of clothing intended for sale which enter into interstate commerce and providing penalties for misbranding, and that the same be referred to the Committee on Manufactures. I will state that I have consulted the chairman and other members of the Committee on Interstate Commerce, and this motion is agreeable to them.

The VICE PRESIDENT. Without objection, the change of reference will be made.

DRAINAGE OF INDIAN LANDS.

Mr. OWEN. From the Committee on Indian Affairs I report back favorably, without amendment, the bill (H. R. 13091) to provide for the drainage of Indian allotments of the Five Civilized Tribes, and I submit a report (No. 351) thereon. I ask for the present consideration of the bill. It is only a short bill, and it is a local matter.

The VICE PRESIDENT. Is there objection?

Mr. SMOOT. Let it be read.

Mr. GALLINGER. Let the bill be read first.

The VICE PRESIDENT. The Secretary will read the bill.

The Secretary read the bill, as follows:

*Be it enacted, etc.*, That whenever a drainage district is organized in any county in the Five Civilized Tribes of the State of Oklahoma, under the laws of that State, for the purpose of draining the lands within such district, the Secretary of the Interior is authorized, in his discretion, to pay from the funds or moneys arising from any source under his control or under the control of the United States, and which would be pro rated to such allottee, the assessment for drainage purposes against any Indian allottee or upon the lands of any allottee who is not subject to taxation or whose lands are exempt from taxation or from assessment for taxation under the treaties or agreements with the tribe to which such allottee may belong, or under any act of Congress; and such amount so paid out shall be charged against such allottee's pro rata share of any funds to his credit under the control of the Secretary of the Interior or the United States: *Provided*, That the Secretary of the Interior, before paying out such funds, shall designate some person with a knowledge of the subject of drainage, to review the schedules of assessment against each tract of land and to review the land assessed to ascertain whether such Indian allottee, or his lands not subject to taxation, have been assessed more than their pro rata share as compared with other lands located in said district similarly situated and deriving like benefits. And if such Indian lands have been assessed justly when compared with other assessments, then, in that event, said funds shall be paid to the proper county in which such drainage district may be organized, or, in the option of the Secretary of the Interior, to the construction company or bondholder shown to be entitled to the funds arising from such assessment: *Provided further*, That in any event such assessment on any Indian allotment shall not exceed $15 per acre, and no such assessment shall be made unless the Indian allottee affected, or his legal guardian, shall consent thereto: *And provided further*, That nothing in this act shall be so construed as to deprive any allottee of any right which he might otherwise have individually to apply to the courts for the purpose of having his rights adjudicated.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. CLARK of Wyoming. I should like to ask a question of the Senator from Oklahoma. Does the bill impose a tax, either special or otherwise, upon land which, by act of Congress or by treaty right, was to remain untaxed?

Mr. OWEN. Yes; it would provide for taxing for drainage purposes.

Mr. CLARK of Wyoming. Would it not then be in conflict with the agreement or treaty with the Indians, either the one under which they took their allotments or some other treaty or law in favor of the Indians?

Mr. OWEN. It would not be in contravention of any treaty. The general law which was passed, which forbade the alienation of any lands, of course made the lands also untaxed. In the eastern part of Oklahoma, which, of course, consist entirely of Indian lands, there are lands everywhere overflowed and they are practically valueless without a drainage district being established, and unless some such provision is passed it is impossible to restore those lands so as to make them productive. For that reason it is necessary to pass this measure.

Mr. CLARK of Wyoming. The question in my mind was if an Indian wanted his land improved whether it might not be done by contribution rather than by levying a tax which was distinctly prohibited in law.

Mr. OWEN. The tax is not distinctly prohibited in the law, but the general provision that the land shall not be alienated has that effect, of course. It would be impossible to have any drainage district at all in Oklahoma, because it would contain somewhere a portion of inalienable and nontaxable lands.

Mr. CLARK of Wyoming. The Senator, I think, did not understand me. I supposed the same purpose could be reached by a voluntary contribution by the owners of the land.

Mr. OWEN. By whom?

Mr. CLARK of Wyoming. By the owners of the land. My inquiry was directed to the possibility that if the owner of the land did not want to be assessed for this special improvement, or whatever it was, he ought not to be assessed; and if he wanted to be assessed, the same purpose could be accomplished by a voluntary contribution instead of by violating the law.

Mr. OWEN. It is confined to consent. Everyone must consent. There must be unanimous consent before it is possible. That of itself is a very extraordinary condition, but the bill would not permit a drainage district unless it involved the consent of all the parties. Where everyone consents it does seem that there ought to be no artificial obstructions to it by the law. For that reason, I think, the bill passed the House of Representatives in its present form without anyone objecting to it.

Mr. SMOOT. I will ask the Senator if the Secretary of the Interior reports favorably upon the bill.

Mr. OWEN. Yes.

Mr. SMOOT. And it is the unanimous report of the Committee on Indian Affairs?

Mr. OWEN. With the amendment made by the House, I think no one was against it in the House of Representatives. It was amended in the House of Representatives to meet some objections.

Mr. SMOOT. Did any member of the Committee on Indian Affairs of the Senate object to its passage?

Mr. OWEN. No; not a single member of the committee objected to it. It passed the Committee on Indian Affairs unanimously.

Mr. SMOOT. It is rather a far-reaching bill, it seems to me. I am not going to object to its immediate consideration, on the statement made by the Senator, but I wish to ask a question. Suppose there is a drainage district created and an Indian has consented to the creation of that district and circumstances occur under which he finds himself unable to pay the assessment for that district, does the bill provide for such a case?

Mr. OWEN. It provides that the Secretary of the Interior shall pay it out of the funds which the Secretary has in his hands for those Indians.

Mr. SMOOT. It in no way alienates the land from the Indians?

Mr. OWEN. No; it does not alienate the land from the Indians.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SALARY OF ADDITIONAL CLERK.

Mr. WILLIAMS. From the Committee to Audit and Control the Contingent Expenses of the Senate I report a resolution and ask unanimous consent for its immediate consideration.

The resolution (S. Res. 308) was read, as follows:

*Resolved*, That the Secretary of the Senate be, and he hereby is, authorized to pay the salary of the temporary clerk, authorized to be appointed by the Committee on Post Offices and Post Roads under Senate resolution of March 16, 1914, from the miscellaneous items of the contingent fund of the Senate.

Mr. WILLIAMS. I wish to say that we have passed a resolution for this clerk, but it was awkwardly drawn, so that the money could not be paid out of the contingent fund until otherwise directed by law. This merely cures that trouble.

The resolution was considered by unanimous consent and agreed to.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SHEPPARD:

A bill (S. 4954) for the relief of Stephen Morris Barlow (with accompanying papers); to the Committee on Military Affairs.

By Mr. WEST:

A bill (S. 4955) for the relief of the heirs of John C. Bowden, deceased (with accompanying papers);

A bill (S. 4956) for the relief of the heirs of William McConnell, deceased (with accompanying papers); and

A bill (S. 4957) for the relief of the heirs of L. G. Brantley, deceased (with accompanying papers); to the Committee on Claims.

By Mr. WALSH:

A bill (S. 4958) granting an increase of pension to George Smith (with accompanying papers); to the Committee on Pensions.

By Mr. SHERMAN:

A bill (S. 4959) granting an increase of pension to Zeba D. French; and

A bill (S. 4960) granting an increase of pension to George Dimick; to the Committee on Pensions.

By Mr. WILLIAMS:

A bill (S. 4961) to reopen the rolls of the Choctaw-Chickasaw Tribe and to provide for the awarding of the rights secured to certain persons by the fourteenth article of the treaty of Dancing Rabbit Creek, of date September 27, 1830; to the Committee on Indian Affairs.

By Mr. KENYON:

A bill (S. 4962) granting a pension to Emily M. Walker; to the Committee on Pensions.

By Mr. BURLEIGH:

A bill (S. 4963) granting a pension to Freddie O. J. Horne;

A bill (S. 4964) granting a pension to Lula S. Knight Bigelow; and

A bill (S. 4965) granting a pension to Hattie P. Longfellow; to the Committee on Pensions.

By Mr. OWEN:

A bill (S. 4966) proposing an amendment as to section 19 of the Federal reserve act relating to reserves, and for other purposes; and

A bill (S. 4967) proposing an amendment to the Federal reserve act relative to acceptances, and for other purposes; to the Committee on Banking and Currency.

By Mr. GRONNA:

A bill (S. 4968) for the relief of Hyacinthe Villeneuve; to the Committee on Public Lands.

MESSAGES AND PAPERS OF THE PRESIDENTS.

Mr. GALLINGER submitted the following resolution (S. Res. 307), which was read and, with the accompanying papers, referred to the Committee on Printing:

*Resolved*, That the Committee on Printing is hereby directed to make careful inquiry into the sale by private parties of the publication known as "Messages and Papers of the Presidents," with a view to ascertaining all the facts in the case, and said committee shall also inquire into the desirability of an additional volume being prepared and published under the authority of the Government.

COTTON FUTURES.

Mr. SMITH of South Carolina submitted an amendment intended to be proposed by him to the bill (S. 110) to regulate trading in cotton futures and provide for the standardization of "upland" and "gulf" cottons separately, which was ordered to lie on the table and be printed.

PANAMA CANAL TOLLS.

Mr. JONES. I wish to call up Senate resolution 288, which was before the Senate yesterday. I understand that it went over without prejudice.

The VICE PRESIDENT. It is true that it went over without prejudice, which means that it took the place it had on the calendar.

Mr. JONES. That is the reason why I thought I had better call it up.

The VICE PRESIDENT. It takes either unanimous consent or a motion to get it before the Senate.

Mr. BRISTOW. I understood that the resolution was on the table, and it went over without prejudice.

The VICE PRESIDENT. So it did.

Mr. BRISTOW. Would it not remain on the table then?

The VICE PRESIDENT. It is on the table, but it has to be called up by unanimous consent or on motion.

Mr. BRISTOW. If the Senator from Washington is agreeable, I should like to have the resolution go over until the chairman of the Committee on Interoceanic Canals returns.

Mr. JONES. I will state to the Senator that I have no objection to that myself. I will not insist upon the resolution coming up this morning.

Mr. BRISTOW. Then let it go over.

The VICE PRESIDENT. It is on the table and retains its position on the Table Calendar, and may be taken up by unanimous consent or on motion at any time.

Mr. JONES. Mr. President, I desire to say in connection with this matter that the impression seems to have been conveyed from the remarks I made yesterday that my reference concerning an alleged interview of Sir Lionel Carden with the President was made on information I possessed or on matters within my knowledge. I think a reading of the remarks will show that this is not correct; that what I said was based upon a quotation from a paper with reference to the interview. This quotation was taken from the Washington Post, a paper that supports the policy of the President, and purported to be a dispatch to the New York American.

I wish to say, in justice to the President, that he has assured me in most positive terms that there is no basis of fact in the interview with Sir Lionel Carden for the conclusions or suggestion contained in the article in the Post, and when he gives such assurance I accept it without hesitation.

I wish to make that statement in justice to the President, because I do not want to do an injustice to anyone, much less to him. I do think that it emphasizes the importance of passing a resolution of this character at some time, so that we can get an official statement with reference to whatever information there is available in regard to this matter. It seems to me that the people of the country and Congress ought to be taken into the confidence of the President and those having information with reference to this important matter fully and completely. We ought not to be left to surmises and deductions from uncertain conditions and supposed facts.

Mr. WILLIAMS. What is the motion now before the Senate in connection with this matter?

Mr. JONES. The resolution has gone over.

The VICE PRESIDENT. There is no action pending.

Mr. WILLIAMS. What does the Senator propose?

Mr. JONES. The Senator from Kansas [Mr. BRISTOW] suggested that the resolution be allowed to lie on the table until the Senator from New York [Mr. O'GORMAN] is here.

Mr. WILLIAMS. In other words, the entire matter goes over?

Mr. JONES. It does. I was going to add that the Senator from Georgia [Mr. SMITH] made a motion to refer the resolution to the Committee on Foreign Relations, and I wondered if that motion would lie on the table along with the resolution?

Mr. WILLIAMS. That is the very matter to which I wanted to call attention. That motion is pending.

Mr. LODGE. Yes; it is pending.

Mr. WILLIAMS. I am very much in favor of the matter taking that course. It ought undoubtedly to go to the Committee on Foreign Relations. It is a matter that is peculiarly a diplomatic question, and it seems to me that that motion ought not to go over, but that it ought to be brought to the attention of the Senate and acted upon. Of course there is no way of keeping Senators from talking out whether the matter has been

sent to the committee or not. Senators can talk all they please. Speaking for myself, I should like to have the motion made by the Senator from Georgia to refer the resolution to the Committee on Foreign Relations come before the Senate and be voted upon at the earliest moment possible, and if that be the regular order I call for it.

The VICE PRESIDENT. It is not the regular order. The motion goes with the resolution to the table until it is called up again.

Mr. POINDEXTER. The Chair has just stated what I desired to make a point on—that it is impossible to consider the motion to dispose of the resolution so long as the resolution is lying on the table, and it could not be taken from the table without unanimous consent.

THE REPUBLIC COAL CO.

Mr. MYERS. I move that the Senate proceed to the consideration of the joint resolution (S. J. Res. 41) authorizing the Secretary of the Interior to sell or lease certain public lands to the Republic Coal Co., a corporation.

Mr. SMOOT. The regular order, Mr. President.

The VICE PRESIDENT. The calendar under Rule VIII is in order.

Mr. MYERS. Is not my motion in order?

The VICE PRESIDENT. It is. The Senator from Montana moves that the Senate proceed to the consideration of Senate joint resolution 41. The question is on agreeing to the motion.

Mr. SWANSON. I wish to be heard upon that.

Mr. WILLIAMS. Mr. President——

Mr. MYERS. I raise the point of order that the motion is not debatable.

The VICE PRESIDENT. The motion is not debatable. The question is on agreeing to the motion of the Senator from Montana. [Putting the question.] The noes have it.

Mr. MYERS. I call for the yeas and nays.

The yeas and nays were ordered.

Mr. SWANSON. I suggest to the Senator that if we proceed to the calendar we will reach the joint resolution more quickly than on a yea-and-nay vote.

Mr. MYERS. I will withdraw my motion, but I do not think it will be reached on the calendar.

The VICE PRESIDENT. It is too late for the Senator to withdraw the motion.

Mr. MYERS. Can I not withdraw the motion?

The VICE PRESIDENT. The yeas and nays have been ordered on the motion of the Senator from Montana, and the Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. OVERMAN (when Mr. SIMMONS's name was called). I announce that my colleague [Mr. SIMMONS] is absent on account of sickness.

Mr. WARREN (when his name was called). I announce my pair with the Senator from Florida [Mr. FLETCHER] and withhold my vote.

Mr. WEEKS (when his name was called). I have a pair with the junior Senator from Kentucky [Mr. JAMES]. I see he has not voted, so I will withhold my vote.

Mr. WILLIAMS (when his name was called). I have a pair with the senior Senator from Pennsylvania [Mr. PENROSE], but I transfer that pair to the Senator from Nebraska [Mr. HITCHCOCK] and vote "nay."

The roll call was concluded.

Mr. GALLINGER. I have a general pair with the junior Senator from New York [Mr. O'GORMAN], but I transfer that pair to the senior Senator from New York [Mr. ROOT] and vote "nay."

Mr. LEA of Tennessee. I have a general pair with the senior Senator from South Dakota [Mr. CRAWFORD], but I transfer it to the senior Senator from Indiana [Mr. SHIVELY] and vote "yea."

Mr. CHAMBERLAIN. I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER], which I transfer to the junior Senator from Tennessee [Mr. SHIELDS] and vote "yea."

Mr. BRADLEY. I transfer my pair with the junior Senator from Indiana [Mr. KERN] to the junior Senator from Idaho [Mr. BRADY] and vote "nay."

The result was announced—yeas 27, nays 27, as follows:

YEAS—27.

| | | | |
|---|---|---|---|
| Ashurst | Lea, Tenn. | Owen | Thompson |
| Catron | Lee, Md. | Perkins | Townsend |
| Chamberlain | McCumber | Ransdell | Vardaman |
| Gronna | McLean | Shafroth | Walsh |
| Hollis | Myers | Sheppard | West |
| Johnson | Nelson | Smith, Ariz. | Works |
| Jones | Overman | Smith, S. C. | |

NAYS—27.

| | | | |
|---|---|---|---|
| Bankhead | Gallinger | Page | Sterling |
| Bradley | Gore | Poindexter | Swanson |
| Brandegee | Lippitt | Pomerene | Thomas |
| Bristow | Lodge | Sherman | Thornton |
| Bryan | Martin, Va. | Smith, Ga. | Tillman |
| Burton | Martine, N. J. | Smoot | Williams |
| Dillingham | Norris | Stephenson | |

NOT VOTING—41.

| | | | |
|---|---|---|---|
| Borah | du Pont | Lewis | Shively |
| Brady | Fall | Newlands | Simmons |
| Burleigh | Fletcher | O'Gorman | Smith, Md. |
| Chilton | Goff | Oliver | Smith, Mich. |
| Clapp | Hitchcock | Penrose | Stone |
| Clark, Wyo. | Hughes | Pittman | Sutherland |
| Clarke, Ark. | James | Reed | Warren |
| Colt | Kenyon | Robinson | Weeks |
| Crawford | Kern | Root | |
| Culberson | La Follette | Saulsbury | |
| Cummins | Lane | Shields | |

The VICE PRESIDENT. On the motion of the Senator from Montana [Mr. MYERS], the yeas are 27 and the nays are 27. The Chair votes "yea"; and the motion is agreed to.

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. J. Res. 41) authorizing the Secretary of the Interior to sell or lease certain public lands to the Republic Coal Co., a corporation.

Mr. MYERS. I ask that the joint resolution be read at length.

The VICE PRESIDENT. The joint resolution has heretofore been read at length and considered as in Committee of the Whole. It is still before the Senate as in Committee of the Whole and open to amendment.

Mr. MYERS. Mr. President, I have heretofore explained this measure, I think, sufficiently, and have said all I feel that it is necessary to say upon it. My colleague [Mr. WALSH], however, has some amendments which he desires to offer.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

Mr. KENYON. Mr. President, I merely wish to submit a few remarks on the joint resolution, but if the Senator from Montana is to offer amendments to it they, possibly, may cure the objections which I have to the measure.

Mr. WALSH. I trust the Senator from Iowa will defer his remarks until I have offered my amendments, which, as he suggests, may meet his objections.

The VICE PRESIDENT. The question is, first, on agreeing to the amendment reported by the committee.

Mr. TOWNSEND. What is the amendment, Mr. President? I ask that it may be stated.

The VICE PRESIDENT. It is a substitute for the entire joint resolution. May the Chair first inquire of the Senator from Montana if his proposed amendment is an amendment to the committee amendment?

Mr. WALSH. It is an amendment to the committee amendment.

The VICE PRESIDENT. The Senator from Montana offers an amendment to the committee amendment, which will be stated.

The SECRETARY. At the end of the proposed committee amendment, in line 14, on page 3, it is proposed to insert:

SEC. 2. Any right or title acquired by the said Republic Coal Co. under the provisions of this act shall terminate and be forfeited—

(a) If the said company, or any of its successors in interest, shall at any time engage in the business of mining or selling coal for the general trade or otherwise than for the use of or to produce power to be used in the operation of railroads, or if it shall sell or dispose of any coal extracted from the said lands or any of them except for such uses.

(b) If the said company, or its successors in interest shall during any one calendar year after that in which it shall purchase the said lands fail, except by reason of the prevalence of strikes or other conditions for which it is in no way responsible, to extract from the said land less than 200,000 tons of coal.

(c) If the said company, or its successors in interest, shall at any time, except with the written consent of the Secretary of the Interior, sell, assign, or transfer, or contract to sell, assign, or transfer any rights acquired by it by virtue of this act; but nothing herein contained shall be deemed to forbid the sale of the coal mined from said land except as hereinbefore provided.

(d) If the said Republic Coal Co. shall ever become a constituent part of any combination in restraint of trade, or if the said lands of any of them, or the right to mine the coal therein or any part thereof, shall in any manner pass to any such combination, or if any such combination shall be by the said company or any of its successors in interest permitted to mine any coal from said lands.

SEC. 3. Nothing in this act contained shall be deemed to deny to the State of Montana the right to assess for taxation and to levy taxes upon the right and interest in the said lands which may be acquired under the terms of this act, or upon the coal that may be extracted therefrom, but in case of the sale of any interest thus acquired for taxes the grantee from the State shall hold the same subject to the same conditions as are hereby imposed upon the said Republic Coal Co. and under which it will hold the said lands should it acquire the same by virtue of this act.

Mr. WALSH. I have a further amendment to offer. I had supposed it was included in the one which has just been read,

but I see it is not. After the words "Secretary of the Interior," in line 6, page 3, I move to insert the words "at a figure not less than the appraised price."

The VICE PRESIDENT. Which is the first amendment offered by the Senator from Montana—this or the preceding amendment?

Mr. WALSH. This one properly comes before the amendment just read.

The VICE PRESIDENT. Then the Secretary will state the pending amendment to the amendment reported by the committee.

The SECRETARY. In the committee amendment, on page 3, line 6, after the words "Secretary of the Interior," it is proposed to insert "at a figure not less than the appraised price."

The VICE PRESIDENT. That is the pending amendment to the amendment of the committee.

Mr. WALSH. I will say, Mr. President, that the lands have already been appraised by the Geological Survey, and this amendment forbids the sale at a price less than the appraised price.

Mr. KENYON. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Iowa?

Mr. WALSH. I desire to say to the Senator from Iowa that I should like to explain the purport of the amendment first offered by me.

Mr. KENYON. I want to ask the Senator one question, if he will allow me. Under the amendment of the Senator is it possible now, if this joint resolution becomes a law, that anyone else except this particular specified company could acquire these lands? In other words, does the amendment or do the various amendments of the Senator leave the joint resolution in the same condition in that respect that it was in before the amendment was offered, namely, that the sale must be made to this particular specified corporation?

Mr. WALSH. The amendments do leave it in that way. I will say, however, to the Senator that it is a grant of the coal only and leaves the land open to homestead entry.

Mr. KENYON. I understand that under the amendments of the Senator the lands will be leased, as well as sold, at the option of the Secretary.

Mr. WALSH. No; the original joint resolution so provided; but the committee amendment provides for the sale only.

Mr. KENYON. That is one of my objections to the joint resolution, that it directs the sale and does not give any option to lease. I had understood that one of the Senator's amendments would reinstate that part of the joint resolution which was stricken out, which would give the right to lease.

Mr. WALSH. No; I have offered no amendment of that character. I will say, however, to the Senator that if he will offer an amendment of that character, I shall be glad to vote for it.

Mr. President, I desire to say as to this matter that I am opposed generally to the principle of this joint resolution. I am opposed, except under the most extraordinary circumstances, to the disposition of the public land by special act, which gives to a particular individual the right to acquire a particular piece of the public domain. We are, however, confronted with a peculiar situation here, the nature of which has been explained by my colleague [Mr. MYERS]. Everybody who has given any thought or study at all to this matter knows that it has been impossible to make any disposition of the coal lands forming a portion of the public domain under the existing coal-land act. In view of that situation of affairs, Mr. President, a bill was introduced by myself the other day contemplating the granting of leases of large tracts of the public domain, speaking relatively, and I propose to offer to-morrow a bill to amend the existing law so as to increase the acreage which may be taken under it.

Under the present law a single individual is permitted to appropriate only 160 acres of coal lands and an association is denied the right to take more than 320 acres. It requires the investment of a couple of hundred thousand dollars to equip a plant so as to permit the mining of coal anywhere in the West upon a commercial basis. The ordinary 160-acre or 320-acre tract of land will not justify any such expenditure. In order to meet that condition, for years the device was resorted to of making entries through the medium of dummy entrymen, a process that must have been always recognized as in violation of the law. Criminal prosecutions have been carried on and convictions have been had for the pursuit of that practice, with the result that it has been properly discontinued, and with the like result that it is now practically impossible to appropriate coal lands upon the public domain.

If the general law for the appropriation of coal lands had been in such shape that it could be operative, no doubt these lands would have been taken by some one who was desirous of operating them. I have no doubt in the world that the Republic Coal Co. or some other coal company, if it could have bought an entire section or two sections of coal lands, would have been perfectly willing to buy them; but it is denied that opportunity. So, likewise, it is denied the opportunity to acquire the lands through the medium of some one else who should have thus acquired them. Nobody will acquire them in tracts of 160 acres unless it is a body of men who acquire the lands thus for the purpose of subsequently transferring them to a single corporation by which they shall be operated; and that would be properly held to be in violation of the law.

On the other hand, the only other resource is to acquire lands from the Northern Pacific Railway Co. It will be understood that under the original grant to the Northern Pacific Railway Co., made by the act of 1864, it is entitled to take no mineral lands except lands containing iron and coal. As the result of this, the Northern Pacific Railroad Co. owns every alternate section in that neighborhood which is within the limit of the grant to the railroad company, so that the Northern Pacific Railroad Co. has an abundant supply of coal for its operations. This newer road, coming in during more recent years, has not that supply. It has no opportunity to acquire the title to any lands by which it can supply itself, and it is thus placed in a most disadvantageous position in the operation of its line in competition with the Northern Pacific Railroad Co. The Northern Pacific Railroad Co. pursues the policy of refusing, likewise, to sell any of its coal lands. In that situation of affairs I feel impelled to recede in this particular case from the attitude I would generally take of declining to give my acquiescence to a special act for the disposition of a tract of land.

The grantee or beneficiary of the bill is the Republic Coal Co., which we are told in the report is engaged in the business of mining this coal to be supplied only to the Chicago, Milwaukee & St. Paul Railroad Co., of which it is a subsidiary company. While it may have that policy now, however, it is organized for the purpose of engaging in business generally, and it may change its policy next year. The first amendment is intended to protect us from such a possible change in its policy.

Mr. WILLIAMS. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Mississippi?

Mr. WALSH. I do.

Mr. WILLIAMS. I have a very high regard for the opinion of the Senator from Montana upon almost any question. I do not know whether the Senator has gone into it or not, but does he not think it is bad policy to pick out some particular beneficiary and pass a resolution to allow it to have certain concessions and certain rights? Is not that rather going into the South American concessionaire's business, which we never have gone into?

Mr. WALSH. I do think it is generally a bad policy.

Mr. WILLIAMS. Is it not infinitely better to have general laws for everybody to avail himself of?

Mr. WALSH. It is.

Mr. WILLIAMS. Then how can the Senator justify supporting a bill of this description, which does pick out a particular beneficiary, and proposes legislation to fit its requirements?

Mr. WALSH. I was just endeavoring to explain to the Senate why, in this particular instance, I feel impelled to depart from the policy which the Senator has announced, and to which I very freely and fully subscribe.

Mr. WILLIAMS. I wish to say frankly that I know nothing about the particular bill or the particular situation involved here. Possibly I should have no sort of objection if I knew more about it. In other words, it may be that this bill ought to pass. I do not know. It does seem to me, however, that it is an awfully bad precedent; that we ought not to start picking out concessionaires and passing bills that amount simply to making concessions independently of the general law. It is not an English way of doing things. It is not an American way. It is a South American and Latin way of doing things.

Mr. WALSH. I fully agree with the Senator.

Mr. WILLIAMS. And I thoroughly disapprove of it, as a rule.

Mr. WALSH. I was endeavoring to explain to the Senator that the trouble about the matter is that the general law which we have and which is upon the statute books is utterly inoperative, and title could not be acquired to enough of the lands so that they could be operated at all. Under the existing law this company could acquire only 160 or 320 acres of land. It would be entirely useless for it to acquire any such quantity. In fact, such a quantity of land would not justify the expenditure of the money necessary to put up a plant adequate to handle the product.

Mr. WILLIAMS. That is a very good argument in favor of the amendment of the general law.

Mr. WALSH. I agree with the Senator.

Mr. WILLIAMS. And it seems to me that ought to be taken up and, if necessary, the law ought to be amended; but this puts a lot of us in rather an embarrassing position. We do not know who the Republic Coal Co. is, and we have not the opportunity to find out. It simply puts us in the attitude of voting for special legislation for somebody's special benefit. I suppose it is for their benefit or they would not want it. It does seem to me that some of you people from the Western States ought to get busy as soon as possible and revise these laws. So far as I am concerned I am willing, as a rule, to follow you in it, because you know more about it than I do. Here, however, is the whole calendar of the Senate held up to-day in order that the Republic Coal Co. may receive a donation at the hands of Congress in the shape of special legislation. Here is the calendar crowded with things that we want to dispose of, and it has all been held up for a special concession to be granted by the United States Government. It does seem to me that the general legislation of the country ought to be put through, and yet the Senate, by a majority of one, has set aside all the general legislation of the country in order that this special concession may prevail.

Mr. KENYON. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Iowa?

Mr. WALSH. I do.

Mr. KENYON. I assume the Senator from Montana is, of course, not to blame for that situation.

The VICE PRESIDENT. The Chair assumes that responsibility.

Mr. KENYON. I want to ask the Senator from Montana if the Republic Coal Co., of which he speaks, engages in any general business, or does it not simply provide coal for the Milwaukee Railroad?

Mr. WALSH. I desire to say to the Senator from Mississippi, as well as to the Senator from Iowa, that the bill is not mine, and I am not to be considered in any sense as the champion of the measure. I am very glad to give the Senator, however, such information as I have about the matter.

Mr. KENYON. I assumed that the Senator was familiar with the facts.

Mr. WALSH. I have taken pains to inform myself fully about it. It is represented to me, and I think that is correct, that the Republic Coal Co. does not engage in commercial business at all; that whatever coal it mines it sells to the Milwaukee & St. Paul road, which is nothing more than a system of bookkeeping, because the Milwaukee & St. Paul road owns the Republic Coal Co.

Mr. KENYON. So that the concrete question that is presented here is legislation directing the Secretary of the Interior to convey certain coal lands to the Milwaukee Railroad?

Mr. WALSH. Practically so; yes.

Mr. KENYON. That is the question. Of course, as the Senator has suggested, he is against the proposition of special legislation, and so am I. It would seem to me that there should be some exceedingly strong showing—I do not think there could be a strong enough showing to affect my mind on that proposition—of the necessity of this coal to this railroad company and its inability in any way to supply itself from other sources. Certainly if we pass a bill of this kind as it is presented here from the committee we are engaged in doing exactly what a good many of us have been complaining of for a good many years, namely, passing special legislation for the special benefit of some special interest.

That has been one of the reasons for my opposition to this bill. There is not even a chance for the Secretary of the Interior to lease this land. He is directed to sell it to the particular company, just as if we should put in a contract a direction to give the contract to some particular person. It does seem to me that it is most vicious legislation.

Mr. WALSH. Mr. President, I introduced what I had to say by signifying my acquiescence, in a general way, with all of the observations of the Senator from Iowa; and I was endeavoring to lay before the Senate such considerations as have induced me to withdraw my opposition to this bill in view of the general principle of legisfation, which I think is exceedingly sound, that we ought not to legislate specially with respect to these matters.

Mr. KENYON. I take it, then, that the Senator has sought in his amendments—of course, it is impossible to become familiar with them on this short notice—to take care of the question as well as he may be able to do so, and get away from the domain of special legislation?

Mr. WALSH. That was my purpose. I do not want to give this company the right to get this particular tract of land and then permit it to engage in general competition with other companies in the general commercial business, because the only reason for granting it is that here is a great public-service corporation that is put at a decided disadvantage in the conduct of its business by reason of a prior grant that was made to its rival, which entitles it to get coal out of the public lands, and which corporation refuses to sell to its rival any land from which it can supply itself.

Mr. KENYON. That is an unfortunate situation, but a situation which, of course, this company was fully cognizant of when it built its line.

Mr. LODGE. Mr. President, if I understand the Senator from Montana aright, this legislation is made necessary in a large degree by the fact that the general law prevents the proper development of the coal lands by private enterprise?

Mr. WALSH. The Senator is correct; and if the general law were operative at all I should not give any countenance to this measure. It is because they can not supply themselves through the operation of the general law that I am supporting it.

Mr. LODGE. That is, if the Senator will allow me, it has been found that men will not invest money in developing coal lands unless there is a hope of getting a reasonable return?

Mr. WALSH. Yes.

Mr. LODGE. The Senator spoke of $200,000 being necessary to establish a mining plant, and said that 320 acres could not possibly supply such a plant?

Mr. WALSH. It would not justify that expenditure.

Mr. LODGE. Therefore they will not invest, I suppose.

Mr. LANE. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Oregon?

Mr. WALSH. I do.

Mr. LANE. I should like to ask the Senator from Montana if it is not a fact that this measure is rendered necessary for the relief of the Chicago, Milwaukee & St. Paul Railroad Co. by reason of previous legislation which granted to the Northern Pacific and other railway companies the right to secure possession of coal lands, and now new railroads can not compete with them on that account?

Mr. WALSH. Essentially, it is that consideration, and the further consideration that the general law in relation to the disposition of public coal lands has proven inoperative.

Mr. LANE. Was not that general law passed since the grant was made to the Northern Pacific Railroad?

Mr. WALSH. That law was passed in 1872.

Mr. LANE. When was the grant to the Northern Pacific Co.?

Mr. WALSH. In 1864.

Mr. LANE. Yes. You see, the fact is, in this case, if the Senator will pardon me, that there were large grants made to the Northern Pacific through which it gained access to these coal fields. Later on came a general law which denied the individual free access to them. Now, if I am not mistaken, this coal field is the continuation of the great Crow's Nest coal vein, the finest quality of coal on the Pacific coast outside of Alaska, and next after the anthracite coal of Pennsylvania the best coal in America, and the largest body known in North America.

Here is a railroad trying to get through the country, and it needs coal for its own use. Its opponents not only have access to the coal in Montana, but they have also secured large holdings in British Columbia in the Crow's Nest vein, and they control the situation.

It is an unfortunate condition. I do not like to see the title given to this railway. I am opposed to it; and yet I can see the justice of the claim of the Senator from Montana, if it is properly guarded.

The fact is that we are correcting one piece of bad legislation by passing another. We are confronted with the mistakes of the past. It is an unfortunate condition. If a substitute could be offered for this bill which would allow this railroad company, for its own use, to go into that coal field and to dig out of the ground sufficient coal to operate its railway, for that purpose only, at a toll or rate of rental to the Government of 10 cents a ton or 5 cents a ton, and have the use of it as long as it was used for that purpose, and so long only, I would be perfectly willing to grant it, and think it ought to be done. If, however, we let them in here with a title in fee simple as an entering wedge into that coal field, I am wondering what is going to become of that coal.

It is vitally important, gentlemen, to the entire Pacific coast. If I am right in my geographical information concerning it, it is a down-hill pull to the Pacific coast. Its supply is the greatest available for an immense territory of country, which is going to be dependent upon it for fuel for all time to come.

It is a wonderful resource of wealth. I do not live in Montana; but I believe the Senator will concede, if I am right in my surmise, that it is a continuation of the Crow's Nest coal and of similar quality. If that is the fact, it should be guarded well and carefully, and at the same time we should do justice by this railway company.

I hope the Senator has guarded that matter, for I should like to help the railroad company to open up that country. At the same time I do not want to be a party to any of the tactics which were practiced in behalf of the Northern Pacific and other railroads that went in there at an early day and grabbed up and now hold the natural resources of the country, to the disadvantage and loss of the people of that entire section for hundreds of years to come. It would have been better for the people and cheaper if this Government had given to the Northern Pacific Railway Co. and the Oregon & California Railway Co. and Central Pacific Railway Co. a hundred million dollars in cash to have gone over into China and gone to raising rice instead of allowing them the possession of the resources of that section as it did.

This matter wants to be guarded well, and I hope it has been or will be done.

WOMAN SUFFRAGE.

The VICE PRESIDENT. The morning hour having expired, the Chair lays before the Senate the unfinished business, which is Senate joint resolution No. 1.

Mr. MYERS. I ask unanimous consent that the unfinished business be temporarily laid aside until this measure which has been before the Senate is disposed of.

Mr. THOMAS. I object, Mr. President.

The VICE PRESIDENT. There is objection.

The Senate resumed the consideration of the joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States extending the right of suffrage to women.

The VICE PRESIDENT. The pending question is on the amendment proposed by the Senator from Mississippi [Mr. VARDAMAN].

Mr. GRONNA. Mr. President, I shall not consume much of the time of the Senate at this juncture. I know most of us are anxious to have a vote on this resolution, and I will only state a few of the reasons why I shall vote for giving the right of suffrage to American women. It appears to me that very few weighty reasons have been urged for not giving women the right to vote, and it has with some reason been said that the strongest argument for woman suffrage is the absence of any valid argument against it.

I do not believe the millennium will come merely by giving women the right to vote. We shall then, as now, make mistakes in the conduct of governmental affairs; unfit men will at times be elected to public office; unwise policies will be determined upon. There are, however, certain questions which women will give more serious attention to than most men do, and certain conditions the removal of which they will insist on, because those questions and those conditions concern the home and the family. One of those questions is the doing away with the vice of intemperance and its thousand and one attendant evils. The wife whose husband spends his earnings in the saloon, who suffers not only from want of material things but often has to suffer actual abuse at his hands, to say nothing of the shame and humiliation, has no patience with the temporizing with this evil condition; the mother who sees her son become a drunken sot, losing all manhood and all ambition and becoming a curse to himself and his family, or who perhaps sees a daughter started on the downward path because of the same sinister influence, will not hesitate to strike at the root of the evil when the opportunity presents itself. And other and happier mothers will be quick to do anything to eradicate this awful curse. Men are more apt to pass it by unnoticed so long as it does not strike near home, with perhaps a passing feeling of sympathy for the unfortunate families, congratulating themselves that they are more fortunate. Women see more clearly the ever-present danger of some member of their family taking the first short and easy step on the downward path, and which usually has but one end.

I believe that this Nation will soon, and that all nations must ultimately, stamp out the liquor curse, if they are not to perish from the earth. And I believe that giving the women the vote will hasten the day when this is accomplished in the United States. I know that in my State the influence of the women is what made it possible to banish the saloon. At the present time there is no danger of North Dakota reestablishing the saloon—there are few men within its borders who dare to suggest such a possibility—but there was a time when the sentiment was not so strongly in favor of prohibition, when it was an untried experiment, and then it was that the efforts and influence of the women were needed to make North Dakota one of the first States where the people had the moral courage to stamp out this monstrous traffic in the lives and happiness of men and women—the liquor traffic.

I quote from the immortal Lincoln, who was a believer in national prohibition:

> The liquor traffic is a cancer in society, eating the vitals and threatening destruction, and all attempts to regulate it will not only prove abortive, but will aggravate the evil. There must be no attempts to regulate the cancer. It must be eradicated, not a root must be left behind, for until this is done all classes must continue in danger of becoming victims of strong drink. "If it is a crime to make a counterfeit dollar, it is ten thousand times a worse crime to make a counterfeit man."

On the very day of his assassination Lincoln is reported to have said to his friend Maj. J. B. Merwin, of Middlefield, Conn.:

> We have cleaned up, by the help of the people, a colossal job. Slavery is abolished. The next great question will be the overthrow of the legalized liquor traffic. And you know, Merwin, that my head and my heart, my hand and my purse will go into that work. In 1842, less than a quarter of a century ago, I predicted that the day would come when there would be neither a slave nor a drunkard in the land; I have lived to see one prediction fulfilled; I hope to see the other realized.

Mr. President, if there were no other reason, this would be a sufficient one for me to vote to give women the ballot. There are, however, numerous other conditions affecting the home more or less directly, which I believe women will deal more promptly and more courageously with than men have done in most instances. I am emphasizing this aspect of the question because I believe there is where the effect of woman suffrage will first be felt and most strongly and beneficially felt. On other questions there is no reason to believe that women will make any more blunders than men have made. They have as much intelligence with which to consider such questions as men have; they have as much interest in whether the Government is good or bad as men have; and they have just as much right to say how they shall be governed as men have. If many of them have not paid much attention to public affairs in the past, there is a reason why they have not. They have had no opportunity to make their opinions and beliefs felt; it would have been strange if they had, under the circumstances, given as much attention to such matters as men have. In the States which have woman suffrage there has not, so far as I have noticed, been any complaint as to the failure of the women to take an interest in public affairs and cast their ballots.

I believe that giving women the suffrage will have a beneficial effect both in respect to those matters in which they are especially interested and others with which they are, perhaps, a little less concerned than men. When the mothers of the Nation have a voice in the conduct of its affairs there will be more concern on the part of the Government for the welfare of the sons and daughters of those mothers. In 20 years, I believe, it will seem as strange that anyone opposed woman suffrage as it now seems that there ever was opposition to universal suffrage among men.

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). The question is on the amendment proposed by the Senator from Mississippi [Mr. VARDAMAN].

Mr. THOMAS. On that I ask for the yeas and nays.

Mr. GRONNA. I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested, and the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Hollis | Owen | Sutherland |
| Bankhead | Hughes | Page | Swanson |
| Bradley | James | Perkins | Thomas |
| Brandegee | Johnson | Poindexter | Thornton |
| Bristow | Jones | Pomerene | Tillman |
| Bryan | Kenyon | Ransdell | Townsend |
| Burton | Lane | Reed | Vardaman |
| Chamberlain | Lee, Md. | Shafroth | Warren |
| Chilton | McCumber | Sheppard | Weeks |
| Clapp | Martin, Va. | Sherman | West |
| Clark, Wyo. | Martine, N. J. | Smith, Ga. | Williams |
| Dillingham | Nelson | Smith, S. C. | |
| Gallinger | Norris | Smoot | |
| Gronna | Overman | Stephenson | |

Mr. REED. My colleague [Mr. STONE] is detained from the Senate by illness. During his absence he is paired with the Senator from Wyoming [Mr. CLARK]. I make this announcement for the day.

The PRESIDING OFFICER. Fifty-three Senators have answered to their names. A quorum is present.

Mr. BRADLEY. Mr. President, I will not consume more than one minute of the time of the Senate. I will merely say, in explanation of the vote I am going to give on the main proposition, that I believe each State should have the right to settle the question of woman suffrage for itself. For that reason I shall vote against the main proposition.

Mr. BRISTOW. I should like to have the pending amendment read. It is an amendment offered by the Senator from Mississippi [Mr. VARDAMAN], I understand, to the joint resolution.

The PRESIDING OFFICER. The Senator is correct. The Secretary will read the amendment.

The SECRETARY. On page 1, line 12, of the joint resolution, after the word "sex," insert the following:

But in all other respects the right of citizens to vote shall be controlled by the State wherein they reside.

Mr. GRONNA. I call for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is the call seconded?

Mr. LEE of Maryland. Mr. President, before the vote is taken on the amendment I wish to suggest to have incorporated in the RECORD, if there is no objection, a communication of a few pages bearing upon the constitutionality of an amendment to the Constitution of this type. The Senator from Washington [Mr. POINDEXTER] the other day incorporated in the RECORD a statement called "The State Rights Shibboleth," a rather extreme contribution, and this perhaps may be said to balance the matter on the other side. It is a communication from a very able lawyer who has made a special study of the fifteenth amendment and cases pending under the same. I will suggest that it be incorporated in the RECORD.

The PRESIDING OFFICER (Mr. POMERENE in the chair). Without objection, it will be printed in the RECORD.

The matter referred to is as follows:

BALTIMORE, *March 17, 1914.*

Hon. BLAIR LEE,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR: As I understand it, the question concerning which you have asked my opinion is substantially this:

Would the proposed amendment to the Constitution of the United States, in so far as the same may purport to confer upon women the right to vote at State elections, or to vote at election of United States Senators, be a valid exercise of the power to amend the Constitution conferred upon three-fourths of the States by Article V of said Constitution as against any State not assenting to or ratifying such amendment?

As you are aware, I have heretofore had occasion, in another connection, to give very careful consideration to some phases of this question, and I will proceed to state, as briefly as I may, the conclusions at which I have arrived.

Prior to the Civil War the question most fiercely debated was whether the Constitution was the result of a compact between the States, and therefore a creation of the States themselves, or whether it was a Government "ordained and established" by "the people of the United States," as recited in the preamble.

Whether rightly or wrongly, the latter view has prevailed as the result of the Civil War and the subsequent decisions of the Supreme Court of the United States, and must now be accepted as a basic principle of American constitutional law.

It follows that the States, not having created or made the Constitution, have no power to change or amend it, except in so far as the power so to do has been conferred upon them by the people in the Constitution itself.

This power of amendment is conferred by Article V of the Federal Constitution in the following terms:

"The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the legislatures of two-thirds of the several States, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the Congress: *Provided*, That no amendment which may be made prior to the year 1808 shall in any manner affect the first and fourth clauses in the ninth section of the first article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate."

It is manifest, of course, that this does not confer upon Congress any power to amend the Constitution.

Congress can only propose amendments. The States, or three-fourths of them only, can amend the Constitution by adopting such amendments as may be submitted to them under this article.

It is manifest also that in adopting this Constitution the people of the United States did not intend to confer upon three-fourths of the States an unlimited power of amendment.

In the first place, there is one express limitation upon this amending power still in force.

No amendments would be valid which would deprive any State without its consent of "its equal suffrage in the Senate."

From this express limitation, as I shall presently endeavor to show, certain implied limitations necessarily follow. But, independently of this express limitation or proviso, there is one general implied limitation upon the power of the States, or three-fourths of them, to amend the Constitution, which all will admit, viz:

No amendment could be deemed to be valid which would have the effect, in whole or in part, of defeating the purpose which the people had in view in adopting the Constitution.

Now, whatever differences of opinion in regard thereto may have existed prior to the Civil War, it is now well settled, as a result of that war and of repeated decisions of the Supreme Court, beginning with the opinion of Chief Justice Chase in the celebrated case of Texas *v.* White (7 Wall., 700), that the primary purpose and object which the people had in establishing and ordaining the Constitution was to create a Federal Union which should be perpetual; and that being so, of course, they could not have intended to confer upon the States the power to destroy the Union.

But it is equally well settled now, by the decisions of the Supreme Court to which I will presently refer and which are familiar to us all, that the preservation of the respective States in their integrity as self-existing political entities and with independent existence within their proper spheres is necessary to the perpetuity of the Union, so that any amendment which would have the effect of destroying a State would defeat the very purpose which the people had in view in establishing the Constitution by, to that extent, destroying the Union itself.

But it is not necessary in order to come within this implied limitation that an amendment or legislative act should destroy a State entirely. It is sufficient if it has the effect of stripping the State of any power or function "necessary to its independent existence as a State."

The soundness of this proposition will be made clear by a reference to the opinion of the Supreme Court of the United States in the case of Lane County *v.* Oregon (7 Wall., 71).

In that case the court had occasion to pass upon the question of the validity of an act of Congress which, it was claimed, required the State of Oregon to accept legal-tender notes of the United States in payment of State taxes.

The court held that the power to levy and collect taxes for the support of the State government was one of those powers which was essential to the separate and independent existence of a State.

It could not be claimed that the effect of the act of Congress in question was to entirely take away this taxing power from the State, because, of course, the United States legal-tender notes had some value.

Nevertheless, it was held that the act was void because it interfered with that power and undertook to restrain the State in the free exercise thereof.

In the course of the opinion, which was delivered by Mr. Chief Justice Chase, the court said:

"The people of the United States constitute one Nation under one Government, and this Government, within the scope of the powers with which it is invested, is supreme.

"On the other hand, the people of each State compose a State having its own government and endowed with all the functions essential to separate and independent existence. The States disunited might continue to exist. Without the States in union there could be no such political body as the United States.

"Now, to the existence of the States, themselves necessary to the existence of the United States, the power of taxation is indispensable. It is an essential function of government. * * * If, therefore, the condition of any State, in the judgment of its legislature, required the collection of taxes in kind—that is to say, by the delivery to the proper officers a certain proportion of products, or in gold and silver bullion, or in gold or silver coin—it is not easy to see upon what principle the National Legislature can interfere with the exercise, to that end, of this power, original in the States and never as yet surrendered."

And yet there is nothing in the Constitution expressly forbidding Congress to require a State to accept legal-tender notes of the United States in payment of taxes.

Again, in the case of Collector *v.* Day (11 Wall., 113), the Supreme Court held that the right and power to establish and maintain a judiciary was one of the functions essential to the independent existence of a State as such. That, although section 8 of Article I of the Constitution confers upon Congress in the broadest terms the "power to lay and collect taxes, duties, imposts, and excises * * * and provide for the common defense and general welfare of the United States," and nowhere expressly forbids Congress in the exercise of this taxing power to tax the salary of a State official, yet that such an act of Congress was void, for the reason that it came within the implied limitation upon the taxing power; that it should not be used to, in effect, destroy a State by interfering with the exercise by that State, even in a small degree, of one of the powers essential to its existence as a State.

Mr. Justice Nelson, in delivering the opinion of the court (p. 123), discusses the necessary limitations of the taxing power in a manner which we submit is equally applicable to the amending power, as follows:

"The cases of McCulloh *v.* Maryland (4 Wheaton, 816) and Weston *v.* Charles (2 Peters, 449) were referred to as settling the principle that governed the case, namely, that the State governments can not lay a tax upon the constitutional means employed by the Government of the Union to execute its constitutional powers.

"The soundness of this principle is happily illustrated by the Chief Justice in McCulloh *v.* Maryland. 'If the States,' he observes, 'may tax one instrument employed by the Government in the execution of its powers, they may tax any and every instrument.' They may tax the mint. They may tax patent rights. They may tax judicial process. They may tax all the means employed by the Government to an extent which would defeat all the ends of government.

"'This,' he observes, 'was not intended by the American people. They did not design to make their Government dependent on the State.' (And it must be equally true, it seems to me, that the American people did not design to make any of the States dependent for their existence as Republics—as States with a republican form of government—upon the will of any particular number of States.) And, again: 'That the power of taxing it (the bank) by the State may be exercised so far as to destroy it is too obvious to be denied. * * * If the right to impose the tax exists, it is a right which in its nature acknowledges no limit.'"

It seems to me that this reasoning is equally applicable to the proposed woman's-suffrage amendment. That the right of a State to determine for itself who shall constitute its electorate—who shall vote at State elections—is one of the powers "essential to the existence of a State" would seem to be self-evident.

If any outside power has the right to regulate or control the right to vote at State elections in one respect, it has the right to regulate or control it in others. If it has a right to say that women shall vote at State elections, it would equally have the right to say that men should not vote. It would equally have the right to say that only children or that only certain classes of men having certain political or religious opinions should vote, or that only one or two men should vote. Upon the principles announced in the opinion just quoted from, it would seem to be clear that the proposed amendment would have to be regarded as a recognition of the right of three-fourths of the States to at least restrain or a hamper in the exercise of one of the functions essential to its very existence as a State within the meaning of the Constitution, and therefore void.

Quoting further from the same opinion:

"Upon looking into the Constitution it will be found that but a few of the articles in that instrument could be carried into practical effect without the existence of the States.

"The Constitution guarantees to the States a republican form of government and protects each against invasion or domestic violence. Such being the separate and independent condition of the States in our complex system, as recognized by the Constitution, and the existence of which is so indispensable that without them the General Government itself would disappear from the family of nations, it would seem to

follow as a reasonable, if not necessary, consequence that the means and instrumentalities employed for carrying on the operations of their governments, for preserving their existence, and fulfilling the high and responsible duties assigned to them in the Constitution, should be left free and unimpaired, should not be liable to be crippled, much less defeated by the taxing power of another government, which power acknowledges no limits but the will of the legislative body imposing the tax. * * * Without this power and the exercise of it, we risk nothing in saying that no one of the States under the form of government guaranteed by the Constitution could long preserve its existence. A despotic government might. (Pages 124–126.)

"It is admitted that there is no express provision in the Constitution that prohibits the General Government from taxing the means and instrumentalities of the States, nor is there any prohibiting the States from taxing the means and instrumentalities of that Government. In both cases the exemption rests upon necessary implication and is upheld by the great law of self-preservation, as any government whose means employed in conducting its operations, if subject to the control of another and distinct government, can exist only at the mercy of that government. Of what avail are these means if another power may tax them at discretion?"

Now, applying this reasoning to the question in hand, I submit:

(a) That if the right to tax is "a right which in its nature acknowledges no limits," so the right to extend or limit the elective franchise in a State is equally a right which in its nature acknowledges no limits.

If three-fourths of the States have the right under the amending power or under the pretense of exercising the right under the amending power to say that a State shall not deny or abridge the right to vote at State elections to any person on account of his or her sex, they have an equal right to say that a State shall deny to such person the right to vote on account of sex. They have a right, as already suggested, to prohibit men or grown persons of either sex to vote altogether; they have a right to say that only Indians shall vote in Oklahoma; they have a right to say that only Japanese or Chinese shall vote in California; they have a right to say that only Scotch Presbyterians or Irish Catholics or Hebrews or Episcopalians shall vote in New York. Clearly, the power that has a right to determine all this is the State, because the people who exercise the powers of government are those who have the power to elect public officials, the instruments through which those powers are exercised in the legislative and executive and judicial departments of the Government.

When the French Monarch made the historic boast "I am the State," he spoke the truth, because he stated a fact which none could deny. His will was law, and he determined who should fill all the offices of government. Therefore he was the State.

It is true that there is no express provision in the Constitution forbidding three-fourths of the States from interfering with the control by any State of its own electorate. But, as was said by the Supreme Court in the case from which we have been quoting, in denying the power of the Federal Government to tax the means and instrumentalities of the governments of the States the exemption from such interference "rests upon necessary implication and is upheld by the great law of self-preservation," as any government whose power to control its own elections is subject to the control of another distinct government and authority "can exist only at the mercy of the latter."

In *McCulloh v. Maryland*, Chief Justice Marshall said "that the power to tax involves the power to destroy," and while the tax in question did not, as a matter of fact, destroy the United States bank the law imposing the tax was held to be void because of its violation of the immunity which the bank as an instrumentality of the Federal Government possessed against even the beginning of such destruction. In other words, for all practical purposes any government which has lost the power to protect itself from destruction at the hands of another government or other outside authority is regarded as having been destroyed as an independent political entity.

Again, the very language of Article V in conferring the amending power contemplated the continued existence of the States. The Constitution may be amended by a vote of three-fourths of the States. Once destroy the States as such and there will no longer be any constitutional means of amending the Constitution and no means of doing so left, except by revolution. It is true that the right of a free people to change their form of government whenever in their judgment it ceases to fulfill the proper functions of government is absolute, and is so declared to be in the American Declaration of Independence. But that right is not a constitutional right. It is the right of revolution. What we are concerned with here are only constitutional rights.

The proposed amendment reads as follows:

"SECTION 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex."

For reasons which it is not now necessary to go into, I am of the opinion—and shall remain of that opinion until the Supreme Court shall determine otherwise—that this language properly construed would not make the amendment applicable to voting at State elections. "Citizens of the United States" as such have no right to vote at State elections, and this amendment would be applicable properly only to voting at congressional elections and senatorial elections under the seventeenth amendment.

But if we assume for the purpose of the present occasion that the proposed amendment was intended to be applicable to voting at State elections, I am very clearly of the opinion that it is void, for the reasons which I am endeavoring to present.

Next to the case of *Lane County v. Oregon* (7 Wall., 71), from which I have quoted, came the great case already referred to of *Texas v. White* (7 Wall., 700).

That case turned upon the question as to whether Texas, after its admitted separation from the Union, was still a State, and required an examination of the question as to what constitutes a "State" within the meaning of the Federal Constitution, in the course of which examination the Supreme Court said:

"If, therefore, it is true that the State of Texas was not at the time of filing this bill, or is not now, one of the United States, we have no jurisdiction of this suit, and it is our duty to dismiss it." (Page 719.)

"Some not unimportant aid, however, in ascertaining the true sense of the Constitution may be derived from considering what is the correct idea of a State apart from any union or confederation with other States. The poverty of language often compels the employment of terms in quite different specifications; and of this hardly any example more signal is to be found than in the use of the word we are now considering. It would serve no useful purpose to attempt an enumeration of all the various senses in which it is used. A few only need be noticed.

"It describes sometimes a people or community of individuals united more or less closely in political relations inhabiting temporarily or permanently the same country, often it denotes only the country or territorial region inhabited by such a community; not infrequently it is applied to the Government under which the people live, at other times it represents the combined idea of people, territory, and government.

"It is not difficult to see that in all these senses the primary conception is that of a people or community. The people in whatever territory dwelling, either temporarily or permanently, and whether organized under a regular government or united by looser and less definite relations constitute the State.

"In the Constitution the term 'State' most frequently expresses the combined idea, just noticed, of people, territory, and government. A State, in the ordinary sense of the Constitution, is a political community of free citizens occupying a territory of defined boundaries and organized under a government sanctioned and limited by a written constitution and established by the consent of the governed. It is the union of such States under a common constitution which forms the distinct and greater political unit which that constitution designates as the United States and makes of the people and States which compose it one people and one country." (Pages 720–721.)

"The union of the States never was a purely artificial and arbitrary relation. It began among the Colonies and grew out of common origin, mutual sympathies, kindred principles, similar interests, and geographical relations. It was confirmed and strengthened by the necessities of war and received definite form and character and sanction from the Articles of Confederation. By these the Union was solemnly declared to 'be perpetual.' And when these articles were found to be inadequate to the exigencies of she country the Constitution was ordained 'to form a more perfect Union.' It is difficult to convey the idea of indissoluble unity more clearly than by these words. What can be indissoluble if a perpetual union, made more perfect, is not?

"But the perpetuity and indissolubility of the Union by no means implies the loss of distant and individual existence, or of the right to self-government by the States. Under the Articles of Confederation each State retained its sovereignty, freedom, and independence, and every power, jurisdiction, and right not expressly delegated to the United States. Under the Constitution, though the powers of the States were much restricted still, all powers not delegated to the United States nor prohibited to the States are preserved to the States, respectively, or to the people. And we have already had occasion to remark at this term, that 'the people of each State compose a State, having its own government, and endowed with all the functions essential to separate and independent existence,' and that 'without the States in union there would be no such political body as the United States.' Not only therefore can there be no loss of separate and independent autonomy to the States through their union under the Constitution, but it may be not unreasonably said that the preservation of the States and the maintenance of their governments are as much within the design and care of the Constitution as the preservation of the Union and the maintenance of the National Government. The Constitution in all its provisions looks to an indestructible Union composed of indestructible States." (Pages 724–725.)

How can it be said that the people intended to establish a perpetual Union and at the same time—in the same breath—that they intended to confer upon any number of States the right to destroy it?

It does not seem to me that it is necessary to resort to any theory of implied limitation upon the amending power to show that the proposed woman-suffrage amendment would be invalid as applied to elections of United States Senators.

It seems to me it comes clearly within the provision of the express limitation upon the amending power contained in the proviso already referred to that "no State without its consent shall be deprived of its equal suffrage in the Senate."

Quoting again from the Supreme Court:

"A State in the ordinary sense of the Constitution is a political community of free citizens (not of slaves), occupying territory of defined boundaries and organized under a government sanctioned and limited by a written constitution and established by consent of the governed." (Texas v. White, 7 Wall., 700.)

It is "such States" that constitute the United States. It is "such States" that are guaranteed by this proviso perpetual "equal suffrage in the Senate." That guaranty is necessarily equivalent to a guaranty that they shall continue to be "such States," States sovereign within their proper sphere of political powers.

Again, how could the people of Oregon, for example, be said to be any longer a "political community of free citizens," with "a government established by the consent of the governed," if without that consent, by an act of Congress and an amendment adopted by other States, enough Chinese or Japanese were directly or indirectly enfranchised within its borders to completely dominate its State government?

Or suppose an "amendment" were adopted conferring the right of suffrage at State elections or senatorial elections upon women in Oregon and taking it away from men, or conferring it upon Asiatics and taking it away from the Caucasian element, would that be a fulfillment of the guaranty that Oregon should never be deprived of its equal suffrage in the Senate? Would a "State" thus constituted or reconstituted against its will be the same Oregon which had been guaranteed forever equal suffrage in the Senate?

What is a "political community of free citizens"?

What constitutes a "State"?

Clearly it is those people in the State who have and exercise the political power—they constitute the State. In other words, it is the electorate that for all political purposes constitutes the State—they and such other persons as they may from time to time voluntarily admit to participate with them in the political power, i. e., the suffrage.

Whenever the electorate is forced against its will to admit others to participate in the exercise of the powers of government the result is an entirely new State and not the State which was guaranteed perpetual, equal representation in the United States Senate by the constitutional provisions already mentioned.

It may be suggested—in fact, I have heard it suggested—that this argument might be cited against the validity of the fourteenth amendment also, or that a portion of it which undertakes to determine who shall be citizens of a State by declaring them "all persons born in the United States or within the jurisdiction thereof shall be citizens of the United States and of the State in which they reside." But it seems clear to me that no such argument can be made.

The citizenship of a State may be added to or taken away from by an outside power; but so long as the new citizens are not given by that outside power the right to vote at State elections or the right to participate in the election of those who are to exercise for the State its right of "equal suffrage in the Senate" the autonomy of that State is not affected in the slightest degree, neither is its constitutional guaranty of equal suffrage in the Senate affected.

For these reasons I respectfully venture the opinion that the proposed amendment would not be constitutional or valid, because it would not be within the power of amendment conferred upon the States, or three-fourths of them, by the Constitution.

Perhaps I may be permitted to add that even if it should be hereafter held that such power of amendment exists, I am frankly unable to see how any man who believes that the States, which are, as we might say, the water-tight compartments of the Constitution, should be preserved in their integrity, can vote in favor of the exercise of such a power. It seems to me that the question of granting or refusing to women the right of suffrage in State and senatorial elections is essentially a State question.

Very truly, yours,

WM. L. MARBURY.

Mr. LEE of Maryland. Mr. President, I should like to say, further, that in voting against this proposed constitutional amendment to enfranchise women, I do so on the ground that I believe it is a matter for regulation by the States. I believe it will be brought about more gradually, if it is a great reform, in that manner than by national action; that every advantage which can be secured out of any such great movement can be better secured and more constitutionally secured and more effectually secured by the education of the very people themselves who are to receive the franchise by the action of the several States themselves in due order than by imposing such an amendment upon the whole country, regardless of the local effect or the local interest or local conditions.

Mr. SHEPPARD. Mr. President, I wish to say in brief explanation of the votes I shall cast on the subject now before the Senate that I believe women should be accorded the right to vote. I am not yet convinced that this question of suffrage is a proper subject for Federal jurisdiction. But I shall not permit the fact that I am not so convinced to cause me to vote to prevent the American people from saying whether it is a proper subject for Federal jurisdiction. I shall not resist the expression of the popular will on a subject of such importance, a subject on which so many people wish the Nation to act. If these amendments to the Federal Constitution are not desirable, let the people say so. Senators ought not to say that the American people shall not consider these amendments unless Senators are first convinced that the amendments are in themselves advisable. I shall vote to submit the Vardaman proposition and the Ashurst proposition to the American people, who will voice their sentiment through the various States. Let the people speak.

Mr. WILLIAMS. Mr. President, I listened with a great deal of interest to the sentence or two just pronounced by the Senator from Texas [Mr. SHEPPARD]. The misfortune about that position is that the moment we vote to submit this amendment to the States we take the position that it is a question which ought to be acted upon by the Federal Government. We can not sever ourselves from that position. Those of us who believe that the States ought to decide for themselves the conditions of suffrage within the States, and that other States ought to have nothing to do with that question; those of us who have always occupied that position, and who hold the position dating back to our forefathers, back to beyond the point when the fifteenth amendment was adopted; those of us who have stood in the shoe tracks of our forefathers, who said that Federal officials should be elected by those electors within the States who were given by the States the right to elect the most numerous branch of the State legislature, could not vote to submit this to the States except by first agreeing that it is a proper matter of Federal legislation, and that a minority of States should be coerced by a three-fourths majority and stripped in coercion of their State right to prescribe the condition of suffrage within the State. That we do not admit.

In this connection, Mr. President, on November 11 last Mrs. Helen H. Gardener made a speech at New Orleans, La. She is one of the most distinguished advocates of woman suffrage in this entire country. That speech was adopted by the Southern States suffragists as a campaign document and was published by the Southern States Woman Suffrage Conference. I ask leave to insert it in the CONGRESSIONAL RECORD at this place.

The PRESIDING OFFICER. Is there objection? There being none, it is so ordered.

The matter referred to is as follows:

[Speech made in New Orleans, La., November 11. Adopted by all the Southern States suffragists as a "campaign document."]

WOMAN SUFFRAGE—WHICH WAY?

[Compliments of Helen H. Gardener.]

The time is past when there is any question as to whether or not we are to have woman suffrage. Already in 10 of our States it is an established fact and in 28 countries it is in operation and developing in scope with astonishing rapidity.

The question before us now is, Which way do we prefer to have it come—State by State, as it has so far come, or all at one time by constitutional amendment?

The South has had some rather trying experiences with the vote being conferred upon its citizens by the latter method.

With that experience in mind the question now is, Is the South willing to delay so long, to lag back so far, in this new movement in popular government, that it will again have the matter taken out of its own hands and be struck by another tremendous tidal wave of citizenship conferred from the outside, instead of being developed, won, and delivered from the inside?

Is it not far better that the men (as well as the women) of the South recognize that a real democracy is at hand? That a real (and the first) Republic is about to be born where government shall, in deed and in truth, rest upon the consent of the governed. Where there shall not be taxation without representation.

Where the "people" shall rule. Where one-half of the human race shall be recognized as "people" and not, as heretofore, a mere annex to the other half, political nonentities.

Is it not better that the southern men shall plan for and offer to share the citizenship which they prize beyond rubies for themselves with the women of their households?

The South is famed for its chivalry, yet the men of 10 of our Western States have passed them in this race for chivalry which is based upon justice. A chivalry which says to the women of their households: "We do not want to bind you by laws which we would fight to the death were they applied to us. We do not want to hold you in legal subjection. We are unwilling to hold a legal and political advantage over you. We feel humiliated by every law which humiliates you. You must and shall have every legal and political right which we claim as ours. Our liberty will be sweeter and dearer to us if it is shared with you. A country can not be free with its mothers a subject class before the law, with half of its people political paupers, utterly dependent upon the other half for justice. We are unwilling to hold office and legislate for the welfare of those who are not allowed to express themselves at the polls. We want our commissions as lawmakers to come from the homes as well as from the street and the office. We do not want the great words and principles of 'liberty' and 'democracy' to be too small to extend to both sexes. We are willing to share with women that for which we have fought and they have sustained us. They stood by our sides and helped to conquer the wilderness. They bore the hardships as well as the men to conquer those hardships. We refuse to take for ourselves alone the best and highest results of the struggle—liberty, equality, fraternity."

And with this outlook, with this splendid sense of chivalry that is based upon justice, the men of 10 Western States have already given to the women of those States absolute political and legal equality.

Is not that a far finer chivalry than is mere word flattery?

Is it not better that each State take this matter of its own electorate into its own hands, do it in its own way, with an eye ever upon local needs, conditions, dangers, and limitations that can be best met by local enactments?

Is it not far better that these needs and limitations and dangers be frankly and freely discussed by the men and women of each State, and that they work together to meet them with fairness and with their united wisdom? Are you willing that the western men outdo you, surpass the southern men in justice, courtesy, and respect for the women of their States? Do you put less trust in, have you southern men less confidence to repose in the mothers who bore you, the wives who bear your children, the daughters of whom you are so proud, than have the men of Illinois or California or Colorado? Are you willing that your women shall appeal in vain to you for citizenship, for the birthright of self-government, and that they shall receive it at the hands of men more just than you—through constitutional amendment? Do you not fear that the South will again be unprepared, and, therefore, swamped by its own electorate if this is the method of your receiving into your body politic the new voters? Is it not far better that you put your own house in order in your own way? Will not this gain and insure to you the gratitude, respect, and cooperation of the new citizens far more surely than the other way?

I can assure you, in this connection, that the western women are almost as proud of their men for having given them the franchise without a serious struggle by them to secure it, as they are of their new dignity of citizenship itself. They point with the greatest pride to the fact that the men of their States gave them what they so deeply prized for themselves and that these men never fail, in season or out of season, to express their confidence in the wisdom, the justice, and the success of recognizing the fact that women are people in a government where "the voice of the people" is the law of the land.

These men never fail, in season and out of season, to express their belief and knowledge that it has worked good, and only good, to their States.

And you must remember that it is no longer an experiment in some of them.

In Colorado, the most populous of them, where the women have been voters for so long (20 years) a time as to make it beyond question a good test, a State where there are large cities and vast wealth, a State which has many difficult problems to face, with its tremendous mining interests and problems that follow mining camps and frontier towns, as well as in the vice and liquor interests of these camps and the big, rich cities, it is the universal testimony of the public men of Colorado that the votes and the help of the women has been of inestimable value in bringing that State into the high condition of civilization to which it has attained. These men have found the advice, the insight, and the cooperation of the women of the State invaluable. It has resulted in a far higher grade of public officials being chosen, and in many other ways it has greatly benefited the State.

And it has done something even finer than this. It has made of those men and women real friends, real comrades. They respect each other. They trust each other in a better and finer sense. They realize that they are equally responsible for the defects of their government. The women are not resentful or petty in their judgments, holding the men to account for all the wrongs and mistakes and holding themselves as "judges after the fact," without responsibility and without redress, in short, without understanding of the needs, the difficulties, and the possible remedies.

They work together for the things they want. If they find they have made a mistake, they work together to correct it. This leaves no place for sex antagonism. It enlarges the outlook of the women. It makes them realize that the price of liberty is eternal vigilance, and that the governing of a city or a State is simply a larger housekeeping, a larger home making, for, after all, what is the State but your home? What is your city but your home?

The house you live in is only the smaller part of your home, just as the room you sleep in is another smaller part of that house—home—just as the kitchen or the dining room are your "home," but surely not all of your home.

No woman is doing all of her home making (her housekeeping) if she keeps only her own special room clean and attractive. She is not a good home maker if she thinks of and sees nothing but her kitchen. These parts of a home are not the home. Any one of them may be a model of its kind and the home be utterly chaotic—a bedlam, unhealthy and a menace to the lives and morals of the family.

It is equally true of the city and the State. The woman has the home maker's instinct. Men are natural nomads. They are born hunters, campers. What man ever makes a real home? He may pay for chairs and tables and cookstoves, but the quality which transforms these things into a home (whether of high or low estate) is the woman's natural part. She wants permanency. She wants cleanliness. She wants order. She wants beauty and harmony of surroundings. The State needs these and the other qualities which women bring to their work. Men do not see, or, seeing, do not care much for many of the things which make for the higher civilization, the cleaner, more ordered life. Garbage cans in the street, raw meat hung in the dust, milk cans washed in polluted water, these things are the housekeeper's problem. They appeal to women. Men are thinking of stocks, bonds, crops of cotton or grain—then the epidemic comes along, the typhoid gathers in a few loved ones, and some woman's club comes forward and finds out that the water supply of the town is polluted.

A clever writer said, in this connection, that women do not have to go out of the home (which was asserted to be her "sphere") in order to get into politics. Politics comes into the home and gets inside of the baby whenever some milkman with a pull and a dirty farm leaves milk at your front door.

But we must all understand that this "feminist movement" is not local. It is world-wide. It began with the education of girls and it can not and will not stop until every legal disability is removed—until woman stands as a human unit, even as her brother is a human unit.

Throughout history he has looked upon himself as the unit and upon her as the cipher that stood back of him.

From his point of view, of itself the cipher was valueless. In its relation to him only did it achieve value.

It multiplied him tenfold.

If he chose to remove himself, she became once more the cipher.

He remained the original unit.

If this condition was to remain, the first fatal blunder was made when women were allowed (not so long ago, either) to learn the alphabet.

That settled for all time her status of human personality, individuality, and in its finality her citizenship.

And, after all, it has taken a very brief time, as history goes, to lift the women of the world onto a plane of individual activity compared with the eons of time that it required to do the same thing for different classes of men.

Up to a few hundred years ago the masses of men were the pawns that barons and kings used to play with.

Men were the ciphers then, used by brute force and inherited rank to give fictitious value to themselves. The masses of men were no more considered by the masters of men in the questions of state than are the women now.

Those in power then, like some of them now, simply laughed at the mere idea of "the average man" having the same legal rights and political opportunities as were held by the privileged class of men.

They said it wasn't his place. He would be unfit for self-government. He would become "out of his sphere" and wreck the state.

Well, he changed the state, it is true, but he bettered it, and what was more important still, he bettered himself. He grew up to his new dignity and status of a human unit. Women must and will do the same.

And there never was in all history so well prepared a new electorate in the matter of education and intelligence as would be the women of America.

But we must remember that every struggle that man has made for his own emancipation from bondage to his hereditary rulers has, in the long run, worked as a leaven for woman's liberty also.

Men did not know it. They did not intend it. They were not able to think in a universal language. They thought in the language of sex and acted for one-half of the race only. The language of humanity was yet to be learned, even as the language of liberty for the male half of the human race was just becoming a spoken language.

But, after all, every blow that was struck for their own human status helped to weaken the bonds on the other half of the race which all the while stood beside the men of her household helping and encouraging him in his upward struggle.

She has earned your help now.

Her hour has struck. She is struggling for her rightful human status before the law, as a citizen, even as man struggled for his.

It would be ingratitude unspeakable for him to refuse to her the help and encouragement which she so faithfully gave to him. Never an argument used by man in the interest of his own liberty but applies with equal or added force to women. Never one!

Listen! Let me quote from three of your Democratic leaders of to-day. Then you shall say whether what they say is true, whether they meant what they said, whether they know the use of common language.

I shall quote from that distinguished Democrat, William Randolph Hearst, but lest you may not look upon him as the highest Democratic authority, I shall quote from your silver-tongued Secretary of State, William Jennings Bryan. But, going even higher than that, going to a Democrat who is a southern man, an expert in the use of language, and your chosen leader, President Wilson, I shall quote from him, and then we shall decide whether they meant what they said, whether they know the use of ordinary English, and whether they have yet learned the language of humanity, or whether they still speak the language of sex only and believe that women are not human units, not people, not persons, not citizens; whether they truly believe that men are "all of the people" and that women are a mere annex to the human race.

In a very remarkable article written recently by that distinguished Democrat, Mr. William Randolph Hearst, in speaking of the founders of this Nation, he said:

"On the one hand were the Democratic Republicans, who believe both in the letter and in the spirit of the Declaration of Independence, who were convinced that a new order of things was both advisable and advantageous; that the old-established systems of government by a superior class were failures; and that the government by all the people was not only the most just and righteous, but the most practical and the most successful form of government that could be devised."

Did he mean it? Government by all of the people, and that there should be no class? Did this distinguished Democrat mean just that? That that is the only righteous form of government? And, then, are women people?

Have words a par value or are they merely hereditary forms of speech?

In speaking before a great patriotic body of women recently in Washington our silver-tongued Secretary of State, the Hon. William Jennings Bryan, used these words:

"We established an independent nation in order that men might enjoy a new kind of happiness and a new kind of dignity. That kind which a man has when he respects every other man's and woman's individuality as he respects his own; where he is not willing to draw distinctions between classes; where he is not willing to shut the door of privilege in the face of anyone."

Now, women are certainly "anyone," whether they are people or citizens, or not. He demands the kind of dignity that respects every other man's and woman's individuality as he respects his own. Did he mean it?

Again, he said before this same distinguished body of patriotic women, of whom I was one:

"The problems are different but the principles are the same," and the principles are precisely the same. "Turn back to the Declaration of Independence and the Constitution and apply the principles found in them to our modern questions.

"This spirit must lead you to work for the preservation to each individual of his inalienable rights and to keep this a Government of the people, for the people, by the people. You must throw your influence on the side of the people in their struggle for liberty. Then, and then only, will you be true Daughters of the American Revolution."

Now, are women individuals? Are they people? Did the Secretary of State really mean those words at their par value. I hope that he did.

The arguments against woman suffrage are, in point of fact, always in the ultimate analysis simply arguments against self-government. They are in the ultimate analysis based on opposition to our form of government. They are the arguments which have been used by king to serf in all the ages past, with women now the disqualified unit instead of labor or poverty or any other "lower class."

If government is to rest upon suffrage at all—that is, upon the expressed will of anybody not a "king by divine right"—who is to decide that men are born with that divine right to vote, to express themselves in civic affairs, and that I am not?

When and how did they get the right and where and how did I lose it?

That always puzzles me. I can not remember when I lost it. How did one type of human units get the right to decide that another type of human units shall not have liberty of conscience and expression? I never could understand that. If it is a divine right, what particular streak of divinity has been discovered in man that women lack?

If it is not a natural, inherent, human right, then they say it is a "conferred privilege." Now, who conferred it? On what basis did they confer it, and where did they get it to confer?

Has the supply run out? Is not special privilege in government, in the final analysis, simply a wrong and an outrage against which people have been fighting since history began? Kings claim to be born with this divine right. The founders of our Government scouted the idea—for kings, but not for men. They announced to the world that we were born "free and equal," and that all just government is based upon the consent of the governed. They said—and both our President and Secretary of State said to us recently in this patriotic organization of women—that this is a government of the people, by the people, and for the people. I hope that they realized, even when they were saying it, that it was only a glittering form of speech. I hope that they realized that it is, in fact, a government of all of the people by a half of the people for a few of the people.

I hope that they realize that the Democratic Party now has the most wonderful opportunity that any party ever had since the beginning of time; an opportunity to make that great glittering generality a fact instead of a fiction.

Again, I want to point a moral here, and so I am going to quote from President Wilson:

"As for other men setting up as a Providence over myself, I seriously object. I will not live under trustees if I can help it. If any part of our people want to be wards; if they want to have guardians put over them; if they want to be taken care of; if they want to be children patronized by the Government; why I am sorry, because it will sap the manhood of America."

There never was a truer thing written than that. And it has already sapped the womanhood of America to such an extent that there are women willing to travel around the country telling other women that their place is at home; that they ought to stay inside of four walls, where guardians and trustees will keep them in perpetual tutelage, and take care of them like children, and they should not even want the ability to express themselves in their own government.

These traveling ladies, who insist that woman's place is the home, assert that this movement of ours is one of sex antagonism.

Was it "sex antagonism" that made President Wilson object to having guardians set over him? Let us use a little common sense and a little common honesty in dealing with these questions that are basically as old as time—the question of human rights; the question of equality before the law; the question of self-government. I should think men would be ashamed to accept opportunities, rights, and privileges which they are unwilling to share with their mothers and sisters and wives.

I am glad that the men of 10 of our States and of 28 countries have grown ashamed of it.

And there isn't even anything new about the cry of "stirring up sex antagonism." It is the same old argument used against Thomas Jefferson and against every other man who has stood for real democracy. It is the cry of power against people. It is the argument of those who have against those who have not the benefits which all must pay for. Absolutely the only change in it is that to-day they use the word "sex," while in our fathers' day they used "class antagonism" to cover the same old selfish abuse of privilege.

Again, in a recent speech, President Wilson emphasized in the strongest possible words—if words have any par value—the fact that it is not the size, nor the ability to fight, that is the sacred part of America's heritage, or the part which should give her distinction in the world, but that it is her claim to be governed by the consent of all of her people.

He even went so far as to say that he "would like to believe that nowhere could a government endure which is supported by anything but the consent of the governed."

That must be looked upon as pretty strong language by the war lord of Germany and a number of other rulers who do not trouble their heads about what "the people" consent to or do not consent to.

They treat the opinions and personal rights of the male people with almost as much contempt and disregard as America hands out to her women people.

But, lest you think I have misquoted the President, I want to read his own words. Then you may judge whether, if he knows the use of words as well as all believe he does, these were used at par value or only in a Pickwickian sense.

He was speaking of the great size of our country. Then he said:

"But the extent of the American conquest is not what gives America distinction in the annals of the world. It is the professed purpose of the conquest, which was to see to it that every foot of that land should be the home of free, self-governed people, who should have no government whatever which did not rest upon the consent of the governed. I would like to believe that all this hemisphere is devoted to the same sacred purpose, and that nowhere can any government endure which is stained by blood or supported by anything but the consent of the governed." (Woodrow Wilson's address, Swarthmore College, Pa., Oct. 25, 1913; Washington Post.)

In a book recently written by that distinguished and able statesman from Mississippi, Senator JOHN SHARP WILLIAMS, he has collected and commented upon the strongest and best writings and acts of the father of Democracy, Thomas Jefferson.

There is hardly a page of the volume which is not, in point of fact, an unanswerable argument for woman suffrage. And this holds good in regard to the words of both Thomas Jefferson and Senator WILLIAMS.

It is quite possible that neither of these men realized in the least that their words, if taken at par value, were quite as strong arguments for women and their liberty and self-government as they were for these same desirable things for men.

It is quite possible they were merely hereditary forms of speech when they used "mankind" to mean men only, or when they said "all of the people" or citizens, or "all those amenable to the laws" must have a voice in making the laws, and like forms of expression.

Possibly neither Thomas Jefferson nor Senator WILLIAMS so much as thought of one-half of all these "people" or "citizens" who must obey the laws when they propounded the "self-evident facts" about "inalienable rights," "rights derived from God" that could not be alienated even by their own consent, etc. How did all these terms get to be the property of one-half of mankind? Rights are not masculine only, and justice knows no sex.

Not long ago I heard a distinguished woman—one who has served the public as well as her family for many years—comment upon just this point. She said: "It is not a good thing to belong to a class of people who are absolutely forgotten, overlooked, when men are aspiring to advance the great principles of progress—when they are laboring to forward liberty. The humiliation of it is far deeper than was that of our forefathers, who were not looked upon as so negligible and unworthy an element as to be overlooked or ignored by King George, but as rebellious people to be coerced by him.

"It is a more humiliating thing to belong to a class that is so negligible as to have its 'rights' and needs forgotten than to belong to a class upon which imposition is attempted intentionally."

Now, is not that true?

It is the holding of women in perpetual tutelage, the eternal "playing of Providence" (as President Wilson puts it), the holding as wards, without limit of age or time, the patronizing against which the President so forcefully protests—when it is applied between man and man—it is this to which women who understand the fundamental principles of Democracy, the underlying thought of self-government—it is this against which women cry out in the selfsame words and for the selfsame reasons which actuated Thomas Jefferson, and which sustained our forefathers in their seemingly unequal fight against the "divine-right" idea as it was presented in their day.

Kings claimed to rule by divine right then—and mankind was voiceless, and must remain content with what was doled out from above.

Men are the "divine-right" rulers to-day, and half of mankind must, they say, remain content with what is doled out to them in the same way. The principle is no whit changed—only the stage and the actors. The result will be the same, also.

Now, assuming that all this is true, assuming that these and other distinguished Democrats (as well as Republicans and Progressives) said what they meant, assuming that they know the par value of words, assuming that they are sincere when they speak or write for the public (and I would not wish to be guilty of assuming anything else in their cases), I have come to you to ask in which way the South is going to meet this question—State by State, controlling the details itself, or by a national constitutional amendment?

On June 13 of this year the committee in charge of this matter in the United States Senate reported favorably the following joint resolution:

"ARTICLE —.

"SECTION 1. The rights of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

"SEC. 2. The Congress shall have power, by appropriate legislation, to enforce the provisions of this article."

The same bill was introduced in the House, but is not yet reported. On July 31 more than 20 Senators spoke in favor of its passage on the floor of the Senate, putting in at the same time large petitions from every State in the Union signed by thousands of both men and women in those States.

It was pointed out that already there are over 4,000,000 women in America who have the presidential vote, who vote for their Senators and Representatives. What right have these 4,000,000 to a higher and firmer citizenship than have the other women of the country? Why should a woman who lives in Colorado or California or Illinois be a citizen, and in South Carolina and Louisiana a voiceless, unconsidered cipher, politically?

Why should she be a unit in one State and a cipher in another? Why is she capable of self-government and the dignity of liberty of conscience in Chicago or Denver or San Francisco, and incapable of or without that dignity in Charleston or New Orleans? Why can western men trust the women of their States, and the southern men not do so? Why are the women of one part of the country helpful in government and useless or dangerous in another part?

And in this connection I want to refer to one thing that is constantly brought up in arguments on this subject. That is whether or not women will better conditions when they vote; whether they will or will not vote for this or that "reform."

I insist that you have no right to ask just what woman is going to do with her vote when she gets it.

That question is always based on two assumptions: First, that man has a right to dictate to her, to control her vote, and make her vote the way he wants to; and the other is that she most likely is going to vote either like a knave or a fool, that she will be prone to use her vote with bad results.

Nobody assumes that attitude when extending the franchise to the young men as they become of age. Nobody insists that boys of 21 shall show how wisely and for just what reform measures they are going to vote before they are given the ballot. The callow youth, whom probably his mother has educated and sent to school and sent out in the world, is not asked to mortgage his vote before he gets it to prove that he will use it to please somebody else. Now, why should women be asked or required to prove that they are not going to vote unwisely? Are they more corrupt or more foolish than their 21-year-old sons?

The question of what measures women will or will not vote for is quite aside from the issue, which is simply and solely the issue of self-government. Have women the right of self-government in a Republic? If not, why not?

There is just one other point which it might be well to consider from a southerner's outlook in case the fundamental principle of self-government and human justice does not appeal to you when these standards of democracy are being applied to women.

It is this: You are doubtless aware that there is a strong movement on foot which was to follow (it was a fellow of) the election of Senators by a direct vote of "the people," which, as you know, is an accomplished fact. This other and companion move is to make the representation of the States in Congress depend upon the number of voters and not upon the population.

When that carries (and it has great and strong backing), the South will need the vote of every patriotic woman as well as man unless she is willing to be swamped utterly and hopelessly.

It will be a trifle late to prepare for this situation after the move is effected.

"Now is the accepted time" if the South is to hold its own in chivalry and justice toward its women, or yield these to the men of the West.

"Now is the accepted time" if the South is to hold its own in national representation, or yield to the hoardes of foreign-born voters of the East.

"Now is the accepted time" to gain the gratitude and respect of the southern women of the future and their loyal cooperation, or to throw these away by allowing the National Government to give them the dignity of citizenship which you refuse to them.

Woman suffrage is coming in the South as elsewhere. It is almost here. The only question now is, Which way?

Mr. WILLIAMS. I do not approve of all that Mrs. Gardener says. I do not quite agree with her in every respect; but it is so abounding in real, good, hard common sense, and, upon the other hand, also in sound and lofty sentiment, that I am more than willing to see it go forth as a part of the CONGRESSIONAL RECORD for the information of Senators and of the people.

Now, in connection with the matter introduced by the Senator from Maryland [Mr. LEE], I have not read it. I have not heard it, but I know the general make-up of it in a way. I have always doubted the moral right of three-fourths of the States to coerce the other fourth into a new delegation of authority by the State to the Federal Government.

I am not taking this position as a lawyer now, and therefore I am dwelling upon the moral right, not the legal right. When we adopted the Constitution it was agreed that if 9 States adopted it it should go into operation as to those 9, not as to the others at all, and that those 9 should thereafter constitute the United States of America, not the 13. So I have always doubted the right of three-fourths of the States to hold and choke the other fourth and to give a renewed delegation of authority over the protest of one-fourth. When you consider that probably the one-fourth never would have joined the Union had they been faced with all the amendments which have been put down their throats, the strength of this position—not legally nor from a lawyer's standpoint at all, but from the ethical standpoint—is, in my opinion, all the greater.

I have already said what little I had to say upon the question of woman suffrage. I do not think it amounts to so awfully much of good or of bad as the extremes upon both sides imagine. I am perfectly willing to do whatever the good ladies of the State of Mississippi want me to do, and I am perfectly willing to leave it to them and to leave the men clear out of it; or I am perfectly willing to go into an election in Mississippi with the men voting, and if the ladies will convey to me their will I will vote as their delegate and vote to do what they wish done. But I do not see how anybody who has taken the old traditional southern view about the right of the State to prescribe the conditions of suffrage within its own limits can surrender that position in favor of permitting three-fourths of the States to prescribe for the other fourth what shall be the conditions of suffrage within their limits.

They were overridden historically, yes, it is very true. The fifteenth amendment was a horrible blunder and a horrible mistake. Hoping that the amendment proposed by my colleague [Mr. VARDAMAN] to the joint resolution may possibly effectuate the repeal of the fifteenth amendment, I shall vote for the amendment offered by him. I have my doubts as to whether it would or would not. I am rather inclined to think that, perhaps, it would be construed together with the fifteenth amendment as a part of the Constitution, and that the two being construed together, and the fifteenth amendment not being expressly repealed, his amendment would not repeal it at all;

but I am so anxious to see a repeal of the fifteenth amendment that I am willing to try that in the courts if it is adopted, and let the court pronounce what its effect will be.

As I said the other day, the fifteenth amendment was not a crime alone; it was more than a crime, as Talleyrand said; it was a blunder. In governmental affairs blunders are worse than crimes. That amendment created race feeling in this country that never existed prior to it. The negro men and women who had remained on the plantations during four years of war, taking care of their mistresses and the children, had earned the undying gratitude of the white race. The negroes, who were not so much interested in their own freedom as to want to do unjust things to the white women and children living at home while the men were out fighting, had no feeling of hatred of the white man until you gave it to them in the agitation for the adoption of the fifteenth amendment and in its after attempted enforcement. It was worse than a crime; it was a breeder of hatred and of all other crimes. It would have been infinitely better if the States had been left free to prescribe suffrage within their own limits as they came to see the necessity and the advisability of it. I shall therefore vote for the amendment offered by my colleague.

Mr. GALLINGER. Mr. President, I had thought of making some observations on the joint resolution proposing to amend the Constitution which is before the Senate for its consideration, but as there seems to be an opportunity to get an early vote thereon I shall refrain from doing so.

I had also thought I should speak at some length on the amendment which the junior Senator from Mississippi [Mr. VARDAMAN] has offered, which, as I understand it, proposes to repeal the fifteenth amendment to the Constitution of the United States. I have pronounced opinions on that subject. I believe that, even if a mistake were made half a century ago in giving the suffrage to the negro race, they ought to be permitted that privilege half a century after the close of the war.

To my mind, borrowing the language of the senior Senator from Mississippi [Mr. WILLIAMS], it is not only a blunder but a crime to deprive that race of the rights that are guaranteed to them by the Constitution of the United States. For that reason, Mr. President, I trust the amendment submitted by the junior Senator from Mississippi [Mr. VARDAMAN] will not be agreed to. I hope that the Senate of the United States has not yet been brought to the view that that amendment, which proposed to guarantee and protect a class of our people in their civil and political rights, should be wiped from the fundamental law of the land.

I will not allude, Mr. President, to the methods that have been adopted to deprive the colored men of the South of the right of suffrage, because I apprehend that might lead to a discussion that I have no disposition at this time to engage in. I read the other day of a statute in one of the States of the American Union whereby it was provided that a negro could not even vote the Democratic ticket unless he had voted it in the year 1876 and could bring 10 white men to swear that he had voted it consistently from that time to the present. That is most extraordinary legislation. It is not in consonance with the principles that have guided the American people in the matter of equal rights before the law; and I trust, however some men from that section of the country may feel about the fifteenth amendment, that neither House of Congress has yet been brought to the conviction that that amendment, designed simply to protect a large class of our people, eight or ten millions in number, in their civil and political rights, will be voted upon adversely to-day.

Whatever becomes, Mr. President, of the proposition to enfranchise women, which I support, let us not go back and wipe from the Constitution of the United States a provision that simply and solely guarantees to eight or ten million people in this country equal rights under the laws and the Constitution of our country. I do not believe it will be done, and I say this without desiring to enter into a controversy with any Senator as to the political views that exist in one section of the country or in the other as to the race question, which I know agitates the minds of a very large class of people in our country.

I have said, Mr. President, all I care to say. If I were not anxious that the business of the Senate should rapidly progress, so that we may close this session in reasonable time, I would do as some other Senators have done—occupy a portion of the time in discussing the question that is really before the Senate at present—but I shall refrain from doing so in the hope that we may get an early vote upon this joint resolution and decide it one way or the other.

Mr. MARTINE of New Jersey. Mr. President, I want it distinctly understood that my voice as well as my vote will be recorded in opposition to the proposition contained in the amendment proposed by the Senator from Arizona [Mr. ASHURST]. I am opposed to woman suffrage on principle. I need not say that I love and admire a good woman. There is no man in this body who can outdo and outvie me in efforts to uphold on every occasion the good women of this land; but as I listened a day or two ago to the distinguished Senator from Oklahoma [Mr. OWEN] and to the distinguished Senator from Kansas [Mr. THOMPSON] and heard their fulsome remarks I said then that if we believed what those Senators said every man in this body should immediately proceed to apologize for his existence here and for his sex. I was half inclined to ask, "Pray God, why, in His wisdom, did the Great Creator create man, anyway?"

The Senator from Oklahoma said that the women do more than half the work. God knows, they do more than their share. I can remember full well that my good mother used to say: "Man's work is from sun to sun, but woman's work is never done." How is this going to lighten woman's work? Will not this impose an additional burden on the women of the land?

The Senator said women made better cooks, fairer and juster jurors, and, of course, they are more beautiful. That goes without saying. The only thing that surprised me in the learned dissertation of the Senator from Oklahoma was that he did not express that which I know was in him, finding fault with the great God above us, that when He appointed the Twelve Apostles He did not make at least six of them women. [Laughter.] I know that was a sheer oversight upon the part of the Senator, but I believe he felt that way.

The Senator from California [Mr. WORKS] a day or two ago, in discussing this question, made the statement that he had heard no dissatisfaction with woman suffrage expressed in California, that it had worked harmoniously there, and was a blessing. One side of a story is good, Mr. President, until the other is told. I hold in my hand an address from a woman in California. Some of you will remember that I made reference to this matter before. I refer to Miss Annie Bock, who says woman suffrage has been an evil in California. You ask, How does she know? She said: "I was a suffragette of suffragettes; I was a ward worker and poll worker; I went out in the by-ways, dragged in hesitating voters, and got them to vote; but after two years of that thing in California I saw that I was accomplishing naught for my country and doing positive evil to our sex." To-day she says she is as much an opponent as formerly she was in favor of it; and she testifies here in a document published by the Senate on this question that in her experience woman suffrage has been a positive detriment and a positive evil. So I will say to the Senator from California that his statement is not utterly uncontradicted.

I find that the Senator from Colorado [Mr. SHAFROTH]—and I believe that the other distinguished Senator from Colorado [Mr. THOMAS] is to follow later—has told of the universal blessing that came to the sensible and sane women in Colorado as the result of the suffrage. He will agree with me that the Ladies' Home Journal, published in Philadelphia, finding a place almost in every household, is a paper of fair character and generally of impartial judgment. That journal sent a representative to Colorado, asking the question of women there as to their judgment as to the blessings of woman suffrage. Answers came in large numbers, and that journal has published many of them. Here is one from Colorado Springs, which states:

> I have lived many years in Colorado Springs and have voted only under protest. And I do not hesitate to say that I do not think woman suffrage is a success or has accomplished that which has been claimed for it. I am now opposed to it.
>
> HARRIET P. FARNWORTH.

I read from another as follows:

> Colorado has been my home for many years, and I have watched with interest the results of woman suffrage. I have considered it my duty at times, for certain reasons, to vote, but have always done so under protest.
>
> I can not see that suffrage has purified politics or placed better men in office or has been productive of any legislation beneficial to either women or children. I think women are too hysterical, too personal in feeling, and not well enough balanced to exercise the right of suffrage. And their attitude in all these discussions proves the truth of my opinions.
>
> I do not hesitate to state that I thoroughly disapprove of it, and have no wish ever to vote again.
>
> MARY MCKENZIE GAMBRILL.

There are a great many replies. I will read another:

> I think that the majority of women with families have little interest in suffrage; and if the right to vote were taken from them it would come as a release from a duty which they consider was thrust upon them.
>
> MRS. HARRY K. BROWN.

I will not read all of the replies contained in this paper, but will ask that they may be published in connection with my remarks.

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). It will be so ordered, without objection.

The paper referred to is as follows:

IS MRS. GODDARD ALONE IN HER POSITION THAT WOMAN SUFFRAGE IN COLORADO IS A FAILURE?

In The Ladies' Home Journal for January 1 there was published a statement by Mrs. Francis W. Goddard, one of the most prominent women in Colorado, declaring that, in her opinion, the experiment of woman suffrage in Colorado was a failure. This opinion caused universal astonishment, coming as it did from a woman in Mrs. Goddard's unquestioned social and civic position.

This declaration by Mrs. Goddard brought out the criticism that she was practically alone in this opinion among the prominent women of Colorado. In order to ascertain whether this was true the editors of The Ladies' Home Journal had a personal canvass made of some Colorado women of undisputed social and civic prominence, and their opinions are here given.

MRS. GODDARD'S STATEMENT THAT CAUSED SUCH UNIVERSAL SURPRISE.

I have voted since 1893. I have been a delegate to the city and State conventions, and a member of the Republican State committee from my county. I have been a deputy sheriff and a watcher at the polls. For 23 years I have been in the midst of the woman-suffrage movement in Colorado. For years I believed in woman suffrage and have worked day in and day out for it. I now see my mistake and would abolish it to-morrow if I could.

No law has been put on the statute book of Colorado for the benefit of women and children that has been put there by the women.

The child-labor law went through independently of the woman's vote. The hours of working women have not been shortened; the wages of school-teachers have not been raised; the type of men that got into office has not improved a bit.

As for the effect of the vote on women personally, I have known scores of women who worked for the Republican Party one year and worked for the Democratic Party the next year, telling me frankly that "the Democrats gave us more money."

Frankly, the experiment is a failure. It has done Colorado no good; it has done woman no good. The best thing for both would be if to-morrow the ballot for women could be abolished.

MRS. FRANCIS W. GODDARD,
*President of the Colonial Dames of Colorado.*

THE OPINIONS OF SOME OTHER PROMINENT COLORADO WOMEN.

COLORADO SPRINGS.

I have lived many years in Colorado Springs and have voted only under protest. And I do not hesitate to say that I do not think woman's suffrage is a success, or has accomplished that which has been claimed for it. I am now opposed to it.

HARRIET P. FARNSWORTH.

—

COLORADO SPRINGS.

Colorado has been my home for many years, and I have watched with interest the results of woman's suffrage. I have considered it my duty at times, for certain reasons, to vote; but have always done so under protest.

I can not see that suffrage has purified politics or placed better men in office or has been productive of any legislation beneficial to either women or children. I think women are too hysterical, too personal in feeling, and not well enough balanced to exercise the right of suffrage. And their attitude in all these discussions proves the truth of my opinions.

I do not hesitate to state that I thoroughly disapprove of it, and have no wish ever to vote again.

MARY MACKENZIE GAMBRILL.

—

COLORADO SPRINGS.

My views concerning woman suffrage, in a nutshell, are: Theoretically I believe in it. Practically, after watching it for many years in Colorado, I consider it a failure. I can see nothing that it has accomplished in its 16 years here that has not been done equally in other States where they have no woman suffrage. Our political "ring" remains as corrupt as ever, and the addition of women's votes in the downtown districts has been only to double its purchasable vote. Personally, having the vote, I believe in the obligation to use it—and do so conscientiously, but there are great numbers among the better classes of women who never go near the polls. I believe that there is a growing feeling that the whole thing has been a mistake, and that it would be a great relief to be relieved of the responsibility.

MRS. CHALONER B. SCHLEY.

—

DENVER.

In my opinion, women have no place in politics. Certainly they have not helped the political situation in Colorado.

MRS. HARRY ENGLISH.

—

DENVER.

In this country, where woman is man's equal, I can not see the need of the woman's vote. In England, where the law is for man alone, one can not blame the English woman for endeavoring to obtain equal rights.

MRS. CHARLES MACA. WILLCOX.

—

COLORADO SPRINGS.

I can see no actual benefit which has arisen directly from the woman's privilege of voting in this State.

HELEN L. BALLOU.

—

DENVER.

I feel that the woman's vote means very little to any of us out here.

MARY ALICE FIELD.
[Mrs. E. B. Field, sr.]

—

DENVER.

I think that the majority of women with families have little interest in suffrage, and if the right to vote were taken from them it would come as a release from a duty which they consider was thrust upon them.

MRS. HARRY K. BROWN.

DENVER.

I fail to observe that woman's suffrage has benefited Colorado in any way.

MRS. W. P. MCPHEE.

—

DENVER.

I am not at all interested in politics and do not believe in women voting, nor that their votes have in any way benefited Colorado.

GENEVIEVE CHANDLER PHIPPS.

—

DENVER.

As a native-born daughter of Colorado I always have and always will take a great interest in the politics of my State.

As a little girl the President's message was awaited with interest, for my father was an active participant in public affairs.

I have always believed that woman's influence for good in the political field is much greater if she is not compelled to actively participate in public affairs through the medium of the elective franchise.

I have lived in Colorado under the old régime before the days of woman's suffrage, and can therefore compare the conditions both before and after that event.

I can not see that the advent of women in politics has in any way improved conditions and has only had the effect of driving to the polls thousands of women who did not wish to vote, but who were forced to do so to offset, in a measure, the votes of the undesirable part of the female population who have the reputation of voting early and often.

My opinion is that just so long as the franchise is given without restrictions as to illiteracy or other qualifications absolute harm is done by extending it to the women.

In Colorado at least this has been the result, and I am sure that I voice the opinion of a large percentage of Colorado women when I make the statement that we should be glad to see the franchise withdrawn.

MRS. E. B. FIELD, JR.

—

COLORADO SPRINGS.

Colorado has been my home for many years, and I have watched with interest the effect of woman suffrage. I am, as always, opposed to it, and would not vote did I not feel it my duty to do so.

MRS. M. H. WILLIAMS.

—

DENVER.

Do I know of any great good to Colorado resulting from the votes of women? No; I do not.

MRS. HENRY J. HERSEY.

—

DENVER.

Woman suffrage, to my way of thinking, isn't doing politics any good in this State. Women vote because they have the right, but they haven't a keen interest or deep knowledge of affairs of state, and their voting doesn't mean anything in the way of an improvement in politics. I am not a believer in woman's suffrage.

MRS. LOUIE F. SPRATLEN.

—

DENVER.

Woman suffrage, so far as I can see, has produced no good effect. It has not improved politics in this State, and it only makes a number of votes that can be bought or given through friendship, because women, as a rule, do not understand politics.

MRS. W. H. DICKSON.

—

COLORADO SPRINGS.

I can not feel that the vote of the women has accomplished anything more than acting as a balance weight against erratic and radical (injurious) legislation, and perhaps that balance weight might be stronger in the influence of woman at home.

CAROLYNE H. MARBOURG.

—

DENVER.

The methods of many of the women in the last election showed that Colorado had not benefited itself any in having the woman's vote.

MRS. J. B. HUNTER.

—

DENVER.

As far as I am concerned, and from casual observation, I am not in favor of woman suffrage. It might be more beneficial in more densely populated States where child labor and equally harmful things are prevalent, but in Colorado we are not troubled that way, and it seems to me that the women have many other better things to do than to go in for politics.

MRS. LESTER B. BRIDAHAM.

Mr. THOMAS. Mr. President, I simply wish to say as to the matter which has just been read that the Ladies' Home Journal did make an investigation and publish a report, to which the Senator from New Jersey refers, but the report was prejudged and predetermined before the visit of the representative from that paper to my State. It is significant that the statement is chiefly supported from Colorado Springs, where the elite of the State live, where many excellent ladies are too fashionable to care for public life, who think it is vulgar, who greatly prefer to devote their time to pink teas and "dansants." I make no reflection upon these good women of that section, for they are, of course, entitled to their views.

Mr. MARTINE of New Jersey. Let me say, in answer to the Senator——

Mr. JAMES. Mr. President, if the Senator from New Jersey will yield to me, I should like to ask the Senator from Colorado if he would bar all the women who dance the tango from the right of suffrage? [Laughter.]

Mr. THOMAS. Not at all; but I do not propose, if I can help it, that they shall bar the women who do not dance the tango from the right of suffrage.

Mr. MARTINE of New Jersey. Mr. President, in answer to the Senator's criticism that these letters come only from the particular locality of Colorado Springs, and that that is the prolific source of such letters, I have to say that here is another letter from a different section——

Mr. THOMAS. Yes; there may be similar letters from other sections of the State, but Colorado Springs is the principal section from which they come.

Mr. MARTINE of New Jersey. I want to ask the Senator whether he believes, and will assert, that Harriet P. Farnsworth, of Colorado Springs, devotes her time alone to pink teas and the tango?

Mr. THOMAS. Not at all; she is a most excellent and worthy lady.

Mr. MARTINE of New Jersey. That is all very well; but what about the letters from Denver? Here is a letter from Mrs. Henry J. Hersey, in which she says:

Do I know of any great good to Colorado resulting from the votes of women? No; I do not.

Here is another one, signed by Mrs. W. H. Dickson, of Denver, in which she says:

Woman suffrage, so far as I can see, has produced no good effect. It has not improved politics in this State, and it only makes a number of votes that can be bought or given through friendship, because women, as a rule, do not understand politics.

I recollect, Mr. President, that on a previous occasion, when this subject was under discussion, I said a few words, giving that which I saw with my own eyes in Denver, Colo. Talk about woman suffrage purifying politics! No; it has failed to purify politics where it has been tried. Coming closer to home, here is another letter——

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Colorado?

Mr. MARTINE of New Jersey. Certainly.

Mr. THOMAS. The Senator will search in vain for any expression of mine upon this subject in which I have claimed that woman suffrage was going to prove a universal panacea. My position has been——

Mr. MARTINE of New Jersey. You can leave out the word "universal" and use simply the word "panacea," and it will be found that woman suffrage has not proved a panacea in reality.

Mr. THOMAS. I prefer to use my own expression. My position in reference to this matter always has been, and I think always will be, that the question is not whether any particular benefit will result from the establishment of woman suffrage, but whether one-half of the citizens of the United States are not, as a matter of right, independent of its effect upon political conditions, entitled to the franchise with the other half of the citizenship.

Mr. MARTINE of New Jersey. I will say, Mr. President, in answer to that, that I am not a lawyer, thank God, but a plain man, and I will stand by that which shall accrue and result to the well-being of the whole United States rather than by that which will satisfy the fine hairsplitting proclivities of the lawyer. [Laughter.]

Mr. THOMAS. Mr. President——

Mr. MARTINE of New Jersey. I will ask the Senator from Colorado to wait a moment.

Mr. THOMAS. Just a word. I have always noticed, Mr. President, that when certain gentlemen are unable to answer the questions or meet the position of an opponent they invariably thank God they do not belong to the legal profession. [Laughter.]

Mr. MARTINE of New Jersey. Thank God for it; and the world would be a millionfold better off if you had been relegated to the rear before you were made lawyers. I do not say that to the Senator as an individual, but it is one of the curses of our times that after statutes are made efforts are made to break them and defy them.

My friend finds fault that I have gone only to the sunny West. Now I will bring you nearer home. I have here a letter dated Madison, N. J., March 4, from my own little Commonwealth. It is from a very cultured gentleman, who in some way had learned that I had been opposed to woman suffrage, and he wrote me a pleasant letter from Madison, which is quite a prominent place in our little Commonwealth, in which he said:

I saw so much of electioneering by the women in our school election that it made me disgusted and lowered them very much in my estimation. To see many of the women of the four hundred—

And they have a thousand of them there; it is called the Bankers' Knob—

To see the women of the four hundred drag in illiterate women, unable to speak our tongue and not knowing what the question was, and push to the polls these women was very repellant to me. Every servant—

And the women in that neighborhood have from 12 to 15, I will say—

including colored cooks, besmeared with the soot of the range, were brought out to vote.

My correspondent further says that the methods there pursued by the women were sufficient—

To have put the rankest Tammany Hall methods to shame.

There is an instance of the purifying effect in politics of having women at the polls.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Jersey yield to the Senator from Colorado?

Mr. MARTINE of New Jersey. I will if the Senator does not want to exploit his profession.

Mr. THOMAS. Mr. President, I merely want to ask a courteous question, and I do not think there is any occasion for a statement of that kind. I will not further interrupt the Senator.

Mr. MARTINE of New Jersey. I will take it back. I think you are all saints and only lack wings. [Laughter.]

It makes me feel sad when I hear this plea of women demanding their rights. I know of no country, and there is none, that God's sun shines on where woman has more of her rights than she has in free, democratic America. Fair women, I say, in this land your friends are not the male advocates who are standing up here pressing for your votes; they are rather your enemies, detracting from the glorious teachings and the grand blessings which the God of humanity has vouchsafed and given you, which constitute a stronger power and a greater influence than any vote that may be placed in your hands.

"Oh, I want to vote." Two or three weeks ago I came to Washington on a Pennsylvania Railroad train from New York. I can not now recollect just what prompted the gathering here, but great numbers of women were on the train. There were three or four hundred of them, at least, I should say, many of them mere girls—young, sweet-faced, mild, modest young women—in the hands and guidance of some older women, with sashes banded across them, with words painted about 4 inches long "I want to vote"; "I want to vote"; and they stalked up and down the train making themselves ridiculous and conspicuous. I thought to myself, "Great God, young women and girls, what you need and what you want more than a vote is the guiding, controlling care of some motherly woman." I say that, Mr. President, advisedly.

This suffragette business takes different forms, it seems, according to the climate in which the women live. In England it takes to window smashing and house burning. Thank heaven, ours is a milder form here. Here, Mr. President, woman suffrage takes to hiking. I have never been able to find any association between hiking and women's votes; but they hike here, thank God, instead of burning houses. It may be that these fair women have instilled into their minds the idea that they are going to go in henceforth for athletics, and hence they hike from New York to Washington, D. C. [Laughter.]

Mr. President, I have no prejudice, God knows, and no hatred regarding women. I think my habits and my whole life will bear me out in the assertion that every measure tending to advance, enlighten, and make better the conditions of women I have always been counted sponsor for and in favor of. I oppose the joint resolution not because it is, and neither would I favor it simply because it is, strictly within the technical terms of the law, as suggested by distinguished lawyers, but I oppose it because I believe it will lead to a sad and sorry day for this fair land. I believe that better results to home, better results to country, better results to family, and better results to God will come from defeating this proposition.

Mr. VARDAMAN. Mr. President, it is not my desire to consume the time of the Senate for the purpose of postponing the vote on the pending joint resolution. The subject matter has been discussed at length—seeds have been sown in the mind of the American voter which I hope will bring forth ripe fruit. I think the senatorial mind has probably reached a conclusion—whether that conclusion shall be faithfully registered in the votes that will be cast it is not my province to say—but, Mr. President, after what has been said regarding the amendment which I proposed I feel impelled to trespass upon the patience of the Senate while I submit a few pertinent observations. I do not hug to my heart the hope that all who hear me will agree with me. I am sure that the flattery of approval will not be accorded my utterances by many Senators who sit on the other side of the Chamber; but, Mr. President, if I shall succeed in planting a truth, if I shall succeed in lodging in the minds of the Senators and the American people a fact regarding this paramount problem, I have no doubt that the seed here planted will

contribute ultimately in bringing forth the harvest, which will be the repeal of the fifteenth, the modification of the fourteenth amendment, and making this Government a government by white men, of white men, for all men, which will be but the realization of the dream of the founders of the Republic.

The purpose of the amendment proposed by me is to repeal, eliminate from the organic law of the United States, that legislative "Infamy of Crete" known as the fifteenth amendment, which, as I have said on a former occasion, was not adopted for the purpose of benefiting and uplifting the negro race, but was conceived in the hatred generated by war and brought forth in a spasm of venom and revenge to humiliate the white people of the South and "make rebellion odious." I thank God that the passions and prejudices generated by that unfortunate fratricidal conflict are sufficiently allayed, that the smoke that obscured our mental vision has wafted away, and that in the sunlight of truth we can see this constitutional or legislative enormity in all its nakedness and view it in its due proportions.

I have been impressed, Mr. President, with the fact that no Senator has risen in his place since I have occupied a seat in this Chamber and made any reference to the fifteenth amendment who did not say "that a mistake was made when it was adopted." Time has only added proof to the correctness of that statement; time has only served to convince us more profoundly that a mistake was made.

I listened with great interest to the brave, eloquent, learned address delivered in this Chamber a day or two ago by the gifted Senator from Idaho [Mr. BORAH]. It is the bravest public utterance that has been made upon the floor of the Senate for half a century by a man who resides in the section of the Republic from which he comes. He has reached heights of patriotic devotion to truth, which might be emulated with profit by his colleagues, and which I am sure will be an inspiration to every lover of truth and every faithful friend of the enduring Republic. The learned Senator from Idaho has said that a "great mistake was committed when the fifteenth amendment was adopted." If a mistake was made 50 years ago it is quite as great a mistake, I submit to him, for the present generation to permit that mistake to go uncorrected. No intellectually honest man will deny that statement. Time can not make falsehood the truth, nor can age impart to error the virtue of verity.

Nations like individuals endure by truth alone, and when you deny the wisdom or the capacity of the people of a nation to correct its mistakes you sound the death knell of that nation. I submit that the time to correct all mistakes is now—to-day. We can learn a useful lesson from the ancients through an extract from the Sanskrit showing the importance of the "Now." The only time that belongs to us is the present. If you would know the necessity of acting to-day, listen to the voice of the sage, which echoes through the distant annals of the ages gone:

> Look to this day, for it is life—the very life of life. In its brief course lie all the verities and realities of your existence—the bliss of growth, the joy of action, the splendor of beauty; for yesterday is but a dream, to-morrow only a vision, but to-day well lived makes every yesterday a dream of happiness and every to-morrow a vision of hope.

We have a duty to perform as the Representatives of the American people, and the voice of duty calls loudly for immediate action. There is danger, there is disintegration, there is death in delay.

Mr. President, this is no new question. It has been an issue before the American people since the first boatload of negroes was landed on the coast of America more than 300 years ago. It was a burning, pregnant, pertinent issue a century ago when the Sage of Monticello said:

> Nothing is more certainly written in the book of fate than that these people (the negroes) are to be free. Nor is it less certain that the two races equally free can live in the same government. Nature, habit, opinion have drawn indelible lines of distinction between them. It is still in our power to direct the process of emancipation and deportation and in slow degrees as that the evil will wear off insensibly and their places be filled pari passu by free white laborers. If, on the contrary, it is left to force itself on, human nature will shudder at the prospect held up.

He urged the colonists to emancipate their slaves and send them back to Africa. "You can solve this problem now without the sacrifice of a human life," he said. You can solve it now with the outlay of a very small amount of money. White people will come, take their places as laborers, and the current of affairs will move on without a ripple. But what was the penalty which he predicted we should pay if we failed to follow his advice? He said slavery "would ultimately go out in blood."

Listen. The most remarkable prediction recorded out of Holy Writ was made when he said, "If left to force itself on, human nature will shudder at the prospect held up." What was he talking about? What was he looking at? As distinctly as I am looking into the faces of the Senators upon this floor this afternoon, from the mountain peak of his incomparable genius, with the soul of a seer and the eye of a prophet, he dipped into the future far as human eye could see, and he saw the vision of the world and all the difficulties that would be. He saw the war between the States that cost more than a million of the flower of American manhood; that cost more than $6,000,000,000. He saw the two sections rent in twain, brother against brother, father against son, frenzied with hate, grappling at each other's throat like wild beasts. He saw thousands of homes rendered desolate on either side of the line, adumbrated with the shadow of a deep and desperate sorrow. He saw the widow in her weeds, the orphaned children, the blighted lives, the frustrated ambitions. He saw more than that: He saw the hell of reconstruction, through which the white people of the South were forced to walk with bowed heads after the war. He saw more and worse than all that I have depicted. He saw the hundreds and thousands of homes that have been rendered desolate by the invasion of the black brute and the laying of his poisonous, blighting hands upon the fairest flower in the white man's home. He saw the difficulties which confront us here to-day. He knew that education would not qualify the negro to perform properly the highest function of citizenship in a white man's country. He knew that Christianization would not take from him the superstition with which his race has been cursed for 10,000 years. He knew that when the shackles of slavery were stricken from the black man's wrists and he was released from the uplifting influence and potential control of the white man that the call of the wilds would carry him back to the barbarism of his native jungles.

But—

Said Jefferson—

> wait until it forces itself on, and human nature will shudder at the prospect held up.

Human nature, Mr. President, shudders as it contemplates the horrors of the past, and I shudder to-day at the manifest indifference as to the gravity of the situation by Senators upon this floor.

Why was not the problem solved a hundred years ago and the million men saved, and the vast outlay of money and the fearful cost in tears and heartaches experienced by the women and children? The answer is easy. St. Paul answered the question when he said:

> The love of money is the root of all evil.

The northern white man was bringing the negro to America and selling him to the southern white man and making money. The southern white man was buying him and raising cotton and negroes with him, and making money. So the settlement of the question was postponed until we paid the penalty for our stupidity and inaction in blood and treasure, which causes human nature still to shudder at the "prospect held up."

Fifty years later another great man came along. He was not so learned as Jefferson in books; he had not the experience in statecraft. But he possessed the divine power which enabled him "to hear the ocean in one shell and see the whole world's winter in one leaf." It was he to whom Markham referred when he said:

> When the face of God grew dim,
> Held through the dark and trusted him;
> Soul of an heroic birth,
> Soul sent to poise a shaken earth,
> And then called back to God again
> To make heaven possible for men.

Who was it? None other than the patient, patriotic, loving, forgiving Abraham Lincoln. Lincoln said, you will remember, in his remarkable debate with Mr. Douglas:

> I am not nor ever have been in favor of bringing about in any way the social and political equality of the white and black races. I am not nor ever have been in favor of making voters or jurors of negroes, nor of qualifying them to hold office, nor to intermarry with the white people. And I will say in addition to this that there is a physical difference between the white and the black races which I believe will forever forbid the two races living together on terms of social and political equality; and inasmuch as they can not so live while they do remain together there must be a position of superior and inferior, and I as much as any other man am in favor of having the superior position assigned to the white race.

If what Mr. Lincoln said was true then, it is true now, and no thoughtful person will question the accuracy of his statement. Mr. President, that has been the history, the observation of men in all the ages of the world. There is not a Senator upon this floor, there is not a thoughtful, well-informed American in this Republic who has given any consideration to this question who does not know, as the Senator from Idaho [Mr. BORAH] said on yesterday, and the Senator from North Dakota [Mr. MCCUMBER] said a day or two ago, that where the white man and the negro man are present in anything like equal numbers the white man is going to rule. We of the South endeavored to maintain a government by sharing sovereignty with the negro after the war. But he is peculiar. He would not

permit it. If you give the negro an inch, he will take an ell, and he will take the country there with him. Under his savage rule we saw the public domain squandered; we saw the Public Treasury looted; we saw the civilization reared by our fathers, glorified by their genius, and consecrated with their blood vanishing from the earth. What was left for us to do? Nothing, except to invoke the law of self-preservation, which we did; and by means, as I have said on former occasions in this Chamber, not as I would have them, but sufficient, the white man rose in the might of his superiority and drove the scalawag and the negro from power. We have held the mastery from that day to this by expedients which are violative of the spirit of the fifteenth amendment. We understand that as well as you do; and we also understand, as you do, that we are going to continue to hold the fort, whatever methods may be necessary to enable us to do it. Everybody knows that, and every right-thinking white man approves it.

In dealing with so grave and important a problem, why should there be any dissimulation? Why any side-stepping? Is it possible that any patriotic Representative in the Congress of the United States would permit his vote on this question to be controlled by his personal, political, or pecuniary interests? Why not meet the issue openly? It would prove infinitely better for the negro. If the South were turned over to the domination of the negroes to-day, the white men would be forced to leave. Those fertile fields, those vine-clad hills, and fragrant groves, the birthplace of American liberty, would be likened to the condition that prevails in Haiti, once the gem of the southern seas, but now scarred and marred by the blight of negro incompetency, where no semblance of civil government exists except in the seaports, which are dominated by whites and mulattoes. We all know that. Then, I submit, why not approach the matter in that calm, determined, enlightened, altruistic spirit which the gravity of the situation demands? I would not consider it in the spirit of race hatred. Oh, no; I do not hate the negro. I do not hate anybody, Mr. President. I have long since concluded that the man who hates hurts himself. Hatred beclouds the judgment, paralyzes the reasoning faculties, and pollutes the springs of love.

> Prince, pity our faults wherein we die;
> Our greed and cruelty both condone.
> Only the gods can mount the sky;
> Fame is the flower of love alone.

It is love that is going to solve this problem. Love is the universal solvent. I would that the Senate and the American people might take hold of it in the spirit of fair play, in the spirit which recognizes the racial peculiarities of the negro and the racial superiority of the white man. Peace can not prevail, harmony is impossible, and progress out of the question if the people of the South are forced to resort to all manner of legislative expedients in order to make the South habitable for themselves.

The Supreme Court of the United States, in passing upon the constitutionality of Mississippi's constitution of 1890, said that we swept the horizon of expediency to find a way around the fifteenth amendment, but we did it. I always thought that the Supreme Court upheld Mississippi's constitution and the other southern constitutions that imitated Mississippi's because the Supreme Court realized that such provisions were necessary in order to make life tolerable for the white race and preserve the civilization of the white people of the South. It was one of those pieces of judicial legislation which the American people approved and the world condones. Now, if these constitutional barriers were removed and we, the dominant race of the South, were permitted to enact laws to suit the moral qualities and intellectual acquirements of the negroes—in other words, write laws adaptable to the government of the negro—it would be infinitely better for all persons concerned. A law that suits the white man, "the heir of all the ages of the foremost files of time," is not adaptable to the government of the civilization-veneered savage, who has shown congenital incompetency in all the ages of the world to govern himself.

Mr. President, if the white man in dealing with the negro is compelled to resort to force, fraud, or other doubtful expedients, a conflict is inevitable, and you know when that happens the deadly attrition is going to be on the side of the weaker race. You know the negro is not going to stand up against the superior qualities of Anglo-Saxon manhood. Then why not, I implore you as patriotic American citizens, charged with the performance of a great trust, uninfluenced by any other consideration than to preserve our civilization, promote the interests of both races, and maintain our form of government in all of its pristine vigor that it may be transmitted, unimpaired in its usefulness, to posterity, by removing these barriers. If that shall be done, the white man of the South, where the negro question is a problem, the white man of the West, where the yellow man is a problem, the white man in every other section of the country, may take the matter in hand, and, guided by the motives and promptings of the heart and the direction of head, which has enabled him to rear the greatest Government and create the highest civilization the world has ever known, work out and solve for the good of the most the great problem which confronts the civilization of this century.

May the great God of the universe open your eyes and touch your hearts to the full realization of the gravity of the situation.

[Mr. JAMES addressed the Senate. See Appendix.]

Mr. JONES. Mr. President, I am not going to take the time of the Senate to discuss the merits of this resolution. I did that last summer, and the opinions I expressed then are still my opinions, more strongly confirmed by the discussion I have heard here.

All I desire to do now is to insert in the RECORD an article which I think is a very good and conclusive answer to the suggestions made by the Senator from Kentucky [Mr. JAMES], and also to the high principle upon which my friend from New Jersey [Mr. MARTINE] opposes this resolution. The article was written by a very estimable lady from my State, Mrs. Susan Whitcomb Hassell, and it seems from her statements here that she formerly took the position that the Senator from New Jersey takes.

I am not going to ask to have this article read. I am going to read simply one paragraph:

> There is an army of women and a larger army of men whose ideal of womanhood is that sweet, modest, old-fashioned type who found tasks enough for hand and heart in her own home circle; was full of domestic virtues and charms, and shrank instinctively from public activities. * * * There is neither glory nor shame in holding this sentimental and esthetic ideal. To that class of idealists the writer belonged until a few years ago, and to that class, chiefly, this letter is addressed.

I trust my friend from New Jersey will read the article, and also my friend from Kentucky; and I ask that it may be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

[From the Washington Times for Wednesday, March 18, 1914.]

THE NEW FREEDOM FOR WOMEN.

[By Mrs. Susan Whitcomb Hassell.]

"Deliver me from strong-minded women. I can not imagine my mother voting and I would not like my wife to do it."

The speaker did not look like an old fogey nor like a brute. He had good manners, wore an honor key, spoke with the New England accent, might easily have been a lifelong Bostonian.

There is an army of women and a larger army of men whose ideal of womanhood is that sweet, modest, old-fashioned type who found tasks enough for hand and heart in her own home circle; was full of domestic virtues and charms and shrank instinctively from public activities. Often as in the case of the Boston bachelor—yes, he confessed that he had no wife—the ideal is "my mother."

There is neither glory nor shame in holding this sentimental and æsthetic ideal. To that class of idealists the writer belonged until a few years ago, and to that class chiefly this letter is addressed. The only shame is in shutting one's eyes to new light, the only glory in being open-minded.

Light streams down upon this subject from stars of every magnitude. Which ray may pierce any particular intelligence is a question of how strong the eyes are. Few have the eagle eye to face the sun. For those who find the sweeping visions and keen analysis of Ellen Key too dazzling here are some ordinary daylight truths.

NEW FREEDOM FOR WIVES.

The home maker has been freed from many demands which used to crowd her time and exhaust her strength. If the modern housewife does her own work, it probably does not include bread making or laundry, certainly not soap making and carpet weaving. Dressmaking and sewing are reduced to alterations and a little mending. A hundred necessities which were made at home 50 years ago are delivered at the door ready for use. Apartment houses simplify life still more. The average housekeeper who has servants finds her home duties few, unless she has multiplied them by adopting an elaborate and artificial style of living.

The family circle has grown smaller. A dozen children is news for the press. If a mother undertakes to teach her own child to read, sew, or cook, she may find that public-school kindergartens and specialists know better methods than she has ever learned. So strongly the current is set toward community ways of doing things, both industrial and educational, that the housewife has many hours to devote to interests outside the home.

VIEW GROWS BROADER.

The daughters of fairly well-to-do people are sent to college or vocational schools. They find open doors into the professions and into business life. If the economic urge is great, the girls, and in many cases the mother, too, has joined the wage earners.

The woman who found all she could do at home is becoming historic. The capable woman of to-day may be found there on the second and fourth Thursdays. At other times it is wiser to telephone, if you want to know.

The wise mother plans to be there when the only child comes in from school, but one whose interests are confined within her own walls is probably wasting time and nerve doing useless and foolish things, or she is starving for something really worth while.

The view of human oneness grows broader and clearer, and results in some compelling appeals to a woman's sympathies and energies. How

the big truth of the oneness of human interest is flashing over the common mind. The air I breathe is no better than my neighbor's back yard, for the wind blows over the fence. Your child may be no purer than the boy who lives at the lower end of the street.

MUST MIX WITH WORLD.

I know of a woman who said: "I can not enter into the social life of this crude little western community. It would not hurt me, but my children might be influenced by its low standards. I must keep them separate." Her children have grown up. Her son derives a good part of his income from rental of property in the so-called "restricted district." The daughter is married to a man who, her parents have said, "shall never cross their threshold." Their mother could not keep them separate.

The housewife may be ever so careful about her kitchen and refrigerator. It amounts to nothing if her food supplies come from a market where they are exposed to dust, flies, and dirty hands. Because we are all bound up together in common weal or woe, we give attention to public drinking cups, to the length of hotel sheets, to public rest rooms and libraries, to free baths and school nurses.

This socializing spirit has modified our ideas of religion, so that our highest duty seems no longer to a God whom we have not seen, but to the neighbor who needs us.

Our greatest fear is not of our own future punishment, but of causing some little one to offend.

GROWTH OF MOTHER LOVE.

What wonder that women have been quick to catch the new and wider view of life. The mother love, the care for home, developed through the generations, easily spreads its wings to shelter all children and to make all homes clean and beautiful.

Talking together and working together are necessary steps in obtaining social betterment. Out of this newly awakened spirit have sprung all manner of organizations for conference and education, to plan and to do things. Count the hospital boards and sunshine societies, parent-teacher clubs and consumers' leagues, child-welfare societies, Boy Scouts and Campfire Girls, Christian associations, civic leagues, playgrounds associations, big sisters and social settlements, not to name the great clubs and unions composed of women only.

In all these the major part of the work is done by women who are not too busy in their homes to do these things for the homes of others. Such work appeals to head as well as to heart. It may be more picturesque to visit a fever-stricken home with a basket of jelly, but it is more effective to visit the city fathers and see that the municipal water supply is protected from pollution. It is easier to distribute cast-off clothing to the poor, but better worth while to work toward fairer labor conditions and living wages.

OPPORTUNITY TO HELP.

The social evil, the drink evil, the protection of working women, child labor, marriage laws—all these are home problems, and one who chooses to spend long hours at a whist party or in a club for culture rather than in opportunities for such human service is not quite awake to her privileges.

Those who are giving their spare hours to some effective organized work are no less sane than the old-time woman who sat down to quilting frames or to fashion garments tucked and hemmed by hand.

Opinions and choices regarding our common life are not crystallized into results until they are made law. By the will of the people, expressed at the ballot box, society is governed. Men and women counsel and plan together. They form opinions. The most conservative of people will not assert that it is unwomanly to hold an opinion, though they believe it is unwomanly to register that opinion on election day.

BIG QUESTIONS FOR WOMEN.

Here are women who have studied the big question, bigger, maybe, than trusts and regional banks and the tariff; questions concerning the underfed child, the tempted girl, the delinquent boy, the unsupported mother, the health of the home, the child who has no home. Some of them want to express their judgment in the most forceful and effective way.

And what of women in the industrial world? Even Chesterton, who deplores the feminist movement, thinks this worth quoting: "If women have trades, they must have trades-unions. If they work in factories, they must vote on factory laws. If unmarried, they will be commercial; if commercial, they must be political." So the old order changeth.

Women have entered the industrial field, all public activities, and already 3,000,000 of them have become political units. Just what is it that has changed?

NEW ROAD TO TRAVEL.

It is not the woman. She still has the home-loving spirit, though the home has changed. Her heart is quick to respond to human need, though needs have changed. Her head is as level as was her grandmother's, and she may have a truer estimate of values and a better sense of proportion. She loves beauty, truth, and fair play.

There seems no good reason why men and women should wear out their tiny brooms in opposing the advancing tide of the so-called feminist movement. There is a better attitude toward the inevitable; there is always a best thing to do under the circumstances.

The Garden of Eden may look more peaceful and lovely than the road which leads across the valley and up the steppes before us, but we are not facing the Valley of Eden. Better say, with the great German philosopher, "There is no path that we need long to return to; there is only the eternally new which is formed out of enlarged elements of the past; and our genuine longing must always be constructive, for a new and better creation."

Mr. SHAFROTH. Mr. President, the position which the Senator from Kentucky [Mr. JAMES] has taken is no doubt based upon reason, if you regard the question of franchise simply as a question of privilege; but if you regard it as a matter of right, and that we have no rightful power to deny it to woman, it becomes an entirely different proposition.

The question submitted in this resolution is whether the people of the United States, under the constituted forms as prescribed in the Constitution, shall have the right to pass upon this matter, whether one State wants it or does not want it. That being the case, it depends upon the fundamental question whether this is a question of right.

It has been said that all powers of government are either delegated or assumed, and that all powers not delegated are assumed, and that all assumed powers are usurpations. If that is true, then every woman in this land who has never given her consent to have man alone control in government is being controlled by a usurped power. That being the case, is it possible that we have not some way by which this question can be determined? Is it possible that when the provision in the Constitution expressly says that a constitutional amendment can be submitted by a vote of two-thirds of the Members of the House and of the Senate, and ratified by three-fourths of the States, we can not submit a matter of this kind? If so, it seems to me we might as well wipe out of the Constitution that provision.

As this is a question of right, woman never having delegated her powers of self-government, she being controlled now without her consent, it seems to me that it is nothing but fair that the people of the United States, under the constituted forms prescribed in the Constitution, should pass upon this question.

Mr. BRISTOW. Mr. President, it had not been my purpose to discuss this question any further; but I feel that I should say, before the vote is taken, that my friend the Senator from Kentucky [Mr. JAMES], who has lately spoken, will find, if he will study the political situation in the States where women exercise the right of suffrage, that instead of that privilege degrading woman it has resulted in elevating the politics of those States.

The character of women is stronger in political matters than the vicious habits of men. Wherever their influence is felt, whether it be in the home, in the market place, or in politics, it is an influence for good. Why, I have heard the fact lamented that women are now able to earn their own living by engaging in occupations which were closed to them a half century ago. The time was, and it is within the memory of Senators who sit in this Chamber, when the problem of the man who had a family of grown daughters was to marry them off so as to get them properly provided for. Now they are independent and do not have to be married off in order to get cared for as though they were semichattels. They can go into the marts of trade and earn their own living. Civilization is advancing, and it will advance in this country until the power of women will be felt in the electon as well as elsewhere in our affairs. You may postpone the day when woman suffrage will prevail, but it is coming, and those who are opposed to it might as well get ready for it.

Why, we praise the influence of women in the home. If their influence in the home is good, it is just as good in the election booths as it is in the home, and it will be just as beneficial to the human race.

I am going to vote for this amendment because I believe that in so doing I shall render a service to my country, and that instead of imposing a hardship upon the States which would be compelled to permit their women to vote by the adoption of this amendment I shall aid in conferring upon them a benefit and a blessing.

As to the amendment that is now pending to the resolution, that offered by the Senator from Mississippi [Mr. VARDAMAN], I wish to say that if it was a mistake 50 years ago to give the franchise to the negro, as is alleged, to take away that privilege would be a political crime. After thousands of the race have exercised the privileges and borne the responsibilities of citizenship with credit to themselves and to their country, it would be worse than a crime to now deprive them of it.

Therefore I shall vote against the amendment offered by the Senator from Mississippi but in favor of the resolution giving women the franchise.

Mr. THORNTON. Mr. President, I find myself in an embarrassing situation with regard to the pending amendment presented by the Senator from Mississippi [Mr. VARDAMAN]. I have said outside of this Chamber and within it no later than last Monday in as strong language as I could command that I denied the moral right of the other States of this Union to deprive my State of the constitutional right in regard to suffrage which she now enjoys. I understand that the Senator from Mississippi also agrees with that general principle; but he is of the opinion that if the amendment offered by him is adopted and Senate joint resolution No. 1 is passed as amended, the States would be gaining more than they have lost, in this: That they would be getting back some of the constitutional rights that they lost through the adoption of the fifteenth amendment; and that is why he justifies himself in offering and supporting this amendment, as I understand.

I am not at all sure that the adoption of his amendment would have the effect of repealing the fifteenth amendment. I do not say positively that I believe it would not have that effect, but I do say that I have a serious doubt in my mind as to whether it would have that effect.

Mr. VARDAMAN. Mr. President, will the Senator yield for a suggestion?

Mr. THORNTON. I am sorry to be asked to do so, but I will.

Mr. VARDAMAN. I was just going to suggest to the Senator, if there is an element of doubt in his mind about it, the necessity for repealing the fifteenth amendment being so great, would he be unfaithful to his constituents if he resolved the doubt in favor of the amendment?

Mr. THORNTON. I did not fully understand what the Senator said, except something about being unfaithful to my constituents.

Mr. VARDAMAN. No; I beg the pardon of the Senator. I did not say that. The thought of the Senator being unfaithful to his constituents never entered my mind, because I know he is so far above such a thing. I said this: Admitting that there is a doubt in the Senator's mind as to whether the amendment I propose would repeal the fifteenth amendment if adopted, the necessity for the repeal being so very great to the Senator's people, would not his duty to his constituents justify him in resolving the doubt in favor of it?

Mr. THORNTON. Mr. President, I intended to state my position on that subject before I concluded, and the Senator from Mississippi would have heard it if he had not interrupted.

I presume the Senator believes what everybody in Louisiana at least knows, that in the future, as in the past, I would go just as far to maintain white supremacy in my State as the Senator would possibly go to maintain it in his State. I wish to say to him that whenever he gets ready to offer a straight resolution here repealing the fifteenth amendment he will find me ready to vote for it as one of the means of assisting in the maintenance of white supremacy in my State. As I have said, however, I am not sure this amendment would have that effect, and I would not feel justified in going back on my record and my convictions in this matter unless I could be sure that his amendment would pass. I do not believe it is going to do it, and if it is not going to pass I would accomplish nothing by stultifying myself, as it were, by voting for it; and my vote on that question will be governed by what I see is going to be the result of the vote on the amendment.

Mr. VARDAMAN. I ask for the yeas and nays on the amendment.

Mr. TOWNSEND. Mr. President, I assume from some things that have been said here to-day that the amendment of the junior Senator from Mississippi [Mr. VARDAMAN] may be taken seriously. If it is not to be so taken, of course there is no use of saying anything about it. But I would not like to know that I had kept my seat in silence and thereby assented to the doctrines announced by the junior Senator from Mississippi, and especially not if his amendment shall prevail.

I am in favor of the constitutional amendment which the Senator from Colorado [Mr. THOMAS] has in charge, and I have not been influenced in my position either by petitions for or against it, nor by letters which I have received, nor by any suffrage or antisuffrage lobby; but because I have a firm conviction that the right of suffrage in this country ought not to be denied on account of sex, race, color, or previous condition of servitude. I believe that woman is as well qualified to vote as is man. I feel that under a Republic she is entitled to every political right enjoyed by the male sex. I hold the opinion that we are doing woman an injustice by denying her the right of suffrage, but we are also doing ourselves and our country a wrong.

I am going to vote to submit this constitutional amendment to the States. I am going to vote against the amendment offered by the Senator from Mississippi. If it shall so happen that it carries, I shall then vote against the joint resolution itself thus amended, because in attempting to do what I claim to be justice to one class of our people I will not consent to do injustice to another class. While offering the ballot to some people now denied it, I will not through a constitutional amendment disfranchise others.

I have never raised my voice since I have been in Congress against the South, nor have I ever uttered a word to create sectional prejudice or passion. I have recognized that the South has had a problem which it was for them largely to solve. I have watched the solution and have felt that it was not being well solved in many Southern States. In others an honest, patriotic attempt has been made and progress has resulted. I have seen much to criticize, but never since I have been a Member of Congress have I ever known this southern racial question to be raised except by a southerner, and always without provocation. The bitterness born in the Civil War should be relegated to the past. The fifteenth amendment was proposed and it was adopted. I do not believe that any mistake was made in adopting it. That serious mistakes have been made in enforcing it since, there can be no doubt. That amendment has not resulted in political disadvantage to the South. The South has counted the negroes for representation in the Congress of the United States, and in some States has denied them the right to vote for Representatives. The Federal Government has not enforced that amendment as in my judgment it ought to have been enforced. Mr. President, I am very much opposed——

Mr. WEST. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Georgia?

Mr. TOWNSEND. I dislike to yield just now.

Mr. WEST. I should like to ask one question. Was it not the case, when the negroes had no right to vote, before the war, that they were allowed three-fifths representation in the National Congress?

Mr. TOWNSEND. I am talking about facts as they exist now, and to that point I wish to confine myself.

Mr. President, the institution of slavery has been wiped out, and everybody rejoices that that is so. The black man has made great progress in this country. No other race in history has made greater progress during the same length of time, but not so great progress as he ought to have made, not so great progress as he would have made if he had had all the help to which he was entitled and to which the country was committed if it was to perform its duty to him. But, I repeat, I do not care to discuss at length that question at this time, for I can not believe that a majority will favor this amendment. Let the clear proposition to repeal the fifteenth amendment come before the Senate, if any man has the temerity to bring it here, and I will have much to say against it. I should not have said one word if it had not been for the speech of the junior Senator from Mississippi, and his amendment was not to be voted upon, and if my silence otherwise might have been construed as an assent to the doctrines which he has enunciated.

Mr. President, I am opposed to the pending amendment, and in favor of the joint resolution which the Senator from Colorado has in charge.

Mr. POINDEXTER. Mr. President, a day or two since, in a colloquy with the Senator from Idaho [Mr. BORAH] and the Senator from Mississippi [Mr. VARDAMAN], I was very much surprised to hear the statement made by both those learned Senators in discussing the policy of the Federal Government interfering with the freedom of the States to regulate domestic institutions, when it was asserted that Abraham Lincoln had never advocated the giving of the power and the exercise of the power to and by the Federal Government to abolish slavery. It came up in connection with the most able and eloquent speech of the Senator from Idaho, in which he raised the general question of the relation of the States to the Federal Government in such a matter as that which is contained in the joint resolution now pending before the Senate.

Only by analogy, of course, the question of slavery and the question of suffrage are connected, although I myself think that it is a close analogy, because the denial of the right to participate in the Government to a portion of our adult population is the enforcement upon them of political slavery. There is a very close analogy between that condition and personal slavery which was the great question before the country during the career of Abraham Lincoln. I am not going to detain the Senate to discuss that question, but to make myself right in the statement which I made then and to combat the statement which was made that nothing could be found in the writings of Abraham Lincoln or his declarations to show that he advocated the extinction of slavery. As a southern man I know the attitude of the South upon that question, and it is one upon which North and South 50 years after the war can agree—although we regret the means by which this was accomplished—that it is still a blessing to this Nation that slavery was abolished.

When Lincoln was renominated in 1864 one plank in the platform of the Union national convention, held in the city of Baltimore June 7 and 8, 1864, which nominated him, was as follows:

*Resolved*, That as slavery was the cause and now constitutes the strength of this rebellion, and as it must be, always and everywhere, hostile to the principles of republican government, justice and the national safety demand its utter and complete extirpation from the soil of the Republic; and that while we uphold and maintain the acts and proclamations by which the Government, in its own defense, has aimed a deathblow at this gigantic evil, we are in favor, furthermore, of such an amendment to the Constitution, to be made by the people in conformity with its provisions, as shall terminate and forever prohibit the existence of slavery within the limits or the jurisdiction of the United States.

Mr. VARDAMAN. Mr. President, what is the date?

Mr. POINDEXTER. That was the convention which was held June 7 and 8, 1864.

Mr. VARDAMAN. At what time was the emancipation proclamation issued?

Mr. POINDEXTER. January 1, 1863.

Mr. VARDAMAN. I think the Senator will remember that the Senator from Idaho, as well as myself, said that he had not announced that until the emancipation proclamation was issued. Of course, that proclamation was a declaration in favor of interfering with slavery, but that that was one of the cruel necessities of the war when Mr. Lincoln said, "The time has arrived"—I do not know that I quote him literally—"when we must know whether the black man is for us or against us." Up to that time the tide of battle had somewhat gone against the North, and it was his belief that the emancipation of the negro would cause insurrection and uprising in the South, and the men at the front would be forced to go back and protect their homes. But Mr. Lincoln never had that thought, I submit to the Senator from Washington, in his mind until he determined to issue his emancipation proclamation as a war measure. That is what I said. I knew he became a very ardent advocate, and expressed himself as willing to do almost anything within the law to bring it about.

Mr. POINDEXTER. Mr. President, the emancipation proclamation was issued in 1863. It is true it was a war measure. So far as that particular measure and its effects were concerned, that had been disposed of long before the proceedings which I am now discussing in connection with the acceptance of the nomination by Lincoln in 1864. In those days apparently the obligations of the platform upon which a candidate for the Presidency sought the votes of the people were regarded as of more weight than they are in these latter days. So Lincoln carefully considered this platform before accepting the nomination and said what I shall read in reply to the committee on notification on June 9, 1864. Addressing the committee, he said:

> I will neither conceal my gratification nor restrain the expression of my gratitude that the Union people, through their convention, in their continued effort to save and advance the Nation, have deemed me not unworthy to remain in my present position. I know no reason to doubt that I shall accept the nomination tendered; and yet perhaps I should not declare definitely before reading and considering what is called the platform. I will say now, however, I approve the declaration in favor of so amending the Constitution as to prohibit slavery throughout the Nation.

Mr. BORAH. Mr. President, the Senator from Washington and I do not disagree as to the first proposition he states, and that is to the fact that woman ought to be permitted to vote. We only disagree as to the manner in which she shall acquire that right both as a practical proposition and as a wise method of procedure. But if the Senator from Washington understood me correctly upon day before yesterday, we do not disagree as to the other proposition. I insisted that Mr. Lincoln always contended, and that he specifically set forth with great lucidity in his debates with Douglas, that the National Government had no right and no power, neither was it wise or expedient, to interfere with slavery in the States; that it was a domestic institution which should be controlled and corrected and disposed of or sustained by the States.

I am not going into a discussion of that; but if the Senator from Washington will refresh his recollection by referring to the debates with Mr. Douglas, he will find that Mr. Lincoln stated that belief. He also stated it in his first inaugural address, as suggested by the Senator from Massachusetts [Mr. LODGE].

But, Mr. President, the emancipation proclamation itself settled the whole proposition. It says:

> Whereas on the 22d day of September, A. D. 1862, a proclamation was issued by the President of the United States, containing, among other things, the following, to wit:
>
> That on the 1st day of January, A. D. 1863, all persons held as slaves within any State or designated part of a State the people whereof shall then be in rebellion against the United States shall be then, thenceforward, and forever free; and the executive government of the United States, including the military and naval authority thereof, will recognize and maintain the freedom of such persons and will do no act or acts to repress such persons, or any of them, in any efforts they may make for their actual freedom.
>
> That the Executive will on the 1st day of January aforesaid, by proclamation, designate the States and parts of States, if any, in which the people thereof, respectively, shall then be in rebellion against the United States; and the fact that any State or the people thereof shall on that day be in good faith represented in the Congress of the United States by Members chosen thereto at elections wherein a majority of the qualified voters of such States shall have participated shall, in the absence of strong countervailing testimony, be deemed conclusive evidence that such State and the people thereof are not then in rebellion against the United States.
>
> Now, therefore, I, Abraham Lincoln, President of the United States, by virtue of the power in me vested as Commander in Chief of the Army and Navy of the United States in time of actual armed rebellion against the authority and Government of the United States, and as a fit and necessary war measure for suppressing said rebellion, do, on this 1st day of January, A. D. 1863, and in accordance with my purpose so to do, publicly proclaimed for the full period of 100 days from the day first above mentioned, order and designate as the States and parts of States wherein the people thereof, respectively, are this day in rebellion against the United States, the following, to wit.

In other words, Mr. President, as I said the other day, it was purely a war measure, a necessity from a war standpoint, carried into effect with the war power and for the purpose of suppressing the rebellion. Everything which followed arose by reason of the necessity of carrying into effect that which had originated as a necessity of war.

Mr. POINDEXTER. Mr. President, I desire only to say one word. His action in accepting the nomination in 1864 and advocating an amendment of the Constitution so as to prohibit slavery was not a war measure; and I call attention to the fact that the analogy which the Senator seeks to draw between the emancipation proclamation and the resolution which is now pending here to amend the Constitution of the United States is not an apt one at all. The emancipation proclamation, it is true, as the Senator from Idaho [Mr. BORAH] states, was a war measure, under the war power, and not under any civil authority provided in the Constitution of the United States.

I admit, of course, that Lincoln accepted the Constitution of United States as securing the institution of slavery in the States. It is true that his great career was founded upon his leadership in opposing the institution of slavery in the territory out of which new States would be formed, confining it within those States where it already existed. That position was taken under the terms of the Constitution as it then stood. It did not involve the proposition whether the Constitution should be changed, and that is the question which is now pending before the Senate.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Idaho?

Mr. POINDEXTER. I yield.

Mr. BORAH. The Senator suggests that the analogy which I seek to draw between the act of the President under the proclamation and the present situation is not a close one. I agree that it is not, but I did not bring the analogy into the debate. The Senator from Washington interrupted the Senator from Idaho during the discussion the other day with the suggestion that Mr. Lincoln did not agree with this view for the reason that he interfered with slavery in the States. I responded that he did that as a war measure, and that was the initiatory step of Mr. Lincoln upon that proposition.

Mr. POINDEXTER. I do not desire to prolong the debate, Mr. President, and will only say that I did not introduce the subject of the emancipation proclamation into the colloquy. I did refer to Mr. Lincoln's position with reference to slavery, not to his emancipation proclamation but to his attitude as to the policy of the Federal Government, not as a war measure or in time of war interfering with the institution of slavery; and I have cited what I have cited to substantiate that statement.

Mr. PITTMAN. Mr. President, just a few words to explain my vote. I do not intend to make a speech on this subject. I know the great desire to reach a vote on this matter at the present time.

I want to state, that there may be no misunderstanding by the Members of the Senate as to what my position is on the question of equal suffrage, that during two campaigns I spoke on behalf of equal suffrage from every platform in my State. I have worked before the legislature of our State on two different occasions in its behalf, and our legislature has twice, by an overwhelming vote, passed a resolution in favor of giving the women of our State the right to vote. In the coming election the question will be finally submitted to the people of our State, and I intend on that occasion to fight just as hard for the final adoption of the constitutional amendment as I have ever fought in the past. I believe that it is essential for good government in our State. Therefore I am going to fight for it. I do not know whether it is essential for good government in the States of the South. I am not prepared to answer that question, but I am willing to trust that question to those who have been elected to this body by the people of the South.

I know that there are questions affecting my State that I would ask those from the South to trust to me as I am trusting this question to them. We are facing just as serious problems as to what our relations shall be toward the Japanese and Chinese as the people of the South are with regard to the negroes.

I know that it is within the power of Congress and the States to amend the Constitution of the United States and enforce upon the Southern States equal suffrage and add to the negro vote that of the negro women. I know that the same power exists in Congress and the States to grant full citizenship to the Japanese and the Chinese in our Western States. I know the power exists in Congress and the States to so amend the

Constitution as to deprive us of the protection that we have to-day against undesirable foreign elements in the western part of the country. I have in mind the effort to compel our children to be associated at schools with undesirable Japanese—I am thinking of the demand of Japan that the State be prohibited from excluding Japanese from the ownership of property.

We are faced with just as serious a problem as the people of the South. I do not want to place myself in the position, as a representative of my State, that when we are face to face with such evils I can not come to the Representatives and Senators from the South and say to them, "We trusted this question to you, and we ask you to trust these questions to us."

I believe that this method of obtaining a vote for woman will not in the long run inure to her benefit any more than it will inure to the benefit of the men of this country. I think that they are injuring the cause of equal suffrage by any fight that may be intolerant to any section of this country. It is only through fairness, through tolerance, and through due consideration that they can win the sympathy and the support of the men of this country, and in this fight they must depend upon the men and the men alone.

I realize that a stand of this kind by Senators who for years have fought for equal suffrage will be misinterpreted, and by many it will be purposely misconstrued. The time will come when those who stand for this amendment will find out that if they do carry it they will have made a grave mistake by establishing such a precedent, particularly as far as the interests of the West are concerned.

As the men of our State will give our women the right to vote at the next election, and as we must have the support of the Southern States in our fight against the perils that threaten us, I can not vote for the amendment.

Mr. CLAPP. Mr. President, upon the discussion of the amendment of the Senator from Mississippi [Mr. VARDAMAN] a good deal has been said in regard to the treatment of the colored people. A good deal has been said in regard to the want of progress they have made.

I would not by my silence be taken as acquiescing in the statements made by the Senator from Mississippi. Believing as I do that his amendment will be overwhelmingly defeated at this time, I do not think this is the time to discuss that question, but I simply desire to say that if in this body while I am here that becomes a material question I shall take occasion to give it a full and thorough discussion.

Mr. BRANDEGEE. Mr. President, the proposed constitutional amendment is a proposition practically to double the suffrage of the country. It is sought to attach to it a proviso restricting the suffrage as it already exists. I am opposed to the amendment proposed by the Senator from Mississippi and shall vote against it, and I am also opposed to the proposed constitutional amendment. The constitution of Connecticut provides that—

> Every male citizen of the United States who shall have attained the age of 21 years, who shall have resided in this State for a term of one year next preceding and in the town in which he may offer himself to be admitted to the privileges of an elector at least six months next preceding the time he may so offer himself, and shall sustain a good moral character and shall be able to read in the English language any article of the Constitution or any section of the statutes of this State, shall, on his taking such oath as may be prescribed by law, be an elector.

The proposition involved in this amendment, to wit, that "the right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex," is a proposition to strike from the constitution of the State of Connecticut the word "male."

Mr. President, the people of the State of Connecticut are quite competent, in my opinion, to determine the qualifications of electors in that State. They have always done it. If there is a majority of the women of Connecticut who want the privilege of voting, I am quite certain that they can easily impress that fact upon the general assembly of my State. If a majority of the women of Connecticut want to vote and will let the Legislature of Connecticut see that that is the case, the legislature will prescribe a method of determining the fact. They could pass a statute and have an expression of opinion among the women of the State. If only a minority of the women of Connecticut want to vote, I see no reason why the suffrage should be thrust upon an unwilling and protesting majority, and I see less reason why the United States Government should attempt to prescribe the qualifications of electors and amend the constitutions of the various States of the Union against their protest.

Mr. President, I think altogether too many propositions which the States could handle themselves if they will exercise the rights which are contended for, are sought by their enthusiastic followers to be embedded in the Constitution of the United States.

I am going to read an article which was printed in the New York Sun of February 17, which raises a very important question, which I think no person, and especially no lawyer who can see the difficulties involved in the situation, will care to express an unalterable opinion upon at first blush, but it raises a subject for consideration which I consider of the utmost importance now and in the future in this country. It is entitled "Can one State's reserved rights be taken away by the vote of other States?" and is as follows:

*To the editor of the Sun:*

SIR: The frequency with which the suggestion is made that the Constitution of the United States shall be amended to authorize the Federal Government to exercise powers that may be exercised by the States, but which at least some of them do not choose to exercise, suggests the question whether there lies in the States collectively a right to limit the reserved rights of any of the parties to the compact whose concrete expression is the American Union; whether there are no such exercises of authority as a dispassionate judge would pronounce ultra vires.

It is a fundamental principle of association that charters confer equitable authority to bind with respect only to such matters as are contemplated in their formation; and this restriction is not based on an expressed self-limitation in the documents themselves, but on obvious principles of justice. Yet, while this statement will be generally accepted without question, that charter by which the American Colonies bound themselves originally is, in practice at least, assumed to be an exception to the operation of the principle. Whether it is or not it might be presumptuous to say, but at any rate the question is a debatable one whether the thirteen original States entered into the compact with the understanding that their subscription to the Constitution implied that their sovereignty in their reserved rights was thereafter not to be absolute, but contingent on the will of a stated majority to the compact. Due consideration of the circumstances under which the compact was made, as well as of the agreement itself, can, I think, admit of but one conclusion—that they did not. And if this conclusion be valid it follows that though there is in the Constitution of the United States itself no express limitation of the power to amend there is in the case of that agreement a natural and necessary limitation in that respect, as well as of the right of legislation by the Federal Government, if any distinction between State and Nation is to be recognized.

Recognizing this distinction, however, one need not be a Marshall to perceive that amendments such as those depriving the States of control over their electorates or compelling them to adopt a prohibition measure are an abuse of the amending power and a violation of the spirit if not of the letter of the Constitution. If the State of Maine, for instance, deems it expedient to prohibit the manufacture and sale of intoxicants within its territory, or the State of Colorado deems it expedient to confer the franchise upon women, they have not been debarred from the exercise of those rights by those States which, like New York, have preferred to adopt a different policy. If three-fourths of the States of the Union wish to adopt the policy of prohibition or universal suffrage, they have the unquestioned right to do so within their respective jurisdictions. But if, not satisfied with that, they have the additional right of compelling the minority of "sovereign" States, however much they may be opposed to such a course, however great a hardship it might impose on them, to adopt it also, it is obviously absurd to regard this as a Union of independent Commonwealths that for the purposes of that Union agreed to surrender certain sovereign rights, retaining the rest; there is in principle but one sovereign authority, the Federal authority, of which the States are but administrative subdivisions, because by the process of unlimited amendment all reserved rights may be absorbed in time by the Central Government.

The subject is so profound that one can do no more than advert to it in the compass of a newspaper communication; but if it does not receive greater consideration from layman and legislator alike than it has hitherto commanded, resulting in a more intelligent comprehension by the average man of the character and purpose of the Union, this Government will tend to become what Samuel J. Tilden feared: "Not only the most oppressive but also the most corrupt with which any people has been cursed."

F. J. DUNDON.

NEW YORK, *February 16.*

Mr. President, there is already pending another proposal, as referred to in this article, to prohibit the manufacture, sale, and transportation of intoxicating liquors, to put that prohibition into the Constitution of the United States. Without expressing any opinion whatever about the wisdom of the manufacture or the sale of intoxicating liquors, it seems to me that the Constitution of the United States ought not to be made the vehicle to define the qualifications of electors, to define what shall be the sumptuary laws in the country, to put all sorts of prohibitions and restrictions touching the people in their home life and in their local municipalities and Commonwealths.

I have another objection to this proposed constitutional amendment. Whatever might be said practically of the fairness of submitting an amendment like this, prohibiting the States from confining the suffrage to males, if it were submitted to the whole people—no matter what might be said of its fairness if that method were adopted—of course this is going to be submitted to the legislatures of the various States; and if three-fourths of the legislatures of the States approve it, then it becomes operative. Mr. President, I do not think that in this kind of a question the verdict that would be given by the States that voted on this proposition would be what would be called a fair test of opinion, or would probably reflect the real opinion of the members who voted upon it. It would precipitate all over this country a contest in every assembly district of those

who were rival candidates for the legislature in their own States, and in every close assembly district, whether it was made up of a whole town or of a ward of a city, if one candidate pledged himself to this change, if it were a close district, it would take a mighty strong candidate who was opposing him not to do the same thing; in other words, I think that a great many of the legislatures would be tied hand and foot upon this proposition by the candidates having pledged themselves to the measure out of fear or out of a desire to gain some votes or to neutralize the votes that their opponents would otherwise gain. I do not think that would be a fair expression of opinion, Mr. President.

So upon every ground of home rule and of the right of a State, so far as possible, if it does not infringe upon the rights of its neighbors, to conduct its own affairs according to its own judgment and according to the demands of its own conditions and in view of its own environment, I think this matter should properly be left to the States, where it always has been; and I think, so far as the majority of the women in each State show that they want the suffrage, the men of each State can be relied upon to give it to them without any interference by the central Government here at Washington.

Mr. OLIVER. Mr. President, at the last session of the Legislature of Pennsylvania a resolution was adopted providing for the submission to the people of Pennsylvania of a constitutional amendment extending the right of suffrage to women. If that resolution is again adopted at the coming session of the legislature, as I think it undoubtedly will be, this question will be submitted to the people of our State for decision at the general election in 1915. If the people of Pennsylvania at that time decide that women thenceforward shall vote, all well and good; if they decide that women shall not vote, then I deny the moral right of any 36 States or any 47 States of the Union to force that action upon the people of Pennsylvania. For that reason, Mr. President, and not because I am opposed to woman suffrage, I expect to vote against the pending joint resolution providing for an amendment to the Constitution of the United States.

Mr. GALLINGER. Mr. President, at the last session of the New Hampshire Legislature the same proposition was before it as the Senator from Pennsylvania [Mr. OLIVER] has suggested was before the Pennsylvania Legislature. It was acted upon adversely in my State; but had it been acted upon favorably, it would have submitted the question of the right of women to vote to the men of the State, which I think is not a fair test.

A few moments ago, Mr. President, in expressing opposition to the amendment submitted by the Senator from Mississippi [Mr. VARDAMAN], I failed to say that I have given the joint resolution providing for a constitutional amendment which is before the Senate very serious consideration, and have come to the conclusion that it is my duty to vote for it.

Whatever the opinion of the people of my State may be, it is a conviction with me that woman is denied the right to vote simply because men have the power to deny it—for that and for no other reason in the world. Hence, Mr. President, when the question comes upon the joint resolution as reported from the committee I shall cast my vote in favor of it.

As to the amendment submitted by the Senator from Mississippi [Mr. VARDAMAN], I regret exceedingly that it has been presented to the Senate as an amendment to the joint resolution. I do not think this is the time or the place for the serious discussion of that question. It may be that at some future time the fifteenth amendment will be blotted from the Constitution of the United States. I hope that time will never arrive; but, whether it does or not, it is clear to my mind that the Senator from Mississippi has made a tactical mistake in attempting to attach the proposition to do so to a joint resolution that has been so long and so ably discussed and upon which we are about to vote.

I remember very well in the year 1872, when Gen. Grant was nominated by the Republican Party as their candidate for President of the United States—the man who declared, and his words rang from one end of the country to the other, "Let us have peace"—I remember the enthusiasm with which this resolution was adopted by the Republican Party:

3. Complete liberty and exact equality in the enjoyment of all civil, political, and public rights should be established and effectually maintained throughout the Union by efficient and appropriate State and Federal legislation. Neither the law nor its administration should admit any discrimination in respect of citizens by reason of race, creed, color, or previous condition of servitude.

And, Mr. President, I remember at a later date, almost 25 years after the fifteenth amendment was engrafted upon the Constitution of the United States, that the great Democratic Party in convention in Chicago nominated Grover Cleveland for the Presidency and Thomas A. Hendricks as their candidate for the Vice Presidency, and adopted this resolution as a part of the Democratic platform:

Asserting the equality of all men before the law, we hold that it is the duty of the Government in its dealings with the people to mete out equal and exact justice to all citizens, of whatever nativity, race, color, or persuasion, religious or political.

It may be, Mr. President, that a mistake was made in ratifying the fifteenth amendment, but it seems to me that almost 25 years after that time, when the Democratic Party in convention declared in their platform what I have just read, there was not that intense feeling against it that some Senators say has existed from the time it was ratified until the present moment.

The Southern States to-day have 40 Members of the National House of Representatives and 40 votes in the electoral college, based upon representation that is not permitted the right of suffrage guaranteed to them by the Constitution of the United States. It seems to me that under those circumstances the South ought to be content, and that no serious complaint should be made by Senators from that section of the country. It is the North that has a right to complain.

I simply wish to repeat, Mr. President, that I trust the amendment offered by the Senator from Mississippi will be defeated, as I believe it will be defeated; and I wish further to say that it will give me great pleasure to vote in favor of the joint resolution which is now before the Senate for consideration.

Mr. NEWLANDS. Mr. President, I believe that democracy is the highest form of government devised by man; that it can be successfully conducted only by a people of the highest civilization and intelligence; and that when conducted by a people of inferior civilization and intelligence, whilst it may have the form of democracy, its essential spirit will be that of autocracy or despotism. I believe that the highest standards of citizenship as the controlling influence in government should be maintained, and believing, as I do, that this country is subject to greater menace from the race question than any other, I believe in making this a white man's government, and I would gladly restrict suffrage in this country to people of the white race, without invidious reference to other races differing in color. I believe that issue will yet be predominant in this country.

We already have 14,000,000 of blacks in our midst. Taught, as they will be, the laws of sanitation and of health, their death rate will diminish steadily, and a constantly increasing proportion of blacks will be drawn into the electorate of the country. We have that condition on our own soil, a condition unknown in any other prominent country dominated by the white race.

We are also threatened from without. Confronting us on the Pacific lie countries with 50,000,000 of the brown race, three or four hundred million of the yellow race, and three or four hundred million of Hindustanese, all of them looking to this country as the land of opportunity and eager to come and settle. I believe we should determine this question soon by writing the word "white" in our Constitution as to the right of suffrage and restricting the immigration to this country, except for purposes of commerce, education, or travel, to people of the white race. I believe if we do that we can then apply ourselves to the problem of the highest and best development industrially, economically, intellectually, and morally of the black race, and that we will not be drawn from that important work by efforts to keep them down in order to prevent them from becoming a part of the governing electorate of the country. Such a course means the highest humanity to the black race itself, upon whom no greater cruelty could have been imposed than suddenly, at the close of the war, to turn them from slaves into sovereigns, dominating for a time the white people of the South and controlling the Government there, until a mighty movement, sustained by laws which have scant warrant in the Constitution, in my judgment, but which are sustained by public sentiment, wrested the control of government from the blacks. It will hardly be possible to prevent them in the future, if present conditions continue, from holding the power, or at all events the balance of power, in that region; and that power will always constitute a deadly menace to democratic institutions.

So far as sex is concerned, I see no reason why the males of the white race should deny the females of the white race the right to vote. No reasoning can satisfy my mind that it is right to exclude the white women from the electorate of this country. I stand, therefore, for the extension of suffrage to white women. I stand for the denial of the right of suffrage in this country to the people of any other race than the white race.

How can I make my vote effective, and how can I make it harmonious with these views? The Senator from Oregon [Mr.

CHAMBERLAIN] has proposed a constitutional amendment not confining the right of suffrage in this country to the white race, but extending the right of suffrage to women. I am for the extension of the right of suffrage to women. But the Senator from Mississippi [Mr. VARDAMAN] has offered an amendment to this proposal under which the whole question of the right of suffrage will be left to the legislatures of the respective States. I should like to vote for that amendment if it would result in the exclusion of the blacks from the right of suffrage, as it will undoubtedly partially do; but I fear that if that amendment is adopted it will mean that many Senators who are for woman suffrage will vote against the proposal as amended, and I think the women of the country are entitled to a fair expression of the sentiment of this body as to whether they are entitled to the right of suffrage. For that reason I regret that the Senator from Mississippi has chosen this opportunity to present to the Senate a different issue that will cloud the determination of the principal issue. I trust the Senator from Mississippi will withdraw that amendment, in order that the question it involves may come up at some more auspicious time when that will be the sole issue before this body—the issue of white supremacy in this country.

I do not know how many amendments will be offered, but I shall endeavor to maintain my vote throughout in harmony with these views and to maintain it in such a way as to keep before the Senate the dominant issue as to the right of women to vote.

Mr. WILLIAMS. Mr. President, I wish to give notice of an amendment that I propose to offer following the vote upon the pending amendment. The amendment is to insert the word "white" between the preposition "of" and the word "citizens," in the first line of section 1 of the proposed amendment, so that it shall read:

> The right of white citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

That will bring up squarely the question which the Senator from Nevada [Mr. NEWLANDS] desires to have brought up. It will present to him and to others this proposition, if they desire to consider it. Without saying anything more about it now except to express my appreciation of the fact that the Senator from Nevada has just made a speech abounding in rich common sense, I wish to express my sympathy with the idea that, sooner or later, we will declare this to be a white man's Government. In that event it will be the better for all of us, including even those people who are not white and who live amongst us. Whether they are Chinese, Japanese, or Negroes makes no difference to me. Of course the Chinaman is an infinitely superior man to the Negro, and the Japanese is not our inferior in any degree at all. He is just simply different; that is about all. But he is not white.

The Pacific slope is trying to excite the country a great deal about the Japanese. The little Jap has proven his equality upon the battle field. He has proven it in the forum of civilization. He has proven it at American and English and German universities. He has proven it everywhere. Yet I do not want the Pacific slope ever to be threatened with Japanese domination nor with Japanese balance of power as between white factions there; not because the Japanese is, in my opinion, my inferior—I do not think he is—but because his ideals and his traditions and his notions are different; and I want this Government to be a white man's government, carried on in accordance with the white man's traditions and the white man's ideals.

Differing from a great many people, I have never been ashamed that I was a white man. I am rather inclined to the opinion that the white man stands at the forefront of the advance guard of progress and civilization, in literature, in commerce, in law, in war, in peace, and everywhere else. I have never found it possible even to apologize in my own mind for being a white man, and I have never found it possible to apologize in my own mind for wanting to govern my country in my own way. I want this to be a white man's country, governed by white men. I certainly can not find any consistency in the position of those men out on the Pacific coast who do not want a white man's civilization to be interfered with by Chinese and Japanese, and who do want it interfered with by niggers in some other part of the country, unless it be due to the fact that the darky was born here and the other fellow was not. There may be something in that, though I do not think there is much, because, with as full opportunity, after having been born here, he has never yet made an American out of himself, and he never will do it. He will continue to be an African for all time to come.

While I am on this subject, although it has nothing to do with this particular amendment, I believe I will say a few words about hyphenated Americans, anyhow.

I do not think it a disgrace to be simply a plain American, without any hyphenation at all, whether an Afro-American, or an Irish-American, or a German-American, or a Hungarian-American, or any other sort of an American with a hyphen in it. Of course I assert no superiority upon the part of plain Americans to other people. I do not believe there is any superiority existing. Still I do assert that we are not necessarily inferior simply because we are not hyphenated.

I think those of us whose forefathers fought to put the French language off the American Continent and make this an English-speaking continent, and whose forefathers afterwards fought to throw off British usurpation, although Britain was the land of our language and commerce and literature and progress, are entitled to stand at least upon a ground of equal footing with the hyphenated Americans of every description. I assert for us no superiority, of course. I would not dare do it. I would not believe my own assertion if I did.

I find that human nature in certain broad lines is about the same everywhere. I have lived upon the Rhine and the Danube, and have dwelt and sojourned by the Thames and the Seine and on the Mississippi, and have been an infrequent visitor even to that highly aristocratic coterie of people who live along the Hudson, and I find that white human nature is about the same all over the world, and nigger human nature is about the same, and Chinese human nature is about the same, and Japanese human nature is about the same. The nigger in Louisiana is a good deal like the nigger in Africa. The white man on the Thames is a good deal like the white man on the Mississippi, and a Chinese at Hongkong is a good deal like a Chinaman in San Francisco.

I have been rather astonished to find so much good, real, hard, common sense expressed during this discussion. I am not at all astonished to find it expressed by the Senator from Nevada [Mr. NEWLANDS], because I expected it from him, but I am very much pleased with his utterances; and I wish to express the hope that the day may come some of these times when the white people of the United States will have enough courage and common sense to say that this is a white man's country and they want it ruled according to the white man's traditions and the white man's ideals, and that they are not ashamed to say it, nor afraid to say it; that they do not think they are violating any injunction of civilization or humanity or progress in saying it; but, upon the contrary, that they are of the opinion that the white men of this country can govern it just as well as any other race, and perhaps a little bit better, and that they can govern it better if they are not disturbed and embarrassed by the traditions and the ideals and environments and the notions of other races.

In saying that I am making no assertion of white superiority, either. I am just making the assertion of difference. That is about all. I might assert some superiority if I chose to do it. At any rate, I would believe in it if I asserted it, but it is not necessary.

You can not have democratic institutions in any country in the world without race homogeneousness. You can not have any real liberty without real equality, and you can not have any real equality without real fraternity, and you can not have any real fraternity between races which, in potentiality, at any rate, do not intermarry. It comes down to the old, fundamental, rock principle after all of tribal relationship, of potential, if not actual homogeneity of blood, and to the point of willingness to accept in blood kinship, in acknowledged lawful wedlock, the man that you call "brother." If you are not going to call him "brother," you are not going to call him "equal," and if you are not going to call him "equal" you are not going to call him "free"; or if you do, you are hypocrites, because you do not mean it.

All democracy is founded upon a temple whose four pillars are liberty, equality, fraternity, and justice. The more you attempt by law to give artificial rights which you do not recognize in your own hearts the more injustice you are going to have. You can not prevent it. It is a part of human nature itself, and God alone can change human nature. So-called race prejudice, after all, is simply race knowledge and race difference.

The Senator from New Hampshire may stand here and tell me until he is grayheaded [laughter] that he believes in racial equality, but I know that he does not.

Mr. GALLINGER. I did not quite understand the Senator's observation.

Mr. WILLIAMS. I say, the Senator may tell me that he believes in racial equality, but I know that down in the bottom of his heart he does not.

Mr. GALLINGER. I certainly do, as before the law and under the Constitution of the United States.

Mr. WILLIAMS. Yes; a convenient phrase, that.

Mr. GALLINGER. And the Senator will become baldheaded before he persuades me to the contrary. [Laughter.]

Mr. WILLIAMS. I did not say "baldheaded"; I said "grayheaded." "Equal before the law"—a convenient phrase that. So do I. I believe that in the administration of justice the scales of justice ought to be held absolutely equal for all races and all people; but that is not what I said, nor can the Senator nor can anybody else evade the issue by thrusting in that convenient phrase, "before the law." I am talking about your heart, not the law.

Mr. GALLINGER. Mr. President, that is a matter that I thought the Senator would not proceed to inquire into, because he might find some trouble in discovering it.

Mr. WILLIAMS. No; I would not find any trouble. Yours is a great, big, good heart, and I know it.

Mr. GALLINGER. I thank the Senator. I will ask the Senator what was the meaning of the plank in the platform of the Democratic Party, adopted in 1884, at the time they nominated Mr. Cleveland, when it said: "We believe in a free ballot and a fair count"?

Mr. WILLIAMS. Why, some fellow came into the convention and said: "We will catch some nigger votes by putting this in." [Laughter.] Let us just be frank and honest with one another, you and I above all men.

Mr. GALLINGER. In other words, I suppose it was as binding as the free-tolls plank in the Democratic platform of a few months ago?

Mr. WILLIAMS. Just about the same; and I expect it was gotten into the platform in about the same way, too. [Laughter.]

When you come to talk about the equality of men before the law, that is a thing to which every gentleman will subscribe. I go further than that. I will give some little leeway to the fellow who, because of race or because of poverty or because of some other reason of inferiority, would not stand quite as good a chance before a jury as I would. I will make allowances for him. Down in the State of Misssisippi I would send a white man to the penitentiary as quick as the snap of a finger on a charge of stealing chickens, but I would not send a nigger to jail on the same charge. [Laughter.]

Mr. GALLINGER. Mr. President, the Senator does not quote me quite accurately. I said, "before the law and under the Constitution of the United States." I did not refer, of course, to the question of law suits, which the Senator is now discussing, but I referred to political rights.

Mr. WILLIAMS. I know; but I am going to talk about the law now, and I will come back to the other matter later on.

If a white man were brought before me, and I were a member of a grand jury, and he were charged with bigamy, I would indict him at once. I would not indict a darky for bigamy. [Laughter.] So far from not giving him an equal chance before the law, I would give him a better chance. I know his traditions; I know his ideals; I know his social life; and I do not hold him to the white man's standard. It would be unjust if I did.

If I were working a lot of white men in a wages squad, I would make them do good work. In working a lot of darkies in a wages squad, I look off every now and then and let them rest, because they need it, and they ought to have it. [Laughter.]

When it comes to giving an exact and equal administration of justice, I do not think any man with a good heart in him could deny it to anybody, of any sex or any race, anywhere. That must be given. If you do not give that, you are not honest yourself.

That, however, is not the question I am talking about now. That is not the question I put to the Senator from New Hampshire. I said that if he told me he believed in racial equality I did not believe he believed it, and I thought he was getting things mixed up.

Mr. GALLINGER. Mr. President, I believe in it precisely as I have stated it. The Senator must not put me in the attitude of entertaining a belief that I have not discussed.

Mr. WILLIAMS. Oh, no; I would not put the Senator from New Hampshire in any attitude in the world that he did not want to be put in, for half a second.

Mr. GALLINGER. I have no doubt of it.

Mr. WILLIAMS. I have known the Senator from New Hampshire for long years; and although he is a stand-pat Republican and I am a Bourbon Democrat, I think we have mutual respect for one another, because we always know where to put our fingers on one another, and that is a great deal in this world. We do not know that about everybody else. [Laughter.]

What does racial equality involve, if you really believe in it? It involves actual or potential blood relationship in lawful marriage. There is not any one of you who believes in that.

Mr. GALLINGER. Mr. President, if the Senator's definition is correct, then I agree with the Senator absolutely on that proposition.

Mr. WILLIAMS. I knew the Senator would, and that is the reason why I made the assertion that I did a moment ago. Abraham Lincoln agreed with me absolutely, too. Thomas Jefferson, the radical of radicals, and the radical of the ages, agreed with me, too.

So I come back to what I started out with a moment ago. In a democratic republic you must have homogeneity of race rule; not necessarily homogeneity of race population, but you must have homogeneity of the governing race, because you can not have a real democratic temple without one pillar with "liberty" inscribed on it, without another pillar with "equality" inscribed on it, without another pillar with "fraternity" inscribed on it, and without another pillar that must go with every sort of a temple, whether democratic or not, with "justice" inscribed on it.

I repeat that you can not have any temple top resting upon those pillars unless you have real liberty. Real liberty involves real equality, and real equality involves real fraternity, and real fraternity involves actual, potential willingness to blood relationship in lawful marriage—in lawful marriage, and not the hypocrisy of concubinage.

So there is none of us who believe in racial equality. Therefore I shall offer this amendment at the proper time:

That the right of white citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

That will dispose of the Japanese question of the Pacific slope for all future time, and the Chinese question, and the balance of it.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from New Hampshire?

Mr. WILLIAMS. I do.

Mr. GALLINGER. In a great many States, including New Hampshire, the colored man is permitted to vote without let or hindrance. Does the Senator think that commits us to racial equality as he interprets it?

Mr. WILLIAMS. No; I frankly do not, nor did I attempt to make that point.

Mr. GALLINGER. I think the Senator ought to differentiate between racial equality as some of us understand it, which guarantees to all citizens certain rights——

Mr. WILLIAMS. I frankly did not intend that my remarks should be taken to that full extent. I know the Senator understood me, but I am glad he called my attention to the matter, because I do not want to make a wrong impression upon other people.

I am trying now, however, to bring this question down to its fundamental, elemental essence, and to leave out the mere embroideries and frills and margins of it. That is the reason why I brought it down to the point I sought to bring it down to, and that is the reason why I picked out, purposely, the Senator from New Hampshire. I knew if there was a man in this body who stood diametrically opposite, traditionally and ideally, to what I have stood for, with my heredity and environment, it was perhaps he; and I wanted to show that when we came down to the fundamental, elemental essence of it there was no difference between us, and there is none.

I hope that when we reach it finally, the amendment I have offered shall be adopted. I say, "I hope." I do not hope anything of the sort. I want to be honest with all of you; but I say it would be a good thing if it were adopted.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Mississippi [Mr. VARDAMAN], upon which the yeas and nays have been demanded.

The yeas and nays were ordered and the Secretary proceeded to call the roll.

Mr. BANKHEAD (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. GOFF], and therefore withhold my vote.

Mr. BRADLEY (when his name was called). I have a general pair with the junior Senator from Indiana [Mr. KERN], who is not present at this moment. I therefore withhold my vote. If I were at liberty to vote, I should vote "nay."

Mr. CLAPP (when his name was called). I have a general pair with the senior Senator from North Carolina [Mr. SIMMONS]. The junior Senator from Tennessee [Mr. SHIELDS] has a general pair with the senior Senator from South Dakota [Mr. CRAWFORD]. By arrangement we transfer those pairs so that the Senator from Tennessee and myself may vote. I vote "nay."

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE], who is detained from the Chamber by illness. I transfer that pair to the senior Senator from New York [Mr. ROOT] and will vote. I vote "nay."

Mr. STERLING (when Mr. CRAWFORD's name was called). I announce the unavoidable absence of my colleague [Mr. CRAWFORD] and the fact that he is paired as stated by the Senator from Minnesota. If he were present and permitted to vote, he would vote "nay."

The PRESIDING OFFICER (Mr. SHEPPARD, when Mr. CULBERSON's name was called). The Chair wishes to announce the unavoidable absence of his colleague [Mr. CULBERSON] and to state that his colleague is paired with the senior Senator from Delaware [Mr. DU PONT]. This announcement may stand for the day.

Mr. KENYON (when Mr. CUMMINS's name was called). I announce the unavoidable absence of my colleague [Mr. CUMMINS]. He is paired with the junior Senator from Arkansas [Mr. ROBINSON]. Were my colleague present he would vote "nay."

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. CULBERSON]. By mutual consent it has been arranged that that pair shall be called off so far as the vote on the main question is concerned; but I do not understand that I have a right to vote on amendments. I therefore withhold my vote. If at liberty to vote, I should vote "nay" on this amendment.

Mr. BRYAN (when Mr. FLETCHER's name was called). My colleague [Mr. FLETCHER] is necessarily absent. He is paired with the junior Senator from Wyoming [Mr. WARREN].

Mr. GALLINGER (when his name was called). I have a standing pair with the junior Senator from New York [Mr. O'GORMAN] which I transfer to the junior Senator from Maine [Mr. BURLEIGH] and will vote. I vote "nay."

Mr. LEA of Tennessee (when his name was called). I have a general pair with the senior Senator from South Dakota [Mr. CRAWFORD]. The junior Senator from Minnesota [Mr. CLAPP] is paired with the senior Senator from North Carolina [Mr. SIMMONS]. Under an arrangement by which a transfer of pairs has been made I am at liberty to vote. I vote "yea."

Mr. OLIVER (when Mr. PENROSE's name was called). My colleague [Mr. PENROSE] is unavoidably absent. He is paired with the senior Senator from Mississippi [Mr. WILLIAMS]. If my colleague were present he would vote "nay."

Mr. REED (when his name was called). I am paired with the Senator from Michigan [Mr. SMITH]. I transfer that pair to the Senator from Indiana [Mr. SHIVELY] and vote "yea."

Mr. THOMPSON (when Mr. ROBINSON's name was called). The junior Senator from Arkansas [Mr. ROBINSON] is unavoidably absent. He is paired with the senior Senator from Iowa [Mr. CUMMINS].

Mr. MARTINE of New Jersey (when Mr. SAULSBURY's name was called). I was requested to announce that the Senator from Delaware [Mr. SAULSBURY] is paired with the Senator from Rhode Island [Mr. COLT]. Were the Senator from Delaware present, he would vote "yea."

Mr. OVERMAN (when Mr. SIMMONS's name was called). I wish to announce that my colleague [Mr. SIMMONS] is absent on account of sickness. He is paired with the junior Senator from Minnesota [Mr. CLAPP], as heretofore announced.

Mr. ASHURST (when the name of Mr. SMITH of Arizona was called). I desire to announce that my colleague [Mr. SMITH of Arizona] has been called to the Interior Department upon a very important matter in reference to the reclamation act, and therefore he is unavoidably detained from the Senate.

Mr. TOWNSEND (when the name of Mr. SMITH of Michigan was called). The senior Senator from Michigan [Mr. SMITH] is absent on important business. He has a general pair with the junior Senator from Missouri [Mr. REED]. If the senior Senator from Michigan were present, he would vote "nay."

Mr. SUTHERLAND (when his name was called). I have a general pair with the Senator from Arkansas [Mr. CLARKE]. By an arrangement with the Senator from Mississippi [Mr. WILLIAMS], who is paired with the Senator from Pennsylvania [Mr. PENROSE], a transfer has been made, so that the Senator from Pennsylvania will stand paired with the Senator from Arkansas, which will enable both the Senator from Mississippi and myself to vote. I vote "nay."

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from New York [Mr. ROOT]. I am informed, however, that if he here here his vote would be the same as mine. I therefore vote "nay."

Mr. WARREN (when his name was called). I have a regular pair with the Senator from Florida [Mr. FLETCHER], which I transfer to the Senator from New Mexico [Mr. FALL]. I vote "nay."

Mr. WILLIAMS (when his name was called). In accordance with the announcement made by the Senator from Utah [Mr. SUTHERLAND], I vote, notwithstanding my pair. I vote "yea."

The roll call was concluded.

Mr. CHILTON. I have a general pair with the Senator from New Mexico [Mr. FALL], but I understand that he would vote the same way that I intend to vote upon this amendment, and I therefore vote. I vote "nay."

Mr. REED (after having voted in the affirmative). I find that I can not transfer my pair to the Senator from Indiana [Mr. SHIVELY] but that I may transfer it to the Senator from Illinois [Mr. LEWIS], and allow my vote to stand.

Mr. LIPPITT (after having voted in the negative). I have a general pair with the Senator from Montana [Mr. WALSH]. I find that he has not voted, and I withdraw my vote.

The result was announced—yeas 19, nays 48, as follows:

YEAS—19.

| | | | |
|---|---|---|---|
| Bryan | Martin, Va. | Sheppard | Tillman |
| Gore | Myers | Shields | Vardaman |
| James | Overman | Smith, Ga. | West |
| Lea, Tenn. | Ransdell | Smith, S. C. | Williams |
| Lee, Md. | Reed | Swanson | |

NAYS—48.

| | | | |
|---|---|---|---|
| Ashurst | Gallinger | Martine, N. J. | Sherman |
| Borah | Gronna | Nelson | Smoot |
| Brady | Hollis | Newlands | Stephenson |
| Brandegee | Hughes | Norris | Sterling |
| Bristow | Johnson | Oliver | Sutherland |
| Burton | Jones | Owen | Thomas |
| Catron | Kenyon | Page | Thompson |
| Chamberlain | La Follette | Perkins | Thornton |
| Chilton | Lane | Pittman | Townsend |
| Clapp | Lodge | Poindexter | Warren |
| Clark, Wyo. | McCumber | Pomerene | Weeks |
| Dillingham | McLean | Shafroth | Works |

NOT VOTING—28.

| | | | |
|---|---|---|---|
| Bankhead | Cummins | Lewis | Shively |
| Bradley | du Pont | Lippitt | Simmons |
| Burleigh | Fall | O'Gorman | Smith, Ariz. |
| Clarke, Ark. | Fletcher | Penrose | Smith, Md. |
| Colt | Goff | Robinson | Smith, Mich. |
| Crawford | Hitchcock | Root | Stone |
| Culberson | Kern | Saulsbury | Walsh |

So Mr. VARDAMAN'S amendment was rejected.

Mr. WILLIAMS. I now offer the amendment to which I called the attention of the Senate. I move to insert the word "white" between the preposition "of" and the word "citizens," in the first line of section 1.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to amend section 1, line 1, by inserting before the word "citizens" the word "white," so that, if amended, the section will read:

SECTION 1. The right of white citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Mississippi [Mr. WILLIAMS].

Mr. TOWNSEND and Mr. WILLIAMS called for the yeas and nays, and they were ordered.

The Secretary proceeded to call the roll.

Mr. BANKHEAD (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. GOFF] and withhold my vote.

Mr. BRADLEY (when his name was called). I have a pair with the junior Senator from Indiana [Mr. KERN] and withhold my vote. Otherwise I should vote "nay."

Mr. CHILTON (when his name was called). I announce my pair with the Senator from New Mexico [Mr. FALL]. I do not know how he would vote on this question. If I were permitted to vote, I would vote "nay."

Mr. CLAPP (when his name was called). Making the same announcement as before as to pairs and transfers, I am at liberty to vote. I vote "nay."

Mr. CLARK of Wyoming (when his name was called). Again announcing my pair and its transfer as before, I vote "nay."

Mr. STERLING (when Mr. CRAWFORD's name was called). I make the same announcement in regard to the absence of my colleague [Mr. CRAWFORD] and his pair as before. If my colleague were present and permitted to vote, he would vote "nay."

Mr. KENYON (when Mr. CUMMINS's name was called). I make the same announcement as to my colleague [Mr. CUMMINS] as before. If he were present, he would vote "nay."

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. CULBERSON] and will therefore withhold my vote. Were I at liberty to vote, I would vote "nay."

Mr. GALLINGER (when his name was called). Announcing the same transfer as on the previous vote, I vote "nay."

Mr. LEA of Tennessee (when his name was called). I make the same announcement as on the last vote, and I vote "yea."

Mr. LIPPITT (when his name was called). On account of my pair with the Senator from Montana [Mr. WALSH], I withhold my vote. If I were at liberty to vote, I should vote "nay."

Mr. OLIVER (when Mr. PENROSE's name was called). I make the same announcement with regard to my colleague [Mr. PENROSE] as on the last vote. If he were present and at liberty to vote, he would vote "nay."

Mr. REED (when his name was called). I transfer my pair with the Senator from Michigan [Mr. SMITH] to the Senator from Illinois [Mr. LEWIS] and vote "nay."

Mr. OVERMAN (when Mr. SIMMONS's name was called). I again announce the absence of my colleague [Mr. SIMMONS] on account of sickness, and state that he is paired with the Senator from Minnesota [Mr. CLAPP].

Mr. TOWNSEND (when the name of Mr. SMITH of Michigan was called). I again repeat the announcement of the absence and pair of my colleague [Mr. SMITH of Michigan] and state that if he were present he would vote "nay."

Mr. SUTHERLAND (when his name was called). I make the same announcement as before with respect to my pair and the transfer of it, and vote "nay."

Mr. THOMAS (when his name was called). I desire to make the same announcement as before. I vote "nay."

Mr. WARREN (when his name was called). Announcing my pair with the Senator from Florida [Mr. FLETCHER], I withhold my vote. If at liberty to vote, I would vote "nay."

Mr. WILLIAMS (when his name was called). Repeating the announcement made by the Senator from Utah [Mr. SUTHERLAND], I vote "yea."

The roll call was concluded.

Mr. THOMPSON. I wish to announce the unavoidable absence of the junior Senator from Arkansas [Mr. ROBINSON]. He is away on official business and is paired with the senior Senator from Iowa [Mr. CUMMINS].

Mr. ASHURST. I again announce the unavoidable absence of my colleague [Mr. SMITH of Arizona].

Mr. MARTINE of New Jersey. I desire to announce the unavoidable absence of the Senator from Delaware [Mr. SAULSBURY]. He is paired with the Senator from Rhode Island [Mr. COLT]. If the Senator from Delaware were present, he would vote "yea."

The result was announced—yeas 21, nays 44, as follows:

YEAS—21.

| | | | |
|---|---|---|---|
| Bryan | Myers | Shields | Vardaman |
| Gore | Newlands | Smith, Ga. | West |
| James | Overman | Smith, S. C. | Williams |
| Lea, Tenn. | Pittman | Swanson | |
| Lee, Md. | Ransdell | Thornton | |
| Martin, Va. | Sheppard | Tillman | |

NAYS—44.

| | | | |
|---|---|---|---|
| Ashurst | Gallinger | McLean | Shafroth |
| Borah | Gronna | Martine, N. J. | Sherman |
| Brady | Hollis | Nelson | Smoot |
| Brandegee | Hughes | Norris | Stephenson |
| Bristow | Johnson | Oliver | Sterling |
| Burton | Jones | Owen | Sutherland |
| Catron | Kenyon | Page | Thomas |
| Chamberlain | La Follette | Perkins | Thompson |
| Clapp | Lane | Poindexter | Townsend |
| Clark, Wyo. | Lodge | Pomerene | Weeks |
| Dillingham | McCumber | Reed | Works |

NOT VOTING—30.

| | | | |
|---|---|---|---|
| Bankhead | Cummins | Lippitt | Smith, Ariz. |
| Bradley | du Pont | O'Gorman | Smith, Md. |
| Burleigh | Fall | Penrose | Smith, Mich. |
| Chilton | Fletcher | Robinson | Stone |
| Clarke, Ark. | Goff | Root | Walsh |
| Colt | Hitchcock | Saulsbury | Warren |
| Crawford | Kern | Shively | |
| Culberson | Lewis | Simmons | |

So Mr. WILLIAMS's amendment was rejected.

The VICE PRESIDENT. The joint resolution is in the Senate and still open to amendment. The question is, Shall the joint resolution be read the third time?

The joint resolution was ordered to be engrossed for a third reading and was read the third time.

The VICE PRESIDENT. The question is, Shall the joint resolution pass?

Mr. THOMAS and Mr. JAMES called for the yeas and nays and they were ordered.

The Secretary proceeded to call the roll.

Mr. BANKHEAD (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. GOFF]. I transfer that pair to the junior Senator from Indiana [Mr. KERN] and the junior Senator from Illinois [Mr. LEWIS] and vote "nay."

Mr. BRADLEY (when his name was called). I am paired with the junior Senator from Indiana [Mr. KERN], but on this vote we are agreed. I vote "nay."

Mr. CLAPP (when his name was called). I have a general pair with the senior Senator from North Carolina [Mr. SIMMONS], who is detained from the Chamber on account of illness. As it would require a transfer to two on this vote, and I am unable to get two, I have to decline voting. It is needless to say that I would vote "yea" if at liberty to vote.

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE], who is absent. Not understanding that it requires a transfer of two for one, I transfer my pair to the Senator from New York [Mr. ROOT] and vote "yea."

Mr. STERLING (when Mr. CRAWFORD's name was called). I make the same announcement as before in regard to the unavoidable absence of my colleague [Mr. CRAWFORD] and his pair. I will state that if he were present and permitted to vote he would vote "yea."

Mr. KENYON (when Mr. CUMMINS's name was called). I again announce the absence of my colleague [Mr. CUMMINS], and I desire to say that if he were present and not paired he would vote "yea."

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. CULBERSON], but it has been mutually agreed between us that the operation of the pair should not apply to this vote. I therefore vote. I vote "nay."

Mr. CATRON (when Mr. FALL's name was called). My colleague [Mr. FALL] is necessarily absent. He is paired with the senior Senator from West Virginia [Mr. CHILTON]. If my colleague were present and permitted to vote, he would vote "nay."

Mr. BRYAN (when Mr. FLETCHER's name was called). My colleague [Mr. FLETCHER] is unavoidably absent. He is paired with the Senator from Wyoming [Mr. WARREN].

Mr. GALLINGER (when his name was called). Making the same transfer as on the two previous votes, I vote "yea."

Mr. LIPPITT (when his name was called). I again announce my pair with the Senator from Montana [Mr. WALSH]. If I were at liberty to vote, I would vote "nay."

Mr. OLIVER (when Mr. PENROSE's name was called). My colleague [Mr. PENROSE] is necessarily absent. If he were present to-day, he would vote "yea."

Mr. REED (when his name was called). I transfer my pair with the Senator from Michigan [Mr. SMITH] to the Senator from Indiana [Mr. SHIVELY] and vote "nay."

Mr. THOMPSON (when Mr. ROBINSON's name was called). I will again announce the unavoidable absence of the junior Senator from Arkansas [Mr. ROBINSON] and state that he is paired with the senior Senator from Iowa [Mr. CUMMINS].

Mr. LODGE (when Mr. ROOT's name was called). The senior Senator from New York [Mr. ROOT] is paired with the Senator from Colorado [Mr. THOMAS]. If present, the senior Senator from New York would vote "nay."

Mr. MARTINE of New Jersey (when Mr. SAULSBURY's name was called). I desire again to announce the absence of the Senator from Delaware [Mr. SAULSBURY] on official business. If present, he would vote "nay."

Mr. ASHURST (when the name of Mr. SMITH of Arizona was called). I again announce the unavoidable absence of my colleague [Mr. SMITH of Arizona], and I desire further to announce that if present my colleague would vote "yea."

Mr. TOWNSEND (when the name of Mr. SMITH of Michigan was called). I again announce the absence and the pair of the senior Senator from Michigan [Mr. SMITH]. If he were present, he would vote "yea."

Mr. SUTHERLAND (when his name was called). I make the same announcement in reference to my pair and its transfer as before and vote. I vote "yea."

Mr. THOMAS (when his name was called). I transfer my pair with the senior Senator from New York [Mr. ROOT] to the Senator from Arizona [Mr. SMITH] and vote "yea."

Mr. MYERS (when Mr. WALSH's name was called). I am authorized to announce that my colleague [Mr. WALSH] is necessarily detained from the Chamber. He is paired with the Senator from Rhode Island [Mr. LIPPITT]. I am further authorized to state that if my colleague were here he would vote "yea."

Mr. WARREN (when his name was called). I am paired with the senior Senator from Florida [Mr. FLETCHER]. As I am unable to secure a transfer, I withhold my vote. If at liberty to vote, I would vote "yea."

The roll call was concluded.

Mr. LEA of Tennessee. I have a general pair with the senior Senator from South Dakota [Mr. CRAWFORD]. I understand that if he were present he would vote "yea." I therefore feel at liberty to vote and I vote "yea."

Mr. CLARK of Wyoming (after having voted in the affirmative). Since recording my vote upon this question I have been informed of the terms of the pair between the Senator from Colorado [Mr. THOMAS] and the Senator from New York [Mr. ROOT], and under it I find I can not properly record my vote. I therefore withdraw the same.

Mr. CHILTON. I have a pair with the Senator from New Mexico [Mr. FALL]. If he were present, he would vote "nay" and I should vote "yea."

Mr. CLAPP. Observing that the idea of a single pair prevails, I shall vote. I vote "yea."

Mr. CLARK of Wyoming. I transfer my pair with the Senator from Missouri [Mr. STONE] to the Senator from South Dakota [Mr. CRAWFORD] and will allow my vote to stand.

Mr. OVERMAN. I again announce that my colleague [Mr. SIMMONS] is absent on account of sickness. He is paired with the Senator from Minnesota [Mr. CLAPP].

The result was announced—yeas 35, nays 34, as follows:

YEAS—35.

| | | | |
|---|---|---|---|
| Ashurst | Hollis | Newlands | Smoot |
| Brady | Hughes | Norris | Stephenson |
| Bristow | Jones | Owen | Sterling |
| Burton | Kenyon | Perkins | Sutherland |
| Chamberlain | La Follette | Poindexter | Thomas |
| Clapp | Lane | Ransdell | Thompson |
| Clark, Wyo. | Lea, Tenn. | Shafroth | Townsend |
| Gallinger | Myers | Sheppard | Works |
| Gronna | Nelson | Sherman | |

NAYS—34.

| | | | |
|---|---|---|---|
| Bankhead | James | Overman | Swanson |
| Borah | Johnson | Page | Thornton |
| Bradley | Lee, Md. | Pittman | Tillman |
| Brandegee | Lodge | Pomerene | Vardaman |
| Bryan | McCumber | Reed | Weeks |
| Catron | McLean | Shields | West |
| Dillingham | Martin, Va. | Smith, Ga. | Williams |
| du Pont | Martine, N. J. | Smith, Md. | |
| Gore | Oliver | Smith, S. C. | |

NOT VOTING—26.

| | | | |
|---|---|---|---|
| Burleigh | Fall | O'Gorman | Smith, Ariz. |
| Chilton | Fletcher | Penrose | Smith, Mich. |
| Clarke, Ark. | Goff | Robinson | Stone |
| Colt | Hitchcock | Root | Walsh |
| Crawford | Kern | Saulsbury | Warren |
| Culberson | Lewis | Shively | |
| Cummins | Lippitt | Simmons | |

The VICE PRESIDENT. The joint resolution not having received the constitutional two-thirds, it is rejected.

Mr. SHAFROTH. Mr. President, it is manifest from the discussion which has been had in the Chamber to-day that many Senators have voted against the joint resolution on the theory that it forces equal suffrage upon the States against their will. I have here, and I ask unanimous consent out of order to present, a proposed constitutional amendment, which requires each State, upon a petition signed by 5 per cent of the citizens of that State, to submit to the voters of that State the question whether or not equal suffrage shall be adopted in that State.

Mr. WILLIAMS. Mr. President, do I understand the Senator correctly that 5 per cent of the population of the State may force this issue upon the consideration of the State?

Mr. SHAFROTH. I will read it, if the Senator will permit me.

Mr. WILLIAMS. But is that the case?

Mr. SHAFROTH. I think so. It is the same as the requirement regarding the initiation of legislation in a good many of the States.

Mr. JAMES. I call for the regular order.

EXECUTIVE SESSION.

Mr. SMITH of Georgia. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session, the doors were reopened.

INSPECTION AND GRADING OF GRAIN.

Mr. McCUMBER. I move that the Senate proceed to the consideration of the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

The VICE PRESIDENT. The Senator from North Dakota moves that the Senate proceed to the consideration of the bill named by him. Is there objection? The Chair hears none.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. McCUMBER. I ask that the bill be temporarily laid aside.

The VICE PRESIDENT. The bill will be laid aside at the request of the Senator from North Dakota.

Mr. GRONNA. I move that the Senate adjourn.

The motion was agreed to, and (at 5 o'clock and 35 minutes p. m.) the Senate adjourned until to-morrow, Friday, March 20, 1914, at 12 o'clock meridian.

## NOMINATION.

*Executive nomination received by the Senate March 19, 1914.*

DISTRICT ATTORNEY OF THE CANAL ZONE.

William K. Jackson, jr., of Ancon, Canal Zone, to be district attorney of the Canal Zone.

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate March 19, 1914.*

REGISTER OF THE LAND OFFICE.

Peter Hanson to be register of the land office at Vernal, Utah.

## HOUSE OF REPRESENTATIVES.

THURSDAY, *March 19, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Father Almighty, in whom we live and move and have our being, impress us, we beseech Thee, with the duties devolving upon us, and make us tractable to the heavenly influence, that we may be responsive to its call and render unto Thee and our fellow men faithful and efficient service; that Thy kingdom may come and Thy will be done in us, to the glory and honor of Thy holy name. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 13612. An act making appropriations to supply urgent deficiencies in appropriations for the fiscal year 1914, and for prior years, and for other purposes.

The message also announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 4628. An act extending the period of payment under reclamation projects, and for other purposes.

RIVER AND HARBOR APPROPRIATION BILL.

Mr. SPARKMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the river and harbor bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 13811) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, with Mr. ALEXANDER in the chair.

Mr. SPARKMAN. Mr. Chairman, will the gentleman from Washington use some of his time now?

Mr. HUMPHREY of Washington. Mr. Chairman, it will be recalled that some time in December I made a statement on the floor of the House with regard to the shingle business of the State of Washington. I submitted a list of something like 194 mills that were at that time closed. The Department of Commerce sent two gentlemen out there to investigate in reference to the conditions. They made a report, and the distinguished gentleman from Alabama [Mr. UNDERWOOD], at the request of the Secretary of Commerce, inserted that report in the RECORD. I propose now to take up that report and reply to some of the statements therein made.

I may say in the beginning that there is no dispute as to the fact that the conditions were as I had represented. The only question is as to what was the cause.

CHARACTER OF THE INVESTIGATION.

Who are the gentlemen who made this investigation? Are they tariff experts? No one, so far as I know, has ever claimed that this was true. Of course, these men might have been able to obtain some facts and have given these to the Secretary of Commerce, upon which the Secretary could have formed an opinion; but no attempt whatever was made to do this. These "experts" gave the opinion and wrote the statement which the Secretary signed. The action of the Secretary in relation to this matter was entirely clerical. This appears from the statement itself. So, take this report in its strongest light and it is only the opinion of a subordinate in the Department of Commerce about a question upon which the greatest minds of this Nation have always differed. This report is simply an attempt by two clerks to try and sustain the preconceived opinion of the Secretary of Commerce upon certain phases of the tariff question. In making this statement I am simply showing what every man in this House knows to be true. Everyone knew what the report would be before the pretended investigation was made. The only question of doubt was what reasons they would give for reaching the conclusion.

These subordinates should not be condemned. No man is to be blamed for working in the interests of his daily bread. The distinguished gentleman from Pennsylvania [Mr. PALMER] during the debate upon the provision creating a bureau of foreign and domestic commerce gave his opinion as to the character of

men that would be appointed to make these investigations under this provision of the law. He made a point of order against this provision when it was offered. He expressed the opinion that the proposition had been "born one afternoon in a corridor of the Capitol." In giving his reasons for opposing it, he used this language (pp. 6182, 6183, CONGRESSIONAL RECORD, 2d sess., 62d Cong.):

The gentleman from Alabama has said that the present Tariff Board is a body of clerks of the President. How much more true would it be, with these subalterns in this little bureau, charged with all these great and important duties of the Tariff Board, appointed by a subordinate officer of the President—by the administration—how much more true would it be that, then, we could consign to a body of clerks the duties which are now exercised by the Tariff Board?

But so long as it will be composed of clerks who may be small politicians back in the country, appointed for the purpose of rewarding them for some political support, I shall oppose any effort on the part of the Committee on Appropriations or anybody else to put this tremendous power in the hands of such a board or bureau.

This statement was received by the House with applause. I do not care to further comment on the character of these "subalterns" appointed by "subordinate officer of the President," who may be "small politicians" appointed for the purpose of rewarding them for political support.

This report surely justifies every criticism Mr. Palmer made against the system. If he needs any evidence demonstrating the wisdom of his judgment, he will find it here.

CHARACTER OF THE EVIDENCE.

But few men would have had the assurance to submit to the public a report based upon the character of evidence furnished by this so-called expert investigator. Not only did he select with care his witnesses and refuse to talk with anyone that he thought might be hostile, but he fails absolutely to give the name of any witness he interviewed and whose evidence he uses. He does not give the name of a single witness that he examined while making this investigation. He does not give the name of a single man whose opinion he quotes. He does not give the name of a single man with whom he talked. He does not give the name of a single man that furnished him information. What is the value of a report based on such foundation? He only gives the names when he refers to records and letters. Even then, as I recall, he mentions only four names, and the evidence quoted from these witnesses, taken from court records or letters, is of little importance. Why does he refuse to give the names of his witnesses? He makes no explanation. If he had given the names of his witnesses, I could have ascertained if his version of their evidence was authorized. I could have ascertained if he had misquoted their testimony. But by giving anonymous evidence he precludes the opportunity to know the truth. If he told the truth, certainly he would have been anxious to have it corroborated. If he did not tell the truth, naturally he would have been anxious to prevent any inquiry being made to sustain him. Undoubtedly he feared that a telegram from me would bring from these witnesses a prompt and emphatic contradiction of the statements he attributes to them. If not, why is there no explanation for this unusual and most suspicious action. What explanation other than this can be given for the disreputable and contemptible method? Did he manufacture his own evidence under the guise of anonymous witnesses? This is the common method of those who follow the system of quoting anonymous witnesses. Again, I repeat that few public officials would have had the assurance to submit a statement to the public based upon ex parte and anonymous testimony, and my distinguished friend, the Secretary of Commerce, is certainly entitled to any credit it may bring to him.

Now, I want to take up the evidence and refer to some of it in detail. I am going to hurry through this as rapidly as possible. First, I refer to what he says about lumber. I read from page 84 of the report:

The effect of the removal of the duty on lumber is almost universally conceded to be negligible; at least it is so considered among lumbermen on the Pacific coast.

I do not know whom he consulted, as none of the witnesses are named. I am utterly unable to find out upon what foundation he bases that statement; and as he considers the question worthy of little consideration, I will only refer to one letter, which is from the manager of the West Coast Lumber Manufacturers' Association. Surely, if there was any man in the State of Washington whose opinion he should have sought, it was the manager of this great association. The letter is as follows:

TACOMA, WASH., *December 9, 1913.*

Hon. W. E. HUMPHREY,
*Washington, D. C.*

DEAR SIR: As requested by Mr. J. H. Bloedel, I am inclosing a list of lumber mills that have closed down owing to a lack of business, along with their daily 10-hour capacity; also a list of mills that have shortened their running time owing to a lack of business. This amounts to a decrease in daily production of 3,917,500 feet, or about one-fifth of the output of the fir lumber in Oregon and Washington.

Everything indicates a greater shut down, as there is not sufficient business coming into the country to keep the mills going. The mills that have shut down entirely and those that are running on short time and limiting their output have thrown 8,400 men out of employment. This, of course, includes the men that work in the woods supplying the logs for the mills as well as the men that work in the mills, but does not include the shingle mills nor the men thrown out of employment by the closing down of the shingle mills. That information, I have been advised, has been sent you by Mr. Traill. I have checked his figures and find them correct.

Cessation of operation among the shingle mills has thrown 6,300 men out of employment by the closing of lumber mills and working limited time, making 14,700 men that are idle at this time on account of the inability of the mills to operate, and present indications are that this number will be increased very materially by the first of the year, as the mills are being forced to shut down from day to day.

I can not help but feel that the revision of the tariff is responsible for this condition. I addressed a letter April 29, 1913, to Hon. WESLEY L. JONES, Senator from this State, in which I set forth reasons of the West Coast Lumber Manufacturers' Association for asking that the tariff be retained on shingles. At that time it was felt that it was hopeless to even attempt a retention of a tariff on lumber, but we did feel that we might be able to have the tariff, or at least a portion of the schedule then in existence, on shingles retained. As you are aware, we failed in this, with the result that our business is now in a deplorable condition. The letter I wrote to Senator JONES, as well as a number of others written him by various organizations and individual concerns interested, were submitted to the Senate by Senator JONES and printed in the CONGRESSIONAL RECORD of Tuesday, September 2, 1913, commencing on page 4492. You possibly are familiar with this correspondence; but if not, would respectfully suggest that by reading it you might secure some information that you have not heretofore obtained.

If there is any further information that I can give you that will be of benefit to you, I would be pleased to do so.

Yours, truly,

WEST COAST LUMBER MANUFACTURERS' ASSOCIATION,
By W. C. MILES, *Manager.*

Although these experts could find no man in the State of Washington to express the opinion that the tariff had anything to do with the condition of the lumber industry, this is the opinion of the manager of that great lumber association:

I can not help but feel that the revision of the tariff is responsible for this condition.

Mr. GOULDEN. Will the gentleman from Washington yield for just one question?

Mr. HUMPHREY of Washington. Yes.

Mr. GOULDEN. What is the date of that letter?

Mr. HUMPHREY of Washington. The date of that letter is December 9, 1913.

Mr. GOULDEN. And what is the name of the author?

Mr. HUMPHREY of Washington. The name of the author is W. C. Miles, manager of the West Coast Lumber Manufacturers' Association, the big lumber association of our State, as the gentleman knows.

Mr. GOULDEN. I thank the gentleman.

Mr. HUMPHREY of Washington. At the close of my remarks I will insert an article from the Seattle Times showing the result of the proposed repeal of the Panama Canal tolls law on the lumber industry of the Pacific coast.

CHINESE LABOR.

I want to quote now from the report submitted by the Secretary. He says, on page 3:

A number of the manufacturers, responding to the request for information sent out by the manager of the association, expressed themselves unequivocally that they were of the opinion that the removal of the duty had nothing to do with then existing conditions.

Now, I take the report, and I find that on pages 9, 10, and 11 the expert quotes 5 men, who apparently express the opinion that the removal of the tariff has nothing to do with the conditions in the shingle industry; but it appears from this evidence itself that he had at that time about 100 replies from the shingle men of the State of Washington before him. He was looking at the replies that had been sent in to the manager of the Red Cedar Shingle Association. He finds 5 out of 100 that he can quote in support of his contention. What did the other 95 say? I refer to this to show you the character, the honest endeavor shown in this report to get the truth. The Secretary in his letter says that a number of the manufacturers responding to the request said that the duty had nothing to do with the then existing conditions; and yet these experts could find only 5 out of 100. Why did he not bring in all of them? Why did he not make a summary of the other replies?

I want to call your attention a little further to other statements. The same report, signed by Mr. Redfield, on page 2, says:

The labor cost of producing shingles in the United States and British Columbia does not differ greatly, if at all.

Now let us see what the report says about that. On page 69 of the report he quotes one of the witnesses, who says:

He thinks that the total difference in the cost of labor in the two countries is in favor of Canada, but he does not know how much. At the time of the passage of the Payne-Aldrich tariff bill wages in Canada were considerably lower than they are now. It was then established to the satisfaction of the authors of that bill that this difference was

equivalent to 35 cents to 50 cents per thousand shingles, and they fixed the duty at 50 cents per thousand. In his opinion, the difference now is not more than 15 or 20 cents per thousand.

And yet in his letter he says that the cost of producing shingles in the United States and British Columbia does not differ greatly, if at all.

If I had the time I could read from several other witnesses who gave testimony to the same effect, but I will just read from one letter that I have received in regard to this question of Chinese labor; and I want to take occasion to call the attention of my Democratic friends to the fact that this report shows that 90 per cent of the men working in the shingle mills of British Columbia are orientals, and 70 per cent of the 90 are Chinese. I read from a letter of Mr. E. E. Case on this question. He lives in the district of my colleague Mr. JOHNSON, at Raymond, and is one of the largest shingle manufacturers in the county, and a man of highest standing. He says:

Practically all of the shingles in British Columbia are manufactured wholly or in part by Chinese labor; approximately about 90 per cent of the labor used is Chinese and 10 per cent white. The Chinese labor is mostly under the contract system; they contract for the manufacturing of the shingles from the water to the dry kiln during the winter months at 28 cents per thousand, and in some cases during the summer months at 30 cents per thousand.

Mr. MOORE. Will the gentleman reduce that to a per diem basis?

Mr. HUMPHREY of Washington. I can not take the time to do that now. I want to finish reading this.

This is the full labor cost with the exception of a filer, at about $5 per day; the engineer, at about $100 per month; and the night watchman, at $75 or $80 per month. In a mill cutting 100,000 shingles per day, for example, the cost per thousand would run:

| | Cents. |
|---|---|
| Contracted labor | 28 |
| Engineer | 4 |
| Filing | 5½ |
| Night watchman | 3 |
| Total | 40½ |

In a mill in Washington operated under the most favorable circumstances and strictest economy the cost for the same work would total exactly 57 cents per thousand. These are the actual figures, taken from my own experience and observation. How a man could conceive the idea that there was no difference in the labor cost in the two countries I do not understand.

You may tell Secretary Redfield for me that, though the oriental labor is said not to be as efficient as the white labor of this country, if he will make it possible for me to get a crew of Chinese as they have in the mills of British Columbia, I will pay the same wages as they do there and give him a check for $10,000 a year as a bonus.

I also quote from an interview had with Michael Earles, who is one of the largest lumber and shingle manufacturers in the State of Washington, published in the Seattle Times of March 10, 1914:

Michael Earles pointed out to-day the fact that the British Columbia stumpage is easier to hold than stumpage in this State or Oregon, because it was held under leases and on a small tax. He showed, too, that oriental labor employed in the British Columbia mills is paid less than half as much as American workmen on this side of the line, and that manufacturing costs generally were lower in British Columbia.

Now, I am not going to take up further time in regard to this question of oriental-labor matter. The fact is admitted that Chinese and other oriental labor is employed in British Columbia, and I put the common sense of mankind against any statement these experts or the Democratic Party may make about it. If it is not to the advantage of the British Columbia mill owner to employ Chinese labor, why are they employed? Certainly there is no sentimental reason for doing it. Certainly there is no patriotic purpose in it. Everyone knows that they employ Chinamen in British Columbia because they do the work for less. Oriental labor is employed because it is cheaper. All the experts and demagogues can not deceive anyone as to that fact.

EFFICIENCY.

Of course most of the ills suffered by the shingle mills of Washington are due to their lack of intelligence. They do not know how to conduct their own business. There can be no doubt of this, for the great expert sent out there by the Department of Commerce, who probably never before saw a shingle bolt and likely does not know a knot saw from a hole in the ground, tells us so. I read from page 3 of the report:

A striking fact in the shingle industry in the State of Washington is that a very large portion of the mills operating in the State consist of fewer than seven machines. In other words, less than 25 per cent of the mills, according to the generally accepted standard, are equipped for the most economical production.

The State of Washington produces more than 84 per cent of the cedar shingles in the United States, and more than 66 per cent of all the shingles of all kinds produced in this country; yet 75 per cent of the men in the shingle business in that State do not know how to conduct their business. No wonder 80 per cent of them had to close their mills under a Democratic tariff law. Here at the very beginning of this report we have the matter settled.

NEW MILLS.

One point made in the report is that new mills are being started in Washington. Before the Payne law went upon the statute book the shingle mills of Washington ran practically only six months in the year. That statement was made on several occasions on the floor of the House by me and by my colleague. Since that time, or at least during 1912, according to the evidence submitted in this report, the shingle mills of the State of Washington ran a greater portion of the time and received a higher price for their product than ever before in their history. And yet the experts make a great point out of the fact that these mills sometimes closed. They seem to be laboring under the impression that if the mills in the State of Washington could meet the demand by running a portion of the time, that it would be no injury to them to have direct competition from British Columbia.

The expert says that a new mill is being constructed in the State of Washington and that another is in contemplation. I have no reason to doubt the correctness of this statement except the fact that he made it. He emphasizes these facts to show that the tariff has not injured the business. I remember that when we were urging an increase of the tariff during the consideration of the Payne bill that this same objection was made. The fact was then pointed out that several new mills had been built in the State the previous year. Yet it was then admitted by all that the mills for many years had been closed practically half of the time. The shingle business in the State of Washington is peculiar and depends on many conditions that one not familiar with the situation can not understand. A man may conclude to clear a tract of land. The cedar stumps and the broken trunks of trees on that land must be manufactured into shingles or burned. The construction of a mill is not costly, and often it pays to build a new mill rather than to haul the bolts to an old one. Again, a piece of timber, probably mostly fir, must be cut. The cedar must also be cut at the same time, and much of it not fit for lumber must be wasted or manufactured into shingles. Under these circumstances a new mill often must be built. We can not in our country cut one kind of timber at a time. When you cut a piece of timber in the State of Washington you must cut all kinds at the same time. Again, there are many purchasers of timber in our State that have been made with a limited time for its removal. This timber must be cut and the cedar must be used. Any one of the conditions which I have mentioned, as well as many others, may call for the construction of a new mill, and this notwithstanding the fact that many old mills, owing to the bad condition of the markets, may be closed. Again, it is always possible that a very large mill, owing to some unusual condition, may be able to make money even while many small mills may be compelled to close.

It is not claimed, and never has been claimed, that all our mills will be closed all the time and all our timber remain unused even under free trade. However, as to the direct effect of the tariff on this particular proposition of the construction of two news mills, I have a newspaper clipping that may give some light. The report says that the new mill under construction is being built at Everett; that it will have a capacity of about 750,000. This newspaper clipping, taken from the Seattle Post-Intelligencer, is as follows:

[From the Post-Intelligencer, Feb. 17, 1914.]

NEW TARIFF LAW SENDS BIG MILL OUT OF STATE—EVERETT MANUFACTURER SAYS SHINGLES CAN BE MADE CHEAPER IN VANCOUVER WITH CHINESE LABOR.

CHEHALIS, *February 16.*

H. W. Stuchell, one of the principal owners in the big Eclipse mill at Everett, while in Chehalis to-day on business, announced his intention to build at an early date a shingle-mill plant at Vancouver, B. C., that will have a cutting capacity of 1,500,000 shingles daily. Chinese labor will be employed principally. He says that by using this cheap labor he can make shingles at 50 cents a thousand less than they can be made for on this side of the line, and that since the new tariff law has taken the duty off shingles he can make big money in the enterprise.

Mr. Stuchell is not optimistic over the outlook for the lumber business. Not until the railroads begin buying in earnest, says Mr. Stuchell, will there be any real improvement in the situation.

This shows what one man in the shingle business and living at Everett thinks of the situation. He is probably the largest manufacturer of shingles in Everett and one of the largest in the world. It is perfectly apparent that he does not agree with our expert.

Now, there are many other matters that I might take up, but I do not care to spend any more time except on one proposition, and that is as to whether or not the tariff had any effect upon the closing of these mills.

Mr. GORDON. Will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. GORDON. Is it not a fact that the sickness of the shingle industry is due to a great extent to the abandonment of the use of wooden shingles and the substitution therefor of metal, which is being pushed by the insurance companies throughout the country?

Mr. HUMPHREY of Washington. Undoubtedly that has had some effect.

Mr. GORDON. Has it not had the greatest effect in lessening the use of wooden shingles?

Mr. HUMPHREY of Washington. No; the gentleman is mistaken. It has increased competition; it has, to a certain extent, restricted the demand; but it seems to me a strange argument that when the shingle men have to meet that competition to say it will not hurt them to have also the competition of British Columbia, where they employ cheap Chinese labor.

THE MATERIAL QUESTION.

The evidence submitted is entirely ex parte and mostly based on statements or alleged statements of unknown and unnamed witnesses. An ex parte statement at best is of little value. It is always received by the courts with great caution and never acted upon except under unusual conditions. Human experience shows that such evidence can not be relied upon, but an ex parte statement based on anonymous evidence is so worthless that it is used only by cowards, character assassins, and expert political investigators.

But let us examine this evidence, discreditable and worthless as it is, and see if even this testimony bears out the statements made in the letter of Mr. Redfield. Three things are established by the evidence submitted in the report beyond dispute. First, on page 51 of the report it shows that 80 per cent of the shingle mills in the State of Washington were closed. I had only claimed 60 per cent. Second, on pages 44 and 45 it is shown that more shingles have been brought into this country from British Columbia since the enactment of the new tariff law than ever before in the same period of time. Third, on page 47 it shows that there were more idle men in the State of Washington in December last than ever before.

With these facts directly asserted in this report the material question is: Was the tariff a factor in bringing about these conditions? In other words, was the tariff a material factor in the closing of the shingle mills in the State of Washington? This is the real issue. Mr. Redfield, in his letter transmitting the report, says:

> It can be reasonably inferred from Mr. HUMPHREY'S letter that the removal of the duty has contributed largely to this condition. No shingle manufacturer was found willing to make such statement.

He was referring to the conditions in the shingle business. He further states:

> Not one of those mills reported that they closed because of the removal of the duty.

All through his statement given to the press and given to Mr. UNDERWOOD to insert in the RECORD he seeks to make it appear that the removal of the duty upon lumber and shingles has had no material effect upon these industries in the State of Washington. Does the report of his expert based on his ex parte and anonymous evidence bear out these statements? That this expert had the desire to support the statements made by Mr. Redfield can not be doubted; that he did not have the brains to do it is demonstrated. As for the proof of this assertion I quote the report itself. I read first from page 7, where a letter is quoted written by Mr. A. F. Trail, manager of the Red Cedar Shingle Manufacturers' Association. This letter was addressed to different shingle manufacturers in the State of Washington. I read as follows:

> If not now closed, do you expect to do so, and when? Congressman HUMPHREY will be able to use this information with considerable effect, and it may help us to get some modification of the tariff during the next 12 months.
>
> Shingle conditions could not be much worse. Orders are scarce, and prices seem to be steadily dropping.

It is evident that at least the manager of this great association thought that the tariff had something to do with the conditions which he describes. If not, why did he desire a modification of the tariff law? His opinion is at least entitled to as much weight as the nameless witnesses quoted to try to show that the duty had no effect. Again, I read from the report, on page 43, and it seems to me that this evidence from their own expert ought to raise some doubt even in the minds of Mr. Redfield and of Mr. UNDERWOOD as to whether or not the removal of the tariff has had anything to do in bringing about the present conditions in the shingle industry.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. MADDEN. Was it not the intention of the Democrats to make a difference when they took the tariff off? Of course it was.

Mr. HUMPHREY of Washington. Of course.

Mr. MADDEN. I wondered why they are apologizing for the tariff not having had any effect?

Mr. HUMPHREY of Washington. I want the Members of the House to listen to this statement made by this expert, upon whose report the Secretary of Commerce bases his statement that the tariff had nothing to do with the conditions of the shingle industry in the State of Washington. I am reading now from the opinion of the expert himself, on page 43 of the report:

> The general consensus of opinion, as expressed by a great majority of the shingle producers seen, is to the effect that the removal of the duty has been a factor in bringing about present conditions, but that these conditions are not largely due to such removal. An important fact to take into consideration in this connection is that nearly all of the shingle manufacturers of the State of Washington are protectionists; that they have been taught, and many of them believe, that a duty on shingles is necessary to the prosperity of the industry. Their attitude of mind is entirely antagonistic to free trade or even low tariffs.

And yet, says Mr. Redfield, no manufacturer was found willing to say that the removal of duty had largely contributed to the conditions then existing. Yet, says his expert, "many of them believe that a duty on shingles is necessary to the prosperity of the industry." Of course, these men that are engaged in this business, that study it, that have their money invested in it, that make their living out of it, are mistaken about it being injured by free trade. I read again from page 44:

> The proportion of the shingle manufacturers seen who expressed the opinion that the removal of the duty has had nothing to do with existing conditions in the industry was small.

So small are the number of shingle manufacturers who expressed the opinion that the removal of the duty had nothing to do with the existing conditions in the industry that this energetic expert, after many days of investigation, was not able to find even one whose name he would give that was willing to stand behind such statement, and yet Mr. Redfield would have you believe that the shingle manufacturers of Washington do not believe that their industry has been materially affected. I read from page 46, from one of his anonymous witnesses:

> While he states that he does not believe that the present depressed condition in the shingle business is entirely due to the tariff, or even in a large measure due to the tariff, he does believe that it had some effect. The principal influence so far has been that the retail dealers have withheld their orders, and that there has not been a normal demand. He believes that it is entirely too soon to tell exactly what the effects of the removal of the duty will be. He is sure that the shingle manufacturer will be hurt considerably unless he can get logs from the Canadian side without paying an export duty.

One of the things we especially urged was that the tariff bill should prohibit the imposition of the duty upon logs brought from Canada if their timber products were to be admitted free into our markets. We called attention to the unfairness of the proposition to admit their lumber and shingles free and yet allow them to impose a duty upon logs that we desired to be brought into this country for the purpose of being manufactured. But this proposition the Democratic Party refused to consider. I quote from another unknown witness, page 47, who is described as a large interior manufacturer. And let it be remembered that I must quote from the few witnesses that the expert selected from the many, and it is not to be supposed that he selected those whose testimony was weakest in favor of his cause. This man says:

> The greatest bear factor in the shingle business is overproduction. The mills make too many shingles. To the extent that shingles are imported and thus affect the supply, to that extent do importations affect the market, and the removal of the duty has undoubtedly increased importations from Canada. He believes that the price of shingles in the United States will be lower than at present. The removal of the duty will be the main factor in bringing about this condition.

Let me quote once more from Mr. Redfield's statement:

> There was complaint at that time and there is still complaint because of the depression in the price of shingles. It can be reasonably inferred from Mr. HUMPHREY'S letter that the removal of the duty has contributed largely to this condition. No shingle manufacturer was found willing to make such a statement.

Yet this man says:

> The price of shingles in the United States will be lower than at present. The removal of the duty will be the main factor in bringing about this condition.

I place this statement in Mr. Redfield's letter against the statement made in his report. His letter he gave to the press, but his report few people will see. This same witness continues (p. 47):

> He thinks that the effect of this removal will be more pronounced later on than at present. The Canadian mills will gradually build up a trade in the United States. While this condition is to be expected, at the same time the tendency now is for slightly higher prices. The

difference between the cost of producing shingles in Canada and in the United States will widen from year to year. The Canadian timber is cheaper, better in quality, and more accessible. Labor is also cheaper. The timber in the United States is becoming scarcer, poorer in quality, and less accessible.

Now, let me quote the words of the great expert as set down on page 48:

One manufacturer stated that just after the passage of the tariff bill of 1909 his company went into New England, where the best shingle trade was largely in the hands of Canadian mills. The 50-cent duty imposed by that law enabled them to enter the New England market, and they practically drove the Canadians out of that business. He says that they held this trade until the duty was removed in 1913, and that now they have very little business in the East.

"And yet," says Mr. Redfield, "no manufacturer was found that would state that the removal of the duty had materially affected the industry." Once more I call to the stand one of these unidentified and unknown witnesses described as an official of one of the largest shingle concerns in the State. He says (report, p. 50):

That he could not say that the tariff had caused the present depressed condition of the shingle industry and the lumber industry. As a matter of fact, there have always been frequent depressions in the shingle business, the primary cause of which is "too many shingles."

The cause, then, is too many shingles. They are getting more shingles from British Columbia now under the new law than ever before, at a time when the market is already depressed. But, of course, this fact did not materially affect conditions. It is not the tariff. It is "too many shingles." This witness continues:

If the importations of shingles from Canada are increased because of the removal of the duty, naturally he would expect the industry to be adversely affected at home. Every car of shingles imported necessarily displaces a car of domestic production.

I want to read now two clippings from a newspaper, the Daily Province, printed at Vancouver, the principal paper in the Province of British Columbia, one under date of March 4, 1914, and one under date of March 6, 1914:

BRITISH COLUMBIA'S EXPORTS NOW DOUBLED—NEW TARIFF REVISION OF UNITED STATES STIMULATES BUSINESS—EXTRA WORK FORCES CONSULAR BRANCH TO INCREASE OFFICE SPACE—GREATEST GAINS NOTED IN SHIPMENTS OF SHINGLES AND LUMBER PRODUCTS—MUCH ACTIVITY MANIFESTED IN KOOTENAY AND BOUNDARY MINING DISTRICTS.

Since the new tariff revisions brought into effect last autumn by the United States Government have been in operation the exports from British Columbia have been doubled.

Announcement to this effect was made this morning by Mr. Robert E. Mansfield, United States consul general at Vancouver.

In order to cope with the extra export business which has resulted from the elimination and reductions in the duties on British Columbia commodities, it has been found necessary for the Vancouver consular branch to acquire additional office accommodation and to rearrange the quarters to facilitate the transaction of commercial business.

HOW BUSINESS GROWS.

The increase in the business relations between this Province and the United States was reflected in the comparative statement published in the Province early in January, showing the amount of exports up to December 31. Later returns show that the exports have been practically doubled during the period that the new tariff provisions have been operative.

The greatest gains are noted in the figures for shipments of shingles, lumber of different classes, wood pulp, fish, ore, and bullion. It is the general opinion among those in touch with the lumber situation that the placing of shingles on the free list has imparted a big stimulus to the industry in British Columbia. Much activity in the export trade has been manifested in the Kootenay, Boundary, and other mining districts within the jurisdiction of the Vancouver general consulate, while all along the coast the shingle industry has been given an impetus.

FISHERY INTERESTS PROFIT.

Large quantities of fish are being shipped almost daily from Vancouver, the exports showing a big increase since the adoption of the new tariffs.

Two extra rooms are being provided in the quarters of the consul general. One of these will be fitted up as a trade reference library. Journals covering all branches of industry and catalogues of all the leading manufacturers will be stocked in the room and will be available for reference.

The appointment of a consular agent at Prince Rupert has been recommended by Mr. Mansfield, in order to cope with the increase of the export business from that port and in readiness for the expected development which will follow the completion of the Grand Trunk Pacific Railway. Large quantities of fish are being now shipped to Vancouver for export, and activity in the export trade of shingles and mining products is also expected when transportation facilities are installed. On the completion of the new transcontinental line fish and other British Columbia products will be shipped direct to the prairies and eastern points via the Grand Trunk Pacific.

—

MILLS SHIPPING SHINGLES SOUTH—ALMOST ENTIRE OUTPUT OF BRITISH COLUMBIA INTERESTS IS CROSSING THE LINE—AMERICAN MANUFACTURERS ARE SAID TO BE "KNOCKING" CANADIAN PRODUCT.

Most of the shingle mills in British Columbia are said to be shipping almost their entire output to the United States. Discussing the article in the Province yesterday dealing with the exports from this Province to the United States, a prominent shingle manufacturer stated this morning that 95 per cent of the shingles now being made in British Columbia were being shipped across the border to meet the demand, which has been gradually increasing since the removal of the duty under the new United States tariff revisions last autumn.

Eighty per cent of the shingle mills in British Columbia are now in operation, and the provincial product is being given the preference in all parts of the United States, it is declared. The spring trade has hardly really opened yet, but the demand is looked upon as auguring well for the industry during the coming summer. An indication of the extent of the trade which has been developed during the past few months was given when a dealer, closely in touch with the lumber situation, mentioned that special investigators were sent to Vancouver recently from Washington, D. C., to probe reports to the effect that while shingle mills of the Puget Sound and other districts in Washington had been closed down the industry was flourishing on this side of the border.

A systematic campaign of "knocking" British Columbia shingles has been started by the rival manufacturers in the United States, stated one manufacturer here to-day. In proof of this assertion he produced a copy of a letter which was being widely circulated in order to "head off" the trade in the Canadian article. The letter claimed that the local product was not manufactured or packed properly and that experts were criticizing the output.

Despite the prediction that as a result of the lowering of the tariff barrier American manufacturers would invade the local field and establish mills on this side, it was stated to-day that no definite steps had yet been taken in that respect, although several lumbermen had instituted inquiries along that line. The fact that British Columbia shingles are going south would seem to indicate that there is little chance at present of the American interests entering British Columbia.

Although the demand for British Columbia shingles is now in excess of that existing in the past, the prices are not as good as last year, it is said. Plenty of business is offering, however, and several mills are working at full capacity, and have sufficient orders on hand to keep them busy for several months. The estimate that 95 per cent of the output is going south is questioned by some of the manufacturers, although it is generally admitted that the bulk of the export business is to supply the American markets.

I received the other day a letter from Mr. H. B. McMaster, of the McMaster Mill Co., at Blaine, Wash., which was entirely unsolicited on my part, and I desire to read two or three paragraphs from that letter. The letter is dated February 5, 1914. In it he says:

Was over in British Columbia and made a thorough investigation of things over there, and found at Fort Albernia a sawmill in which there are at least 100 men working; the foreman, head sawyer, engineer, and edgerman were white men; all the rest were Asiatic. At New Westminster, British Columbia, the Royal City Mills, running a large mill day and night, employ all Chinese. The Fraser Mills, the largest in the world, are doing all the work with Hindo labor and other Asiatic help. Port Moody Shingle Co., at Port Moody, running five machines day and night, the filet and engineer were all the white men employed, all the rest yellow. The same conditions exist in the Thorston-Flarselle Mill, and, in fact, all the mills do the work in the same way with this sort of labor at our expense.

In the little city of Blaine there are 22 shingle machines, and all have been shut down since this tariff went into effect, and the men are looking for jobs.

During the month of January, 1913, there were 5 cars of shingles came in at this port from British Columbia, and in January, 1914, I understand there were 70, and believe the same proportion will apply at each port of entry where shingles cross the line.

Here are two or three other letters which I will read:

BELLINGHAM, WASH., *October 30, 1913.*

MY DEAR HUMPHREY: The condition of the lumber and shingle business at the present time is deplorable. Prices are below cost and more than one-half the mills and camps are closed. We had 1,000 men last June. We have less than 500 to-day, and would not have these there but for our foreign business. Canada is dumping trainloads every day, and with their favorable governmental system of stampage and low taxes and Oriental labor they can continue indefinitely. In the endeavor to meet it all wages are 25 cents per day less than three months ago, and another 25-cent drop is very likely. I suppose the Government may investigate, as Mr. Wilson threatened. We would welcome it, but a little investigating before the damage was done would have been more to the point.

Meanwhile prices keep up on the Canadian side, and we can not get over their tariff wall except with rough lumber, which is free.

Consistency is a jewel conspicuously absent from the tariff bill's decorations. Please read page 170, paragraph 20, as issued by Government Printing Office. I suppose the author knows what a "paving post" is; but waiving the point, why are "paving posts, railroad ties, and telephone, trolley, electric light, and telegraph poles of cedar or other woods" protected with "10 per cent ad valorem," while all other products of the great lumber industry come in free? That larger quantities of these particular products are produced in the South than elsewhere is, of course, a coincidence. Ten per cent ad valorem on shingles and manufactured lumber would look good to the owners of idle mills in the Northwest.

Yours,

J. J. DONOVAN.

—

WINCKELMANN & WILDER SHINGLE CO.,
*Fairmount, Wash., December 17, 1913.*

Hon. W. E. HUMPHREY, *Washington, D. C.*

DEAR MR. HUMPHREY: Have just read an article in the Seattle Times telling of your efforts in behalf of the shingle mills in this State in regard to the British Columbia tariff. This is such a burning issue with myself at present that I felt impelled to write you and wish you success in your efforts.

In your speech you said that 194 mills in the State were shut down. Personally, I think this statement is underestimating it, since a few days ago the shingle association issued a list of over 200 mills idle, and my own mill and two others in this neighborhood were not included in this list (although we've all been shut down since November 15), and presume it has been as inaccurate in other localities.

On account of the cheap oriental labor employed in the British Columbia mills and no duty to pay, these mills are running full blast and supplying the American market, while we are forced to keep our mills idle.

It is hard to estimate the thousands thrown out of employment by these conditions. Here in our own community families dependent upon the mills are actually in want.

Personally, I can't see any relief unless the tariff question is amended, and therefore again wish you success in your endeavors.

Very sincerely,

G. WINCKELMANN.

I call attention to the fact that these gentlemen signed their names to these letters, they are not anonymous witnesses, but are men of character and standing, and I place their statements against the anonymous statements brought in by these experts of men whose names they dare not give, neither do they attempt to give any reason for not giving the names of their witnesses.

Again, I quote from the great investigator, on page 52 of the report:

At a conference with between 25 and 40 representative shingle manufacturers in Seattle on the evening of January 23, 1914, the question was presented as to whether or not the depressed conditions in the latter part of 1913 were brought about by any factor that was not present in bringing about similar conditions in 1911. As a matter of fact, the question was never frankly answered. There appeared to be a disposition on the part of the spokesman for the shingle producers to evade the question. One said, "Can't tell until we go through with it." Another said, "No one claimed that a duty of 50 cents a thousand enabled the shingle producer to obtain 50 cents more for his shingles." Finally, it was suggested to the manufacturers that the trouble is that too many people are making shingles. A prominent operator present replied, "That is true."

Here we have the solution of this vexed question, according to this highly intellectual expert, "Too many people making shingles." According to his opinion, that absolutely answers every argument and explains every difficulty. But the fact that we removed the duty and let all the shingle manufacturers in British Columbia directly into our market had nothing to do with the condition where "too many people were making shingles," even if they did have over in that country cheaper labor and cheaper timber. Once more, I quote from this intellectual wonder (report, p. 53):

That the removal of the duty has had some effect in bringing Canadian shingles into American markets can not be denied. The figures for imports show this clearly. A representative of one of the most efficient shingle mills at Vancouver, British Columbia, stated to a representative of this bureau that when the duty on shingles was 30 cents per thousand, they had a considerable trade in the United States; after that duty was increased to 50 cents, they had only a very small business in this country. Since the removal of the duty entirely, they are receiving orders from this country.

As I read page after page of this testimony I am really at a loss how to classify this author that on such evidence as this reports to the Secretary of Commerce that the removal of the tariff has had no material effect on the shingle industry in the State of Washington. It is hard to tell whether he is blindly partisan, intentionally dishonest, or just an ordinary ass. I quote him once more on page 57:

At the same time, as already noted, the removal of the duty in 1913 has been followed by a considerable increase of importations, and it is not unlikely that price has been affected in some measure and that this effect will be permanent.

Here is the case that this expert has been able to make when he himself selects the evidence out of all the witnesses that he could secure, and when he gives such evidence his own construction, and when he does not generally even attempt to quote them literally, and when he simply gives his memory as to what they really say. Let me once more quote from the evidence he furnishes to demonstrate that the tariff did not largely contribute to the present conditions and that no shingle manufacturer was found willing to make such a statement. I read from page 51 of the report:

An official of the Red Cedar Shingle Manufacturers' Association, when asked the following question, "Do you think the manufacturer's ills are entirely due to the removal of the tariff?" said: "No. Supply and demand has a good deal to do with it, and the consumer has not been benefited by it."

Of course, importing shingles from British Columbia in greater quantities than ever before, as the expert says, would have no tendency to increase the supply or affect the demand. He continues:

This official stated in the presence of 25 or more shingle manufacturers and also in the presence of representatives of the Bureau of Corporations.

Mark this statement well. The expert wishes to call to your attention and to demonstrate that what follows was said under circumstances where it can not be denied or its truth doubted. Let me read again:

This official stated in the presence of 25 or more shingle manufacturers, and also in the presence of representatives of the Bureau of Corporations, that immediately after the removal of the duty buying was stopped. That started a poor market. Since that time shingles have been as low as $1.65 for clears, which resulted in a closing down of about 80 per cent of the output of the mills.

I had said only 60 per cent.

"Those mills have all been down until possibly within a week or 10 days (prior to January 23). The reason for starting is not because market conditions are any better, but the mills had all shipped their product out pretty well, and this is the time when business is to be expected." He said:

I am not prepared to say that the tariff has anything to do with it at all. Six months or eight months prior to the tariff having come off Canada had a panic, and their buying had ceased almost absolutely.

Their markets were gone. Their mills were closed. Then what happened?

Prior to that the mills had marketed their product. I guess the Canadian mills were universally down for six or eight months in 1913, when we were running and enjoying a fair business.

Why were the American mills enjoying a fair business, and why were the Canadian mills universally down for six or eight months? Let the witness answer:

They could not get over here. Thirty days before that tariff came off the British Columbia mills started up.

What, then, was the effect of the new tariff law as shown by the evidence quoted in the report of this specially appointed expert that was sent forth to demonstrate that it did not materially affect the industry, and that no manufacturer had so testified? Here is the evidence, and here is what it shows.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. MOORE. Will the gentleman say whether the price of shingles has been reduced to the consumer in the United States by reason of this process?

Mr. HUMPHREY of Washington. So far as I have been able to ascertain, just as one of the witnesses stated here, one of the experts that was placed on the witness stand, it has not benefited the consumer.

Mr. GORDON. Then how has it hurt anybody? If shingles have not come down in price, how has it hurt the gentleman's manufacturers? Will he tell us that?

Mr. HUMPHREY of Washington. Yes; because our mills are shut down, and you are buying your shingles at the same price from British Columbia, manufactured by Chinese labor. Does that hurt anything? [Applause on the Republican side.]

Mr. GORDON. How have the manufacturers whom the gentleman represents here on the floor been hurt if the price has not come down?

Mr. HUMPHREY of Washington. But the price has come down, but not to the consumer.

Mr. MOORE. Manufacturers have been hurt, and the consumer has not been benefited a particle in the price of the manufactured article. I will answer the gentleman from Ohio when the proper time comes.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. WINGO. I want to get some information, if it will not disturb the continuity of the gentleman's remarks. Will the gentleman tell me how many stumpage feet it takes to make a thousand clear cedar shingles?

Mr. HUMPHREY of Washington. No; I can not tell the gentleman. I am not a lumber expert.

Mr. WINGO. What do you pay for stumpage of cedar logs that go into shingles?

Mr. HUMPHREY of Washington. I prefer to yield to my colleague, Mr. FALCONER.

Mr. FALCONER. I will ask the gentleman to repeat his question again.

Mr. WINGO. How many stumpage feet does it take to make 1,000 clear feet of shingles?

Mr. FALCONER. Seven thousand clear shingles are made from 1,000 feet of cedar timber, and 1,000 feet of cedar timber in the stumpage, generally speaking, is worth $2.

Mr. WINGO. Is that what the mills pay for it?

Mr. FALCONER. It is.

Mr. WINGO. What do the mills get in the State of Washington for clear cedar shingles?

Mr. FALCONER. They get about $2.10 for 5 to 2 clears; that is, in a normal market; I do not know what they are getting at this time.

Mr. WINGO. They are selling at $2.10?

Mr. FALCONER. In a normal market; yes. Now, I want to make this statement if the gentleman will permit me. The great bulk of the cost of manufacturing shingles is not in the raw material or product, but it is in the labor and wear and tear. Now, in reply to the gentleman from Ohio (Mr. GORDON), he suggests that other roofing has operated to bring down the price of shingles in this country. Why does not the gentleman's party put the other lines of roofing on the free list? If two men are in a contest and the police power of a State holds one man and lets the other fellow beat him to death, he is sure to go down. That is what is happening in the cedar-shingle industry. Slate, felt, and iron roofing protected; cedar shingles free. [Applause on the Republican side.]

Mr. HUMPHREY of Washington. Here is the effect of the present tariff law on the shingle industry of Washington, as shown by these experts, even from their ex parte, anonymous evidence.

Under the old law all the American mills were running. All the Canadian mills were closed. Thirty days before the new law went into effect, after it had passed the House and every one knew that shingles would go on the free list, the Canadian mills opened up and are now running. Immediately after the new law went upon the statute books buying shingles in this country stopped and 80 per cent of the American mills closed. Free trade closed our mills and opened the Canadian mills. Protection closed the Canadian mills and opened our own.

Mr. WINGO. Will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. WINGO. Has the gentleman any statistics showing the output of the different mills, the number of men at work, and the wages paid?

Mr. HUMPHREY of Washington. That is all in the report, but it is too voluminous to go into now. He reports that there is not very much difference in the labor.

Mr. WINGO. The gentleman did not get my question. I am asking it purely for information, not to enter into any controversy; but has the gentleman any statistics showing the capital invested in the different mills, how many men are employed, and what the annual output is?

Mr. HUMPHREY of Washington. There are about 15,000 men employed in the shingle industry in Washington at the present time. Now, going back to show what this evidence discloses, it shows that free trade benefits the foreigner. Protection benefits the American. No better illustration could possibly be given of the working of these two tariff systems than comes from the lips of the anonymous witnesses quoted by these special experts in an effort to bolster up a report that was already agreed upon before the so-called evidence was either submitted or obtained. It was stated in the papers long before the report was made by Secretary Redfield, if he was correctly reported, that such report would be satisfactory to the administration. It had to be. Simple matters like facts or truth would not be permitted to interfere. The expert had to report that he had found the conditions as he was instructed to find them. Once more let me refer to the report. On page 51 it states that 80 per cent of the mills closed following the removal of the tariff, as I have already quoted.

On page 57 it says that the removal of the duty increased importations and affected the price, and that that result will be permanent.

On pages 44 and 45 is found this statement:

> More shingles were imported into the United States during the months of November and December, 1913, than during any other two months within the past three years. The increase, however, has not been as great as some protectionists predicted, nor have the imports very greatly exceeded those of some other months in past years.

But it does show that it did exceed that of any other two months in the entire history of the shingle industry in the State of Washington. Let me read one more quotation from this expert who discredits and impeaches upon every page of this report the statements made in the letter written by Secretary Redfield. On page 77 is found this language:

> When the shingle mills and lumber mills close, as a matter of course, those who had been employed in those mills become idle. To the extent to which the mills were closed in the State in December, 1913, to that extent was the number of unemployed increased.

Then he says on the same page:

> In December, 1913, and at the present time there are probably more unemployed persons in the State of Washington than have been found there in any year past.

So the expert finishes his report by showing the industry to be in a much worse condition than I had stated. I had stated that 60 per cent of our mills were closed. He states than 80 per cent of them were closed. I have stated that a large number of men were idle. He stated there were more idle men in the State of Washington last December than ever before, even exceeding the awful times we had back under Grover Cleveland.

I call the attention of my Democratic colleagues to that statement. I have never used language so strong in regard to the situation in my own State. Every time I have mentioned that men were out of employment that side of the House grew frantic with resentment. Here is the testimony of your own hired, specially appointed expert. It is now in order to denounce and revile him and to hold him up to contempt and scorn as a "calamity howler."

Here is the summary of the evidence in this report taken by a partisan and prejudiced investigator from his own anonymous and expert evidence, translated and colored, misrepresented and construed to the extent of his limited ability, in an attempt to make it show what he wanted it to show and what he was expected to make it show as the price of his job, shown without the chance of explanation or cross-examination, or any other opportunity to learn the truth except as this expert was unable to conceal it.

At the risk of repetition let me again say: This evidence shows, first, immediately following the removal of the tariff 80 per cent of the shingle mills in the State of Washington closed; second, immediately before the removal of the tariff the closed mills of British Columbia began running at full capacity; third, following the removal of the tariff more shingles have been imported into this country than ever before; fourth, following the removal of the tariff there were more idle men in the State of Washington than ever before.

Such is the evidence, and yet Mr. Redfield solemnly asserts that the removal of the tariff has had no material effect upon the shingle industry in the State of Washington. Several gentlemen on the Democratic side of the House were much perturbed the other day when I said that I would show that evidence contained in the report of his own expert contradicted practically every statement made in the letter sent to me by Secretary Redfield, and to Mr. UNDERWOOD and given to the press. I leave it to this House and to the country if I have redeemed that promise. Mr. Redfield, in his letter to Mr. UNDERWOOD, expressed the desire to have his statement given wide publicity, and in "that consummation devoutly to be wished" he shall not fail through any fault of mine.

In the State of Washington we are suffering from this Democratic administration only as they are suffering everywhere throughout the Nation. Our markets have been largely taken from us and given to the foreigner. But the official figures show that this is general throughout the country. We have in Washington more idle men than ever before, says the expert, but idle men are found in every town and city. Everywhere throughout the Nation the soup house has superseded prosperity. Such is the condition at home after one year of Democratic administration under the benign influence of the "New Freedom."

Our foreign policy has become a national disgrace. We stand distrusted and discredited, our prestige destroyed abroad. A frantic effort is now being made to cover up the egotistical stupidity of this administration with the Hay-Pauncefote treaty. To such low estate have we fallen that at the price of self-respect we are trying to purchase friendship. In this day, under this Democratic administration, as we look at conditions at home and abroad, it has become, indeed, a proud distinction to be an American citizen. [Applause on the Republican side.]

I will insert in the RECORD the letters of E. E. Case and H. B. McMaster, from which I have heretofore quoted. I will also insert an article from the Seattle Times of March 10, 1914, in reference to the effect that the repeal of the law giving American ships the right to pass through the Panama Canal without payment of tolls will have on the lumber business of the Northwest.

McMASTER MILL CO.,
*Blaine, Wash., February 5, 1914.*

Hon. WILLIAM E. HUMPHREY,
*House of Representatives, Washington, D. C.*

DEAR SIR: I wish to write you regarding restoring the duty on red cedar shingles, as the present free entry of shingles into the United States from British Columbia is working a hardship on the people of this immediate vicinity, and in the same way effects the residence of other places as well.

I believe if the situation is once thoroughly understood by our Democratic friends they will cheerfully correct the hardship caused us. It is not a question of price so much as it is a question of getting the business. Star A Star shingles are to-day worth $1.55 per 1,000, and under the former tariff we sold them as low as $1.45, and were glad to get it.

We are but a small mill company and buy all of our timber supply from the small farmer in the immediate vicinity, who dig up stumps where the large cedar trees were logged off many years ago and logs that have laid under the Pacific coast moss for ages and are fit for nothing else, not being good for fire wood, but such is the quality of the cedar here, although it makes the best kind of shingles.

Those farmers who are clearing the land sell each one a few cords of bolts, and the boys earn fair wages working at sawing and packing the finished shingle in the mill when we can run our mill, but now the orders are going across the line and the good United States money instead of being used to clear our own land is going into the pockets of the Japanese, Hindus, and Chinese of the Dominion of Canada.

Was over in British Columbia and made a thorough investigation of things over there and found at Port Albernia a saw mill in which there are at least 100 men working; the foreman, head sawyer, and engineer and edgerman were white men, all the rest were Asiatic. At New Westminister, British Columbia, the Royal City mills, running a large mill day and night, employ all Chinese; the Fraser mills, the largest in the world, are doing all the work with Hindu labor and other Asiatic help. Port Moody Shingle Co. at Port Moody, running five machines day and night, the flier and engineer were all the white men employed, all the rest yellow. The same conditions exist in the Thurston-Flarselle mill, and, in fact, all the mills do the work in the same way with this sort of labor at our expense.

In this little city of Blaine there are 22 shingle machines, and all have been shut down since this tariff went into effect, and the men are looking for jobs.

During the month of January, 1913, there were five cars of shingles came in at this port from British Columbia, and in January, 1914, I understand there were 70, and believe the same proportion will apply at each port of entry where shingles cross the line.

Hoping that you may be able to show our friends in Washington, D. C., how we have struggled along for years.

I have been manufacturing shingles in this State for 25 years and made a living, as well as did the others, but now since the orders are going into British Columbia to be filled it makes it hard on us all. We would be willing, and always have been willing, to sell at the same prices if they will give us the business.

Yours, very truly,

H. B. MCMASTER.

—

[From the Seattle Times, March 10, 1914.]

TOLLS MESSAGE BLOCKS HUGE TIMBER DEAL—MONEY WAS AVAILABLE FOR VAST HOLDINGS AND SALE ARRANGED BY MICHAEL EARLES, BUT SYNDICATE QUITS—BRITISH COLUMBIA MILLS GET PREMIUM—LUMBERMEN POINT OUT FREE LIST FOR AMERICAN PRODUCT, WITH CANAL TOLLS, PUTS NATIVE INDUSTRY OUT OF RUNNING.

President Woodrow Wilson's message to Congress, urging that the exemption from tolls to American ships passing through the Panama Canal be repealed, blocked a $1,000,000 deal in timber and sawmills that had been practically consummated between eastern capitalists and Washington lumbermen.

The deal had been arranged by Michael Earles, president of the Puget Sound Mills & Timber Co. The money was available and cash would have been paid last month for vast timber holdings in the Northwest and sawmills located on Puget Sound. Just as the deal was to have been consummated the President's message demanding that Congress withdraw the exemption from tolls given American shipping was published and the eastern syndicate abandoned the project.

American lumber placed on the free list and American vessels compelled to pay tolls in passing through the canal means granting to British Columbia mills a premium to compete for the trade of the Atlantic coast, according to such well-known lumber authorities as Michael Earles, E. G. Griggs, E. G. Ames, C. D. Stimson, and others.

There is a margin of $3.25 per ton in favor of British vessels plying between British Columbia ports and New York as compared with American vessels running from Seattle to the same Atlantic coast point.

And, in addition to this advantage, E. G. Ames pointed out to-day, the Navy Department is chartering foreign bottoms to transport coal to the Puget Sound Navy Yard at a rate which would enable them to carry lumber from British Columbia to Atlantic coast points at $4.50 per ton or less. The rate in American vessels can not be less than $11 or $12 with exemption from tolls, and it would have to be raised to meet whatever tolls would be paid under the Wilson program.

It was pointed out to-day by a big Seattle shipping firm that at the rates the Government is paying foreign shipowners for transporting coal the vessels could afford to return practically empty, and anything gained as freight for the return trip would be so much added profit.

While the Government can employ foreign bottoms in its own carrying trade the west coast lumbermen must use American bottoms in shipments to the Atlantic coast.

C. D. Stimson said to-day that Robert Dollar has declared that if the exemption to American ships is withdrawn he will place his entire fleet in the Dollar Line under the British flag. H. W. Meyer, head of the lumber-exporting department of Hind, Rolph & Co., insisted that if the administration plan is adopted it will mean that, in so far as this coast is concerned, the Panama Canal has been built with American money for the benefit of British Columbia.

E. G. Ames, of the Puget Mill Co., estimated to-day that on a steel sailing vessel carrying lumber from Puget Sound to New York the addition of canal tolls would mean an extra cost of $1.33 per ton on lumber and 13 cents per thousand on shingles.

"With the cheap tonnage available to British Columbia mills it simply means that we are driven out of the Atlantic seaboard market that we thought was to be opened to us with the completion of the Panama Canal," said Mr. Ames to-day.

MILLS UNPREPARED.

"I do not believe that the coast mills of British Columbia favored putting lumber and shingles on the free list, for they feared that action would mean opening up new mills and overcrowding the British Columbia markets. But now that we propose not only to provide for free lumber and shingles, but to compel American manufacturers to ship to coastwise points in American bottoms and compel those vessels to pay the full canal tolls, we have actually offered a bonus to British Columbia mills to come in and steal our markets.

"Some of the foreign countries rebate to their shipowners the cost of canal tolls. Others pay a bonus to shipowners engaged in world-wide trade. All foreign vessels are operated far more cheaply than our American boats. If we have to compete with a nation that pays a bounty or rebates tolls with vessels already overtaxed, it is easy to see that the shippers must go out of business.

"The canal is apt to work a serious loss to the Pacific Northwest. We are now in competition with the yellow-pine manufacturers of the Southeast in Atlantic coast points, but because of low rates they have enjoyed and the enormous rates we have had to pay for all-rail hauls we have gotten only a small portion of the high-class business. In the meantime, however, we have controlled the business of the west coast of South America. We have sold a large share of the lumber consumed at Montevideo, the big lumber market of the east coast of South America.

"With the opening of the canal the yellow-pine manufacturers will be brought closer to the west coast of South America than we are. The Democratic administration, which put sugar on the free list, already has destroyed our market for lumber in the Hawaiian Islands.

"On top of these disasters we are now compelled to face the danger that the administration will force the transfer of the lumber business from Washington and Oregon to British Columbia."

CHEAP LABOR ACROSS LINE.

Michael Earles pointed out to-day the fact that the British Columbia stumpage is easier to hold than stumpage in this State or Oregon, because it was held under leases and on a small tax. He showed, too, that oriental labor employed in the British Columbia mills is paid less than half as much as American workmen on this side of the line, and that manufacturing costs generally were lower in British Columbia.

"The lumber trade used to figure that the duty of 30 cents on shingles, $1 per thousand on rough lumber, and $2.50 on finished lumber gave us an equal show with British Columbia," said Mr. Earles. "First, then, the administration removes this duty, and now it proposes to expose us to the peril of competition from manufacturers who can both manufacture and ship cheaper than we can.

"The prospect for procuring trade on the Atlantic coast was difficult enough in any event, for we had to compete with the yellow-pine manufacturers, who are right at the door of the new Atlantic coast markets and whose colored labor works longer hours than our men for $1.50 a day.

"It was estimated that we would be able to lay down our lumber in New York at a transportation cost of about $12 per thousand. We would have to use American bottoms alone in our trade. If we are compelled to pay the canal tolls in addition we can not figure on a rate lower than $13 or $14 per thousand, possibly even higher, especially on green lumber. In the meantime British Columbia manufacturers, enjoying the cheaper carrying rates of foreign ships, can use any carrier that comes to them and dump their protected products into our own markets at figures against which we can not compete."

WILL CHANGE REGISTRY.

C. D. Stimson said: "I have been in communication with Robert Dollar, who is now in Washington, D. C. He is the owner of 10 steamships, one named for each member of his family. Six of these ships are now under the British flag, and four of them have American registry, in the coastwise trade. And he has intended to retain them under the American flag, inasmuch as the exemption of the canal tolls would have amounted to $1 a ton.

"But if there is no exemption, if the act remitting the canal tolls is repealed, and American ships are placed exactly on the same basis as the ships of other nations, Mr. Dollar declares he will be obliged to transfer these four ships to British registry.

"The reason is convincing. Owing to the British regulations and the ability of British shipowners to get cheaper crews and to run ships at less expense, there is a margin of $3.25 a ton in favor of those ships in the transportation of freight between the Straits of Fuca and New York.

"It follows naturally that all such ships will abandon the American flag. They will be transferred to the British flag. And it will be inevitable that freight from the Pacific Northwest will not be carried in American ships. The cities of British Columbia will be able to handle cargoes at a greater profit of $3.25 a ton than can the cities of Puget Sound. The instant effect of the repeal of the law as it stands now will be to favor Canadian ports at the expense of Seattle and other American ports."

H. W. Meyer, head of the lumber-exporting department of the great shipping and exporting house of Hind, Rolph & Co., and recognized in the commercial and industrial world as one of the country's ablest experts in his own specialty, to-day said:

"It is a question of life or death to the Pacific Northwest States. It is a question of the living or starving of hundreds of thousands of laboring men and their families in these States. If the national administration succeeds in its efforts for the repeal of the clause in the Panama Canal act exempting American coastwise ships from the canal tolls, it will simply mean, as regards the Pacific coast, that we have constructed the canal with our own money for the benefit of the lumber interests of British Columbia.

ATTITUDE RIDICULOUS.

"The attitude of the present Government in regard to the canal tolls," he declared, "is absolutely ridiculous and absurd, but as a Boston newspaper very accurately put it, we have to look for the transcontinental railroads. They are the nigger in the woodpile. The railroads want the repeal of the exemption clause, as they know, much better than the lawmakers, that the repeal of the clause will knock American shipping on the head. In this matter the lawmakers should consider the difficulty of operating high-priced American ships in competition with the ever so much cheaper foreign tramp steamships.

"The lawmakers at Washington evidently don't know that the foreign tramp steamship can be operated at almost two-thirds the cost of operating an American ship.

"At present they are now selling new 10,000-ton steamships in England for approximately $400,000, whereas the estimates on this coast for ships of the same size and construction mount up to $700,000, while in the Atlantic market the price is close to $600,000.

"The cost of operating foreign steamships is so much smaller than the same cost for American ships that there is nothing in common between the two sets of figures. The wages paid Norwegian, German, and British sailors fluctuate between 4 and 5 pounds sterling, or about $20 to $25 a month, as against an average of $35 a month paid by American ships to their sailors. Moreover, the American sailor must be well provided with substantial and wholesome food, while the foreign sailor is satisfied with whatever he can get.

"The American shipping laws require that all vessels flying the American flag must be built in the United States and be manned with American crews. These crews are unionized. This will help to explain the difference in the cost of operating foreign and American ships.

"It is quite plain, therefore, that American-built ships already are laboring under a heavy handicap in their competition with foreign ships. This handicap should be relieved by levying tolls on foreign ships passing through the canal instead of being made still worse by placing the foreign ships on the same footing as the American vessels in that respect."

—

CASE SHINGLE & LUMBER CO.,
*Raymond, Wash., February 27, 1914.*

Hon. W. E. HUMPHREY, *Washington, D. C.*

DEAR MR. HUMPHREY: I beg to acknowledge receipt of your letter of the 20th instant, inclosing a communication from Secretary Redfield in reply to your challenge to him to investigate the shingle and lumber business of the State of Washington and the effect of the tariff removal on it.

Regarding this report of Mr. Robertson's, in the first place, it is quite evident that the Department of Commerce was far more anxious to seek to discredit some portion of the remarks you addressed to its head than they were to ascertain the true condition of the lumber and shingle manufacturers of the Northwest.

The questions propounded by Mr. T. M. Robertson in his inquiries of the shingle manufacturers of the Pacific coast during his examination into the shingle industry were principally directed toward trying to secure an admission that it was no uncommon occurrence for the mills to be closed during the winter months, and that the closing of them during the latter part of 1913 was not directly the result of the removal of the tariff. While it may possibly be true that the closing of the mills was not altogether due to the removal of the tariff, admitting that it has been customary or necessary for the shingle mills in the State of Washington to discontinue operation for a certain period of each year, it would still be more reason why shingles should not have been admitted free from British Columbia, because, if there was not a market to allow the manufacturers here to operate their plants steadily, which Mr. Redfield's report would indicate, was principally

not what he was trying to prove, that it was an injustice to white labor of this country to admit, duty free, shingles from British Columbia that were manufactured almost entirely by Chinese help. It is a very evident fact that the admittance of shingles duty free from British Columbia did not in any way help our condition, nor, in fact, has it proven of any material help to any other class of American citizenship.

By consulting the customhouse reports of the imports of shingles during the latter part of 1913, you will find that there was a very large increase over the months in the early part of the year. If Mr. Robertson and Mr. England had been as energetic in ascertaining the true condition as they were in trying to get information to discredit some of the minor statements in your charges, they could have gathered a world of information in regard to the shingle industry in the State of Washington.

In giving you some data to aid you in compiling your answer to Secretary Redfield, I shall begin at statement No. 1 and answer them in turn.

Statement No. 1 we will concede to be practically correct.

Statement No. 2 is perhaps partly correct. There is no way for Mr. Robertson or Secretary Redfield or the shingle manufacturers from the State of Washington to tell to just what extent the closing of the mills during the latter part of 1913 was due to the removal of the tariff except by consulting the customhouse report as to the increase of imports of shingles. As I previously stated, by consulting the records of the customhouse you will find that there was a very large increase in the imports of shingles during the latter part of the year; a great many dealers throughout the Middle West withheld their orders during the agitation for free lumber and shingles, and as to the actual effect it had on business it is impossible to say. A great many believe that with the removal of the tariff the prices would be lower and withheld their business on this account.

Statement No. 3 is absolutely incorrect. The shingle manufacturers did everything in their power to get evidence before Congress and before the committees to show the disastrous effect the removal of the tariff would have on the shingle industry in Washington, but, as I understand, we are never allowed a hearing of any kind. There has been a general feeling among the shingle producers that the removal of the tariff would work a hardship on the manufacturers that would mean nothing less than ruin to many of them.

If statement No. 4 is part of the report of Mr. Robertson, I am surely very much surprised. I am at a loss to know in what way it would be possible to garble the information that he had at hand to conform to a statement of this kind. I am not going to make any further comments on this statement, but will give you the actual figures showing the labor cost of manufacturing shingles in British Columbia and Washington.

Practically all of the shingles in British Columbia are manufactured wholly or in part by Chinese labor; approximately about 90 per cent of the labor used is Chinese and 10 per cent white. The Chinese labor is mostly under the contract system; they contract for the manufacturing of the shingles, from the water to the dry kiln, during the winter months at 28 cents per thousand, and, in some cases, during the summer months at 30 cents per thousand.

This is the full labor cost with the exception of a filer at about $5 per day, the engineer at about $100 per month, and the night watchman at $75 or $80 per month. In a mill cutting 100,000 shingles per day, for example, the cost per thousand would run:

| | Cents. |
|---|---|
| Contracted labor | 28 |
| Engineer | 4 |
| Filing | 5½ |
| Night watchman | 3 |
| Total | 40½ |

In a mill in Washington, operated under the most favorable circumstances and strictest economy, the cost for the same work would total exactly 57 cents per thousand. These are the actual figures taken from my own experience and observation. How a man could conceive the idea that there was no difference in the labor cost in the two countries I do not understand.

You may tell Secretary Redfield for me that though the oriental labor is said not to be as efficient as the white labor of this country, if he will make it possible for me to get a crew of Chinese as they have in the mills of British Columbia I will pay the same wages as they do there and give him a check for $10,000 a year as a bonus.

Right here let me say that I am unable to see how these gentlemen are able to harmonize the statement "The oriental labor employed in British Columbia shingle mills is less efficient than white labor" with their other statement that "they produce a better shingle." His report says, "While a great many Chinamen are employed in the mills of British Columbia, their work is not as efficient as the white men."

I wish to call to the attention of Mr. Redfield's special representative here that while on a visit to British Columbia I called his special attention to the facts that where white sawyers were employed in the mills that there were found the poorest quality and poorest manufactured product of any of the mills visited.

In our own market we find the competition with the Canadian shingles very keen, not on account of quality but on account of price. Everywhere in our territory we find them encroaching on our markets. Only last week one small concern with which I am well acquainted bought 50 carloads of shingles from British Columbia. In statement No. 5 they were a little more liberal. As to this I will give you a comparison as to values of timber in Pacific County, Wash., and in British Columbia. In our county the average value of one section of 640 acres of timber is approximately $80,000; the interest, which we could not hope to get at less than 6 per cent, would amount to $4,800 per annum, and the taxes are approximately $1,500, making a total overhead carrying cost of $6,300. The timber on a section in British Columbia the manufacturer can buy from the Government at a cost of 50 cents per thousand feet, payable as the timber is removed. A license fee of $150 per year covers all taxes and all overhead carrying costs for a period of 20 years. There is no investment; there is no tax; there is no interest to pay. He has 20 years in which to remove the timber, and then only has to pay for what he actually takes off, enabling him to select a higher grade of logs; while on this side of the line, when a man buys a piece of timber he has to remove it all to keep the stumpage rate down to where he can live. Did it not occur to these gentlemen or to Secretary Redfield that possibly the fact stated, "The Canadian mills do not cut their timber as closely as the American mills, and consequently there is more waste," indicates directly the contrary to that other statement, "The advantage they have in the cost of timber is not as great as appears from a comparison of prices of logs in the two countries"? Why then can they afford to waste?

On the contrary, they would have one infer that the American manufacturer had a decided advantage because he could not afford to waste.

The very fact that they can select their timber is also one of the reasons why the Canadians can afford to make a better shingle than many of the American manufacturers find possible, and thereby are helped to capture the American market.

As to statement No. 6: The American manufacturers are not abandoning their mills, nor are they moving to British Columbia, probably because they feel a good deal like a man at sea in a disabled ship with no help in sight. They do not abandon their mills, because the majority of them would not have anything to go anywhere else and go into business with. I venture to say that Mr. Robertson did not visit one mill or meet one manufacturer in the State of Washington who would not have been glad to sell his plant for a much smaller sum than the cost of the plant, less depreciation. Furthermore, there is probably not in the State of Washington 10 mills that you could not buy at a round 60 cents on the dollar of the estimated value, based on the actual cost. It is true they are not moving their mills to British Columbia, but a great many of the manufacturers are going to British Columbia to build new mills, and hundreds more would go if it was possible to dispose of their interest on this side to obtain means to go into business over there. This is the main reason why more do not go across the line to embark in the shingle business. There is, however, one other reason—that is the hope that shingles will not remain on the free list for any length of time.

It is true that some new mills are being built and old ones enlarged. It would, indeed, be a very sad state of affairs to think that a business of the proportions of the shingle industry in Washington could be so utterly ruined by the enactment of a tariff law that no man, under any circumstances, would dare to rebuild a burned plant or enlarge an old one, or that business would be so desperately bad that no one would embark in it under any consideration. The latter part of statement No. 6 would lead one to infer that the shingle business of Washington is in a prosperous condition. On the contrary, the new mills being built are very few, indeed.

If Mr. Redfield understood the conditions under which logging operations were carried on in the State of Washington, that cedar is scattered throughout the forests, and that it must be removed with the other timber at the time that the logging is carried on or will be an utter loss, as cedar is very easily destroyed by fire, and practically all logging operations are burned as soon as the timber is removed, therefore it is necessary for the large operators to remove their cedar when they remove their other timber, and makes it necessary for some of them to rebuild their mills or construct new ones.

Statement No. 7: It is true there has been no material reduction in wages in the shingle mills. Under present conditions about the only thing a shingle manufacturer finds it possible to do when prices get so low that shingles can not be manufactured is to close the mills. He has no chance to procure labor at oriental prices.

However, if the statement reading "in only a few instances have there been wage reductions in the lumber mills" had been exactly reversed, it would have been absolutely correct. In a great many mills, of which I have knowledge, there has been one, and in some cases two, cuts in the last six months. I do not know of a single locality in the State of Washington where wages have not been reduced in the lumber mills, except on Willapa Harbor. The manufacturers of Willapa Harbor have not cut wages of their old employees, but for months all new men have been taken on at about 25 to 50 cents a day less than was paid in the middle of 1913.

Regarding statement No. 8, there has never been a time during my residence of 20 years in the State of Washington when there has been as many idle men in this region as during the fall and winter of 1913.

Statement No. 9. It is true that substitutes for shingles have made some inroads into our markets, but while some manufacturers may fear the substitutes as much as the competition of the Canadian shingles, a little time will demonstrate to all the manufacturers of shingles on this coast that the competition of Canadian shingles will hurt them far more than all the substitutes on the market. The history of substitute roofing is that no man uses it the second time, while Canadian red cedar shingles will always be in demand as long as there is no duty.

The rest of the letter is confined expressly to what I stated in the opening of this letter, that nearly the whole time of the investigation was directed toward the immaterial object of trying to discredit the accuracy of some of the statements contained in your challenge to Secretary Redfield.

I wonder if the Secretary stopped to consider how absurd is the statement: "A large number of the unemployed men in the State of Washington have come from British Columbia." They would lead you to believe that unemployed shingle weavers from British Columbia came across the line to increase the number of our unemployed. I suppose that Secretary Redfield is aware that no Chinese are allowed to enter the United States, and I venture to say there has not been 10 white shingle weavers crossed the line into the United States in six months' time. Ninety per cent of all the men employed in British Columbia in the shingle mills are Chinese; the bolt cutters are either Hindus or Japanese.

It is not true that many of the shingle mills of British Columbia have been closed the past winter, but very few have been closed. By far the majority have been operated steadily since the removal of the tariff.

One of the oldest manufacturers of shingles in British Columbia told Mr. Robertson in my presence that with a duty of 20 cents per thousand they could profitably ship their surplus shingles, but that 50 cents per thousand shut them out. It is also a fact that millions of shingles were shipped into the United States when the duty was at 50 cents.

One of the largest manufacturers in British Columbia, the Hastings Mill Co., has been shipping a great percentage of their cut into the United States for several years, even with a duty of 50 cents. While it is true that in some cases they have received a higher price for their product than some of the American mills, in no case have they obtained anything near the difference made by the tariff. Usually their price averages about 20 cents per thousand above the market price for the usual grade of shingles.

There are manufacturers, however, in the State of Washington who at great pains and at considerable cost make a product that is just as good, just as nicely manufactured as anything across the line.

In regard to the efficiency of the Chinese, in the investigation that I have made in British Columbia I find that in packing and grading they have no equals. They are far more efficient than most white men. When you once get them taught how to do their work you have no further trouble with them, while with our white men it is necessary to keep an inspector continually in your packing and sorting room to watch the quality of the work.

As to the statement of the shingle manufacturer who owns mills on both sides of the line saying that his cost of operations is no less in British Columbia than in the State of Washington, I will refer you to the schedule of labor and the price of timber as stated in the fore part of this letter.

Immediately on the removal of the tariff on shingles British Columbia more than doubled her export duty on logs, and in some grades placed it as much as four times that which it was previously during the high tariff on shingles.

I am not complaining on account of British Columbia doing this only to show that they use some business sense and want to give their own manufacturers the benefit of using the raw material in their own country. One of the worst features in the removal of the tariff at the present time is that the British Columbia manufacturers will use the United States for their dumping ground for surplus stock. To-day the price of cedar shingles throughout Canada is $2 per thousand for six to two shingles, while they are dumping them by the millions on the American market at $1.75 to $1.80, and in some cases even less.

The surplus that British Columbia has to market outside of her eastern Provinces is about 10 per cent of our entire consumption. If we had an overproduction before, and according to Secretary Redfield's letter we could run but 10 months in the year, and you can readily see what an additional 10 per cent is going to have on us.

Their attitude reminds me of a doctor at the bedside of a patient to whom he has prescribed an overdose of strychnine, as he smoothly and plausibly explains to the despairing man and his assembled friends, "You are not dying, it but seemeth so, and if perchance dying it be there were surely some other cause. Grippe maybe, or the inclement weather." Such a one would be capable of comforting himself and others if he dared with a further fine philosophy that death itself after all were but a proper and natural state. However, one can not imagine any great amount of comfort in all this for the patient.

Antidotes and corrections for the state of business in the Northwest was not what they were sent for, but a justification for the fine-haired folly of their superiors. Any man knows that if he takes strychnine in the proper quantity it will kill him; if a man will take enough of the shingle business under existing conditions, it will break him; one is just as sure as the other, and yet Secretary Redfield has gone to a great deal of pains, with considerable cost, to try to prove to you that this brand of strychnine won't kill.

The removal of the tariff, as I understand it, was for the purpose of reducing the cost to the consumer. I will defy Secretary Redfield or any other man connected with the tariff legislation to point out one single instance where free trade on cedar shingles has reduced the price to the consumer one cent per thousand. On the other hand, the day is not far distant when American labor will be compelled to compete with oriental labor in the manufacture of shingles. It is going to be impossible for the American manufacturers to continue to maintain the scale of wages now being paid and compete with the British Columbia mills.

We have a very small degree of sense left, although we are in the shingle business. It was not necessary for us to take this dose to know that some one had to die. I repeat again that I do not believe there are 10 mills in the State of Washington that are not now for sale under value.

A statement is made by these gentlemen that some mills were bankrupt due to bad management. This is along the line of the rest of their remarks. I would like to know how, in the very limited time at their disposal, they ascertain that these mills were bankrupt from bad management.

The whole sum and substance of his letter is not to show the actual conditions existing with the shingle manufacturers of this coast compared with those of British Columbia, but to try to discredit the best judgment and experience of the manufacturers on the Pacific coast.

I spent between five and six days with Mr. Robertson while he was in the Northwest, and gave him every opportunity to see both sides; gave him our actual reports for the cost of labor during the past three years, showing a steady increase; went with him to British Columbia and visited the mills there; had the manufacturers tell him the actual wages paid their men; showed him the class of men who worked in the mills; and brought him to our own plants and showed him the highest class of labor there was in the shingle mills of Washington.

I am unable to see why any man or set of men should attempt to drag down American labor to a level with the oriental labor without any American receiving any benefits whatever from so doing. Certainly no one in this country benefited in any degree by the removal of the tariff, unless it might be the shingle broker and, in some instances, the retail dealer; the manufacturer and the mill employees were injured and the consumer was not benefited by the change.

Trusting the above will be of use to you, and wishing you the very best of success, I am,

Very truly, yours,

E. E. CASE.

Mr. SPARKMAN. Mr. Chairman, I yield 30 minutes to the gentleman from Iowa [Mr. VOLLMER].

Mr. VOLLMER. Mr. Chairman, the European critic, that finished product of 2,000 years of culture and restraint, says that we Americans love to deal in superlatives. I believe that the charge is true. Our modest answer is that we are a superlative people, not necessarily the superlative of excellence, for we sometimes beat the world in the other direction, but we hate to be tamely mediocre. We have not been brought up in that way. We live in a stupendous country. We have a wonderful history. The achievements of our people, the influence of our environment, the very air we breathe cause us to speak, to think, and to act frequently in superlative superlatives.

In this proud sisterhood of States the one which I have the honor in part to represent on the floor of this House is content with claiming nothing less than unquestioned supremacy as the greatest farming State in the Union.

The rolling prairie between the fortieth and forty-fourth parallels of north latitude, which is folded in loving embrace by the limpid silver of the Father of Waters on the east and the tawny gold of the Big Muddy on our western slope, is a garden of the Lord, which, in the liquid music of the Indian tongue, was appropriately named "Iowa, beautiful land."

From the day when the first meadow lark intones her song of spring, which no Mendelssohn, no Mozart, or Grieg, or other inspired human genius can approach in its glorious motif of the ever-recurring miracle of the rebirth of nature, till that perfect season in the Middle West, known as the Indian summer, when "the frost is on the pumpkin and the fodder's in the shock," the 60,000 square miles of Iowa soil are one vast workshop for the production of what Dick Oglesby called "the corn, the corn, the royal corn, which has within its yellow heart enough of food and wealth for all the nations." Four hundred million bushels is that State's normal contribution to the wealth of nations in a single year; and as scientific methods of seed selection, soil analysis, intensive cultivation, and improved processes as taught at our great agricultural school and experiment station at Ames and its extension courses for our farmers are more widely disseminated and more thoroughly understood and applied I expect to see a vast increase not only in the total production but in the production per average acre; and I believe we will live to see the day when we will have not only a billion-dollar Congress but a billion-bushel State, and that State will be Iowa—peerless Iowa.

Mr. HUGHES of West Virginia. Will the gentleman yield?

Mr. VOLLMER. I will.

Mr. HUGHES of West Virginia. I desire to ask the gentleman a question.

Mr. VOLLMER. Yes, sir.

Mr. HUGHES of West Virginia. I heard a distinguished gentleman from Iowa make the statement——

Mr. VOLLMER. My time is limited.

Mr. HUGHES of West Virginia. Just a short question.

Mr. VOLLMER. I can not yield to the gentleman for a stump speech.

Mr. HUGHES of West Virginia. I only want to ask this question. He stated that the people in Iowa could not go barefooted because the ground was so rich that it would make them grow too large. Is that so?

Mr. VOLLMER. That is pretty nearly correct.

In that State I was born, and have lived with but short absences the 46 years of my life, and since arriving at man's estate have constantly been dealing professionally and financially with the farmer. Surely I ought to be reasonably familiar with his past and present condition and entitled to make some guess at his immediate future, because all my interests are absolutely bound up and intertwined with the material prosperity of the farmers of the Middle West, and particularly of Iowa.

Judge, then, of my amazement on coming here to be forced to listen to obituaries on the farmer by stand-pat Republican orators, shedding crocodile tears because of his alleged moribund condition; to have to listen to statements that conditions in that industry are so bad out there where I come from that the Agricultural appropriation bill must be passed, forsooth, as "first aid for wounded industries" and "Red Cross for the dead." Under the hypnotic spell cast upon me by these woeful Jeremiahs of calamity I began to see things. Under the influence of this oratorical dope I saw the great farming industry of my section give up the ghost, which thereupon proceeded to cross the River Styx in a goodly company of other industrial shades, all howling to the moon about the wholesale murder perpetrated upon them by the Democratic Congress in its recent tariff legislation.

This would have been a fine subject for an imaginative picture by Gustave Doré, fit to rank with his pictures of Dante's Inferno; but I shall ask you to let go of the pipe and come out of the land of dismal dreams, back to serious, sober, solid facts.

A pretty good index to the prosperity of the farmer is the price of his land, upon which and with which his industry is carried on. In my county I have seen it go up from $50 to $250 per acre, and still going up. Some of it has recently been sold as high as $300 per acre, and this is all land which was homesteaded 60 or 70 years ago at $1.25 an acre. Many of the best judges refuse to set a limit on its further increase in value short of $500 an acre when fully improved with buildings, drainage, silos, and so forth.

It is a resistless tendency, due to increase of population in the world at large at geometric ratio, while the increase of cultivated area is only at arithmetical ratio, and in consequence land not only in Iowa and the Middle West but all over the country where they have fertile soil and good climate and Anglo-Saxon people is bound to continue to rise in value. It is not necessary to hearken back to the theories of Malthus and Henry George, but to ponder the figures submitted in the very able report on the Agricultural appropriation bill, showing a constantly growing disparity between increase of population and food supplies in this country, in order to be convinced that this

is established beyond possibility of doubt as a fundamental fact, with which statesmen and economists must reckon.

Mr. Chairman, there is not a town of any size in the Middle West which has not its quota of retired farmers who have grown wealthy by reason of the increase in the value of lands. In my home town we have one street on which the residents are mostly of this class, and the people call it "Millionaire Road." There is one little town of 200 people in my county, mostly of this class, and in that town of 200 people are 77 registered and licensed automobiles. In the savings banks of my town are $30,000,000 of deposits, mostly farmers' money. Several small farming towns in my county have bank deposits and banking capital as large per capita as Providence, R. I., and that used to be considered high-water mark. Our farmers have largely ceased to be borrowers, and loan out many millions of dollars on mortgages themselves. One farmer in my county during the panic of 1907 loaned to a big manufacturing corporation in Davenport the sum of $50,000 in cash after the banks had shut down on loans. As a class, I say without hesitation or the slightest doubt on the proposition that the Iowa farmer is the most prosperous, free, and independent citizen on the face of the earth. If this does not hold true of all tenant farmers, due to the unearned increment and its tendency in higher rents to absorb the profits of farming as active business, that is not a matter of astonishment to students of the single tax, but does not concern the present discussion.

Now, if this is the true picture of this industry to-day, instead of the harrowing scene of ruin and devastation so often depicted on this floor, is there reasonable ground for fear that this condition will be changed for the worse by reason of the tariff legislation of the Sixty-third Congress? The farmer has not been hurt up to date. I am prepared to show from daily market quotations that they have not, and by every reasonable inference from existing conditions that they will not be. The daily quotations on corn for February, 1914, under the Democratic tariff, average 13 cents a bushel higher than the quotations for the corresponding month of 1913, under the Republican tariff. [Applause on the Democratic side.] No call for the Red Cross here.

The daily quotations on wheat average about 3 cents per bushel higher in February, 1914, under the Democratic tariff, than they averaged under the Republican law in the same month in 1913. No necessity for calling the doctor so far.

The daily quotations on hogs for February, 1914, average 45 cents per hundredweight higher than those in February, 1913. No need to send for the coroner just yet.

The daily quotations on cattle average 18 cents per hundredweight higher in February this year than in the same month last year. The prices of the foregoing products are in each case higher to-day than the average price of the last four years. Pretty good for an industry "in immediate apprehension of speedy dissolution."

Mr. McKENZIE. Mr. Chairman, will the gentleman yield?

Mr. VOLLMER. For a question; yes, sir.

Mr. McKENZIE. Was it not the promise of the Democratic Party that they were going to lower the price for these products to the consumer?

Mr. VOLLMER. As far as those products are concerned, which you gentlemen told the farmers you would increase and had been increasing in price by your bunko game of protection these many years, but did not increase in price, of course the repeal of the tariff could not reduce the price. [Applause on the Democratic side.]

Mr. KELLEY of Michigan. Mr. Chairman, will the gentleman yield?

Mr. DONOVAN. Mr. Chairman, I suggest that it is the gentleman's first talk and that it is improper and ungenerous to interrupt him.

Mr. POU. Let him come. He is able to take care of himself.

Mr. VOLLMER. I am willing to yield to the gentleman.

Mr. KELLEY of Michigan. I was going to ask the gentleman in what market were the prices which he has given?

Mr. VOLLMER. The Chicago market.

The daily quotations on eggs for February, 1914, average about 9 cents a dozen higher than the quotations for the corresponding dates in 1913. This little item of eggs is not so small when you consider that the annual production of eggs in our State is estimated by the State department of agriculture at 97,549,731 dozens, and this increase of 9 cents a dozen means $8,000,000 more in the pockets of the downtrodden, poverty-stricken farmers of my State. I am tempted here to repeat that perfectly awful pun, "Here's to the Iowa hen; her son never sets." I append hereto a table showing these quotations as compiled from the files of the Daily Trade Bulletin in the office of J. R. Whitney & Co., and published by the Carroll Times, a reliable newspaper in the heart of the farming region of our State, where every farmer keeps these quotations and no attempt at deception would be dared on this subject:

February, 1913, came in on Saturday. The dates for which quotations are given are, therefore, February 1, 8, 15, and 21. There was no session of the board of trade on Saturday, February 22, a public holiday. The Saturdays of 1914 most nearly corresponding to these were January 31, February 7, 14, and 21. These are the dates for which the following quotations were reported in the Daily Trade Bulletin. The corn prices quoted are the cash prices for No. 3 mixed on track, Chicago, which is selected as a standard grade. Any other grade might be chosen, but the lesson taught by the quotations would be the same. The prices given on wheat are for No. 2 spring. The prices quoted on hogs are the lowest and highest, including both light and heavy grades, but excluding "pigs." The quotations on cattle are for "steers, medium to choice."

CORN—NO. 3 MIXED, ON TRACK, CHICAGO.

| | Low. | High. |
|---|---|---|
| 1913 | | |
| Feb. 1 | 48 | 50 |
| Feb. 8 | 49½ | 50½ |
| Feb. 15 | 47½ | 49½ |
| Feb. 21 | 47½ | 49 |
| 1914 | | |
| Jan. 31 | 60½ | 63 |
| Feb. 7 | 60 | 64 |
| Feb. 14 | 59½ | 63 |
| Feb. 21 | 59½ | 64 |
| Mar. 4 | 66⅜ | 67½ |

WHEAT—NO. 2, SPRING.

| | Low. | High. |
|---|---|---|
| 1913 | | |
| Feb. 1 | 88 | 90 |
| Feb. 8 | 88 | 90½ |
| Feb. 15 | 87 | 89 |
| Feb. 21 | 87 | 89½ |
| 1914 | | |
| Jan. 31 | 88½ | 90 |
| Feb. 7 | 89½ | 91½ |
| Feb. 14 | 91 | 92 |
| Feb. 21 | 93 | 95 |
| Mar. 4 | 94½ | 95 |

LIVE HOGS—LIGHT AND HEAVY.

| | | |
|---|---|---|
| 1913 | | |
| Feb. 1 | 7.30 | 7.70 |
| Feb. 8 | 7.85 | 8.10 |
| Feb. 15 | 8.00 | 8.35 |
| Feb. 21 | 8.15 | 8.40 |
| 1914 | | |
| Jan. 31 | 8.25 | 8.50 |
| Feb. 7 | 8.45 | 8.72½ |
| Feb. 14 | 8.25 | 8.60 |
| Feb. 21 | 8.40 | 8.75 |
| Mar. 4 | 8.40 | 8.60 |

CATTLE—STEERS, MEDIUM TO CHOICE.

| | | |
|---|---|---|
| 1913 | | |
| Feb. 1 | 7.50 | 8.25 |
| Feb. 8 | 7.60 | 8.25 |
| Feb. 15 | 7.90 | 8.50 |
| Feb. 21 | 7.90 | 8.50 |
| 1914 | | |
| Jan. 31 | 7.85 | 8.85 |
| Feb. 7 | 7.85 | 8.65 |
| Feb. 14 | 7.75 | 8.65 |
| Feb. 21 | 7.85 | 8.60 |

Below is the market for the last seven years for January 13:

| | Bulk of sales. |
|---|---|
| Jan. 13, 1914 | $8.00 and $9.00 |
| Jan. 13, 1913 | 7.40 and 8.60 |
| Jan. 13, 1912 | 5.90 and 8.00 |
| Jan. 13, 1911 | 5.80 and 6.60 |
| Jan. 13, 1910 | 5.35 and 6.75 |
| Jan. 13, 1909 | 5.40 and 6.65 |
| Jan. 13, 1908 | 4.80 and 5.90 |

The Chicago prices for eggs in February, 1913, ranged from 15 to 24 cents. The prices for February, 1914, have thus far ranged from 24½ to 27 cents. The average of prices for the past month have been nearly 9 cents higher than for the corresponding period in 1913.

[Applause on the Democratic side.]

Mr. Chairman, I said before that Iowa was going to become a billion-bushel-a-year State, as far as the production of corn is concerned. This may be doubted, but I can prove by Republican figures that we have become a billion-dollar-a-year State as far as the annual production of farm values is concerned; and those values of farm products are estimated by Republican State officials in my State in a publication just issued,

and are based on the prices obtainable in Iowa under the operation of the present Democratic tariff law. On March 5, 1914, our State department of agriculture reported that the value of live-stock on Iowa farms on January 1, 1914, was $470,272,000, and that the field crops of Iowa for 1913, together with the poultry, wool, and dairy products, amounted to $522,474,227, or a sum total of just about $1,000,000,000. The Des Moines Register and Leader, the organ of the senior Senator from our State, says that this is a new record, never equaled before in that or any other State in the Union. So, while Republicans on the floor of this House are "drowning the stage with tears" and are filling volumes of the CONGRESSIONAL RECORD with alleged proof that the farmers of my State have been ruined by Democratic tariff legislation, and that they are all on the road to the poorhouse, Republican State officials at home are issuing statistics showing that our farmers were never as rich as they are now. [Applause on the Democratic side.]

The old song, "The bogy man will git you if you don't look out," is being dinned into the ears of the farmers. The first bogy is Argentine corn. Have you seen it? Compared with our Iowa corn, a measly, scrawny article, looking on the ear like popcorn, and my distinguished colleague from Iowa [Mr. GOOD] says it is full of bugs. If that is the case, it must be rich in "bug juice," but I would not intimate that that explains the interest of my Republican colleagues from Iowa in the matter. [Laughter.] Whatever its nature or condition, all the importations of Argentine corn which we have received to date or that we are liable to receive in a measurable future are a mere bagatelle as compared with our domestic production of two and a half billion bushels of real corn. All the imports of Argentine corn for a year would not furnish a morning breakfast for the hogs of Iowa. And, by the way, all the importations of Chinese eggs would not furnish a nest egg apiece for the hens of my State.

Mr. FORDNEY. Will the gentleman yield?

Mr. VOLLMER. I yield.

Mr. FORDNEY. As scrawny and as worthless as the Argentine corn is, compared to the corn he is describing, is it not true that under the present tariff laws several millions of bushels——

Mr. VOLLMER. I yielded only for a question.

Mr. FORDNEY. I am asking you a question. Is it not true that several million bushels of Argentine corn have come into this country, which was purchased by our glucose and starch manufacturers on the Atlantic coast?

Mr. DONOVAN. A point of order, Mr. Chairman. The gentleman refused to yield, and yet the gentleman from Michigan [Mr. FORDNEY] continues to talk.

The CHAIRMAN. The gentleman has control of the matter himself, rather than the Chair.

Mr. VOLLMER. The statements that have been bandied back and forth on the floor of this House within the last few days that the importations of that corn were going to run up into hundreds of millions of bushels appear to be perfectly ridiculous when you look at the official figures as given in the Miller's Yearbook, which shows that the biggest production that they ever had in that country was 296,000,000 bushels. During the last fiscal year less than 1,000,000 bushels were imported into this country—875,000 bushels, or such a matter. Since that time there has been a slight increase, but nobody in his senses who looked at the actual importations will say that during the present fiscal year it can possibly run up as high as 10,000,000 bushels. But let us say that it will amount to 10,000,000 bushels. I ask the statisticians of calamity over there whether they can figure out a simple little arithmetical problem. Ten millions to 2,470,000,000 bushels is as 1 to 247, is it not? What effect can they figure out that the adding of 1 bushel to 247 bushels is liable to make?

I have traveled extensively in Central and South America, and, in my opinion, the Latin-American is not yet born who can compete with the farmer of the Middle West in the raising of corn. [Applause.] If the farmer of my State fears competition in this line, let him look nearer at home. Let him look to Texas and Oklahoma, to millions of acres of fertile soil in our Southern States, where Anglo-Saxons some day will put into the production of corn the same amount of brains and labor as the Iowa farmer.

As a matter of fact these importations of foodstuffs come here only at times of real or artificial scarcity. We had a most unusual drought in a large part of the Middle West last year, and that is what I mean by real scarcity. On the other hand, when speculators corner the people's food supplies and produce artificial scarcity the farmers get no benefit, as a rule, while gaunt want and hunger stalk among the laboring population of our great cities. If importations break up these rings and their corners, the great-souled, wealthy, broad-minded Iowa farmer will enter no protest.

The senior Senator from our State has been repeatedly quoted on this floor on the general proposition and he can not be quoted too often, for we propose to remind the farmers of our State of his real sentiments as expressed while he was headed toward the rising sun of progressive doctrines, as distinguished from the statements which he will make in his pending campaign for reelection which he will make as a reactionary.

On June 11, 1910, in the Senate of the United States, Senator CUMMINS said:

I know that my friend from North Dakota [Mr. MCCUMBER] does not agree with me in respect to these things, but I do not believe that we in Iowa receive any direct benefit for the 400,000,000 bushels of corn that we raise every year; I do not believe that we receive any direct benefit from the duty on 8,000,000 or 10,000,000 hogs that we market every year; I do not believe that of the $700,000,000 of agricultural products that we pour every year into the channels of trade protection advances the price of a tithe of them. * * * We will this year supply the people of the United States and the people of the world with a product that will surpass in value $700,000,000, and it is idle for even any enthusiast to assert that the price of these products is directly affected by the protective tariff.

The junior Senator from our State [Mr. KENYON] thus expressed himself on this proposition on August 1, 1913, on the floor of the United States Senate:

I have never in recent years heard it preached that the tariff on oats or corn or wheat increased the price to the producer.

And the following illuminating colloquy between him and his Republican colleague from North Dakota is not without interest in this connection and worthy to be noted by the farmer, whom they are trying to fool again in the same old way:

Mr. KENYON. Does the Senator from North Dakota believe that if the tariff on wheat were a direct benefit to the producer to the extent of the tariff, thereby increasing the cost of wheat to the consumers of the country, any such tariff would stand?

Mr. GRONNA. I believe not (p. 3376).

Let our farmers ponder this well. This little colloquy substantiates our contention that our Republican friends could not if they would, and would not if they could, increase the price of farm products by the levy of tariff duties, and that these duties were enacted by them simply to serve their campaign purposes.

Now, as to importations of farm products increasing under the new tariff, I desire to call attention to the schedule of such importations, printed as part of his remarks by the gentleman from Nebraska [Mr. SLOAN] and found on page 4501 of the RECORD:

*Schedule G: Agricultural products and provisions.*

VALUES OF IMPORTS BY YEARS.

| | |
|---|---|
| 1898 | $29,353,286 |
| 1899 | 32,505,236 |
| 1900 | 35,762,588 |
| 1901 | 38,566,704 |
| 1902 | 43,682,461 |
| 1903 | 46,221,428 |
| 1904 | 49,013,702 |
| 1905 | 47,570,416 |
| 1906 | 53,868,946 |
| 1907 | 63,720,855 |
| 1908 | 69,609,525 |
| 1909 | 71,719,069 |
| 1910 | 84,872,747 |
| 1911 | 105,974,044 |
| 1912 | 177,711,156 |

This schedule shows a steady increase in such importations under the Republican tariff, an increase every single year from 1898, when it was $29,353,286, to 1912, when it was $177,711,156, an increase of over 400 per cent in 14 years. These figures simply prove what anyone with an ounce of sense, unless blinded by party fanaticism or pet theory, might have expected, that as pressure of increasing population and relatively insufficient food supplies coexist there will be increased importations of foodstuffs; and as the colloquy between Senators KENYON and GRONNA quoted above indicates, no political party would dare to try to stop it or to make bread dear for the people. To do so would simply invoke such an agitation as that which led to the overthrow of the corn laws of England, and the toiling millions in our great cities would smash any party daring to do anything of the kind.

Indeed the problem foreshadowed by existing conditions and well-recognized tendencies is not getting too much food in the country, but how and where shall we get enough to fill the mouths of the hungry millions, because I fear that in spite of all that may be done to assist agriculture and make it more scientific, population will continue to increase faster than food supplies. The farmer need not worry about his prices. In spite of everything that Congress may do and in spite of importations from abroad, the prices of farm products are going to remain high.

I do not wish to be misunderstood as saying that the farmer has not some just complaints. When 57 per cent of the value of his products is lost somewhere between his hands and the ultimate consumer something is radically wrong, and the sphere

of sound remedial legislation appears to be right here. But in my judgment for the correction of these abuses the farmer has far more license to look to a Democratic than to a Republican Congress. I assert that no Congress has ever done more for the farmer than the Sixty-third. Talk about discriminating against the farmer in Democratic tariff legislation! It is absolutely false, for where the duties were removed or reduced on one product of the farm they were removed or reduced on five or six manufactured articles at the same time. Many price reductions on things which the farmer has to buy have already come and many more will soon follow as old stocks are disposed of and price agreements terminate or are broken up.

On the other hand, every Republican tariff ever enacted was of necessity and by its very nature a rank discrimination against the interests of the farmer, because in the main, with only isolated exceptions, the price of his products is determined in the free-trade markets of the world, while Republican tariff policies have turned him over, bound and gagged, to have his pockets picked by the confederated rings and monopolies that were the prolific spawn of the protective system.

People should be patient. They should give the new tariff a fair trial. Rome was not built in a day. This Congress has already placed on the statute books more legislation of a major character than was ever placed there in the same length of time by any Congress since the First, and if the people sustain the hands of the Democratic Party and do not allow the howling dervishes of calamity or the panic-plotting, predatory interests that want to see this administration fail to deflect them from their course the farmers particularly will find more than compensation for any importations of farm products in the reduction of the prices of all their supplies and in many other benefits which will be conferred upon them by the comprehensive program of progressive, remedial, and constructive legislation which will go down in history inseparably linked with the immortal name of Woodrow Wilson.

For our promise of future performance we can put up good collateral in the shape of past performance. The administration in one short year can point to the fait accompli of a reduction of the tariff, an income-tax law, a currency law, the popular election of United States Senators, the diversion of Treasury funds from Wall Street to the banks of the West and South, the elimination of the lobby; the adoption of the industrial employees' arbitration act, preventing the tying up of railways; the progress made toward a peaceful solution of the problem of the trusts; the extension of the parcel-post and pure-food acts; the inauguration of a system of markets for farm products; the extension of the activities of the Agricultural Department to the home life of the farmer; the new public-land policy, combining conservation with proper use; the Lever bill for farm-extension work. This is but a hurried and partial résumé of the work of the first year of Democratic government under the guidance and leadership of Woodrow Wilson. In every one of the propositions I have named the farmer has a very vital interest, and in every one the action of the Democratic Congress was in favor of the farmer, because it is the proud boast of the Democratic Party that it is, always has been, and always will be the faithful servant and the special representative of the great producing classes of the Nation. [Loud applause.]

Mr. SPARKMAN. Mr. Chairman, I yield 15 minutes to the gentleman from Georgia [Mr. HARDWICK].

Mr. HARDWICK. Mr. Chairman, before I perform the somewhat unusual feat of speaking upon the bill, I want to say that at a later period, and after I have had some opportunity to examine the report to which he referred, unless some other Member on this side does it, I propose to answer the remarks of the gentleman from Washington [Mr. HUMPHREY].

I want to say that our friend the gentleman from Iowa [Mr. VOLLMER], who has made his first speech this morning, has fully justified, according to my opinion, the good judgment his constituents showed in sending so able a representative to this Chamber. [Applause.]

Mr. Chairman, there are just a few words I want to say about the bill and about a proposition in my own district that is not in the bill, but I hope will be in it either before it passes finally or will be included in the next river and harbor bill.

On page 43 of the pending bill I find this language:

> Improving Mississippi River from Head of Passes to the mouth of the Ohio River, including salaries, clerical, office, traveling, and miscellaneous expenses of the Mississippi River Commission: Continuing improvement with a view to securing a permanent channel depth of 9 feet, $7,000,000, which sum shall be expended under the direction of the Secretary of War in accordance with the plans, specifications, and recommendations of the Mississippi River Commission as approved by the Chief of Engineers, for the general improvement of the river, for the building of levees—

And so forth.

My information is that of this sum of $7,000,000 about $4,000,000 is to be spent for the construction or for the repair and maintenance of levees on the Mississippi River.

Now, Mr. Chairman, I am not complaining of the conduct of this committee or of the action that this House may take when this large sum of money is appropriated.

It is not only authorized by the interests of a great section of our country, but it is also fully demanded by the platform declarations of the three great political parties of this country that are represented on this floor. Not only that, but as the committee has presented this proposition, this money is undoubtedly appropriated, so far as mere language goes, in the interest of and in the aid of navigation.

But, Mr. Chairman, I rise to call the attention of this committee to the fact that there are other rivers in other sections of this country where just as strong a case can be made for the construction of levees, even if confined to the aid of navigation, as can be made in the Mississippi River case; and I rise to insist that the doctrine which the Democratic Party laid down in its platform at Baltimore and the doctrine which each one of the other great parties laid down at their national conventions on this great subject is not exclusive, is not sectional, is not a doctrine that does not apply impartially and equally to every section of this country, where conditions are the same and where the principle involved is identical. [Applause.]

Now, I want to say, on this floor, that in my judgment the day is not far distant, if it has not already arrived, when the House of Representatives and the Senate of the United States will no longer permit appropriations of this sort to be made to one river and to one section of the country and deny appropriations of a like character, based on exactly the same reasons and on just as strong cases made in support of them, considering the amount that is asked, to other sections of this country.

You can take, Mr. Chairman, for instance, the case that I have in my own district. There the flood waters of the Savannah River, coming down from the Appalachian Mountains, gathering from five States, center at the head of navigation on the Savannah River at the city of Augusta. The river takes a sharp bend there, and the result is that every few years we have a great flood that destroys or certainly very seriously damages life and property in a great city of 50,000 or 60,000 people.

Now, we have not been careless or indifferent about this matter. We have not been neglectful of our own interests, because the inhabitants of that city, the people of that one prosperous but not overrich community in this great Republic, have taxed themselves to provide a million dollars to build a levee for flood protection there, and we are asking the Congress of the United States to aid in that project by an appropriation of $500,000—25 per cent only of what we are spending out of our own pockets.

What have we done for the Mississippi River? The levees of the Mississippi River have had $31,500,000 from this Government—about one-third, in round figures, from the Federal Treasury of what they have raised by local taxation.

Mr. MADDEN. Mr. Chairman, will the gentleman yield to me for a question?

Mr. HARDWICK. Certainly.

Mr. MADDEN. What was the result of the expenditure made out of the appropriation granted a couple of years ago for the protection of the city of Augusta? It was a comparatively small appropriation, was it not?

Mr. HARDWICK. Yes; it was not a very large appropriation.

Mr. MADDEN. I wanted to ask the gentleman about that.

Mr. HARDWICK. The result has been very good. We are grateful to the committee and to the Congress for that aid. I want to say this, that I am not criticizing the committee now. The report of the engineers on the levee proposition has not reached Congress yet, and therefore the committee could not up to this time have included this item in the bill, even if they had wanted to. For that reason I am not asking that the House vote on this item now. I think the first appropriation for revetment work, and an equal amount was contributed locally, was for $125,000, and it helped us a great deal.

Mr. MADDEN. I remember, as a member of the committee, looking carefully into the question that the gentleman refers to with respect to the damage done to the city of Augusta by the floods on the Savannah River, and we reached the conclusion that it was a meritorious proposition and ought to receive the assistance of the Federal Government.

Mr. HARDWICK. I thank the gentleman. Of course, his sense of justice led him to form that opinion when he knew the facts, and I think the sense of justice of every other Member of this House will lead him to reach the same conclusion when he becomes familiar with the facts.

Now, I am not going to go to-day into overmuch detail about all these things, but I will put in the RECORD a detailed state-

ment of what the last great flood cost the city of Augusta and its people. It cost over $2,000,000 in actual money loss and several lives.

The flood in the year 1908 was a typical one, and the loss of life and property can be taken as a guide in determining the total losses. It is impracticable, even with all data at hand, to cover these, as there are a great many intangible losses which can not be figured in dollars and cents. It is true these floods are of short duration, but the rise of water is so swift that it is impractical to guard against loss. At 6 p. m. on August 5 the river stage was 19 feet; at 8 a. m., August 6, or 14 hours after, the stage of water was 35 feet, and in a few hours this had reached 39 feet. The entire business section was covered and practically all of the best residential section. In the low ground, where the poor classes of people live, the flood water went to the eaves of the one-story houses, and the occupants had to be reached through the roof. The large residences on high ground had water on the first floor from 3 to 8 feet deep. All stores were, of course, flooded. The depth of water on office floors of hotels was from 5 to 8 feet. Seven cotton mills, 2 ironworks, 2 cotton compresses, many city blocks of cotton warehouses, 2 grain mills, 3 ice plants, and 20 other manufacturing plants, street-railway power house, electric-light plant, waterworks, the union passenger station, 6 railroad terminals, and, in fact, everything that goes to make up a city was put entirely out of business. The power canal, by which the city furnishes water power to all industries, was torn up for 3 miles; 1 railroad bridge and 1 wagon bridge across the Savannah River were washed away entirely and one span of another wagon bridge was destroyed. Four hundred and eighty stores and over 2,000 residences were under water, and many of the buildings collapsed. By the destruction of the city's water-power development, 6,000 factory employees were out of employment for 2 months and the city was without water for 40 days.

As to the property loss, no figures obtainable would cover it. Besides the actual cash expended in restoring buildings and replacing damaged stock, there is a loss in business, a depreciation in value of property, a loss in earning capacity due to abnormal conditions, and a general paralysis of the entire community which can not be figured in money, the loss through these items being far more than the cost of restoring the physical property. The area covered by the water within the city limits was approximately 3 square miles, and this territory included all the business and manufacturing section and many residential streets. The value of the property flooded, as fixed by the city for taxation purposes (and you know how extremely reasonable that is in any of our cities) was $24,197,245. This does not include the city streets, sewers, bridges, and so forth, which were so badly damaged. There has been a table prepared showing the damage to physical property, based on actual expenditure, which I will not take the time of the committee to read, but will ask that it be incorporated in the RECORD.

The table referred to is as follows:

*Actual monetary losses from flood.*

CITY OF AUGUSTA LOSS.

| | |
|---|---|
| Repairs water-power canal | $120,000 |
| Replacing steel bridge across river at Fifth Street | 55,000 |
| New span at Thirteenth Street river bridge | 21,000 |
| Repairs to waterworks | 26,000 |
| Repairs to sewers | 12,000 |
| Repairs to streets and replacing bridges over canal | 110,000 |
| Repairs to cemeteries | 17,000 |
| Repairs to river wharf and warehouses | 8,000 |
| | 369,000 |

REPAIRS TO PROPERTY OF RAILROAD AND PUBLIC-SERVICE CORPORATIONS.

| | |
|---|---|
| Repairs to street railway power house and tracks | 25,000 |
| Repairs to electric lighting plant, telephone and telegraph companies' pole lines and underground conduits | 35,000 |
| Repairs to passenger depot | 8,000 |
| Repairs to Charleston & Western Carolina Ry. freight depot and tracks (this property was on river bank) | 60,000 |
| Repairs to Atlantic Coast Line yards | 12,000 |
| Repairs to Georgia Ry. yards | 2,000 |
| Repairs to Southern Ry. yards | 30,000 |
| Loss of railroad bridge across river (not replaced) | 45,000 |
| Repairs Augusta-Summerville tracks | 4,000 |
| Repairs Augusta Southern yards | 5,000 |
| | 226,000 |

LOSSES BY INDUSTRIAL PLANTS.

| | |
|---|---|
| Singleton Silk Mill (loss of stock and damage to machinery flooded) | 5,000 |
| Sibley Manufacturing Co. (cotton mill), loss of stock | 10,000 |
| King Manufacturing Co., loss of stock | 16,000 |
| Interstate Ice Co., damage to buildings | 12,000 |
| Southern Cotton Oil Co.: | |
| Damage to buildings | 15,000 |
| Damage to stock, meal, and other by-products | 40,000 |
| Riverside compress: | |
| Damage to buildings | $8,000 |
| Loss of cotton (floated down the river) | 14,000 |
| Augusta Warehouse & Banking Co. (cotton warehouse): | |
| Damage to building | 15,000 |
| Damage and loss of cotton | 8,000 |
| Riverside Mills (cotton waste), factory occupied two blocks: | |
| Damage to buildings | 60,000 |
| Damage and loss to stock | 80,000 |
| Augusta Compress Co. and allied warehouses, loss and damage to cotton, 4,000 bales lost or practically destroyed | 170,000 |
| Enterprise Cotton Manufacturing Co | 8,000 |
| Augusta Factory (cotton) | 18,000 |
| Sutherland Cotton Manufacturing Co | 5,000 |
| Globe Cotton Mills | 12,000 |
| Lombard Iron Works, damage to buildings | 4,000 |
| Georgia Iron Works | 2,000 |
| Augusta Mattress Factory | 15,000 |
| Georgia-Carolina Chemical Co | 40,000 |
| Southern States Fertilizer Co | 25,000 |
| Perkins Manufacturing Co., lumber, sash, door, and blinds (plant covers three city blocks) | 35,000 |
| Clark Milling Co. (grain) | 12,000 |
| Nixon & Co. (mill grain) | 8,000 |
| Augusta Lumber Co | 9,000 |
| Augusta Gas Co | 6,000 |
| Augusta Brewing Co | 2,000 |
| B. S. Bunbar Brick Co., Electric City Brick Co., Hankinson Brick Co., Merry Bros. Brick Co., McCoy Brick Co., McKenzie Brick Co., and Standard Brick Co | 35,000 |
| National Biscuit Co | 18,000 |
| Total | 707,000 |

LOSSES BY FIRE DURING FLOOD WHICH COULD NOT BE CONTROLLED BY THE FIRE DEPARTMENT.

| | |
|---|---|
| Five large buildings | 180,000 |
| Repairs to public-school property (1 large brick building collapsed, 4 others damaged) | 38,000 |
| Repairs to church property (11 churches) | 26,000 |
| Repairs to store buildings and pumping water from cellars and cleaning up | 75,000 |
| Damage to merchandise (in the 480 stores from a few dollars in the small shops to $22,000 in the largest wholesale houses), the total being | 240,000 |
| Repairs to residences (60 were destroyed and a large number damaged) | 70,000 |
| Damage to household furniture, carpets, etc | 150,000 |
| Loss on 6,000 acres of hay and grain south of the city (estimate made by the farmers) | 100,000 |
| | 879,000 |

TOTAL LOSSES.

| | |
|---|---|
| By municipal corporation | 369,000 |
| By railroads and public-service corporations | 226,000 |
| By industrial plants | 707,000 |
| By stores, residences, and miscellaneous | 879,000 |
| Total | 2,181,000 |
| Loss of wages to mill and factory operatives for eight weeks | 144,000 |

Loss to merchants and manufacturers due to interruption and loss of business, incalculable.

Mr. HARDWICK. It shows that the total tangible loss in this year was $2,181,000. Now, in addition to that there was the loss of wages to mill and factory operators for eight weeks of $144,000, and the loss to merchants and manufacturers due to interruption and loss of business, which is incalculable.

The losses shown in this table are from one flood, that of 1908, and it is typical of all others. Since 1840 we have had 10 floods. The city was powerless to help itself on account of the large cost of protection. However, after the 1908 flood, realizing that the very life of the community depended upon some system of relief, it was decided to make a determined effort in that direction. Gen. Kingman, then in charge of our district, made a thorough examination and reported that the only possible means of protection was by a levee along the river front from high ground above the city to high ground below. At his suggestion we called in Mr. B. M. Harrod, of New Orleans, who has spent most of his life on the Mississippi River work, and his report coincided with that of Gen. Kingman. To further satisfy the community, the cost of a levee being so tremendous, we called in Mr. A. L. Dabney, of Memphis, and Mr. H. T. Cory, of San Francisco. Each of these engineers, acting entirely independently of each other, recommended the construction of a levee as the only practical means of protection.

Nor can the case we present be differentiated in any manner from the levee appropriations made for the Mississippi River. If attention be directed to the contention so strongly made for the Mississippi levees that they are necessary in aid of navigation, then I answer exactly the same thing is true of the Savannah River at Augusta. On this proposition let me read from the report of the Government engineers in 1908:

These freshets develop a very high velocity of current, which attacks the banks of the stream, particularly on the Augusta side, and with every high freshet a loss of bank occurs. The material thus eroded is carried into the river and furnishes the material with which the bars

are made, which prevent or obstruct navigation at low water, and render the improvement of the river by regulation almost impossible.

So here we are. The Government officers say that these great recurrent floods at the head of navigation on the Savannah River at Augusta obstruct navigation and render the improvement of the river and its use for navigation almost an impossibility; and I say there is not a single case in the Mississippi River or Valley or in connection with the Mississippi River levee proposition that is stronger than that or that could be put in stronger words than the Government engineers have used with respect to this Augusta case.

Now, I am not finding fault with anybody. I am not adopting any dog-in-the-manger policy, because I do not feel that way; but I want to notify this committee—not in a threatening way, but in a fair, open way—that in my judgment the people of America are going to insist in applying whatever propositions you lay down for levee improvement on one river to every other river where the conditions are the same and where the principles involved are identical.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. HARDWICK. I do.

Mr. HUMPHREYS of Mississippi. The gentleman has referred only to the Mississippi River. The gentleman is, I hope, not laboring under the opinion that the Mississippi River is the only river in the United States for which we have appropriated money for the construction of levees?

Mr. HARDWICK. I must confess that I was, and I got that impression from expressions made by the gentleman's committee. I understood the Chairman to say so. Am I right about that?

Mr. SPARKMAN. It is the only one that we have been appropriating money for in the last few years, except occasionally the Senate has put on some.

Mr. HARDWICK. In other words, the policy of the House committee has been to confine this levee work to the Mississippi River alone, and they do it there on the theory that it is necessary to construct or help maintain those levees in the aid of navigation, to keep the river from spreading all over the country, and to keep it within its channel. Now, I say that my case is the same, that the Government engineers say that the reason why the Savannah River is not fully navigable at all times from Augusta, Ga., to Savannah, Ga., and can not be kept that way is because of these floods, which, to use their own language, make it almost impossible to make a navigable river of it at all until these floods at Augusta are controlled.

Mr. HUMPHREYS of Mississippi. I agree with everything the gentleman has said since he has taken the floor, except his statement of fact.

Mr. HARDWICK. I hope the gentleman will correct me if I am in error.

Mr. HUMPHREYS of Mississippi. Three years ago, I think it was, we appropriated $1,000,000 to build levees on the Colorado River in California for the sole purpose of preventing overflows. That was the sole purpose. It had no reference to navigation.

Mr. HARDWICK. Does the chairman of the committee agree to that statement of facts?

Mr. HUMPHREYS of Mississippi. The chairman will have to agree to it. I have the law in my hand, which states the purpose.

Mr. SPARKMAN. Whatever was done then, we would hardly do that now, I think.

Mr. HUMPHREYS of Mississippi. In addition to that, we are providing in this bill for a project on the Sacramento and Feather Rivers in California which contemplates the construction of levees and the improvement of those rivers in the interest of navigation and for the purpose of preventing floods there. The purpose I have in making this statement is simply to show the gentleman that what he contends for in the Savannah River is not utterly without precedent, and that, as a matter of fact, the Mississippi River is not the only river where we are building levees. I could name others.

Mr. HARDWICK. I am very much obliged to the gentleman. I hope he is correct. That ought to be the policy. We can not afford to single out any one river and treat it differently from the way we treat other rivers in this country where conditions are the same. We can not treat one section of this country one way in our legislation and treat other sections in another and different way. I say you must have a rule, whatever it is, and then you must apply it impartially whenever the facts are the same. You must come right up to the rule no matter where your rule is, whether it is in a Democratic State or in a Republican State, in a southern, eastern, western, or northern community. We can not afford to legislate along any other lines.

I want to say that I am glad my friend from Mississippi [Mr. HUMPHREYS], a member of the committee, takes that same view of the matter. I do not see how anybody in justice and fairness could take any other view. And I want to ask the members of this committee, if you were situated as I am, how could any one of you go home to your constituents and tell them that the Mississippi River, which is a parallel case with ours, can get aid for its levee work, but other rivers similarly situated can not. It is not right to put any Member of this House or the other House in that position, and I do not believe the fairness of the Members of either House will submit to it, if that is the purpose of any committee of either House.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SPARKMAN. I yield to the gentleman two minutes more.

Mr. HARDWICK. That is all, Mr. Chairman, except to say that when this report does come in I am going to insist that the same principle that has been applied in the Mississippi River case be applied to the Augusta case. I am going to stand with every other man from every other section of this country in applying this principle impartially to every river and State in this country where the case is the same and where the principles involved are the same. I think that is right, and I believe this House on both sides of the Chamber will support that method of procedure.

Mr. LAZARO. Will the gentleman yield for a question?

Mr. HARDWICK. I yield to my friend from Louisiana.

Mr. LAZARO. Does not the gentleman think the time has come when this great Government of ours ought to spend enough money and spent it systematically, so as forever to protect the people of this country from these floods?

Mr. HARDWICK. I do.

Mr. LAZARO. Instead of spending it up in Alaska?

Mr. HARDWICK. I do. I am heartily in sympathy with this doctrine, and I say no greater internal improvement could be conducted nor one more thoroughly justified by the existing conditions in this country than to protect the people of this country from these great recurring floods that come from its navigable rivers, wherever they may be located. It is right, just, and fair, and levee work and such other flood protection as may be needed and may be practicable ought to be impartially given on the basis of merit, and merit alone, to every section of our great country.

Mr. HUMPHREY of Washington. I yield five minutes to the gentleman from Michigan [Mr. FORDNEY].

Mr. FORDNEY. Mr. Chairman, a few minutes ago I listened to some remarks made by the gentleman from Iowa [Mr. VOLLMER], recently elected to membership in this House, and the gentleman referred to importations of agricultural products, especially of corn. He states that the amount of Argentine corn coming into this country under the new tariff law is insignificant in quantity, and therefore will have no effect upon the corn market in the United States. I want to call his attention to the importations as reported by the Department of Commerce.

For October, November, and December, 1912, and January, 1913, under the old law, there were imported into the United States 250,000 bushels of corn, as against 7,034,159 bushels under the present law for the same months, October, November, and December, 1913, and January, 1914.

He further states that at the present rate of importation of corn the quantity imported during the year would not exceed 10,000,000 bushels. If the corresponding rate of importation keeps up for the succeeding eight months, as compared with the four months above given, the importations for the first year under the Underwood tariff law will exceed 21,000,000 bushels, a quantity quite sufficient to regulate the price of corn in the United States markets, and materially lower the value of the corn crop in this country. This amount of imported corn coming from the Argentine Republic is more than one-half our usual annual exports of corn. The imported corn above referred to was purchased chiefly by the glucose and starch manufacturers located in the Atlantic States, and has taken away from the American farmer his market for just that much corn.

It is important to know, too, that the freight rate on corn from Argentina to the United States is 5 cents per hundred pounds, or 3 cents a bushel, while the freight from the Mississippi River Valley to the Atlantic Coast States is, in round numbers, 10 cents per bushel. This is an average freight rate from the Mississippi and Missouri Valleys to eastern ports. This is a very important factor in fixing the value of corn in the Eastern States, especially so when it is true that for the purpose of manufacturing starch and glucose Argentine corn is about as valuable as the extraordinary quality of corn produced in the United States.

The importations of oats for the same months under the old law were 23,580 bushels, and under the present law 16,194,145 bushels.

The gentleman from Iowa [Mr. VOLLMER] states that the farmers in his State are satisfied. Perhaps so. He would have us believe that the Iowa farmers are satisfied with having their corn placed on the free list, while the farmers of the South demanded and received a protective duty on rice. He would have us believe that the Iowa farmer is pleased to have his potatoes on the free list, while the farmers of Virginia and North Carolina have exacted a duty on peanuts. He would have us believe that the Iowa farmers are satisfied to have their live stock placed upon the free list, while the farmers of the South insisted upon having their tobacco highly protected. He would have us believe that the farmers of the North are satisfied with having fruit placed on the free list or at a very low rate of duty, while the orange and lemon growers of Florida demanded ample protection. Would he have us believe that the Iowa farmer is pleased with having wool placed on the free list, while Texas had demanded and obtained a protective tariff on Angora-goat hair.

Let me call the gentleman's attention to another article—butter—of which we imported $122,000 worth in the same months under the old law, and $1,631,000 worth under the present law.

The gentleman referred particularly to potatoes. Of these the importations for the four months named under the old law were 79,000 bushels, value $84,000, and under the present law for the same period 3,261,000 bushels, value $1,476,000. If the gentleman will refer to these figures he will find that the import value of potatoes under the old law was $1.29 per bushel, and now under the new tariff law 49 cents a bushel. Does the gentleman think he can throw out any sop of that kind to the Iowa farmer by saying, "Here's to the Iowa hen, whose son never sets." [Laughter.] You forget that the Canadian hen and rooster, with a pleasant smile on, look over the border into the United States, and with delight say to each other, "We can now be employed full time and have no fear of finding a market over there for the fruits of our toil."

Mr. McLAUGHLIN. Does the gentleman know of the testimony of a very prominent witness before the Committee on Rules the other day, telling of the effect of the immense importations of corn from Argentina, when he said that the loss to the American farmer on account of that importation was $65,000,000?

Mr. FORDNEY. Yes, my friend; and at 6 cents a bushel on the amount of corn produced in this country last year—3,125,000,000 bushels—it is $180,000,000. And that is the extent the price of corn has been reduced.

Mr. BORLAND. Will the gentleman yield?

Mr. FORDNEY. I have not the time to yield now. I will a little later. Our importations of breadstuffs for the four months I have referred to under the old law were $5,364,523, and under the new law, for the corresponding four months, they were $18,534,966. Do you think the Iowa farmer likes that? I would ask the gentleman the name of a farmer who has requested him to make the statements which he has made—that they are satisfied—or if he knows of any northern farmer who has asked any Democrat to do these things? If so, the poor unfortunate farmer does not know anything about the importation of agricultural products now coming into this country from abroad in direct competition with his products, the product of the sweat of his brow.

Now to get down to eggs: There were no importations at all under the old law given in the report, against $612,000 worth under this law.

Take 10 agricultural products, 10 items produced on the farm, and the value of those products imported under the old law was $14,503,000, as against $54,750,000 under this law. Do you think the Iowa farmer likes to hear that? Do you like to hear it?

When do you think you can hoodwink the Iowa farmer and make him believe that the Democratic tariff law has been enacted for his benefit especially? You did not do it in your last election. Your city vote alone saved you.

The gentleman from Iowa [Mr. VOLLMER] would lead us to believe that the farmers of Iowa are well pleased with existing conditions and prices on agricultural products under this new Democratic tariff law. Perhaps it would be worth his consideration and the consideration of other gentlemen of the House to note the change of expression of the people at the polls in the congressional district in Iowa which this gentleman has the honor to represent. In 1910 the Democratic candidate received 19,815 votes, the Republican candidate 16,971; in 1912 Mr. Pepper, the Democratic candidate, had no opposition and received 24,796 votes; and at the special election in 1914 Mr. VOLLMER received 12,655 votes, while the Republican candidate received 10,788, and the Progressive candidate received 3,730 votes. It is of much interest, also, to know that at this special election for the first time in many years the Republicans carried 85 per cent of the precincts in the farming districts.

I would ask the gentleman from Iowa, does he believe this comparison of votes cast in his district is any evidence of approval on the part of farmers in that district of this new tariff law? No one will deny that both Republican and Progressive votes cast in 1914 were cast by protectionists, favoring duties on farm products and registering disapproval of the new tariff law. The combined Republican and Progressive vote just given shows a majority against him of the votes cast amounting to 1,863.

The gentleman's speech will be understood as a veiled rebuke to the farmers who did not vote for him, and his special pleading for consumers in the cities will further enlighten his farmer constituents as to where his sympathies lie.

I ask you, my friends, can you point to a single industry in this country that has taken on an added impulse? Can you point to a single industry that has been established since the 3d day of October last by any encouragement given it in the Underwood tariff law? If so, name it. I can give you the names of some, but they are across the sea; they are in Europe, my friends. As predicted by the Ways and Means Committee in its report on the Underwood tariff bill and over the signature of its 14 majority members, which recited: "In our judgment, the future growth of our great industries lies beyond the sea." [Laughter and applause on the Republican side.]

By unanimous consent, Mr. FORDNEY was given leave to extend his remarks by printing the following table:

*A comparison of imports of certain farm products during the months of October, November, and December, 1913, and January, 1914, with the corresponding four months of one year previous, namely, October, November, and December, 1912, and January, 1914.*

IMPORTATIONS OF CORN.

| | Bushels. | Value. |
|---|---|---|
| October, 1912 | 226,471 | $114,706 |
| November, 1912 | 25,819 | 21,567 |
| December, 1912 | 632 | 415 |
| January, 1913 | 5,757 | 2,988 |
| Total | 258,679 | 139,766 |
| October, 1913 | 473,259 | 378,011 |
| November, 1913 | 1,632,643 | 1,182,672 |
| December, 1913 | 2,343,444 | 1,485,307 |
| January, 1914 | 2,554,813 | 1,610,136 |
| Total | 7,034,159 | 4,656,213 |

Imports of corn for four months of 1912–13 amounted to but 3 per cent of imports for four months of 1913–14.

IMPORTATIONS OF OATS.

| | Bushels. | Value. |
|---|---|---|
| October, 1912 | 379 | $186 |
| November, 1912 | 4,266 | 2,052 |
| December, 1912 | 8,984 | 3,069 |
| January, 1913 | 9,951 | 6,397 |
| Total | 23,580 | 11,704 |
| October, 1913 | 2,524,793 | 886,094 |
| November, 1913 | 5,132,308 | 1,821,789 |
| December, 1913 | 5,577,626 | 1,918,985 |
| January, 1914 | 2,959,388 | 1,000,637 |
| Total | 16,194,145 | 5,628,405 |

Imports of oats for four months of 1912–13 amounted to but two-tenths of 1 per cent of imports for four months of 1913–14.

IMPORTATIONS OF BUTTER.

| | Pounds. | Value. |
|---|---|---|
| October, 1912 | 107,046 | $27,688 |
| November, 1912 | 169,233 | 42,454 |
| December, 1912 | 145,949 | 37,655 |
| January, 1913 | 47,947 | 15,112 |
| Total | 470,175 | 122,909 |
| October, 1913 | 463,399 | 105,075 |
| November, 1913 | 1,069,617 | 234,197 |
| December, 1913 | 1,183,152 | 244,321 |
| January, 1914 | 1,858,911 | 447,205 |
| Total | 4,575,079 | 1,031,739 |

*A comparison of imports of certain farm products, etc.*—Continued.

IMPORTATIONS OF POTATOES.

| | Bushels. | Value. |
|---|---|---|
| October, 1912 | 9,811 | $4,716 |
| November, 1912 | 10,668 | 4,800 |
| December, 1912 | 20,253 | 25,302 |
| January, 1913 | 38,698 | 49,823 |
| Total | 79,430 | 84,641 |
| October, 1913 | 472,052 | 202,356 |
| November, 1913 | 764,839 | 346,679 |
| December, 1913 | 1,641,693 | 738,614 |
| January, 1914 | 383,121 | 191,170 |
| Total | 3,261,705 | 1,478,819 |

IMPORTATIONS OF ANIMALS (PRINCIPALLY CATTLE).

| | | | |
|---|---|---|---|
| October, 1912 | $1,077,952 | October, 1913 | $3,807,318 |
| November, 1912 | 1,098,446 | November, 1913 | 3,883,015 |
| December, 1912 | 830,028 | December, 1913 | 2,490,189 |
| January, 1913 | 461,966 | January, 1914 | 2,097,644 |
| Total | 3,468,392 | Total | 12,278,166 |

IMPORTATIONS OF BREADSTUFFS.

| | | | |
|---|---|---|---|
| October, 1912 | $1,292,184 | October, 1913 | $2,706,600 |
| November, 1912 | 1,191,221 | November, 1913 | 4,822,958 |
| December, 1912 | 1,487,775 | December, 1913 | 5,860,999 |
| January, 1913 | 1,483,343 | January, 1914 | 5,144,399 |
| Total | 5,364,523 | Total | 18,534,956 |

IMPORTATIONS OF EGGS.

| Date. | Dozen. | Value. |
|---|---|---|
| October, 1913 | 21,594 | $5,322 |
| November, 1913 | 165,263 | 36,500 |
| December, 1913 | 1,514,296 | 334,315 |
| January, 1914 | 1,184,408 | 236,622 |
| Total | 2,885,561 | 612,759 |

For October, November, December, 1912, and January, 1913, no imports of eggs are shown.

Below is given a comparison of total imports of certain products for four months ending January 31, 1913, with four months ending January 31, 1914.

OCTOBER, 1912, TO JANUARY, 1913, INCLUSIVE.

| | Quantity. | Value. |
|---|---|---|
| Beans, bushels | 70,590 | $141,728 |
| Peas, do | 38,698 | 160,370 |
| Wool | | 3,545,669 |
| Woolen goods | | 1,468,228 |

OCTOBER, 1913, TO JANUARY, 1914, INCLUSIVE.

| | Quantity. | Value. |
|---|---|---|
| Fresh meat, pounds | 13,440,751 | $1,082,337 |
| Beans, bushels | 187,358 | 331,730 |
| Peas, do | 125,691 | 268,634 |
| Wool | | 5,219,138 |
| Woolen goods | | 4,668,349 |

Per cent of imports free: January, 1913, 55; January, 1914, 61.

Total imports free: January, 1913, $90,413,718; January, 1914, $94,190,460.

Total imports dutiable: January, 1913, $72,649,720; January, 1914, $60,227,787.

Duties collected: January, 1913, $20,323,124; January, 1914, $23,528,080.

*Recapitulation of imports of principal farm products during months of October, November, December, 1912, and January, 1913, and the corresponding four months of 1913–14.*

| Product. | 1912-13 | 1913-14 |
|---|---|---|
| Corn | $139,766 | $4,656,213 |
| Oats | 11,704 | 5,626,406 |
| Potatoes | 122,309 | 1,031,759 |
| Animals | 3,464,392 | 12,278,166 |
| Breadstuffs | 5,364,523 | 18,534,956 |
| Eggs | | 612,759 |
| Beans | 141,728 | 331,730 |
| Peas | 160,370 | 268,634 |
| Wool | 3,545,669 | 5,219,138 |
| Woolens | 1,468,228 | 4,668,349 |
| Total | 14,503,330 | 54,706,929 |

Mr. FOWLER. Mr. Chairman and gentlemen of the committee, I approach a subject in this discussion which may seem to you to be personal to my own district, but I desire at the outset, gentlemen, to say that I want to place my remarks on a broader basis than a benefit to myself or to my people. In doing this I want to say that I do it not in a spirit of reflection upon the honorable committee which has brought this bill before this House. The chairman and all the members of that committee are among the very best Members of the House. They have devoted their energies, their time, and their talent for the purpose of bringing in a bill which will give to the country that character of improvement which we all so much desire, the improvement of the navigation of the water courses of our country.

Mr. Chairman, it is true that this bill and former bills have carried large appropriations for improvements of various kinds, among which are improvements for the deepening of the channels of streams, improvements for harbors, and improvements of levees. These are the three great ideas which have been before the committee for many years. Probably the levee proposition has not been considered as long as the other two. But it is undoubtedly the policy of this Nation to improve levees along with the harbors and streams and other waters of the country. The policy of improving levees is confined largely to the Mississippi River. I have no complaint to offer for such improvement, but I voice the good judgment of the committee in its effort to control the waters of that great stream, the father of rivers in America, and in conserving a territory as rich as the Valley of the Nile and as productive as the plains of Egypt. [Applause.]

Mr. Chairman, the proposition to which I wish to call the attention of the committee is a proposition involving the improvement of a harbor on the Ohio River. Inasmuch as the policy of improving levees outside of the Mississippi River, or on other streams than that of the Mississippi River, is not as popular as improvement of the levees on the Mississippi River; and as my proposition involves a levee improvement as well as a harbor improvement on the Ohio River, I have not met with success at the hands of the Committee on Rivers and Harbors. I am sure I had on that committee a great number of gentlemen who were in sympathy with my proposition and who would have gladly carried in this bill an appropriation sufficient to have made the improvement contemplated by my bill.

Now, it has been said by one of the speakers who preceded me that it is the policy of the three great parties in America to improve the navigable rivers of this country alike; to improve the harbors and levees of this country alike. That is, where the same conditions exist on one river that exist on another river where improvements are being carried on, the improvements ought to be carried on on both alike. In other words, if appropriations are made to improve the harbors and levees of the Mississippi River, then like harbors on the Missouri River, the Ohio, the Kentucky, the Cumberland, and Tennessee Rivers, or any other river in the country ought to receive the same kind of treatment at the hands of the Rivers and Harbors Committee.

Mr. SPARKMAN. Will the gentleman yield?

Mr. FOWLER. I will yield to the distinguished chairman of the committee.

Mr. SPARKMAN. The gentleman, of course, is aware of the fact that we make appropriations for the building of levees on the Mississippi River on the theory that they serve and are in the aid of navigation. That is so stated in the appropriation each time.

Mr. FOWLER. Yes.

Mr. SPARKMAN. It is left to the engineers at each time whenever they conclude to make an expenditure to say whether or not it is in the interest of navigation. Now, the engineers in reporting on the project at Shawneetown, to which the gentleman is addressing himself, say that in their opinion it is not in the interest of navigation at all to improve or extend the building up of the levee any further at Shawneetown. They say that the levee does not improve the navigation of the Ohio River, and in view of this further fact that the levee is being repaired by the State of Illinois, it is not incumbent on the United States to engage in any work there.

Mr. FOWLER. Let me ask the distinguished chairman of the committee if he submitted the question of the improvement of the harbor to the Engineer Corps? I think not. I have talked that question over myself with them.

Mr. SPARKMAN. I will say to the gentleman that some time last year I did submit to the Chief of Engineers the whole question there as to what further improvement, if any, to the levee should be made, the necessity for building it higher, and the advisability of doing so. What I have just read is a part

of the report made on the subject. Of course there is another report on the same subject that has been before our committee for some time, but this is a recent report.

Mr. FOWLER. If it is in the interest of navigation to improve the levees on the Mississippi River, what blockhead would say that it is not in the interest of navigation to improve the levees of the Ohio River, where like conditions exist. The honorable chairman intimates that there is a report from the engineers recommending this improvement, which I understand is true. A delegation of some of the best men in Shawneetown appeared before your committee a few weeks ago, and on their return they stopped at Cincinnati and consulted the engineers who made that survey, and they were informed by them that they had made a favorable report recommending the proposed improvement. I have not been able to get this report, but I understand that such report was made.

Mr. Chairman, I had a talk with the chief of the engineering division, as I shall show by and by, concerning this improvement. To be pointed about the improvement I speak of, it is on the Ohio River at Shawneetown, and here are the conditions there: It is a project of the United States, in the first inception. Shawneetown was laid out by the Government of the United States in 1808–9. A land office was established there, whereby all of the land in that whole Territory was sold to the people. A town was established there by the Government of the United States more than a century ago, a town at which the Government entertained the great Lafayette when he visited America while on his noted trip down the Ohio River; a town where Gen. Thomas Posey, the aid-de-camp of Gen. Washington, is buried; a town the oldest in the State of Illinois; a town where John McLean, the first Senator from the State of Illinois, is buried; a town lying in the bend of the Ohio River, with one of the best natural harbors on that river or any other river; a town located in one of the richest valleys in the world, and I challenge the productive Mississippi to surpass it; a town that yields bountifully to the skill of the industrious farmers, who surround it, the choicest wheat, corn, and other farm products; a town which affords to the people of that country access to railroad facilities connecting the interior of the State with the great Ohio River; a town which if cut off from the Ohio River cuts off the people from water navigation. There is a valley on both sides of the river—an extensive valley—some 5 or 6 miles wide.

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. Just for a question. I have only a short time in which to get this matter before the committee, but I always yield to the distinguished gentleman from Texas.

Mr. CALLAWAY. I want to know why the gentleman wants to put a harbor in there, unless there is some commerce going out and coming in?

Mr. FOWLER. Oh, there is an immense commerce.

Mr. CALLAWAY. I have an engineer's report stating that the commerce is being driven off the Ohio River by the railroads, and that there is no more commerce on the Mississippi River. There is not a through Mississippi line of steamers from St. Louis to New Orleans and no through line on the Ohio.

Mr. FOWLER. I am not talking about through steamboats on the Mississippi River. I do not know whether there are any through steamboats from St. Louis to New Orleans—but I am informed there are—but I do know there are steamboats plying on the Ohio River from Memphis to Cincinnati. I do know that there are steamboats plying on the Tennessee and Cumberland Rivers up as high as they can navigate, from Florence and Nashville to Evansville, on the Ohio River. I do know that there are steamboats plying on the Ohio River from Cairo to Paducah and from Paducah to Evansville. I do know that our people in a great measure depend upon these local steamboats not only for their freight transportation on these rivers but for their mail facilities also. I do know that towboats carry millions of bushels of coal from Pittsburgh to New Orleans annually. I do know the freight traffic is immense and increasing. I do know from April 1, 1913, to December 31, 1913—nine months—the freight on the Ohio River was 8,618,369 tons, valued at $71,064,229. I do know the gentleman is not correctly informed on this subject.

Mr. CALLAWAY. Will the gentleman yield further?

Mr. FOWLER. I beg pardon of the gentleman, but only one more question. I want to state my proposition.

Mr. CALLAWAY. I want to know if there is a single line of through steamers on the Ohio River.

Mr. FOWLER. Yes; from Memphis to Cincinnati—the Lee Line, from Memphis to Cincinnati.

Mr. CALLAWAY. How often does a steamer go up and down that river?

Mr. FOWLER. Oh, they ply up and down that river often. They have some four boats, and they ply up and down the river, passing my own town, two or three times a week, up and down.

Mr. CALLAWAY. How much is the tonnage of each boat?

Mr. FOWLER. Oh, they are so big that you could see them a hundred yards. [Laughter.]

Mr. HUGHES of West Virginia. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. Mr. Chairman, not to trifle with the gentleman's question, they are immense steamers, carrying hundreds of tons of freight as well as passengers. I yield to the gentleman from West Virginia.

Mr. HUGHES of West Virginia. Mr. Chairman, I just wanted to suggest to the gentleman that if he will look up the reports of the Ohio River he will see that it compares favorably with almost any carrying river in any part of the country.

Mr. CALLAWAY. I have a report here which shows that the Ohio is the greatest coal river in the world, but the railroads are driving it out of the coal business.

Mr. FOWLER. Here is the condition I was trying to get before the committee: Shawneetown lies in a vast valley, where the river, when it overflows the banks, stretches out for 5 or 6 miles wide. For a stretch of 80 miles up and down the river, during high water, Shawneetown is the only place with a safe harbor at which boats can land. It is the only place to get freight from the country to the Ohio River or from the Ohio River to the country. In other words, it is the only refuge of safety for the people. Those are the natural conditions. It is really nature's harbor ordinarily, but in high water it is a harbor because of the levee. Without the levee there is no harbor for a distance of 80 miles, but with the levee we get access to the Baltimore & Ohio Southwestern Railroad and the Louisville & Nashville Railroad, Beardstown and Shawneetown division, both of which terminate at Shawneetown.

Mr. COLLIER. Will the gentleman yield?

Mr. FOWLER. Yes.

Mr. COLLIER. What is the estimated cost of this proposed improvement?

Mr. FOWLER. One hundred thousand dollars. My proposition is to aid in the conserving of commerce and navigation by raising this levee. It is as much in the interest of navigation as the building or improving of any harbor or levee on any river in the United States. It is as much in the interest of navigation to strengthen and raise that levee as it is in the interest of navigation for like improvements in any other part of the United States on any other river, and it is just as meritorious. I will say to this honorable committee, as the levee proposition on the Mississippi River or the harbor proposition on the Hudson River, the Connecticut River, or any other river in the United States.

Mr. SPARKMAN. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. I will yield to the gentleman if he will get me a little more time.

Mr. SPARKMAN. Perhaps I had better not take up any more of the gentleman's time.

Mr. FOWLER. Now, Mr. Chairman, I do not want the good chairman of this committee to think I am assailing him——

Mr. SPARKMAN. Oh, no.

Mr. FOWLER. Because he is one of the most conscientious men I ever met. [Applause.] I could not pay him a tribute too high, for if there is a man who has ever commanded my highest respect and my heartiest handshake, the chairman of this honorable committee is that man. [Applause.] So I have no fight with him; I am fighting for a proposition equal to that of any other proposition in this bill. On the question of this levee proposition one of my colleagues has handed me a copy of the Floods and Levees of the Mississippi River, and as perhaps I have not read it before it might get me into a snare, but I will take the chance of snares when my proposition is laid by the side of any other proposition in this bill. It says:

> It is obvious that levees are upon a large portion of the river essential to prevent destruction of life and property by overflow. They give safety and ease to navigation, promote and facilitate commerce and trade by establishing either banks or landing places above the reach of floods, upon which produce can be placed while awaiting shipment, and where steamboats or river craft may land in time of higher water.

This is a report from the Mississippi River Commission. I thank the gentleman [Mr. COLLIER] for his kindness. Now, Mr. Chairman, it is quite evident to all thinking men that harbors and landing places are as necessary as the rivers in order to secure water transportation. The drift of civilization in America is to establish communication which will be rapid and cheap, and the policy of this Nation is to improve the watercourses which will afford easy communication, because it is the cheapest communication. Were it not for the rivers and lakes of this country, I doubt, sir, if the railroads were not checked by

the Interstate Commerce Commission, that a condition of oppression would fall upon the people of this country which they never have dreamed of before; but with the rivers and lakes to compete with the railroads of the country rates are held down and the people get cheaper commerce than they possibly could get in any other way.

So I say, Mr. Chairman, that the policy of this country, the policy of every political party in this country, is to improve what? To improve the rivers themselves for navigable purposes, the harbors for landing purposes, and the levees to conserve life and property. Without levees, harbors, and landing places commerce is destroyed in many instances, thereby rendering streams useless. Commerce on water is impossible without harbors and landing places. Levees are often necessary to protect harbors and perpetuate them, and it is as necessary to maintain levees as it is to maintain rivers. A river without harbors and landing places is like a boat without a rudder.

Mr. Chairman, the Government laid out Shawneetown, sold it to the people, and made a town out of it. The first great flood which we had was in the year 1832, and the Government started in with a systematic plan to protect the country and the town and the harbor, and from time to time appropriations have been made by the Government to build and maintain this levee, aggregating the sum of about $80,000, all told. The State has also made appropriations for like purposes. The citizens of the town have taxed themselves to the constitutional limit, having expended $250.000. They have done more; they have contributed from their private means, without calling upon the Government for aid. But now the proposition is too big for them, because the levee must be raised 3 feet and widened at the base. While they are still willing to tax themselves for this purpose, yet they are unable to raise sufficient funds to carry on and complete the work. If the work is done now it will cost less money, for within the near future, if high waters continue, it will be impaired in weak places, which can be prevented by proper attention now.

The people of this rich valley can not afford to lose this harbor; the Ohio River can not afford to lose it; the country can not afford to lose it. In 1898 an angry flood swept down like a mighty hurricane against the levee on the upper side of the town and plowed a mighty gap through that part of the levee, something like 50 to 75 feet deep, carried a portion of the town away in its madness, and destroyed 25 or 30 lives of the citizens of the town. Now, Mr. Chairman, the Government repaired that gap. It was a great project. Gen. Bixby never did a better job in his life. It has stood the storm of all high waters since that time, unharmed, and I believe it will stand there for all time to come. Give me Gen. Bixby at the head of the engineering work and I will build a levee at Shawneetown and make a harbor there for all the people, not for Shawneetown alone. I will make it for the people who navigate the Ohio River, to transport their commerce to the Southern States and back to the Northern States. It is not a sectional question at all—it is a national question. Talk about sectionalism in this Congress. Why, we might have had something of that kind in the past, but civilization has reached a high level, wherein the consciences of men have been so schooled that statesmen come here and legislate for all the people alike and not for a part of them. [Applause.]

Mr. Chairman, how much time have I remaining?

The CHAIRMAN (Mr. MAHAN). One minute.

Mr. FOWLER. I wanted to say, Mr. Chairman, that if this levee can be raised 3 feet higher and strengthened at the base in some portions, it will cost more than $100,000. But that is the amount I have asked for in my bill. If you will give us that amount, we will furnish the remainder and make it as strong as Gen. Bixby made the gap that was caused by the angry floods in 1898. I do not ask you, gentlemen, to give it to me, but I ask you to give it to the Ohio River for improvements thereon, the same as you give to other rivers and other harbors and other levees in this country. I ask it in the name of justice. It is only because my harbor proposition has a levee proposition with it that I was turned down. If the banks had been high enough, without the aid of a levee, and the harbor then stood in need of repair, I would have had no trouble whatever in securing aid at the hands of this committee, but simply because a levee is connected with the improvement of the harbor, I was unable to secure recognition in this bill.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. FOWLER. Now, we appropriate much money for river and harbor purposes. This bill carries many thousands of dollars for that purpose. Give me $100,000 for the Ohio River at Shawneetown, and I will then go home and tell my people that you are the best and wisest statesmen in the world. [Applause.]

Mr. SPARKMAN. Would the gentleman from Washington like to proceed now?

Mr. HUMPHREY of Washington. I can use some time. I yield to the gentleman from Kentucky [Mr. POWERS].

Mr. POWERS. Mr. Chairman, the rivers and harbors bill now under consideration carries a provision of much interest and great importance to the whole State of Kentucky, and especially to that portion of Kentucky which lies in the congressional district I have the honor to represent. I refer to that provision which indorses the expenditure of four and a half million dollars for the complete canalization of the upper Cumberland River from Burnside, Ky., to Nashville, Tenn., and which makes immediately available for that purpose the sum of $340,000. This sum will be used in purchasing four lock and dam sites in the State of Tennessee and six or eight lock and dam sites in the State of Kentucky, and for other purposes. When these sites are selected and locks and dams built thereon it will complete the canalization of the entire upper Cumberland from Nashville to Burnside. There are now seven locks and dams in the Cumberland River in the State of Tennessee above Nashville, and a site already selected for the eighth lock and dam.

On the Kentucky side we have but one lock and dam, namely, Lock and Dam 21, 30 miles below Burnside, Ky. The sites for all the new locks and dams on the Kentucky side will have to be selected and paid for, and as much as is necessary of the $340,000 to which I have made reference will be used for that purpose.

In the political campaigns down in the eleventh congressional district of Kentucky there has been much contention as to whom credit is due for Lock and Dam No. 21 below Burnside. Many of the followers and partisans of former Congressman D. C. Edwards have been vociferous in their claims that credit is due to him alone for the appropriations with which to construct Lock and Dam 21. A little history of this matter will not be amiss.

Away back in 1882 Congress made provision for a survey of the upper Cumberland River to determine the feasibility and cost of improving it from Nashville, Tenn., to Burnside, Ky. The report of this survey also included the improvement of the Cumberland River to Smiths Shoals, above Burnside, Ky. The entire project, as later revised, provided for the construction of 28 locks and dams, also a minimum depth of 6 feet in the river for the entire distance from Nashville, Tenn., to the proposed head of navigation, a distance of 357 miles. Work on this project was commenced in 1888 and was continued at intervals up to February 26, 1906, when the Board of Engineers for Rivers and Harbors recommended that work on the locks and dams already begun should be completed and that the rest of the project be discontinued. Locks 1 and 2 on the Tennessee side had at that time been completed, while Lock 21 on the Kentucky side and Locks 3, 4, 5, 6, and 7 on the Tennessee side were under construction. Since February 26, 1906, Lock 21 on the Kentucky side and Locks 3, 4, 5, 6, and 7 on the Tennessee side have been completed, but it must be remembered that on February 26, 1906, the Board of Engineers for Rivers and Harbors said that they would not recommend any more money for any further improvement on the upper Cumberland River, either on the Kentucky or the Tennessee side, except to complete the locks and dams already begun. That there can be no chance of inaccuracy, I quote the following from House Document No. 10, Sixty-third Congress, second session:

> On February 26, 1906, the Board of Engineers for Rivers and Harbors, after visiting the river and holding hearings to obtain full information, submitted a report (printed as H. Doc. No. 699, 59th Cong., 1st sess.) from which the following is quoted: "The board is of the opinion that the regulation of the river and * * * the completion of Locks and Dams Nos. 3, 4, 5, 6, and 7, above Nashville, * * * is worthy of being continued by the United States, but that the construction of the locks and dams proposed between Carthage and Burnside, except No. 21, now under contract, is not at present justified by the commerce involved."

This shows that I am not mistaken in the statements I have made. This report of the Board of Engineers for Rivers and Harbors made on February 26, 1906, put the upper Cumberland River on the "bum," so to speak, and not a single cent of money has been expended since that day, except on Lock 21, for the buying of a single site for any other lock and dam in the Cumberland River on the Kentucky side, nor the appropriation of a single cent for the construction of one. Congressman D. C. Edwards entered Congress on March 4, 1905, and remained in Congress for six years, or until March 4, 1911, when I succeeded him. He had been in Congress a few days less than one

year when the Board of Engineers for Rivers and Harbors, on February 26, 1906, reversed the policy which the Government in 1882 had undertaken and had had up to February 26, 1906, continuously under way, namely, the construction of enough locks and dams in the Cumberland River (28 in number) to make the river navigable the year around from Nashville to Burnside, Ky.

Mr. Edwards was a Member of Congress for six years. His first term began on March 4, 1905, and his last term ended on March 4, 1911. Dr. W. Godfrey Hunter was the man in Congress just prior to the first term of Mr. Edwards. Dr. Hunter became a Member of Congress on March 4, 1903, and continued in Congress for two years, or until March 4, 1905, when Mr. Edwards succeeded him. It was Dr. Hunter who succeeded in inducing the Fifty-eighth Congress to begin the improvement of the upper Cumberland below Burnside by appropriating $74,000 for this purpose. Dr. Hunter was a Member of the Fifty-eighth Congress, while Mr. Edwards was a Member of the Fifty-ninth, Sixtieth, and Sixty-first Congresses. So in the Fifty-eighth Congress $74,000 was appropriated by Congress to locate and begin the construction of Lock 21 below Burnside, Ky. The rivers and harbors bill carrying an appropriation of $74,000 became a law on March 3, 1905, before Mr. Edwards became a Member of Congress. Then, to Dr. W. Godfrey Hunter is due the credit of securing the $74,000 to begin the construction of Lock and Dam 21. On June 3, 1906, March 4, 1907, and June 25, 1910, Congressman Edwards secured $120,000, $30,000, and $85,000, respectively, to help complete Lock and Dam 21, but in the meantime, on February 26, 1906, just a little less than a year after Congressman Edwards came into office—he came in on March 4, 1905—the Board of Army Engineers for Rivers and Harbors reversed the policy of constructing locks and dams in the upper Cumberland, which policy had been inaugurated in 1882 and continued for a quarter of a century, and decided that Lock 21, which had already been partially appropriated for, would be the only lock and dam on the Kentucky River below Burnside that they would recommend for construction.

It has been the policy of the Government to begin at the mouth of a river and build locks and dams from the mouth up, and not from the head down. This accounts for the fact that, while the Government in 1882 decided upon the policy of improving and canalizing the entire upper Cumberland and adhered steadfastly to that policy for a quarter of a century, no Member of Congress from the eleventh congressional district of Kentucky was able to get any money appropriated to begin building locks and dams at the upper end of the river below Burnside, Ky. And this, too, notwithstanding the fact that the eleventh congressional district during all this time was represented by a Republican Representative, and notwithstanding the further fact that during the last 16 years of this period, or down to March 4, 1911, the Republican Party was in power in the Nation, with Republican Presidents in the White House, supported by Republican Congresses.

During the Republican rule Democratic Members of Congress from the State of Tennessee had gotten from Republican Congresses appropriations sufficient to build and construct Locks and Dams 1, 2, 3, 4, 5, 6, and 7 in the Cumberland River above Nashville, Tenn. These appropriations, all told, will amount to more than $2,000,000. Republican Members of Congress from the eleventh congressional district were just as able men as those from the State of Tennessee, and just as faithful to their trusts, but they were unable to induce the Government to break its precedent of improving its navigable rivers from the mouth up and not from the head down, and it remained for Dr. W. Godfrey Hunter to break this precedent by inducing Congress to appropriate during the Fifty-eighth Congress $74,000 to start the construction of Lock and Dam 21, below Burnside, Ky.

It is almost an impossible task to get Congress to make an appropriation to build a lock and dam in any stream unless the Board of Engineers for Rivers and Harbors recommend such construction. On February 26, 1906, they said in a report that the commerce in the upper Cumberland was not sufficient to justify the Government in expending more money in constructing locks and dams in the upper Cumberland on the Kentucky side except to complete Lock and Dam 21, as I have heretofore poiated out. This report of February 26, 1906, was made during the first year of Congressman Edwards's first term in Congress, and during the remaining five years he was a Member of the House he was unable to get the Government to reverse itself. He was unable to get any money appropriated to start any new locks and dams in the upper Cumberland.

When I became a Member of Congress on March 4, 1911, I found the upper Cumberland still under the ban, the Government refusing to start any new locks and dams there. All those conversant with the situation and interested in the canalization of the upper Cumberland knew that we never would get Congress to appropriate any more money for the purpose unless we could get a favorable report from the Board of Engineers for Rivers and Harbors to that effect. Realizing our dilemma, those interested in the improvement of the upper Cumberland set to work to see if they could get the Board of Engineers for Rivers and Harbors to reverse itself and report favorably instead of adversely upon the further canalization of the upper Cumberland. The first logical step in this matter was the introduction of a resolution before the Rivers and Harbors Committee of the House of Representatives, and accordingly the following resolution was introduced before and passed by that body:

*Resolved by the Committee on Rivers and Harbors of the House of Representatives, United States*, That the Board of Engineers for Rivers and Harbors created under section 3 of the river and harbor act approved June 13, 1902, be requested to reconsider its previous reports on Cumberland River above Nashville, Tenn., and to make a further report with recommendation as to the desirability at the present time of constructing one or more locks and dams above Lock and Dam No. 7.

On December 5, 1912, the said board granted a hearing here in Washington to those interested in the canalization of the upper Cumberland, and Congressman CORDELL HULL, who represents the Tennessee district on the Cumberland River just south of the Kentucky boundary line, myself, and others appeared before that board and made arguments for the complete canalization of the upper Cumberland from Burnside, Ky., to Nashville, Tenn. We urged that the commerce in the upper Cumberland and the isolation of our people from railroads and the lack of transportation facilities fully justified the Government in spending the money to improve and canalize this stream. We asked for a new survey of the upper Cumberland.

The board granted our request and instructed the local engineer, Maj. Burgess, who is stationed at Nashville, Tenn., to make a complete survey of the upper Cumberland from Burnside, Ky., to Nashville, Tenn., which he did, making his report on December 30, 1913. Maj. Burgess made a most thorough and exhaustive examination of the advisability of a complete canalization of the Cumberland River between those two points and reported favorably on that project. He estimated that it would cost the Government $4,500,000 to complete the canalization of the upper Cumberland from Burnside, Ky., to Nashville, Tenn.; that four new sites for locks and dams would have to be secured on the Tennessee side and six or eight on the Kentucky side, and that to purchase these sites and construct the necessary locks and dams would cost about $4,500,000, and that it ought to be done at the expense of the Government. The division engineer differed from Maj. Burgess, the local engineer, in this: The division engineer recommended that the canalization of the upper Cumberland ought not to be undertaken by the Federal Government unless the State of Kentucky and the State of Tennessee would undertake to pay half of the expense of it, or, in other words, $2,225,000. Those interested in the canalization of the upper Cumberland knew that the States of Kentucky and Tennessee would never do this, and the Board of Engineers for Rivers and Harbors on January 28, 1914, kindly granted us a hearing on this proposition. A pretty complete delegation of Senators and Members of Congress both from the States of Tennessee and Kentucky appeared before the board on that date and made arguments in favor of the complete canalization of the upper Cumberland at Government expense. I am one of those who made an argument upon that occasion. I do not believe I can present to this House any more clearly the justice of our cause or the needs of our people than I did before the Board of Engineers for Rivers and Harbors. With your permission, I will give you the substance of what I then said:

Mr. Chairman and gentlemen of the board, you have been very patient this morning in listening to this long hearing which we have had. I will, therefore, try to be as brief as possible. I was born and reared up in that section of country which we have been discussing this morning, and I know something of the natural resources of that section of territory. I have no question to raise about the jurisdiction or authority of this board in any sort of sense. I can appreciate that if it was estimated to take, say, $15,000,000 to properly canalize this stream, that this board could not afford to recommend, or the Government to undertake, a thing of that character and magnitude. I can understand the position of you gentlemen on that matter, and I think you are right about it. I am a member of the Rivers and Harbors Committee, and we could not do without this board or some similar board. It is indispensible to the proper placing of money over the country to improve the various river systems, harbors, and all that in the Union. As I understand it, the real question here is as to whether or not there is enough commerce, or will be enough commerce, in this immediate section to authorize or to justify the Federal Government in expending four and a half millions of dollars to properly canalize this river. As I understand it, that is the real question about which you gentlemen are concerned.

Col. BLACK. That's the question, sir.

Congressman POWERS. I shall not enter into a discussion at all of the local engineer's report. That matter is before you, and you have those facts and those figures. I will confine my remarks to a few outside matters. It has been said here that this section of the country

is one of the richest in coal and timber in the entire Union, and I think that is correct. It is true that in some of these lower counties here, where this river is to go through, the estimated value—the assessed value—of the property is small. It is small for the reason that they have no outlet for the wealth which they actually possess. That is the reason that the assessed value is so small, because in its present condition it isn't worth so much. I was reared up in Knox County. That is, not in this immediate section, but in southeastern Kentucky. I was reared on Brush Creek, and I remember when the citizens there were glad to get $5 and even less an acre for their coal lands. Lots of them were almost glad to give it away, because they were so poor they couldn't pay taxes on it even. Railroads have gone up into that territory and have bought that land that they were glad to sell at $4 or $5 an acre. To-day you can not purchase it for $100 an acre; and that coal-land leases for 10 cents a ton royalty, and they bring to the owners of that land as high as $1,000 an acre just on the royalty. It is almost impossible to calculate what the value of these lower counties will be when they can once get an outlet for the products which are actually there.

Milton H. Smith, the president of the Louisville & Nashville Railroad Co., said a few years ago that Harlan County in 10 or 20 years would be the richest county in the State outside of Jefferson and possibly one or two others; that the county of Harlan, now with a population of less than 10,000 people, in 20 years would be the richest county in the State, with these two exceptions. Railroads have now gone into that county, and all that country around in there is now being developed. With proper transportation facilities, the same thing will be true of this lower country here. Within the last 10 years Bell County has doubled its population. According to the census of 1900 Bell County had a population of 15,701, and according to the last census it has a population of 28,447. Bell County is a little up above. It is not in this immediate section; but I am showing you what will be done in these lower counties when they once have the transportation facilities that Bell County enjoys. Bell County's population has doubled within the last 10 years. Railroads have gone up those streams, and coal mines, blast furnaces, commerce, and population are springing up everywhere.

Bell County borders on Knox County. Brush Creek, the creek on which I was reared, lies in Knox County. It is 10 or 15 miles in length. It runs through one of the richest territories in Knox County. It is now rich in coal and at one time was exceedingly rich in timber. This Brush Creek Valley comprises an area of over 10,000 acres. It is worth millions of dollars. Many, many years ago one man owned all this territory. As part of the folklore of the territory it has been handed down to us that the former owner of this now princely domain sold the entire territory for a bedquilt and a rifle gun. Time, the construction of a railroad through that territory and up that valley, the opening up of divers coal mines, the establishment of as many coal plants, with their expensive equipment, the shipping out from that territory of large quantities of one of the best domestic and steam coals on the market, have told the story of the advance in price of that territory from a flintlock rifle and a homemade bedcover to its now many, many millions of dollars. Until just a few years ago it had no outlet save a muddy, hilly, and rocky wagon road and the fitful tides of a meandering watercourse. But things have changed.

Greasy Creek lies over in Bell County. It runs parallel to Brush Creek and just across the Brush and Greasy Mountain from it. The tops of the Brush and Greasy Mountain is for many miles the dividing line between Knox and Bell Counties. My father's farm extended to the Bell County line. Within the last few years a railroad has made its way up Greasy Creek, and coal-mining plants and coal-mining operations are now doing a thriving business in that rich field of undeveloped resources

Kentucky now stands fifth in the coal-producing States of the Union, Pennsylvania, West Virginia, Illinois, and Ohio alone being ahead of her. The entire State of Pennsylvania, the State that stands far, far in the lead in the production of both bituminous and anthracite coal, has but 14,200 square miles of bituminous coal territory, while eastern Kentucky has 10,270 square miles and western Kentucky has 6,400 square miles; and yet Pennsylvania produced 161,865,488 short tons of bituminous coal in 1912 and 84,361,598 short tons of anthracite coal, while Kentucky produced no anthracite coal at all. She has none to produce, and produced only 16,490,521 short tons of bituminous coal. There was produced in the entire United States in the year 1912 only a little over 500,000,000 tons of coal. The State of Pennsylvania produced over 246,000,000 tons, or nearly half of this. The State of Pennsylvania produced in 1912 over 160,000,000 tons of bituminous coal, while the State of Kentucky produced only 16,000,000 tons; and yet Kentucky has 16,670 square miles of bituminous coal, while Pennsylvania has only 14,200 square miles.

The eastern Kentucky coal field, with its 10,270 square miles of bituminous coal territory, produced in 1912 only 8,617,192 short tons of bituminous coal, while the State of Pennsylvania, with its 14,200 square miles of bituminous coal territory, produced in the same year over 160,000,000 tons of the same coal. Why is this? The reason is not hard to find. Pennsylvania has reasonably adequate transportation facilities; Kentucky has comparatively none.

To show you what Kentucky can do, when she has but moderate transportation facilities, let me cite the county of Bell, one of the counties in my district, as an example. I remember when, but a few years ago, there was not a foot of railroad in the entire county—not a bushel of coal produced for transportation. That was just a few years ago. Capital, however, was not content to leave untouched the rich resources of that splendid county. Of the 8,000,000 tons of coal produced in 1912 in the entire eastern Kentucky coal field Bell County alone produced over 2,000,000 of this.

I have outlined in a way the resources in coal of the eastern Kentucky coal field, and cited Bell County as an example of what we may in a measure expect from the lower Cumberland country when the Cumberland River is canalized from Burnside to Nashville. The counties of Wayne, Clinton, Cumberland, Russell, and Monroe will all be heard from.

Now, with reference to these lower counties here: While it is true that they are not quite so rich in coal, still they are rich. I wrote the local engineer awhile ago (Maj. Burgess) and suggested to him that if there were any facts connected with this upper Cumberland that it was in my power to give him I would gladly do so, and he said in his reply, "I would like to have an estimate of the coal and timber up in that section of the country." I immediately wrote to my precinct organization and asked my managers to send me an estimate of the amount of coal and timber in their particular voting precincts, and I got as many of those estimates as I could and sent them to Maj. Burgess. Later I got a letter from him saying that in some way they had been misplaced, and he asked me if I had a copy of them. I was unable to furnish him with a copy, as I did not have them, but I sent some telegrams down there to those lower counties recently and asked them to give me an estimate of the number of acres of coal and timber in those respective counties, and here is a letter from Mr. W. A. Dicken, of Clinton County, in which he has this to say:

"Your telegram received, and in answer will state: Several of the business men have been together, and we have made as careful an estimate of coal and timber lands as possible. We estimate the number of acres of coal land in this county to be 7,500 acres; average thickness of veins, 4 feet. The coal in this county is of a good quality. We estimate the number of acres of timber to be from 20,000 to 25,000. The timberlands furnish poplar, cedar, oak, chestnut, walnut, hickory, ash, dogwood, gum, etc. Besides the timber and coal there is an enormous amount of chickens, eggs, and produce of all kinds produced in this county. I don't know how to estimate the quantity of timber in this county, but will state that there is an enormous quantity of it. Hoping that we will get some relief for the marketing of our productions, and that the Government will see that it is impracticable and improbable for the people of this section to bear any part of the expense of the canalization of the Cumberland River, and wishing you the greatest success in all your undertakings, I am,

"Yours, very truly,

"W. A. DICKEN."

They have underestimated the number of acres of timberland, because from the census of 1910 the number of acres of woodland in that county is 51,367 acres and the standing timber that is not exactly woodland 283,200 acres in this county of Clinton. Doubtless they have been too conservative, too, in estimating the coal.

Cumberland County is one of the counties that this river goes through. According to the census of 1910 there are 95,341 acres of woodland, absolutely woodland, while there are 185,760 acres of standing timber. Of course some of it, you know, is cleared in part, and that is what is meant by standing timber; but 95,000 acres is woodland.

Take the county of Monroe. It has 86,945 acres of standing timber. And Russell County is another one of these counties, and it has 80,666 acres. Wayne County is another one of these counties right along on this river next to Burnside. It has 17,818 acres of woodland, forests.

Now, you can see something of the value of the resources of this country when it is once developed. Of course, as it now stands and as it has stood for many, many years, those people are away back there off of the railroads, and there is no river transportation. Their coal isn't worth anything to them. The same thing was true up in my section. There was a day when the people would virtually give their coal lands away to keep from paying taxes on them. Their land was of no service to them at all. And that is the reason why this assessed valuation is so small, because there is no outlet for the products that they actually have.

Col. BLACK. Are these coal lands in those counties?

Congressman POWERS. Yes; in Wayne, in Clinton, in Cumberland, and in Monroe. There are none in Russell County. I think one of the counties down there hasn't any coal, but it has 80,000 acres of woodlands altogether.

Now, as to the State paying any part of this money, they will never do it. I know what I am talking about. They will never do it. You take the Mississippi River country, away down there where those floods overflow. Why, those States down there are not putting up any of this money except one, and that is the State of Louisiana, and that is only an insignificant part of it. Those States as States, as I understand it, haven't done it. At any rate, these are the facts that were brought out at the hearings before the Rivers and Harbors Committee. As States they have not done a thing except one, and I think it is Louisiana, and that is a very inconsiderable portion.

Now, if those States down there, with their territory flooded by the angry waters of the Mississippi, destroying a material part of their actual possessions, won't put up any money to help defray part of the expense of preventing those overflows by means of these levees and all that, we can not expect Tennessee and Kentucky to do it in the case of the Cumberland River. Besides, these are mountain sections of the State, and, unfortunately, there has long existed a prejudice on the part of one section as against the other; and as to the legislature appropriating any money to do this, it will never do it, and it is just as well to kill the project as to expect or ask it. Of course we would prefer—speaking for myself and for my people—to have this report go in that the Government would do it if the local communities or State would do half of it than to have the board say that the thing is unworthy, because we would have no foothold then; and while it would mean the same to us now, and possibly would always mean the same to us, at the same time it would be more easy to get a foothold hereafter if the board reports favorably with this cooperative provision included than to say that the whole thing is unworthy of improvement at all. But this, gentlemen, is a worthy project, and we have many equities in our favor.

Now, you take many of the rivers of this country. They have railroads running alongside of them, and, notwithstanding that fact, this Government appropriates money—millions of dollars—to improve those streams. We have a proposition now concerning the Sacramento River in California, and I think it is a worthy project, and I am going to cast my vote for it. It developed in the hearings before the Rivers and Harbors Committee that there are five railroads running through that section, and many of them up and down this stream. These people have railroad facilities to get their stuff to the markets of the world, and yet, notwithstanding that, the Government is appropriating its money to canalize that stream and to make it navigable. We have no railroads in this Cumberland River country here. We are absolutely cut off. A territory there in Kentucky and Tennessee as big as the State of Connecticut hasn't a foot of railroad in it. We have no way of getting to the world at all. It would not be so necessary if we had railroads; we would then have some means of transportation. But we have neither railroad transportation nor water transportation—no transportation but wagon-road transportation—and unless this Cumberland River is open 12 months out of the year it wouldn't help the coal business in that country.

Coal plants have either got to run or not to run. No man would get coal territory and set up a coal plant and operate for only four or five months of the year. He wouldn't think about doing it unless he could get transportation all the year round. He couldn't afford to operate six or even nine months and then shut down. So it is absolutely necessary for him to have river transportation 12 months in the year. Coal will constitute one of the principal industries in that country if it is ever in a position where it can get its coal to the market. These people have been cut off down there. Their population hasn't increased virtually any for the last 20 years. I have the figures

here. Clinton County in 1890 had 7,000 population; 1900, 7,000; 1910, 8,153—and for the simple reason that they are down there and they are cut off. They can not get to market with any of their products. Their coal is worth nothing to them except just to supply their immediate needs. Their agricultural products are worth nothing to them except to subsist upon. But if you will ever once give them an outlet, then we will be able to tell you a different story. And those people down there have been cut off for all these years. It is a lamentable situation. It has been a lamentable situation for all of southeastern Kentucky. You have heard a good deal about that section of the country in the newspapers and in magazines and elsewhere. Why, there is no way for them to get out. You know that running along eastern Kentucky there is the Appalachian Mountain system, a great barrier to progress and civilization which in early times migrated westward. There was no way for my ancestors to know the difference in possibilities between that section, which has no arms to the sea, no lakes, no navigable rivers, no way of getting to the world, no way for them to know the difference, I say, in the possibilities in that section of the country and the great Ohio-Indiana-Illinois district. Civilization couldn't come to us from the East. It had to come down the Ohio, and then eastward into the State and eastern counties. Only within the last few years have railroads been traversing that great rich storehouse. In the improvement of the Cumberland below Nashville, I am informed, the one idea that they had in view was this rich coal field—this rich timber in eastern Tennessee and in eastern Kentucky.

The Government has paid out of its own pocket, without an iota of expense to Tennessee, for the improvement of the Cumberland River south of Nashville. I say the National Government has paid all this money for the improvement of the Cumberland River up to that point. In other words, it has gone through that section of the country where the people were most able to contribute half of the expense; and now, when the Federal Government has improved this stream up to the point where it really reaches the coal and timber and things valuable to the country, improved it on its own hook and responsibility, when it is ready to reach out and grab the thing that the country and the world needs, then to say "hands off; we can't proceed any further unless the State or counties put up half of the expense," it is doing a great injustice, gentlemen, not only to the people along the lower Cumberland, but an injustice to the people up there who are so poor that they couldn't put up money if they would. There is no way for those poor counties up there to contribute any of this money themselves, and the State won't do it, and it is up to the National Government. Why, you take this little county of Clinton that I am calling your attention to here. There was born within its boundary lines Hon. Shelby M. Cullom, from Illinois, the grand old man from that State who is now at death's door in the city of Washington. There was born in that county Gov. McMillan, of Tennessee, and Gov. Preston H. Leslie, who was once governor of the State of Kentucky and was governor of one of the western States. There are just as good people up there as there are in the world. Far removed from the marts of trade, far removed from the great industries of the world, they are nevertheless the purest and the greatest reservoir of old Anglo-Saxon blood in this country. We ask you, gentlemen, if you can see your way clear to do it, to open up this field. We know we have the coal there, and all we ask is an opportunity to get it to the market. I thank you.

I do not know that I can add to what I then said. The Board of Engineers for Rivers and Harbors, after hearing the arguments made before it, recommended to the Chief of Engineers of the Army that the entire upper Cumberland be locked and dammed at Government expense. I want to insert here as part of my remarks the report made by the Board of Engineers for Rivers and Harbors through its senior member, Col. W. M. Black, to the Chief of Engineers of the United States Army:

WAR DEPARTMENT,
THE BOARD OF ENGINEERS FOR RIVERS AND HARBORS,
*Washington, D. C., February 4, 1914.*

From: The senior member the Board of Engineers for Rivers and Harbors.
To: The Chief of Engineers United States Army, Washington, D. C.
Subject: Report on Cumberland River, Lock 7 to Lock 21.

1. The board has the honor to submit its report in response to the following resolution:

"*Resolved by the Committee on Rivers and Harbors of the House of Representatives, United States*, That the Board of Engineers for Rivers and Harbors created under section 3 of the river and harbor act approved June 13, 1902, be requested to reconsider its previous reports on Cumberland River above Nashville, Tenn., and to make a further report with recommendation as to the desirability at the present time of constructing one or more locks and dams above Lock and Dam No. 7."

2. The question of improving the Cumberland River above Lock and Dam No. 7 has been considered a number of times, and the general physical and commercial conditions have been covered in reports now before Congress. The more recent of these, which bear directly upon the improvement now under consideration, are published in House Documents No. 699, Fifty-ninth Congress, first session, and No. 632, Sixty-first Congress, second session.

3. Upon receipt of the resolution quoted above the board requested and later obtained a preliminary report from the district officer, dated October 29, 1912, covering the questions to be considered at the present time. That report contains an exhaustive discussion of the historical, physical, and commercial data available up to that time. A hearing was given in the office of the board on December 5, 1912, which was followed by a recommendation for a survey, the report of which bears date of December 30, 1913. These reports are full and comprehensive, and it is not considered necessary to go into details at this time. The essential facts obtained are as follows:

4. The distance covered by the survey from Locks Nos. 7 to 21 is about 171 miles, the fall being 127.5 feet. The original slack-water project for this reach provided for the construction of 13 locks and dams, while the present survey indicates that the number may be reduced to 10 without undue flooding of the banks. The estimated cost of the improvement is, in round numbers, $4,500,000 for first construction and $50,000 per year for operation.

5. It appeared from information furnished by parties in interest that the commercial statistics heretofore reported for this section of river were incomplete and more or less unreliable. This led to a more thorough investigation of the subject, in which the district officer was assisted by the Cumberland River Improvement Association. Data now available indicate that there is a commerce on the upper Cumberland amounting to about 300,000 tons, which is considerably more than heretofore reported.

6. The district officer goes into considerable detail regarding the difficulties and hardships experienced by the people living adjacent to this section of river, due to the entire lack of rail transportation, the uncertain and intermittent facilities afforded by the river, and the large annual flood losses of timber and farm products stored on the banks awaiting a favorable stage for shipment. He also outlines the advantages and benefits that would result from better water transportation. He is now of opinion that the extent of the present traffic and the likelihood of a considerable increase following the completion of the slack-water system justify the construction of the additional 10 locks and dams required, provided, however, that the States of Kentucky and Tennessee shall bind themselves to pay all damages arising from flowage, as well as the cost of ascertaining the same.

7. The division engineer does not think that the work is justified by the commercial benefits to the general public, but he states that the present inquiry discloses important benefits to the locality that indicate the propriety of requiring local cooperation, such as is often obtained from a community where it is furnished an effective transportation line. He is of opinion that the additional work should not be undertaken except on the condition that the States of Kentucky and Tennessee, or the local communities affected, shall contribute one-half of the estimated cost of construction. Otherwise he concurs with the district officer.

8. In addition to the information contained in the reports of the district officer and in those heretofore submitted, the board has given consideration to statements and arguments made at a hearing given at its office on January 28, 1914, which was attended by Hon. Ollie M. James, United States Senator; Hon. John K. Shields, United States Senator; Hon. Cordell Hull, Hon. Swagar Sherley, Hon. Harvey Helm, Hon. A. O. Stanley, Hon. A. W. Barkley, Hon. J. W. Byrns, Hon. J. A. Moon, and Hon. Caleb Powers, Members of Congress; Mr. W. E. Myer, and Mr. B. L. Quarles, all of whom addressed the board. Attention is invited to the record of the hearing forwarded herewith.

9. The section of country tributary to the Cumberland River between Locks 7 and 21, covering a very large area, is practically without any economical transportation facilities, and it appears from statements made at the hearing that there is no prospect of any railroad entering this section, not, however, on account of any lack of freight. A large part of this area is covered with timber of high value within hauling distance of the river, but under the existing uncertainties of navigation it can not be economically marketed. Much of the land in the valley and back in the hills is fertile but can not be cultivated to advantage for the same reason. There are also extensive coal lands that can be made tributary to the upper reaches of the river by short-rail connections, and it is claimed that these lands will be developed and that coal will be shipped out in large quantities. Much stress has been laid upon the fact that the United States has undertaken the improvement of both the upper and lower Cumberland by locks and dams, where the country has the benefit of rail transportation, leaving unimproved the section now under consideration, which is without rail facilities or the prospect of having any.

10. The amount of commerce at present is not extensive when considered in connection with an expensive slackwater improvement, and the amount that may be expected in the future is only conjectural, and it is believed that, measured by the usual standards applied in considering the question of advisability in such cases, it would hardly be sufficient to warrant a favorable recommendation. It is believed, however, that the present case is exceptional by reason of the vast territory affected, with no means of transportation, present or prospective, except by the river, and particularly because of the fact that Congress has undertaken the improvement of the river both above and below, leaving unimproved this section, the commerce of which must be largely looked to for justification of work already undertaken.

11. In view of the circumstances, the board concurs with the district officer and reports that in its opinion it is advisable for the United States to undertake the improvement of the Cumberland River from Lock 7 to Lock 21, as proposed by the district officer, at an estimated cost of $4,500,000 for construction, and about $50,000 annually for maintenance, provided, however, that the States, counties, or other local agencies shall bind themselves to protect the United States against any and all claims for damages due to overflow. The project should be subject to such minor modification from time to time by the Chief of Engineers as experience with the work indicates to be advisable. The first appropriation should be $340,000 for securing all lock and dam sites and for beginning construction of Lock and Dam No. 8, with contract authorization for $201,000 for completion of No. 8, and subsequent annual appropriations should be sufficient to permit the beginning of construction of two additional locks and dams each year.

12. In compliance with law, the board reports that there are no questions of terminal facilities, water power, or other subjects so related to the project proposed that they may be coordinated therewith to lessen the cost and compensate the Government for expenditures made in the interests of navigation.

For the board:

W. M. BLACK,
*Colonel, Corps of Engineers, Senior Member of the Board.*

I want also to insert a letter from the Chief of Engineers, United States Army, to Hon. STEPHEN M. SPARKMAN, chairman of the Committee on Rivers and Harbors, of which I have the honor to be a member:

CUMBERLAND RIVER ABOVE NASHVILLE, TENN.

[Letter from the Chief of Engineers, United States Army, transmitting report of the Board of Engineers for Rivers and Harbors on Cumberland River above Nashville, Tenn.]

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
*Washington, February 4, 1914.*

SIR: Referring to your letter of February 16, 1912, inclosing a resolution of the Committee on Rivers and Harbors of the House of Representatives, dated February 15, 1912, requesting the Board of Engineers for Rivers and Harbors to reconsider its previous reports on Cumberland River above Nashville, Tenn., and to make a further report with recommendation as to the desirability at the present time of constructing one or more locks and dams above Lock and Dam No. 7, I have the honor to forward herewith reports by the board dated December 23, 1912, and February 4, 1914, in response thereto, together with reports by the district officer, Maj. Harry Burgess, Corps of Engineers, dated

October 29, 1912, and December 30, 1913, submitted for the information of the board in its study of the question presented.

2. For reasons fully explained in its report of February 4, 1914, the board concurs with the district officer in the opinion that it is advisable for the United States to undertake the improvement of the Cumberland River from Lock 7 to Lock 21 by the construction of 10 locks and dams, at an estimated cost of $4,500,000 for construction and about $50,000 annually for operation and maintenance, provided, however, that the States, counties, or other local agencies shall bind themselves to protect the United States against any and all claims for damages due to overflow, the project to be subject to such minor modifications from time to time by the Chief of Engineers as experience with the work may indicate to be advisable. The division engineer is of opinion that the improvement should not be undertaken except on the condition that the States of Kentucky and Tennessee, or the local communities, shall contribute one-half of the estimated cost of construction.

3. After due consideration of all the facts available I concur with the views of the district officer and the Board of Engineers for Rivers and Harbors. The first appropriation should be $340,000 for securing all lock and dam sites and for beginning construction of Lock and Dam No. 8, with contract authorization for $201,000, covering the completion of this lock and dam. Subsequent appropriations should be sufficient to permit the beginning of construction of two additional locks and dams each year.

Very respectfully,

EDW. BURR,
*Colonel, Corps of Engineers, Acting Chief of Engineers.*

Hon. S. M. SPARKMAN,
*Chairman Committee on Rivers and Harbors,*
*House of Representatives.*

The Rivers and Harbors Committee, of which, as I said, I am a member, in reporting the rivers and harbors bill to the House—the one now under discussion—recommend, in the language of the bill, the "improving of the Cumberland River above Nashville, Tenn.," in accordance with the recommendations of the Chief of Engineers and the Board of Engineers for Rivers and Harbors, printed in Rivers and Harbors Committee Document No. 10, Sixty-third Congress, second session, and subject to the conditions set forth in said document. So the Rivers and Harbors Committee have indorsed the complete canalization of the Cumberland River from Burnside, Ky., to Nashville, Tenn., at a cost of four and a half million dollars, to be paid for by the Government, with $50,000 annually for maintenance; and the present bill carries an appropriation of $340,000 to purchase all the sites for locks and dams from Lock 21, below Burnside, Ky., to Lock 8, above Carthage, Tenn., and for other purposes, as was recommended both by the Board of Engineers for Rivers and Harbors and the Chief of Engineers of the Army.

I have no doubt but that the House will pass this bill and that it will soon become a law. The upper Cumberland is now on its way to complete canalization. After the sites have all been selected and secured, which I hope to see done in less than a year from the passage of this bill, the work will be pushed as rapidly as possible until the last lock and dam have been completed.

The Board of Engineers for Rivers and Harbors, as well as the Chief of Engineers of the Army, recommend that after this year the Government undertake to construct each year thereafter one additional lock and dam in the upper end of the river below Lock 21 and one in the lower end of the river above Lock 8, so in a few years this work will be completed and the people in the counties along the Cumberland River from Burnside to Nashville will realize their dreams of over a quarter of a century. Yes; it is over that—much over that. They began to dream about it away back in 1820, as the following excerpts, taken from the report of Maj. Harry Burgess to the Chief of Engineers of the Army of date October 29, 1912, will show:

HISTORICAL.

As far back as 1820 appropriations were made by the States of Tennessee and Kentucky for the improvement of the Cumberland River. In 1822–1828 Congress made several appropriations, but no additional funds were provided until 1871, when, after a lapse of 33 years, appropriations were again made and a more regular and systematic improvement was commenced. These funds, as they became available from time to time, were applied in constructing riprap retaining walls, removing gravel bars and rock ledges, and confining the low-water flow to selected channels by means of wing dams, all with a view to extending the boating season and rendering navigation safer.

22. In 1882 provision was made by Congress for a survey of the upper river to determine the feasibility and cost of improving it from Nashville, Tenn., to Burnside, Ky., by the construction of locks and dams. The report of this survey also included the improvement of Smith Shoals, above Burnside. The entire project, as later revised, provided for the construction of 28 locks and dams, to provide a minimum depth of 6 feet for the entire distance from Nashville to the proposed head of navigation, 357 miles. The cost of this work was originally estimated at $8,500,000. Work under this project was commenced in 1888, and has been continued at intervals when funds were available up to the present time. In all, Congress has provided $2,914,000 for the project of canalization from Nashville to Burnside. Under these appropriations Locks and Dams 1, 2, 3, 4, 5, 6, 7, and 21 have been completed and placed in operation.

23. On February 26, 1906, the Board of Engineers for Rivers and Harbors, after visiting the river and holding hearings to obtain full information, submitted a report (printed as H. Doc. No. 699, 59th Cong., 1st sess.) from which the following is quoted:

"The board is of the opinion that the regulation of the river and * * * the completion of Locks and Dams Nos. 3, 4, 5, 6, and 7, above Nashville, * * * is worthy of being continued by the United States, but that the construction of the locks and dams proposed between Carthage and Burnside, except No. 21, now under contract, is not at present justified by the commerce involved."

24. This recommendation resulted in a modification of the project, limiting the scope of the work originally contemplated. The present approved project provides, therefore, for continuing open-river or regulation work from the head of the pool formed by Dam No. 7 to Lock No. 21; but the only work now being done under this project, or contemplated, is the removal of snags and the cutting of overhanging timber.

The Board of Engineers for Rivers and Harbors have recently reversed the report of February 26, 1906, and so, after long waiting, much anxiety, and many disappointments, the people of the upper Cumberland are about to come into their own. I congratulate them—the sturdy, honest, liberty-loving people that they are—that the dawn of their commercial redemption is drawing nigh.

Mr. HUMPHREY of Washington. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Washington [Mr. HUMPHREY] asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. HAWLEY. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HUMPHREY of Washington. Mr. Chairman, I yield 40 minutes to the gentleman from Massachusetts [Mr. TREADWAY]. [Applause.]

Mr. TREADWAY. Mr. Chairman, previous to my membership in Congress probably as frequent a kind of misinformation as any that I obtained had to do with the annual appropriations of rivers and harbors. The published information which has reached the public has almost invariably been of a critical nature, so that the mind of the average citizen, dependent on the public press for his knowledge of matters pertaining to rivers and harbors appropriations, has been poisoned against this expenditure.

A bill carrying as many items as an annual river and harbor bill does naturally will have certain ones in it which, however meritorious they may be, will be open to the criticism of the public if not fully aware of the conditions surrounding the appropriations. It is therefore comparatively easy to make a general criticism against this legislation based on a speaker's possible personal antipathy to certain special features.

Although I knew that my predecessor was for many years one of the influential members of the Committee on Rivers and Harbors, and from my intimate acquaintance with him realized that his attitude toward legislation would be on the broad ground of public benefit, I nevertheless imbibed some of the prevailing critical views toward this legislation in general.

A year's service on the committee has entirely removed this impression. Whatever may be the result of the passage of the pending bill in this Congress, I wish here and now to express my small token of praise in behalf of the chairman and my colleagues on the committee for their invariable breadth of consideration, careful study of the projects, and accurate decisions as to their relative value. In this bill careful study has been given to the merits of the projects, and the final recommendations are based upon these investigations.

During the time the gentleman from Florida has been chairman, as well as during the time the present Senator from Ohio [Mr. BURTON] was chairman, it has been an established rule of the committee not to include projects unless they have been first favorably reported upon by the distinguished Board of Engineers. While all of their favorable recommendations are not accepted, no project is adopted which has not been favorably considered by this impartial and scientific tribunal. The claim of partiality and local favoritism is therefore entirely removed, and it would be difficult to conceive of any future Committee on Rivers and Harbors returning to the old system so long in vogue, but now entirely done away with and discredited. Possibly some of the prejudice against legislation of this character in the past few years has been the result of conditions existing previous to the adoption of the present method of framing the bill. [Applause.]

There are two questions to be considered in our minds: First, Should the National Government expend money for the purpose of improving the rivers and harbors of the country for navigation? Second, If this work is to be done, in what manner shall it be authorized?

I doubt very much whether advocates of no Federal work will be found very numerous. While we are frequently in doubt as to the proper relations between the States and National Government, it would hardly seem reasonable to expect that the commerce of the world entering seaports should be dependent

upon the enterprise of a State for proper facilities and depth of channel. This matter is absolutely Federal in its bearing, the State or local municipalities only being a factor so far as they voluntarily wish to contribute in order to secure more favorable terms and more generous appropriations through the Federal Government.

The question then arises as to the relationship between the Federal Government and navigable streams. The only opportunity for argument in this case might be where a navigable stream is entirely within the limits of one State, of which there are instances. But fair judgment and all court decisions seem to tend toward recognition of Federal authority and control; consequently the responsibility and expense.

We therefore come to the second question, in what manner shall the Government's money be authorized for river and harbor appropriations? I submit that the method in vogue is as nearly just and equitable as can be made. All proposed projects are first considered by the Committee on Rivers and Harbors, and, if seemingly meritorious, an examination and survey are ordered. These are made by the experts of the War Department entirely on a basis of merit from the scientific standpoint of engineers. The results are submitted to Congress and placed in the hands of the Committee on Rivers and Harbors. Hearings are held, and the committee, having this testimony and the scientific opinions of the Board of Engineers, are certainly in a position to pass impartial judgment. I therefore think, provided the recommendations of the committee are accepted, that the loud cry, perhaps getting less distinct as years pass, or favoritism and governmental waste can be refuted in the minds of fair judges.

It is not my purpose to take the time of the House to enter into detailed discussion of the many projects contained in this bill. Others more experienced and capable than I will do this. I do desire, however, to briefly refer to a few of the largest items carried in the bill, then to items carried which directly affect New England, and, lastly, to an item not included in the present bill, but of deep interest to the district I represent on this floor.

LARGE GENERAL APPROPRIATIONS.

There are several large items applying to New York and the Hudson River. The item of $750,000 for improving the Hudson River above the city of Hudson is a continuation of the project previously adopted in order to secure a depth of 12 feet at the lowest low water. A general depth of 12 feet has been adopted in the construction of the new barge canal, for which the State of New York has made very large expenditures.

The enormous amount of passenger and freight business on the upper Hudson, from the barge canal to New York City, is so well known that it is hardly necessary to refer to it. It is estimated that in 1912, 3,045,136 short tons, valued at $172,107,996 were carried.

The appropriation for East River is $500,000, and for Staten Island Sound, N. Y. and N. J., a like amount. A very enthusiastic delegation, under the guidance of the Member from New York [Mr. GOULDEN], led by Hon. John P. Mitchell, mayor of New York, occupied all of one day in presenting to the committee the merits of the various projects affecting their city. There are two objects in view: One is to remove certain serious obstructions in the harbor, and the other is to clear the East River sufficiently to secure a channel 35 feet deep in order to allow ocean-going steamers to go out of New York Harbor by way of the Sound rather than causing the congestion of what is called "going down the bay."

In addition, this will permit of the use of dock facilities along the line of the East River not now possible. We of New England are also interested in the development of this channel, as it is not now safe or possible for the largest vessels plying between Boston and New York to go through Long Island Sound and thence into the East River to New York.

During the course of the hearing Mayor Mitchell testified as to the desirability of the National Government appropriating money in aid of navigation and was disposed to refute critical statements that may have, from time to time, appeared in reference to river and harbor appropriations.

It hardly seems possible that there can be in the mind of any Member of this House a question of the advisability of such appropriations as may be deemed necessary for maintenance of New York as the leading port of the Western Hemisphere. It is for Congress to cooperate with the State in maintaining New York's supremacy, and I for one shall vote for all reasonable appropriations recommended for New York City.

The maintenance of a channel 35 feet deep at mean low water reaching the great port of Philadelphia should certainly meet with our approbation. The tonnage of Philadelphia is estimated for 1912 at 26,267,335, valued at $1,235,106,621. These figures of themselves speak louder than any words of description of the claim of Philadelphia for a liberal appropriation from Congress in the interest of navigation. [Applause.]

It is expected that opposition will develop to the appropriation for the purchase of the Chesapeake & Delaware Canal. The Government has properly, I think, inaugurated a policy of inland waterways, a great intracoastal system from Florida to New England. One of the links is that from the Delaware River to the Chesapeake Bay, and while another route is possible it seems that the purchase of this canal at the estimate made in the bill would be a fair investment by the Government. Estimates of the value have been made by the Board of Engineers very much higher than that of the committee, so that a purchase at this price would be in the end a saving of large sums.

The port of Galveston stands second in the value of foreign exports of any in the country, and therefore is entitled to proper care and the expenditure of reasonable sums under governmental supervision. The total volume is approximately 4,117,524 short tons, valued at $509,181,480. The continuation of the construction of a sea wall protecting the harbor is very necessary in order to avoid the possibility of repetition of the great damage done there a few years ago.

You will hear from the gentleman from Mississippi [Mr. HUMPHREYS] all the possible arguments relative to the great needs of the Mississippi River and country adjacent, so that there is no occasion for my repeating any of the arguments, even briefly, that will be submitted by him.

The enormous amount of navigation on the Ohio River and the great saving in shipments of coal are ample reasons for continuation of the work of constructing the locks and dams, of which six have already been completed and three are under construction.

Crossing the continent, we find appropriation is made for the continuation of the work on the Columbia River, Oreg. and Wash., and also a new project on the Sacramento and Feather Rivers. This will be expensive, but that it merits our recommendation is shown by the large amount of money the State of California and local interests are willing to contribute. It is somewhat similar to the work on the Mississippi in that while it is primarily a project in the interest of navigation, it is also one of flood prevention and reclamation.

These are some of the largest general items carried in the bill.

NEW ENGLAND APPROPRIATIONS.

The appropriation of $105,000 for Portland Harbor, Me., is for continuation of work that has been under construction for some years. This harbor does an immense amount of coal business, the commerce during the year 1912 amounting to 3,259,949 short tons, more than one-half of which was coal. The value of the commodities was estimated at $107,981,000. In addition to the freight they also do a very large passenger business, and during the year 1912 the passenger movement amounted to 1,454,238.

The harbors in Connecticut, including New London, New Haven, and Greenwich, receive various sums in accordance with the importance of the projects and the recommendations of the Board of Engineers.

BOSTON HARBOR.

The project for establishing a channel 35 feet deep for Boston Harbor is practically completed. A survey for a channel 40 feet deep was authorized in 1913. The people of Massachusetts feel that Boston Harbor is deserving of a channel that will accommodate some of the largest ocean-going vessels. Statistics prepared by the director of the port of Boston and the Boston Chamber of Commerce show the rapidly increasing commerce of the port.

The State of Massachusetts in 1911 appropriated $9,000,000 for the development and improvement of commerce of Boston. A very able board has charge of this expenditure, and already gratifying results have been shown from its work. The largest trans-Atlantic liners can be secured for regular trips in and out of Boston provided a sufficiently deep channel is obtained.

It is a source of disappointment that the survey for a channel 40 feet in depth was not completed in time so that the Committee on Rivers and Harbors could consider the acceptance of the project in this bill. It is hoped that a favorable report will be secured from the Board of Engineers, and undoubtedly in the next river and harbor bill an effort will be made to make an appropriation to commence this project so much needed for the development of the commerce of New England.

BEVERLY HARBOR.

The proposition to deepen the channel at Beverly Harbor to 24 feet is a deserving one, and the appropriation of $61,500, with a continuing contract for a like sum, should meet with our ap-

proval. Owing to local conditions, it would be much more satisfactory if we could see our way to make one appropriation of the amount of $123,000 rather than half as a continuing contract. The commerce at this harbor consists chiefly of coal and oil, but owing to the fact that the channel is not deep enough some of the larger vessels which would ordinarily enter there have been unable to do so. Consequently, the business has not been as large as the city would desire, although during the past 10 years the amount of increase in the tonnage of cargoes delivered at this harbor has been 346 per cent. During the year 1912 the commerce amounted to 325,063 short tons, valued at $2,173,365. Of this amount about 245,000 tons were of coal. The maximum draft that can be carried now at mean low water is 18 feet, and it is estimated that if the depth of this channel can be increased to 24 feet the larger coal and oil vessels will be able to enter the harbor at any time. This means the commerce will be materially increased, and that it will be of benefit to both the shippers and to business men in general. Local and State assistance will be liberally forthcoming, as much interest in this project is shown.

OTHER MASSACHUSETTS APPROPRIATIONS.

It is very necessary to continue the removal of the dangerous rocks at Pollock Rip Channel, Mass., as commerce bound for New England passes along this channel, and there is evidence that it will continue to be very generally used even after the opening of the Cape Cod Canal.

The improvement of New Bedford Harbor and Fairhaven is in accordance with recommendations of the board and at the earnest solicitation of local interests.

It can thus be clearly seen that the large items for Massachusetts are for thoroughly meritorious projects and are based on the needs of commerce of the respective ports.

THE CONNECTICUT RIVER.

Probably no stream in the country has received more preliminary study and attention and had less actual work done upon it than the Connecticut River above Hartford, and again it is a source of disappointment to the people in Connecticut and Massachusetts that no appropriation appears in the present river and harbor bill. The expression "watchful waiting" as applied to Connecticut River navigation was worn threadbare, became gray with age, and reached a condition of senility long before it was ever coined by our distinguished President for application to our nonactive foreign policy. It, perhaps, is as applicable, however, to the method of handling the Connecticut River navigation as to the Mexican policy of the administration. I might fittingly describe both as inanimate inertia.

The subject is such a vital one to a large portion of the district I have the honor to represent that I can not allow the matter to go unnoticed during consideration of this bill. Great interest in this question has been shown in both the States of Connecticut and Massachusetts. Much of the information which I will submit is taken from the report of the Connecticut Valley Waterways Board on an investigation of the Connecticut River, and the report of the Connecticut Rivers, Harbors, and Bridges Commission, the former a Massachusetts board and the latter a Connecticut board, authorized by the legislatures of their respective States.

The resolve passed by the Massachusetts Legislature and approved on June 13, 1912, reads as follows:

That the governor, with the advice and consent of the council, is hereby authorized to appoint three persons, residents of the Commonwealth, one of whom shall be a member of the board of harbor and land commissioners. The persons so appointed shall constitute a board to be known as the Connecticut Valley Waterway Board. The governor shall designate the chairman of the board. It shall be the duty of the board to investigate the subject of the improvement of the Connecticut River for the purposes of navigation and to report to the next general court not later than the 1st day of February all facts concerning the present condition and uses of said river; what investigations, reports, appropriations, and expenditures have been made by the United States and by the Commonwealth of Massachusetts relative to the navigation of said river and protection of the river banks; and what action, if any, should be taken by the Commonwealth of Massachusetts and the various municipalities bordering on said river or contiguous thereto, either in cooperation with the United States and the various corporations owning or controlling water rights or privileges on said river or without such cooperation, to carry into effect such projects as may be recommended for increasing the present facilities for navigation. The board may expend a sum not exceeding $2,500 to meet such expenses as may be necessary in carrying out the purposes of this resolve. The report shall contain data as follows:

"(a) The existence and establishment of both private and public terminal and transfer facilities contiguous to the navigable water proposed to be improved, and, if water terminals have been constructed, the general location, description, and use made of the same, with an opinion as to their adequacy and efficiency, whether private or public. If no public terminals have been constructed, or if they are inadequate in number, there shall be included in the report an opinion in general terms as to the necessity, number, and appropriate location of the same, and also the necessary relations of such proposed terminals to the development of commerce.

(b) The development and utilization of water power for industrial and commercial purposes.

(c) Such other subjects as may be properly connected with such project: *Provided*, That in the investigation and study of these questions consideration shall be given only to their bearing upon the improvement of navigation, to the possibility and desirability of their being coordinated in a logical and proper manner with improvements for navigation to lessen the cost of such improvements and to compensate the Government for expenditures made in the interest of navigation, and to their relation to the development and regulation of commerce.

The board shall receive such compensation as the governor and council shall determine.

I quote from the report of this board:

At the public hearings held in Holyoke and Springfield, Gov. Foss was present and spoke of the value of the development of inland waterways, of the urgent necessity for the opening of the Connecticut River to navigation, and of the tremendous commercial importance to the State of an unobstructed waterway from Holyoke to the sea.

It is impossible to mistake the sentiment of the cities and towns of the Connecticut Valley. At every hearing the board was welcomed by audiences both large and enthusiastic. Local speakers presented strong arguments, sustained by local statistics, to prove the need of the community for waterway transportation and its inevitable commercial advantages. In addition, letters were sent to the meetings by individuals and corporations in favor of the movement. The citizens of the Connecticut Valley are demanding not only in their own interest but in behalf of the commercial prosperity of the whole State the opening to navigation of the Connecticut River from its upper reaches to the sea.

I also submit the conclusions and recommendations of the Connecticut Valley Waterway Board so far as these recommendations applied to the subject under consideration:

The demands of the cities and towns in the Connecticut River Valley between Holyoke and the southerly boundary line of Massachusetts for ample facilities for navigation on the Connecticut River from Long Island Sound to the present head of navigation near the Holyoke Dam, in order that they may benefit by a saving in freight charges on coal, cotton, lumber, and other commodities which might be brought by water and on manufactured articles which might be shipped by water from this community should be urged before Congress. The State of Massachusetts, if necessary, should cooperate with the cities and towns in that section of the Commonwealth by making sufficient appropriations for defraying a part of the cost of doing such work as may be required by plans and projects which may be adopted by the Federal Government for providing such facilities for navigation.

The depth of water which should now be provided in that part of the Connecticut River between Hartford and Holyoke should not be less than that now available from Long Island Sound to Hartford. A depth of 12 feet would enable the class of barges which now pass through the new barge canal to proceed through Long Island Sound and up this river as far as Springfield and Holyoke. Whenever the present depth to Hartford is increased a corresponding increase should be made in the depth of the channel as far as Holyoke.

In any law enacted by Congress for the construction of a dam across the Connecticut River at any point thereon between the mouth of said river and the Holyoke Dam it should be provided that a lock be built in said dam of sufficient dimensions for the convenient passage of water craft. Plans for said dam should provide for a depth over the sill in the lock not less than the ultimate depth to be provided in said river between its mouth and Hartford.

Any law enacted by Congress for the construction of a dam across the Connecticut River at any point thereon between the mouth of said river and the Holyoke Dam which provides not only for the improvement of navigation but also for the development of power for commercial or other uses, should require payment to the Federal Government for the privilege granted.

It is recommended that in case any corporation duly authorized by Congress to relocate and construct a dam across the Connecticut River at Windsor Locks, in the State of Connecticut, should fail to build the same, then the board of harbor and land commissioners, acting jointly with representatives of the State of Connecticut, shall investigate the matter and report to the general court such plan or plans as it may deem necessary or desirable for relocating and constructing said dam, with a lock therein, the work to be done by the State of Massachusetts and the State of Connecticut, acting jointly, for the purpose of improving navigation on said river and developing and utilizing the water power at this locality. * * * The board recommends that the legislature adopt resolutions in favor of a full and complete development of the entire length of the Connecticut River in Massachusetts, and that the Commonwealth cooperate with the Federal Government in carrying into effect projects of improvement for the benefit of navigation and appropriate from time to time the necessary funds for use in connection with such appropriations as may be made by Congress for the improvement and development of the whole river in accordance with such plans and projects as may be adopted by the United States.

Mr. PLATT. Mr. Chairman, will the gentleman yield? What new barge canal is it to which the gentleman just referred?

Mr. TREADWAY. The large canal built across the State of New York deepening the old Erie Canal.

Mr. PLATT. Does the gentleman mean to imply that it is open now?

Mr. TREADWAY. The work is being done, I understand. Is it not?

Mr. PLATT. It will not be open before 1915 or 1916.

Mr. TREADWAY. It will be long after that, I am afraid, before we get a corresponding depth on the Connecticut River at the rate we have been going of late years.

Mr. PLATT. Why not build a new canal straight across from the Hudson River to the Connecticut instead of expecting traffic to go 300 miles around through New York Harbor and the East River?

Mr. TREADWAY. I believe that would suit the gentleman's constituents better, and it would reach a section in which I am somewhat interested, too. It is not, however, a project at present in contemplation, so it will be necessary for us to con-

fine our attention to those actively before us, such as deeper waterways in New York and this very active proposition of navigation on the Connecticut River.

The great interest of the people of the section affected is thus readily recognized, and the willingness of both the States of Massachusetts and Connecticut to cooperate is very apparent.

DESCRIPTION OF CONNECTICUT RIVER.

The Connecticut River is about 345 miles in length, flowing between the States of New Hampshire and Vermont and across the States of Massachusetts and Connecticut, emptying into Long Island Sound. The head of commercial navigation under present conditions is at the city of Hartford, 52 miles from the mouth. The river below Hartford is under improvement, the project providing for a channel 100 feet wide and 12 feet deep at mean low water; boats of 10 feet draft are now regularly maintained. The city of Holyoke, Mass., is 33 miles above Hartford, Springfield being 8 miles nearer Hartford than Holyoke. The places principally affected are Springfield, West Springfield, Chicopee, and Holyoke, besides small towns along the river both in Massachusetts and Connecticut. The population of Springfield at the last census in 1910 was 88,926; Holyoke, 57,730; Chicopee, 25,401; and West Springfield, 9,224.

It will not be necessary for me to describe the various examinations and surveys, with the accompanying reports of engineers, that have been made extending over a good many years, as these matters have all been previously referred to on this floor. The last survey was authorized in the river and harbor act of 1913. The preliminary examination for that survey was made during the summer of 1913, and has been duly approved by the officials of the War Department. It will appear later why the final survey has not as yet been referred to Congress.

The river may be divided into three sections between Hartford and Holyoke.

The first, 11 miles from Hartford to Enfield Rapids; the second from the Falls to a low dam 5 miles above, where there is a canal with locks owned by a private company, capable of passing a boat 80 feet long and 18 feet wide; the third is from the Enfield Dam to the foot of the rapids below a dam at Holyoke; distance, about 16¼ miles.

The committee is so thoroughly convinced of the justice of a Government appropriation for Connecticut River navigation that the chairman and a majority of the members inspected the river last October, and while no official vote has been taken as a result of that visit I fully believe the personal inspection was all that was needed to convince them of the necessity of as prompt action as can be consistently secured.

The conclusions of the preliminary examinations made by the district officer last year are that—

In view of the large and important commerce that may be expected to result from its improvement I am of the opinion that the Connecticut River between Hartford, Conn., and Holyoke, Mass., is worthy of improvement by the Federal Government, if a channel of adequate depth can be secured in connection with the development of power, at a reasonable cost, and I recommend that such detailed surveys and estimates as are necessary to determine the cost be authorized. As extensive data is now available, no general survey of the river is considered necessary.

Mr. TOWNSEND. Will the gentleman yield?

Mr. TREADWAY. Certainly.

Mr. TOWNSEND. I am very much interested in this particular part of the gentleman's remarks. I want to ask whether there is any dam between Holyoke and Hartford?

Mr. TREADWAY. There is one and I will refer to that in just a moment.

Mr. TOWNSEND. I thank the gentleman. I want to hear about that.

Mr. TREADWAY. I will say that I have not made an extensive reference to that dam from the fact that in a previous Congress the matter was referred to, and a full description of the company controlling the dam and the present water power developed from it is of former record. Rights were secured from the General Assembly of Connecticut by a charter in 1824 to build a dam and locks. This company is still in existence, but it is now a part of the one to which I will refer later as anxious to construct suitable locks and dam for the present needs of the section.

The Board of Engineers and the Chief of Engineers concur with the district officer and division engineer in recommending "A survey in order to determine the extent and advisability of such improvement as may appear practicable in conjunction with any power development at Enfield Rapids that may be authorized by Congress."

For my part, rather than the policy of "watchful waiting" I prefer that of "patient perseverance," and that has been the characteristic of the friends of Connecticut River navigation.

At various times the question of authority between the Federal Government and the State government over waterpower on navigable streams has been at issue, but this has been cleared up by the opinion of the Supreme Court of the United States in the case of United States against Chandler Dunbar Water Power Co. A unanimous decision written by Mr. Justice Lurton was handed down on May 26, 1913.

In the last Congress a power proposition was added in the Senate to the rivers and harbors bill, but was not accepted in conference. The reason why it was not adopted in conference was the expectation that one of the first acts of the new administration would be the establishment of the policy of the Government in the relation of power projects on navigable streams and the attitude of the Government toward Federal or State control thereof. A year has elapsed and we are still watchfully waiting the inanimate inertia of the Democratic administration which is so sorely testing our patient perseverance.

The time has arrived when this question must be met. The Connecticut River is typical of numerous streams throughout the country where thousands upon thousands of horsepower are daily running to waste. The old saying is more true to-day than ever, "That the mill will never grind with the water that has flowed by," in that with the modern appliances the transmission of power over long distance is a reality. I have already stated that it is a source of regret not to have this appropriation in the present bill, and the reason is the delay in the adoption of this policy. We have had frequent announcement during the year that this matter was under consideration, but the first actual indication of life came a few weeks ago in the letter the Secretary of War wrote to the distinguished chairman of the Committee on Interstate and Foreign Commerce in which the policy of the President was outlined. It is profoundly to be hoped that the committee's evident desire to provide such legislation as the administration wishes relative to the Panama Canal tolls question and the so-called control of big business may not entirely obscure the pressing need of power-control legislation.

It is not alone for navigation that this legislation is needed, but for conservation of the great natural resources of our navigable streams for power development. It is the most distressing waste of energy from which the country is suffering to-day, and one which should be checked with all possible haste.

Let me call attention how this general proposition applies particularly to the Connecticut River.

Nature provides the possible development of 35,000 horsepower in a thickly populated territory having large manufacturing plants, within a limited area, in need of electrical energy. These plants employ several hundred thousand people, who could thus secure cheaper light and heat. All this can be obtained without any expense to the Government and absolutely controlled by it within proper bounds. In connection with this, at a cost to the Federal Treasury small in comparison to the benefits received therefrom, navigation can also be secured serving this large population. Taking all this into consideration, is it any wonder that a loud call goes up for the prompt enactment of the necessary legislation?

To particularize on this last statement, let me say an ably financed company stands ready to accept such terms as the Government and State may designate to build the necessary locks and dam near Enfield or Windsor Locks, an estimated expenditure of about $5,000,000, and turn these over to the Government free of all cost in return for the right to manufacture electric energy under conditions prescribed by the State or Federal authorities. It seems to me that every possible condition is favorable to the public welfare. The only Government appropriation asked for in this transaction would be a sufficient sum to secure a channel, say, 12 feet in depth, from Hartford to Holyoke.

As recently as March 9 the Secretary of Commerce delivered an address before the Brooklyn Institute of Arts and Sciences on the development of American commerce, in which he made this reference to Connecticut River navigation.

There is a strong tendency in all parts of our country to develop more and more the commerce of our rivers, and when there shall have been established, as soon as we hope there will be, a satisfactory fundamental basis for the development of dams for power and navigation upon our navigable streams, we may look for marked progress. The time is not far distant when such cities as Springfield and Holyoke in Massachusetts will have direct steamboat connection with New York and when other of their sister towns in different States may also have the benefit of water competition.

Mr. MOORE. Will the gentleman yield?

Mr. TREADWAY. I will, with pleasure.

Mr. MOORE. The cities of Springfield, Chicopee, and Holyoke are all above the rapids at Enfield, are they not?

Mr. TREADWAY. Yes.

Mr. MOORE. And if the river is opened to navigation, there ought to be a very material reduction in the fuel cost for New England, and particularly for those three cities?

Mr. TREADWAY. I am about to present some brief statistics; but the subject to which the gentleman refers could be followed up in great detail to show the benefit that would accrue in freight rates through river navigation.

Mr. MOORE. Is the gentleman going to deal with that question?

Mr. TREADWAY. Very briefly, in the next paragraph; and I thank the gentleman for calling attention to it at this time.

Mr. MOORE. The New England fuel bill is very extensive and suffers for lack of transportation facilities.

Mr. TREADWAY. I entirely agree with the gentleman, and the people of the section we are considering are great sufferers. The sooner we secure river navigation the greater the saving to the consumer of western New England.

I might quote almost endless statistics in support of Connecticut River navigation, but will not weary you therewith, only giving a few very brief ones, referring only to places within Massachusetts on the river.

The value of stock and material used in Springfield, Holyoke, Chicopee, and West Springfield for 1911 was $54,213,766. The value of the product of these four places was $99,489,139. The consumption of coal in these places, together with three adjoining towns, was 1,387,417 tons. The output of the paper mills alone in Holyoke in 1912 was over 112,000 tons. The total freight tonnage in 1912 was nearly 3,000,000 tons. It is estimated that the saving by water navigation on coal alone would range from 60 to 80 cents per ton, and on all commodities from 10 to 15 per cent.

I think those are the statistics the gentleman from Pennsylvania [Mr. MOORE] wished, and I am sorry I have not the time to give them more in detail.

Mr. MOORE. Yes.

Mr. TREADWAY. I could continue at great length upon the crying necessity for this development, upon the long and arduous struggle the proponents of this legislation have made, upon the need of prompt establishment of the Government's policy in relation to power development upon navigable streams, but I feel that I have taken sufficient time of the House and am willing to rest the case on the evidence submitted. I assure you this question will be further advocated when the next river and harbor bill comes before this body, and we fully expect to secure an appropriation commensurate with the merits of the proposition. In the meantime, I earnestly advocate the passage of the present bill, which while it does not carry an appropriation for the most deserving project in the United States, the absence of it is through no fault of the present Committee on Rivers and Harbors. [Applause.]

Mr. Chairman, I yield back the balance of my time.

Mr. HUMPHREY of Washington. Mr. Chairman, how much time did the gentleman from Massachusetts [Mr. TREADWAY] consume?

The CHAIRMAN. Thirty minutes.

Mr. HUMPHREY of Washington. I yield to the gentleman from Missouri [Mr. DYER].

Mr. DYER. Mr. Chairman and gentlemen of the committee, I desire particularly at this time to call to your attention that portion of this bill which provides appropriations for the continuance of the work on the Mississippi River. I had hoped, and I believe that a great majority of the people of the Mississippi Valley had hoped, that the Committee on Rivers and Harbors would in this Congress and by this time have approved and recommended to Congress a project that would mean the building of the levees of the Mississippi River in such a way that there would be established for all time to come, with, of course, the usual necessary repairs from time to time, protection of the property, the farms, and the homes in that valley, which have suffered so greatly from the flood waters of that great river.

I can not conceive, Mr. Chairman, of anything of greater importance that this Congress could do than to authorize a project that would mean a completion of the work that has been done in piecemeal as regards the levees of the Mississippi River. I care not especially what project is approved by the Rivers and Harbors Committee or which might be the one that Congress should decide upon. I believe that the project advocated by the distinguished gentleman from Mississippi [Mr. HUMPHREYS] is a most feasible and practicable one to bring forth and to enact into law at this session. That plan has been studied out most carefully by scientific men and United States Army engineers, and they most generally approve of the plan proposed in the Humphreys bill. What we want now is action above everything else, and I hope that we will get it at this Congress.

Mr. Chairman, Congress has appropriated considerable money from time to time for the improvement of the levees of the Mississippi River. The usual amount for that purpose is contained in the present bill, but this method of appropriating is not satisfactory to the people of the Mississippi Valley. They believe that the time has come when Congress should formulate and put into operation a plan that will permanently improve conditions. I urge upon the Committee on Rivers and Harbors of this House that they come to some decision at the earliest possible date as to what should be done about this matter. If none of the plans recommended by pending bills are satisfactory, then Congress should authorize the appointment of a commission of experienced engineers, both from the United States Army and from civil life, for the purpose of determining and recommending to Congress the best thing to do.

I have introduced a bill (H. R. 4296) providing for the selection of such a commission. That bill is now pending before the Committee on Rivers and Harbors. I also have a bill pending before that committee (H. R. 2462) providing for an appropriation to raise the levees and reclaim the swamp lands. This bill I introduced after full conference with the Chief of Engineers of the United States Army. I have no special pride, however, in these bills that I have introduced, but would most gladly support any bill that would carry out the purposes that I have indicated and that are so necessary to the health, happiness, and prosperity of the people that I in part represent here. There is no longer any doubt as to the feasibility that the levees can be raised and the swamp land reclaimed. This has been tried in many other places with success, and the cost of doing this work would be very small when we compare it with the results that would be realized. There are now some 77,000,000 acres of swamp and overflowed land in the Mississippi Valley which can be drained and made suitable for cultivation. The total cost I have determined, from careful calculation, would be about $15 per acre. The present value of these lands runs from $2 to $20 per acre. When they have been drained and made suitable for permanent cultivation the value will be anywhere from $60 to $100 per acre, and in many instances it could be sold as high as $400 per acre. Consider these figures as an evidence of the importance of the project. These 77,000,000 acres, after drainage, with an average value of $60 per acre, would have a total value of $4,620,000,000. The present value of this land is only about $8 per acre, which amounts to $616,000,000.

The cost of draining this land at $15 per acre would amount to $1,155,000,000. The value of the land, plus the cost of draining, would be $1,771,000,000. The amount, therefore, that the land would increase in value by reason of drainage would amount to $2,849,000,000. This land would also provide homes for 1,925,000 families, and thus result in a real and substantial reduction in the cost of living by increasing production. Vegetables and provisions for the home and table could be raised on this rich and fertile land in the greatest abundance. We all recognize the need for reducing the cost of living. It is much higher now than a year ago. The Democratic Party claimed in the last campaign that it could solve this high-cost-of-living proposition in the interest of the people. They asked for the power to do so, and the power was given them. For over one year we have had a Democratic President and a Democratic Congress, but the cost of living has not been decreased. While the new tariff law has been in force many months and while that party has had its way as regards the tariff law, the cost of living is higher; and, besides, mills and factories are either closed or partly shut down on account of it. This tariff law gives preference to foreign manufacturers by reducing or taking off entirely the tax that they have paid under former administrations. This policy of the party in power has thrown already more than 3,000,000 men in this country out of employment. These men are honest and industrious, and most of them skillful in their trades; yet they can not find work. Why? It is because their work has been taken from them and given to foreigners, who are now manufacturing with cheap Japanese, Chinese, Hindu, and so forth, labor that which we in America must buy to eat, wear, and to carry on business. We buy nothing any cheaper and the foreigners are getting our money. Our men are idle and our mills and factories are wholly or partly closed. Bread lines are now a daily scene in our cities, and soup houses, no doubt, will be here soon. In some places, it is stated, they are already to be seen. Experience is an expensive teacher. Let us hope that this renewed evidence of free trade and tariff for revenue only will be a lesson to the people of this country that will cause them to drive this party from power and control at the earliest possible date. The enactment of the present tariff law has been already shown to be detrimental to the interests of the American farmer, the American mill, the American factory, and to every American industry.

Mr. Chairman, as regards this tariff, Congress has legislated against our own people and in favor of Europe, Japan, China, India, and other foreigners. Now, let us do something for our

own people and our own country. Reclaim this vast area of land in the Mississippi Valley. This land would be most suitable for the cultivation of provisions and vegetables. It would also increase in taxable value, and the getting rid of these swamp lands would tend to the health of the Nation. It would banish mosquitoes and malaria from this section of the country; it would aid in the construction of good roads, and in many ways be of great benefit to the Nation. We should not continue appropriating without some definite plan fixed and agreed upon, but we should get down to the real proposition at once, which is the raising of the levees, the deepening of the channel, and the reclaiming of this swamp and overflow land. The people of the city of St. Louis are anxious to see this brought about at the earliest practicable date. We of that city recognize that this will be the means of opening up new avenues of trade and commerce for our products, which we so abundantly manufacture, and of which we are capable of supplying the needs of the 30,000,000 of people in our trade territory.

The people of my city are most willing to do their part in paying the bill to do this job. We now pay taxes on real estate and personal property to the amount of $615,745,890. We pay more than one-third of all the taxes for our State. Our city pays more taxes to the Government than all the rest of Missouri. We will pay more of the income tax than the rest of our State combined. Still, Mr. Chairman, we are willing to bear our share of these burdens and also help to provide the money necessary for this great Mississippi River undertaking. Our people are a noble, a patriotic, and a most industrious one. We are doing our part at all times, and often more, for the city, State, and Nation.

Let me call your attention to the report of the commissioner of labor statistics of Missouri for the year 1912, as showing the amount of our manufacturing industries, and therefore why we are anxious to see this new territory opened up. This report states that the total value of goods manufactured in St. Louis during that year was $345,657,438; that the total value of materials and supplies used by us amounted to $196,255,770; that the total amount paid by us in salaries and wages was $70,698,296; and that we paid for rent, taxes, and insurance during that year $18,267,134; that we expended for miscellaneous disbursements in connection with our manufacturing industry, $24,249,814; also that we employed in this work 86,903 men and 25,564 women, making a total of 112,467 men and women given work in our manufacturing business. Our total capital invested in this business amounted to $240,794,199; that the value of the ground and buildings was $59,016,163; and that the value of machinery, fixtures, and tools used in this industry was $53,637,508.

Mr. Chairman, I know of nothing that this Congress could do which would be of greater interest to my city than the enactment of a law that would mean the reclaiming of these swamp and overflowed lands of the Mississippi Valley by the raising of the levees and the deepening of the channel from St. Louis to the Gulf. As stated, we need markets for our goods. When we have additional markets we can increase our manufactured products. That will give additional employment to many women in the factories in our city, and give markets for goods raised by the farmers, a great quantity of which we would need additional for our increased population and also for use in our factories and mills.

Open up this swamp and overflowed land to cultivation and let us have the farmers to till the soil. Some one has said that there were more farm lands now available for cultivation than there were farmers to cultivate them; but I doubt that, and much less do I doubt that there would be any such land as this remaining idle. Then, Mr. Chairman, if we have not enough farmers, let us urge the immigration of farmers to this country. We need good farmer immigrants. We ought to encourage immigration to the country and to the farm. That is the section that needs it most. In the early history of Missouri there was a large immigration of Germans to St. Louis and to other parts of the State. They have made splendid farmers, and I would be glad to see more of them come. The farm lands in Germany are poor as compared with the lands that we can reclaim in the Mississippi Valley. Some people are to-day decrying further immigration to this country. I join with them to the extent that all persons who are defective, physically and morally, should be excluded. I can not favor, however, exclusion of good, honest people that do not come in those classes simply on the ground that they can not read or write. Many of the best immigrants we have had to this country would have been excluded with such a law in force. What we want are men and women of muscle and good minds to help develop the great resources of this Nation.

The recent announcement that it will not be many years before Germany can boast of a population of 80,000,000 should make us pause before cutting down our immigration figures. The last recorded estimate of the population of Germany was 64,903,423, while our population was 91,972,267, according to the last census.

Germany, however, supported its population on an area estimated at 208,830 square miles, while the United States has 3,616,494 square miles for its 92,000,000 people.

The wealth of the two nations apparently bears a more direct relation to the difference in population than to the difference in land area. Germany's wealth was recently estimated at $60,500,000,000, while that of the United States was estimated at $130,000,000,000.

So far as the relation of our population to the area of the country is concerned, we are behind every civilized country in the world. We should not talk about restricting immigration until our population is large enough to utilize the land economically.

Another great advantage, Mr. Chairman, that would accrue to the people of my city by the carrying out of this project would be to give us deep water from St. Louis to New Orleans. In other words, we could load our manufactured products at St. Louis in seagoing ships, send the goods on down the Mississippi to the Gulf, thence on through the Panama Canal, and thus deliver them to the western coast of North and South America at a greatly reduced expense, and thus enable us to sell at a less price.

St. Louis and Missouri would benefit greatly by reason of this shorter route for its products. St. Louis is to-day exporting some $50,000,000 worth of goods annually to South American countries. St. Louis will be nearer the western coast of South America when the canal is finished than any other manufacturing city. The export trade of St. Louis will greatly increase, and as its manufacturing industries enlarge and its product becomes greater so will the great agricultural sections of the Mississippi Valley feel this impulse and greater prosperity come to it also.

The one stumbling block to the carrying out of this great undertaking would be the repealing of the act of Congress providing for free tolls for American coastwise ships passing through the Panama Canal. That question will come before the House in a short time, and I sincerely hope that this Congress will stand by the action of the last Congress. I can not see any worthy excuse or necessity for the repealing of that act. I was in doubt about this question at one time, but a thorough study of it has convinced me that free tolls for our coastwise ships should stand. The Panama Canal belongs to this country and its people, and it should be used for their special benefit. Their money has made the canal possible. President Woodrow Wilson asks Congress to repeal the free-toll provision of the canal act. In his recent message to Congress on this subject he said, in part:

> I ask this of you in support of the foreign policy of the administration. I shall not know how to deal with other matters of even greater delicacy and nearer consequence if you do not grant it to me in ungrudging measure.

The President in this message furnished Congress no information as to how free tolls for American ships interfere with his foreign policy. I, for one, believing our country morally and legally justified in our previous action, and knowing the great advantages to my section of the country in having free tolls, can not agree with the President, and can not support him in this matter on his mere request, without information as to its necessity. It seems to me that this action of the administration is an abject surrender to Great Britain. The President spoke in favor of the action of the last Congress as regards free tolls on August 15, 1912, at Washington Park, N. J., in these words:

> One of the great objects in cutting the great ditch across the Isthmus of Panama is to allow farmers who are near the Atlantic to ship to the Pacific by way of the Atlantic ports; to allow all the farmers on what I may, standing here, call this part of the continent to find an outlet at ports of the Gulf or the ports of the Atlantic seaboard, and then have coastwise steamers carry their products down around through the canal and up the Pacific coast or down the coast of South America.
>
> Now, at present there are no ships to do that, and one of the bills pending—passed, I believe, yesterday by the Senate as it had passed the House—provides for free toll for American ships through that canal and prohibits any ship from passing through which is owned by any American railroad company. You see the object of that, don't you? [Applause.] We don't want the railroads to compete with themselves, because we understand that kind of competition. We want water carriage to compete with land carriage, so as to be perfectly sure that you are going to get better rates around the canal than you would across the continent.

The Democratic Party platform, upon which the President made his campaign for election, declared in favor of free tolls in the following words:

We favor the exemption from tolls of American ships engaged in coastwise trade passing through the Panama Canal.

We also favor legislation forbidding the use of the Panama Canal by ships owned or controlled by railroad carriers engaged in transportation competitive with the canal.

This question was debated quite freely in the last Congress, both in the House and in the Senate, and the action of that Congress showed that it was not only in favor of free tolls, but also that our action was not a violation of the treaty with Great Britain. Great Britain has not sent any complaint to this country of the action of Congress in that regard. At least Congress has been advised of no such action by Great Britain. It is of immense importance, of course, that our country should keep inviolate its treaty agreements and remain on friendly terms with Great Britain and other foreign countries, but I do not believe that the American people want this done to the dishonor of our own Nation. I do not believe that we should bow to Great Britain in this regard. I, as one Member of this Congress, will not bow to the will of Great Britain when we are right. I think more of the intelligence and patriotism of my fellow citizens and those whom I represent than to think that they would wish me to. On the contrary, I have received hundreds of telegrams and letters asking me to vote against repeal and not one asking me to vote otherwise. The following is a sample of these many requests:

ST. LOUIS, MO., *March 9, 1914.*

Hon. L. C. DYER,
*House of Representatives, Washington, D. C.*

A resolution was unanimously passed at a large public meeting held here last evening urging that you oppose a repeal of the Panama Canal tolls bill, as in the opinion of the meeting it is helpful to American commercial interest and not in violation of any treaty I have seen. Requested to wire you to this effect.

O'NEILL RYAN.

The press of the country is most generally against repeal. The New York American, a Democratic newspaper, has an editorial of late date, similar to thousands of other papers, on this question, as follows:

President Wilson's appeal to Congress to accept the British position on the canal-tolls question and to repeal without consideration the legislation adopted for the encouragement of United States shipping, and for the release of the Pacific coast from railroad extortions, is not convincing.

The merits of the legislation asked for the President declines to discuss. He discussed it once during the presidential campaign and warmly applauded the law he now wishes repealed. But that was, perhaps, in his own phrase, only "molasses to catch flies."

Indeed, the President has never even argued the American side of the case with Great Britain. He has never sent to the British foreign office any communication defending the law which our National Congress enacted. He yields without putting in a defense of American rights.

His appeal to Congress sounds like the petition of a person in terror. The sturdy ring of confident assurance of his country's power, of proper reliance upon the dignity and self-respect of the Nation, which might be expected from the President of the United States is wholly lacking.

He begs the Congress to undo its own law, passed by a Democratic House and a Republican Senate and signed by a Republican President, simply to make his path easier in impending diplomatic controversies. "I shall not know," he says, "how to deal with other matters of even greater delicacy and nearer consequence if you do not grant it to me in ungrudging measure."

The foreign policy of the Wilson administration has from the first been its weakest part. But the proposition now that the Nation shall extricate the President from dilemmas into which bungling diplomacy has led him, by yielding up, one after another, fundamental national rights is preposterous.

How long will it be before the nations of the world will see in the United States a melon ripe for the cutting, and one after another present to the complaisant President claims which, without defense, he will satisfy for dread of further complications?

We appeal from the President to his party in Congress in this moment of menace to the national honor, dignity, and integrity.

The United States has had its periods of weakness, its times when neither in population, wealth, nor military preparedness was it fit to cope with an aggressor. But in no such dark and menacing moment did it show the white feather.

At New Orleans, on the soil of that State, one of whose Senators now fears to vote according to his convictions lest Great Britain object, Andrew Jackson defended the right of the United States to self-government, and became a Democratic President whom the historian Woodrow Wilson was forced to honor, though President Wilson fails to emulate him.

History recalls no instance of Jackson's abandoning a prerogative of the American Government through fear of foreign disapproval.

In the days of our Civil War, torn and bleeding as we were, exhausted with fratricidal strife, pouring out treasure and sacrificing human life in the struggle, we could yet quietly compel Great Britain to stop fitting out Confederate cruisers to harry our commerce, and put a decisive check to Napoleon's project of erecting an empire in Mexico.

Lincoln did not find even the colossal contest of the Civil War a reason to submit to foreign impositions and aggressions.

In 1895 Great Britain reached across the sea to take a slice of Venezuela territory. The United States was woefully deficient in military or naval preparedness, but a Democratic President, Grover Cleveland, interposed a firm but effective protest, and notified Her Majesty's Government in words that live:

"To-day the United States is practically sovereign upon this continent, and its fiat is law upon the subjects to which it confines its interposition."

Great Britain called that "shirt-sleeves diplomacy," but it compelled respect. Oh, for a few weeks of Grover Cleveland and Richard Olney now!

The President's appeal to Congress is primarily an appeal to his party. Can it be possible that the Democrats will signalize the first year of their return to power, after a quarter of a century, by turning right-about face at the demands of Great Britain, by sacrificing the right to deal with domestic problems in accordance with domestic needs, by giving up without a struggle the chief advantage of the Panama Canal, which they built after other peoples had talked about it for 400 years, and by exposing the United States to the world as a Government that may be bullied with impunity?

This is what the Democrats of Congress will do, this is the position in which they will place their party and their country if they give acquiescence to the demands of President Wilson to-day.

Mr. William R. Hearst, a former Democratic Member of Congress and now the editor and owner of many Democratic newspapers and one time a candidate for President himself, made the following personal statement regarding the action of President Wilson:

Mr. Wilson, following the custom well established in England and her dependencies, has again delivered a speech from the throne to Parliament.

It is not unusual for the governor-general or other head of an English colonial government to urge the colonial parliament to do nothing which would offend the mother country, so Mr. Wilson follows accepted usage in this respect.

It is perhaps without precedent, however, that a representative of any British possession, no matter how dependent, should ask his people to sacrifice their own undeniable rights and their own unquestionable interests to propitiate the British Government and to save his personal face.

History does not relate any instance, when these States were actually British Crown colonies, that a governor appointed by the King had this much of shamefully mingled humility and hardihood.

Nevertheless, Mr. Wilson, President of these formerly free and one-time independent United States, has had this much impudence and this little patriotism.

If Congress retains any spark of self-respect or American independence, it will tell Mr. Wilson that his face is not worth saving—at least, not at the sacrifice of the public interest and the national honor.

If Congress has not enough patriotism to adopt such an independent attitude, it is time for all honest Democrats and genuine Americans to save their own self-respect by quitting a perjured party which no longer considers its own precedent, its platform pledges, or the public welfare.

WILLIAM RANDOLPH HEARST.

Mr. Chairman, I want to do everything that is honorable and right to sustain the hands of the President of the United States. I would most gladly vote in support of the President's wishes to uphold the honor and dignity of this Nation in "ungrudging measure"; but never will I vote to uphold him in surrendering the established rights of this country to Great Britain. I refer to this matter of free tolls and the President's position at this time only in connection with the project I have long advocated of providing deep waterway from St. Louis to the Gulf of Mexico, and the reclaiming of the swamp and overflowed lands of the Mississippi Valley; for I recognize and believe that if the free-canal-toll act for American coastwise ships is repealed, that it will be a most severe if not a death blow to this great American deep-waterway project, a project that will aid our industries, provide new markets, create new agricultural lands, and establish new homes and the means for earning livelihoods for millions of good, honest, and industrious citizens of our country.

Mr. SPARKMAN. Mr. Chairman, I now yield 20 minutes to the gentleman from Missouri [Mr. BORLAND].

The CHAIRMAN. The gentleman from Missouri [Mr. BORLAND] is recognized for 20 minutes.

RECENT PROGRESS IN THE IMPROVEMENT OF THE MISSOURI RIVER.

Mr. BORLAND. Mr. Chairman and gentlemen of the committee, I am going to reverse the usual order of these speeches and instead of telling what the committee ought to do I am going to tell for a minute what they have done in the direction of river improvement and the improvement of navigation.

The pending bill carries an appropriation of $2,000,000 for continuing the improvement of the Missouri River between Kansas City and the mouth. This is in pursuance of a project which has been approved and adopted for the permanent improvement of that stretch of the river. The bill also carries a proposition for the survey of the river between Kansas City and St. Joseph, with a view to beginning the improvement of the upper river. At this juncture it may be interesting and important for us to examine into the recent history of the Missouri River and legislation leading to its improvement. On the success of this project rests the whole policy of the country for the improvement of inland navigable rivers.

Improvements are now being conducted on the Missouri River between Kansas City and the mouth under a well-considered engineering plan and on a scale which will demonstrate for all time the feasibility of improving inland streams for the purposes of commerce. The Government has given some attention to the improvement of the Missouri River from a period as early as 1838, but from that year to 1884 the work was of an isolated local character and carried on under separate districts. In 1884 a survey was made of the river from Sioux City to the mouth, with a view to a general plan of improvement.

The project was so large, however, and the cost so great, compared with the volume of commerce then existing which might be served by an improved river, that in 1890 the project was modified to embrace only a systematic improvement of the stretch from Jefferson City to the mouth. This work was under the Missouri River Commission, and about 9 miles of the river below Jefferson City were improved in a permanent way, and that improvement is still in place. It has lasted, practically without renewal or repair, for 20 years and has maintained a minimum depth exceeding 7 feet. This makes it entirely certain from an engineering standpoint that the method adopted of revetting the banks is the successful way to deal with the Missouri River problem. The Missouri River Commission was abolished by the river and harbor act of June 13, 1902, and after that for a few years nothing was done, except a little temporary patching of the banks and some effort made to keep the channel clear of snags. The river and harbor acts carried small appropriations for the Missouri River, usually of about $150,000, for the purpose of snagging and for maintaining the revetment work then in place. It was utterly impossible for boats to use the river without a general and permanent improvement extending over a long enough reach to justify the restoration of commerce. The United States Government sent Edward A. Schulz to Kansas City as division engineer, who prepared a very careful engineering plan for the permanent construction of a 6-foot channel from Kansas City to the mouth. This report was submitted to the War Department September 29, 1908. It was examined by the Chief of Engineers and approved, with some minor changes. On December 7, 1909, it was submitted to the House of Representatives as House Document No. 1120, Sixtieth Congress, second session. The river and harbor act of that session, which was passed March 3, 1909, contained no appropriation for the Missouri River. I entered Congress on March 4, 1909, and immediately took up the Schulz report and pressed it upon the attention of Congress. It provided for a comprehensive and scientific plan of improvement between Kansas City and the mouth, to cost $20,000,000, and recommended that it be completed within 10 years. During the summer of 1909 Mr. D. S. Alexander, of New York, chairman of the Rivers and Harbors Committee, went to Kansas City and personally examined the possibilities of the improvement of the Missouri River. As a result, he submitted to the House of Representatives on February 11, 1910, a report in which he says:

> This river has a continuous navigable length of 2,285 miles from its mouth, about 17½ miles above St. Louis, Mo., to Fort Benton, Mont.

Speaking of the Missouri Valley he says:

> The crop production alone of this area amounted in 1907 to 25,000,000 tons ,with a value of $500,000,000 while the meat products of four cities located on the river amounted to about 800,000 tons. In addition to this, the manufactures of four States through which the river flows or touches approaches nearly a billion dollars in value. That a large percentage of these commodities does not seek transportation by water, especially when the various railroads are unable to handle it expeditiously, must be due to the fact that existing conditions do not permit the river's economical utilization.

He recommended the adoption of the Schulz report, and says:

> With an improved river and reliable and easy navigation established, the growth of water-borne commerce would, it is believed, quickly develop, and the saving to shippers through cheaper rates by water, as compared with railroad rates, would in a few years exceed the cost of the improvement. Taking the shipments of Kansas City alone, and assuming that only 20 per cent of it would seek water transportation, there is abundant authority for the belief that at least 1,000,000 tons annually would soon be accommodated by an improved river. The improvement of the lower river would be undertaken and completed first, for the reason that no growth of commerce on a stream can be expected until it is open and improved to its mouth, in order to give an outlet.
>
> Moreover, the thorough improvement of this reach of the river would be an advantage not only to commerce, but large areas of land would be protected and reclaimed. This river is one of the most destructive on the globe. The local engineer reports that every change in velocity or direction of current means new erosion and subsequent partial deposit, causing untold loss in value of land and products. He estimates the bottom land threatened, or to be benefited, on this reach at more than 500,000 acres, worth in the neighborhood of $50,000,000, or two and a half times what the entire improvement is expected to cost.

The rivers and harbors bill of that year, as approved by Chairman Alexander, passed June 25, 1910, carried $1,000,000 for the improvement of the Missouri River and provided a special board of engineers to complete the plans in detail. On December 9, 1910, Chairman Alexander reported a rivers and harbors bill, but provided no appropriation for the Missouri River, because the report of the special board of engineers had not been transmitted to Congress. After the bill passed the House, but before it was considered in the Senate, Senator STONE succeeded in getting the report of the Board of Engineers sent to the Senate on January 13, 1911. This report was so favorable on the Missouri River project that on motion of Senator STONE an authorization was put in the bill of $600,000 to continue the work of improvement during the season. This authorization is the rivers and harbors bill of February 27, 1911. The money was afterwards provided by the Committee on Appropriations of the House of Representatives in the sundry civil bill.

In 1912 the first river and harbor bill reported by a Democratic committee of the Sixty-second Congress passed the House, carrying $800,000 for continuing the improvement of the Missouri River. In the Senate the Reed-Burton amendment was added, providing for local cooperation. This was done against the advice of the engineering board and over the objections of the friends of the improvement of the river. In its original form this amendment would have made necessary another examination of the project and a further delay in its prosecution, but it was changed at the last minute so as to permit the continuance of the work. The bill became a law July 25, 1912.

The river and harbor bill of the next session was passed March 4, 1913, and carried $2,000,000 for the improvement of the Missouri River, with the specific adoption of the Schulz plan and the requirement that the work be completed within 10 years. The Reed-Burton amendment was dropped.

The present bill carries another installment of $2,000,000 toward the completion of the project. This makes a total of $6,400,000 appropriated for the improvement of the Missouri River between Kansas City and the mouth since March 4, 1909.

NATURE AND PROGRESS OF THE IMPROVEMENTS.

The improvement of inland waterways and navigable streams has only recently engaged the serious attention of the American business man as a factor in the solution of the great transportation problem. These rivers are of two classes: One, the small streams which have only a limited amount of water and which can not support a navigable depth throughout the season without a system of locks and dams to impound the water. The improvement of these streams means the turning of them into canals. The second class embraces large streams which have more water than is needed for navigation, but where the natural conditions do not maintain a permanent channel of uniform depth. The Missouri River is the best type of this latter class, and the solution of its problems will solve that of the others. This river runs through a soft alluvial bed. Its immediate valley is from 2 to 7 miles in width between the rock bluffs on either side. The depth of the alluvial deposit in this valley averages 70 feet from the surface to the bottom, running down to the bed of the rock or hardpan.

The soil consists of fine, soft, rich alluvial earth, which has been carried down by the river and deposited through the preceding ages. The banks are so soft that they can not naturally resist the action of the water, and the force of the current, if directed against a portion of the bank, will erode it very quickly. The matter thus taken from the banks by erosion is carried downstream in suspension until it is finally deposited in the form of shoals, sand bars, or accretions to the shore line at some point below. For nearly 900 miles, from Sioux City to the mouth, the average fall of the Missouri River is quite uniform. The effect of the river upon its banks varies with the stage of the water. When the river is high the current is usually more swift and the erosion is very rapid. With high water and a swift current the amount of matter held in suspension and carried downstream by the water is enormous. As soon as the river begins to fall and the current slackens the matter held in suspension by the water is precipitated very rapidly and the shoaling occurs, forming huge sand bars and making the channel very shallow over the wide crossings. This is the reason that dredging will not answer as a permanent method. It can be used only until permanent revetments are in place. Although the current in ordinary times is not very swift, being normally about 4 miles per hour, it is too strong even in times of low water for the soft, yielding banks to hold. If the Missouri River were perfectly straight and had a straight channel, the force of this great body of water would be tremendous. However, the river, under the wise dispensation of nature, puts brakes on itself. It has two sets of brakes. First it wanders from side to side of the valley through which it runs, forming long, winding coils, like a serpent. If, as sometimes happens, it cuts off one horseshoe bend and straightens itself by a few miles, the immediate effect of the acceleration of the current is to form another bend at some point which will lengthen the river again to its proper mileage. In this way the river has, within the memory of living men, moved its bed in many places a distance of from 2 to 7 miles. This shifting of the river bed has gone on constantly for ages, and while much of the matter which is cut away from one point is eventually deposited somewhere else, the land which is swept away is a total loss, and the new land which is formed at some other point does not become of any value for many years after its accretion. Thus the Missouri River bottoms, which, with those of the Mississippi River, are

the richest in the world, have been of little economic and productive value compared with their great possibilities.

The river has a second set of brakes which it employs by swinging its channel from side to side within its banks. The current impinges on one bank of the river and then swings across and possibly a mile and a half or two miles below will be found next to the opposite bank.

The wide spots in the river, which are called crossings, are generally shallow in times of low water, because as the river spreads out the current slackens and the precipitation of the sediment is very rapid. The spots next to the bank where there is a swift current are usually deeper and are known as pools. The river is therefore a succession of crossings and pools, and the bottom of the river would look like a succession of waves.

These three twists of the Missouri River are extremely puzzling to those who are not familiar with it by long experience. There is, first, the swinging of the river from side to side in its broad valley; second, the swinging of the channel from bank to bank; and, third, the undulating character of the bottom of the stream, which causes it to be successively narrow and deep or broad and shallow. The engineers have shown us that it is possible to harness this great river by working in harmony with nature. They find, first, that wherever the river impinges upon the bluff or any other firm bank its channel remains stationary. The whole problem is caused by the size and power of the stream and the soft and yielding nature of its banks. The improvement of the river, therefore, begins at a point where it touches the rock bluff and extends from there downstream. At the next point below on the opposite side where the current strikes the bank a revetment is placed consisting of a willow mat loaded down with stones. It has been found that this revetment will prevent the current from eroding the banks. If the revetment is placed in harmony with some general plan of the improvement of the river, above and below, so that the river can not cut in behind it or go below it, it will form a permanent rectification of the channel. As the current crosses the river and strikes the opposite bank it is necessary to place another revetment at that point, and so on downstream from point to point.

If these revetments are properly placed in harmony with some general plan that will permit the river to have the proper swing of its channel in times of both high water and low water, they constitute a continuous improvement, and the effect is to prevent the erosion of the banks, the accumulation of sediment in the water, and shoaling, thus causing a deepening of the channel. This effect is well exemplified in the stretch of 9 miles permanently improved below Jefferson City and in the portions between Kansas City and De Witt, which have been improved under the recent appropriations. It is necessary from season to season to go back over the work to see whether the river is responding to the rectification plans and to see whether proper play has been given in all cases for the increased force of the volume of high water. As the improvements progress downstream and the erosion of the banks is gradually stopped the deposit of sediment below declines in volume and the river responds more readily to improvement. No more new snags are formed, because no more trees are carried downstream from the caving banks. This in substance is what has been going on under the direction of the Army engineers during the last four seasons. They began at Kansas City, where the banks have been made permanent on both sides of the river and are pursuing their work downstream as rapidly as appropriations are furnished. They promised only a channel with a minimum depth of 6 feet, but the results have shown that the channel will be from 7 to 9 feet at the lowest water stage.

The work is now under the charge of a brilliant and experienced engineer, Maj. Herbert Deakyne, and the results accomplished by him have delighted the friends of river improvement.

On my inspection trip down the river last fall with the Government engineers, we took frequent soundings over the crossings. Whenever the leadsman would sing out "Mark twain," it would make us all feel good. "Mark twain" means 12 feet, which is deep water and a good channel for any river boat. I hope when the project is finished it will be "Mark twain" all the way from Kansas City to St. Louis. [Applause.]

The effect upon the Mississippi River of the improvement of the Missouri will be very important. The engineers tell us that the Missouri River carries annually into the Mississippi River 289,000,000 cubic yards of sediment. This enormous mass of soil is sufficient to cover an area of 40 square miles 10 feet deep. It constitutes one of the serious problems of the improvement of the Mississippi River, and this difficulty will be removed when the banks of the Missouri River are revetted so that erosion will cease.

BANK PROTECTION AND RECLAMATION.

While the primary purpose of the Federal Government in improving the Missouri River, or any other stream, is for the purpose of navigation, and the improvement is justified only upon the ground of the demands of commerce, yet it has an effect necessarily upon the riparian lands. This is especially true on the Missouri River, where the riparian lands have in many cases been almost valueless on account of the uncertainty of making a crop. None of the work on the Missouri River is designed for flood protection. This will all be taken care of by levee districts, which are formed by the riparian-land owners under the State law. Before a levee district can be formed, however, it is absolutely necessary for the landowners to know where the river bank will remain. Under past conditions they were utterly unable to build levees because after much expensive work had been done the river might the very next season shift its banks a mile or two and cut away large portions of the levee. If the banks were once permanently located by revetment work the adjoining landowners can take care of the levee situation, and while the cost will be heavy in proportion to the present value of the lands, their increased value will doubtless justify the cost. Of course our Missouri farmers are eager to have the improvements proceed as rapidly as possible, and I am glad to say that under the present businesslike way of going at the project the progress which is being made is substantial. While it can not all be done in one or two seasons, yet we can certainly exceed the record which has been made heretofore.

RESTORATION OF NAVIGATION.

I have quoted from Chairman ALEXANDER'S large and statesmanlike views of the possibilities of the improvement of the Missouri. How far has his opinion been justified by the actual restoration of navigation?

When the merchants of Kansas City first came to Congress and asked for the permanent and businesslike improvement of the Missouri River as a great artery of commerce they were met by the question: "Where is your commerce? Why have you no boats on the river? What is the tonnage now carried by water?" It was difficult for Congress to understand the practical impossibility of carrying freight as a commercial proposition on the Missouri River in its unimproved state. They could not understand that a stream which apparently had such a tremendous volume of water would in the busiest months of summer frequently show, over the wide crossings, a depth of only 30 inches or less. It was hard to see why it was impossible for boats to use any portion of the river unless a sufficient channel was open between two large shipping centers.

The Kansas City men went home and, with characteristic energy, raised by popular subscription a capital stock of $1,250,000, to be used in building boats adapted for the navigation of the Missouri River. All of this money was on hand, but up to December 31, 1912, they had used in the purchase and construction of boats and barges $312,000; in the construction of wharves and terminals, $19,000; in shipping yards, material, equipment, and so forth, $35,000; in all, approximately $367,000. They are engaged in valuable experiments to find the best type of boat for inland navigation and the best methods of handling river commerce, and are proceeding as rapidly as their experience in handling that line justifies. They are not disposed to make an empty showing by expending their money hastily in equipment which might prove unsuitable or by rushing in to invite a failure, which might endanger the whole cause of river traffic. Let us see, however, how even this policy of extreme conservatism has met with success. Last year was a season of great drought in the Missouri Valley and the stage of water was the lowest in many years. Notwithstanding this, the boats ran successfully all season, although they sometimes had to be loaded light in order to get over the shallow places where the Government improvements had not yet been made. On this account the business was done at a greater cost than should have been necessary if the boats could have been loaded to their full capacity and operated in a permanently improved channel. The secretary of the Kansas City (Mo.) River Navigation Co. writes me under date of February 24, 1914, as follows:

With the increased fleet capacity last season we expected to make a very much better showing, but unfortunately the stage of water was very low after July 15—the records show it the lowest of any year since 1891. After the drought began to have its effect on the river, thousands of bags of grain booked for movement by boat were hauled to the rail line because of our inability to handle them with reasonable promptness. At the same time thousands of tons of freight were diverted at East St. Louis after having been routed our way. In 1913 we handled 10,000 tons of freight, and more than this amount was diverted after July 15 because of our inability to handle it.

We had in service the passenger and freight steamer *Chester* and the towboats *Advance* and *A. M. Scott*, with seven cargo barges. All of the boats and barges are of steel and iron construction, the barges

being absolutely fireproof and as nearly unsinkable as is possible to build them. In fact, we do not know of any barges on the inland waters which are equal to ours.

Our steamers *Chester* and *A. M. Scott* are of the twin-screw tunnel type, and the towboat *Advance* of the stern-wheel type. The *Advance* is now undergoing extensive alterations, having new engines, boilers, and auxiliaries installed, so as to develop 450 to 500 horsepower—three times her present power. The steamer *Scott* develops 600 horsepower, and with the increased power of the *Advance* we will have two towboats either of which can handle any of our barges. This will provide a more reliable service, as either boat will deliver its load at the terminal and pick up whichever barge is ready for the return trip. In addition to this, we expect to operate the boats night and day during most of the season, so as to provide quicker delivery of freight and also to reduce the operating cost.

Of the seven steel barges in service last season three were only completed and delivered to us in July. We will have an eighth barge ready for service in the early spring.

Our rates are 20 per cent less than the rail rate between points which we reach. In addition to this, we absorb the switching charges on carload lots to houses which are served by rail tracks, so that delivery by our line is as convenient as delivery by rail, and the customer makes a net saving of 20 per cent between the rivers.

On the whole, we are pleased with general developments and feel assured of success. After operating on the Missouri River in its present condition we are very enthusiastic as to the possibilities when a channel of 6 feet minimum depth shall have been attained.

Under date of February 28, 1914, he also writes me, as follows:

On receipt of your telegraphic inquiry this p. m. as to freight capacity of our barges I wired you promptly as per confirmation attached.

Below are listed the barges now ready for service and freight-carrying capacity of each:

| | Tons. |
|---|---|
| Alpha | 1,000 |
| Beta | 1,000 |
| Gamma | 600 |
| Delta | 600 |
| Epsilon | 600 |
| Endeavor | 1,400 |
| Handy | 200 |

And we will have in service early in the coming season the barge *Delaware*, capacity 400 tons, which will give us a freight-carrying capacity in barges of 5,800 tons, in addition to which the packet *Chester* has a capacity of 390 tons of freight.

Mr. PLATT. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Missouri yield to the gentleman from New York?

Mr. BORLAND. I am sorry I can not. I have but a few minutes.

Mr. PLATT. I simply wanted to know what was the matter with the Greek alphabet? Why did you not go on with it?

Mr. BORLAND. I read further:

The above figures, you will understand, are based upon full capacity—barges loaded to 6-foot draft—and there are times when the channel does not permit of capacity loads.

On March 3 I received the following letter from the secretary of the Kansas City Missouri River Navigation Co.:

Replying to your favor of the 27th, regarding classification of tonnage moved by our line last season.

Generally speaking, we handle an unusual percentage of high-class tonnage for a river line. During the seasons of 1912 and 1913 more than 50 per cent of all tonnage handled was third class and higher. This percentage of high-class freight will naturally be reduced as our volume of freight increases, but we do not anticipate any material reduction of percentage until such a time as our total freight exceeds 25,000 tons.

An approximate division of last season's tonnage is as follows:

| | Tons. |
|---|---|
| High-class merchandise (dry goods, pianos, etc.) | 5,000 |
| Groceries and drugs | 800 |
| Hardware | 1,200 |
| Lumber, cement, etc | 60 |
| Produce, hay, and feed | 140 |
| Grain | 2,675 |
| Miscellaneous | 125 |
| Total | 10,000 |

It might surprise some people to know that we handled last season for one firm 211 pianos, as well as several carloads of other musical instruments. We have also handled glass in car lots. In fact, most anything which moves by rail may safely be handled by water with such equipment as ours. This again emphasizes the necessity for modern terminals. Without proper loading and unloading devices it would be impossible to safely handle the higher classes of freight.

THROUGH CONNECTIONS.

This freight line has been successful in spite of the difficulties owing to the irregular depth of the channel. If it had the use of a permanent channel whose minimum depth was never less than 6 feet, it could load its barges to full capacity and haul more freight at a cheaper cost. The boat line has a small shipyard at the mouth of the Gasconade River where it lays up its boats for the winter. During the present month of March the boats are being got ready to put into commission for the present season, and they will soon be running again. The prospects indicate the biggest season in river navigation they have ever had. As the letters of the secretary show, up to July 1, 1913, there were only four barges in use. Three barges were added to the fleet the 1st of July, but this was at the time of the low water when full use could not be made of them. During the coming season there will be eight barges in use throughout the season, and it is safe to say that they will more than double their tonnage of freight. It is planned this season to connect at St. Louis with a barge line for New Orleans. This will be especially convenient and important to the grain trade of the West and Northwest. Barges can be loaded with grain at Kansas City and taken through to New Orleans without unloading. This will not only reduce greatly the cost of handling but will relieve the congestion of the railroads at the time when grain is ready for shipment.

EFFECT ON FREIGHT RATES.

The effect of an improved river on freight rates is not confined to the river cities, but reaches back into the interior and benefits the whole producing country which might by any combination of rail and water traffic use any portion of the improved river as a route to market. The Interstate Commerce Commission recognizes the fact that whether all of the freight does or does not seek a certain line of carriage yet if it may use that route the reduction of rates must affect the general rates throughout the entire territory. This extends the benefit of the improved river to the States of Oklahoma, Kansas, eastern Colorado, Nebraska, North and South Dakotas, and Wyoming.

The rates now charged on the Missouri River are actually 80 per cent of the rail rates between Kansas City and St. Louis. The volume of freight carried by river has not been large enough to make any appreciable difference to the railroads or furnish any substantial competition. Its effect so far has been to relieve the railroads from excess freight, which they would probably have handled with great difficulty, delay, and inconvenience to the shipper. Even on this aspect of the question the improvement of the river has been well worth while in furnishing transportation facilities to a rapidly growing section of the country. When the river traffic is sufficient to compete appreciably with the railroads a more permanent and substantial effect upon rates will be seen. I think our friends of the grain-producing States understand this very thoroughly, but I was astounded to hear the gentlemen from Kansas [Mr. CAMPBELL] say the other day on the floor of the House that the only effect of the improvement of the Missouri River so far had been to raise rates to interior points in Kansas. The improvement of the Missouri River has not raised a single freight rate in Kansas or elsewhere, and there is no possibility that it could have such an effect. The railroads have sought to raise freight rates not only in Kansas, but all over the United States, and they are still claiming that the expense of doing business justifies them in the right to advance their rates. They have advanced their rates in many parts of the country on many lines of commodities, but they have not advanced their rates in Kansas, and this is one of the few sections of the United States which has escaped a general advance. In fact, the Interstate Commerce Commission has recently decided two cases which have had the effect of reducing rates from 5 per cent to 15 per cent from Chicago and St. Louis into all points in southern Kansas. If it is possible that the gentleman from Kansas is so little informed about what is going on in his own State, I will call his attention specifically to the cases. The first case was the State of Kansas, through its public utilities commission, against the Atchison, Topeka & Santa Fe Railway et al., decided June 18, 1913. This reduced the class and commodity rates from St. Louis to interior Kansas points to correspond with the proportionate rate to Kansas City. The other case was one brought by the Commercial Clubs of Kansas City, Omaha, and Sioux City against the Atchison, Topeka & Santa Fe Railway et al. to reduce the rates between the Missouri River and common points in Colorado. The reduction of these rates to Colorado effected a reduction also in the rates to the intermediate points in Kansas. This case was decided January 13, 1914.

TERMINALS.

A very necessary adjunct to the restoration of traffic on the Missouri River is the construction of proper terminals. During the long period of years in which the river has been neglected the river front has in many cases gotten into the hands of the railroads. In some respects this is necessary, as the railroads must seek the water level for the convenience of grades. It is also necessary and very important that there be direct communication between the railroads and the boats. It is equally important that the boat lines have ample terminals, and that these terminals be free to the public, so that they can not be monopolized by any railroad or any boat line controlled by a railroad or any boat line which is engaged in a monopoly. All boats, big or little, and all lines of boats should have free access to the wharves, docks, and river terminals. In this way water navigation will be a constant check upon monopoly in the transportation business.

The fight which Kansas City has made to restore navigation of the river has been effective also in restoring to the city our

water front. After some litigation, the railroads, which had preempted the public land along the river, were moved back and new magnificent, modern, convenient municipal wharves and warehouses have been constructed, with electric loading devices and other appliances for the rapid loading and unloading of vessels. These wharves belong to Kansas City and are for the use of all boats upon the payment of reasonable charges. I understand that New Orleans is also reconstructing its municipal wharves, and that St. Louis is also equipped along these lines. No doubt all of the commercial cities on the river between Kansas City and St. Louis will see the imperative need of establishing municipal wharves and landing places to encourage river traffic and put themselves in the line of progress and improvement.

Mr. SMALL. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield to the gentleman from North Carolina?

Mr. BORLAND. Yes.

Mr. SMALL. I want to call the attention of the gentleman to the fact that Davenport, Iowa, has also made arrangements for municipal wharf facilities.

Mr. BORLAND. That is interesting as showing the trend of improvement of inland waterways.

In conclusion, gentlemen, I am satisfied that the efforts of the last five years for the restoration of navigation on the Missouri River have borne substantial and encouraging results. We are anxious that the work be done upon a permanent and business-like basis and think that your committee has been patient, careful, and conservative in approaching the solution of this problem. It required us first to have a preliminary survey made of the portion to be improved; second, to have this survey reviewed by the Board of River Engineers at Washington, and the result approved by the Chief of Engineers and the Secretary of War; third, an experimental appropriation was made for revetment work and out of abundant caution a special board of engineers was created to revise the plans of the project, and to determine finally upon their feasibility; fourth, they required that local business men should demonstrate their desire and ability to put to use the river as a carrier of freight; and, fifth, they have restricted the appropriations to the exact amount that can be economically expended during each navigable season. I feel certain that all of these efforts will be crowned with success and that we shall have an improved river from Kansas City to the mouth, carrying the great productions of the plains States to market and adding needed transportation facilities to the Central West. The river will be restrained very much in its destructive force and while it is ministering to the demands of commerce it will also yield its banks up to a more abundant production of the food supplies of the Nation. The unimproved Missouri River has been a wild animal, useless to commerce and destructive of life and property; the improved Missouri River will be like a well-broken Norman draft horse, able to draw tremendous loads and turning its mighty strength into the means of production and the progress of civilization. [Applause.]

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. SPARKMAN. Mr. Chairman, I understand the gentleman from Pennsylvania [Mr. HULINGS] is prepared to speak now.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. HULINGS] is recognized for 30 minutes.

Mr. HULINGS. Mr. Chairman, from the beginning of his administration I have appreciated and heartily sympathized with the desire of President Wilson to prevent war with Mexico, and believe we should support him to the limit.

I have spent much time during the last 13 years in Mexico. I have traversed the country on horseback from one end to the other and from one side to the other several times.

I have read a vast amount of misinformation about Mexico, written by people who only knew the Mexican of the railroad track, the beggar, the "ratero," and the pulque drinker of the cities.

But I, who have lived with the Mexican of the hills and the mountains and the wide open spaces, know a different people.

A more kindly, honest, and hospitable people are found nowhere. In their beautiful language, they are "simpatico."

In horseback trips covering more than 3,600 miles, traversing the great "barrancas," the wild stretches and the vast solitudes of the "sierras," I always found the people of the hills country honest, kindly, and hospitable.

I remember once, when Mrs. Hulings accompanied me, we had just made the long and dangerous ford of the Papaguyo River and reached a village of the Cacahuatepecs. The chief of the village at once put his own house, a structure of bamboo with palm-leaf thatch, at my disposal.

That night about 11 o'clock—a brilliant moonlit tropical night—I was awakened by music. Running to the open unglazed window, I beheld, to my astonishment, 22 players in a brass band discoursing fine music in a serenade to "La Senora Blanca," the name they had given to Mrs. Hulings. This tribe is numerous and remarkable for the stalwart strength and beauty of its people.

At another time, on the far coast of the Pacific, in the State of Guerrero, while a sojourner in the hacienda San Marcos, I heard one day a peculiar droning noise. On investigation I found it coming from an old adobe building, where the village school was in session. All the scholars were studying their lessons in half-audible undertone, making an indescribable droning noise, and transporting me in memory back to my primary school in Pennsylvania, where we had precisely the same habit of studying our lessons aloud.

I asked one little senorita about 11 or 12 years of age what she learned at school. She replied, "Geographie, histoire de la patria, grammaire, arithmetic, algebra, and geometry." There in the hills, remote from a white habitation, the little children were being taught much after the fashion of our own children, and I have been assured many times by American schoolteachers in Mexico that the scholars of the primary grades in Mexico are further advanced than our own children of the same age. These people of the hills and the great plateaux are a primitive people, ranging from the native wild man through all gradations, to civilized conditions.

In the towns and cities, as in towns and cities everywhere, the extremes of civilization meet. There great wealth, education, and refinement are found side by side with squalor, vice, and poverty.

It is a great mistake to suppose that Mexico is a poor, besotted, and benighted country, without the aspirations and ideals of civilization.

Before Hendrik Hudson sailed up the North River, Mexico City had a population of 350,000, with great institutions of learning and philosophy.

The first printing press set up in the American Continent was established and the first printed book, Las Casas's "Steps to Heaven," was published there in 1536.

It is a mistake to suppose that Mexico, with the finest climate in the world, with enormous natural resources, with an area of a little more than one-fourth of the United States, and a population of more than 15,000,000, with a foreign commerce in 1912, notwithstanding the internal strife, amounting to $240,000,000, is the helpless, worthless, and hopeless country some would have us believe.

Since the Spaniards were driven out in 1821 until 1876, a period of 55 years, there were seven revolutions. The Mexicans have the habit of revolution. The ignorant, excitable, imaginative masses quickly follow every new flag. Under Porfirio Diaz alone did quiet and order prevail and concepts of national unity and solidarity find a place in public sentiment.

Mr. MURDOCK. Mr. Chairman, will the gentleman yield?

Mr. HULINGS. Yes.

Mr. MURDOCK. Does not the gentleman think he ought to say that Porfirio Diaz himself was a revolutionist?

Mr. HULINGS. I thought so; so much so that I have stated it. I will read it in a moment.

Mr. MURDOCK. All right.

Mr. HULINGS. But it is also a mistake to assume that the masses of the Mexican people are capable of republican government, or that even the educated classes, numerous and cultivated as they undoubtedly are, are farther advanced in the concepts of government than a government by an "aristocracy" or a "dictatorship."

Mr. FESS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Pennsylvania yield to the gentleman from Ohio?

Mr. HULINGS. Certainly.

Mr. FESS. Has the gentleman figures there showing the proportion of Mexican people that are educated and the proportion that are not?

Mr. HULINGS. I have not. You find them on the ranches and in the cities, as I have stated, but I have not got the proportion.

Mr. FESS. The great mass?

Mr. HULINGS. No. It was my good fortune to become personally acquainted with President Diaz. No one could be in his presence without being impressed with the power of the man. Under the form of a republic, with a constitution closely resembling that of the United States Government, his Government was an absolutism.

As a revolutionist he became the President of the Republic. The country then, as now, was overrun by guerrilla chieftains with bands of robbers and "ladrones," keeping the country in constant terror.

President Diaz adopted a plan that might well be followed if intervention should be necessary.

He called in some of the most enterprising of these robber chieftains, gave them a commission with rank and pay, had them bring in their followers, uniformed and enlisted them in his army, and then sent them out to destroy all the other bands, and thus pacified the country, made travel safe, and established law and order. This force—known as the "Rurales"—was pronounced by Phil Sheridan the finest light cavalry in the world.

There is no doubt of Diaz's sincere love for "his people." But at 82 his fires were dimmed and his arms were palsied; a bureaucracy surrounded him; no longer could he learn the truth; and I verily believe that he was the most surprised and grieved man in Mexico to learn that "his people" had raised in serious revolt against him, and in his grief and old age, rather than make serious resistance, he retired.

I was also personally acquainted with Francisco Madero. There is no doubt he was an earnest and sincere patriot and a man of great courage. He was an idealist, perhaps a dreamer, but he saw that "special privilege" was doing in Mexico its fatal work, as it always does everywhere, and recognized, as every man who studies the situation does, that Mexico will never take fair place as a nation until the great estates are broken up and the people on the land are given a stake in the soil. [Applause.]

This was the watchword of his revolution. Of course he contemplated that the breaking up of the great estates and their distribution should be under the operation of equitable laws, which would require time and require, first, that good order should be established in all parts of this country.

But during his revolution every man who could get a following of "ragtag and bobtail" became a revolutionary chieftain, a general, or at least a colonel, who became enamored of the power and the glory of a military career.

And while Madero was harassed and delayed and his program of the division of estates was not promptly fulfilled, the revolutionary chiefs saw in a counter-revolution the quickest and surest return to their erstwhile power and glory, and they quickly raised the cry "Madero is a traitor," and the present dreadful state of affairs was precipitated by the assassination of President Madero, the seizure of the Government by Huerta, and the new revolution under Carranza and Villa.

Madero's mistake was in supposing that a constitutional government is possible in Mexico now; that the people of Mexico are ready for self-government. The only real government they have ever known was that imposed by the iron hand of Diaz. They are a primitive people, quick to respond to kindness once their confidence is secured, but impatient, excitable, volatile, and cruel as children.

Madero's idealism did not permit him to use the methods of Diaz, and he naturally fell a victim to a counter-revolution.

Talk about "free elections" is sheer nonsense. The government that shall be established in Mexico may be called by one name or another, but it will be essentially a dictatorship, and it will require an iron hand and the wisest statesmanship for a generation before a republic in Mexico will be more than a travesty upon the name.

Mr. MURDOCK. Will the gentleman yield?

Mr. HULINGS. Yes

Mr. MURDOCK. Were there any elections under Madero?

Mr. HULINGS. Yes; there was one, and he was elected; but there were only a few people who participated—about as many as voted for me at the last congressional election in my district.

Mr. MURDOCK. In the whole Republic of Mexico?

Mr. HULINGS. Yes.

Mr. MURDOCK. Elections were held repeatedly under Diaz?

Mr. HULINGS. Yes; such as they were.

Mr. MURDOCK. Why does the gentleman characterize them as not free?

Mr. HULINGS. Simply because the people did not vote. They have not the public spirit; they have not the interest. Why should a man who lives in practical peonage and has nothing except a little corn and beans to live on or to live for, take any particular interest in government?

Mr. MURDOCK. I have heard the statement made repeatedly that Mexicans under Diaz did not have the right to vote, and I have heard the men who believed in Diaz say that they did have the right to vote. Was it merely a matter of their staying away from the polls?

Mr. HULINGS. They voted, when they did vote, as they were ordered to. Candidates were selected for them. If they elected those candidates, all right, there was an election. If they did not elect them, the election was set aside.

Mr. MURDOCK. That is a form of machine government from which we in this country have not been entirely free. Does the gentleman mean to say that where a nomination is dictated by a machine, that is not a free election according to his definition?

Mr. HULINGS. According to my definition it is an obtained election, not free. I believe that the people have not only the right to elect their officers, but they have the right to select their candidates.

Mr. MURDOCK. The point I am driving at is this: Does the gentleman believe that under Diaz Mexicans were prevented from voting?

Mr. HULINGS. That is a difficult question, because if the votes did not go right the election was set aside.

Mr. MURDOCK. I think that answers my question, that they did not have free elections under Diaz.

Mr. HULINGS. Free! No; they did not. I have said that. The dangers to government in Mexico come not from "the plain people," but from "cientificos," the Latin breeds, the aristocracy, which naturally resist all efforts to reduce their special privileges and continually attempt to increase them.

After the present revolution had taken serious aspect, President Taft, through our representatives, advised Americans to leave the country. Our mistake was made then. A firm stand at that time would have prevented the present wretched situation. A strong man like Theodore Roosevelt would have settled the difficulty and there would have been no war. President Wilson followed the course already outlined by President Taft, and instead of taking firm, positive steps adopted what he called the "watchful waiting" policy.

Mr. WOODRUFF. Is it not a fact that during the reign of Diaz in Mexico the authorities under Diaz had absolute control of all the polling places in that country?

Mr. HULINGS. I believe that is true; yes.

Mr. WOODRUFF. Is it not a fact, further, that during that time only such men as the authorities wanted to have vote were allowed to vote?

Mr. HULINGS. They knew if they came there to vote, they must vote right.

Mr. MURDOCK. That, however, is a disputed point.

Mr. PLATT. They were always free to vote for Diaz, were they not?

Mr. HULINGS. I hope this will not be taken out of my time.

During the last two years a great many reports have come from one source or another of the murder, robbery, and rapine of American citizens, to which our Government has apparently given no heed.

Recently a British subject, William S. Benton, whom I knew very well, was murdered by the revolutionists with Villa, and at once our State Department has shown more interest than all the outrages upon American citizens have evoked.

Now, the question arises, Why is this so? What is there so particularly appalling in the murder of Benton that it should quicken our State Department, when it has been so indifferent to the murder of scores of Americans in Mexico?

The answer commonly given is that the Monroe doctrine requires the United States to protect citizens of European countries in any of the countries of the American Continent, because under the Monroe doctrine the United States will not permit European countries to interfere with the American countries.

I deny that the Monroe doctrine means any such thing. It never did mean that this Government holds itself responsible for the settlement of every dispute in which the southern Republic and a European nation may engage. [Applause.]

In 1821 the United States served notice on all European countries that they would not be permitted to colonize or make conquest of any land in the Americas.

There is nothing in the Monroe doctrine to prevent any country taking necessary steps to collect debts from or to protect its citizens in any American country.

There is nothing in the Monroe doctrine in itself that requires the United States to protect a British subject in Mexico, and there is not any reason in polity why Great Britain should not protect her own citizens in Mexico or wherever they may be.

The only objection to Great Britain protecting her own citizens in Mexico, and the only reason why the United States should undertake the task, is that if Great Britain undertakes it, it might involve a war and the overthrow of the Mexican Government by Great Britain, and in the reconstruction which

would follow the paramountcy of Great Britain in the government which might be established would be a violation of the Monroe doctrine, and that to prevent such a happening and to prevent a possible interference with the Monroe doctrine the United States must herself protect the citizens of all European countries in all American countries.

And yet, in all deference to those who hold that the Monroe doctrine requires the United States to undertake the protection of all foreign subjects and property in Mexico, I am of opinion that the protection of British subjects does not fall as a matter of duty or obligation upon the United States. If Great Britain, under the pretense of protecting her subjects, should attempt to colonize or make conquest of Mexican territory, in such case, and not until such case should arise, would the Monroe doctrine require the United States to deprive Great Britain of any excuse for her presence by herself giving protection to British subjects.

Mr. FESS. Suppose an indemnity were to be demanded by Great Britain and in lieu of the indemnity a coaling station should be demanded, would not that be a violation of the Monroe doctrine?

Mr. HULINGS. Yes; that would be acquiring territory, which is not permitted under the Monroe doctrine.

Mr. FESS. Suppose that Great Britain or Germany should go into Mexico and collect their damages; when they are in there how shall we get them out?

Mr. HULINGS. Shoot them out if necessary, the same as we were ready to do in 1865. [Applause.]

In its present vague and uncertain scope the Monroe doctrine is liable to get us into trouble. As the southern Republics grow in power and dignity they are more and more restive and jealous of what they regard as the tutelage and interference which their big northern neighbor assumes under the Monroe doctrine to exercise over their foreign affairs.

And we owe it to ourselves to define just what we mean by the Monroe doctrine, so that these needless jealousies may be removed and that the world may know exactly where we stand and so that if Germany, who has always scouted the doctrine, should seriously challenge it, or if Japan should renew her attempt to secure a foothold in the Magdalena Bay country, they would know and we would know just what the fight would be about.

It is certainly an unpleasant commentary upon American diplomacy that when American property and lives have been destroyed, practically no notice has been taken of it; but the moment a British subject is involved the British Government prods our Government into action.

Does British citizenship rest upon a plane superior to that of American citizenship? Is the protection of a British citizen a more sacred duty of our Government than the protection of her own citizens?

To what extent it becomes the duty of the United States to protect her citizens abroad is not clear.

If I deliberately, without invitation, remove myself and property to Mexico and engage in business there, placing myself under the protection of Mexican law, and if, without any discrimination against me as a foreigner, Mexican courts and Mexican laws afford me the same measure of protection as they give to Mexican citizens, and if I suffer loss from the rulings of Mexican courts, or if, through the weakness of the Mexican Government, I, in common with Mexican citizens, am not given protection of life and property, I am not at all clear that there is any obligation on the part of the United States to declare war for my reparation, especially if it has warned me to flee from Mexico. But if we concede that it is the duty of the Government to protect our citizens everywhere abroad, surely the time for action has come.

This is not the time to play partisan politics. Let us look the facts in the face.

Intervention means war. It means the expenditure of blood and treasure in volumes beyond computation. I would not pinch pennies when honor is at stake, but I would not be hurried into avoidable war. It is easy to enter upon a quarrel, but prudent men will count the cost and inquire the purpose.

Oh, I know it is easy to ring the changes upon Paul's reply "I am a Roman citizen." It is easy to inflame the passions to avenge the insults to American citizenship.

War with Mexico means a war of exhaustion. The moment our troops pass the frontier the Mexicans will drop their quarrels and make common cause against the hated "Gringo."

All the American blood thus far shed will be but a drop in the bucket. All the pecuniary losses thus far suffered will be but a bagatelle compared with the cost of six months of war.

I believe a well-appointed division of American troops might march where they would in Mexico, so far as organized opposition could prevent. But I know that country and I know that barrel-chested brown man. With 100 "tortillas" wrapped in his "serape" he can march for a week, and he can march as far in a day as any organized force could follow him in a week.

Great Britain learned the cost and the size of the armies required to defeat the 65,000 Boers, and the pacification of Mexico would be a gigantic task, requiring years.

And to what end? Will more bloodshed restore blood already shed? Will the sacrifice of more lives, more treasure, replace the lives and the treasure already lost? Will the destruction of 100,000 of those brown men, the misery and wretchedness which war will bring to the helpless women and children of that unhappy country add to the honor of the great Republic? Will the sacrifice of 50,000 of our manhood add luster to the American flag?

If the Mexicans in any case will fight to exhaustion, would they not better exhaust themselves upon each other than upon Americans?

These grave considerations, Mr. Speaker, justify the "watchful waiting" policy of President Wilson, and will justify it while a hope remains that the Mexicans will restore peace. Such a policy, if successful in avoiding intervention, would be the most signal proof that the great Republic has no ulterior designs upon her lesser sisters to the south, and give the lie to the oft-repeated slander that the United States is the great "American pig" that arrogantly, selfishly, and corruptly seeks to exploit the small nations of this hemisphere.

Mr. GORDON. Is it not a fact that the American Nation achieved its reputation as the great American hog by the unlawful and unconstitutional seizure of the territory of a sister Republic, the United States of Colombia, by Roosevelt? Was not that what gave the United States her reputation?

Mr. HULINGS. I think she had whatever reputation she has of that kind long before that.

Beyond all doubt this Government could secure, or at any time during the troubles in Mexico could have secured, a safe conduct to their own countries of every foreigner in Mexico and pay for all foreign property destroyed at less cost than the cost of intervention.

Beyond all doubt such a policy would be less expensive than war.

We could then, safely retired within our own borders, without other interest, prayerfully hope that Mexico, after she can fight no longer, decimated and impoverished, will see the folly of her course and stop the slaughter.

But our attempts to play the rôle of good neighbor have been repaid with insult and contumely. The marauding chieftains on both sides return our counsel and advice with contempt and threats, and conditions daily grow worse.

The destruction of American lives and property, the murder of helpless women, the raping of girls, the execution of prisoners, and wholesale slaughter still go on.

Mr. Chairman, it is just because every thoughtful American agrees that war should be avoided if possible; that as a mere economic question war is unjustifiable; and that insults to our dignity or even trespasses upon our citizenship committed by that torn and distracted people should be overlooked to the very limit of forbearance by this great and powerful Nation, that the American people have so long supported a policy of mere opportunism.

It matters not now that mistakes have been made. If peace and good order are established in Mexico without intervention, it will be the brightest star in the crown of President Wilson's achievements, and the world will resound in acclamations of his wisdom and statesmanship; but a "do-nothing" policy, if unsuccessful, will bring the United States Government into contempt in any chancellery in the world.

But, sir, there is another question. It is not an economic question. It is not a question of national honor or pride or dignity, nor the vindication of American citizenship. It is a question of plain Christian duty.

The duty of the strong man to prevent cruelty and crime stops not within the walls of his own household.

The duty of a powerful Christian nation to prevent the outrage of helpless human beings, to stop ruthless slaughter, is as wide as humanity and does not stop at the artificial lines that divide nations.

Mr. GORDON. Mr. Chairman, is it not a fact that the right of revolution is a right that has been exercised in all ages and is one that is recognized by international law? Does the mere fact that war exists in Mexico warrant or justify any nation on earth interfering there?

Mr. HULINGS. I am just trying to say that it does. A revolution is never lawful. It is never recognized except when it succeeds. [Applause.] Here at our own doors are a people, many of them highly civilized, many of them ignorant and irresponsible, all of them broken into factions, swilling the land with blood. Rape, murder, assassination, and all the horrors of utter savagery are let loose upon a people who can not help themselves.

Mr. DYER. Will the gentleman yield?

Mr. HULINGS. Yes.

Mr. DYER. Would the gentleman compare the condition that now exists in Mexico with the conditions which existed in Cuba when this Government interfered there? Considered from the standpoint of interference by this Government, are not conditions now in Mexico as bad as they were in Cuba at that time?

Mr. HULINGS. I think they are far worse. One difference is, the Mexican people are doing this to themselves, while in Cuba it was the Spaniards who were doing it to the Cubans. Every sentiment of humanity, civilization, and Christianity demands that these horrors should cease.

This Government intervened in Cuba in the interests of humanity at the expense of a war with Spain, and she is not yet through with paying the cost.

She has spent hundreds of millions of dollars in suppressing the "head-hunters" in the Philippines and teaching the savages on the other side of the world the blessings of peace, and the end is not yet.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MANN. Mr. Chairman, I am to have some time, and I yield the gentleman from Pennsylvania two minutes.

Mr. HULINGS. Mr. Chairman, I believe it is our duty, without respect to party lines, to stand shoulder to shoulder in this difficult Mexican situation. But I believe the time has come when something should be done. "Watchful waiting" has accomplished nothing. Something else should be done. A diplomacy that has no other plan than "to wait for something to turn up" has been tested to the limit. If intervention is the only other plan, then intervention should come speedily.

Deploring war as much as anyone, no one will rejoice more than I if resort to force can be avoided, but I begin to despair of the laissez faire policy.

I know that country and its people. Order will never be restored save by a strong man supported by a force superior to the factions now harrying the country, and there is no such force in Mexico. How can the Mexican people t rn the guerrillas back to their kennels. How can they pull the assassin Huerta out of his usurped place and put a strong, clean, red-blooded man in control and give him the necessary support? The business interests of Mexico, the conservative man of all factions, wearied of war and waste and bloodshed, would rally to his support. But in my opinion they will require outside help.

The time must come, if it has not already arrived, when it will be the imperative duty of this Government to announce to the world that present conditions in Mexico must cease, and that unless by a given time the Mexicans themselves shall have made pacific arrangements and ceased hostilities the United States in the interests of humanity will undertake to restore peace and good order.

I pray God this may not be necessary, but if war should come, I would willingly leave my place here and, as a soldier not for conquest but for peace and civilization, bear my share of whatever might befall. [Applause.]

Mr. HUMPHREY of Washington. Mr. Chairman, I yield 15 minutes to the gentleman from California [Mr. J. R. KNOWLAND].

Mr. J. R. KNOWLAND. Mr. Chairman, I support the pending bill. The committee has, in my opinion, endeavored to be fair to all localities. I appreciate fully that with 35 States out of a total of 48 asking for appropriations and insistently pressing their demands upon the committee through their representatives that it is impossible to accord to every approved project the amount thought necessary by those most directly and vitally interested. What I have to say is not in the way of a criticism, but more to direct the attention of the House to the great extent of the California coast line, the important harbors within that area, and the rivers tributary.

The bill appropriates in cash $39,227,504 and authorizes $4,061,500 in addition, a grand total of $43,289,004.

EXTENT OF CALIFORNIA COAST LINE IF PLACED ON ATLANTIC SIDE.

The map of the United States before us shows the extent of the California coast line, 1,555 miles in length. I have marked on the Atlantic side a coast line corresponding in length and degrees of latitude. As can be seen, if the State of California could be moved directly eastward and occupy a corresponding position on the Atlantic coast, it would include within its coast boundaries alone territory from Beverly, Mass., to Charleston, S. C.

Now, let us examine the projects within this area, including parts of the 10 States of Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Delaware, Maryland, Virginia, North Carolina, and South Carolina. Massachusetts, from Beverly to the Connecticut and Rhode Island line, has six projects in the bill, carrying appropriations of $473,000.

Connecticut likewise has six, $312,700 being provided.

New York has 25 projects, for which $3,115,875 is carried in the bill.

The State of New Jersey 14, with a total appropriation of $672,800; Delaware 10, calling for $2,486,200; Maryland 8, for which that State receives $135,550. Virginia is allotted $1,385,784 for 15 projects; North Carolina, $710,075 for 22; and that part of South Carolina within the California radius, $107,000 for 6 projects. The total amount provided for that portion of the Atlantic seaboard corresponding with the California coast line is $9,455,984. California receives $1,097,000 for a total of 9 projects.

These figures are not presented for the purpose of criticizing the committee, for I realize that the population argument could be advanced as a possible justification for the excess appropriation of $8,358,984 carried in the bill for the corresponding Atlantic coast line.

CALIFORNIA NOT ASKING TOO MUCH.

I direct attention to the situation, because I have frequently heard, during my long service here, the criticism that California was asking more than other States for river and harbor improvements, no account being taken, apparently, of the vast extent of the Commonwealth's coast line and the great and growing commercial importance of its harbors. Through united action on the part of the Members of the California congressional delegation we have managed to obtain a fair share of the appropriations, but no more than we were justly entitled to receive.

We know no politics in California when it comes to obtaining an appropriation, and we have been fairly successful in our efforts.

Mr. CALLAWAY. Will the gentleman yield?

Mr. J. R. KNOWLAND. Yes.

Mr. CALLAWAY. There are no politics ever at any time whenever you seek to secure an appropriation.

Mr. J. R. KNOWLAND. Neither in California nor in the great South.

The following California appropriations are carried in the pending bill:

*California.*

| | |
|---|---|
| Los Angeles Harbor | $25,000 |
| San Francisco Harbor | 9,000 |
| Oakland Harbor | 98,000 |
| Richmond Harbor | 100,000 |
| San Pablo Bay | 40,000 |
| Humboldt Harbor and Bay | 525,000 |
| Sacramento and Feather Rivers | 25,000 |
| Do | 200,000 |
| Petaluma Creek | 75,000 |
| Total | 1,097,000 |

AWAKENED INTEREST IN WATERWAYS.

There is an awakened interest in California in waterway development. In San Francisco on January 15, 16, and 17 of this year an internal waterways congress was held, attended by representatives from every section of California. Various matters were discussed looking to a quickening of interest in the general subject of water transportation and the improvement of the rivers and harbors of the State. The gathering was most representative and the discussions extremely interesting. When a waterway is improved in California our State has an advantage over Eastern States owing to the mildness of our climate. Our rivers and harbors can be used during the entire winter season because there is no freeze over. The people of California are fully alive to the impetus which will be given to water transportation with the opening of the Panama Canal.

IMPORTANT LAWS FOR PROTECTION OF SHIPPING.

During the 10 years that I have been a Member of this House I have taken a deep interest in the improvement of the rivers and harbors in every section of California. I have fully appreciated the tremendous importance of these waterways in the development of my State.

In 1910 I offered an amendment on the floor of the House to the interstate-commerce act aimed to prevent practices which in the past had done much toward eliminating competition which shippers have a right to expect through water transportation. The amendment provided that when railroads in competition with water routes reduced rates for the purpose of

driving out water competition that they could not again increase such rates. This amendment is now a part of the interstate-commerce act. I also lent my best efforts in the Committee on Interstate and Foreign Commerce in writing into the Panama Canal act a provision preventing railroad-owned ships from operating through the Panama Canal in alleged competition with themselves in an endeavor to minimize the value of the canal as a regulator of freight rates. The sentiment of Congress is so strong that the railroad provisions will, in my judgment, never be repealed, even though Canadian railroads continue to protest.

It is my purpose to refer briefly to a number of the California river and harbor projects, much of the data being compiled from Government reports.

SAN FRANCISCO BAY.

San Francisco Bay is about 40 miles long and varies from 3 to 10 miles in width. It has about 36 square miles of anchorage area, with depths of from 40 to 90 feet. This bay is a natural harbor of the highest type, and consequently the only impediments to navigation with which the Government has concerned itself were a number of rocks scattered about the bay.

The total amount spent prior to the operations under the existing project was $165,927.84. The existing project, adopted March 3, 1899, and twice amended, provides for the removal of Arch Rock and Shag Rocks Nos. 1 and 2 and Blossom Rock. These four rocks were removed and the work completed in 1903.

On June 25, 1910, Congress provided for the removal of Centissima Rock to a depth of 40 feet and Rincon Reef Rocks to a depth of 35 feet, the whole at an estimated cost of $170,000. Rincon Reef Rocks were removed during the fiscal year just past.

The amount carried in the bill—$9,000—will be used for the operating of a police boat to prevent illegal dumping in the harbor and to prevent unauthorized encroachments on the tidal prism. It will also be used for maintenance of ship channels under the present improvement.

Practically the entire harbor front of San Francisco is under State control and administered by a board of three State harbor commissioners appointed by the governor. The port of San Francisco receives no appropriations from the State or city. The State law requires that the harbor must be self-supporting, the cost of improvements, including the building of wharves, dredging, and the construction of sea walls, together with the expenses of administration, to be provided for out of the receipts. There is also a provision stipulating that harbor charges shall not exceed such rates as necessary to meet the cost of construction, operation, and maintenance. In private hands returns would be demanded upon the total value of the property and improvements, with the result that much higher rates would be charged. The belt railroad is controlled by the board. Practically no long leases have been granted, and every shipper can obtain accommodation at reasonable rates.

At present the piers and bulkhead wharves on the San Francisco water front offer about 5 miles of berthing space. In a recent report of the board of State harbor commissioners the statement is made that dock facilities may be so enlarged as to give 44 miles of berthing space.

OAKLAND HARBOR.

Oakland Harbor receives in this bill the sum of $98,000 for continuing work under the existing project. This is the amount which the local engineer, Col. Rees, states can be profitably expended during the fiscal year, considering the contracts which are now under way. On July 1 of last year there was an unexpended balance of $464,465 on hand, but most of this is now under contract.

This harbor has 20 miles of available shore line. The splendid harbor at Oakland has been the development of what was formerly known as San Antonio Creek. This harbor then had a depth of but 2 feet at low tide, with a tidal range of about 5 feet.

The city of Oakland has fought for years to regain control of its water front. In the early fifties the then town of Oakland made some unfortunate grants of valuable rights on the harbor to an individual. These were later transferred to a railroad corporation. It has only been within recent years that the city has obtained substantial control of its entire water front. This has been due to court decisions, legislative acts, and favorable compromises. The city has already voted $2,500,000 for improvements and has under way the building of reinforced concrete wharves and a quay wall 3,700 feet in length equipped with railroad tracks, steel warehouses, and machinery for the handling of freight. There is also being built a retaining wall across the key route basin, on the western water front, where most extensive improvements are contemplated. The city plans to eventually expend $20,000,000. The municipal belt railway system as planned will extend around the entire city front, connecting with every railroad that enters the city—three transcontinental railroads now entering Oakland—and with every wharf, with spurs leading to manufacturing plants. Under the proposed development of the water front there will be 46,000 feet of municipally owned docks and 46,000 feet of privately owned.

The Government engineer in charge of the Oakland district has just reported a most comprehensive plan for the fullest development of this western water front, a project that will allow of such expansion as to meet fully the growing demands of the future.

LOS ANGELES HARBOR.

Los Angeles Harbor consists of two parts. First, the outer or breakwater harbor, formerly designated San Pedro Harbor, and second, the inner harbor, formerly designated Wilmington Harbor. On account of the consolidation of the cities of San Pedro and Wilmington with Los Angeles on August 12, 1909, later appropriations for these works have been made under the name of Los Angeles Harbor.

The outer harbor, originally San Pedro Bay, was an open roadstead, with a considerable amount of kelp, well protected on the west by the bluff which terminates at Point Fermin, but exposed to the southeast, south, and southwest. A project to build a breakwater to the eastward of Point Fermin about 8,500 feet in length, or as much longer as could be constructed within the authorized limit of cost, $2,900,000, was adopted by Congress June 3, 1896. The amount expended under the project was $2,830,400.90.

As originally planned and built there was a gap of 1,887 feet wide between the west end of the breakwater and the shore. The project for extending the breakwater to the shore was authorized by Congress June 25, 1910, with an appropriation of $178,000. During the fiscal year the breakwater was completed at an outlay of $208,296.52. In addition to the $178,000, $30,296.52 was expended from the balance of the $2,900,000 appropriated originally.

The construction of the breakwater has resulted in the dying out of the kelp, and there is now afforded a harbor of refuge, easy of access and secure from storms for vessels of the largest size. It shelters 370 acres with 30 to 50 feet depth at mean lower low water, and 200 acres additional, outside established harbor lines, with 20 to 30 feet depth at mean lower low water. Two channels 30 feet deep have been dredged by private enterprise, each about 5,500 feet long, alongside wharves constructed or under construction. The breakwater also shelters the entrance to the inner harbor.

A project was adopted July 25, 1912, for dredging to the depth of 35 feet a portion of the outer harbor; $327,250 was appropriated for carrying out this project. The project is 28 per cent completed. Dredging was done to the depths of 22 to 34 feet over the area referred to. The amount expended to the end of the fiscal year is $64,919.07, with outstanding liabilities of $14,660.50.

The city of Los Angeles has begun the improvement of 79 acres on the westerly side of the entrance channel.

At the inner harbor, previous to commencement of the improvement, in 1871, there was a depth of less than 2 feet at low tide at the present entrance, the sea breaking across what is now Terminal Island at various points. Vessels anchored in the outer harbor, and cargoes and passengers were transferred by lighters to Wilmington. Wilmington Lagoon was a large expanse of shallow water, containing but one good channel, the channel leading to Wilmington.

The maximum draft that can be brought into the harbor is 30 feet at mean lower low water. The average of rise of tides above the plane of reference is 5.2 feet.

The existing projects for the improvement of the inner harbor were adopted by the river and harbor act approved June 25, 1910. They provide for—

First. Dredging to 30 feet depth at mean lower low water from the entrance up to and including the turning basin. It was estimated that this work would require the dredging of 3,000,000 cubic yards of material, at a cost of 14 cents per yard, or $420,000. On June 30, 1911, the increase of this estimated cost to $596,000 was authorized for the following reasons: The original estimate for this work contemplated doing all the dredging by suction with the U. S. dredge *San Pedro*. The character of the material in the outer 5,600 feet of the channel, and especially opposite Dead Mans Island, was such that it was found necessary to handle the same by clam-shell or dipper dredge. A total of $596,000 has been appropriated for this work by the river and harbor acts of 1910, 1911, 1912, and 1913.

Second. Dredging two channels from the turning basin into the east and west basins, respectively, the channels to be 200 feet wide and 20 feet deep. It was estimated that this work

would require the removal of 2,200,000 cubic yards of material, at an estimated cost of $390,000, including the construction of a dredge; subsequently reduced to $220,000.

No modifications have been made in these projects.

The amount expended on the 30-foot project of June 30, 1913, is $502,182.20, with outstanding liabilities of $7,041.18. It is estimated that the project is 79 per cent completed.

The amount expended on the 20-foot project to June 30, 1913, is $163,637.97, with no outstanding liabilities. It is estimated that the project is 88 per cent completed.

The result of the work done by the United States is to make 16,000 linear feet of wharf frontage accessible to vessels drawing 30 feet, and to increase the draft that can be carried to the upper parts of the inner harbor.

The funds on hand are sufficient to complete the 30-foot and 20-foot projects. The funds asked for, $25,000, and carried in this bill for the fiscal year ending June 30, 1915, will be used in maintaining these channels.

CONTROL OF PORT.

The port of Los Angeles is controlled entirely by the municipality, which, through a board of harbor commissioners, makes all rules and regulations for the government of the harbor, fixes all pilotage, dockage, wharfage, and handling charges, and operates the port as a municipal enterprise.

The city owns 394 acres in the outer harbor of what was originally submerged land. Of this, 154 acres was leased by the former city of San Pedro to private parties, who have reclaimed it and improved it with wharves and warehouses. Of the balance, the city has just completed reclaiming 66 acres, which are being improved with reinforced concrete wharves and steel transit sheds, and plans are under way for reclaiming 138 acres more.

There are now 24,905 feet of privately owned wharves along the water front held under franchises or permits, and the city has 1,985 feet of municipal wharves, most of which have been recently built. It also has under construction 3,590 feet of additional wharf, of which 2,520 feet will be of reinforced concrete, costing approximately $176 a linear foot.

The city also is constructing 1,800 feet of steel transit sheds and 1,530 feet of wood frame transit sheds, besides doing a large amount of dredging.

There are on present Government harbor lines approximately 20¾ miles of water front, most of it unimproved. This can be greatly increased by dredging slips, but only a few such slips have yet been definitely determined upon. The possibilities of the harbor, as shown by E. P. Goodrich, the consulting engineer for that city, will afford more than 100 miles of water front when fully developed.

THE SACRAMENTO RIVER PROJECT.

This project, for which the bill carries an initial appropriation of $200,000, is not the ordinary case of the improvement of a river. A brief reference to the early history of the State of California would probably best illustrate this point.

During the days of early mining the Sacramento River was filled up with débris, and the State was powerless to prevent it because the United States owned the land that was being washed into it. It took a great many years to make the Government understand the condition of affairs so the hydraulicking and washing of the hills down into the Sacramento Valley could be stopped. The gold which was produced as a result of this mining was almost a necessity to the Government in the early sixties, as the $50,000,000 or $60,000,000 a year that came out of California provided the gold to pay the interest on the Government bonds.

It was the Government's exclusive business to see that navigation on the river was not destroyed. The Government failed to do this, and therefore the State of California seems to have a case with larger equities than the case of an ordinary improvement of a river.

In 1893 the Federal Government recognized some obligation on its part to restore the stream to the condition that existed before the havoc was done by the mining interests, which operated under the laws of the United States.

In that year Congress pased an act, known as the Caminetti Act, creating the California Débris Commission and declaring a purpose of dealing with the subject.

Appropriations were made from time to time for this object, and the State usually contributed an equal amount.

In 1907, pursuant to the directions of the Caminetti Act, the débris commission made a partial report, recommending the execution of part of the plan under its jurisdiction.

Congress and the State each appropriated $400,000 for this purpose, which sum has been used in part to construct two large dredges, which have been completed and are now engaged in excavation at the mouth of the river.

In 1910 the commission made a more extended report, recommending a plan contemplating the construction of levees and the acquisition of by-passes to carry the excess waters in addition to channel improvement.

When this report was presented to Congress in 1912 the Committee on Rivers and Harbors declined to recommend its adoption, because certain features of the plan were intended to promote reclamation of land; but the principal reason for the action of the committee was found in the report of the Board of Engineers (1910), wherein it is said "the execution of this project is not necessary in the interests of navigation.'

At the session of the legislature of 1913 an act was passed which separates all of the plan which embraced the construction of levees and purchase of by-passes and rights of way, and provides to carry out at private expense all of the plan except channel rectification and enlargement and the construction of weirs to regulate the flow of the river, so as to encourage its scouring capacity and the consequent removal of the accumulated mining débris.

The débris commission assumed the burden of separating, as far as possible, the portion of the plan which related to reclamation and which did not relate to navigation directly, although it has always been understood that a complete separation of these elements is impossible.

For an illustration, private interests construct all of the levees along the streams whereby the water is confined to the channels promoting scouring and aiding navigation. For this part of the work Congress is not called upon to contribute any sum whatever, although it involves an expense of $7,838,975, as estimated by the commission.

In many instances in other States Congress has made appropriations for levee construction where flood control has been the primary object and reclamation the primary purpose. California does not ask this. While the State is doing so much for navigation is it unreasonable for it to request some participation by the Government?

The estimate of cost by the report of 1910 was $33,000,000, one-third of which, or $11,000,000, was apportioned to the United States. The supplemental report segregates all except $12,517,000, from which is deducted $800,000 already appropriated, leaving $11,717,000 to be borne by the State and Federal Governments—$5,858,000 each. This leaves over $20,000,000 of the original estimates to be provided by taxing the land of private owners that would be benefited by the work.

A considerable portion of these estimates has already been paid by the reclamation of large tracts at private expense.

The supplemental report strongly recommends a definite policy, as follows:

> First. That the Federal Government should not relinquish control over the entire plan, for the reason that control is necessary to prevent anything being done in one part of the work that affects the general plan, particularly in limiting flood heights.
>
> Second. The adoption by Congress of the plan would confer on the commission power to exercise control over the work done on other elements of the plan than those participated in by the Federal Government. It also appears that the plan, as supplemented by the present report, is necessary in the interests of navigation and apparently the best method of reasonable and permanent navigation.

One of the objects of the plan is the preservation of life and property as well as the reclamation of a vast territory of rich land that must be dependent upon the execution of this plan for any kind of cultivation or profit.

There are about 400,000 acres in a comparative state of reclamation, but it will never be safe until the plan is executed. In 1907 millions of dollars' damage was done, and nearly all of the reclamation districts were flooded. There are about 300,000 acres more in process of reclamation because of the expectation that this plan will be carried out, but no one would expect these reclamations to be effective to any degree unless the plan should be executed.

It must be borne in mind that all of this reclamation is being borne by private expense and that all of the plan excepting the river channel improvement and control is to be paid for by the owners of the land.

The interests of navigation are very much involved in the carrying out of this plan.

An initial expense in the purchase of the land required for the weirs must be borne by the landowners, as the title must be turned over to the Government. This expense will probably reach a sum in excess of $1,000,000.

Any appropriation would be contingent upon acquisition of title to the necessary land as an equal appropriation by the State. Such action would encourage the advanced movement in the execution of the problem under the stimulus of an interest displayed by Congress.

States and communities are constantly asking donations for flood control, but I do not know of any that have offered to

share so large a proportion of the expense. We are asking for less than one-sixth of the whole. The State is undertaking a work in which the whole Nation is interested and one that has always been recognized as one of the burdens of the General Government.

The State is contributing one-half of the money applicable to the interests of navigation, and in addition is spending millions of dollars in the construction of restraining levees, which directly benefit navigation by keeping the waters within the channels.

The State is building up and creating an industrial Commonwealth, which makes an immediate demand for better navigation to carry the augmented product, and the State is presenting to the United States an opportunity to assist in creating a condition which, in a few years, will bring the combined Sacramento and San Joaquin Rivers to the front in commercial importance. They are now occupying the fifth position.

The extent of land to be protected is 1,750,000 acres. The product from this land is now too great to depend upon present navigable features of the river. Better navigation is needed and the commerce of the United States demands that all reasonable improvements be made.

The dredging of the mouth of the river is to relieve a gorge of the channel which has been produced by the narrowing of the channel at that point, causing it to become crooked and tortuous. When this choke has been removed the water will find a free, uniform passage and the débris in the channel above will escape.

Control of the water in the upper reaches of the river will prevent deposits and keep the river free for navigation.

Caring for these features is purely a function of the Federal Government, the expense of which is usually provided for by Congress alone.

When this work has been completed the problem of navigation on the Sacramento River will be forever settled.

It must be remembered that the burden of maintenance of these works after completion falls upon the State of California and that the Federal Government is to be relieved.

At present the State is engaged in channel improvement on the Sacramento River. It has just appropriated $150,000, which is being used for protection of the banks, without asking Congress for assistance.

SAN PABLO BAY.

Before improvement there was a shoal with a least depth of 19 feet at mean lower low water lying across the path of vessels going to and from the Sacramento and San Joaquin and Mare Island Navy Yard. For the deeper-draft vessels navigation was possible only at the highest stages of the tide.

The original project was adopted June 13, 1902, and provided for a channel 300 feet wide, 30 feet deep, and 27,000 feet long across the shoals in the bay.

A total of $325,165.33 was spent on the original project prior to operations under the present project.

The existing project, adopted February 27, 1911, provides for dredging the channel in San Pablo Bay to a width of 500 feet and a depth of 30 feet, and for a dredge for maintenance. The total estimated cost of the War Department part of the project is $760,000, with $100,000 for maintenance.

Dredging work has been in progress throughout the year under contract. The location of the work is such that the spoils have to be deposited at a distance of about 2 miles from the channel. There have been a number of serious breakdowns and long delays during the year. This work is largely new work, but is partly renewal of old work that had been obliterated.

The total amount expended on the existing project up to June 30, 1913, was $268,573.48, no part of which was for maintenance. The sum of $110 was received for inspection of certain private work done under War Department permit. The outstanding liabilities at the end of the fiscal year amounted to $30,873.27.

The work of dredging is being done under continuing contract appropriation and the full amount of the authorization has been appropriated. The work in progress consists of dredging a channel through Pinole Shoal over a length of 27,200 feet. The approved project was about 74 per cent completed on June 30, 1913.

The funds estimated for expenditure in the fiscal year ending June 30, 1915, will be used for operation of the Government dredge soon to be built for maintaining the channel across Pinole Shoal.

The bill carries an appropriation of $40,000, which is the amount that can be profitably expended on this project in the fiscal year ending June 30, 1915.

The San Pablo Bay project is particularly important because of its relation to the Government navy yard at Mare Island. The improvement of this channel is being carried on in conjunction with the Navy Department, under whose auspices dredging operations are being carried on to increase the depth of the channel leading to the navy yard. All Government ships bound for the navy yard pass through San Pablo Bay. The improvement is important not only to the navy yard, but is also of great commercial importance because of the shipping at Port Costa and through points to Carquinez Straits.

SUISUN CHANNEL.

It was my privilege to obtain the survey and assist in securing the first appropriation for Suisun Channel. Originally it was a tidal inlet from Suisun Bay, varying in width from 80 to 600 feet, and varying in depth from 0 to 17 feet at mean lower low water. Navigation was possible only at the higher stages of the tide. The section under improvement is about 2 miles long, and its lower end is about 15 miles from the mouth of the channel. The maximum draft that can be brought into the channel from the ocean is 9 feet at mean lower low water.

The present project was adopted in the river and harbor act of June 25, 1910, and provides for a harbor at Suisun 1,400 feet long by 150 feet wide and 6 feet deep at mean lower low water and a cut-off 3,000 feet long, 80 feet wide on the bottom, and 6 feet deep at mean lower low water, from the basin to Peytonia Slough. The estimated cost was $25,000, and $2,000 annually for maintenance. The cut-off having been found impracticable, the project was modified in accordance with the authority given by the river and harbor act of March 4, 1913, by substituting the natural channel around the bend for the cut-off. No work was done in the field during the year.

The total amount expended on the existing project up to June 30, 1913, was $252.78, all of which was for preliminary work.

MONTEREY HARBOR.

No work has ever been done by the United States toward the improvement of this locality. The harbor is about 3,000 feet long by about 1,700 feet wide, and the depths vary from 18 feet in the inner part to 60 feet at the outer part. The plane of reference is mean lower low water. The harbor facilities are generally sufficient for present commerce, except in the matter of protection from storms and heavy ocean swells. The shipping facilities are inadequate for prospective commerce.

There is no bar at the entrance of the harbor. The maximum draft that can be brought into it from the ocean is 60 feet at mean lower low water. The present project, adopted July 25, 1912, is the original project. Nothing has been spent on this work as yet.

The existing project provides a method of improvement by breakwater 2,000 feet long, 10 feet above mean lower low water, and 15 feet wide at the top, at an estimated cost of $800,000, of which $200,000 is to be contributed by local interest, and subject to the condition that rail connection be provided between Monterey and San Joaquin Valley within a reasonable time.

THE RICHMOND PROJECT.

The bill carries $100,000 for Richmond Harbor. The plan provides for the construction of an entrance channel, a basin, and an inner branch channel, all to be protected by a training wall and dike. The ultimate depth proposed for the improved harbor is 24 feet at mean lower low water, but for the present only a part of the basin and the entrance channel are to have this depth, the balance of the basin and the inner channel to be given a depth of 20 feet.

The estimated cost of the whole work to a depth of 24 feet is $1,975,000, and of that part of it which it is proposed to do at present, $1,757,000. It is estimated that maintenance will cost $30,000 per year for the first year and $15,000 per year thereafter.

The Board of Engineers believes that the United States would be justified in undertaking this work on the basis of half its cost being paid by the locality, and it recommended the adoption of the present project involving an entrance channel 600 feet wide, protected by a training wall faced with riprap, a suitable turning basin at Potrero Point, and a channel thence to the Ellis Slough, all to a depth of 24 feet, at a total estimated cost of $850,000, provided that the locality contribute one-half of this amount.

The Rees plans for the east San Francisco Bay district include the harbor of Richmond. The enterprising people of this growing community have set an example of liberality in cooperating with the Government that many localities might well follow. The city has already voted $1,170,000 to be used for harbor improvements and in addition has authorized the submission of another bond issue, which provides for the payment of $75,000 per annum for a period of five years to be applied toward defraying the expense of Government dredging. Part

of the receipts from the harbor will be set aside for a like purpose. The entire inner harbor will be municipally controlled.

Richmond, fast becoming a manufacturing center, will offer, when the present plans are completed, fully 13 miles of berthing space. At least 7 miles of the water front will be municipally controlled.

NAPA RIVER.

The Napa River has a length of about 45 miles. The section included in the project is the lower 18 miles. The maximum draft that can be brought to the mouth of the river from the ocean is 24 feet at mean lower low water. Before improvement navigation was possible only at the higher stages of the tide.

The project for improvement adopted in 1888 provided for dredging and cutting off projecting points of land so as to obtain a channel 75 feet wide and 4 feet deep and to remove logs, snags, and other obstructions, at an estimated cost of $27,600.

The population and commerce of this locality have increased to such an extent that boats are required to sail on regular schedule instead of waiting for high tide, as heretofore, and this necessitates a deeper channel than is authorized by the present project, adopted 25 years ago. It is recommended that a preliminary examination be authorized with a view to determining upon the advisability of further improvement to meet the needs of present navigation.

The present project was completed in 1910, and a clear channel 75 feet wide and 4 feet deep was obtained from the mouth up to the head of navigation. The length of the improved section is 18 miles, and the head of navigation is the city of Napa.

The river and harbor act of 1913 authorized a resurvey of Napa River with a view to making the necessary cut-offs. This survey was made by the local engineer, who reported that further improvement was deemed advisable to the extent of making four cut-offs 6 feet deep at mean lower water and with widths as proposed by the district officer, at a total estimated cost of $43,000, provided that no expense shall be incurred by the United States for acquiring any lands. A preliminary appropriation of $20,000 is recommended for work on Jacks Bend, Spreckels Point Bend, and Car Bend, the balance of $23,000 to be appropriated when the necessary right of way and dumping ground for the cut-off at Horseshoe Bend have been furnished the United States free of cost. As the report was not received in time to be considered by the House committee, an amendment will, I understand, be offered in the Senate Committee on Commerce by Senator Perkins, which will no doubt be agreed to in the House.

PETALUMA CREEK.

Before improvement this creek was very crooked, dry in many places at low tide, and could be navigated only at higher stages of the tide. The channel was from 80 to 600 feet wide.

The existing project, adopted March 2, 1907, provides for dredging a channel 6 feet deep and 50 feet wide from the mouth to McNears Canal, and 4 feet deep and 50 feet wide thence to the head of navigation. The estimate of cost was $15,239. The improved project was completed in 1907, and all work done since has been for maintenance of the authorized width and depth of channel. The navigable portion of the creek is 18 miles in length.

The unexpended balance on hand being sufficient for all necessary work, no further funds, the local engineer states, will be needed for the fiscal year ending June 30, 1915.

REDWOOD CREEK.

Before improvement there were shoals in this creek that were bare at low tide. The channel had a width varying from 80 to 400 feet and was used only during the medium and higher stages of the tide. The total amount spent prior to the adoption of the present project was $31,442.66. This was for dredging a channel about 6,000 feet long, 50 to 60 feet wide, and 2 to 3 feet deep. In 1902 this project was modified to provide for a channel depth of 5 feet and certain works to confine the current.

The present project, approved June 25, 1910, provides for a channel 150 feet wide and 5 feet deep at mean low water up to the city dock, about three-fourths of a mile below Redwood City. The estimated cost is $12,000, with $1,500 annually thereafter for maintenance.

It is recommended that a preliminary examination of the locality be authorized, with a view to determining upon the advisability of reducing the project width of the improved channel and extending it to the head of navigation. The project requires a much wider channel than is necessary and does not provide for reaching the head of navigation. No work was done during the year and no expenditures made.

The total amount spent on the existing project to date is $10,320.80. The present project was entirely completed early in 1911, and the result was a channel 150 feet wide and 5 feet deep from San Francisco Bay up to the city dock.

No estimate is made for expenditures for the fiscal year 1915, because the funds on hand—$4,679.20—will be sufficient for all necessary work.

SAN DIEGO HARBOR.

This harbor is just north of the Mexican boundary, 89 nautical miles southerly of Los Angeles Harbor and 482 nautical miles southerly of San Francisco. At 21-foot depth of water at mean lower low water it has a width varying from 500 feet to 2,000 feet, and is about 9 miles long. The total water area is about 21 square miles at half tide.

The river and harbor act approved March 3, 1875, appropriated $80,000 for the construction of a dike across the mouth of San Diego River, to divert it into False Bay and thus prevent injury to San Diego Harbor from deposit of material brought down during floods. This work was completed in 1876 at a cost of $79,798.72. The cost of repairs made since has brought the total of expenditures to $86,832.03.

The project for the improvement of the harbor, approved September 19, 1890, provided for the construction of a jetty on Zuniga Shoal at the entrance of the harbor; the maintenance of a channel, 24 feet deep at mean low tide and 500 feet wide, through the middle ground; and repairs to the restraining dike. The jetty was to rise to the height of extreme high water and to be about 7,500 feet long, with a view to producing a depth of 26 feet at mean lower low water on the outer bar. The amount expended on this harbor up to the completion of this project was $625,211.68.

The river and harbor acts of March, 1905, 1907, and 1909, appropriated in all $60,000 for maintenance. The amount expended on this project—maintenance—was $59,904.21.

The project adopted June 25, 1910, provided for dredging a channel through the outer bar, 30 feet deep and 600 feet wide, and also a channel through the middle ground to the depth of 30 feet, this latter channel to be 400 feet wide at its southerly end and to widen out at the northerly end in order better to accommodate vessels using the United States Navy coaling station at La Playa. The act appropriated $125,000 for this work, which was the estimated cost of the improvement. The amount expended was $124,703.68.

The existing project was adopted March 4, 1913. The act appropriated $208,786 for dredging a channel through the outer bar, 35 feet deep at mean lower low water and 570 feet wide, with side slopes of 1 on 5, and also a channel through the middle ground of 32 feet at mean lower low water and of a regular shape. The same act appropriated $35,000 for the maintenance of these channels. No work has as yet been done under this project.

The legislature of 1911 granted to the city of San Diego control of its entire water front. The city has already voted a million dollars for a municipal pier, which is now nearing completion. This pier will be equipped with railroad tracks and every facility for expeditiously handling freight. The total length of bulkhead at San Diego is 50,500 feet, giving a total deep-sea dockage of 13 miles and a total coaster dockage of 6 miles. Very extensive plans have been prepared by the municipality for the future development of the harbor to meet the needs of increasing commerce. The importance of San Diego Harbor will be greatly increased with the opening of the Panama Canal, as it will be the first Pacific port in the United States for ships bound north after passing through the great waterway. The municipal wharves now under construction will be of concrete and steel. Private wharves are leased from the city, the administration of its entire harbor front being under a board of municipal harbor commissioners.

No additional funds are asked for, as it is estimated that the amount appropriated will complete the project, and $35,000 has been appropriated for maintaining the project depth.

The present bill carries an authorization for a new survey of this harbor, the following language being used:

San Diego Harbor, Cal., with a view to widening the main channel at the Government coaling station, and at other places in the harbor where widening may be needed; providing ample approaches to the municipal docks and wharves and a suitable turning basin.

SAN JOAQUIN RIVER.

This stream rises in the Sierras south of Mono Lake, near the California-Nevada boundary line.

After flowing southwesterly to a point about 35 miles west of the city of Fresno, it turns and flows northwesterly through San Joaquin Valley to the head of Suisun Bay. The stream has a total length of approximately 350 miles.

A draft of about 16 feet may be brought to the mouth of the river at low tide from the Pacific Ocean. The distance from the ocean at the entrance to the Golden Gate to the mouth of the

river by way of San Francisco Bay, San Pablo Bay, and Suisun Bay is 50 miles. These bays and the San Joaquin, Sacramento, and Mokelumne Rivers and their branches, sloughs, and artificial canals (dredger cuts) all go to form a large and important system of inland waterways.

The navigable portion of the San Joaquin River under improvement consists of two distinct sections: First, the tidewater section in the extensive and fertile delta region extending from the mouth of the river up to about Stockton, a distance of 45½ miles; traffic here is important and navigation is continuous all the year round. Second, the section above Stockton, and especially above tidal influence at San Joaquin Bridge.

The first appropriation was made August 14, 1876. With this and subsequent appropriations the operations have been thus far carried on, with the view of providing and maintaining an improved channel 9 feet deep and 100 feet wide all the year round from Suisun Bay to Stockton; removing the worst obstructions and closing several side channels in the river above Stockton Channel, with the view of aiding in some measure light-draft steamboats to ascend to Hills Ferry for wheat shipments; obtaining and maintaining, so far as is practicable, a low-water channel 80 feet wide and 4 feet deep in the lower 1½ miles of Mormon Channel; and preparing to dredge Fremont Channel and McLeod Lake to 9 feet at mean low water.

The expenditures during the fiscal year ending June 30, 1913, amounted to $3,327.39, of which $175 was for original work and $3,152.39 for maintenance.

The total expenditure up to the close of the fiscal year ending June 30, 1913, amounted to $617,717.99, the greater part of which has been applied to the channel between Suisun Bay and the city of Stockton.

The improved channel is generally 100 feet wide and from 7 to 8 feet at low water. While the projected 9-foot channel has been obtained on several occasions, it has existed for short periods only.

While the length of the main river through the delta region is about 65 miles, the aggregate length of the network of natural and artificial waterway tributary to it in that region is over 200 miles. While portions of the delta region are reached by transcontinental railroads, three in number, no railroad has yet been built into the interior of the region. Consequently the bulk of the product is moved by water. Freight rates by water are low. They are also low by rail to such points as may be reached by both water and rail. Approximately 650,000 short tons of freight, valued at $33,000,000, is handled annually on the river.

By the act approved June 25, 1910, there was adopted a project for obtaining and maintaining a channel having a 200-foot bottom width and 9-foot depth from Suisun Bay to Stockton, at an estimated first cost of $240,000 and $25,000 annually for maintenance, to be accomplished by dredging where necessary and making two cut-offs. The project also provides for obtaining a sufficient right of way to permit of increasing the dimensions of the waterway should this become desirable in the future. The lands necessary for the two cut-offs have been acquired and deeded to the United States by local interests free of cost.

No additional funds are required for the fiscal year ending June 30, 1915, the balances unexpended being sufficient to carry on the work proposed.

SAN LUIS OBISPO HARBOR.

The original project, adopted August 11, 1888, provided for the construction on Whaler Reef of a breakwater of rubblestone rising to mean lower low water and extending from Point San Luis to Whaler Island, a distance of 326 feet, and thence to a point where the outer reef rises above high water. Exclusive of Whaler Island, which is 245 feet long, the breakwater was to have a length of about 1,736 feet, and its estimated cost was $284,898.

This project was modified January 17, 1893, to provide for raising the structure to the height of 6 feet above mean high water, with a top width of 20 feet and such side slopes as might be formed under the actions of the sea. The estimated cost was increased to $568,660.

The existing project, therefore, is the construction of a breakwater from Point San Luis to Whaler Island and from Whaler Island extending southeasterly to a distance about 1,800 feet, the breakwater to be built to a height of 6 feet above mean high water, with a top width of 20 feet and such side slopes as may be formed under the action of the sea.

The act of March 2, 1907, appropriated $63,660 and authorized continuing contracts for the completion of the work at a cost not to exceed the additional amount of $200,000, all of which has been appropriated.

The amount expended on the project up to June 30, 1913, is $508,367.89, with outstanding liabilities amounting to $18,619.99. Of this amount, $77,223.08 was expended during the year. The project is 93 per cent completed.

Further work under the project will afford increased shelter. The unexpended balance will be applied to the extension of the breakwater to its full projected length and height. No additional funds are asked for, as the amount appropriated will complete the project.

FEATHER RIVER.

The Feather River rises in the Sierras; flows westerly until it enters the Sacramento Valley in the vicinity of Oroville; flows south through that valley and empties into the Sacramento River at Vernon, 20 miles above the city of Sacramento.

For a number of years before improvements were undertaken by the Government, the expense of maintaining navigation in the Sacramento from its mouth to Red Bluff—258 miles—and in the Feather from its mouth to Marysville—30 miles—was met by the steamboat companies. After the advent of the railroads and the lessened profit to the steamboat companies these companies discontinued the work of improving the streams.

The first appropriation by Congress was made March 3, 1875. The low-water depth in the Feather River from its mouth to Marysville was about 2 feet, and this stream was navigated by one steamboat, plying weekly between San Francisco and Marysville.

From 1875–1899 the operations were carried on under indefinite projects which contemplated the maintenance of a low-water channel depth in the Feather River of 2 feet to Marysville. A portion of $740,860.21 was expended under this indefinite project.

Until recently Feather River has not been navigated by steamboats regularly. Between January 28 and June 30, 1913, one boat between San Francisco and Marysville made 18 trips, carrying 2,729 short tons of freight valued at $160,000.

Much of the country along the Feather River is subject to widespread overflow during the winter and spring months, the channel being unable to carry off the rainfall in the valleys and foothills and the melting snow in the mountains. Unrestricted hydraulic mining in earlier years has contributed largely to the difficulty by filling up the bed of the stream.

Occasional dredging seems to be the best method of treatment.

HUMBOLDT HARBOR.

This is the most important harbor in the northern section of the State. Before improvement the entrance was obstructed by a bar having channel depths of 12 to 15 feet. Navigation with the deeper draft vessels was generally limited to higher stages of the tides and to favorable conditions of wind and weather. The locality is about 272 miles north of San Francisco.

There is an available depth of 18 feet at mean lower low water over the bar across the jetty channel.

A project for the improvement of the harbor entrance was made in 1882, which was modified in 1888 and again in 1891, this final modification providing for parallel high jetties each 8,000 feet long. The amount expended on these projects—1882–1909—was $2,178,704.14.

The present project, which has not been modified since its adoption, provides for rebuilding the jetties in accordance with the report submitted in House Document No. 950, Sixtieth Congress, first session, at an estimated cost of $1,037,400.

The approved project was 48.09 per cent completed on June 30, 1913. It is now estimated that the completion will cost $500,060 more than originally estimated. This increase of cost is due to the increase in cost of labor, supplies, and to an additional tonnage of stone. The bill carries $525,000 for Humboldt Harbor and Bay.

BAY OF EUREKA.

The existing project, which has not been modified since adoption, provides for a channel 300 feet wide, 18 feet deep, and 6,200 feet long. The estimate of cost was $83,000 and was adopted by Congress on March 2, 1907.

The project was completed in 1908 at a cost of $86,895.70.

The descriptions which I have given of the various California projects provided for in the bill show how deeply my State is interested in river and harbor improvement. The future prosperity of the Commonwealth is dependent, in no small measure, upon the fullest development of its waterways. [Applause.]

Mr. SPARKMAN. Mr. Chairman, I yield to the gentleman from Louisiana [Mr. ELDER].

Mr. ELDER. Mr. Chairman, I presume that it will be unnecessary for me to state that I am heartily in favor of this bill, representing as I do a district on the Mississippi River for the

length of 256 miles, a district that has perhaps more navigable miles of water transportation than any other district in the United States. I feel that it would be fair enough to say if I did not believe the money was wisely expended as proposed in the bill, I would certainly oppose it.

My congressional district is divided into two levee districts, known as the fifth levee district and the Tensas Basin levee district. In the fifth levee district there are 2,000,000 acres of land protected by the levee. Of these, 500,000 acres are cleared and 250,000 acres are in a state of cultivation. In 1912, 1,900,000 acres of this district were overflowed. It is estimated that 65 per cent of the levee is in a completed state. At this time, in addition to the help the Government gives us, there is an ad valorem tax of 10 mills, a tax of 5 cents on each acre of land; the railroads are taxed $100 per mile; there is a cotton tax of $1 per bale. The revenue from the State is about $75,000, with a gross annual revenue of $220,000. There are $500,000 worth of bonds outstanding. The assessed value of the district in 1911 was $8,619,245. In the Tensas Basin levee district there is an area of 2,800,000 acres of land, of which 300,000 acres are in a state of cultivation. In 1912, 560,000 acres of land were overflowed. This district has a 10 mills ad valorem tax, a tax of 5 cents on each acre of land, a tax of $60 per mile for each mile of standard railroad, and $30 for each mile of narrow-gauge railroad. It also receives 10 per cent of a seventeen-twentieths of 1 mill of a general State tax. The assessed value of this district in 1910 was $7,298,416. There has been spent by this district as a total up to January 1, 1914, the sum of $1,348,189.11. There are outstanding bonds of $65,000. It cost these two districts to make a largely unsuccessful high-water fight in 1912 $62,213.09.

I hear some advocate the theory here that as they do not live within the overflowed section, therefore their people should not be forced to contribute to the building and maintenance of a levee system for the Mississippi or any other river. Mr. Chairman, it looks to me that such a doctrine is a fallacy, and if carried to its logical conclusion it means that the Government would not expend money for any purpose; that it would not deepen the harbors or build a public building, as the immediate effect of such legislation is to show its particular benefit to the country immediately affected. However, I do believe in the doctrine that any expenditure of money which will help and benefit a particular section will eventually disseminate its good to the people of the whole country. I, of course, do not mean to imply this should be a wasteful expenditure or an expenditure that would not bring a commensurate return. We recently authorized an expenditure of $35,000,000 only as a starter to build a railroad in Alaska, in the hope that that country might be advanced and that the rest of America will eventually be benefited and repaid for this and the succeeding expenditures. You heard the advocates of that bill tell of the wonderful agricultural resources of the frozen North; yet, Mr. Chairman, even if their fondest ideas are realized the agricultural possibilities of Alaska can never equal by one-tenth the same possibilities of the overflowed district on the Mississippi River.

Another reason why this Government should protect the overflow of the Mississippi River is that we act as a basin for an enormous stretch of territory. We act as a basin for a waterfall that covers the entire States of South Dakota, Iowa, Illinois, Kentucky, Tennessee, Arkansas, Missouri, Oklahoma, Kansas, and Nebraska. We act as a basin for a portion of the States of New York, Pennsylvania, West Virginia, Virginia, Ohio, Michigan, Wisconsin, Minnesota, North Dakota, Montana, Wyoming, Colorado, Texas, Louisiana, Mississippi, Alabama, Georgia, and North Carolina. A drainage basin that constitutes 41 per cent of the total area of the United States and also a portion of Canada. This overflowed basin is 29,000 square miles in extent. Previous to the cultivation of this 41 per cent of the area of the United States the flow of the water was slower and there was no such rush of the waters, and the lands were not so seriously subject to overflow for this reason. The land being an alluvial or made land, with an extremely rich and deep soil, is as rich as that alluvial Valley of the Nile. The people from various parts of the country began to open up this land and to cultivate it. In the beginning, these overflows were not serious. Broad and fertile farms that helped materially to give the United States its balance of trade were beginning to blossom all over that basin. At the same time the lands in the other portion of the country were being opened up, and year by year the rush of the waters began to be more serious, overflows began to threaten these people in this rich basin, and they began to cast about to find ways to protect themselves from the rush of waters of their sister States. It was found that the only feasible and economical means of flood prevention was by a system of levees, and this view was indorsed by the United States engineers as far back as 1860 and continuously since. There sprang up a system of local levees, the expense of which was borne by the people of the overflowed district. Year by year the floods became higher as the agricultural region of the United States was more fully developed. The drain became enormous, the levees were not uniform, one levee section had no control over another levee section; one State, although affected by the waters of another State, was unable to go into that other State and build levees, and the people who were interested at last realized that it was impossible to succeed in the way they were attempting, that the yearly expense of fighting these waters, together with the uncertainty of the success, made the drain such an enormous one that it was not a successful business proposition, and then they awoke to the realization that they were being compelled to care for a burden that was really a national problem, and that only in one way could there be a uniform and successful system of levees, and that was through national administration and action. And in answer to that sentiment all three of the presidential candidates and the platforms of the Democratic, Republican, and Progressive Parties in 1912 declared in favor of a national control and maintenance of this levee system along the Mississippi River.

The Democratic platform said:

We hold that the control of the Mississippi River is a national problem; the building of the levees to prevent overflow of the land and its consequent devastation resulting in the interruption of interstate commerce, the disorganization of the mail service and the enormous loss of life and property, impose an obligation which alone can be discharged by the General Government.

The Republican paltform said:

The Mississippi River is the Nation's drainage ditch. Its flood waters, gathered from 31 States, constitute an overpowering force which breaks the levees and pours its torrents over many million acres of the richest land in the Union.

The Progressive platform said:

It is a national obligation to develop our rivers, and especially the Mississippi, without delay, under a comprehensive plan. Under such a plan the destructive floods of the Mississippi would be controlled and land sufficient to support millions of people will be reclaimed.

Therefore this is not a party question; it is one of fair dealing toward your fellow man. It is one that with a fair expenditure of money will yield an astonishing amount of wealth to the United States. It is estimated by the Mississippi River Commission that $58,000,000 will complete these levees and make them of sufficient size and strength to withstand the greatest floods, and once completed the maintenance will be a small amount. In this overflowed section there are 20,000,000 acres of rich alluvial lands, with a season which lasts practically for 12 months in the year, that will produce from one to two bales of cotton per acre, that will produce enormous amounts of corn and clovers and garden truck. Only one-fourth of this area is now in a state of cultivation. It will not pay, in the face of the levee situation, to open up this additional three-fourths. Yet this three-fourths is level and can be easily drained and put in a state of cultivation. Once the people know that that deadly nightmare of each recurring year is not hanging over them like the somber hand of death they will reclaim it. These 15,000,000 acres that are now lying as an economic waste will in the course of time, if you give us the levee protection, produce $500,000,000 of products per year, will increase our trade balance, and will help keep down the cost of living to the people in the cities, and will unquestionably repay that portion of the United States not directly affected ten times the value of the money expended by the Federal Government. The people of that section have already spent $60,000,000 against the National Government's $27,000,000. It has been spent piecemeal, in driblets, and has naturally yielded no return such as it would if the levees were built within a reasonable time and of uniform size and strength. Our cultivated lands, with the richest soil there is in America to-day, are worth from $15 to $25 per acre. When these levees are built, 10 years later should see the price of these lands at $100 to $150 per acre, and yielding handsome returns in dividends. But until there is a fair and reasonable protection from all the waters of the sister States we will have to struggle against overwhelming odds, unable to secure a fair and adequate return from one of the brightest and most luxuriant garden spots of the world.

I have in my district 4,800,000 acres of land that is subject to overflow. At this time only about one-quarter of this land is cleared and about one-half of that amount in a state of cultivation. Yet it is all a rich alluvial land that has been made by the deposits of thousands of years. Long years ago in the early settlement of that section of the country, before these overflows were an annual affair, the American people, on account of the richness of that soil, went in and began to clear the land. We did not have these overflows at that time, because all the rest of

the United States was not in the state of cultivation that it is to-day. They opened up this field and succeeded, but as the rest of the country began to be developed along with that, the farms cleared, the waters came down on us more rapidly year by year. The overflows got to be such a serious menace to the people of that country they began to lay about for means to protect themselves from this high water. They found that the only feasible plan was levee protection. This theory has been borne out by numerous reports of the river and harbor commission and the engineers of the United States Army. For years these people have toiled and struggled and paid taxes that have exceeded, perhaps, the value of their land in an attempt to protect themselves from the waters of their sister States.

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?

Mr. ELDER. Certainly.

Mr. CALLAWAY. The gentleman states that as the land has been put under cultivation and the drainage is perfected all along up the river, that has augmented the floods, the water has rushed into the river more rapidly. There is only a small proportion of the lands along up that river that is yet under cultivation, and if that cultivation continues, the levee will have to be built higher and higher from time to time.

Mr. ELDER. Mr. Chairman, the gentleman misunderstood me. I said as the rest of the United States became under cultivation. We act as the basin for 41 per cent of the United States.

Mr. CALLAWAY. I understand that.

Mr. ELDER. And as the rest of this land of the United States began to be cultivated the water was not retarded and came down all at once and forced us to build these levees. The rest of the United States is largely in a state of cultivation.

Mr. CALLAWAY. Does the gentleman think that more than 50 per cent of the land drained by the Mississippi River is under cultivation?

Mr. ELDER. Oh, yes, unquestionably; all the land that can be. As a matter of fact, all the water that falls within that area for which we act as a basin rushes down upon us now within a few weeks, and if it were every bit cultivated it could not come more quickly.

Mr. CALLAWAY. As the land is being put under cultivation, does not the water that rushes into the river from that land carry far more silt than it used to before the land was under cultivation?

Mr. ELDER. Yes.

Mr. CALLAWAY. And the deposits of silt are now much larger than they used to be?

Mr. ELDER. Yes; but if you will stop these overflows the rush of water will be swifter and will carry the silt on out to the sea. It follows as a law of physics that the narrower you confine the channel of the water, the swifter the water is and the farther it will carry the silt.

Mr. CALLAWAY. Is it not a fact that the rapidity of the water determines whether it will carry the silt, and not the depth or shallowness of the water.

Mr. ELDER. Yes; and the narrowness of the stream as well as its pitch determines its rapidity. Mr. Chairman, if I had plenty of time I would like to continue this discussion, for it would be interesting, but in a limited time it would not permit me to explain the conditions as I find them. As a matter of equity the only reasonable way in which it can be done is for the Government to assume control of the building of these levees. Under the present condition we would have a levee of a certain height and strength in one district and in a district higher up there would be one which is not quite so strong or so good.

The result is that although you may expend enormous sums of money on one district, as the people in that district may be able to do, the other link in the chain is weak, and the strong link has no control over that in a local way. If the weaker link breaks, the whole country is flooded. The result of such a system means that if the people of a particular section refused to build a levee and protect their own lands, the people of the whole of the basin would be entirely helpless, and it is necessary from the standpoint of reaching actual results that the national body should take charge and build a uniform levee. The people who have none of these levees in their districts say, "Oh, we do not want to spend the Government's money for this, because we are not interested in it." My friends, you are wrong, and if such a doctrine were carried to its logical conclusion there would be no expenditure of public moneys. The people of my district are not directly interested in New York Harbor and they are not directly interested in those rivers and harbors just spoken of by the gentleman from California [Mr. J. R. KNOWLAND], and yet they give their money and goods, and that money and goods are returned to them partly out of the general good of the country and by virtue of the products that the particular country aided may produce. We have in this particular country 20,000,000 acres of land, only one-fourth of which is now cultivated, land that will produce from one to two bales of cotton per acre, land that will produce enormous sums in other agricultural products, a country where the season extends for 12 months of the year, and if we are able to develop this area it will mean hundreds of millions of dollars that will go to the American people to form for us a balance of trade, of which those who are not directly interested will ultimately receive a benefit.

Mr. WILLIS. Mr. Chairman, will the gentleman yield? I desire to ask a question purely for information.

Mr. ELDER. Yes.

Mr. WILLIS. In the gentleman's State, and in all the States that are subject to these destructive overflows, there are vast areas of upland not subject to overflows. Take Tennessee, for instance.

Mr. ELDER. Yes.

Mr. WILLIS. Does the gentleman know to what extent those uplands not subject to overflow in the various States have been taxed by the people of those States to aid in flood protection?

Mr. ELDER. I could not answer for the State of Tennessee.

Mr. WILLIS. Well, in the gentleman's own State.

Mr. ELDER. In my own State only to a small extent. We have a general State tax that will contribute so much, but a large portion of the burden falls on the particular district. Now, in my congressional district, the fifth, we have what is known as the fifth district levee board and the Tensas levee board, that have a right to lay on acreage tax, that have the right to tax railroad lands from $30 to $100 a mile. We lay a tax of so much on each bale of cotton; that is the burden which does not fall on the rest of the State; a small portion will fall upon the whole State, and in that way will affect the hilly regions.

Mr. WILLIS. The gentleman sees what I am driving at. Until the uplands of the various States are taxed, it would seem hardly fair to expect the people in the remote sections to be entirely willing to have their lands taxed if the people in the uplands of the States affected are not willing——

Mr. ELDER. The people of the State have been willing, and have contributed their small mite in this direction. They have contributed their share. They have not been able to contribute the whole of it, because they are not directly affected, but the people of the rest of the United States have contributed in an infinitesimally smaller share. Now I want to describe the conditions. Out in these great bottoms, what you might say are swamps, the land is as rich as any in the valley of the Nile. My people have no public buildings, there is but one Federal building in all that area; they do not have the advantages of great roads and great public buildings and public parks, like the people of most of the rest of the United States, yet every year, year in and year out, they have contributed their share of the taxes of the Government; they have labored and toiled in their humble way, attempting to make good citizens; they have been willing to bear arms for it at any time, but they do not receive the benefits from this Government which most of the other sections of the country get; and when their all is tied up for life in this property, when they are willing to contribute what they can, in God's name and in humanity's name why should not the rest of the Nation, that has been better blessed, bear its small portion of the burden? [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. SPARKMAN. Mr. Chairman, I yield to the gentleman from New York [Mr. GOULDEN].

Mr. GOULDEN. Mr. Chairman, I had hoped to have had sufficient time during general debate to tell the committee and the country something about the great work being done on waterway improvements by the State of New York. We are building a great barge canal, 540 miles long, costing, all told, $130,000,000.

The bill H. R. 13811, making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, carries $39,227,504 in cash and authorizes $4,061,500, a total sum of $43,289,004.

The East River project, based on a bill introduced by me, will cost $13,400,000, and will be expended as rapidly as the money can be used—$500,000 in 1914.

In addition, the Harlem and Bronx Rivers, $100,000 each; Westchester Creek, $36,500; and East Chester Creek, $20,000. Add to these sums the different other appropriations for New York City, amounting to $1,200,000, and the grand total is $1,963,500 actually appropriated.

When the work now being done by the State of New York is considered and the fact that 60 per cent of the revenue from the customs is collected at that port, the sum carried in the bill under discussion is insignificant.

In the limited time at my disposal I can only say that the great State in part which I represent here has set the pace for her sister Commonwealths.

The improved barge canal, free from all tolls, reaching from the metropolis to Buffalo and benefiting all the Northwestern States, is rapidly approaching completion.

In 1916 the fleets of 3,000-ton barges will be sailing on the waters of the new Erie Canal.

To show the comparison, as well as for the information of Congress and the country, I will insert as a part of my remarks excerpts from an article published in the New York Herald of March 8, 1914, which contains much valuable information on this great work by the Empire State. I ask unanimous consent to incorporate some excerpts from the New York Herald upon this subject under date of March 8, 1914.

The CHAIRMAN. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

Mr. MANN. Reserving the right to object, I would like to ask the gentleman if they are going to charge tolls on this canal, or propose to do so?

Mr. GOULDEN. No, sir; it is a free canal as all other canals ought to be to American shipping.

Mr. MANN. Then I do not object.

Mr. CANTOR. It is largely for the benefit of the Northwest, too.

Mr. MANN. I never knew New York to do anything except for the benefit of the Northwest.

Mr. CANTOR. Including Chicago.

Mr. GOULDEN. Yes; New Yorkers are always willing to help all other sections of our country.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The matter referred to by Mr. GOULDEN is as follows:

The annual report of State Engineer John A. Bensel relative to the State Barge Canal shows that this great work is much nearer completion than is generally supposed. The report states that contracts to the amount of $82,000,000 have been let and that work to the amount of $63,000,000, or about 60 per cent of all the work on the canal, which is to cost a little over $100,000,000, exclusive of real estate and terminals, has been completed.

So much has been printed about the Panama Canal that nearly everyone has at least a general idea of where it is, what it is, its cost, and the results which are expected from it. On the other hand, very few people, even in New York State, have anything but the most vague information about the Barge Canal, notwithstanding that the benefits to the State in general and to the port of New York in particular will be many times greater than from the Panama Canal.

In order to understand the relative size of the two canals a comparison of the main features is necessary. In the first place, the Barge Canal is 540 miles long, as compared to the 50 miles of the Panama Canal. It has 57 locks and 39 dams, while the Panama Canal has only 6 locks and 4 dams. The cost of the Barge Canal, including terminals and real estate, will be approximately $130,000,000, as compared with $375,000,000 for the Panama Canal.

Columns have been printed about the enormous amount of excavation and concrete in the Panama Canal, but the figures show that the Barge Canal will require considerably more than half the amount of excavation and concrete in the Panama Canal, the figures being 114,000,000 cubic yards of excavation in the Barge Canal, as compared with 203,000,000 cubic yards in the Panama Canal, and 2,750,000 cubic yards of concrete in the Barge Canal, as compared with 5,000,000 cubic yards in the Panama Canal.

Probably the most striking comparison, however, is shown by the fact that whereas the total lift of the Panama Canal is only 85 feet, the lift of the Barge Canal is 525 feet. In other words, a barge starting at tidewater from the port of New York will be 569 feet above sea level, or nearly as high as the top of the Singer Building when it reaches Lake Erie, the actual lift in the locks being 525 feet and the difference of 44 feet being the result of the natural flow of the water.

The barges not only finally reach an elevation of 569 feet, but they go up and down steps, as it were, on the way, climbing to a height of 211 feet at Schenectady and 420 feet at Rome, then down to the level of 363 feet at Syracuse and up again to 512 feet at Rochester, then on a level to Lockport, where they climb 50 feet, and then on to Buffalo at the 565-foot level. From Syracuse the Oswego branch of the canal drops 119 feet to Lake Ontario, while the Lake Champlain branch climbs 140 feet from the Hudson River at Albany to Fort Edward and then drops 44 feet to Lake Champlain.

* * * * * * *

It is estimated that the Barge Canal will carry right from the start a tonnage equal to the total tonnage which is expected to pass through the Panama Canal. It is estimated that the Barge Canal, which has a capacity of from 20,000,000 to 30,000,000 tons per annum, will in the beginning handle at least 10,000,000 tons of freight a year, which is practically the same as the estimate for the Panama Canal.

* * * * * * *

In order to appreciate what an enormous amount 10,000,000 tons really is a comparison with the same volume if handled by rail is interesting.

Ten million tons would fill 333,333 freight cars having a capacity of 30 tons each, which would make a solid train 2,522 miles long. This train, if moving at the average speed of freight trains—20 miles an hour—would take over five days to pass a given point. It would extend from New York to Chicago and back again, with enough cars left over to reach from New York to Cleveland.

If 10,000,000 tons a year seems a large volume of business for the Barge Canal to handle, it should be remembered that this amount, which is only one-third of its capacity, is small in comparison with the tonnage through the Soo Canal, the outlet of Lake Superior, through which 72,472,676 tons passed in 1912.

41 CENTS PER TON BY BARGE CANAL, WITH $3.11 BY RAIL.

As startling as are the facts relative to the tonnage of the State Barge Canal, even more astounding is the official statement of the cost of bringing freight through the canal from the Great Lakes to this port.

The present average cost of carrying a ton of freight by rail from Buffalo to New York is officially stated to be $1.96 a ton, whereas the cost of carrying freight by the Barge Canal is officially estimated to be only 26 cents a ton, a saving in actual cost of $1.70 a ton. On the 10,000,000 tons which the Barge Canal is expected to handle from the beginning, this would amount to a saving of $17,000,000 a year.

The foregoing statement, it should be remembered, is a comparison of the actual cost of carrying freight by rail and through the canal, and is not a comparison of the charges made by the railroads and to be made through the canal.

It is officially stated that the average charge for carrying a ton of freight from Buffalo to New York by rail is $3.11, and the charge by the Barge Canal between the same ports, figuring on a liberal profit, is estimated to be only 41 cents a ton. There would therefore be a saving of $2.70 a ton, or a total saving on the 10,000,000 tons of $27,000,000 a year.

It is hard to realize that a ton of freight can actually be brought from Buffalo to New York for 41 cents and pay a satisfactory profit to the carrier, but when it is understood that the new barges will have a maximum capacity of 3,000 tons, in comparison with 250 tons, the capacity of the present barges, and that the new barges will have two and a half times the speed of the old barges, the reason for the low cost is apparent. In other words, a 3,000-ton barge, at the rate of 41 cents a ton, would earn $1,230 for the trip from Buffalo to New York, a distance of 440 miles. On the other hand, a 250-ton barge could only earn at the same rate $102.50 for the trip, which would take two and a half times as long as the new barges.

If 41 cents a ton seems very low for carrying freight by water from Buffalo to New York, a distance of 440 miles, it only has to be compared with the report for 1913 of the United States engineer in charge of the Soo Canal, which shows that the average cost of carrying the 72,472,676 tons passing through the canal in 1912 for an average distance of 831 miles was 56 cents a ton. In other words, if the tonnage through the Soo Canal can be carried 831 miles at an average cost of 56 cents a ton, it stands to reason that there will be a fair profit in carrying freight through the Barge Canal 440 miles for a charge of 41 cents a ton.

Mr. SPARKMAN. Will the gentleman from Washington use some more time now?

Mr. HUMPHREY of Washington. I would say, Mr. Chairman, on this side we have used 2 hours and 52 minutes to-day and that is outside of what was consumed by the gentleman from Pennsylvania. We have certainly consumed our share to-day.

Mr. SPARKMAN. If the gentleman could use 10 or 15 minutes until one of our friends is enabled to get his data, he would oblige us.

Mr. HUMPHREY of Washington. There is no one on this side now. There are only two other gentlemen on this side to talk.

The CHAIRMAN. The gentleman might ask that the bill be read.

Mr. MADDEN. There were two gentlemen who obtained special time, one the distinguished gentleman from Connecticut and the other the gentleman from Pennsylvania, and if there is nobody here who desires to go on would it not be a good idea to begin the reading of the bill under the five-minute rule?

The CHAIRMAN. That is perhaps true.

Mr. MADDEN. Or would it not be a good idea to adjourn, for I presume everybody is tired.

Mr. MANN. Mr. Chairman, I make the point of order there is no quorum present.

Mr. SPARKMAN. I yield 15 minutes to the gentleman from North Carolina [Mr. SMALL].

Mr. MANN. Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. The gentleman from North Carolina [Mr. SMALL] is recognized for 15 minutes.

[Mr. SMALL addressed the committee. See Appendix.]

Mr. SPARKMAN. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 13811) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, and had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. GARD, for three days, on account of important business.

URGENT DEFICIENCY APPROPRIATION BILL.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the urgent deficiency appropriation bill H. R. 13612, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. The gentleman from New York asks unanimous consent to take from the Speaker's table H. R. 13612, disagree to the Senate amendments and ask for a conference. The Clerk will report the title of the bill.

The Clerk read the title of the bill (H. R. 13612) making appropriations to supply urgent deficiencies in appropriations for the fiscal year ending June 30, 1914, and for prior years, and for other purposes.

The SPEAKER. If there be no objection, the request of the gentleman from New York will be agreed to.

There was no objection; and the Speaker announced as conferees on the part of the House Mr. FITZGERALD, Mr. BARTLETT, and Mr. GILLETT.

ADJOURNMENT.

Mr. SPARKMAN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 10 minutes p. m.) the House adjourned until Friday, March 20, 1914, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report by the Mississippi River Commission, with maps and appendixes, on separation of the waters of the Red and Atchafalaya Rivers from those of the Mississippi River, made in compliance with the provisions of the river and harbor act approved June 25, 1910 (H. Doc. No. 841); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

2. A letter from the Secretary of the Treasury, transmitting a communication from the president of the Civil Service Commission, submitting an estimate of appropriation for completing the examination of fourth-class postmasters during the fiscal year ending June 30, 1915, etc. (H. Doc. No. 842); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Secretary of the Treasury, submitting estimates of appropriations relative to the public-buildings service (H. Doc. No. 843); to the Committee on Appropriations and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. GRAHAM of Pennsylvania, from the Committee on the Judiciary, to which was referred the bill (S. 751) to repeal section 2480 of the Revised Statutes of the United States, reported the same without amendment, accompanied by a report (No. 418), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. TAYLOR of Colorado, from the Committee on the Public Lands, to which was referred the bill (S. 2419) permitting minors of the age of 18 years or over to make homestead entry or other entry of the public lands of the United States, reported the same with amendment, accompanied by a report (No. 419), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. LAFFERTY: A bill (H. R. 14799) to create an Interstate Trade Commission, to prohibit and prevent unfair competition, and to protect commerce against monopolies; to the Committee on Interstate and Foreign Commerce.

By Mr. KONOP: A bill (H. R. 14800) creating a commission to enroll the Indians into two classes; to the Committee on Indian Affairs.

By Mr. STEPHENS of Texas: A bill (H. R. 14801) to provide for certain unallotted members of the Pembina Band of Chippewa Indians in Minnesota; to the Committee on Indian Affairs.

By Mr. SAUNDERS: A bill (H. R. 14802) to amend and reenact section 3246, Revised Statutes of the United States, as amended in the third session of the Forty-fifth Congress, on page 334 of volume 20 of the United States Statutes at Large; to the Committee on Ways and Means.

By Mr. HILL: A bill (H. R. 14803) in relation to semimonthly payment of wages and salaries by railroads engaged in interstate traffic, and providing penalty for violating of same; to the Committee on Interstate and Foreign Commerce.

By Mr. McGUIRE of Oklahoma: A bill (H. R. 14804) authorizing Ponca City, Okla., and the board of education of said city to convey certain lands; to the Committee on the Public Lands.

By Mr. HUGHES of Georgia: A bill (H. R. 14805) to create a new division of the Bureau of Education, to be known as the Federal Motion Picture Commission, and defining its powers and duties; to the Committee on Education.

By Mr. CHURCH: Joint resolution (H. J. Res. 230) relative to aid from the Government of the United States for industrial education and the inauguration and establishment of a national university and department of education at Washington, D. C.; to the Committee on Education.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AINEY: A bill (H. R. 14806) granting a pension to Wealthy J. Larrabee; to the Committee on Invalid Pensions.

By Mr. ALEXANDER: A bill (H. R. 14807) granting a pension to Archibald Groom; to the Committee on Invalid Pensions.

By Mr. ALLEN: A bill (H. R. 14808) granting an increase of pension to Jennie Galbreath; to the Committee on Invalid Pensions.

By Mr. ASHBROOK: A bill (H. R. 14809) granting a pension to Dartha Swihart; to the Committee on Invalid Pensions.

By Mr. BALTZ: A bill (H. R. 14810) granting an increase of pension to Albert Bennett; to the Committee on Invalid Pensions.

By Mr. BROWN of New York: A bill (H. R. 14811) granting an increase of pension to Sarah H. Medary; to the Committee on Invalid Pensions.

By Mr. BROWNING: A bill (H. R. 14812) authorizing the appointment of Joseph Westesson a professor of mathematics, with the rank of lieutenant, in the United States Navy, on the retired list; to the Committee on Naval Affairs.

By Mr. CAMPBELL: A bill (H. R. 14813) granting a pension to Phoeba Pruitt; to the Committee on Invalid Pensions.

By Mr. CARR: A bill (H. R. 14814) granting an increase of pension to John C. Brown; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14815) granting an increase of pension to Dennis Sanders; to the Committee on Invalid Pensions.

By Mr. DAVIS: A bill (H. R. 14816) for the relief of Alonzo Briggs; to the Committee on Military Affairs.

By Mr. DECKER: A bill (H. R. 14817) granting a pension to Marion Atwood; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14818) granting a pension to Nannie J. Beckmon; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14819) granting a pension to Caroline D. Compton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14820) granting a pension to John Flattery; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14821) granting a pension to William McNelis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14822) granting a pension to Napoleon L. Stemmons; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14823) granting a pension to John E. Tingley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14824) granting a pension to Jonathan Toliver; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14825) granting an increase of pension to Lutisha A. Carpenter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14826) granting an increase of pension to Mary Heffleman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14827) granting an increase of pension to Charles W. Kenesston; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14828) for the relief of Mrs. A. E. Hathway; to the Committee on Military Affairs.

Also, a bill (H. R. 14829) for the relief of Kize Reed; to the Committee on War Claims.

By Mr. DRISCOLL: A bill (H. R. 14830) granting an increase of pension to Patrick Keating; to the Committee on Invalid Pensions.

By Mr. ESTOPINAL: A bill (H. R. 14831) for the relief of the heirs of Myra Clark Gaines, deceased; to the Committee on Claims.

By Mr. FERGUSSON: A bill (H. R. 14832) granting an increase of pension to Manuela de Benavides; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14833) granting an increase of pension to Albert N. Hopkins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14834) granting an increase of pension to Manuelita S. de Lobato; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 14835) granting an increase of pension to Ezra Cather; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14836) for the relief of John W. Baggott; to the Committee on Military Affairs.

By Mr. HILL: A bill (H. R. 14837) granting an increase of pension to Marcus Bradley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14838) to correct the military record of William Deniston and grant to him an honorable discharge; to the Committee on Military Affairs.

Also, a bill (H. R. 14839) to correct the military record of Henry Turnage and grant to him an honorable discharge; to the Committee on Military Affairs.

By Mr. KEY of Ohio: A bill (H. R. 14840) granting an increase of pension to John H. McClure; to the Committee on Invalid Pensions.

By Mr. LOBECK: A bill (H. R. 14841) granting an increase of pension to Jennie L. Maginn; to the Committee on Invalid Pensions.

By Mr. McGILLICUDDY: A bill (H. R. 14842) to waive the age limit for admission to the Pay Corps of the United States Navy for two years in the case of Commissary Steward Charles C. L. Haskell; to the Committee on Naval Affairs.

By Mr. MORGAN of Louisiana: A bill (H. R. 14843) granting an increase of pension to Christian Schmalz; to the Committee on Pensions.

By Mr. NELSON: A bill (H. R. 14844) granting a pension to the widow of James S. Frisbie; to the Committee on Invalid Pensions.

By Mr. PATTON of Pennsylvania: A bill (H. R. 14845) granting an increase of pension to David Tanyer; to the Committee on Invalid Pensions.

By Mr. REILLY of Connecticut: A bill (H. R. 14846) granting an increase of pension to Julia Doran; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14847) granting an increase of pension to Josephine A. Hotchkiss; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14848) granting an increase of pension to James Warden; to the Committee on Invalid Pensions.

By Mr. ROGERS: A bill (H. R. 14849) granting a pension to Patrick McCarthy; to the Committee on Pensions.

By Mr. SELLS: A bill (H. R. 14850) granting a pension to Edward East; to the Committee on Pensions.

By Mr. SHERWOOD: A bill (H. R. 14851) granting a pension to Mary A. Robinson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14852) granting an increase of pension to William R. Ford; to the Committee on Invalid Pensions.

By Mr. TAGGART: A bill (H. R. 14853) granting a pension to Margaret J. Verbesky; to the Committee on Pensions.

Also, a bill (H. R. 14854) granting a pension to Augustus E. Dodds; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14855) granting an increase of pension to Daniel Miller; to the Committee on Invalid Pensions.

By Mr. THOMAS: A bill (H. R. 14856) granting a pension to Edith A. Hill; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14857) granting an increase of pension to A. G. Long; to the Committee on Pensions.

Also, a bill (H. R. 14858) granting a pension to J. A. London; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14859) granting an increase of pension to Isaac N. Mahan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14860) granting a pension to John H. Perry; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14861) granting an increase of pension to John J. Smith; to the Committee on Invalid Pensions.

By Mr. TRIBBLE: A bill (H. R. 14862) for the relief of John P. Erwin; to the Committee on the Post Office and Post Roads.

Also, a bill (H. R. 14863) for the relief of the heirs of John M. King, deceased; to the Committee on Claims.

By Mr. YOUNG of North Dakota: A bill (H. R. 14864) granting a pension to Gregor G. Krein; to the Committee on Pensions.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Resolution of the directors of the Swedish Hospital, of Brooklyn, N. Y., urging the passage of House bill 11648, for erection of a statue to John Ericsson; to the Committee on the Library.

Also (by request), protest by Taxpayers' Association of the Fifth Ward of Paterson, N. J., against the proposed repeal of the Panama Canal tolls; to the Committee on Interstate and Foreign Commerce.

Also (by request), petition from the California Saengerbund, protesting against the passage of House joint resolution 88 and Senate joint resolutions 168 and 50, providing for national prohibition; to the Committee on the Judiciary.

Also (by request), resolution from certain citizens of St. Louis, Mo., protesting against the repeal of the canal tolls clause for United States coastwise vessels through the Panama Canal; to the Committee on Interstate and Foreign Commerce.

By Mr. ALLEN: Petition of the Philomathian Club, of Cincinnati, Ohio, favoring Lindquist pure-fabric bill; to the Committee on Interstate and Foreign Commerce.

Also, petitions of 492 citizens of Cincinnati and Hamilton County, Ohio, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. ANSBERRY: Petitions of the Pittsburgh (Pa.) Board of Trade; members of the Brethren Sunday School at Bryan, Ohio, and sundry citizens of Desher, Ohio, favoring national prohibition; to the Committee on the Judiciary.

By Mr. ANTHONY: Resolutions adopted by several church organizations in northeastern Kansas favorable to national prohibition; to the Committee on the Judiciary.

By Mr. ASHBROOK: Resolutions of the Methodist and Presbyterian Churches of Warsaw, Ohio, in favor of nation-wide prohibition; to the Committee on the Judiciary.

Also, petition of 63 citizens of Wooster, Ohio, in favor of nation-wide prohibition; to the Committee on the Judiciary.

By Mr. BAILEY (by request): Petitions of sundry citizens of Altoona, Pa., protesting against national prohibition; to the Committee on the Judiciary.

Also (by request), petition of the Moxham Lutheran Church, of Johnstown, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. BALTZ: Petition of sundry citizens of Illinois, favoring investigation of the right of certain publications to use rates of second-class mail matter; to the Committee on the Post Office and Post Roads.

Also, petition of sundry citizens of Illinois against national prohibition; to the Committee on the Judiciary.

By Mr. BELL of California: Memorial of the Municipal League of Los Angeles, Cal., favoring the passage of the child-labor bill; to the Committee on Labor.

Also, memorial of the Sailors' Union of the Pacific, favoring passage of House bill 12743, relative to erection of marine hospital at San Francisco, Cal.; to the Committee on Interstate and Foreign Commerce.

Also, memorial of the Riverside (Cal.) Business Men's Association, protesting against repeal of canal tolls exemption; to the Committee on Interstate and Foreign Commerce.

Also, memorial of the San Diego Chamber of Commerce of San Diego, Cal., protesting against amendment to the Kahn Act relative to exhibits at Panama Exposition; to the Committee on Interstate and Foreign Commerce.

By Mr. BRUCKNER: Petitions of sundry citizens of New York City, favoring passage of the Lobeck bill (H. R. 9292); to the Committee on Interstate and Foreign Commerce.

Also, petition of Joseph E. D. Murray, of Bronx, N. Y., favoring passage of House bill 7374, the widows and orphans pension bill; to the Committee on Pensions.

By Mr. BRUMBAUGH: Petition of sundry citizens of Canal Winchester, Franklin County, Ohio, favoring national prohibition; to the Committee on the Judiciary.

Also, petitions of sundry citizens of Columbus, Ohio, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of King Avenue Bible Class, of Columbus, Ohio, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Columbus, Ohio, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry members of the United Presbyterian Church of Reynoldsburg, Franklin County, Ohio, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry members of the United Brethren Church of Pleasant and Jackson Townships, Franklin County, Ohio, favoring national prohibition; to the Committee on the Judiciary.

By Mr. CARY: Petition of Margaret E. Landry, of Washington, D. C., relative to bill for improvement of Thirteenth Street, Brookland, D. C.; to the Committee on the District of Columbia.

By Mr. COOPER: Memorial of Lincoln Fortress No. 2, Daughters of the Grand Army of the Republic, of Racine, Wis., protesting against any change in the American flag; to the Committee on the Judiciary.

Also, petition of the Commercial Savings Bank of Whitewater, Wis., favoring change in income-tax law relative to collection at source; to the Committee on Ways and Means.

By Mr. DALE: Petition of William McKinley Camp, No. 10, United Spanish War Veterans, favoring passage of House bill 13044, the widows' and orphans' pension bill; to the Committee on Pensions.

By Mr. DAVIS: Petition of the Minnesota Commandery of the Loyal Legion, favoring Townsend bill relative to Civil War volunteer officers' retired list; to the Committee on Invalid Pensions.

By Mr. DONOVAN: Petition of various Irish-American societies of Connecticut, against repeal of exemption clause in Panama Canal act; to the Committee on Interstate and Foreign Commerce.

By Mr. DYER: Petition of H. V. Lutz, of St. Louis, Mo., protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Hess & Culbertson Jewelry Co., of St. Louis, Mo., favoring passage of the Owen-Goeke bill, relative to fraud in gold-filled watchcases; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Volunteer Officers' Association of the Civil War, protesting against amending Senate bill 392, relative to three-fourths pay; to the Committee on Military Affairs.

By Mr. ESCH: Petitions of P. H. Ellery and George C. Hanson, of La Crosse; the Wisconsin Maltsters, of Milwaukee; and Bartenders' Local No. 479, of La Crosse, all in the State of Wisconsin, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Pittsburgh (Pa.) Board of Trade, favoring national prohibition; to the Committee on the Judiciary.

Also, papers in support of a bill granting an increase of pension to Calvin E. Boynton; to the Committee on Invalid Pensions.

By Mr. FERGUSSON: Memorial of the churches of Albuquerque, in the State of New Mexico, signed by 185 signers, protesting against any change in the act of August 24, 1912, granting compensatory time to postal employees on one of the six days following the Sunday on which they perform service; to the Committee on the Post Office and Post Roads.

By Mr. FESS: Petition of 20 citizens of Xenia, Ohio, favoring the Hobson amendment for national prohibition; to the Committee on the Judiciary.

By Mr. FRANCIS: Petitions of sundry citizens of Steubenville, members of the First Christian Church and Methodist Episcopal Sunday School and Church of Flushing, the First Methodist Episcopal Church of Bellaire, and the Woman's Christian Temperance Union of Carrollton, all in the State of Ohio, favoring national prohibition; to the Committee on the Judiciary.

By Mr. FRENCH: Petitions of various members of the Clearwater County (Idaho) Sunday School Association and members of Christ Church, Vollmer, Idaho, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of the Bartenders' Union of Mullan, Idaho, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. GRAHAM of Pennsylvania: Petitions of sundry voters of the second congressional district of Pennsylvania, protesting against national prohibition; to the Committee on the Judiciary.

Also, petition of the Pittsburgh (Pa.) Board of Trade, favoring national prohibition; to the Committee on the Judiciary.

By Mr. GRIFFIN: Petition of various Spanish War veterans of New York, favoring House bill 13044, providing pensions for widows of Spanish War soldiers; to the Committee on Pensions.

Also, petition of the Pittsburgh (Pa.) Board of Trade, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of the New York State Retail Jewelers' Association, favoring Owen-Goeke bill to eliminate frauds in time guaranties on gold-filled watchcases, etc.; to the Committee on Interstate and Foreign Commerce.

Also, petition of J. J. Freel, president of the International Stereotypers and Electrotypers' Union, of Brooklyn, N. Y., favoring Bartlett-Bacon anti-injunction bill; to the Committee on the Judiciary.

By Mr. HAWLEY: Petitions of sundry voters, churches, Sunday schools, and temperance organizations of the State of Oregon, favoring national prohibition; to the Committee on the Judiciary.

By Mr. HELVERING: Petition of the H. D. Lee Mercantile Co., of Salina, Kans., protesting against manufacturers fixing prices on goods; to the Committee on the Judiciary.

By Mr. HINEBAUGH: Petition of 800 citizens of Rockford, Ill., favoring national prohibition; to the Committee on the Judiciary.

By Mr. HUGHES of Georgia: Petition of the International Reform Bureau, favoring bill to provide official national censorship of films of moving pictures; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Memorial of William M. P. Bowers, of Providence, R. I., relative to House bill 12928, relative to Sunday work in post offices; to the Committee on the Post Office and Post Roads.

Also, petition of the National Association of Allied Horse Interests, of Providence, R. I., protesting against Webb amendment to Army appropriation bill; to the Committee on Military Affairs.

Also, memorial of the New England Association, United States Department of Labor, of Boston, Mass., favoring passage of House bill 196, for retirement of civil-service employees; to the Committee on Reform in the Civil Service.

By Mr. KINKEAD of New Jersey: Petitions of sundry citizens of Jersey City, N. J., and various members of the Emmanuel Baptist Church, of Newark, N. J., favoring national prohibition; to the Committee on the Judiciary.

By Mr. LEE of Pennsylvania: Memorial of the Philadelphia (Pa.) Chamber of Commerce, favoring appointment of clerks of United States courts by the President; to the Committee on the Judiciary.

Also, petitions of the First National Bank of Wallingford, Conn., and the Meriden Business Men's Association, of Meriden, Conn., protesting against separation of New York, New Haven & Hartford Railroad Co. and its allied properties; to the Committee on the Judiciary.

Also, petition of Freja Lodge, No. 17, Independent Order of Good Templars, of Hartford, Conn., favoring national prohibition; to the Committee on the Judiciary.

By Mr. LIEB: Petitions of Robert Davidson, Max De Jong, H. L. Rauch, Philip J. Seizer, Charles W. Ossenberg, J. H. Carson, Fred Kautz, Moses Barnett, J. R. Goodwin, William Eichel, A. W. Ellerbush, George C. Smith, Albert Schardt, A. S. Butterfield, Frank Endress, Henry Fligeltaub, and A. L. Flickner, all of Evansville, Ind., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. LONERGAN: Petitions of sundry citizens of New Britain, Conn., against national prohibition; to the Committee on the Judiciary.

Also, petition of the Meriden Business Men's Association (Inc.), of Meriden, Conn., opposing legislation to force the dismemberment of the New York, New Haven & Hartford Railroad Co. and its allied properties; to the Committee on the Judiciary.

Also, petition of Freja Lodge, No. 17, International Order of Good Templars, of Hartford, Conn., favoring national prohibition; to the Committee on the Judiciary.

By Mr. MACDONALD: Petition of sundry citizens of Michigan, against national prohibition; to the Committee on the Judiciary.

By Mr. MAGUIRE of Nebraska: Petition of 28 citizens of Surprise, Nebr., favoring national prohibition; to the Committee on the Judiciary.

By Mr. MAHER: Petition of the New York State Retail Jewelers' Association and of Oliver M. Farrand, of New York City, favoring passage of Owen-Goeke bill to eliminate fraud in time guaranties on gold-filled watchcases, etc.; to the Committee on Interstate and Foreign Commerce.

By Mr. MOORE: Memorial of the Chamber of Commerce of Philadelphia, Pa., relative to appointment of clerks of the United States courts by the President; to the Committee on the Judiciary.

Also, memorial of the Commercial Exchange of Philadelphia, Pa., against proposed antitrust legislation; to the Committee on the Judiciary.

Also, petition of the Philadelphia Section, Council of Jewish Women, favoring House bill 12292, relative to child labor; to the Committee on Labor.

By Mr. O'LEARY: Petition of the New York Merchants' Association, relative to Army and Navy football game being played in New York this year; to the Committee on Military Affairs.

Also, memorial of the Associated Chambers of Commerce of the Pacific Coast, protesting against repeal of canal tolls exemption; to the Committee on Interstate and Foreign Commerce.

By Mr. RAKER: Resolutions by the California Wholesale Grocers' Association, of San Francisco, Cal., relative to the manufacturer's right to make resale prices; to the Committee on the Judiciary.

Also, petition of the Municipal League of Los Angeles, Cal., favoring Federal child-labor bill; to the Committee on Labor.

Also, memorials of the Chamber of Commerce of San Diego, Cal., against any amendment to the Kahn Act relative to foreign exhibits at Panama-Pacific Exposition; to the Committee on Patents.

By Mr. SCULLY: Petitions of the Pittsburgh (Pa.) Board of Trade and 44 citizens of Manasquan, N. J., favoring national prohibition; to the Committee on the Judiciary.

Also, memorial of the Volunteer Officers' Association of the Civil War, protesting against amending Senate bill 392, relative to three-fourths pay; to the Committee on Military Affairs.

Also, petitions of Harry Rosin and others of Monmouth County, N. J., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. SIMS: Petitions of 42 citizens of Huntingdon, Tenn., and 61 citizens of Savannah, Tenn., favoring national prohibition; to the Committee on the Judiciary.

By Mr. TALBOTT of Maryland (by request): Petition of various members of the Mount Airy (Md.) Lodge, No. 334, favoring national prohibition; to the Committee on the Judiciary.

By Mr. THACHER: Petitions of sundry citizens of Massachusetts, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. UNDERHILL: Petition of H. Schaffner, of San Francisco, Cal., protesting against repeal of canal-tolls exemption; to the Committee on Interstate and Foreign Commerce.

By Mr. VOLLMER: Petition of 34 citizens of Iowa, against national prohibition; to the Committee on the Judiciary.

Also, petition of Jersey Ridge Grange, No. 2029, in favor of the Government standardization of barley; to the Committee on Agriculture.

By Mr. WALLIN: Petitions of sundry citizens of the thirtieth New York congressional district, protesting against national prohibition; to the Committee on the Judiciary.

By Mr. WHITE: Petition signed by Mr. D. C. Lasure, of Barlow, Ohio, and 20 others, favoring the adoption of a constitutional amendment for nation-wide prohibition; to the Committee on the Judiciary.

Also, petition signed by Rev. C. M. Hartshorn, of Marietta, Ohio, and some 40 others, urging the adoption of the constitutional amendment providing for nation-wide prohibition; to the Committee on the Judiciary.

By Mr. WILLIS: Petitions of Arthur McClellan and other citizens of Cable; Levina Dillon and other citizens of Raymond; L. Dickerson and other citizens of Radnor; J. E. Heeter and 22 other citizens of Findlay; C. D. Marston and other citizens of Radnor; and various citizens of Bellefontaine, all in the State of Ohio, in favor of House joint resolution 168, relative to national prohibition; to the Committee on the Judiciary.

Also, petitions of Peter L. Clar and other citizens of Arlington; Jacob Horr and other citizens of Mechanicsburg; Mrs. Charles Stillings and other citizens of Milford Center; and Rev. W. McK. Brackney and other citizens of Kenton, all in the State of Ohio, in favor of House joint resolution 168, relative to national prohibition; to the Committee on the Judiciary.

## SENATE.

### FRIDAY, *March 20, 1914.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we thank Thee for every influence that has ever come into our lives that has made it easy to do right and hard to do wrong. Over every path of life Thou hast thrown Thy law. Thy law stands as a barrier over every evil way. Thou dost guarantee the rights of men by Thine own divine sanctions revealed to men, made known by a thousand ministries of grace and love. Grant, we pray, that we may bring every question of civil administration to the supreme test of the moral law, that we may remember that we shall be great in the elevation of a great Nation, that we shall be strong in saving the best for all the people, in proportion as our lives are lived in accordance with the will of God. Grant us Thy guidance this day to this end. For Christ's sake. Amen.

The Journal of yesterday's proceedings was read and approved.

#### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 13612) making appropriations to supply urgent deficiencies in appropriations for the fiscal year 1914 and for prior years, and for other purposes; requests a conference with the Senate on the disagreeing votes of the two Houses thereon; and had appointed Mr. FITZGERALD, Mr. BARTLETT, and Mr. GILLETT managers at the conference on the part of the House.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 14234. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; and

H. R. 14546. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

#### ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills and joint resolution, and they were thereupon signed by the Vice President:

S. 4019. An act to authorize the Tug River & Kentucky Railroad Co. to construct a bridge across the Tug Fork of the Big Sandy River at or near the mouth of Blackberry Creek in Pike County, Ky.;

S. 4145. An act to authorize the Government of Porto Rico to construct two bridges across the Arecibo River near the city of Arecibo, P. R.; and

S. J. Res. 114. Joint resolution for the appointment of a member of the Board of Regents of the Smithsonian Institution.

#### PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a petition of the congregation of the Memorial Seventh-day Adventist Church, of the District of Columbia, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. BRISTOW presented petitions of sundry citizens of McPherson, Graham, and Logan, all in the State of Kansas, praying for the enactment of legislation to provide for a term of the district court for the district of Kansas at Salina, Kans., which were referred to the Committee on the Judiciary.

Mr. BURTON presented petitions of sundry citizens of Ohio, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. WORKS. I have received a letter from the secretary of the Riverside Business Men's Association, of California, on the subject of the Panama Canal tolls. I ask that the letter may be printed in the RECORD and referred to the Committee on Interoceanic Canals.

There being no objection, the letter was referred to the Committee on Interoceanic Canals and ordered to be printed in the RECORD, as follows:

RIVERSIDE BUSINESS MEN'S ASSOCIATION,
*Riverside, Cal., March 12, 1914.*

At the regular meeting of the Riverside Business Men's Association held Wednesday evening, March 11, 1914, the following resolution was unanimously adopted, to wit:

"Whereas, believing that the interests of California and the Pacific coast would be sacrified by the repeal of the free tolls for American ships passing through the Panama Canal and the benefits of the canal to both shippers and consumers on the coast would be sacrificed by such repeal:

"*Resolved*, That the Riverside Business Men's Association respectfully urges upon our California Senators and Congressmen in Washington that they use their influence and votes to defeat the proposed repeal; and

"*Resolved*, That a copy of this resolution be sent by the secretary of this association to each of our Senators and Congressmen at Washington."

Respectfully submitted.

RIVERSIDE BUSINESS MEN'S ASSOCIATION,
By O. P. SANDERS, *Secretary.*

Mr. LIPPITT presented memorials of sundry citizens of Rhode Island, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. BRANDEGEE presented a memorial of sundry citizens of Ansonia, Derby, and Shelton, all in the State of Connecticut, remonstrating against the adoption of an amendment to the

Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of the congregation of the First Presbyterian Church of Thompsonville, Conn., and a petition of the congregation of the Baptist Church of Noank, Conn., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. BORAH presented a petition signed by the governor and sundry residents and taxpayers of the State of Idaho, praying that an appropriation be made to reclaim lands within the Black Canyon irrigation district, Idaho, which was referred to the Committee on Irrigation and Reclamation of Arid Lands.

He also presented a petition of the Club of Commerce, of Idaho Falls, Idaho, praying that an appropriation be made for a continuance of the work of the department of forestry, University of Idaho, which was referred to the Committee on Agriculture and Forestry.

Mr. GALLINGER presented a petition of General J. N. Patterson Post, No. 3, Department of New Hampshire, Grand Army of the Republic, of Concord, N. H., praying for the enactment of legislation granting pensions to widows and orphans of soldiers who served in the Spanish-American War, which was referred to the Committee on Pensions.

Mr. HUGHES presented sundry petitions of citizens of the State of New Jersey, praying for the enactment of legislation to further restrict immigration, which were ordered to lie on the table.

He also presented sundry memorials of citizens of the State of New Jersey, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented sundry petitions of citizens of the State of New Jersey, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of the State of New Jersey, praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

He also presented a memorial of the Independent Order of King Solomon, of Newark, N. J., remonstrating against the enactment of legislation to provide an educational test for immigrants to this country, which was ordered to lie on the table.

Mr. WEEKS presented a memorial of Iron Molders' Local Union No. 39, of Taunton, Mass., and a memorial of Journeymen Barbers' Local Union No. 447, of New Bedford, Mass., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a memorial of Local Division No. 3, Ancient Order of Hibernians, of Worcester, Mass., remonstrating against the repeal of the clause of the Panama Canal act exempting American coastwise shipping from the payment of tolls, which was referred to the Committee on Interoceanic Canals.

Mr. McLEAN presented a petition of the congregations of the Swedish Congregational Church of Thomaston, Conn., and a petition of the congregation of the Advent Christian Church, of Bristol, Conn., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Middletown, Conn., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. BRADLEY. I present a memorial signed by 36 citizens of McCracken County, Ky., remonstrating against the adoption of an amendment to the Constitution for the prohibition of the manufacture, sale, and importation of alcoholic liquors. I ask that the memorial may be received and referred to the Committee on the Judiciary.

The VICE PRESIDENT. The memorial will be referred to the Committee on the Judiciary.

Mr. BRADLEY presented petitions of the congregations of the Methodist Episcopal Church South, of Warsaw; the Broadway Christian Church, of Lexington; the Third Street Methodist Episcopal Church, of Paducah; and the Methodist Episcopal Church South, of Lexington, all in the State of Kentucky, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. CHAMBERLAIN presented petitions of sundry citizens of Portland and Oakland, in the State of Oregon, praying for the enactment of legislation to further restrict immigration, which were ordered to lie on the table.

Mr. BURTON presented memorials of sundry citizens of Toledo, Columbus, and Put-in-Bay, all in the State of Ohio, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. NELSON presented a memorial of sundry citizens of St. Paul, Minn., remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Elysian, Minn., praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

He also presented a petition of the Young People's Society of the Swedish Lutheran Church, of Holmes City, Minn., praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. TOWNSEND presented memorials of sundry citizens of Detroit, Grand Rapids, and Jackson, all in the State of Michigan, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

He also presented a memorial of the Ministerial Association of Alpena, Mich., remonstrating against any repeal of the present compensatory system for postal employees, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of Howell Camp, No. 6, United Spanish War Veterans, of Adrian, Mich., praying for the enactment of legislation granting pensions to certain soldiers and sailors of the Spanish-American War and their dependent relatives, which was referred to the Committee on Pensions.

He also presented a petition of local branch, National Retirement Association, of Traverse City, Mich., praying for the enactment of legislation to provide for the retirement of superannuated civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

He also presented petitions of Lewiston Grange, No. 1234, Patrons of Husbandry, of Lewiston, Mich., and of Burning Grange, No. 959, Patrons of Husbandry, of Bad Axe, Mich., praying for the establishment of a system of rural credits, which were referred to the Committee on Banking and Currency.

He also presented petitions of the Equal Suffrage Association of Kalamazoo, of the congregations of the First Presbyterian Church of Kalamazoo, the Baptist Church of Birmingham, and the Methodist Episcopal Church of Birmingham, and of sundry citizens of Grass Lake, all in the State of Michigan, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which were referred to the Committee on the Judiciary.

Mr. POINDEXTER presented a memorial of sundry citizens of Clarke County, in the State of Washington, remonstrating against the repeal of the exemption clause in the Panama Canal act, which was referred to the Committee on Interoceanic Canals.

Mr. CHAMBERLAIN presented a petition of sundry citizens of Holbrook, Portland, St. Johns, and Linnton, all in the State of Oregon, praying for the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating beverages, which was referred to the Committee on the Judiciary.

Mr. OWEN. I present a petition signed by a large number of citizens of Oklahoma, urging favorable action upon Senate bill 4150, introduced by the Senator from Minnesota [Mr. CLAPP] on January 22, 1914, and which was referred to the Committee on Indian Affairs, proposing to appropriate $5,000 to Eva M. Bowman, widow of Robert L. Bowman, who was killed in the discharge of his duty as an Indian agent. I ask that the body of the petition may be printed in the RECORD, omitting the signatures, and that it may be referred to the Committee on Indian Affairs.

There being no objection, the petition was referred to the Committee on Indian Affairs and the body of the petition was ordered to be printed in the RECORD, as follows:

*To the Congress and President of the United States of America:*

We, the undersigned, respectfully represent to your honorable body that Robert L. Bowman was killed on about the 19th day of September, 1912, in the State of Oklahoma, just south of the town of Caney, Washington County, while he was in the active and courageous performance of his duty as a deputy United States marshal enforcement officer; that he was shot down by outlaws from whose possession he had taken some intoxicating liquors; that he was at all times during his three years as deputy marshal and five months in Indian service on the United States marshal's force a brave and faithful officer.

And we further represent that at the time of his death Robert L. Bowman was a man of 40 years of age and of excellent health; that he left surviving him a widow and three minor children, one of whom is an invalid girl about 2½ years old; that the husband and father was the only support of this family; and that by his death his widow and three children are left to shift for themselves; and their only income now consists of such earnings as the 14-year-old boy makes at selling papers and the wages of the widow from sewing at odd moments.

We earnestly believe that this widow and infant children of Robert L. Bowman, deceased, are most worthy objects of the bounty of the United States; that they have earned more from their country and contributed more to their country than it will ever be able to pay.

We therefore respectfully petition the Congress and President of the United States to pass and approve the bill now before a committee of Congress making to Mrs. Robert L. Bowman and her children a partial return for their great loss.

SAFETY OF LIFE AT SEA (S. DOC. NO. 452).

Mr. LA FOLLETTE. I present a petition of the International Seamen's Union of America, the contents of which are set forth in the cover to the memorial, and I ask that it may be printed as a Senate document.

The petition prays for the rejection of the conclusions reached by the International Convention on Safety of Life at Sea, so called, which recently met in London, and while the Senate has received no official communication from the Secretary of State as to the results of that conference, in so far as I am informed, they have been presented to Parliament and have been printed in at least two languages, and are already under public discussion.

The VICE PRESIDENT. The Chair will state to the Senator from Wisconsin that he believes the Senator is in error. The Chair thinks the matter was handed down two or three days since and referred.

Mr. LA FOLLETTE. Then there can be no objection, of course, to the presentation of the petition at this time, which discusses the conclusions, and I ask that it may be printed as a Senate document.

The VICE PRESIDENT. Without objection, that will be done. Is it to be referred?

Mr. LA FOLLETTE. I should like to have it referred. I suppose it should be referred to the Committee on Foreign Relations.

Mr. SMITH of Georgia. The report came to the Senate, I think, in executive session, as the Chair stated, I believe, to the Senator from Wisconsin. I think the whole matter is before the Senate as coming from the State Department.

Mr. LA FOLLETTE. I was not aware of that. I was not present when the report was received, but as it had been presented to the British Parliament and printed for distribution there, and is under discussion in the papers of the whole world, in fact, I desired to have the petition which reviews that finding printed as a Senate document.

The VICE PRESIDENT. The petition will be referred to the Committee on Foreign Relations.

CONTRACTS OF NEW YORK COTTON EXCHANGE.

Mr. SMITH of Georgia. Mr. President, I have two additional letters I wish to present to the Senate from manufacturers in Georgia upon the subject of the New York Cotton Exchange and its methods. It has been known for a long time that the lint-cotton growers complained of the manipulation of prices of cotton by the New York Cotton Exchange, and insisted that the exchange, by unfair contracts, was enabled to depress the price of lint cotton as it sold upon the exchange, and that the published prices fixed by the exchange had a sympathetic effect all over the country and depressed the price of the actual lint cotton.

What I am seeking to do now is to bring to the attention of the Senate the fact that spinners are also complaining. I find from the New York Commercial that the National Association of Cotton Manufacturers and the American Cotton Manufacturers' Association each has passed resolutions condemning the contracts of the New York Exchange. I ask that these two short letters from cotton mills may be read.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read, as requested.

The Secretary read as follows:

FORSYTH, GA., *February 28, 1914.*

Hon. HOKE SMITH,
*Washington, D. C.*

DEAR SIR: We are using this method of indorsing the resolution adopted by the Hard-Yarn Spinners, in convention at Gastonia, N. C., on the 18th of this month, condemning the present workings of the New York Cotton Exchange, and earnestly appeal to you to use your great influence in the passage of some act whereby this exchange can be regulated. As it is operated at present, it is a serious menace to those most vitally interested in cotton. At present the quotations published by the New York Exchange are fully 2 cents under the actual price of spots in the southern markets, thereby making it extremely difficult for the manufacturer to get anything like a legitimate margin on the manufactured product. These operators on the exchange put forth the argument that purchases will be delivered if goods is asked for, but since they are allowed to deliver just as low grades as can be secured on contracts, and since they will deliver these grades, no one who is in need of the cotton will call for it, as they know that such cotton as will be tendered will be absolutely worthless so far as making goods is concerned, while, on the other hand, if they were forced in some way to deliver specified grades, it would be of great help to all concerned in both raising and manufacturing. The present conditions make the New York Exchange a disgrace to the Nation, and we trust that you will see fit to lend your valuable influence to the enactment of a law that will bring about the proper regulation.

Yours, very truly,

THE TRIO MFG. COMPANY.

THOMASTON, GA., *February 26, 1914.*

Hon. HOKE SMITH,
*Senate, Washington, D. C.*

DEAR SIR: We have before us a copy of resolutions adopted by the Hard Yarn Spinners' Association, Gastonia, N. C., on February 18.

We heartily approve of these resolutions and hope that you will use your utmost endeavor to relieve the cotton-mill industries of the conditions that exist. By so doing you will greatly oblige.

Yours, very truly,

THOMASTON COTTON MILLS,
By R. E. HIGHTOWER, *President.*

Mr. SMITH of South Carolina. Mr. President, I send to the desk and ask to have read a telegram that I received this morning. I am sorry the Senator from North Carolina [Mr. OVERMAN] is not in the Chamber. I presume he received one of a similar nature. It is in reference to the matter that is now before the Senate.

The VICE PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read as follows:

CHARLOTTE, N. C., *March 20, 1914.*

Senator SMITH of South Carolina,
*Washington, D. C.:*

I am voicing the sentiment of all legitimate interests and sound speculation when I say all hail to your cotton-speculation bill. There should be at once some established grades to be tendered; no legitimate reason to wait till 1915 for this. I hope our Senators, OVERMAN and SIMMONS, will be in hearty accord; otherwise undue depression of prices by arbitrary grading by New York exchange to suit their interests at time of delivery will prove a serious handicap for legitimate handling of our great American product.

B. L. SCRUGGS.

Mr. SMITH of South Carolina. I send to the desk the following petitions and do not ask to have them read, but that they be incorporated in the RECORD.

There being no objection, the petitions were ordered to be printed in the RECORD, as follows:

FARMERS' LAND, LOAN & TITLE CO.,
*Albany, Ga., March 11, 1914.*

Hon. E. D. SMITH, *Washington, D. C.*

DEAR SIR: In view of the bills before Congress in reference to the New York Cotton Exchange and the great discrepancy of that contract and of spot cotton, I thought it might be correct to call your attention to that feature.

The New York contract is not worth the paper it is written on, with March quoted, say, at 11.65 and middling cotton selling in Atlanta at 13 cents the same day. Now, I wish you to tell me how under heaven a man can buy spots in the South and pay 50 cents freight and commissions and other expenses that naturally follow and deliver on New York contracts.

The truth is, dear sir, that contract makes the jobber feel that he should buy goods based on the said New York contract, whereas the poor manufacturer has to pay about 3 cents more for his cotton than the said contract would indicate, and you know how hard it is to convince the buyer against his will.

New York contracts should be so fixed that when they sell 100 or any multiple of same that the buyer should be warranted in delivery of straight middling cotton, and of an even staple. As the contract is to-day, the minute the buyer demands the actual cotton on his contract they go to work and give him all manner of grades mixed in the lot, and all lengths of staple. Now, unless the manufacturer has half dozen mills using different grades and staples he can not handle the stuff, hence he sells the contract to some other fellow at a discount rather than take the cotton, to the ultimate hurt of the farmer and manufacturer.

The main point with a manufacturer, first, is even staple; secondly, even grade.

I feel that it is high time for this crowd to be regulated and made to so correct their contract that when a manufacturer buys New York contracts—and they are very essential and should not be wiped out—he should be able to take delivery, as anticipated.

Pardon me for the presumption in writing this letter, but I have felt this thing on both sides of the market, having been a farmer all my life and a manufacturer for 12 years.

I trust you will use your influence to correct this iniquitous contract.
Yours, very respectfully,

J. J. LITTLEJOHN.

—

YORKVILLE, S. C., *February 21, 1914.*

Hon. ELLISON D. SMITH,
*Washington, D. C.*

DEAR SIR: At our annual meeting held in Gastonia, N. C., on February 18, our association, representing a majority of the spinners on weaving yarns in the South, unanimously passed the inclosed resolution.

We are sending you this, hoping that you will use your influence in having these abuses corrected, as they seriously affect "the people back home."

Thanking you in advance for any action that you may be pleased to take in this matter, we beg to remain,
Yours, respectfully,

HARD YARN SPINNERS' ASSOCIATION,
By JOSEPH E. HART, *Secretary and Treasurer.*

—

Resolution adopted at the annual meeting of the Hard Yarn Spinners' Association, Gastonia, N. C., February 18, 1914.

Whereas the spinning mills of the country are suffering loss on account of the disparity between New York cotton quotations and the price of actual cotton, which quotations are misleading and confusing to the trade: Therefore be it

*Resolved*, That it is the sense of this association that the present system of the New York Cotton Exchange relative to the great number of grades of cotton that can be applied for delivery on contracts is detrimental to the best interests of the farmer, manufacturer, and cotton merchant, and this should be so changed that a specific grade should be stipulated in all contracts, and that not more than three grades shall be deliverable on a contract, and these to be not more than one grade above and one grade below the stipulated grade. That the purchaser not be confined to buying a contract based on middling as at present, but have the option of buying any grade desired with the usual differential in price.

*Resolved further*, That we request our Senators and Representatives in Congress to enact some law for the regulation of the cotton exchanges which will afford relief from these hurtful conditions.

To-day's market price for cotton is 12.90, while actual spot cotton in the South is 14 cents. We want the market quotations to reflect actual values.

—

BRANDON MILLS,
*Greenville, S. C., February 20, 1914.*

Hon. E. D. SMITH,
*Senate, Washington, D. C.*

SIR: I have your favor of February 14, all contents of which I have noted with interest; and in further consideration of the subject I beg to herewith hand you resolution received by us this morning from the Vicksburg Cotton Exchange. I have also been struck with the many similar expressions recently appearing in the Journal of Commerce and Commercial Bulletin, published in New York City. The whole trade seems to be dominated by one interest which is sufficiently powerful as we gather from the newspapers, to carry through their ends.

Respectfully, yours,

J. I. WESTERVELT, *President.*

—

VICKSBURG COTTON EXCHANGE,
*Vicksburg, Miss., February 18, 1914.*

DEAR SIRS: We earnestly ask your cooperation in the effort to secure through your representatives in Congress the passage of legislation that will force the cotton exchanges of this country to adopt a fair and honest contract system as regards trading in cotton futures.

The extent to which the cotton trade has suffered through manipulation of the market at the hands of large operators, which has brought about depression in business as well as large losses to legitimate dealers, is becoming apparent to everyone connected with the cotton trade from planter to spinner. We ask that through resolution, petition, or individual appeal you will use your efforts to secure the desired legislation by Congress.

Inclosed is copy of resolutions passed by the Vicksburg Cotton Exchange.

Very truly, yours, ——— ———.

—

Resolutions adopted by the Vicksburg Cotton Exchange condemning the contract system in use by the New York Cotton Exchange, and petitioning their representatives in Congress to try to secure the passage of legislation that will force the cotton exchanges of this country to adopt fairer and better methods governing trading in cotton contracts:

Whereas in the opinion of the members of this exchange the form of future contract in use by the New York Cotton Exchange constitutes nothing more than a medium for gambling; that it does not represent the real value of cotton as established in the spot-cotton markets of the world; that it absolutely fails to provide a safe, trustworthy, or legitimate hedge; and that through its form and application, both unfair and arbitrary, it lends itself to gambling operations by large dealers to the detriment and demoralization of the entire cotton trade; and

Whereas in the opinion of the members of this exchange, the future contract of the New York Cotton Exchange is devoid of the essentials of a fair, just, and correct contract; that in placing in the hands of men of large capital the power to dominate the cotton market, whose operations unsettle and depress business, it is used to the great injury of the general cotton trade; and

Whereas in the opinion of the members of this exchange, a fair, just, and commercial future contract should contain the following provisions, viz, the adoption of Government standards of classification, commercial differences and not fixed differences, the requiring of but one certification of each bale, and limiting the number of classifications which may be delivered on a single contract: Now, therefore, be it

*Resolved by the members of this exchange*, That we herewith petition our Senators and Representatives from this State in Congress to use their best efforts to secure the passage of legislation that will force the cotton exchanges in this country to adopt a contract system that will be fair and right, one that will serve the interests of the legitimate cotton trade and not one devised to promote and encourage speculation.

*Resolved*, That a copy of these resolutions be sent to planters, shippers, and spinners generally, with a request for their active cooperation in the effort to secure through their representatives in Congress the desired legislation.

*Resolved*, That a copy of these resolutions be sent to Members of the Senate and House of Representatives at Washington.

S. SUSMAN, *President.*
J. H. COOK, *Secretary.*

—

MEMPHIS COTTON EXCHANGE,
*Memphis, Tenn., February 28, 1914.*

Hon. E. D. SMITH,
*Senate, Washington, D. C.*

DEAR SIR: We beg to invite your attention to the inclosed resolutions passed at a meeting of the Memphis Cotton Exchange February 24, 1914.

Our exchange has come to the conclusion that the present New York Cotton Exchange contract should be changed so as to be more responsive to the market value of actual cotton.

We therefore request your assistance and cooperation in such legislation as will accomplish this end.

Yours, respectfully,

HENRY HOTTEE, *Secretary.*

—

Resolutions adopted by the Memphis Cotton Exchange February 24, 1914.

Whereas the present future contract of the New York Cotton Exchange is an impediment to business in that its fluctuations no longer bear any relation to the value of actual cotton, and as we feel that a future market with a contract fair and just to all is an absolute necessity in handling the cotton crop of the United States and maintaining prices when the movement is heaviest: Therefore be it

*Resolved by the Memphis Cotton Exchange*, That we urge our Senators and Representatives in Congress to have the future contract departments of all cotton exchanges doing an interstate business put under the supervision of the United States Department of Agriculture and subject to such rules and regulations as the department shall judge right and proper.

As cotton dealers we would suggest that the following conditions be inserted in all contracts for "futures":

1. Have all contracts stipulate the United States Government standard classification.

2. Make all exchanges adopt either commercial differences between grades or revise their differences every 30 days, basing these differences on the average differences then prevailing in the six largest American spot markets.

3. Allow not more than three different grades or six different half grades, including the full grades, to be delivered on each contract of 100 bales.

4. Require the class of each bale to be identified separately and either have the classers deputized by the United States Government or allow an appeal from the classification committee to officials of the Department of Agriculture.

Mr. SMITH of South Carolina. I should like to have read, as it comes from the New York Commercial, one of the leading commercial papers of the country, if not the leading one, an article in reference to this very point. I think it covers it as well as anything that may be said on this floor. I ask that the Secretary may read it.

The VICE PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read as follows:

[From the New York Commercial, New York City, March 2, 1914.]

THE SMITH COTTON BILL.

Senator SMITH of South Carolina has the support of the Senate Committee on Agriculture and Forestry in his effort to improve conditions in the cotton trade by forcing the New York Cotton Exchange and all other cotton exchanges in this country to accept the Government standardizations of cotton grades. This bill is the outcome of long years of agitation, and the cotton planters of the South are united in their support of the measure. Several cotton exchanges at important points in the cotton belt have recently adopted strong resolutions condemning the method of trading on the New York Cotton Exchange and have memorialized Congress and requested Senators and Representatives from their several States to support a bill that will put trading in cotton futures on a real business basis and divest it of its gambling features and of its unjust discrimination against the man who grows the cotton or who trades in actual cotton and not merely in fictitious contracts that are practically never fulfilled by deliveries of real cotton.

Mill owners and cotton traders and planters alike know by bitter experience that cotton is not delivered on contracts in New York for the purpose of fulfilling those contracts, but it is delivered occasionally for the purpose of blackjacking some one who is regarded as an impertinent interloper when he ventures to ask for specific performance of a contract. This blackjacking of the holder of a contract is rendered possible by the system of grading cotton and of regulating prices of various grades on the fixed difference system that prevails on the New York Cotton Exchange.

The Department of Agriculture has established a set of cotton grades that is acceptable to the planters on the one hand and to the spinners who consume the cotton on the other, and they are desirous of having all trading in cotton based upon these Government grades, because it would simplify the business and would protect both buyers and sellers from loss. As it is now, many southern cotton exchanges, the southern planters, and the cotton-mill owners all over this country unite in declaring that New York contracts afford them no protection whatever and are absolutely valueless as hedges or insurance against commitments, because the price of spot cotton often goes up when the price of futures goes down on the New York Cotton Exchange, and vice versa.

Any member of the New York Cotton Exchange will grant, for the sake of argument, that the Liverpool cotton market is an important one. The Liverpool Cotton Exchange does not indulge in any such nonsense as establishing 27 full grades for American cotton. It deals in cotton on a commercial basis and its contracts mean something. It is not necessary to have all this complication in grading cotton such as has

been set up in New York. Cotton comes to Liverpool from every part of the world where it is grown at all, and all the miscellaneous cotton in the world coming from the minor cotton-growing countries is traded in on a basis of three splainable grades, just as wheat and other grains are traded in on the Chicago Board of Trade.

The Department of Agriculture has deferred to the wishes of the cotton exchanges to some extent in fixing its grades. If these Government grades and the samples or "types" on which they are based can be simplified or improved, the department officials will listen to reason. The New York Cotton Exchange will get a fair hearing at Washington as soon as it signifies its willingness to be fair to others, but that exchange can not browbeat the people of the United States or the Congress that represents them.

One of the penalties imposed by the Smith bill is the denial of the use of the mails or other methods of interstate communication for transmitting information regarding any cotton-future sale not in accordance with the proposed regulations. This feature of the bill is open to the objection that the Post Office Department should not be employed to do the work of the Department of Justice, but objections to the method of enforcing the proposed law do not affect the merits of the law itself or have any bearing upon the necessity for forcing the New York Cotton Exchange to deal in bales of cotton as a commercial commodity and not simply as counters in a brace game in a gambling house.

The New York Commercial has fought the battle of the planters and the spinners for many years and victory now seems close at hand. No amount of talking by members of the New York Cotton Exchange will convince Congress that the system of inspection, grading, and fixed differences in prices of various grades is of any value in advancing interests of the country or of the cotton trade as long as all the people who grow the cotton, who trade in actual cotton, and who spin cotton are in favor of simpler and fewer grades and prices based on commercial differences such as obtain in all other important lines of trade.

Mr. MARTINE of New Jersey. On behalf of the Committee on Post Offices and Post Roads, I ask unanimous consent for the consideration of House bill 7967.

The VICE PRESIDENT. Is the bill on the calendar?

Mr. MARTINE of New Jersey. It is No. 269 on the calendar.

The VICE PRESIDENT. Morning business is not closed.

Mr. SMOOT. I call for the regular order.

Mr. SMITH of South Carolina. Mr. President, I gave notice yesterday that at the close of morning business to-day I would call up Senate bill 110.

The VICE PRESIDENT. Reports of committees are in order.

REPORTS OF COMMITTEES.

Mr. JOHNSON, from the Committee on Pensions, submitted a report (No. 356), accompanied by a bill (S. 4969) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors, which was read twice by its title, the bill being a substitute for the following Senate bills heretofore referred to that committee:

S. 290. Emma Sherwood.
S. 546. Louisa A. Thatcher.
S. 552. Mary Bottino.
S. 858. Blanche Packard.
S. 1326. Marion C. Turrill.
S. 1362. Laura E. Hess.
S. 1600. Michael E. Breck.
S. 2227. Francis M. Good.
S. 3103. Lucinda Randall.
S. 3379. William Cross.
S. 3624. Nana E. Sears.
S. 3699. Harriet G. Hayes.
S. 3907. James B. Romaine.
S. 4264. Catherine J. Carter.
S. 4476. Thomas Jordan.
S. 4511. Henry Luch.
S. 4611. Eugene P. McFadden.
S. 4612. Nettie Nieschang.
S. 4613. Leonidas Recob.
S. 4624. Fred Kamm.
S. 4630. Emma E. Bear.
S. 4631. Bessie P. Dummer.
S. 4675. Thomas Ranahan.
S. 4695. Sigmund Schlesinger.
S. 4705. Eli Ziegler.

Mr. BRYAN, from the Committee on Claims, to which was referred the bill (H. R. 8846) making appropriation for payment of certain claims in accordance with findings of the Court of Claims, reported under the provisions of the acts approved March 3, 1883, and March 3, 1887, and commonly known as the Bowman and the Tucker Acts, and under the provisions of section No. 151 of the act approved March 3, 1911, commonly known as the Judicial Code, reported it with amendments and submitted a report (No. 357) thereon.

Mr. SMITH of Maryland, from the Committee on the District of Columbia, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (S. 2245) for the relief of Frederick B. McGuire, trustee for Bessie J. Kibbey, owner of lot 75, square 628, Washington, D. C., with regard to assessment and payment of damages on account of changes of grade due to construction of the Union Station, in said District (Rept. No. 358);

A bill (S. 23) for the relief of Clara Dougherty, Ernest Kubel, and Josephine Taylor, owners of lot No. 13; of Ernest Kubel, owner of lot No. 41; and of Mary Meder, owner of the south 17.10 feet front by the full depth thereof of lot No. 14, all of said property in square No. 724, in Washington, D. C., with regard to assessment and payment for damages on account of change of grade due to the construction of Union Station, in said District (Rept. No. 359); and

A bill (S. 11) for the relief of Charlotte J. Pile, Eastmond P. Green, and Easie C. Gandell, owners of lots Nos. 53, 54, and 55, in square No. 753, Washington, D. C., with regard to assessment and payment of damages on account of change of grade due to construction of the Union Station, in said District (Rept. No. 360).

Mr. POMERENE, from the Committee on the District of Columbia, to which was referred the bill (S. 1653) providing against the abandonment of destitute, infirm, or aged parents, reported it without amendment and submitted a report (No. 361) thereon.

Mr. WORKS, from the Committee on the District of Columbia, to which was referred the bill (S. 31) for the relief of Ida A. Chew, owner of lot 112, square 721, Washington, D. C., with regard to assessment and payment of damages on account of changes of grade due to construction of the Union Station, District of Columbia, reported it without amendment and submitted a report (No. 362) thereon.

Mr. CHAMBERLAIN, from the Committee on Military Affairs, to which was referred the bill (S. 4690) to amend an act of Congress approved March 28, 1900 (Stat. L., p. 52), entitled "An act granting to the State of Kansas the abandoned Fort Hays Military Reservation, in said State, for the purpose of establishing an experiment station of the Kansas State Agricultural College, and a western branch of the State Normal School thereon, and for a public park," asked to be discharged from its further consideration, and that it be referred to the Committee on Public Lands, which was agreed to.

MISSOURI RIVER BRIDGE.

Mr. SHEPPARD. From the Committee on Commerce I report back favorably, without amendment, the bill (H. R. 13771) extending the provisions of the act of March 3, 1913, authorizing the construction of a bridge over the Missouri River near Weldon Springs Landing, Mo., and I submit a report (No. 364) thereon. I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LANDS IN CALIFORNIA.

Mr. WORKS. From the Committee on Public Lands I report back favorably, without amendment, the bill (H. R. 11751) authorizing the sale of certain land to the county of San Diego, State of California, for public watering purposes, and I submit a report (No. 363) thereon. The bill is a short one and is local in its character. I ask unanimous consent for its present consideration.

The VICE PRESIDENT. The Senator from California asks unanimous consent for the present consideration of the bill. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

HEARINGS BEFORE THE COMMITTEE ON FOREIGN RELATIONS.

Mr. SHAFROTH. From the Committee to Audit and Control the Contingent Expenses of the Senate I report back favorably with an amendment Senate resolution 302, submitted by the Senator from Indiana [Mr. SHIVELY] on the 13th instant, and I ask unanimous consent for its present consideration.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to the consideration of the resolution.

The amendment was to add at the end of the resolution the following words, "and may, if deemed necessary, employ a stenographer at a compensation of not to exceed $1 per printed page," so as to make the resolution read:

*Resolved*, That the Committee on Foreign Relations, or any subcommittee thereof, be authorized, during the Sixty-third Congress, to send for persons and papers, to administer oaths, and to hold hearings upon any bill or matter pending before said committee; and that the said committee and all subcommittees thereof may sit during the sessions of the Senate, and that the expenses of such hearings be paid out of the contingent fund of the Senate, and may, if deemed necessary, employ a stenographer at a compensation of not to exceed $1 per printed page.

The amendment was agreed to.

The resolution as amended was agreed to.

HEARINGS BEFORE THE COMMITTEE ON INDIAN AFFAIRS.

Mr. SHAFROTH, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate resolution 306, submitted by Mr. ASHURST on the 18th instant, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows:

*Resolved*, That the Committee on Indian Affairs, or any subcommittee thereof, be, and the same is hereby, authorized to employ a stenographer from time to time, as may be necessary, to report such hearings as may be had on the pending Indian appropriation bill, such stenographer to be paid at a rate not exceeding $1 per printed page; and that the expense thereof be paid out of the contingent fund of the Senate.

CHESAPEAKE & DELAWARE CANAL CO.

Mr. SAULSBURY. I am directed by the Committee on Coast and Insular Survey to report favorably without amendment Senate resolution No. 304, and I ask unanimous consent for its immediate consideration.

Mr. SMOOT. Let the resolution be read, Mr. President.

The VICE PRESIDENT. The resolution will be read.

The Secretary read Senate resolution 304, which had been reported favorably by Mr. WILLIAMS from the Committee to Audit and Control the Contingent Expenses of the Senate on the 18th instant, as follows:

*Resolved*, That the Committee on Coast and Insular Survey, or any subcommittee thereof chosen by said committee, be, and it hereby is, authorized and directed to investigate, ascertain, and report by whom the stock, bonds, and obligations of the Chesapeake & Delaware Canal Co. are owned, the value thereof, so far as the value of the said securities can be ascertained; the value, income, gross and net, and expenses of said canal; by whom and in whose interest the said canal is operated, owned, and controlled, and who is chiefly benefited by the manner of its operation; with authority to send for persons and papers, administer oaths, and to employ a stenographer at a cost not to exceed $1 per printed page, and to sit during the sessions of the Senate; the expense of said investigation to be paid out of the contingent fund of the Senate on vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. BURTON. What committee is it which is asked to make the investigation?

The VICE PRESIDENT. The Committee on Coast and Insular Survey.

Mr. SAULSBURY. Mr. President, I will say, for the information of the Senator from Ohio [Mr. BURTON], that this reference was with the consent of the present acting chairman of the Commerce Committee. It is anticipated that it will be a very short investigation, possibly nothing more than getting certain records from the canal company. The Government of the United States owns considerably more than one-third of the stock of the Chesapeake & Delaware Canal Co. It has no knowledge who the other stockholders are; neither has any department of the Government nor the Interstate Commerce Commission nor the Bureau of Corporations. The river and harbor bill as reported to the House carries an appropriation of $1,300,000 for the purchase of this canal. In addition to this stockholding, the Government has a suit against the canal company for quite an amount of money. In view of the debate which will be had on this item in the Senate, it is desired that we shall have such information as is available, chiefly from the records of the canal company, as to the ownership of the securiites.

Mr. BURTON. Can the Senator from Delaware give any intimation as to the time at which this report will be filed?

Mr. SAULSBURY. I should think by the middle of next week. That is my intention, if the resolution is adopted.

Mr. BURTON. Mr. President, I think it rather unusual to refer a matter of this kind to the Committee on Coast and Insular Survey. I take it the Senator from Delaware has consulted with the acting chairman of the Committee on Commerce.

Mr. SAULSBURY. I have——

Mr. BURTON. And he expressed no objection?

Mr. SAULSBURY. In the absence of the chairman of the committee [Mr. CLARKE of Arkansas] and of the Senator from North Carolina [Mr. SIMMONS], who is the acting chairman, I consulted with the Senator from Oregon [Mr. CHAMBERLAIN], who is the senior member, and he said that it was entirely agreeable that this particular matter should be so referred.

Mr. SMOOT. I should like to ask the Senator from Delaware if there is any particular haste in this matter or any necessity for immediate action thereon?

Mr. SAULSBURY. There is, for the reason that, as the river and harbor bill carries an appropriation for the purchase of this canal, and as an amendment has been submitted in the Senate to provide for the power of condemnation, it is very material to know just who are the owners of the stock and what is the value of that canal so far as possible.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

The resolution was considered by unanimous consent and agreed to.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JAMES:

A bill (S. 4970) granting an increase of pension to Enos M. Johnson (with accompanying papers);

A bill (S. 4971) granting an increase of pension to George Wash (with accompanying papers);

A bill (S. 4972) granting a pension to Dock J. Miller (with accompanying papers);

A bill (S. 4973) granting a pension to Esther Hounchill (with accompanying papers);

A bill (S. 4974) granting an increase of pension to George W. Mason (with accompanying papers); and

A bill (S. 4975) granting a pension to Benjamin Girdner (with accompanying papers); to the Committee on Pensions.

By Mr. STEPHENSON:

A bill (S. 4976) permitting the Wisconsin Central Railway Co. and the Minneapolis, St. Paul & Sault Ste. Marie Railway Co., its lessee, to construct, maintain, and operate a railroad bridge across the Chippewa River at Chippewa Falls, Wis.; to the Committee on Commerce.

By Mr. CHAMBERLAIN:

A bill (S. 4977) to establish a fishery experiment station on the Pacific coast of the United States; to the Committee on Fisheries.

By Mr. BRISTOW:

A bill (S. 4978) granting a pension to Francis M. Vaughn (with accompanying papers); to the Committee on Pensions.

By Mr. SMITH of Georgia:

A bill (S. 4979) for the relief of the heirs of Willis Miller, deceased (with accompanying papers); to the Committee on Claims.

By Mr. MYERS:

A bill (S. 4981) to amend the acts to regulate commerce so as to provide that publishers of newspapers and periodicals may enter into advertising contracts with common carriers and receive payment for such advertisements in transportation; to the Committee on Interstate Commerce.

A bill (S. 4982) for the relief of certain persons, their heirs or assigns, who have heretofore conveyed lands within national forests to the United States, and have made lieu-land selections under the act of June 4, 1897; to the Committee on Public Lands.

By Mr. WALSH:

A bill (S. 4983) amending sections 2347, 2348, and 2350 of the Revised Statutes of the United States; to the Committee on Mines and Mining.

By Mr. TOWNSEND:

A bill (S. 4984) granting an increase of pension to Michael A. Clark (with accompanying papers); to the Committee on Pensions.

By Mr. LANE:

A bill (S. 4985) granting a pension to Larkin Russell (with accompanying papers); to the Committee on Pensions.

By Mr. NORRIS:

A bill (S. 4986) granting an increase of pension to Samuel Kelsey; to the Committee on Pensions.

By Mr. McLEAN:

A bill (S. 4987) granting an increase of pension to Elizabeth Turner (with accompanying papers); to the Committee on Pensions.

By Mr. TILLMAN:

A bill (S. 4988) for the relief of the legal representatives of Henry D. Geddings; to the Committee on Claims.

By Mr. REED:

A bill (S. 4989) granting a pension to Joseph A. Black; and

A bill (S. 4990) granting a pension to Joseph W. James; to the Committee on Pensions.

By Mr. SHERMAN:

A joint resolution (S. J. Res. 129) relating to the awards and payments thereon in what is commonly known as the Plaza cases; to the Committee on the District of Columbia.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. BRADY submitted an amendment proposing to increase the appropriation for demonstration work on reclamation projects from $25,000 to $50,000, intended to be proposed by him to the Agricultural appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. CHAMBERLAIN submitted an amendment proposing to appropriate $60,000 for the survey of the public lands in Malheur County, Oreg., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. BRANDEGEE submitted an amendment intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

OMNIBUS CLAIMS BILL.

Mr. O'GORMAN submitted an amendment intended to be proposed by him to the omnibus claims bill, which was ordered to lie on the table and be printed.

PURCHASE OF MINERAL LANDS.

Mr. POINDEXTER submitted an amendment intended to be proposed by him to the bill (S. 2651) providing for the purchase and disposal of certain lands containing kaolin, kaolinite, fuller's earth, and other minerals within portions of Indian reservations heretofore opened to settlement and entry, which was ordered to lie on the table and be printed.

SEEDS, BULBS, ETC., BY MAIL.

Mr. POMERENE. I introduce a bill and ask that it be referred to the Committee on Post Offices and Post Roads.

The bill (S. 4989) to amend an act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1915, and for other purposes," approved March 9, 1914, was read twice by its title.

Mr. POMERENE. When the Post Office appropriation bill was pending in the Senate I submitted an amendment providing that seeds, cuttings, and so forth, should be carried as fourth-class mail matter at parcel-post rates. The intention of the amendment was to give the farmers and others who might be interested the better rates provided for in the parcel-post system. It seems, however, that small packages of 8 ounces or less can be carried as second-class matter at a less rate than the parcel-post rate, and this proposed amendment to the law is intended for the purpose of continuing at second-class rates those packages which weigh 8 ounces or less. I hope the bill will be taken up and considered at a very early date by the Committee on Post Offices and Post Roads.

The VICE PRESIDENT. The bill will be referred to the Committee on Post Offices and Post Roads.

WOMAN SUFFRAGE.

Mr. SHAFROTH. I introduce a joint resolution proposing an amendment to the Constitution of the United States to grant woman suffrage on certain contingencies in each State. I ask that it be referred to the proper committee.

Mr. GALLINGER. Mr. President, I ask the Senator if he has any objection to having it read?

Mr. SHAFROTH. No; I have no objection to having it read.

Mr. GALLINGER. I should like to have it read.

The VICE PRESIDENT. The Secretary will read as requested.

The joint resolution (S. J. Res. 128) proposing an amendment to the Constitution of the United States was read the first time by its title and the second time at length, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein),* That the following article is proposed as an amendment to the Constitution of the United States, which, when ratified by the legislatures of three-fourths of the several States, shall be valid to all intents and purposes as a part of the Constitution, namely:

SECTION 1. Whenever any number of legal voters of any State, to a number exceeding 8 per cent of the number of legal voters voting at the last preceding general election held in such State, shall petition for the submission to the legal voters of said State of the question whether women shall have equal rights with men in respect to voting at all elections to be held in such State, such question shall be so submitted, and if, upon such submission, a majority of the legal voters of the State voting on the question shall vote in favor of granting to women such equal rights, the same shall thereupon be deemed established, anything in the constitution or laws of such State to the contrary notwithstanding.

The VICE PRESIDENT. The joint resolution will be referred to the Committee on the Judiciary.

Mr. SHAFROTH. Mr. President, I ask that it be referred to the Committee on Woman Suffrage.

Mr. BRYAN. I object to that. It seems to me it ought to go to the Committee on the Judiciary. That is what the Judiciary Committee is for—to consider questions affecting the Constitution and laws of the country.

Mr. SHAFROTH. I move that the joint resolution be referred to the Committee on Woman Suffrage.

Mr. BRYAN. I move as a substitute that it be referred to the Committee on the Judiciary.

The VICE PRESIDENT. The question is on the amendment that the joint resolution be referred to the Committee on the Judiciary. [Putting the question.] By the sound the noes seem to have it.

Mr. SMITH of Georgia and Mr. BRYAN. I ask for a division.

Mr. ASHURST. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Johnson | Overman | Sterling |
| Bankhead | Jones | Page | Sutherland |
| Borah | Kenyon | Perkins | Swanson |
| Brady | La Follette | Pittman | Thomas |
| Brandegee | Lea, Tenn. | Pomerene | Thompson |
| Bristow | Lee, Md. | Reed | Thornton |
| Bryan | Lewis | Saulsbury | Tillman |
| Burton | Lippitt | Shafroth | Townsend |
| Catron | McCumber | Sheppard | Vardaman |
| Chamberlain | McLean | Sherman | Walsh |
| Chilton | Martin, Va. | Shields | Warren |
| Clark, Wyo. | Martine, N. J. | Smith, Ga. | West |
| Dillingham | Myers | Smith, Md. | Works |
| Gallinger | Nelson | Smith, S. C. | |
| Gronna | Norris | Smoot | |
| James | O'Gorman | Stephenson | |

Mr. REED. My colleague [Mr. STONE] is detained from the Senate by illness. I make this announcement for the day.

Mr. OVERMAN. I wish to announce that my colleague [Mr. SIMMONS] is absent on account of sickness.

The VICE PRESIDENT. Sixty-one Senators have answered to the roll call. There is a quorum present. The pending question is, Shall the joint resolution be referred to the Committee on the Judiciary?

Mr. THOMAS. Mr. President, I had risen to say that I thought the President of the Senate had stated the motion incorrectly, but upon reflection I see that that is what is proposed by the substitute of the Senator from Florida. I hope the substitute will not prevail.

The VICE PRESIDENT. A division has been called for on this question, and it is not debatable.

Mr. THOMAS. I insist that I am in order, Mr. President.

The VICE PRESIDENT. The Chair is compelled to rule against the Senator.

Mr. GALLINGER. I ask for the yeas and nays.

Mr. SHAFROTH. Mr. President, I should like to have stated exactly what the motion is. I made a motion to refer the joint resolution to the Committee on Woman Suffrage. The substitute offered by the Senator from Florida is to refer it to the Committee on the Judiciary.

The VICE PRESIDENT. That is the statement made by the Chair; but the Chair thinks its ruling is right when it says, a division having been called for, that the question of the division is not debatable.

Mr. GALLINGER. Pending that, I ask for the yeas and nays. We are wasting time.

Mr. WARREN. Before that, I ask as a matter of information that the question may be stated. Some of us have been engaged in committees, and are not familiar with the subject matter upon which we are to vote.

The VICE PRESIDENT. The Secretary will state the pending question.

The SECRETARY. The Senator from Colorado [Mr. SHAFROTH] offers a joint resolution proposing an amendment to the Constitution of the United States to grant woman suffrage in certain contingencies in each State.

The VICE PRESIDENT. The motion made by the Senator from Colorado [Mr. SHAFROTH] was to refer the joint resolution to the Committee on Woman Suffrage. The amendment offered by the Senator from Florida [Mr. BRYAN] was that it be referred to the Committee on the Judiciary. A division

was called for. Now the Senator from New Hampshire [Mr. GALLINGER] calls for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I announce my pair with the senior Senator from New Mexico [Mr. FALL] and withhold my vote.

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE], who is detained from the Chamber by illness, and therefore withhold my vote. If he were present, I should vote "yea."

Mr. SHEPPARD (when Mr. CULBERSON's name was called). I wish to announce the unavoidable absence of my colleague [Mr. CULBERSON] and that he is paired with the senior Senator from Delaware [Mr. DU PONT]. I wish this announcement to stand for the day.

Mr. LEWIS (when Mr. KERN's name was called). I wish to announce the unavoidable absence of the junior Senator from Indiana [Mr. KERN].

Mr. REED (when his name was called). I transfer my pair with the senior Senator from Michigan [Mr. SMITH] to the senior Senator from Indiana [Mr. SHIVELY] and will vote. I vote "yea."

Mr. SAULSBURY (when his name was called). I transfer my pair with the junior Senator from Rhode Island [Mr. COLT] to the junior Senator from Maryland [Mr. LEE] and will vote. I vote "yea."

Mr. OVERMAN (when Mr. SIMMONS's name was called). I again announce that my colleague [Mr. SIMMONS] is absent on account of sickness. He is paired with the junior Senator from Minnesota [Mr. CLAPP]. I will let this announcement stand for the day.

Mr. TOWNSEND (when the name of Mr. SMITH of Michigan was called). The senior Senator from Michigan [Mr. SMITH] is absent on important business. He is paired with the junior Senator from Missouri [Mr. REED]. This announcement may stand on all votes for the day.

Mr. SUTHERLAND (when his name was called). I am paired with the senior Senator from Arkansas [Mr. CLARKE], who is absent. Not knowing how he would vote upon this question if present, I withhold my own vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from New York [Mr. ROOT]. I transfer that pair to the junior Senator from Arizona [Mr. SMITH] and will vote. I vote "nay."

Mr. WARREN (when his name was called). I am paired with the senior Senator from Florida [Mr. FLETCHER]. I transfer that pair so that the Senator from Florida will stand paired with the junior Senator from Maine [Mr. BURLEIGH] and will vote. I vote "nay."

The roll call was concluded.

Mr. LEA of Tennessee. I have a general pair with the senior Senator from South Dakota [Mr. CRAWFORD]. I understand, however, that if present he would vote as I shall, and I therefore feel at liberty to vote. I vote "nay."

Mr. BANKHEAD (after having voted in the affirmative). I am paired with the junior Senator from West Virginia [Mr. GOFF]. I transfer that pair to the junior Senator from Oklahoma [Mr. GORE] and will permit my vote to stand.

Mr. CHAMBERLAIN. I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. If he were present, I should vote "nay." In his absence, I withhold my vote.

Mr. THOMPSON. I wish to announce the unavoidable absence of the junior Senator from Arkansas [Mr. ROBINSON]. He is paired with the senior Senator from Iowa [Mr. CUMMINS].

Mr. WEEKS. I wish to state that my colleague [Mr. LODGE] is absent on account of business. I will let this announcement stand for the day. On other questions than this he is paired with the senior Senator from Georgia [Mr. SMITH].

Mr. DU PONT. I have a general pair with the senior Senator from Texas [Mr. CULBERSON]. As he is absent from the city and I do not know how he stands on this question, I will withhold my vote.

The result was announced—yeas 25, nays 37, as follows:

YEAS—25.

| | | | |
|---|---|---|---|
| Bankhead | Johnson | Reed | Tillman |
| Bradley | Lippitt | Saulsbury | Vardaman |
| Brandegee | Martin, Va. | Smith, Ga. | Weeks |
| Bryan | Martine, N. J. | Smith, Md. | West |
| Catron | O'Gorman | Smith, S. C. | |
| Dillingham | Overman | Swanson | |
| James | Pomerene | Thornton | |

NAYS—37.

| | | | |
|---|---|---|---|
| Ashurst | Gallinger | Jones | Lea, Tenn. |
| Brady | Gronna | Kenyon | Lewis |

| Clarke, Ark. | Gore | Root | |
| Colt | Hitchcock | Shields | |
| Crawford | Kern | Shively | |

So Mr. BRYAN's amendment was rejected.

The VICE PRESIDENT. In order that this may not be taken as a precedent, the Chair desires to state that the motion to substitute was a violation of Rule XXVI. This being only a question to refer a joint resolution to a committee, it is not subject to amendment. The amendment, however, is lost.

The question now is on the motion to refer the joint resolution to the Committee on Woman Suffrage.

The motion was agreed to.

Mr. BRYAN. Mr. President, I did not make the motion to refer the joint resolution to the Committee on the Judiciary out of any lack of confidence in the Committee on Woman Suffrage, but I believe an examination of the RECORD will show that no amendment to the Constitution of the United States has ever been referred to any other committee than the Committee on the Judiciary until the reference of the joint resolution seeking to provide for woman suffrage.

Mr. BRISTOW. Will the Senator yield?

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Kansas?

Mr. BRYAN. I do.

Mr. BRISTOW. I desire to state to the Senator that I think he will find he is in error in that statement, because the amendment providing for the election of Senators was sent time and again to the Committee on Privileges and Elections. It went there many times.

Mr. BRYAN. It may be that that is the reason why we have so much trouble in construing what that amendment means. My recollection, however, is that the joint resolution upon which we voted came from the Committee on the Judiciary.

Mr. BRISTOW. The last time the amendment that was adopted was referred to the Committee on the Judiciary and was reported out from that committee, but prior to that time the amendment had been sent to the Committee on Privileges and Elections.

Mr. BRYAN. Mr. President, I think a constitutional amendment is important enough to have the best study given to it by the committee organized by the Senate for the purpose of studying great legal and constitutional questions. That was the reason why I undertook to make the motion. The Senator from Colorado seems to think that because the Committee on Woman Suffrage has been organized a joint resolution of this character ought to go to that committee.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Colorado?

Mr. BRYAN. I do.

Mr. THOMAS. I merely wish to state in this connection that the reason why I entertain that opinion is that the question of woman suffrage can not be considered in this body except in the form of a proposed constitutional amendment. If such amendments do not come before the committee I am at a loss to understand what office the committee has to perform. We know that legislation, ordinarily speaking, can not be introduced or considered affecting the question, and we must act through amendments to the organic law, if we are to act at all.

Mr. BRYAN. I think I can acquaint the Senator with the reason for the formation of the Committee on Woman Suffrage. It was created to provide a chairmanship.

Mr. THOMAS. The committee was not transferred from the minority to the majority and thus made an active committee at the recent organization of the Senate for any such purpose. It was done at my solicitation for the purpose of making woman suffrage an active issue.

Mr. BRYAN. I was answering the Senator's question. When it was created an active committee it was never thought that it would have jurisdiction over constitutional amendments, saying to a State that 5 per cent of its people could make them adopt any amendment Congress might want them to adopt. It ranked along with the great Committee on the Disposition of Useless Papers in the Executive Departments, which has struggled along until now with only three members. If a bill had

ever been referred to it a celebration of the event would have taken place.

Mr. THOMAS. Will the Senator yield for a question?

Mr. BRYAN. I will yield directly.

Then there is another great committee, the Committee to Investigate Trespassers upon Indian Lands, upon which I had the honor to serve for three years. It has never had a meeting, I suppose, in 20 years; there never has been a bill referred to it.

The Senator from Indiana [Mr. KERN] the other day offered a resolution and had it referred to the Committee on Rules to increase the number upon the Committee on Transportation Routes to the Seaboard from eight members to nine members. That calls to my mind the fact that we have many great problems and questions for that committee to consider in the immediate future, and the number of the committee ought to be increased from eight to nine. That resolution ought to be reported and let us immediately have nine members on that committee.

So I wish to appeal for the Committee on the Disposition of Useless Papers that the number be increased from three to nine. Here it has been struggling along through all these years with only three members. Likewise the Committee to Investigate Trespassers upon Indian Lands; and there is the Committee on Revolutionary Claims.

Mr. TILLMAN. And the Committee on the Five Civilized Tribes also.

Mr. BRYAN. I am coming to that later. The Committee on Revolutionary Claims has only five members. If there were any claims to come up about which somebody would want a constitutional amendment, how could the Committee on Revolutionary Claims struggle along with only five members when the Senator from Indiana concedes the justice of having nine members upon the Committee on Transportation Routes to the Seaboard?

Mr. GALLINGER. Mr. President——

Mr. BRYAN. I will yield in a moment. Likewise I want to appeal on behalf of the membership of the Committee on Standards, Weights, and Measures. That great committee ought not to be forced by the action of the Senate to struggle along with only five members.

What shall be said, Mr. President, in defense of the policy that heretofore has obtained of allowing five members to the Committee on the Transportation and Sale of Meat Products?

Mr. GALLINGER. Mr. President, did I understand the Senator to depreciate the importance of the Committee on Transportation Routes to the Seaboard?

Mr. BRYAN. Oh, no; Mr. President, it is a great committee, but there are other great committees here. I will say to the Senator frankly, I think we do ourselves an injustice by creating a large number of inactive committees, and we subject ourselves justly to the criticism that the Senate is engaged in a matter so small as that. If there are to be places for the purpose of giving clerks to Senators, we ought to do it in an open, manly way, and vote whatever clerical assistance is necessary. Then we stand upon a defensible position. But I answered the Senator from Colorado as to how the Committee on Woman Suffrage had been created, and I leave it to the Senator from New Hampshire or any other Senator to say if my statement is not correct.

Mr. GALLINGER. I was going to call the attention of the Senator from Florida to two facts historical in their nature. One is that the late Senator and Secretary of the Treasury Windom made a very elaborate report, which is printed in two volumes, as chairman of the Committee on Transportation Routes to the Seaboard. The other historical fact is that I once served as chairman of that committee.

Mr. BRYAN. Mr. President, it has existed and it exists now. I see no necessity for it to continue, because the Senate a few months ago did the manly, the straightforward thing of giving to Senators the clerks they needed. These committees, including the Committee on Woman Suffrage, as we all know, were created for the sole purpose of providing chairmanships and clerkships of inactive committees. It is true that since the Senator from Colorado has been chairman of the Committee on Woman Suffrage there has been one joint resolution referred to it.

Mr. WARREN. Mr. President, may I interrupt the Senator?

Mr. BRYAN. I yield.

Mr. WARREN. The Senator is correct as to most of his assertions about committees, but the Committee on Woman Suffrage happens to be a committee that antedates the time when they undertook to have a committee chairmanship for every Senator of the majority. That committee, as I remember it, was many years ago created to take up the subject and largely to receive the communications that were coming in great numbers and also to listen to the appeals that were made individually to that committee. It was originally a majority committee, but it went over to the minority later and is now back to the majority. In its original creation it was not of the nature of a number of other committees which the Senator has mentioned.

Mr. BRYAN. Let me ask the Senator if, until the reorganization last year, the Committee on Woman Suffrage had not been an inactive committee and if it was not maintained solely for the purpose of providing a chairmanship for a Senator.

Mr. WARREN. I presumed the Senator wanted to be historically correct. The only motive I had in rising was to state exactly how the committee originated and what has been its history since.

Mr. BRYAN. I want the Senator to answer my question. Was it not maintained for years for the sole purpose of providing a chairmanship for an inactive committee?

Mr. WARREN. Afterwards it became a committee of the minority and naturally ranked with the others, but that was not the original purpose in the creation of the committee.

Mr. BRYAN. It may be so, but that has been the purpose for which it has been maintained, and that is what I said.

Mr. President, it does seem to me with that history, from the fact that it has been an inactive committee, from the fact that it has never considered a constitutional amendment affecting the right of the people of the States or of the United States, a committee with perhaps at times not a lawyer upon it, it should not be contended that it was right and proper that the proposed joint resolution providing for an amendment to the Constitution should be referred to it. What is the Committee on the Judiciary for?

Under the argument made by the Senator from Colorado a joint resolution must affect some subject matter within the control and jurisdiction of some committee other than the Judiciary Committee. Is it to be said that hereafter we have so little faith in the Judiciary Committee that we will not refer any joint resolution proposing an amendment to the Constitution to it, but if it happens to affect woman suffrage we will refer it to the Committee on Woman Suffrage; if it happens to affect the disposition of useless papers, we will refer it to that committee; if it happens to affect trespasses upon Indian lands, we will refer it to that committee; if it happens to affect Revolutionary claims, it goes to the committee of that name? Then what is the use of maintaining the Committee on the Judiciary? An amendment such as is proposed by the junior Senator from Colorado [Mr. SHAFROTH] that the Constitution be so amended as to change the date upon which Congress shall meet and upon which the President shall take office, an amendment deserving and requiring the best and the most careful consideration of the ablest lawyers in this body, would, under the argument that prevails here to-day, be referred to the Committee on Privileges and Elections, upon which there need not be a single lawyer.

That is the reason, Mr. President, why it occurred to me to be proper to refer a joint resolution affecting the Constitution of the United States to a committee that has always been one of the leading committees of the Senate and not to a committee that has always been until recently an inactive committee, without any intention of its ever having a meeting, ranking along with the other committees which I have mentioned.

Mr. THOMAS. Mr. President, I have no doubt the Senator from Florida has stated correctly the original purpose of the creation of the Committee on Woman Suffrage, and it is, of course, true that a great many inactive committees have been created perhaps solely for the purposes to which he has referred.

But, Mr. President, I am not convinced that because of that fact the Senate has in the slightest degree erred in referring this proposed amendment to the committee of which I have the honor to be the chairman. It is either an active committee to-day or it is not. If it is an active committee, I respectfully suggest that subjects of this sort should properly be referred to that committee, and to none other. But in saying that I am not proposing to derogate either from the importance or the power of the Committee on the Judiciary.

But, Mr. President, the great committees like the Committee on the Judiciary have altogether too much business referred to them. It is physically impossible for the members of that committee to give proper and needed attention to the various matters which properly belong to their jurisdiction. If a measure of this kind so late in the present session should be referred to that committee, the chances are a hundred to one that it would not be reported upon even adversely during the pendency of the present session. It would be far better for the public business if the business were distributed more generally among

the various committees of the Senate, because in that event reports could be made much more intelligently with reference to great matters of business presented here for consideration than is at present the case.

I do not think that any Senator can complain that the Committee on Woman Suffrage, which is now an active committee and which is dealing with one of the most active and persistent issues which the public are to-day considering, has failed or been negligent in pressing as rapidly as possible the business which has been submitted to it for the consideration and ultimate determination of the Senate of the United States.

I think the Senator's argument perhaps proves a little too much, since if the Judiciary Committee is to consider everything that may affect the statutes of the United States or the Constitution it ought to be the only committee within this body.

Mr. BRYAN. Mr. President——

Mr. THOMAS. Now, by analogy——

Mr. BRYAN and Mr. BRISTOW addressed the Chair.

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Kansas?

Mr. SWANSON. Mr. President——

Mr. THOMAS. I yield to the Senator from Kansas.

Mr. BRISTOW. I desire to present some morning business as soon as this debate is over. I do not want to have the morning hour expire before I get that opportunity.

Mr. THOMAS. I am nearly through.

Mr. SWANSON. I should like to inquire if the matter has been disposed of by the Senate?

The VICE PRESIDENT. It has been.

Mr. THOMAS. Objection was not made when the Senator from Florida [Mr. BRYAN] was speaking.

Mr. SWANSON. We were willing to hear debate before the question was disposed of, and we consumed a great deal of time in that. It seems to me under ordinary procedure, having disposed of the matter, we should take up other measures. But I will not raise a point of order until the Senator from Colorado concludes.

Mr. THOMAS. I am going to conclude in a minute.

Mr. SWANSON. When the Senator from Colorado concludes, I shall call for the regular order.

Mr. THOMAS. I will yield to the Senator in a moment.

Mr. BRYAN. I think the Senator from Colorado and I are both within our rights and within the rules of the Senate.

Mr. SWANSON. I serve notice that when the Senator from Colorado concludes I shall call for the regular order.

Mr. THOMAS. I do not want to take up any time of the Senate and I will not justly——

Mr. BRYAN. I know the Senator wants to quote me accurately.

Mr. THOMAS. Certainly.

Mr. BRYAN. I do not think I made the statement that every question affecting a statute should be referred to the Committee on the Judiciary.

Mr. THOMAS. I did not intend to so state.

Mr. BRYAN. I said or intended to say that every question involving great legal principles or the Constitution of the United States ought to be referred to the Committee on the Judiciary.

Mr. THOMAS. Mr. President, if I quoted the Senator in what I said, I did not mean to do so. I said that was the conclusion which I drew from his argument, saying that, in my judgment, it proved too much.

But let me, before taking my seat—and I will only take a moment—apply the Senator's logic to another committee or to two other committees of the Senate. I refer to the Committee on Foreign Relations and to the Committee on Interoceanic Canals. If the logic of the Senator's position is correct, I can conceive of no office that the Committee on Interoceanic Canals can perform. We are soon, I suppose, to consider the question of Panama tolls, relating to the passage of vessels through the Panama Canal, and, if the Senator from Florida be correct, then, surely, when those matters are introduced here, instead of going to the Committee on Interoceanic Canals they should go to the Committee on Foreign Relations. That, of course, raises the question at once, If that be so, what office can the Committee on Interoceanic Canals possibly perform, except perhaps the mere creation of certain clerical positions which are necessary for other purposes?

Mr. SHAFROTH. Mr. President, I merely wish to correct a statement which was made by the Senator from Florida relative to the joint resolution, to the effect that if 5 per cent of the voters of a State voted in favor of woman suffrage it would be established, which is not the effect of the joint resolution at all. The joint resolution provides that 8 per cent of the voters of a State shall have a right by petition to have the question submitted to the voters of the State, and a majority of the voters of the State must decide whether or not there shall be woman suffrage in that State.

Mr. BRYAN. I intended to state it in that way; but why does the Senator raise the percentage of petitioners from 5 to 8?

Mr. SHAFROTH. I did that very largely because of the colloquy which I had with the Senator from Mississippi [Mr. WILLIAMS].

Mr. BRYAN. Why did not the Senator reduce it to 1 per cent?

Mr. SHAFROTH. The reason I changed the percentage was that the Senator from Mississippi seemed most seriously to object to the percentage which I first fixed, and I thought it would be better to raise it to 8 per cent; but it seems to me, in view of the arguments which were made here yesterday by so many Senators, namely, that we wanted to force woman suffrage on the people of some of the States when they did not want it, that every Senator who is willing that the voters of his State shall determine the question should vote in favor of this joint resolution.

Mr. BRISTOW. Mr. President, I desire to introduce a joint resolution. It is exactly the same as the joint resolution the Senate voted on yesterday. The joint resolution just introduced by the Senator from Colorado [Mr. SHAFROTH] is in the nature of a national initiative and referendum law to be embodied in the Constitution. It authorizes the submission of the question of woman suffrage to the voters of the States upon a petition of 8 per cent of those voters. It is more of a national initiative and referendum amendment than a woman-suffrage amendment, although it relates directly to woman suffrage. I am inclined to favor the joint resolution, but I prefer that the question of woman suffrage rest directly upon its own merits and be pending in Congress. I would rather that it stand alone and not be involved with the initiative and referendum question.

An analysis of the vote on the joint resolution yesterday shows that it was lost by 11 votes. Sixty-nine votes were cast. It would therefore have required 46 votes to have constituted the necessary two-thirds.

Mr. BRYAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Florida?

Mr. BRISTOW. I do.

Mr. BRYAN. Does not the Senator from Kansas think that it would require two-thirds of the membership of the Senate?

Mr. BRISTOW. No; it only requires two-thirds of the votes cast, a quorum voting.

Mr. BRYAN. I do not think so. The Constitution says that the vote of two-thirds of the Members of each House shall be necessary.

Mr. BRISTOW. No.

Mr. BRYAN. Of course it would not be very material, for it would go to the Committee on Woman Suffrage, and they would settle the constitutional question there.

Mr. BRISTOW. If the Senator will examine the precedents, he will find that constitutional amendments have been heretofore adopted by two-thirds of the votes cast, a quorum voting. That has been the universal rule.

As I was saying, however, the joint resolution proposing the amendment was lost by 11 votes. If 11 Senators change their views and cast their votes in favor of the joint resolution, it will be adopted. I want this joint resolution, as we voted on it yesterday, pending in the Senate, so that the good women of this country may carry on their campaign until they get the additional 11 Members, or whatever number may be necessary, in order to pass the joint resolution through the Senate. I think with the development of public opinion that is now going on in this country that within a very short time the additional 11 votes will be secured; indeed, I believe that Senators who yesterday voted against the joint resolution, upon mature consideration during the next year, will then vote for it, if they have an opportunity. So I introduce the joint resolution which I send to the desk, and ask that it be referred to the Committee on Woman Suffrage.

The VICE PRESIDENT. The title of the joint resolution introduced by the Senator from Kansas will be read.

The joint resolution (S. J. Res. 130) proposing an amendment to the Constitution of the United States was read twice by its title and referred to the Committee on Woman Suffrage.

## MINING ON THE PUBLIC DOMAIN.

Mr. MYERS. Mr. President, in obedience to instructions from the Senate Committee on Public Lands, and as chairman of that committee, I move that the Committee on Mines and Mining be discharged from the further consideration of the bill (S. 4898) to encourage and promote the mining of coal,

phosphate, oil, gas, potassium, and sodium on the public domain, which was introduced in the Senate on the 16th day of this month, and that it be referred to the Committee on Public Lands.

Inasmuch as my colleague [Mr. WALSH], who is the author of the bill and chairman of the Committee on Mines and Mining, is not in the Chamber, I ask that the motion may go over without prejudice, so that it may be called up to-morrow during the morning hour or immediately after the close of morning business.

The VICE PRESIDENT. The motion of the Senator from Montana will lie over one day.

THE REPUBLIC COAL CO.—ORDER OF BUSINESS.

Mr. MYERS. I desire to give notice that to-morrow, immediately after the close of the morning business, I shall ask unanimous consent for the consideration of Senate joint resolution 41; and if the Senate should not be in session to-morrow, then I give notice that I will take such action on next Tuesday, immediately after the close of the morning business.

Mr. SMITH of South Carolina. Mr. President, has morning business closed?

The VICE PRESIDENT. It has not yet closed.

Mr. SMOOT. I should like to say to the Senator that I hope the Senate will be in session to-morrow; and I also hope that the calendar will be taken up to-morrow immediately after the close of the morning business, and that the day will be given to the consideration of bills on the calendar.

Mr. MYERS. I wish to say that I agree to that proposition.

Mr. SMOOT. If that is done, one of the first measures on the calendar is the joint resolution to which the Senator from Montana has referred.

Mr. MYERS. Mr. President, I earnestly hope that it will be done; and if we can have a reasonable time in which to consider the calendar to-morrow, I will not call up the joint resolution to which I have referred. I am willing that it should come up in its order on the calendar, if we ever reach the consideration of the calendar.

Mr. SMITH of Georgia. Mr. President, it is the intention to ask for a session to-morrow, especially for the purpose of giving opportunity to consider the calendar.

Mr. SMOOT. I am very glad to hear it.

Mr. MYERS. Mr. President, I move that when the Senate adjourns to-day, it adjourn to meet at 2 o'clock to-morrow afternoon.

Mr. SMOOT. Twelve o'clock.

Mr. MYERS. Well, at 12 o'clock to-morrow.

The VICE PRESIDENT. The motion is out of order; that is the standing order of the Senate.

TRADING IN COTTON FUTURES.

Mr. SMITH of South Carolina. Mr. President, in view of the fact that the morning hour will soon expire by limitation, I give notice that on Monday next I will call up Senate bill 110 immediately upon the close of morning business.

SWINOMISH SLOUGH BRIDGE, WASHINGTON.

Mr. JONES. There is a bill which was received from the House of Representatives two or three days ago, and which is now on the table, providing for the construction of a bridge in my State. I ask that it may be taken from the table and laid before the Senate. I will state that Senate bill 4250, which passed the Senate on the 27th day of February is identical with this House bill.

The VICE PRESIDENT. The Chair lays before the Senate a bill from the House of Representatives.

The bill (H. R. 12594) to authorize the county commissioners of Skagit County, Wash., to construct a bridge across the Swinomish Slough opposite the town of La Conner, was read twice by its title.

Mr. JONES. I ask unanimous consent for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. JONES. I ask that the Secretary be requested to recall from the House of Representatives the bill (S. 4250) to authorize the county commissioners of Skagit County, Wash., to construct a bridge across Swinomish Slough, opposite the town of La Conner.

The VICE PRESIDENT. Without objection, the request will be made. Concurrent and other resolutions are in order.

PANAMA CANAL TOLLS.

Mr. JONES. Mr. President, as the morning hour is so nearly closed, I do not think I will call up the resolution that is on the table; but I wish to state that on to-morrow I expect to call up the resolution calling on the President for information with reference to Panama Canal tolls; and I also desire to say that I shall avail myself of the rules of the Senate to hasten the disposition of morning business so as to reach the resolution as early as possible.

Mr. SMITH of Georgia. Mr. President, I wish to say to the Senator from Washington that it has been the plan for several days to give to-morrow to the consideration of the calendar, and I shall do what I can to follow that course, and shall insist that to-morrow the calendar be given precedence over everything else. There are many Senators with measures upon the calendar, which can be disposed of, who have been asking for it, and they are entitled to to-morrow, which is Saturday, for that purpose. Of course the Senate can refuse to proceed with the calendar and take up the resolution referred to by the Senator from Washington; but, so far as I am concerned, I intend to adhere to the statement I have made to a number of Senators, who desire to have the calendar considered, and I shall ask to proceed with it.

Mr. JONES. Mr. President, I desire to make a parliamentary inquiry. Is it not in order within the morning hour to call from the table the resolution which I have offered?

The VICE PRESIDENT. It can only be done by unanimous consent or by a motion.

Mr. JONES. I submit the resolution which I send to the desk and ask for its immediate consideration.

Mr. SMOOT. Will the Senator yield for a moment? I merely wish to make a statement.

Mr. JONES. I yield to the Senator from Utah.

Mr. SMOOT. I wish to say to the Senator from Georgia [Mr. SMITH] that I am in full accord with his statement in relation to taking up the calendar; but I wish to say also that, unless we take up the calendar for consideration and go through with it, I shall hereafter object every time unanimous consent is asked for the immediate consideration of a bill when it is reported to the Senate.

The VICE PRESIDENT. The Senator from Washington submits the resolution, which will be read.

The resolution (S. Res. 309) was read, as follows:

*Resolved*, That the President be, and he is, requested, if not incompatible with the public interests, to advise the Senate what nations have protested against the passage of coastwise vessels through the Panama Canal free of tolls, what representations have been made regarding the same, and copies of all communications received from foreign countries relating thereto, together with copies of answers submitted by the United States.

Mr. JONES. I ask unanimous consent for the immediate consideration of the resolution.

Mr. SMITH of Georgia. Mr. President, the resolution is already on the table.

Mr. JONES. Not this resolution.

Mr. SMITH of Georgia. But it is the same resolution that is now lying on the table, and I object to its consideration.

The VICE PRESIDENT. Under the rule, the resolution will lie over and be printed. Are there further concurrent or other resolutions? If not, morning business is closed.

URGENT DEFICIENCY APPROPRIATIONS.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 13612) making appropriations to supply urgent deficiencies in appropriations for the fiscal year 1914 and for prior years, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. MARTIN of Virginia. I move that the Senate insist on its amendments and agree to a conference asked by the House, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to, and the Vice President appointed Mr. MARTIN of Virginia, Mr. BRYAN, and Mr. WARREN conferees on the part of the Senate.

HOUSE BILLS REFERRED.

The following bills were severally read twice by their titles and referred to the Committee on Pensions:

H. R. 14234. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; and

H. R. 14546. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

THE CALENDAR.

Mr. SMOOT. I ask for the regular order.

The VICE PRESIDENT. The calendar under Rule VIII is in order.

Mr. SMOOT. Mr. President, before we begin with the consideration of the calendar under Rule VIII, I suggest the absence of a quorum, because there are a number of Senators who do not know that we are about to enter upon the consideration of bills upon the calendar.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Jones | Page | Stephenson |
| Bankhead | Kenyon | Perkins | Sterling |
| Bradley | La Follette | Pittman | Sutherland |
| Brady | Lane | Poindexter | Thomas |
| Brandegee | Lea, Tenn. | Pomerene | Thompson |
| Bryan | Lee, Md. | Ransdell | Thornton |
| Burton | Lewis | Reed | Tillman |
| Catron | McCumber | Shafroth | Townsend |
| Dillingham | Martine, N. J. | Sheppard | Walsh |
| du Pont | Myers | Sherman | Warren |
| Gallinger | Nelson | Shields | Weeks |
| Gronna | Newlands | Smith, Ariz. | West |
| Hughes | Norris | Smith, Md. | |
| James | O'Gorman | Smith, S. C. | |
| Johnson | Overman | Smoot | |

The VICE PRESIDENT. Fifty-seven Senators have answered to the roll call. There is a quorum present. The calendar under Rule VIII is in order.

BILLS PASSED OVER.

The first business on the calendar was the bill (S. 1240) to establish the legislative reference bureau of the Library of Congress.

Mr. SMOOT and Mr. GALLINGER. Let that bill go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 1760) for the restoration of annuities to the Medawakanton and Wahpakoota (Santee) Sioux Indians, declared forfeited by the act of February 16, 1863, was announced as next in order.

Mr. SMOOT. Let that bill go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 655) authorizing the Secretary of the Interior to survey the lands of the abandoned Fort Assiniboine Military Reservation and open the same to settlement was announced as next in order.

Mr. MYERS. I ask that that bill go over.

The VICE PRESIDENT. The bill will be passed over.

THE REPUBLIC COAL CO.

The joint resolution (S. J. Res. 41) authorizing the Secretary of the Interior to sell or lease certain public lands to the Republic Coal Co., a corporation, was announced as next in order.

The VICE PRESIDENT. The pending amendment is that proposed by the junior Senator from Montana [Mr. WALSH].

Mr. THOMAS. Mr. President, I have been informed that the senior Senator from Nebraska [Mr. HITCHCOCK] has some interest in this matter, either in favor of it or against it, I do not know which. I observe that he is absent. I suggest that the matter go over until he can be notified and can be present.

Mr. MYERS. The Senator from Nebraska and I have talked considerably about this bill, and he told me he did not care whether he was present or not when it was voted on.

Mr. THOMAS. Very well. On that statement I have nothing further to say.

Mr. KENYON. Mr. President, I simply wish to place in the RECORD, very briefly, my objections to this joint resolution. There are a number of Senators whom I know are opposed to the joint resolution but who are not in the Chamber at this time. I do not wish to do anything that will further delay the consideration of the resolution. The Senator from Montana has brought it up several times, and he is entitled to have it voted on.

The original joint resolution, as referred to the committee, authorized the Secretary of the Interior to sell or lease certain public lands to the Republic Coal Co. I ask Senators to note that the words "or lease" were in the original joint resolution. That resolution was referred to the Secretary of the Interior for his opinion, and his opinion was favorable to the joint resolution with those words in it.

As the resolution came from the committee to the Senate, when my attention was first attracted to it, it was changed very materially from the form in which it was first introduced and in which it was submitted to the Secretary of the Interior, so that I think his opinion is not of very persuasive force in the matter. As the joint resolution was presented to the Senate it was wrong, from my viewpoint, and I think wrong from the viewpoint of many Senators in this body.

The Secretary of the Interior was instructed, authorized, empowered, and directed, in the language of the joint resolution, to sell to the Republic Coal Co. certain coal lands, I think about 2,000 acres, the purchase price to be fixed by the Secretary of the Interior. It did not provide that there could be any lease. It was the amazing proposition of a joint resolution directing the Secretary of the Interior to sell a particular piece of Government land to a particular corporation.

It would not have been so bad if it had provided that the Secretary could lease or sell; but it did not even do that. It would not have been so bad if it had directed that the land should be sold to the highest bidder. Under the joint resolution, however, no one else has the right to buy this land except one particular corporation. That is bad legislation. It is the kind of legislation a good many of us have contended against for a good many years. I did not suppose it was possible, with the present enlightened conscience of the American people, that such a joint resolution could be earnestly urged in this body.

Mr. CLARK of Wyoming. Mr. President, will the Senator yield for just a moment?

Mr. KENYON. Certainly.

Mr. CLARK of Wyoming. I will ask the Senator whether this land can be purchased now by other parties?

Mr. KENYON. I do not know.

Mr. CLARK of Wyoming. I think it can be. The authority is given to sell it to this company, as I understand, largely because the company themselves, under the general law, can not acquire the land. I think that is true. The Senator from Montana, I think, will confirm me in that statement.

Mr. KENYON. Of course, I am willing to accept the Senator's suggestion as to the land laws, because I am not so familiar with them as he is. It is conceded, however, that the Republic Coal Co. is merely an auxiliary organization of the Chicago, Milwaukee & St. Paul Railroad Co. So the original joint resolution as presented to the Senate, and upon which we were asked to act, was a direction from Congress to the Secretary of the Interior to sell this land to the Milwaukee Railroad.

Mr. WALSH. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Montana?

Mr. KENYON. I do.

Mr. WALSH. I simply desire to say, in answer to the inquiry of the Senator from Wyoming, that the land is now open to purchase by private individuals. It has been appraised by the Geological Survey, and any individual otherwise qualified may purchase 160 acres of it.

Mr. KENYON. I will ask the Senator how long that has been true. How long has it been open to purchase by private individuals?

Mr. WALSH. My recollection is that the appraisement was made in 1908, and any individual may go in and buy 160 acres, or an association of qualified individuals may buy 320 acres. This company, however, can not buy. It is not qualified.

Mr. KENYON. That is possibly a fault in the law, but it does not change my opinion as to the merits of the joint resolution.

Outside of these preliminary objections I have an objection to the resolution which is fundamental, to my mind, though many Senators would not agree with me about it. I do not believe the Government ought to sell any more of its coal lands. It possibly ought to provide some system of leasing them, but the coal, which is in the earth for the benefit of all the people, ought to be conserved in some way by the Government for them. I do not mean to say that the Government ought to operate the coal mines; I would not go that far; but the Government ought to keep the coal lands.

That objection being so fundamental in my mind I can not vote for this joint resolution. I have not had an opportunity to study the amendments offered by the junior Senator from Montana [Mr. WALSH]. I am satisfied, of course, that they make the joint resolution much better than it was before. Whatever the amendments were they could not help making it better, and they undoubtedly have been drawn with the care and skill which the Senator from Montana possesses.

I feel it my duty, however, to vote against the joint resolution even if amended feeling as I do about it—that it is wrong legislation and vicious legislation. If there ever was a case of special legislation for special interests, it is this joint resolution as reported to the Senate from the Senate committee. Feeling as I do I shall have to vote against the joint resolution.

Mr. SHAFROTH. Mr. President, I can not agree with the Senator from Iowa with relation to the question of leasing and selling. This bill is a matter of no local concern to me, and consequently I have no interest whatever in the measure; but when the Senator proposes that all of the coal in the United

States shall be held and owned by the Government and that it shall be leased by the Government I at least must enter my protest against such a proposition.

Why? Because we have a dual form of government here. We have a National Government for national affairs and a State government for State affairs. When we consider the fact that the holding by the National Government will keep these lands from taxation by the States it becomes a most serious matter to the States whether these lands shall be sold or whether they shall be leased.

In my State there have been withdrawn from entry 9,425,000 acres of coal lands, valued by the Government at between half a billion dollars and a billion dollars. Not an acre of them is subject to taxation for the maintenance of the State government, for the maintenance of the county government, or for the maintenance of the schools; and yet we are required by the Constitution of the United States to maintain a republican form of government over these lands. Is it right that we should have a leasing system by which these lands shall be held and leased by the Government in perpetuity and not a dollar contributed to the State or to the county or to the schools which have the greatest amount of expense with relation to government over them? It seems to me that it is absurd to say that we should have a leasing system as to public lands. It means perpetual ownership in the National Government and administration from Washington, which was never intended by the framers of our Constitution.

Mr. WALSH. Mr. President——

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Montana?

Mr. SHAFROTH. Yes, sir.

Mr. WALSH. For the information of the Senator upon that subject I desire to say that I had the honor to introduce, the other day, a bill which provides for the leasing of coal lands, but provides that everything derived from them shall go to the State in which they are located.

Mr. SHAFROTH. Mr. President, we have had a good deal of tinkering with our laws out West, and every time we have had it we have met with obstructions. For example, the system under which a forest inspector goes and looks at a mine and determines whether or not it is a workable mine has practically killed prospecting in the West; so that right now, instead of having 40,111 miners of metalliferous ores in the State of Colorado, as we had in 1900, we had in 1910 19,568, according to the report made to the Committee on Mines and Mining the other day.

You must remember that we have certain duties to discharge as States. There is imposed upon us the duty of maintaining a republican form of government. We can not well do that without establishing an educational system.

It is just as much to the interest of the Nation that the children should be educated as it is to the State. What is the result if the lands are withdrawn? These lands valued at from half a billion to a billion dollars are withdrawn from any taxation for the purpose of sustaining a school system that is for the very purpose of educating people for citizenship, and in which the United States Government is as much interested as the State government. Are you going to take all the revenue?

I never noticed how serious this matter was until I was governor of the State. I found that we contributed to the National Government yearly $5,000,000 in taxation, and yet we raised for State purposes only $1,600,000. We pay to the National Government three times as much as we collect for our own State government. The amount here involved in the withdrawn coal lands is from half a billion to a billion dollars, estimated by the United States Government, and the result is we can not get a dollar of revenue from them. Is it possible that that is right? Is it possible that any Senator will say the Government should not maintain its dual relations, taking care of its national affairs and let this territory over which the State must exercise jurisdiction remain as it has been?

As to the quantity of coal, Mr. President, Senators talk about coal as if it were a scarce article. According to the Geological Survey we have 371,000,000,000 tons of coal in the State of Colorado. The yearly consumption of the entire world is only 1,250,000,000 tons. If you divide one into the other you will see that Colorado has enough coal to supply the world for 300 years. Wyoming has still more.

### INSPECTION AND GRADING OF GRAIN.

The VICE PRESIDENT. The morning hour having expired the Chair lays before the Senate the unfinished business, which is Senate bill 120.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Mr. MCCUMBER obtained the floor.

Mr. NELSON rose.

Mr. MYERS. Mr. President——

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Montana?

Mr. MCCUMBER. I yield to the Senator from Montana.

Mr. MYERS. I ask unanimous consent that the unfinished business be temporarily laid aside that we may dispose of the measure which has been before the Senate.

Mr. MCCUMBER. May I ask the Senator whether, in his opinion, there will be any great delay in the disposition of that measure? If we can vote right away upon it, I shall not object; but if it is to be the subject of considerable debate, as it appears to me it is, I should like to exercise my right and proceed with this bill.

Mr. MYERS. I will say that my judgment is that at the outside not more than 20 or 30 minutes should be consumed in the discussion of the measure. I myself will probably speak on it about three minutes—five minutes perhaps—simply to make a reply to some remarks by the Senator from Iowa [Mr. KENYON]. I can not conceive that any great time will be taken.

Mr. MCCUMBER. I am informed by Senators here who expect to debate it that it will take considerably longer than that time, and therefore I must object.

Mr. MYERS. I was laboring under a misapprehension, then.

Mr. NELSON. Mr. President——

The VICE PRESIDENT. Does the Senator from North Dakota yield to the Senator from Minnesota?

Mr. MCCUMBER. I yield.

Mr. NELSON. This bill which has now been laid before the Senate is a grain-inspection bill that revolutionizes the whole grain-inspection service of the country and practically destroys the grain-inspection system throughout the country. The Senator from North Dakota has called up this bill on three or four different days and made lengthy speeches on it. I think he knew I was not in favor of the bill. Last evening after the Senate had gone into executive session, when there were not as many Senators in the Chamber as there are here now, and when I had gone, the Senator moved to take up the bill and to make it the unfinished business.

Mr. President, I have aimed to attend the sessions of the Senate here as far as my committee work would allow me. As a rule when we go into executive session it has been the custom that we transact no legislative business after that, and if we are not interested in anything in the executive session we leave. Last evening I stayed here until the Senate had gone into executive session. There were only a few Senators here, not as many as are here now, and I left because there was nothing on the executive calendar that I was interested in. Lo and behold, this morning I find on looking over the RECORD that after the Senate had gone into executive session, whether it was done while the Senate was in executive session or not—it appears it was done in open session—the Senator from North Dakota [Mr. MCCUMBER] asked to take this bill from the calendar and to make it the unfinished business.

I submit, Mr. President, without criticizing anybody, that that is not exactly fair to the opponents of the bill. I have told the Senator from North Dakota that I intended to debate it, and I think that in all fairness to me when he aimed to take up the bill out of its order from the calendar and to make it the unfinished business he ought at all events to have given notice to me.

Therefore, in view of these facts, Mr. President, I move to reconsider the vote by which last evening the bill was taken from the calendar and made the unfinished business. I think I am entitled to have the motion prevail as a matter of fairness and justice to me.

Mr. MCCUMBER. Mr. President, I did not yield to the Senator from Minnesota to make a motion in this case. I had the floor and was recognized by the Chair. The Senator rose to address some remark to me and I yielded to him for that purpose. I decline to yield for a motion to be made while I have the floor.

Now, I want to answer the Senator from Minnesota. Does the Senator from Minnesota object to this bill being voted upon by the Senate of the United States?

Mr. NELSON. Not at all at this session, but I want our side to have an ample opportunity to discuss it.

Mr. MCCUMBER. Very well, Mr. President.

Mr. NELSON. Now, why did you make your motion to take it up in executive session?

Mr. MCCUMBER. The Senator will have the opportunity if he wants to discuss the bill. The Senator is not unaware of the methods that have been adopted to defeat this bill year

after year, nor is the Senator from North Dakota unaware of the methods employed in attempting to keep it from being heard. All that I have asked for 10 years is that the Senate shall voice its sentiment upon the bill. That is all I stated to the Senator from Minnesota. I have given notice, and that notice has been here upon the calendar for three weeks, that immediately after the disposition of Senate joint resolution No. 1 I would move to take up this bill for consideration, not for the purpose of rushing it beyond any opportunity for Senators to speak upon it. I am not in a hurry. I thought that 10 or 12 years gave some reasonable opportunity to discuss it. All I want is that I may put it in a position, and I gave the notice that I would put it in a position, where we could get an opportunity to discuss it.

Mr. REED. Mr. President——

Mr. McCUMBER. I expect to have it discussed. The Senator from Minnesota, as I have stated before, will have all the reasonable time that he may wish to take. All that I am asking for this bill is that it shall be voted upon at this session. Does the Senator want to deny me that privilege?

Mr. NELSON. Mr. President——

The PRESIDING OFFICER (Mr. HOLLIS in the chair). Does the Senator from North Dakota yield, and if so, to whom?

Mr. McCUMBER. I will yield to the Senator from Missouri.

Mr. REED. I wish to say to the Senator from North Dakota that I heard his notice that immediately after the disposition of Senate joint resolution No. 1 he would ask the Senate to proceed to the consideration of this bill, and that he would ask that it be made the unfinished business. I accordingly was here waiting for that motion to be made, and intended to resist it. I waited until the Senate went into executive session. I waited in the executive session until it became manifest to me that there was no business coming up except routine matters. Having been engaged largely during the day in a committee upon hearings, I stepped out of the Chamber, and I was not gone more than about 10 minutes when I heard the bell ring for an adjournment.

It is absolutely, I think, almost without precedent to ask for the legislative order of business to be determined in executive session. I was here waiting the very notice the Senator gave, namely, that he would ask to have this bill made the unfinished business, and I waited until the legislative session had been merged into the executive session.

Mr. McCUMBER. Mr. President, on the contrary, it has been one of the most customary things in the world when in executive session to carry out a notice as in legislative session I intended, in accordance with my notice, to make the motion as soon as Senate joint resolution No. 1 was voted upon. I sought the recognition of the Chair, but the Senator who moved the executive session obtained recognition before I did, and, of course, his motion was carried. I had no objection to that. I then took the very first opportunity possible to put this matter before the Senate.

Now, I have a right to ask the Senator this one question: There is no hurry about the matter of voting or the matter of an opportunity to be heard. Is the Senator willing that we should have a vote on this question? That is all I am seeking—not to hurry the matter, but that every Senator shall have all the reasonable opportunity he may ask to discuss the bill. But is the Senator willing that the Senate shall vote on it at this session? I am not willing that it shall be crowded out until it becomes necessary to consider other important bills, and, therefore, I want a decision of the question; I want a reasonable time fixed in the future for a vote.

Mr. REED. Mr. President, I regard this bill as an utterly vicious piece of proposed legislation, without warrant or justification, revolutionary in its character, and that it ought to be beaten. When I regard a piece of legislation that way I feel that I am perfectly warranted in insisting that it shall be brought forward in the ordinary way and not come in to the exclusion of other business, and take precedence of other business, by being placed upon the legislative program in executive session at a time when nobody expects it, when the probabilities are it could not have been placed upon the legislative program as unfinished business if it had been brought up in the ordinary way.

Mr. GRONNA. Mr. President——

Mr. McCUMBER. I yield to my colleague.

Mr. GRONNA. With the permission of my colleague, I wish to say to the Senator from Missouri that this was not the only business transacted by the Senate as in legislative session after the doors were closed. There was other business transacted. This bill has been before Congress for more than 10 years, and it has been considered as a most vicious piece of legislation by the chambers of commerce and by the boards of trade of the large cities of our country. On the other hand, thousands of farmers have petitioned that this bill or a similar bill be taken up and at least considered and voted on, and I believe that the thousands of American farmers are entitled to be heard as much as the few boards of trade and chambers of commerce that exist in our country.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield further to the Senator from Missouri?

Mr. McCUMBER. I yield.

Mr. REED. There are always self-appointed representatives of the American farmer. Every time a man opposes any measure, no matter upon what ground, they immediately mount upon their throne of virtue and proclaim themselves the mouthpiece of the downtrodden farmer and hold themselves up to the general glorification of themselves; and they generally intimate that everybody who is against them is attached to some very wicked and sinister influence.

The fact of the matter is the Senator who has just spoken no more holds a brief to represent the farming community than I do or than other Senators do, and he has no more right to intimate that those who oppose this bill are doing it in the interest of boards of trade than I would have to attribute to him some evil or sinister motive, which I do not do, because I know it does not exist.

The fact is there is a difference of opinion between the Senator and myself with reference to this proposition. The question is whether it is the proper thing for the Federal Government to go into the respective States of the Union and displace their local officers and their local inspection and centralize it down here in the city of Washington. That is not a question upon which the farmers are arrayed on one side and the boards of trade upon the other. The Senator ought not to have made the argument he did.

Mr. GRONNA. Mr. President, if my colleague will allow me——

The PRESIDING OFFICER. Does the Senator from North Dakota yield further to his colleague?

Mr. McCUMBER. I yield.

Mr. GRONNA. I wish to ask the Senator from Missouri if he knows of anyone engaged in any other business except the chambers of commerce and boards of trade who have opposed this bill?

Mr. REED. Yes; and I shall make it perfectly manifest when we come to debate the bill.

Mr. GRONNA. I will be very glad to hear the Senator on that point.

Mr. MARTINE of New Jersey. Mr. President, I should like to say, if the Senator from North Dakota will permit me——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from New Jersey?

Mr. McCUMBER. I yield.

Mr. MARTINE of New Jersey. I should like to say that I am opposed to the bill unqualifiedly, and I have been opposed to it since the question was first up. I am not a member of any board of trade or chamber of commerce, but I can see no good in the measure but great evil. Senators speak of evil influences. There is some strange influence at work here in Washington. One day the first of the week two gentlemen accosted me on F Street. I did not know them, but they seemed to know me. They said that they hoped I was for what they called Senator MYERS's bill. I said, "I am generally for Senator MYERS, I am a great admirer and friend of him, but," I asked, "to what bill do you refer?" One of the gentlemen said he referred to the bill providing for the sale of coal lands. I said, "No; unqualifiedly no; I am opposed to the bill."

Mr. WEST. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Georgia?

Mr. McCUMBER. I yield.

Mr. WEST. I think the Senator from New Jersey is talking on a subject that is not pending now.

Mr. MARTINE of New Jersey. I think it is entirely germane.

Mr. WEST. It is the grain bill that is up, and not the coal bill.

Mr. MARTINE of New Jersey. What I am discussing now refers to coal and not grain, but grain would do as well. We must have coal to keep the human body warm, but I want to say that it is taking a most dangerous step. I think it is contrary to the public welfare and to public policy. I helped the Senator from Montana [Mr. WALSH] yesterday when he spoke of public lands acquired by dummy entrymen, as he termed it. I want to ask whether dummy interests may not prevail in this particular case.

I want to say further that I am opposed to the leasing or the selling of public coal lands. I want to have the Government operate the coal mines for the benefit of the people. I know it is a heresy to most of you, but many things that were denounced a few years ago we to-day swallow with the greatest avidity.

I heard the Senator from Colorado [Mr. SHAFROTH] say that we have coal enough for 100 years. What do a hundred years amount to in the supply of coal for a great nation? We are not going to live for a day; we know we will live very much longer than a day as a nation.

I feel that this is a most extraordinary step, and I shall oppose it with all the ability and zest I have. It is dangerous in policy and unwise. The whole public mind is to-day agitated upon the question of the conservation of the great necessities of nature. I feel justified in pursuing any legitimate policy to defeat bills of this kind.

Mr. McCUMBER. Mr. President, the Senator from New Jersey is like a great many other Senators upon this question. They do not consider the bill and the provisions of the bill before the Senate, but immediately branch off to something that is not in the bill or related to it in any degree whatever.

Mr. MARTINE of New Jersey. If the Senator will permit me——

Mr. McCUMBER. I wish to bring this bill before the Senate for consideration, not some other bill.

Mr. MARTINE of New Jersey. I have read the bill, and I thought I understood it. I may not view it through the lens of the Senator, but I view it through the lens of a common-sense layman. I believe it will be a disaster, and I oppose it. I believe there are interests behind the bill that make it dangerous.

Mr. McCUMBER. May I ask the Senator from New Jersey what bill he refers to?

Mr. MARTINE of New Jersey. I am referring to the bill presented by the Senator from Montana [Mr. MYERS]. I can not recall the number of it.

Mr. McCUMBER. That is the coal bill, and I want to inform the Senator that his lucid argument upon the coal bill has nothing to do with the grain-inspection bill that I am discussing.

Mr. MARTINE of New Jersey. I was not aware that the Senator had started on that tack, but whatever I have said I do not recall. As far as I have gone into the Senator from North Dakota's grain bill, I have expressed myself just as positively in opposition to that measure.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Missouri?

Mr. McCUMBER. Not yet.

The PRESIDING OFFICER. The Senator from North Dakota declines to yield.

Mr. McCUMBER. I will yield in just a minute. I have no doubt, Mr. President, that the Senator will express his opposition without reading the bill, just the same as he has expressed it here; but I have been trying to get an intelligent discussion of the merits of the bill. I have not been able to hold the attention of many upon the other side of the Chamber, and I am not surprised that the Senator from New Jersey has not the slightest idea about what is the bill I have before the Senate and that he goes off on a tangent to some other bill to which he has objection. In view of his statement, I have no doubt that, without any consideration whatever, he will be equally opposed to this bill.

Mr. MARTINE of New Jersey. I want to say I heard a portion of the Senator's argument—in fact, all the argument previous to to-day—on the grain bill; so I am not talking utterly unadvised.

Mr. McCUMBER. If the Senator found any close relation between the grain bill and the bill of the Senator from Montana [Mr. MYERS] for leasing coal lands, I confess I can not see the connection.

Mr. MARTINE of New Jersey. I do not claim that there is any relation at all.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Missouri?

Mr. McCUMBER. I yield for a question.

Mr. REED. The error of the Senator from New Jersey in not understanding that we were discussing the grain bill is very natural, because he probably did as the rest of us—remained at the session yesterday until the executive session was almost over and——

Mr. McCUMBER. Mr. President, I refuse to yield. I yielded to the Senator for a question, if he desires to ask me.

Mr. REED. It was a general yielding.

Mr. McCUMBER. If the Senator wants to discuss some other bill, I confess——

Mr. REED. I was not discussing another bill. I am saying that the mistake of the Senator from New Jersey was very natural. The Senator evidently——

Mr. McCUMBER. Mr. President, I decline to yield for any purpose except for a question upon this grain bill.

The PRESIDING OFFICER. The Senator from North Dakota has the floor and declines to yield.

Mr. REED. May I make an inquiry? The Senator from North Dakota has taken a week's time in discussing the bill. I should like to ask if he intends to discuss it further, and if so, how long, because I have a committee meeting that I want to attend.

Mr. McCUMBER. Mr. President——

Mr. POINDEXTER. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota care to answer the question of the Senator from Missouri?

Mr. McCUMBER. Yes, Mr. President; I will answer it. I will discuss the bill just as long as the Senate want to discuss it, and not any longer; and if they will vote on it to-day, or to-morrow, or a week from to-day, or a month from to-day, and I am sure I will get a vote on it, I will be satisfied. I yield to the Senator from Washington.

Mr. POINDEXTER. I only want to take advantage of the opportunity to add to the excellent speech which the Senator from New Jersey has just made upon the coal bill; that while made under a misapprehension as to what is pending before the Senate, I indorse what he has said about the coal bill, and I am very glad that he had this opportunity of opposing that bill. I do not agree with him as to the grain bill. I am in favor of that measure.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from New Hampshire?

Mr. McCUMBER. I yield, Mr. President.

Mr. GALLINGER. Just a moment, Mr. President. I am not going to enter into a discussion of the grain bill, nor how it got on the calendar as unfinished business; I will let others take care of that; but I rise to say that I think we are falling into a bad habit in the Senate, inasmuch as Senators seem to think because they give a notice that at some time they will call up a bill it gives them some prior right. A week ago there were three notices on the calendar at the same time stating that at the conclusion of a certain matter which was before the Senate the Senators giving the notices would call up certain bills. Now, as a matter of courtesy that may have some potency, but under the rules of the Senate it does not give a Senator any prior right; he has to get recognition in the usual form.

Mr. McCUMBER. The Senator has indulged in that method many times himself, and for a very good reason.

Mr. GALLINGER. The Senator never did indulge in it. I never gave a notice of that kind during my long term of service.

Mr. McCUMBER. I think the Senator has given notice when he would address the Senate on a certain subject.

Mr. GALLINGER. That is not what I mean.

Mr. McCUMBER. It is exactly the same.

Mr. GALLINGER. Even in that case I think the Senator would have to search the RECORD a long time to find that I gave any such notice. What I mean to say is that Senators seem to think a notice gives them a right to proceed to the consideration of a bill not merely for discussion. That I want to put in the RECORD as being, I think, a bad habit.

Mr. McCUMBER. I do not think there is a single Senator who has any such idea, but there are Senators who desire to know when a matter is liable to be called up and discussed, and this method of notifying Senators, I say, has been indulged in, and for a very proper reason, in my opinion.

Now, I want to answer briefly the proposition of the Senator from Minnesota [Mr. NELSON].

First, I want to say in all candor to the Senator from Minnesota, all I ask of the Senator and all other Senators is that they will allow this bill to be voted upon. The Senator can have his own time, fix his own date at which he desires to speak upon the bill, and in a reasonable time I will gladly——

Mr. NELSON. Does the Senator address his remarks to me? Will he let me reply?

Mr. McCUMBER. I certainly will let the Senator reply.

Mr. NELSON. What I want to say to the Senator is that under the conditions we have been working here, at the close of an afternoon session, when we have finished our legislative work and go into executive session, unless Senators have something they are vitally interested in, as a rule we go home. I

do not think, with all due respect to the Senator from North Dakota, knowing my attitude in this matter and knowing that the Chamber was almost deserted, when there were not as many present as there are now, he called up this important bill at that time and had it made the unfinished business, when in all fairness he ought to have told me that he was going to do that in executive session. He failed to do it, and I insist that this question goes to the good faith and integrity of legislative proceedings. If this system is to prevail, we will never be safe about anything. We would have to stay here at all times, whether we are on a committee or not, being liable to have snap judgment taken upon us at any moment. I submit that for the integrity of our legislative proceedings and for the benefit of all Senators who have public business to attend to such a practice ought not to be tolerated for a moment.

Mr. SHERMAN. Mr. President——

Mr. McCUMBER. I will yield in just a moment. Mr. President, when any Senator puts himself in an attitude where he purposes to prevent the Senate from having an opportunity to pass upon legislation he must expect that the other Senator who desires the legislation shall put himself in an attitude where he will get a hearing whenever it is possible to get it. For 10 long years I have asked the Senate to vote upon this question. It has been reported out of the Committee on Agriculture and Forestry favorably. It has been reported upon the continuous demand of the great agricultural sections of the country. Opposing that demand have been a few of the great grain buyers at the great grain centers. Their position is not that they are willing to have this discussed and have it voted on, but to prevent consideration if possible. We have been more than fair to them.

Mr. NELSON. Does the Senator mean to intimate that that has been my attitude?

Mr. McCUMBER. If the Senator wants my opinion, I will say the Senator only the other day stated that all he desired was to have an opportunity to prepare such an address as he might want to make upon the matter.

Mr. NELSON. Yes; and under such conditions as the Senator from North Dakota made his address.

Mr. McCUMBER. And that opportunity will be granted, so far as I am concerned. The Senator need not have any fear but that he will have all the time and all the opportunity he wants in this matter. The Senate may vote me down, but they will have this matter before them as often as I can bring it before the Senate until I can get a vote upon it.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. I yield to the Senator from Illinois.

Mr. SHERMAN. I do not wish to argue the merits of this bill nor to oppose, in due course, the parliamentary procedure that may ultimately result in a roll call on it. What I wish to inquire is, when we go into executive session late in the evening, adjourning, say, at 5.35 o'clock, if it has not been the uniform course of procedure to adjourn without transacting any legislative business after we come out of executive session?

The PRESIDING OFFICER. If the Senator addresses the Chair——

Mr. SHERMAN. I was making that inquiry of the Senator from North Dakota.

Mr. McCUMBER. I will answer the inquiry.

Mr. SHERMAN. That is the complete interrogatory.

Mr. McCUMBER. Mr. President, the answer to that inquiry is, that after we have gone into executive session we may either go back into legislative session immediately, when a motion can be made or a motion may be made as if in legislative session, without the formality of again returning to legislative session and opening the doors, and then adjourn. That has been the custom.

Mr. SHERMAN. The question which I wish to obtain information on has not been wholly answered. It was whether at a late hour in the evening it has not been the uniform practice for the Senate to adjourn for that legislative day?

Mr. McCUMBER. It has been the uniform practice of the Senate to adjourn when it got ready to adjourn.

Mr. SHERMAN. Then I wish to say, Mr. President, that it ought to be the uniform practice to consider this bill when the Senate gets ready to consider it, and not as it may be farmed out to us by the Senator from North Dakota.

I regard it, Mr. President, as a course of procedure which, if persisted in, will in time lead to the abolition of the method of doing business in the Senate. The method of transacting business by unanimous consent, by such practices as this, will ultimately become a pitfall rather than a proper parliamentary procedure. A few more such efforts as this will tend to impeach the ordinary method that prevails here, notwithstanding whatever fixed parliamentary right may exist. It goes to the point of whether the Senator from Minnesota [Mr. NELSON] and others were not justified in believing that no other legislative business would be transacted after the completion of the executive session yesterday. I do not know how many were here. I was here until the close of the executive session, but at the isolated point where I am stationed I can not always ascertain, unless I have telephonic connection, just what has occurred.

I am very much opposed to the passage of this bill, and expect to vote against it on its merits. I am not opposed to its consideration and to a roll call upon it in due course of parliamentary business. I do not wish to state now that I am favorable to the suppression of the bill, to its burial under a mass of business here toward the close of the session that will result in never reaching a roll call upon it, but under the conditions that presented themselves last night I find this record made up:

> Mr. McCUMBER. I move that the Senate proceed to the consideration of the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.
>
> The VICE PRESIDENT. The Senator from North Dakota moves that the Senate proceed to the consideration of the bill named by him. Is there objection? The Chair hears none.
>
> The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 120) to provide for the inspection and grading of grain entering into interstate commerce, and to secure uniformity in standards and classification of grain, and for other purposes.

Then the Senator from North Dakota asked that the bill be temporarily laid aside, and it was so ordered by the Chair.

Then the other Senator from North Dakota [Mr. GRONNA] moved that the Senate adjourn. Whether there was a quorum here, of course, will never satisfactorily appear, whether there was anybody here but the two Senators from North Dakota does not appear.

I am not attacking the motives of the Senator from North Dakota, who is in charge of this bill. I only believe that, in his anxiety, he sought to have it made the unfinished business, so that he might ultimately have a roll call upon it; but I am stating that in view of the uniform procedure that has prevailed here in the short time that I have been a Member, if such practices are to be indulged in, I serve notice here and now that I am ready to vote for a radical change in the rules governing the transaction of the business of the Senate. I will join, some time in the near future, the Senator from Oklahoma [Mr. OWEN] in applying some drastic provisions under which we shall transact business as it is done in larger parliamentary bodies. We have followed these practices, Mr. President, uniformly, without anyone being misled. I do not feel that sense of indignation—I have not that right probably—so much as does the Senator from Minnesota [Mr. NELSON].

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER. Does the Senator from Illinois yield to the junior Senator from North Dakota?

Mr. SHERMAN. With the permission of the Senator's colleague, I yield to him.

Mr. GRONNA. I want to remind the Senator from Illinois, with the permission of my colleague, that, as I understand the change which the Senator from Oklahoma [Mr. OWEN] proposes to make in the rules, is to hasten legislation and not to defeat it.

Mr. SHERMAN. That is one change. It is to prevent perpetual talk or perpetual conversation; that is the way I should describe it if I were an unprejudiced observer outside of the body. I have not been in sympathy with that heretofore.

The motion to adjourn was agreed to at 5 o'clock and 35 minutes p. m. The RECORD says:

> After 10 minutes spent in executive session the doors were reopened.

That would indicate that we went into executive session about 5.25, remaining in session until about 5.30 or adjourning very nearly at 5.35; for, I presume, from the condition in which the RECORD is, that there were no untoward laggards trending on the heels of Father Time when this motion was made after the executive session had dissolved. I do not suppose that it took over half a minute to make this record. So, at the late hour of 5.35 o'clock p. m., Mr. President, it seems to me that Senators might all fairly presume, as did the Senator from Minnesota, that the business of the day had been completed.

I am not objecting and I shall not object to the consideration of the bill at some time so as to reach a roll call upon it, but I do object to the methods by which it was made the unfinished business; and I will state here that I regard it as a gross breach of faith from an unprejudiced layman's standpoint.

Mr. STERLING. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from South Dakota?

Mr. McCUMBER. In a minute I will do so, Mr. President, but not until I have answered the Senator from Illinois [Mr. SHERMAN].

I think that I am as well acquainted with the courtesy that is due the Senate and due Senators as is the Senator from Illinois. I know that I represent only an agricultural community; I know that the farmers, as a rule, do not take that quick and active participation in these matters that can be taken by an organized board of trade, but they have their rights, and they ought to have those rights passed upon by the Senate of the United States. They have been appealing for 10 long years that the Senate give an expression of its sentiment upon a bill that has been indorsed favorably by every farmers' organization throughout the United States. The farmers can not reach this body as quickly as can the boards of trade; they are not adepts in presenting their side of the question; but they know when they are robbed; they know when they are not treated fairly; and while I always labor under a great disadvantage, representing, as I do, an unorganized farming community as against the great organizations throughout the Union, I shall not allow my zeal to flag in their behalf as the result of any attempt on the part of those who oppose a measure which I know to be in the farmers' interests, and which they are demanding, but which it is sought to keep the Senate from voting upon. If this bill is vicious, according to the view of any Senator, then, for heaven's sake, let him record his vote against it.

The Senator from Illinois can not accuse me of being overanxious in presenting this bill when I have had it here for 10 years without being able to secure a vote upon it. I had charge of the national pure-food bill in this body and succeeded in putting it through some years ago. It took me five long years before I was able to get a vote upon it in the Senate, though when I did secure a vote there were only 3 votes against it.

Why did it take that long time to secure a vote upon that measure? The people wanted pure-food legislation; they were in favor of it; but a great many manufacturing establishments were not in favor of it, and they were strong enough to so control the action of the Senate that one appropriation bill after another would be crowded in to keep that bill out of the way, and every method known to parliamentary practice was indulged in that we might not secure a vote upon it. We finally did get a vote upon it, but it was only after we had persistently, and by the same methods that I am now adopting, insisted that the Senate should vote upon it.

Mr. President, what is there about this bill that so frightens these boards of trade? This bill provides for Government standardization of grades. Every one of those boards of trade now has come over to it, though a few years ago every one of them resolved against it as being vicious and as interfering with the rights of the citizen. I repeat, every one of them to-day has come over in favor of Federal standardization of grades, and they have adopted resolutions and formulated a bill, which was introduced in the Senate the other day and had already been introduced in the other House. They agree with me, therefore, in what I have been contending for, namely, the establishment of uniformity of grades under a Federal standard.

Now, wherein do we disagree? I insist not only that we should have a Federal standard, but that Federal officers, and not employees of the boards of trade, should do the inspecting. There is the only point on which we to-day differ. I say that when the boards of trade use their own employees for the purpose of inspecting grain their employees are subject to their control and every doubt is resolved in favor of the members of the exchanges; that they adopt a rigid or a loose system of inspection, as may suit their purposes; and that under that method the boards are able to manipulate grades and are able to make and to break markets overnight by a change of grade or a change of system. They can not do this as easily under State inspection as they can under board of trade inspection; but remember that there are only four States, I believe, which have State inspection to-day.

Mr. NELSON. The Senator is mistaken as to that.

Mr. McCUMBER. Perhaps there are more. I say there are only about four States; there may be five or six; but most of the inspecting is now done under boards of trade or chambers of commerce.

Mr. President, I insist that the Federal Government shall take over the same men now employed on this work in Chicago, the same men now employed in Minneapolis and in Duluth, the same men now employed in Baltimore, put them under the civil-service law, and say to them, "Grade this grain according to our standards and according to our system."

Having agreed upon the standards by the consent of the boards of trade, there is left only the one matter of taking over the employees of the several boards of trade, putting them under the civil-service law, and allowing them to go ahead and make the inspection. That should not constitute a valid objection in the mind of any man who wants honest grading and who is not afraid of a Government certificate. It seems to me that only those who want to control the men who make the inspection should object to the inspection being put under Government control.

Mr. REED, Mr. GRONNA, and Mr. SHERMAN addressed the Chair.

The PRESIDING OFFICER. Does the Senator from North Dakota yield, and to whom?

Mr. McCUMBER. I yield to the Senator from Missouri, if he wants to ask me a question.

Mr. REED. Yes.

The PRESIDING OFFICER. The Senator from North Dakota yields for a question.

Mr. REED. Will not the Senator from North Dakota yield the floor, so that the Senator from Minnesota may make the motion he tried to make nearly an hour ago, and let us settle whether or not this bill is really before the Senate? The argument on the merits of the measure can be proceeded with at some other time. The Senator from North Dakota has occupied nearly a week in discussing this bill, and it seems to me the question we ought to determine now is whether this bill is really and rightfully before the Senate. The Senator from Minnesota rose to make a motion to reconsider the vote whereby the bill was made the unfinished business, and it seems to me the Senator from North Dakota ought to permit us to vote on that motion.

My reason for the suggestion is this: I happen to be the chairman of a subcommittee that is hearing a very important matter in a committee room upstairs, attorneys are in attendance on that committee, and my presence is desired there; but I also want to be present when we determine the question whether or not this matter is to be before the Senate, and it seems to me the Senator might permit us to have a vote upon it.

Mr. McCUMBER. No, Mr. President. If the Senator from Minnesota or any other Senator on this floor says he is not ready to go on with this matter to-day, that he does not want to go on until next week, I am perfectly willing and ready to meet his views. If any Senator says that he wants this bill to be laid aside in order that he may be able to present his views on it, I have no objection to having it laid aside for that purpose.

Mr. SHERMAN. Mr. President——

Mr. McCUMBER. Just a moment. When I yield I am going to yield first to the Senator from South Dakota [Mr. STERLING], because he asked me to yield some time ago.

So, Mr. President, those who want this matter before the Senate, those who are willing to have it voted on by the Senate, do not need to drive it out of the Senate again in order that they may have an opportunity to prepare themselves for the debate, because they will have no difficulty, so far as I am concerned, in having a full opportunity to discuss this bill. I do not think any Senator can say that I have ever taken advantage of a Senator who desired to speak upon a bill of which I had charge or that he could not have all the time that he desired to occupy on it. I want this bill the unfinished business, so that at some time during the session, before we get loaded up with the trust bills and the appropriation bills, we can pass upon it.

I now yield to the Senator from South Dakota.

Mr. STERLING. Mr. President, I merely desire to say that I am interested in this bill, and I have been interested in all the proceedings pertaining to the bill. As to the motive or design of the Senator from North Dakota in bringing up the matter last evening in executive session, I can not help but think that he was actuated by the best of motives and that he acted in perfect good faith. We all know how long he has labored in the interest of this legislation and what he has done during the present session, and I can not help but think that his only desire was that the bill might take its place as the unfinished business without any design to take advantage of anybody.

Mr. President, I myself hope to occupy a little of the time of the Senate in the discussion of this bill, and I have had occasion to confer with the Senator from North Dakota in regard to it and in regard to those who were expected to speak upon it. He has given me the names of Senators whom he thought would speak in opposition to the bill, and from that I know that there was no desire on his part to take advantage of anybody, but that he expected every Senator who had anything to say upon the bill, either in favor of it or against it, to have a full opportunity to be heard. As I have said, I think there was no desire on the part of the Senator to take advantage of anyone.

Mr. GRONNA and Mr. REED addressed the Chair.

The PRESIDING OFFICER. Does the Senator from North Dakota yield, and to whom?

Mr. McCUMBER. I yield to my colleague.

Mr. GRONNA. Mr. President, in addition to what has been said by the Senator from South Dakota [Mr. STERLING], I wish to remind the Senator from Illinois [Mr. SHERMAN] that my colleague said on this floor a few days ago, in the hearing of the Senator from Illinois, that he would take advantage of every opportunity honorably within his power to press this bill to a vote, and he has done nothing more than that.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. I yield, Mr. President.

Mr. SHERMAN. Mr. President, I refuse to be drawn into a controversy on the merits of this bill. I assume that at some period in the parliamentary lifetime of some of the Senators here it will be reached and that we can discuss it. What I want to know is whether this method of business shall prevail in the Senate? I am beginning to have it dawn on me that Senators have certain rights that afford a basis for making trouble, and if we are going to transact business strictly in a parliamentary way, I want to discover it. I think I can probably put myself in a position where I can be protected.

Mr. McCUMBER. Mr. President, the matter is before the Senate at present on its merits. The Senator has made that statement before. The Senator will have full opportunity to discuss this bill, even if it should remain the unfinished business. Ah, Mr. President and Senators, we are not blind. It is the desire that we do not get to a vote upon this proposition. The Senator from Missouri [Mr. REED] spoke accurately and with his usual candor when he stated, in substance at least, that he was justified in adopting any method of defeating this bill even to the extent of preventing its being brought before the Senate. Of course that is one method of defeating a measure; and if the Senator thinks that the bill is vicious, that a majority of the Senate can not see the viciousness of it, and therefore it is necessary to prevent its being brought before them, of course his position is perfectly tenable; but if the Senator agrees that the Senate ought to have judgment enough to know what is right and what is wrong, then at some time during the parliamentary life of the Members present, as expressed by the Senator from Illinois, we ought to get a vote upon the bill; and that is all I am going to ask for. I am willing to fix the date to vote at any time in April and allow the bill to be laid aside until that time, if Senators so wish, or to postpone the date to any other time Senators may desire, if they will give me an assurance that I may have a vote upon it.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Missouri?

Mr. McCUMBER. I yield, Mr. President, for a question.

Mr. REED. If the Senator, having made some personal remarks about me, will only yield for a question—and he seems to limit all his yielding to me for a question—I will take the floor in my own right when he gets through, if the Senator ever gets through.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. In a moment. The Senator from Missouri will not be deprived, of course, of his right to discuss the bill. The Senator has stated that in furtherance of his desire to prevent a vote upon this bill he would use such parliamentary tactics as he may think best. I am not criticizing him. On the contrary, I agree that it would be very appropriate for him to follow the line indicated in his statement a short time ago if he believes that the measure is so vicious. For my part I can not believe that a bill which has only one purpose in view, namely, to bring about the honest grading of grain and the certainty of grades so as to inspire confidence in the public can be a very vicious measure.

Mr. President, the Senator from Minnesota [Mr. NELSON] seems to think that this will change, undo, and destroy everything connected with the present system of inspection. On the contrary, I have adopted in this bill the methods of inspection provided by the Minnesota law as to the arrival of cars and the inspection. The only difference on the face of the earth between the method proposed by the bill and the method now in vogue in the State of Minnesota would be that the inspectors would be under Federal control; that they would be compelled to stand an examination; that they would not be employed by any board in any State, but would be employed by the Government itself. I can not believe that that is going to injure any legitimate business.

We have had before us the complaints of the cotton growers. I could not help observing that they have been suffering exactly the same as the grain growers, and that the manufacturer of cotton has been suffering because of the lack of reliability in the grades of cotton exactly the same as the miller has suffered because of the lack of reliability in the grades of wheat. Anything that will cure that evil will be beneficial; and if, instead of opposing this measure, Senators would endeavor to frame a measure which would be acceptable to everyone, or at least against which no legitimate objection could be made, I think we would have very little difficulty in getting a satisfactory bill.

Furthermore, Mr. President, as those who a few years ago opposed pure-food legislation now with one accord support it, so I believe that all the boards of trade which now oppose Federal inspection and standardization of grain and cotton will, after it has been in operation a single year, be just as strong supporters of it as those who were opposed to the pure-food measure are to-day supporters of that measure.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. I yield, Mr. President.

Mr. SHERMAN. Mr. President, the Senator can not at this time induce any of us who are opposed to this specific bill—Senate bill 120—to enter into the general discussion which would be opened by the remarks of the Senator from North Dakota.

Mr. McCUMBER. I am not asking it at all.

Mr. SHERMAN. This is not a fit time. If the time were opportune, I would advert to the fact that the bill providing for cotton grades, to which the Senator alludes, simply provides for a standardizing of the cotton going upon the market of this country. It does not provide for an inspection. There is not a similarity between Senate bill 120 and the cotton-grading or standardization measure. There is a similarity between the bill providing standards of cotton and the bill introduced by Mr. LEVER in the House, because that bill provides for supervision and standardization.

If the Senator from North Dakota is anxious that we shall meet upon some common ground where legislative action may be had favorable to standardization, I am satisfied that that can be attained; but that is a matter for discussion hereafter. What I more particularly wish to advert to is the remark of the Senator in reply to the Senator from Missouri, the Senator from Minnesota, and others, that we represent no producing area. I think that is a manifest error. In the case of two of the great staple grains grown in North America, corn and oats, the production of the area which I have the honor in part to represent, even in the bad crop year of 1913, exceeded the production of any other State of the Union.

We have the good fortune to be situated as the Senator from Minnesota is, in that he has for one of the principal grains of Minnesota both the production area and the primary market for the grain inside of the same State. We have that good fortune in our State because of the existence of facilities, both in transportation, in warehousing, and in the large grain exchange, to supplement the efforts of the producers of that State—in other words, the farmers.

I hope I am not in that narrow position here which perhaps in part is intimated—although I would be quick to withdraw any such imputation if it were not true—that the Senators who object to Senate bill 120 represent only boards of trade and grain exchanges throughout the country. I beg to say that I do not believe any Senator who is objecting to this bill is representing any such narrow constituency. If we do represent any of the interests of the boards of trade or the grain exchanges, it is only as they are necessarily interwoven with the market and the fortunes of the entire State.

It is an implied indictment of the motives of Senators to say that for 10 years no roll call could be had upon a bill of this character. I do not wish to be made a victim of what has occurred here in years past. What I wish now is that this bill shall take the ordinary course. I was not here during the last 10 years, during which the Senator has been engaged in the strife in which he has very ably represented and given so much of his effort to this proposed legislation. I am not responsible for that.

Mr. McCUMBER. No, Mr. President; and I hope the Senator will not be responsible for further delay. I hope he will assist us in securing a vote, acknowledging that the Senate has not done justice to the farming communities of the country in not allowing them at least to have a vote upon their measure. I ask the Senator to join me at least in getting a vote upon the

question. I am glad the Senator and I have gotten thus close together.

A short time ago there was not a board of trade in the United States that did not condemn standardization just as strongly as it condemned the other matter. Now they are all in favor of standardization, and I am in favor of it. Thus far they have come over to one proposition in my bill, for which I have been contending for a long time. I want them to come over to the other proposition, which will insure beyond peradventure an honest and an efficient and a conscientious grading of grain. That is all that I am going to ask them to do, and my bill provides for that. I am certain that we can accomplish that, and I am morally certain that honesty of grade and efficiency of grading can not harm any industry.

Mr. SHERMAN. Mr. President——

Mr. McCUMBER. I yield to the Senator.

Mr. SHERMAN. What I wish is not to prevent the timely consideration of this bill, or a vote upon it at an opportune time before final adjournment. What I wish is a good deal like what our ancestors had in their minds when they threw the tea into Boston Harbor. It is that this bill shall go back where it belongs, and that whatever parliamentary rights I have here to oppose the bill may be preserved.

I will say that I will join the Senator from North Dakota in considering the bill in opportune time; but my parliamentary rights to have the bill returned to its former status ought to be preserved, so that I may receive the opportunity to oppose it as a right, and not as a matter of grace, to be farmed out, I repeat, by the Senator from North Dakota.

Mr. McCUMBER. Ah, Mr. President, the Senator can not suffer anything by reason of the bill lying upon the calendar, to be voted upon when he gets ready to make his speech and vote upon it. It is not harming the Senator; it is harming no one else who is willing to have a vote upon it, with my assurance—and I could not make it different if I wanted to—that the bill can not be brought up or any vote had on it until all Senators are through speaking upon it. I state again, however—and in that I ought to have the cooperation of the opponents as well as the supporters of the bill—that we ought to be sure to vote upon it during this session, before we get so congested with the appropriation bills that we will be compelled to lay it aside to take up other bills.

Mr. President, there is no accusation that those who oppose this bill represent boards of trade and do not represent a farming constituency. I know of no greater farming constituency in the country than that represented by the Senators from Minnesota and the Senators from Illinois; but I have petitions from the farmers' elevator companies of those States, and I have them from the farmers' organizations of those States, everywhere the same petition, that we have a vote upon this bill, and stating that they favor it.

Within the last hour I have had laid upon my desk a letter from the Senator's State, which I will read to him. It comes from the farming section. I have already read at length the resolutions from the farmers' organizations of the State of Illinois and from the independent elevator companies of the State of Illinois, all of them pleading and calling for the enactment of this measure. Therefore, when I read this letter from one of the Senator's own constituents, I am but adding one little letter to the volume of testimony that I have already introduced.

This letter is dated Princeton, Ill., March 17, 1914:

Senator McCUMBER, *Washington, D. C.*

DEAR SIR: I notice in the Chicago Tribune that you and Senator SHERMAN do not agree on the subject of grain inspection. At a recent meeting of the stockholders of the Farmers' Elevator Co., at Kasbeer, Ill., the subject received some attention. While I am not authorized to speak for the company, I am satisfied that it is the general opinion of the farmers in this locality that they suffer as much or more from improper grain inspection in Chicago than from almost any other one thing. That business should be taken out of State politics. Unless improvement in this is made, there will be concerted action by all of the farmers' elevators in the country for the better inspection.

I hope the measure before Congress will be so framed as to give this relief.

(Signed) A. W. HUSSEY.

That is but one of hundreds of letters that are coming to me daily upon this subject; and, as I say, I have failed to find a farmers' organization in the United States that has said one word against this proposition. There may be some that are satisfied with the State inspection. There may be others that are satisfied with the local board of trade or merchants' exchange method of inspection. We can not expect all to be unanimous upon any subject; but the record I made up, as the Senator says, through nearly two days of discussion, was made up of protests that have come from all over the United States, and upon a hearing had before the Committee on Agriculture and Forestry showing the iniquities of the present practices in these grain centers. I insist that we ought to have an opportunity to give the farmers a vote upon a subject in which they have been so much interested.

The legislature of my State and the Tri-State Grain Growers' Association of the States of Minnesota, North Dakota, and South Dakota have at almost every one of their annual meetings passed resolutions asking for the passage of this bill. All of the independent elevator companies have done so. I read to you the other day the statements made by the milling companies of the country, the Modern Miller, and other milling papers, showing that the milling interests of the country are looking for legislation of this kind. I am not speaking of the great milling interests; I speak generally of the little millers who have to buy their grain by grade.

In Minneapolis, for instance, where there are great milling interests, they can go and buy their grain by sample. They can look at it, and it is right there at their doors. They may not have any difficulty under the present system. The little dealers, however, the grocers down in the Southern States, who buy feed and buy a hundred other things in the line of grain, want to know, when they get a certificate of oats or hay or whatever it may be, that they are getting what they are paying out their money for.

It was asked by one of the Senators here, "Why not have inspection for potatoes, and coal, and turnips, and eggs, and cabbages?" Mr. President, the fact remains that wheat is sold by grade. Ninety-nine per cent of all of the wheat shipped at these great terminals is sold by the grade that is put upon it. That is the system under which it is done. The value of that grain is fixed by the grade. Therefore what little prosperity the farmer may have is dependent upon the proper grading of that grain. He believes that he will get a better grade; that there will be no loose and rigid inspection during different seasons of the year if the Government inspects it. He is not satisfied with the inspection that is made under the present system, and I am trying to give him the relief for which he is asking.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER (Mr. THOMAS in the chair). Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. I yield.

Mr. SHERMAN. I will go into this question at the proper time. I only wish to ask the Senator if he does not know that coal is bought and sold on grades?

Mr. McCUMBER. Certainly I know that there is some coal that is sold on grades.

Mr. SHERMAN. A very large volume, especially of soft coal, where there is the largest consumption in the United States, is bought and sold on grade. The fuel value, the carbon content, is tested. Nobody would insist, though, that there ought to be a United States grade established for coal.

Mr. McCUMBER. Mr. President, the Senator from North Dakota is insisting that there should be a United States grade for wheat, a standard for wheat. Wheat is sold that way; so it does not make any difference whether coal is or is not, or whether potatoes are or are not, or whether they should be. I am not asking for standardization for potatoes or peas or beans. Wheat under the present system is sold by grades. Corn is sold that way. Flaxseed is sold that way. Barley and oats are sold that way, as is also rye.

That is the custom, and it is the better custom. I do not need to go into that subject. I think it is necessary, with the immense quantities of grain that we handle under the present system, that it be handled by grades. The intercourse in grain demands that we should have a system of that kind. So, agreeing upon that, the only problem now is to get a grade that will be satisfactory to the producer and to the consumer of the grain. That is all there is in this question, and that is all I want to secure by this legislation.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. I yield.

Mr. SHERMAN. I should like to ask the Senator from North Dakota if he regards it as a probability that there might be some concessions made, or a settlement made, of the pending difficulties between the Lever bill and his own? I am not particularly attached to the Lever bill, except as it represents my idea of the standardization. I am opposed to the assumption by the General Government of the inspection systems of the various States of the Union. I am in favor of a standardization, so that the grain, when inspected, must comply with the standards fixed by the Department of Agriculture.

Mr. McCUMBER. Mr. President, we are already together on that. We both agree to that as it is. I do not care which bill

it is in. The only difference is that I want the Federal inspection, and the boards of trade do not want it, and the Senator from Illinois does not want it. The farmer does want it. The boards of trade do not want it. I want it. The Senator from Illinois does not want it, for the reason that he thinks it is not for the best interests of his constituency. All I want, then, is that the Senate shall vote upon that question. If it votes down the Senator from North Dakota upon that proposition, he will take his medicine, as the farmers will have to take theirs.

Mr. SHERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Illinois?

Mr. McCUMBER. I do.

Mr. SHERMAN. I decline to be put in a false attitude, as sought by the Senator from North Dakota.

Mr. McCUMBER. No; I do not seek to put the Senator in a false attitude. I want to disclaim that.

Mr. SHERMAN. I will adhere to the record. I think I remember it. If the Senator desires to modify his language, I shall be glad to have him do so. If not, I shall meet it at the proper time, but not here. He intimated, as he has already intimated and then retracted, that the Senators making objection to the process that was indulged in last night represent nothing but boards of trade and grain exchanges. I think it is my duty to represent the farmers, not only of my State but of the country at large, in a larger sense by far—the farmers as well as the exchanges and those who handle the grain.

Mr. McCUMBER. Mr. President, I represent only the farmers and that portion of the boards of trade who are not afraid of honest inspection. I will admit that my representation is of the farmer element. I know their condition. I know their needs. I know the injustices that they have been suffering in the handling of their grain; and I know that the great majority of those connected with the buying of grain at these great boards of trade are themselves in favor of Federal inspection.

Mr. President, I wish to quote right here from the hearings that were held on this bill, so that I may bring this declaration of mine right to the attention of the Senator. For years we have had the Agricultural Department investigating this subject, to get at the truth of the matter as to what the objections were, and who objected, upon the boards of trade. In the testimony that was taken in 1912 I have that of Mr. Scofield, of the Department of Agriculture, the party who has had the principal talks and correspondence with these boards of trade. I will quote but a single paragraph. He says:

> As I stated a short time ago, I believe any system of national inspection will affect the grain dealers most and will meet with their bitter opposition; but there is a thing to consider, I believe, and that is that you in this bill are attempting to devise what the great majority of farmers want, and at the same time what the great majority of grain dealers want—not a majority in point of influence, but a majority in point of numbers.

That is the finding of the Agricultural Department.

> The grain dealers, in other words, are struggling as hard as they can to get at the same thing which you are in this bill. There is a certain element of the grain trade, which in point of numbers is insignificant, but which in point of influence is very important, who do not desire and will not permit, if they can help it, any system of either uniform or national control.

That was the condition when we were having a hearing two years ago. Since that time, after they had been advised in their annual convention that if they did not come part way over and at least provide for Government standardization they would have to take the whole thing, and get both Government standardization and inspection, they have come over that far.

Mr. President, my colleague [Mr. GRONNA] has some remarks to make upon this bill. Before yielding to him, however, I wish to call attention to another error on the part of a great many of those who are engaged in buying and selling grain. There seems to be a feeling or an understanding of this bill that under it you will have to have grain inspected in every instance in which it passes from one State to another.

That is not the intent and purpose of the bill. The only purpose is that you shall have your inspection at the same places where it is inspected now, under either State control or the control of boards of trade. As I may now ship a carload of grain, as I say, from my place to any point in Minnesota outside of Duluth or Minneapolis and I will not have any inspection whatever, either State or otherwise, so if I should ship it after this bill became a law, I would have no inspection of that grain. I admit, however, that the bill may not be as clear upon that subject as it might be, and therefore I have prepared three amendments.

Another complaint is that a person receiving grain in any State where there was no grain inspector would be compelled to go and obtain an inspector there. That is not the intent of the bill. It covers nothing of that kind. It simply provides for Federal inspection at these great grain centers.

Mr. President, at this time I wish to move the following amendment——

Mr. NELSON. Mr. President, my motion is pending.

Mr. McCUMBER. Mr. President, I did not yield to the Senator for a motion, and he can not make a motion while I am making my argument.

Mr. NELSON. I made a motion to reconsider the vote by which this bill was taken from the calendar and made the unfinished business.

Mr. McCUMBER. I refused, Mr. President, to yield for that purpose; and having the floor, under the rule the Senator could not take me off the floor for that purpose.

The PRESIDING OFFICER. The Chair understands that when a Senator yields to another Senator he can not determine the course that Senator shall take.

Mr. McCUMBER. Yes; but I notified the Senator that I would not yield for the purpose of that motion.

Mr. NELSON. There was no such condition made at the time I asked the Senator to yield. It was made afterwards. The rules that prevail in the House of Representatives, where one Member can peddle out his time to another or state what time he will or will not yield, do not prevail in this body.

Mr. McCUMBER. Mr. President, the moment the Senator began to make that motion I notified him that I would not yield for the purpose of that motion.

The PRESIDING OFFICER. The Senator, however, had already yielded; and having yielded he could not prescribe the course of the Senator to whom the floor was yielded.

Mr. GRONNA. Mr. President, I make the point of order that the Senator from Minnesota can not make that motion. He did not vote for it, and he can not make the motion to reconsider.

Mr. NELSON. What is the point of order?

Mr. McCUMBER. The point of order is, the Senator not having voted for the motion he can not move to reconsider it.

The PRESIDING OFFICER. The Chair thinks the point of order is well taken.

Mr. NELSON. Mr. President, there was nobody here at that time, or scarcely anybody here, outside of a few Senators.

Mr. McCUMBER. The Senator has no right to say that if he was not here.

Mr. NELSON. I know, from Senators who were here, that there was not anybody here. I want to say, in this connection, another thing——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Minnesota?

Mr. McCUMBER. The Senator says he learned from Senators who were here that nobody was here. I can not quite understand his philosophy.

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Minnesota?

Mr. McCUMBER. No, Mr. President; I will not yield now.

I wish to say at this time that one of the Senators who is opposed to this bill is the Senator from Ohio [Mr. BURTON]. When I made the motion the Senator from Ohio [Mr. BURTON] was sitting in his seat behind me, close to my left, one seat back of me. So the Senator can not say that those who were opposed to the bill were absent from the Chamber, because the Senator from Ohio was here.

I wanted to make it clear and have the bill printed in that form before laying it aside. So I move to insert, on page 4, line 10, after the word "grain," the words "where an inspector is located at such place." This is to perfect the bill so that there can be no question as to its purpose.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 4 of the bill, line 10, after the word "grain" and the comma, insert "where an inspector is located at such place" and a comma.

Mr. McCUMBER. I ask for a vote on that amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. NELSON. Mr. President, I insist on my motion. This is a case where there is no way that you can tell who voted for or against a proposition. The rules in reference to that question can only apply in case there is a yea-and-nay vote.

Mr. McCUMBER. When the Senator says——

Mr. NELSON. And I want to say further in reference to this point that one day at the last session of Congress, when there were, I think, less than a dozen Senators present, a unanimous-consent agreement was asked to take a vote upon an important bill at a given date and it was given. There was a feeling that

an unconscious advantage had been taken of the Senate that day, and the Committee on Rules immediately reported an amendment to the rules, which was adopted by the Senate, requiring that when anyone should ask for a unanimous-consent agreement to take a vote on a bill upon a given date there must be a call of the Senate and the presence of a quorum ascertained before the proposition for unanimous consent could be presented.

Mr. BRYAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Florida?

Mr. McCUMBER. I yield.

Mr. BRYAN. I wish to suggest to the Senator from Minnesota that he will find a substantial basis for his claim that any Senator can move for a reconsideration when there was no yea-and-nay vote on page 414 of the Precedents of the Senate.

Mr. McCUMBER. I did not hear what the Senator read.

Mr. BRYAN. I have not read it. I said the Senator from Minnesota is, in my judgment, correct in his position that he has a right to move to reconsider, because there was no yea-and-nay vote, and I called his attention to page 414 of the Precedents of the Senate.

Mr. McCUMBER. First, I have not the rules before me, and I can not tell what the particular wording of the rule is.

Mr. BRYAN. It is not a rule. If the Senator would like to read it, I will hand it to him.

Mr. McCUMBER. Mr. President, there is one parliamentary proposition that I think is universally acknowledged, I do not care whether the question is taken by a viva voce vote or whether it is by a recorded vote, and that is that no one can move to reconsider a vote unless he himself voted in the affirmative. When a Senator acknowledges that he did not vote in the affirmative he has thereby put himself in a position where he can not be the mover of a motion to reconsider.

The PRESIDING OFFICER. The Chair feels some doubt upon this proposition, in view of the reference which has been made to a ruling in the Precedents of the United States Senate by the Senator from Florida [Mr. BRYAN]. Rule XIII reads as follows:

> When a question has been decided by the Senate, any Senator voting with the prevailing side may, on the same day or on either of the next two days of actual session thereafter, move a reconsideration.

The precedent which has been cited at page 414 of the Precedents of the United States Senate is of date February 18, 1889, and is as follows:

> A question of order being raised as to the right of a Senator to move a reconsideration when he was not present at the time the vote on agreeing to a report was taken, the President pro tempore [Mr. Ingalls] stated that during the time of his service in the Senate it had been the uniform practice and custom, when there was no record of a vote upon a question by yeas and nays, to allow any Senator to enter a motion to reconsider, and unless otherwise directed by the Senate he would entertain the motion. There being no objection, the motion to reconsider was entered.

Mr. GRONNA. But there is objection to this motion.

Mr. McCUMBER. The Chair understands that there is objection in this instance to the motion for a reconsideration.

The PRESIDING OFFICER. The Chair so understands.

Mr. SMITH of Georgia. Mr. President, the objection referred to, as I understand it, was to the motion being reconsidered. An objection to entertaining the motion would not have stopped the Chair from entertaining the motion in the case that the President of the Senate has before him, and the motion to reconsider was entered because there was no objection to the reconsideration. The right of a Senator to make the motion to reconsider was sustained by the Chair, even if there had been objection to a reconsideration.

The PRESIDING OFFICER. The Chair will decide that, unless directed by the Senate, in view of this precedent, the motion can be entertained.

Mr. McCUMBER. Mr. President, when a Senator is addressing the Senate on a subject and when he yields to another it is always understood that he is yielding for some question or some comment or some explanation, and it would be a gross abuse of all the rules of the Senate for a Senator to take advantage of the courtesy extended to him to ask a question to move to lay the subject on the table or to make some other motion. I declined to yield for the purpose of making a motion. As soon as I ascertained that the Senator desired to do anything further than to ask a question, I refused to yield for that purpose. Otherwise, I do not know how any Senator can guard himself, unless in every instance he asks a Senator, "Is it your purpose to make a motion?" or, "Why do you want me to yield to you?"

The PRESIDING OFFICER. It would be the view of the Chair that not having qualified the consent at the time when the floor was yielded, no limitation can be placed upon the right of a Senator to use the consent so given as he may see fit.

Mr. McCUMBER. Mr. President, I should like to have the Reporter read the statement of the Senator from Minnesota when he asked me to yield to him.

The PRESIDING OFFICER. If the Reporter can produce it, he will do so.

Mr. McCUMBER. I think the Senator asked me to yield for a question.

Mr. NELSON. I make the point that a Senator when he yields can not——

The PRESIDING OFFICER. The statement of the Reporter to the Chair, he not having the shorthand notes before him, is that the Senator from Minnesota rose and the Senator from North Dakota having the floor was asked if he would yield, and he said that he would yield.

Mr. NELSON. That is my recollection.

Mr. McCUMBER. I want to know what the Senator from Minnesota requested in the first instance, if he made any request?

The PRESIDING OFFICER. The statement of the Reporter to the Chair is that the Senator from Minnesota sought recognition; that the Chair asked if the Senator from North Dakota would yield to the Senator from Minnesota, and the reply of the Senator having the floor was, "I yield."

Mr. GRONNA. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to his colleague?

Mr. McCUMBER. I yield to my colleague.

Mr. GRONNA. I made the point of order that the Senator from Minnesota could not move a reconsideration because he did not vote on the prevailing side.

The PRESIDING OFFICER. And that the Chair sustained.

Mr. GRONNA. I call the attention of the Chair to Rule XIII, on page 14:

> When a question has been decided by the Senate, any Senator voting with the prevailing side may, on the same day or on either of the next two days of actual session thereafter, move a reconsideration—

And so forth.

Mr. President, the precedent cited by the Chair refers merely to a case where it is impossible to ascertain whether the mover of the motion did or did not vote on the prevailing side. In this case it is evident that the Senator from Minnesota did not vote on the prevailing side.

Mr. NELSON. There was no vote taken.

The PRESIDING OFFICER. The Chair was disposed to concur in the view just expressed by the Senator from North Dakota; but in view of the precedent to which the Chair has been cited, it would seem that where the yeas and nays have not been taken and recorded the construction given to the rule at that time would make the motion in order.

Mr. GRONNA. Of course I submit to the decision of the Chair; but where there can be no question as to the vote of the Senator who makes the motion to reconsider, when it is known and acknowledged by the Senator himself that he was not here and he could not have voted on the prevailing side, it seems to me it ought to be prima facie evidence that he can not under our rules make the motion.

The PRESIDING OFFICER. The Chair will state to the Senator having the floor that the Reporter's notes of the interruption are now available, and they can be referred to if he desires.

Mr. McCUMBER. If the Chair has stated them substantially, I do not care to have them read.

The PRESIDING OFFICER. The statement of the Chair was made upon the statement of the Official Reporter to the Chair.

Mr. McCUMBER. Ordinarily a Senator addressing the Chair when another Senator has the floor asks permission to ask a question or gives his reason for his interruption. If the Senator from Minnesota thinks that that is the proper method to pursue when he seeks recognition from the Senator who has the floor, it is for him to determine himself whether he considers it to be within the line of propriety.

Mr. President, I wish to ask, as a part of my remarks, that the bill be reprinted with certain proposed amendments, which are very short, and which I will give to the Senate.

On page 4, after line 10, insert the words "where an inspector is located at such place."

The next amendment is, on page 5, line 4, after the word "grain," to insert "arriving or collected at any of the aforesaid grain centers and."

The PRESIDING OFFICER. The amendment will be stated at the desk.

The SECRETARY. On page 5, line 4, after the word "grain," insert the words "arriving or collected at any of the aforesaid grain centers and."

Mr. McCUMBER. On page 6, at the end of line 25——

Mr. GALLINGER. If the Senator will permit me, I presume these are simply amendments offered and not to be agreed to to-day.

Mr. McCUMBER. No.

Mr. GALLINGER. But they are to be printed in the reprint.

Mr. McCUMBER. The Senator is correct.

Mr. GALLINGER. I will ask the Senator if they are offered by the Senator on his own part, or whether they are from the committee.

Mr. McCUMBER. They are offered on my own part, to make clear what is the intent of the bill.

After the word "grade," on line 24, page 6, insert the words "at such terminals."

I ask that the bill be printed showing those proposed amendments.

The PRESIDING OFFICER. The amendment last offered will be stated.

The SECRETARY. After the word "grade," at the end of line 24, page 6, insert "at such terminals."

Mr. McCUMBER. That is correct.

The PRESIDING OFFICER. If there be no objection, a reprint of the bill will be ordered with the amendments now offered. The question then is on the motion of the Senator from Minnesota that the vote by which the bill was taken from its regular order on the calendar be reconsidered.

Mr. McCUMBER. Mr. President, I have not yielded the floor as yet.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. McCUMBER. The Senator from South Dakota [Mr. STERLING] stated to me a short time ago that he wishes to submit some few remarks upon the merits of the bill, and I purpose to yield to the Senator from South Dakota, that he may address the Senate.

Mr. NELSON. Mr. President, I object. The Senator has no right to select any Senator to whom he may yield the floor. While this motion is pending he ought not to go into discussion of the merits of the bill. There will be time enough for that. I have avoided that in this discussion. I simply ask that the motion be reconsidered in order that I can have an opportunity to be present when a motion is made to take up the bill from the calendar.

Mr. SMITH of Georgia. Mr. President——

Mr. NELSON. I want to say, further, what I have already stated—that at the last session of Congress unanimous consent was asked when there were only 10 or 12 Senators present to vote on a given day on a very important bill. It was felt at that time by a great many Senators that an unfair advantage had been taken in that case. An amendment was offered to the rules, it was reported by the Committee on Rules, and adopted by the Senate, which provides that before any request for unanimous consent can be submitted the roll must first be called and it must be ascertained that a quorum is present.

Now, I want to say to the Senator from North Dakota if he pursues the regular course in the spirit of that rule, and provides a reasonable time in the future for the discussion of the bill, I for one shall not object.

I feel that the course which was pursued here last evening took an unfair advantage of me in this matter. It is simply on that account that I have moved a reconsideration. I shall not object when the proper time comes to taking a vote on the bill. I never intended to object to that.

Mr. McCUMBER. Mr. President, there can be no unfair advantage taken of any Senator who wishes to discuss the bill on the merits by allowing it to remain as the unfinished business. Why all of this talk about taking a regular course? It has taken its regular course. Notice was given two weeks ago, and that notice continued, that as soon as we had disposed of Senate joint resolution No. 1 I would move to take up this bill. The Senator from Georgia [Mr. SMITH] obtained the recognition of the Chair before I could make my motion, and he moved an executive session. That motion was voted upon. I could not move an amendment to it or even debate it at that time. I simply took the very first opportunity following that to carry out the notice which I had given.

Mr. NELSON. I want to put a question to the Senator. Was I not sitting here in my seat at the time to which the Senator refers? Was I not sitting here at the time we quit our legislative business, when the motion was made to go into executive session? Would not good faith on the Senator's part have admonished him to say: "Senator NELSON, I intend in this executive session to move to take up this bill from the calendar and make it the unfinished business?"

Mr. McCUMBER. Mr. President, the notice had been upon the face of the Calendar of Business for three weeks that I would make that motion as soon as we got through with the consideration of Senate joint resolution No. 1.

Mr. GALLINGER. Mr. President——

Mr. McCUMBER. And just as soon as we got through with that I did make the motion. I yield to the Senator from New Hampshire.

Mr. GALLINGER. I have the calendars for the last two or three days and I do not find that notice on the calendar, but I do find that the junior Senator from Iowa [Mr. KENYON] gave notice that at the conclusion of the consideration of Senate joint resolution No. 1 and Senate bill 120—that was the Senator's bill——

Mr. McCUMBER. That was my bill.

Mr. GALLINGER. He would move to take up Senate bill 392. I think probably the notice was omitted from the calendar. I know that the Senator made the suggestion.

Mr. McCUMBER. Yes; the notice was on the calendar for a long time. I do not know that I repeated it every day, but it was understood, and the notices which appeared upon the calendar were to the effect that immediately after the consideration of Senate joint resolution No. 1 and following the consideration of my bill the Senator from Iowa would move to take up another bill.

Mr. GALLINGER. If the Senator will permit me one further word, I hope this matter will be adjusted amicably. I am of the opinion that when a Senator yields to another Senator ostensibly for a question or perhaps for some observation on the bill that does not give the other Senator the right——

Mr. SMITH of Georgia. Mr. President, I can not hear what the Senator is saying. I am very anxious to hear him.

Mr. GALLINGER. I was observing that it is my opinion when a Senator occupying the floor yields to another Senator presumably for a question or to make some observation concerning the bill it would not give that Senator the right to move to reconsider any action the Senate had taken. On the other hand, the Senator from North Dakota now proposes to yield to the Senator from South Dakota [Mr. STERLING]. That is equivalent to yielding the floor, and beyond question, in my judgment, if the Senator from Minnesota now got recognition he would be entitled to make his motion.

Mr. McCUMBER. I agree entirely with the first statement made by the Senator, that it is ordinarily understood when one Senator yields to another it is presumably always to ask a question or to make some observation which will explain what he is saying or what he is about to say. However, I have not yielded the floor. I have not yielded it for any purpose.

Mr. GALLINGER. But——

Mr. McCUMBER. Just a moment, if the Senator pleases. When the motion was made by the Senator from Minnesota I had the recognition of the Chair, and with my recognition acknowledged by the Chair the Senator from South Dakota asked me for recognition, and holding the floor I have the authority to grant that recognition to any Senator I see fit. I assume that when I have yielded the floor to him he has a right to go on, and when he gets through I may or I may not take the floor again. That would depend upon whether I would get recognition.

Mr. GALLINGER. That is not correct parliamentary procedure. It has been decided over and over again that no Senator can farm out the time of the body, and the idea that a Senator——

Mr. McCUMBER. I made no such claim.

Mr. GALLINGER. The Senator certainly makes the claim that he can yield the floor to another Senator to discuss the bill, and when that Senator gets through he can resume the floor. If that should be the case he could yield again, again, and again, and occupy the floor for three months, perhaps. I think it is very clear that when a Senator suggests that he yields the floor to another Senator to discuss a bill, he loses his right to the floor at that moment.

Mr. McCUMBER. The Senator has not disagreed at all with me. I just yielded to the Senator from New Hampshire. I have resumed the floor again. I do not think I have parceled out my time to him in being courteous enough to yield for his suggestion, which is always kindly and a good one, but I have the same right to yield to another Senator who desires to follow me. I am not parceling out the time.

Mr. OVERMAN. Mr. President——

Mr. McCUMBER. If the Senator desires to go on, he can do it or not, as he has a mind to.

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from North Carolina?

Mr. McCUMBER. In just a minute. I do not say I would have the right to take the floor again after I had yielded to him.

Mr. GALLINGER. The Senator did suggest that.

Mr. McCUMBER. No, I did not; I said I might or might not take the floor again, that depending upon whether the Chair would recognize me.

Mr. SMITH of Georgia. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Georgia?

Mr. McCUMBER. I yield, Mr. President.

Mr. SMITH of Georgia. Mr. President, this morning I felt disposed to call the attention of the Senate especially to the fact that during executive session a measure had been brought up and made the unfinished business. While possibly the rules allow such a course, my own view is that they ought not to do it. Senators really have a right to suppose that when we went into executive session no important business would be taken in executive session that was necessarily legislative business, and would thereby become the unfinished legislative business. Possibly the rules do allow it, but if they do I think they ought to be corrected.

I agree fully with the Senator from North Dakota that when he yields the floor for an interruption during his speech a motion can not be made and ought not to be made to displace in any way his argument or interfere with his conduct of the subject he has at the time in hand and is presenting to the Senate.

I wanted to make this statement, and now I want to ask the Senator from North Dakota if he will consent, during this interruption, that I may offer a motion that we proceed to the consideration of executive business? I will not offer the motion during an interruption accorded to me by the Senator except by his consent.

Mr. McCUMBER. The Senator is always courteous, and I will be glad, of course, to yield to the Senator's request in a moment.

Mr. President, I feel that every step I have taken in this case has been one dictated by honesty of purpose and in exact accordance with the rules and the customs of the Senate. Knowing, as I do, that there is no purpose upon my part to hurry the bill, to ask anything but a vote upon it at some future time, and at a time so that we will be sure to have it voted upon during this session, so that it may be acted upon, at least, by the House during the present session or the early part of the next, I am seeking to get Senators who feel that they want an opportunity to be heard and who are willing to allow this matter to come to a vote to agree with me upon some method of procedure.

Let me call attention to a fact. We have not probably a quorum present. It would take some time to call the roll if we attempted to do that. I am perfectly willing to allow this measure to go over, with an understanding that in the morning, if the Chair holds that the motion of the Senator from Minnesota is in order, we may take a vote and determine whether we will make the bill the unfinished business.

Mr. NELSON. My motion is to reconsider the motion, and I desire to have a vote upon that motion. If the Senator will allow the motion to reconsider to stand as passed, then the question comes up on his motion, and to that course I have no objection, if a quorum of the Senate is present. If the Senator will allow his motion to be reconsidered, I have no objection to that course, I say, because in that case I shall be present and there will be a quorum in the Senate here, and it is for the Senate to determine the question.

But I feel, Mr. President, that an undue advantage was taken of me in this matter last evening. I am willing to agree to anything that is fair and just in this matter; and if an opportunity is given to discuss the bill, I shall not object to a final vote within a reasonable time; but I do not like to have an advantage taken of me, as was taken last evening.

Mr. McCUMBER. I should like to understand what advantage can be taken of the Senator from Minnesota if he has a full opportunity to discuss the bill in the Senate.

Mr. NELSON. That puts me at the Senator's mercy; it puts me in the attitude of being here to discuss the measure by the Senator's grace.

Mr. McCUMBER. Oh, no, Mr. President. There is no bill at the mercy of any one Senator. The only time a bill is at the mercy of a Senator or a little coterie of Senators is when they get together to prevent a hearing by some method or other of running one bill after another. That is the only way an injustice can be done.

Mr. NELSON. Have I been guilty of any such offense?

Mr. McCUMBER. I have not stated that the Senator has. I have stated that the only way Senators can take advantage of one of their colleagues in the matter of getting a bill before the Senate is by pressing some other matter before it, so that it can not get a hearing. I say frankly that that has been quite customary in the Senate of the United States, although it ought never to be.

The Senator says that he wants a vote upon his motion, and the Senator complains that I have not treated him with due consideration in bringing up a motion of which I had given notice and which I had kept before the Senate as well as I could for three weeks.

Mr. NELSON. The notice to which the Senator refers was not on the calendar on that day.

Mr. McCUMBER. But it had been given, and Senators had due notice of it, and I would measure that at any time with the courtesy of a Senator who, taking advantage of a request for an interruption, makes a motion which has the effect of taking the Senator who grants the courtesy off his feet.

Mr. GRONNA and Mr. SMITH of Georgia addressed the Chair.

Mr. McCUMBER. I yield to my colleague first, and then I will yield to the Senator from Georgia.

Mr. GRONNA. I simply wish to suggest to my colleague that we might obviate any further discussion of this matter by agreeing to take a vote on the bill on April 25, five weeks from to-day. Then the Senator from Minnesota could have the motion reconsidered, the bill could be withdrawn as the unfinished business, and there would be no further controversy over the question.

Mr. NELSON. Mr. President, that is trying to take an undue advantage. It is insisting that I must submit to this treatment unless I will agree at this time to fix some definite date to vote on the bill; otherwise you insist upon perpetuating this movement, and to that I can not consent. If the Senators from North Dakota want to act in good faith toward me in this matter, it is easy enough for them to do so. Let them consent to the motion to reconsider, and then, when there is a quorum of the Senate present, let them bring up the motion to take up the bill from the calendar and make it the unfinished business. In that way we can have a fair vote on the question, and I shall certainly not be an obstructionist.

Mr. McCUMBER. Evidently the Senator and I differ as to what constitutes good faith and treating the Senator properly. The Senator thinks that good faith on the part of the Senators from North Dakota is to allow their bill now to get out of the Senate again, and to be at the mercy of Senators as to when it may again come up. We who are supporting the bill feel that good faith requires that Senators who oppose it should allow it to remain the unfinished business and should discuss it from time to time as they feel they are prepared to discuss it, and finally to vote on it at some time during the session.

It is evident from the statement of the Senator from Minnesota that he does not wish the bill to remain in the Senate, but wants to get it out of the Senate in order that it may not come, if he can prevent its coming, into the Senate until he gets ready to allow it to come in. I assume that we can not, of course, meet upon any common ground. I now yield to the Senator from Georgia.

EXECUTIVE SESSION.

Mr. SMITH of Georgia. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 15 minutes spent in executive session the doors were reopened, and (at 4 o'clock and 20 minutes p. m.) the Senate adjourned until to-morrow, Saturday, March 21, 1914, at 12 o'clock meridian.

## NOMINATIONS.

*Executive nominations received by the Senate March 20, 1914.*

COUNSELOR FOR THE DEPARTMENT OF STATE.

Robert Lansing, of New York, to be Counselor for the Department of State of the United States of America, vice John Bassett Moore, resigned.

SOLICITOR FOR THE DEPARTMENT OF STATE.

Cone Johnson, of Texas, to be Solicitor for the Department of State of the United States of America, vice Joseph W. Folk, resigned.

REGISTER OF THE LAND OFFICE.

Joseph Winczewski, of Winona, Minn., to be register of the land office at Duluth, Minn., vice Charles F. Hartman. Term expired and resigned.

PROMOTION IN THE ARMY.

CORPS OF ENGINEERS.

Second Lieut. Myron Bertman, Corps of Engineers, to be first lieutenant from February 27, 1914, vice First Lieut. Daniel I. Sultan, promoted.

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate March 20, 1914.*

ASSISTANT TREASURER.

Charles B. Strecker to be Assistant Treasurer of the United States at Boston, Mass.

SURVEYOR GENERAL.

Lucius Dills, of Roswell, to be surveyor general of New Mexico.

RECEIVERS OF PUBLIC MONEYS.

Felipe Sanchez y Baca to be receiver of public moneys at Tucumcari, N. Mex.

W. G. Cowan to be receiver of public moneys at Roswell, N. Mex.

S. P. Ascarate to be receiver of public moneys at Las Cruces, N. Mex.

REGISTERS OF THE LAND OFFICE.

Rome P. Donohoo to be register of the land office at Tucumcari, N. Mex.

Emmett Patton to be register of the land office at Roswell, N. Mex.

John L. Burnside to be register of the land office at Las Cruces, N. Mex.

POSTMASTERS.

KENTUCKY.

George R. Hughes, Frankfort.
E. C. K. Robertson, Murray.

MASSACHUSETTS.

Michael W. Hynes, Wayland.
John P. Zilch, Plainville.

MICHIGAN.

Edmund L. Ashworth, Shepherd.
Willis F. Bricker, Belding.
F. S. Byrne, Marquette.
J. W. Budrow, Schoolcraft.
Vincent P. Cash, Alma.
George F. Catton, Constantine.
Percy D. Edsall, Greenville.
J. H. Gallery, Eaton Rapids.
Charles E. Lown, Saginaw.
Amon C. Sprau, Otsego.
Charles E. Utley, Stanton.

NEW HAMPSHIRE.

Stephen E. Bates, Suncook.
William Hayes, Groveton.
Herbert A. Taylor, Winchester.
Eugene M. Ware, Peterboro.

NEW MEXICO.

J. L. Lovelace, Fort Sumner.

PENNSYLVANIA.

Llewellyn Angstadt, Kutztown.
Thomas N. Burke, Mount Carmel.
R. E. Burket, Roaring Spring.
John A. Coonahan, Ogontz.
H. W. Faloon, East Brady.
Reuben E. Gerhart, Souderton.
Fisk Goodyear, Carlisle.
John K. Gorman, Coalport.
Simon P. Geisel, Hooversville.
Alonzo W. Jones, Mount Union.
J. H. McGee, South Bethlehem.
Henry J. Morris, Hatboro.
Annie H. Washburn, Wyncote.
Frank Snyder, Minersville.
W. R. Speer, Everett.
T. B. M. Ward, Laceyville.

RHODE ISLAND.

Daniel G. Coggeshall, Bristol.
Alonzo A. Greenman, Kingston.

## HOUSE OF REPRESENTATIVES.

FRIDAY, *March 20, 1914.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou who art the life and light of men, the inspiration of every pure thought, earnest endeavor, and noble life, continue to strive with us until we shall seek only the best in the higher realms of life. Honesty for the sake of honesty, truth for the sake of truth, purity for the sake of purity, righteousness for the sake of righteousness, until we shall have builded a character worthy of Thy love and fatherly care as revealed in the heart of the Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

RIVER AND HARBOR APPROPRIATION BILL.

Mr. POU. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House for the consideration of bills on the Private Calendar.

Mr. SPARKMAN. Mr. Speaker, I rise for the purpose of making a preferential motion. I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the river and harbor bill.

Mr. POU. I make the point of order, Mr. Speaker, that the motion of the gentleman from Florida is not in order. I was recognized by the Chair, and made the motion that the House go into Committee of the Whole for bills on the Private Calendar. Under the rule that motion is in order to-day, and I respectfully submit that I can not be taken off my feet by the gentleman from Florida.

The SPEAKER. The gentleman from North Carolina was not on his feet after he made the motion. He was through. The gentleman from Florida makes a preferential motion that has been recognized as a preferential motion—I do not know how long, but before my day. It is absolutely necessary, for the proper transaction of the public business, that these appropriation bills should have the right of way. I sympathize with the gentleman from North Carolina, chairman of the Committee on Claims, and the gentleman from Texas, Mr. GREGG, chairman of the Committee on War Claims, who is also up to make his motion, because they are the two committees where the hardest work is done with the least chance for display on the floor of the House. [Laughter.] The Chair knows that that is true, because he served on one of those committees two years. Still, for the reason that the public business, which it is absolutely necessary to transact, must be expedited, my predecessors have ruled that the motion which has been made by the gentleman from Florida is a preferential motion. It would take a Speaker of a good deal of assurance to overrule all the rulings of these Speakers.

Mr. POU. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. POU. If the motion of the gentleman from Florida to go into Committee of the Whole House on the state of the Union to consider the river and harbor bill is effective, that will entirely displace the Private Calendar.

The SPEAKER. For to-day.

Mr. POU. And if such motion continues to be made from time to time it is a question whether or not gentlemen will insist on displacing the Private Calendar indefinitely. I would like to say that there are 61 bills on the Private Calendar.

The SPEAKER. The Chair will state what he thinks in relation to this matter. There are 14 great appropriation bills. We have already sent 8 of them over to the Senate. This will be the ninth. The chairmen of committees that have these appropriation bills in charge can not keep up that process forever, because they will get through directly, and then the Chair thinks there will be plenty of time to attend to these matters coming from the committees which the gentleman from North Carolina and the gentleman from Texas represent.

Mr. POU. The purpose of the rule was—and I was present when it was drawn—to set apart certain Fridays for the consideration of bills on the Private Calendar. I shall insist on a vote on the gentleman's motion, and the House can do as it pleases.

The SPEAKER. The question is on the motion of the gentleman from Florida that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the river and harbor bill.

The question was taken; and on a division (demanded by Mr. POU) there were—ayes 45, noes 33.

Mr. POU. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. MANN. Mr. Speaker, I make the point of order that no quorum is present.

The SPEAKER. The gentleman from Illinois makes the point that no quorum is present. The Doorkeeper will close the doors and the Sergeant at Arms will notify the absentees. All those in favor of the motion of the gentleman from Florida will, when their names are called, answer "aye" and those opposed will answer "no," and the Clerk will call the roll.

The question was taken; and there were—yeas 170, nays 136, answered "present" 3, not voting 123, as follows:

YEAS—170.

So the motion was agreed to.

The Clerk announced the following pairs:

Until further notice:

Mr. ADAIR with Mr. MOSS of West Virginia.

Mr. CARTER with Mr. FARR.

Mr. OLDFIELD with Mr. PATTON of Pennsylvania.

Mr. BURNETT with Mr. GRIEST.

Mr. SHERWOOD with Mr. MORIN.

Mr. TAYLOR of Alabama with Mr. HUGHES of West Virginia.

Mr. DALE with Mr. MARTIN.

Mr. BARNHART with Mr. BARTHOLDT.

Mr. BUCHANAN of Texas with Mr. MADDEN (transferable).

Mr. SMITH of Maryland with Mr. SLEMP.

Mr. BLACKMON with Mr. BARCHFELD.

Mr. CARLIN with Mr. BURKE of Pennsylvania.

Mr. CLARK of Florida with Mr. DILLON.

Mr. COVINGTON with Mr. CALDER.

Mr. DAVENPORT with Mr. COOPER.

Mr. DIFENDERFER with Mr. COPLEY.

Mr. DIXON with Mr. FORDNEY.

Mr. FINLEY with Mr. CRAMTON.

Mr. GUDGER with Mr. GOOD.

Mr. HARDWICK with Mr. GILLETT.

Mr. HEFLIN with Mr. HAMILTON of Michigan.

Mr. HOWARD with Mr. KREIDER.

Mr. LEVER with Mr. LANGLEY.

Mr. LIEB with Mr. MCGUIRE of Oklahoma.

Mr. MONTAGUE with Mr. J. M. C. SMITH.

Mr. MORRISON with Mr. TEMPLE.

Mr. PETERSON with Mr. MANAHAN.

Mr. STEDMAN with Mr. LINDBERGH.

Mr. TALBOTT of Maryland with Mr. MERRITT.

Mr. WALKER with Mr. BURKE of South Dakota.

Mr. WHALEY with Mr. WOODS.

Mr. DIES with Mr. TOWNER.

Mr. GOODWIN of Arkansas with Mr. SMITH of Idaho.

Mr. CULLOP with Mr. ROBERTS of Nevada.

Mr. GOLDFOGLE with Mr. LINDQUIST.

Mr. CONRY with Mr. PORTER.

The result of the vote was announced as above recorded.

A quorum being present, the doors were opened.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 13811, the river and harbor appropriation bill, with Mr. ALEXANDER in the chair.

Mr. SPARKMAN. Mr. Chairman, I yield 30 minutes to the gentleman from Texas, Mr. CALLAWAY.

Mr. CALLAWAY. Mr. Chairman, I want to prelude what I say on this rivers and harbors bill by stating that I am not against legitimate appropriations for rivers that are really navigable and for possible harbors, but I believe an expenditure should be made by the Government only when the project is conclusively shown to be feasible from an engineering standpoint and when the probable reduction in the freight rate will be sufficient to pay the cost of operating the project, with a reasonable allowance for interest on the expenditure. In most of the river and harbor projects the question of deterioration does not enter, but in lock and dam projects that should also be taken into consideration, because the locks will in time have to be replaced.

The elements that should enter into the consideration are the original cost, the cost of maintenance, the cost of operation, the percentage of deterioration, the tonnage that probably will be carried, and the difference in the actual cost of carrying it by the proposed route and the available means of transportation. When these things are considered, and honestly considered, and it is found that it would be a profitable and economical investment, then Congress should make an appropriation to complete the project, provided, however, that the public will receive the benefit, and not some private concern or concerns.

There is but one way for this House to determine whether a project conforms to this test, and that is to require the

committee when it brings in a new project to show in its report to the House these facts. We have no right to assume that the committee has exercised judgment, caution, and fearless impartiality on each project. If we were as cautious, wise, and economical as we should be, we should assume nothing, but should look into every new thing proposed. There is nothing sacred about these committee reports. Look how the Committee on Rivers and Harbors is made up. The members are not selected because of their capacity to judge fairly and disinterestedly of the merits of the different projects submitted, but they really get themselves selected because of their particular interest in procuring appropriations through the committee for projects in their own districts.

Take the make-up of the committee—and I mean no reflection on any member of it; I only insist that they are human and subject to all the frailties and weaknesses of mortals. I heard the Speaker of this House say a short while ago that most things had changed since Adam and Eve were placed in the Garden of Eden, but one thing had remained unchanged, and that was human nature, which would likely remain unchanged for the balance of time. Those interested in the projects in their districts work up sentiment, bring pressure to bear, logroll, and campaign to get themselves put on this Rivers and Harbors Committee in order that they may do something for their respective districts. They get on the committee, where one member of the committee can not oppose the project of another because the other would oppose his project, and the consequence is they get thicker than thieves and all defend each and each defend all. The gentleman from California [Mr. J. R. KNOWLAND] says there is no politics in this committee; that they all work together in harmony toward a mutual end and distribute the appropriations without reference to party or locality. That is true. They have an interest that outweighs any local prejudice or partisan bias.

Mr. SPARKMAN, the chairman, comes from Florida's west coast. His district has 300 miles of ocean front. Mr. BURGESS, of Texas, is on Aransas Pass, and has in his district a section of the intercoastal canal with which this committee is paralleling the ocean from Boston to the Rio Grande, going to put in a narrow, crooked canal from 5 to 25 feet deep and compete with the open ocean. Mr. TAYLOR, of Alabama, is on Mobile Bay, Mr. HUMPHREYS, of Mississippi, represents a district which runs for a hundred and fifty miles along the Mississippi River—he wants $63,000,000 out of the Treasury—and Mr. EDWARDS, of Georgia, is on the Atlantic coast at Savannah. Mr. SMALL, of North Carolina, is specially interested in trying to develop commerce between Norfolk, Va., and Beaufort, S. C., by taking over and spending millions deepening a canal which is now 10 feet deep and has two little gasoline launches on it that draw 5 feet of water and make one round trip a week, carrying about as much freight at a load as a big box car. Mr. DONOHOE, of Philadelphia, asserts boastfully that he has got more appropriations for his district than any Republican predecessor. Mr. SCULLY, of New Jersey, has succeeded in having $1,229,000 shoveled out to that little State, which is nearly as big as a Texas ranch. Mr. DAISCOLL is from Buffalo, N. Y. His governor wants the Federal Government to spend as much on the Hudson River as has been spent on Red River—$183 for each ton of freight carried. Mr. GALLAGHER is from Chicago, the home of the river and harbor boosters. Mr. BOOHER, of Missouri, is interested in the Missouri above Kansas City, and from the best estimate I can get each ton of through freight carried from Kansas City to St. Louis will cost the Government about $200. Mr. MURRAY, of Massachusetts, came to Congress trying to burglarize the Treasury with a river and harbor key. Mr. LIEB, of Indiana, is from the Ohio River, on which this committee is appropriating for a project estimated to cost $63,000,000. Mr. KETTNER, of California, is the only Democratic Member of Congress from that State who has any coast line in his district.

Then comes the Republican membership of this committee—Mr. HUMPHREY, of Seattle, Wash., who regards each day lost that he fails to get something out of the Treasury; Mr. KENNEDY of Iowa, one side of whose district is bounded by the Mississippi River, which gets seven millions in this bill; Mr. BARCHFELD, from Pittsburgh, Pa., the place from which they are going to start the coal and iron down the Ohio to pass through $63,000,000 worth of Government locks and dams; Mr. HUGHES of West Virginia, who comes from the fifth district, which is almost surrounded by rivers more navigable than the Little Pedee and Lumber Rivers of South Carolina; Mr. SWITZER, from the tenth Ohio district, on the Ohio River, with a consequent interest in that $63,000,000 appropriation; and Mr. POWERS, of Kentucky, and Mr. TREADWAY, of Massachusetts. I failed to find from the map or from looking to the bill any direct interest Mr. POWERS would have; but he came to my rescue on March 19 by stating (RECORD, p. 5481):

> The rivers and harbors bill now under consideration carries a provision of much interest and great importance to the whole State of Kentucky, and especially to that portion of Kentucky which lies in the congressional district I have the honor to represent.

Mr. TREADWAY, according to his statement (RECORD, p. 5485), is "watchfully waiting" and hoping that the Treasury will make deep water on the Connecticut River.

This is the jury to whom the evidence is to be submitted on the feasibility of these projects, the estimated cost of them, the cost of maintenance when completed, the amount of freight carried, the cost of carrying it, and the value of such transportation to the public. This interested jury not only hears the evidence, but largely determines what evidence shall come before them, and more than that largely furnish the evidence themselves; and they then pass on it to determine whether the expenditure shall be made, render the verdict to the House of Representatives, and then lead the House in entering the judgment on the verdict. What show has the Treasury with such an interested organization? What show has the interest of the people when tried before a tribunal so organized?

I have been sitting here for three days listening to the members of this committee, the chairman among them, discuss this bill which shovels out forty-three millions of the people's money. I have waited patiently and listened earnestly to hear some man actually give or attempt to give a reasonable justification for a single appropriation in the bill. I have not heard it. The chairman of this committee told what an enormous increase there had been in water transportation. He said the tonnage of water-borne commerce had increased from 625,901,653 tons in 1910 to 1,002,759,355 tons in 1913. He ought to have told this House how much the traffic of this country had been increased by the appropriations for rivers and harbors. That is what we are interested in. We want to know, and should know, what return we are getting on this outlay of money. I asked him whether he had reference to all of the traffic on the rivers, canals, and the ocean, or to the traffic on the projects that were provided for in this bill, and he said all the traffic, ocean-going vessels and all. That information is worse than useless. The ocean traffic is in no way affected by these appropriations, nor can it be. These appropriations should in no way be affected by the ocean traffic.

The river and canal traffic is not increasing, but, on the contrary, is decreasing, and has been for years. This is the traffic affected by these appropriations, and all the traffic that can be affected by them. The facts about this traffic are indicated clearly by the fact that we have abandoned 2,444 miles of canals, more than half we have. These abandoned canals cost us $81,000,000, and as a further evidence we have the failure of the Erie Canal, running from Buffalo, N. Y., to the Hudson River. It is a 7-foot lock canal, and was very efficient as a freight carrier before the railroads became efficient enough and cheap enough to drive the canal out of business. It ran down until in 1906 it carried only 3 per cent of the freight. The railroads carried the remaining 97 per cent of it. New York State has given it up as a complete failure as a 7-foot lock canal.

If a 7-foot lock canal is a failure between the Great Lakes and the Atlantic Ocean, where there is such a great demand for transportation facilities, is not that proof conclusive that a 7-foot lock canal any place is a failure? Can we hope for a canalized river 7 feet deep to do business when a 7-foot lock canal under the most favorable conditions has failed? In the Erie, it was not a matter of original investment or improvement to get a 7-foot lock canal; it was already built; it was already improved; it had been a prosperous means of transportation. It carried, in 1889, 18 per cent of the freight, but as railroad facilities improved it declined, until it has been abandoned as a 7-foot canal.

Mr. GOULDEN. I want to say that we are now enlarging the Erie Canal and making it a 3,000-ton barge canal instead of a 250-ton barge canal. We fully realized that it had ceased to pay under the old, antiquated, obsolete system, but it paid formerly, and it is going to pay again on the 3,000-ton barge system, and is going to pay well, both to the State of New York and to the country at large.

Mr. CALLAWAY. Oh, that is propheey. We are enlarging the Little Pedee River and the Trinity River on prophecies.

Mr. SMALL. I want to ask the gentleman if he knows that the issuing of bonds for $130,000,000 for the improvement of the Erie Canal had been submitted to a referendum in New York State and adopted by an overwhelming majority?

Mr. CALLAWAY. Yes; and the people may have had the thing misrepresented to them as the people of this country have had this river and harbor proposition generally misrepresented

to them. The benefits to be derived from it may have been misrepresented to them, and that may be the reason why New York voted as it did.

Mr. GOULDEN. The people of New York knew what they were voting for, that they were paying the bill, amounting, all told, to $130,000,000, and, permit me to say, have no regrets to express.

Mr. CALLAWAY. The canals of this country have proven a complete failure. As I stated a moment ago, we have abandoned 2,444 miles of canals, which cost $81,000,000, and this does not include canalized rivers. I could nowhere find out the number of miles of canalized rivers which we have abandoned. The Mississippi River has lost 85 per cent of the freight it carried in 1889. The whole Mississippi River system had lost in 1906—the last available statistics—72 per cent of the freight it carried in 1889.

Mr. TREADWAY, of Massachusetts, in discussing this thing yesterday, said:

I submit that the method in vogue is as nearly just and equitable as can be made. All proposed projects are first considered by the Committee on Rivers and Harbors, and, if seemingly meritorious, an examination and survey are ordered. These are made by the experts of the War Department entirely on basis of merit from the scientific standpoint of engineers. The results are submitted to Congress and placed in the hands of the Committee on Rivers and Harbors. Hearings are held, and the committee, having this testimony and the scientific opinions of the Board of Engineers, are certainly in a position to pass impartial judgment.

Mr. HUMPHREYS, of Mississippi, a member of the committee, and the gentleman from Massachusetts, Mr. TREADWAY, a member of the committee, state that these projects are all based on surveys ordered by the Rivers and Harbors Committee and the reports made by scientific engineers after such surveys, and are appropriated for justly and fairly according to the judgment of the committee. Now, going on the assumption that one of the projects in this bill is as good and as meritorious as another, as these two members of the committee have stated, I am going to take up only a few of these projects and discuss them. I can not discuss all of them. There are nearly a thousand in all.

Mr. Chairman, if Mr. TREADWAY is right, and the gentleman from Mississippi [Mr. HUMPHREYS] correct, one project is as good and economical and reasonable and just an expenditure as any other in the bill. They are based on scientfic investigations made by engineers after they are ordered by the committee. I will take the Trinity River project as an example. It is infinitely a better proposition than many of them, and the committee and the engineers so recognize it, because they select the most feasible first, and this project was selected in 1902, while many projects in this bill have only just been selected at a date 12 years later. The man responsible for the initiation of this project is as honest, high-minded, and clean a man as I have ever dealt with. A revelation of the facts shows that it is due, not to the character of any man, but to the system practiced here, which men are drawn into by these continuous raids on the Treasury. I have as much respect for the man most interested in this project, for his judgment, for his statesmanship, and for his integrity, as I have for any man in Congress, and as stated above the project itself is infinitely more meritorious than many that are carried in this bill. He goes after this outlay of money in his district because everybody else is doing it.

In the light of these facts, then, let us look at this project, taking the engineers' reports for our basis of fact and reasoning about it. Here is what the report says:

The appropriations which have been made so far by the Congress for the Trinity River seem to indicate the intention to provide locks and dams.

There has been appropriated $2,229,142.93, and that is what the engineers' report for 1913, part 2, page 2293, says about it:

The appropriations seem to indicate an intention.

What, after more than $2,000,000 has been appropriated for it, after more than half what the engineers said in the original estimate would be the cost has been appropriated, they say:

The appropriations seem to indicate an intention to provide locks and dams.

This same engineer's report further says:

There is no commerce on this river, and none can be developed until the entire river is canalized.

The original estimate on this project was $4,000,000; but the engineers have changed that, and now say it will have to be increased to $10,000,000; and the project will have to be entirely completed before any commerce can be developed on it.

Now, let us reason a little on this project for which $2,229,142.93 have been appropriated. This bill carries $205,000 for this project. I think two hundred thousand was appropriated last year. That indicates that $200,000 per year is what they intend to put into this project. If they do continue at that rate in appropriating for this project it will take 40 years to finish it. Two hundred thousand dollars per year would be a million in five years, and eight million, the amount necessary to finish the project, in 40 years. They have been working on this project since 1902, and they have up to this time spent two and a quarter millions. What this committee has done for the last 12 years should be taken as fairly indicative of what they will do in the future. The engineers say in their report that "no commerce can develop on this river until the project is completed." That will be 40 years yet; 52 years from the time it was started. Can any mortal be so credulous as to believe the engineers or the committtee or the Members of this House sincerely think that project will ever be completed? These are not my statements; they are logical and inevitable deductions drawn from the engineers' reports and the amount of the annual appropriations made by this committee.

What is the inevitable conclusion? It is that they do not intend to complete these projects. If they did, they would not each year add a lot of new projects while continuing to drag along on the old ones at the same slow rate. They say money is limited and they can not afford more for this project. This is acquiesced in by the representatives of the different projects, and yet the committee added last year 21 new projects, and this year 76. What further evidence is needed to show to any reasoning mind that there is no intention of ever completing this project?

Mr. Chairman, there is another project in my State which has been dragging along about the same as the Trinity, and that is the Brazos River project. They have been working on it for about the same length of time, have spent $2,302,135.65, and have about the same hope for the future, judging from the engineer's reports.

Now, here is a North Carolina project. I am going to read from the engineer's report on which they base their expenditure. This is the Little Pedee and Lumber Rivers, in North Carolina, House Document 138, Sixty-third Congress, first session.

Mr. EDWARDS. Before the gentleman leaves the question of the Trinity River, will he yield for a question?

Mr. CALLAWAY. Yes.

Mr. EDWARDS. The gentleman made a statement that he wished to call attention to certain projects in the districts of various members of this committee. That would naturally leave the impression that the Trinity River was in the district of some member of the committee. Is that true or not?

Mr. CALLAWAY. No. I never said that. I said that I would show that every member of the committee had a special interest in the appropriations, and then I would call attention to some specific projects carried in the bill, assuming that Mr. TREADWAY's statement and Mr. HUMPHREYS's statements were correct, and that one of these projects was as good and as meritorious as another; and then I would proceed to make the argument that the whole thing ought to be kicked out through the roof if that was true.

Mr. EDWARDS. I would like to ask a further question. In point of fact, is the Trinity River in the district of any member of this Committee on Rivers and Harbors?

Mr. CALLAWAY. No.

Mr. HARDY. I will ask the gentleman if it is not a fact that this navigation of the Trinity stops just before it gets to the gentleman's district?

Mr. CALLAWAY. Yes. It stops, in fact, before it starts. [Laughter.] Your question shows that men here are expected to be influenced by their interest. I have no direct interest in this appropriation and am therefore against it, is what your question implies. I have as much interest in it as any man ought to have who is to pass on expenditures of public money on it. I have a public interest in it.

Mr. GREGG. Will the gentleman yield a minute?

Mr. CALLAWAY. Yes.

Mr. GREGG. I want to say to the gentleman that the old landing point of Magnolia is 8 miles from my town, and there are men living now who have seen five or six boats at the wharf there at one time.

Mr. CALLAWAY. They are evidently very old men.

Mr. GREGG. They are men who have been born since the war.

Mr. CALLAWAY. I suppose they ran flatboats and skiffs——

Mr. GREGG. No; boats carrying large quantities of cotton and bringing up all the produce and all the merchandise we controlled in our portion of the country.

Mr. CALLAWAY. They ran small vessels, skiffs, and flatboats, and pole-push boats on many rivers before we had railroad facilities, but that played out when the railroads came in,

because it was such an improvement on our old mode of transportation.

The report on the Little Pedee and Lumber Rivers says that—

An examination made in December, 1909, shows that there were about 50 localities where the depth was less than 18 inches and several where it was but 5 to 6 inches.

I take this from House Document No. 862, Sixty-first Congress, second session. And they are trying to make the Little Pedee and Lumber Rivers navigable!

Mr. PAGE of North Carolina. Mr. Chairman. [Laughter and applause]——

The CHAIRMAN. Does the gentleman from Texas yield to the gentleman from North Carolina?

Mr. CALLAWAY. Yes, sir.

Mr. PAGE of North Carolina. In view of the applause on my taking the floor, I want to say that I am in entire sympathy with the gentleman. I want to call his attention to the fact that he was doing the State of North Carolina an injustice. Every foot of the Pedee River that is navigable is in the State of South Carolina and not in North Carolina.

Mr. CALLAWAY. I thank the gentleman for the correction. The interests wanting this expenditure made the argument if any boats could ply it at all—and that is the general argument made by the people throughout the country who favor these projects—their railroad rates would be reduced and this outlay of money would have the effect of reducing the railroad rates. That argument is rotten, and there is no man in this House but knows it.

Mr. MURDOCK. They ought to disinfect that argument.

Mr. CALLAWAY. It needs disinfecting.

Mr. FOWLER. The bill or the argument?

Mr. CALLAWAY. Both. The report discussing the Little Pedee and Lumber Rivers says: "The improvement is desired to enable the merchants to obtain lower railroad rates." Then it further says: "Experience has shown that unless energetic use is made of the improved river, the railroads will refuse to lower their rates," showing to be fallacious the argument that any transportation by water will reduce freight rates.

Here is a North Carolina project, the Northeast Cape Fear River. The Engineers' report, House Document No. 1356, third session Sixty-second Congress, says——

Mr. SMALL. Mr. Chairman, will the gentleman permit an interruption before he goes to the discussion of another project?

The CHAIRMAN. Does the gentleman from Texas yield to the gentleman from North Carolina?

Mr. CALLAWAY. Yes.

Mr. SMALL. The gentleman did not state that the appropriation here carried was only $2,000 and that the appropriation was based upon the recommendation of the Chief of Engineers, Gen. Bixby—a very strong recommendation, reciting the reasons for it on the Little Pedee and Lumber Rivers in North and South Carolina. However, the part improved is, as may colleague [Mr. PAGE] said, entirely in South Carolina.

Mr. CALLAWAY. The question is not the amount spent; the question is the attempt to navigate 5 inches of water.

The engineers' report as to the Northeast Cape Fear River says:

The proposed improvement extends about 1½ miles above the present deep-water project in front of the city of Wilmington. He [the engineer] believes that if the channel suggested by the district officer, at a cost of $50,000 is provided, its eventual cost may double that sum. From the information now available it appears that the three fertilizer industries located about a mile above the head of the deep-water project at Wilmington have a considerable tonnage that would be affected by a more commodious channel, and that such a channel would result in a material saving in the handling of their heavier commodities. The improvement is very largely in the interest of these concerns.

Here is a New Jersey project, Mattawan Creek. I am reading from the engineers' report:

The adopted project provides for a channel 8 feet deep and 100 feet wide from the mouth to Winkson Creek, and thence 80 feet wide to the railroad bridge at Mattawan—estimated to cost $72,000.

There has been already spent on this project $65,647.96, and it is estimated that it will cost after it is completed $5,000 annually to keep it up. "The navigable part of this stream extends up to the bridge of the New York & Long Branch Railroad at Mattawan, about 2 miles." Here is an outlay of $137,647.96 for 2 miles of 8-foot deep waterway, which is to cost $2,500 a mile annually to keep up.

Here is a Florida project on the Kissimmee River. It is in the State of the chairman of this committee. It is, the engineers say, dry for a part of the year. There has been spent on it heretofore $32,852, and this bill carries $47,000 for it. I will read from the engineers' report concerning it:

With reference to the Kissimmee River, it appears that the project depth of 3 feet has not been maintained and that it will be impracticable to do so unless the work is prosecuted more vigorously than it has been in the past. * * * The board therefore recommends the authorization of a 3-foot channel from Kissimmee to Lake Okechobee, at an estimated cost of $35,000 for the construction of a dredge, $12,000 for the first year's work, and $6,000 a year, or so much thereof as may be necessary, for subsequent operations. It seems probable that after the channel has been constructed and maintained for a few years the cost of maintenance may be considerably reduced. If not, the project should be reexamined with a view to determining the advisability of its discontinuance. The first appropriation should be $47,000.

After we have spent $79,852 on it and have maintained it for a while, it "should be reexamined with a view to determining the advisability of its discontinuance."

Mr. Chairman, these are samples taken from the various States, and they are of varied character and illustrate the worthlessness and lack of merit of the projects in this bill. They show how the public money is wasted. Can any intelligent mortal believe that an individual would so spend his money? If not, how can we account for this committee pouring out these millions on such foolishness?

A fellow in Texas was being tried for stealing a cow. When the evidence was in and the attorney had closed the argument for the State, the attorney for the defendant did not see that anything could be said for his client. The evidence conclusively showed his guilt. His client asked him if he was not going to make some defense. The attorney told him he did not see that there was any defense. The defendant insisted on his saying something, and he talked a few minutes, avoiding the facts as much as he could. The jury went out and returned in a few minutes with a verdict of "not guilty." The attorney asked his client what that meant—said he could not understand the verdict, when the evidence was conclusive against him. The defendant replied, "You see, 11 of those men helped me eat the cow." [Laughter and applause.] Here is a jury worse stocked than that, for every one of them helps eat the cow.

Mr. Chairman, I want now to call attention to an engineers' report discussing the Ohio River, signed by C. L. Potter, lieutenant colonel; F. R. Shunk, lieutenant colonel; and E. D. Peck, captain. This is an engineers' report on the Ohio River as a coal carrier. The report says:

In 1889 the river receipts were about 59,000 tons and the rail receipts were 21,000 tons, or 26 per cent of the freight carried. In 1906 the river receipts were about 36,000 tons and the rail receipts about 85,000 tons, or 70 per cent of the freight carried. The actual amount carried by river in 1906 was only 60 per cent of that carried in 1889. The greatest coal river in the world is being driven out of the coal-carrying business by the railroads.

The traffic has been driven off of this great open waterway by the railroads. We recognized that and are now building locks and dams on that river at a cost of $63,000,000, and for what? Out of the very nature of things commerce can not be as cheap on that river with locks and dams as on the open river. The cheapest river transportation is on an open river in barges in fleets. When the fleets must be broken up to pass each lock, there is time lost and danger of smash-ups.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. KENNEDY of Iowa. Mr. Chairman, I yield to the gentleman 10 minutes.

The CHAIRMAN. That will be taken out of the time of the gentleman from Washington [Mr. HUMPHREY], will it?

Mr. KENNEDY of Iowa. Yes. Acting for him in his absence temporarily, I am controlling the time on this side.

Mr. ALLEN. Mr. Chairman, will the gentleman yield for a brief question?

The CHAIRMAN. Does the gentleman from Texas yield to the gentleman from Ohio?

Mr. CALLAWAY. Yes.

Mr. ALLEN. I would like to ask the gentleman if he knows that Lock and Dam 37 in the Ohio River has formed a pool in front of the city of Cincinnati 20 miles long, of 9 feet depth at the shallowest point, which has enabled them to move boats in the harbor and transfer coal and merchandise up and down in front of the city every day in the year for the past two years, thereby providing a great convenience to the commerce and saving an immense amount of money in transportation?

Mr. CALLAWAY. I am reading from the engineers' report.

Mr. ALLEN. I am stating a fact that I am familiar with from personal observation.

Mr. CALLAWAY. I supposed the engineers were stating the facts and were entirely informed, and they are scientific men. These appropriations are supposedly based on their reports. We ought to be able to rely on them. What I am discussing is freight up and down the river, and not simply a turning basin in front of Cincinnati, which, if Cincinnati needs, she ought to provide at her own expense. It is general traffic we should look to.

Mr. Chairman, I am going to read from the report of the Board of Engineers, showing the way the river freight has fallen off:

*Freight shipments by Mississippi River system.*

| | Tons carried. | | Loss. |
|---|---|---|---|
| | 1889 | 1906 | |
| | | | *Per cent.* |
| Upper Mississippi | 3,947,364 | 595,885 | 85 |
| Illinois River | 180,204 | 105,826 | 41 |
| Missouri and tributaries above St. Louis | 2,132,820 | 1,056,390 | 50 |
| Total upper river | 6,360,448 | 1,758,101 | 72 |
| Ohio River | 15,796,968 | 15,226,805 | 4 |
| Lower Mississippi | 6,232,087 | 2,546,187 | 59 |
| Total Mississippi River | 28,289,503 | 19,531,093 | 31 |

Next I want to read from the report of the Commissioner of Corporations for 1909, transportation by water in the United States, part 1, page 126. There is a table given here, but I will read the summary only:

The table just given shows a decrease in the total gross tonnage of the western rivers of 61,748 tons, or 20 per cent, on June 30, 1907, as compared with June 30, 1888.

I will read further from the same report (p. 359, vol. 1), showing the effect of the insurance rate on the commerce of those rivers:

A packet line which operates on the Ohio River claims that the insurance rate has practically driven it out of business.

Another line whose vessels ply the waters of the upper Mississippi reports that "the cost of insurance on many articles of merchandise is more than the cost of carrying the freight from St. Louis to St. Paul."

One vessel owner estimates that the insurance on vessels and cargoes affected his business to the extent of 33⅓ per cent.

This same report says that the time of transportation on a barge canal such as the Erie is about three and a half times as long as by rail, and the inconvenience suffered from such delay and the interest and insurance on freight while in transit must be considered, and when all is considered—

The canal can not compete with the railroad rate; it can not give better service, and it can not relieve the congestion in large crop seasons.

This same statement will apply with equal force to canalized rivers as a means of transportation.

The Engineer's report, from which I am reading further, says:

It is not appreciated by those advocates of canals that there is a vast difference between moving many thousand tons of one cargo over a wide, deep, direct, and level waterway and taking the same commodities in small barges through a narrow, unduly long, and shallow waterway. There can be no cheap rate over such a waterway.

Advocates of this policy of pouring out millions and millions of dollars in an ostensible effort to improve our inland waterways for purposes of navigation urge, as the great argument in its favor, that it will result in a lowering of freight rates on the railroads. We have State and Interstate Commerce Commissions, whose duty it is under the law to make the freight rates reasonable; that is, as low as they can be made. Nobody advocates confiscating the railroad property.

You may state that water competition will make them reduce the rates at competing points below the rate fixed by the commissions as reasonable. If that be true, the rate at the competing points will be below what is reasonable, or the rate at noncompeting points will be above what is reasonable; and your argument amounts to a statement that the commissions are not doing, and will not do, their duty. You have been claiming that the commissions could not get at the facts; but we have sought to remedy that by putting hundreds of men in the field to make physical valuations of the railroads in order that the Interstate Commerce Commission may have the information on which to base the rate.

Should water competition reduce the rate at the competitive points below the actual cost of transportation by rail, the railroads would have to make up that loss by making the rate higher than reasonable at the interior points, and the result would be that you would have saddled the burdens on the interior of developing your water competition for the benefit of competitive points, and also the burden of making up the loss to the railroads which they suffer because of having to reduce their rates below cost at the competitive points. That might appeal to the greed and avarice of the competitive points. It might appeal to a Congressman who wanted to favor some locality at the expense of the general public; but it would not appeal to a fair-minded patriot who saw and understood, *and it would not appeal to the people at interior points who would be forced to bear this double burden of constructing projects at immense cost in order to raise their own freight rates.*

The argument that you are intending to develop water competition on these intermittent streams for the purpose of reducing general freight rates is the merest drivel and the public ought not longer to be buncoed by such obviously fraudulent claims. The insincerity and ridiculousness of it all is demonstrated conclusively by the fact that while you are working through Congress and getting up to the White House for the President's final approval this bill appropriating $43,000,000 of the people's hard-earned money, presumably for the purpose of forcing lower freight rates, the administration is quoted in all the big daily papers as in favor of allowing the railroads to raise their freight rates 5 per cent.

In our platform of 1896 we said:

We denounce the profligate waste of the money wrung from the people by oppressive taxation. We demand a return to that simplicity and economy which benefits a democratic Government.

The appropriation for that year was $457,088,344.72.

In our plateform of 1904 we said:

Large reductions can easily be made in the annual expenditures of the Government without impairing the efficiency of any branch of the public service, and we shall insist upon the strictest economy and frugality.

That year the Republicans appropriated $736,578,402.76.

In our platform of 1908 we said:

We denounce the needless waste of the people's money as no less than a crime—

and that year the Republicans appropriated $918,362,329.07. In 1912 we denounced the profligate waste of the money wrung from the people by oppressive taxation, while according to the estimates submitted this year by a Democratic administration we will be called on to appropriate $1,250,000,000. Did we mean what we said in our repeated platform declarations? If so, let us do it. We can make a start on this bill.

I shall make a motion when this bill is read to cut out $39,000,000 of it, that being everything except the maintenance items, which amount to only $4,000,000. If that motion should carry, we will maintain every project we now have in its present condition and save more than nine-tenths of the money wasted in this bill. No man can say it will not be a waste. Commerce has left these rivers and canals. We realized that and appropriated a half a million dollars for a commission to make an investigation to see if any craft could be devised that could economically carry the traffic on these waters. That was an admission that we are in the woods at present and do not know that any commerce will be developed by these expenditures. That commission has not yet reported. Let us stop this until we know what we are doing. That is the only way to deal honestly with the public, and we ought to deal honestly with those whose money we are spending. [Applause.]

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. McCOY having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had insisted upon its amendments to the bill (H. R. 13612) making appropriations to supply urgent deficiencies in appropriations for the fiscal year 1914 and for prior years, and for other purposes, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. MARTIN of Virginia, Mr. BRYAN, and Mr. WARREN as the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 13091. An act to provide for drainage of Indian allotments of the Five Civilized Tribes;

H. R. 13771. An act extending the provisions of the act of March 3, 1913, authorizing the construction of a bridge over the Missouri River near Weldon Springs Landing, Mo.;

H. R. 11751. An act authorizing the sale of certain land to the county of San Diego, State of California, for public watering purposes; and

H. R. 12594. An act to authorize the county commissioners of Skagit County, Wash., to construct a bridge across Swinomish Slough opposite the town of La Conner.

RIVER AND HARBOR APPROPRIATION BILL.

The committee resumed its session.

Mr. SPARKMAN. Mr. Chairman, I yield 20 minutes to the gentleman from Texas [Mr. DIES].

Mr. DIES. Mr. Chairman, I guess there is a good deal of human nature in men, just as my colleague from Texas [Mr. CALLAWAY] says there is, and I guess there is some truth in his statement that those gentlemen who are interested largely in river and harbor improvements throughout the country are persons who have been brought closely into relation with the

matter. If I had doubted that that was applicable to all Members of Congress, including the members of the Rivers and Harbors Committee, I could have learned it from the situation of my colleague from Texas, who, as we all know, represents a district without ports or the prospect of navigable streams. The fact about the business is that this question, like every other question that agitates the minds and affairs of men, can be carried to an extreme. The truth lies between the extremes. If one would take the statements of my colleague and believe them to be sound, no canal, no river, no harbor is worth improving.

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?

Mr. DIES. Yes.

Mr. CALLAWAY. I stated in the outset that if you could show that on the outlay the freight carried would be a profitable investment I did not object to it, and no man would object to it; but no expenditure ought to be made unless you could estimate it as you would your private business and show that there was a real profit on the investment.

Mr. DIES. Mr. Chairman, I happen to live in a part of the country where for many years the people thought they had good river and harbor propositions. They wanted the Government to take it up. Men who believed and spoke as my colleague believes and speaks said that it was worthless and impractical. We wanted them to improve what is now known as the port of Port Arthur. We could not get a Government engineer to recommend it, and we could not get the ear of a Member of Congress to listen to the scheme or to believe that it was feasible. We finally succeeded in getting a lot of Dutch capital from Holland to build the canal. It cost a million of dollars, and later on, I may say, was presented by its owners as a gracious gift to the Government of the United States.

When that canal was built the entire tonnage from that section of the State that passed through Sabine Pass was less than 300,000 tons in 12 months. To-day it is greater than 3,000,000 tons. The value then of the product that passed through was less than $3,000,000, and to-day, if I recall the figures correctly, it is more than $60,000,000. There was a port which they said was not worth improving, and which to-day figures about the tenth greatest in the entire United States, and to-day this little canal, that men scoffed and laughed at as my colleague laughed and scoffed to-day, bears upon its surface 2,050,000 tons every 12 months, and they can not get wharfage and facilities fast enough to accommodate the business that is accumulating there. He speaks somewhat slightingly of the intercoastal canal. For one I believe it will be demonstrated to be a boon to the entire Atlantic coast, to the entire Gulf coast, and to the great and rich country which lies tributary to it. The intercoastal canal will prove to that entire section what this little Port Arthur Canal has proved to the more limited section. [Applause.] If this intercoastal-canal improvement is foolish and chimerical, how does it fall out that it has been advocated as far back as the days of James Monroe and John Quincy Adams, the latter of whom sent a message to Congress pointing with great pride to the fact that this intercoastal canal had been surveyed and that he hoped for its speedy construction? I feel I ought to say, Mr. Chairman, that Texas has the proud distinction of having upon the Rivers and Harbors Committee the author of this intercoastal-canal proposition. We are proud of GEORGE BURGESS. Back in the old days, in 1824 and 1829, efforts were made, it is true, by many other gentlemen to have the Government do this great work, but it remained for a Texas Representative on the Rivers and Harbors Committee, the Hon. GEORGE F. BURGESS, to give this matter practical and concrete shape. [Applause.] So that to-day the intercoastal canal is a thing which we look upon as a reality. Why, in the great State of Texas not one acre in 10 of our broad domain is in a state of cultivation. To-day in Texas of all the things we need the most urgent is transportation by rail, by dirt road, and by water. As I said, the city of Port Arthur can not accommodate the vessels which come there to load with cotton, with oil, with lumber, with grain, and the products of the farms of Texas and the Southwest. Tell me that this great intercoastal canal that connects the Atlantic seaboard with the Rio Grande River, touching the great rivers along its way, will not benefit Texas and will not benefit the entire South and the entire country when it is constructed!

Mr. CALLAWAY. Will the gentleman yield?

Mr. DIES. I will.

Mr. CALLAWAY. Talking about the little canal at Port Arthur, that is simply a harbor that leads from the Gulf of Mexico to a general railroad distributing point, is it not?

Mr. DIES. It is less than 12 miles long, I believe.

Mr. CALLAWAY. It is not a canal for the carrying of freight.

Mr. DIES. I presume that canals lead to water. [Laughter.] All canals lead to some place where boats can go out, because you could not get a boat out if the canal did not lead to water. Port Arthur leads out to the Gulf of Mexico, and when we built that canal with private capital we demonstrated the errors of false prophets, and when the intercoastal canal is completed it will also realize our hopes and disprove the criticisms made against it.

Mr. Chairman, after private capital had built the Port Arthur Canal and demonstrated the feasibility of the undertaking the Government was induced to construct what is known as the Sabine-Neches Canal, connecting the Port Arthur Canal with the Sabine and Neches Rivers. The citizens of the enterprising cities of Beaumont and Orange, located, respectively, on the Neches and Sabine Rivers, were anxious to connect with deep water. The estimated cost of this work was about $1,200,000. To show their faith in the work, the people of those two cities and the surrounding country contributed one-half of the cost of the work, and to-day the Government is bringing to completion this great work. Our people have contributed more than a million and a half of dollars from their local funds. They are in dead earnest, and at last we have secured the ear of Congress, and the end is not yet. The greatest chain of deep-water ports in the world will be along the Port Arthur Canal, the Sabine-Neches Canal, and the Sabine and Neches Rivers. Why, do you know, if GEORGE BURGESS were to remain in Congress the balance of his life he could never do a greater work for Texas than the construction of this great waterway. It will remain as a monument to his memory, more enduring than brass and marble, for it will aid greatly in opening up the fairest part of that fair country.

Mr. Chairman, those who think the intercoastal canal a worthless project are no doubt sincere, but they have learned only half the truth. They say it parallels the ocean and the Gulf and is therefore needless. Why, sir, the experience of those who navigate the Atlantic and the Gulf is that these great waters can not be relied upon for the moving of barges and other frail or light craft which could safely and economically use the canal. Only a few months ago a shipowner at Port Arthur lost an oil vessel costing almost a million dollars which would have been safe in the canal. Along this intercoastal canal are the greatest sulphur mines in the world, the greatest salt deposits, and near it are the great iron ore deposits of Cherokee and other eastern Texas counties. In this territory is to be found a wealth of timber, oil, cotton, rice, lumber, and other valuable commerce. We need to exchange these products for the coal and structural steel of Pennsylvania, West Virginia, and Alabama. With this connection with the great coal fields at a cheap freight rate our section will come forward as a great manufacturing section. Cheap coal is the one thing needful. This canal will give us cheap coal.

I know, Mr. Chairman, it is easy to make fun of these propositions, and, as I said in the beginning, there is nothing good in this world but what, carried to an extreme, becomes an evil. It may be that there have been in the past very great objections to matters contained in the rivers and harbors bill, but I want to state to my colleague from Texas [Mr. CALLAWAY] that if he ever has the trouble getting an item into the rivers and harbors bill that I have had and that other gentlemen have had—first to go to the local engineers and then to the district engineers, then to the Board of Engineers, and finally to the board of review here—I am persuaded to think that he will believe that you have a pretty hard proposition in going up all the avenues which you have to travel in order to get Uncle Sam's appropriation. [Applause.]

I regret, of course, that there has been any reference made as to Texas' share in this bill. Texas has a tremendously long coast line. As I said a moment ago, about 90 per cent of all the lands in Texas are in a state of nature. Tributary to this intercoastal canal there lie the broad forests, the cut-over pine lands, the broad acres of coastal prairie plains, practically untouched by the hand of man, lying in an idle state of nature. I do not want Texas to get more than her share. I hope I have grown to be broad enough to want every section of our glorious Union to prosper along with every other section. But surely, if there is a need for improved harbors, for improved shipping facilities, improved rivers and waterways, and railway and dirt-road transportation, a State with 90 per cent of its lands untouched by the hand of the husbandman makes a strong appeal to you patriotic men from New England and the central West, where you have great development. We have this great State here that shall yet contain a population of 50,000,000 of people, that shall yet be able to supply the world with 20,000,000 bales of cotton a year, and it is no time now for a man from New England or any other section of the country to say that we are

getting more than we ought to have out of this river and harbor bill.

Mr. SMALL. Will the gentleman permit an interruption?

Mr. DIES. Yes.

Mr. SMALL. Perhaps the gentleman would permit me to state here that the rivers tributary to the Gulf, not including the Mississippi and its tributaries, are 53 in number, having a navigable mileage of 5,212 miles, all of which extend into this intercoastal waterway along the Gulf.

Mr. DIES. And many of them shoal, Mr. Chairman, and become unnavigable when they reach the salt water of the Gulf or the ocean. I believe it is the almost universal experience and an actual fact with regard to most rivers, where they flow into the Lakes or into the ocean, that they shoal at their mouth. This intercoastal canal will intersect them at navigable points, and will be a great saving to the Government, no doubt, in the matter of making these rivers navigable, without reference to the canal itself.

Mr. SPARKMAN. Mr. Chairman, I would like to add to what my colleague from North Carolina has stated, by saying that the completion of this intercoastal system will mean that it will add 27,000 miles of waterways.

Mr. DIES. I do not doubt it. In my district are rivers 40 feet in depth, many miles from the Gulf, that are not navigable from the Gulf because they are shoal at their mouth.

The gentleman from Florida says 27,000 miles of navigable river waterway will be added by the construction of this canal. It is too large an affair, Mr. Chairman, to be laughed into disrepute before the country. I hope that those who are the friends of the rivers and harbors and of this great work of navigation upon good streams at good ports, for the development of the commerce of this country, will not suffer this great work to be laughed out of countenance before the country.

Mr. MOORE. Mr. Chairman, will the gentleman permit?

Mr. DIES. Certainly.

Mr. MOORE. I wish to add to what these other gentlemen have said, that the number of disasters along the Atlantic and Gulf coasts from 1900 to 1910 was 5,700; that $40,000,000 worth of property was lost; that 2,200 lives went down, and that many of those lives and much of that business could have been saved through the intercoastal waterway if it had been completed.

Mr. DIES. I think the experience of a shipowner in my district, who lost $960,000 in one vessel, would tend to confirm all and more than the gentleman says.

Mr. Chairman, it is well for those who feel unfriendly to rivers and harbors to go very thoroughly and very fully into the facts in this matter. I feel like saying, and I shall say, that there is no man in this Congress for whom I have a greater affection and admiration than for my colleague [Mr. CALLAWAY]. I regard him as one of the ablest and most courageous men in Congress. I know he is true as steel and as honest as he is true; but he does not look at this question with his usual breadth of vision. This is a great national undertaking, and if my colleague lives as long as I would have him he will behold all his prophecies concerning it fail.

Mr. HUMPHREY of Washington. Will the gentleman yield?

Mr. DIES. I will.

Mr. HUMPHREY of Washington. I wanted to ask if the gentleman from Texas [Mr. CALLAWAY] has any streams in his district capable of being made navigable.

Mr. DIES. I do not think there are any such streams in the district of my colleague.

Now, Mr. Chairman, that completes what I had to say in regard to this matter. I can only speak with assurance about conditions in my own immediate section; but if the balance of the criticism against the bill is based upon no better foundation than that directed at the intercoastal canal, it will no doubt fall to pieces when the entire matter is discussed and understood. [Applause.]

Mr. HAWLEY. Mr. Chairman, on February 27, 1912, I made some remarks concerning the public-land laws and their administration, calling attention to the difficulties experienced by the homesteader and the relief that should be given him. He is a most useful citizen, and his efforts to make profitable use of our unoccupied lands should be furthered in every legitimate way. Since that date some legislation has been enacted of a beneficial character. At this time it is my purpose to call attention to three things only in which further legislation is greatly needed.

CULTIVATION REQUIREMENTS OF THE THREE-YEAR HOMESTEAD LAW.

This provision was inserted in the three-year homestead bill by the conferees after it had passed both House and Senate, and of course under the rules was not subject to amendment.

This insertion of new matter by conferees is a practice against which there is much complaint. The appointment of conferees is for the purpose of adjusting the disagreement between the two Houses on matters that each House has considered. But where the conferees add new matter, which under the rules can not be amended, they do what it was never intended they should do. I never favored the cultivation requirements of the three-year homestead law, or believed they were proper, for a wooded country, and had opportunity been given I would have offered an amendment similar to the provisions of the bill I now propose.

The cultivation requirement works a hardship on homesteaders in a wooded country. To clear 20 acres for the plow is in a great many instances practically impossible, and if it were feasible is a useless waste of effort and money. Homesteaders distant from market, where there are no roads or where roads are poor, or if the roads are passable there is no market within a distance to which products can be profitably hauled, should not be required to cultivate grain crops, but should be allowed to make other forms of improvement. Their good faith can be shown just as clearly, for instance, by clearing for meadow or forage crops and by raising stock, which can be driven to market and which will be profitable to the settler and to the country. To make this possible I have introduced H. R. 10535, which is a modification of the bill introduced by Senator BORAH. My bill makes it possible for a settler to engage in a work profitable to him, and it seems to be quite generally believed that the modifications I have proposed will aid in the passage of this legislation and be of great benefit to western homesteaders.

Since the passage of the three-year homestead law I have been collecting information in support of the amendment I now propose. Settlers are widely scattered in the West, mails and means of information sometimes infrequent, and to get an expression of opinion from any considerable proportion of them is difficult and takes time. But by the assistance of public-spirited citizens and the public press, to whom my thanks are due, and by means of inquiries by letter and in person, I have collected the opinions of hundreds of men and women now actually engaged in making homes in good faith on the public domain in support of this bill. The proposed modification of the law is as follows:

*Provided further*, That the entryman shall, in order to comply with the requirements of cultivation herein provided for, cultivate not less than one-sixteenth of the area of his entry, beginning with the second year of the entry, and not less than one-eighth, beginning with the third year of the entry, and until final proof, except that in the case of entries under section 6 of the enlarged-homestead law double the area of cultivation herein provided shall be required: *Provided*, That the entryman in lieu of cultivation required herein may make improvements upon his entry by constructing fences or buildings, by slashing, clearing, or in other ways preparing the land for cultivation, for meadow, for pasture, or for grazing purposes, or by planting orchard, or by otherwise making the homestead habitable or capable of production, or of enabling the entryman to obtain means of livelihood from the homestead, said improvements to aggregate in value an amount each year of not less than $1.50 per acre, except that in cases of entries under section 6 of the enlarged-homestead law the amount of improvements shall not be less in value than 75 cents per acre: *Provided*, That the term "cultivation" shall be held to include also the growing of grasses, or other crops, for pasturage purposes or for making hay: *Provided further*, That the above provision as to cultivation shall not apply to entries under the act of April 28, 1904, commonly known as the Kinkaid Act, or entries under the act of June 17, 1902, commonly known as the reclamation act, and that the provisions of this section relative to the homestead period shall apply to all unperfected entries as well as entries hereafter made upon which residence is required.

In lieu of requiring that 10 acres be cultivated in the second year and 20 acres in the third year in a homestead of 160 acres, as required by the three-year homestead act, the bill I propose allows the homesteader to be given credit for necessary improvements. This bill also provides that "cultivation" shall include the growing of native or tame grasses and hay crops, as well as the growing of crops that necessitate the plowing of the soil, and encourages stock raising.

This is a practical and reasonable solution of the difficulties which settlers are complaining of in the cultivation requirements of the present law, and does not mean that the homesteaders shall not exhibit good faith. Raising stock, for instance, is just as useful work as raising large quantities of grain or potatoes on homesteads far from the market, and is more profitable to the homesteader, and therefore makes his homestead more valuable to him. The growing of cultivated crops will follow in due course of time, and there will naturally be garden cultivation and growing of some grain from the beginning.

The information I desired from the homesteader covers these points:

First. Can you clear 20 acres of your land in three years and have it ready for the plow without hiring extra labor or buying expensive machinery or explosives? If you can not, please state why.

Second. If you raised grain or potatoes or other cultivated crops on the 20 acres, could you sell them? If you can not, please state why.

Third. What kind of a road is there to your homestead?

Fourth. How far would you have to haul grain or other crops to market them?

Fifth. Will the bill proposed above meet the difficulties you are experiencing under the present law?

Sixth. Have you any suggestions for further amendment?

Any additional information will be gladly received.

The purpose was to get the views of as many homesteaders as possible, so that in the passage of this homestead bill all proper opportunity and relief should be given to those who make homes on the public domain.

The largest number of replies were from homesteaders in wooded areas, although some were from settlers on more open lands. Practically all the former replied in the negative to the first question.

The replies were generally in the negative to the second question. The people were too far from market and the roads were, as it were, in a state of nature. The last statement answers the third question.

On the fourth, the distances ran up to as many as 40 miles, and in nearly every instance the length of haul would be prohibitive, even if the roads were better.

The answers to question 5 were in the affirmative with few exceptions. The homesteaders expressed an earnest wish to comply with the laws in good faith, but said the requirements should be reasonable and practicable; that instead of a rigid rule for all sections, irrespective of their physical characteristics, alternative requirements suited to the varying conditions should be provided, and that the requirements should be such that in complying with them the settler would be doing work of practical benefit to himself.

The replies number hundreds, and I expect to lay the contents of them before the Committee on the Public Lands of the House.

I collected this data, not from any lack of information on my part but for the reason that I wished the homesteaders to come, as it were, in person and state the difficulties they experience under the cultivation requirement of the three-year homestead law and the modification needed to give them relief which should be at the same time proper and legitimate. I find a sentiment very favorable to this legislation. I have taken the matter up with other Members of the House from districts in which the settlers are situated similarly to those in Oregon, and I hope soon to have the bill, or some measure which will afford relief equally well, reported to the House and passed.

OPENING THE FOREST RESERVES TO ENTRY.

The recent exclusion from the forest reserves in Oregon of several hundred thousands of acres and their restoration to homestead entry emphasizes what I have so often said on the floor of the House, that in the hasty formation of the forest reserves, especially in Oregon, millions of acres of lands suitable for homesteads were included that never should have been. I have constantly urged that they should be made available for entry, and this is being done, although slowly. To promote the elimination of agricultural lands, to aid in determining what lands are such, and to make it possible for homesteaders to secure them without unnecessary difficulty and delay, I have favored the appropriation of moneys to enable this work to be done; and the Agriculture appropriation bill, as it passed the House on Saturday last, contained an item of $100,000 for the selection, classification, and segregation of lands within the boundaries of the national forests and to open them to homestead settlement and entry; an item of $85,000 for the survey and platting of lands valuable for agriculture within the forest reserves; and $20,000 for the use of the Bureau of Soils in examining and classifying agricultural lands in the forest reserves in cases where the agricultural character and value of the land is in dispute. All of these appropriations I have earnestly worked for, and I hope to see them increased and the opening of lands in the national forests hastened. This bill also contains appropriations for road and trail construction in the forests, which will aid in making them more accessible to the homesteader.

GIVE THE HOMESTEADER A RIGHT OF APPEAL TO THE COURTS.

In my remarks of February 27, 1912, I called the attention of the House and country to a use then being made of secret reports by special agents, a use, in my judgment, highly improper. At this time I do not intend to go into the subject further than to say that as a result of my protest the practice of the department has been greatly modified, as the following statements from a letter which I received from the First Assistant Secretary of the Interior, under date of February 2, 1914, indicates:

With reference to that portion of your letter requesting a copy of the special agent's report in the case, in order that your constituent may be afforded an opportunity to submit evidence to disprove the charges therein, I have to advise you that the department has heretofore promulgated an order to the effect that special agent's reports will not be considered by the department in connection with cases pending on appeal, wherein the claimant, after a copy of charges had been served upon him, has denied the charges, applied for a hearing, and appeared and submitted testimony in support of his claim. In accordance with the foregoing instructions the Commissioner of the General Land Office, in forwarding your constituent's case to the department upon appeal, retained in the files of that office the special agent's report.

There still exist practices which ought to be modified in part and in part abandoned, of which I expect to speak at a later date. I hold that the Government should consider no report as secret or confidential, and nothing should be included in the record which the entryman or his attorney can not fully examine and have adequate opportunity to reply to.

The entryman on the public lands should have, under a properly enacted statute, a right to appeal to the courts before he can be ousted from his entry and be deprived of the work of years. Under the present practice he is practically in the hands of the special agent, whose report is called "confidential," and whose statement, unsworn to, is held to be worthy of more credence than the sworn testimony of reputable citizens, as has happened in cases coming under my notice; the settler is subject to the vices of a bureaucracy. The civil service ought to promote efficiency and fair-mindedness, and not incompetency, bias, and prejudice. The settler is the only man whose property and means of livelihood can be taken away without due process of law in the courts, and it is time that these "strong-arm" methods were abandoned and the homesteader given his day in court; in the open courts of his country, where justice and juries sit. The secret process of deciding on a citizen's rights, condemned in Magna Charta, has no place in this age, and if it could be dragged out into the light of day it would die. It could not stand publicity.

The long delays after final proof is made and before issuance of patent should not occur. The homesteader can not be expected to pit his slender means against the inexhaustible resources of the Government, and "wearing out" a man who persists in maintaining his rights is an abuse of power.

I wish again to emphasize what I said in my remarks on February 27, 1912, in the House. All of the legislation I advocated is salutary and for the common good. Further experience and consideration emphasizes its importance and justice. [Applause.]

Mr. BARTON. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by printing a speech by a constituent of mine on the conservation of flood waters.

The CHAIRMAN. The gentleman from Nebraska [Mr. BARTON] asks unanimous consent to extend his remarks in the RECORD by inserting the speech named. Is there objection?

There was no objection.

Following is the statement referred to:

A BIG, PRACTICAL NATIONAL PROPOSITION OF DIRECT BENEFIT TO THE POPULATION OF THE ENTIRE MISSISSIPPI VALLEY, NAMELY, CONSERVING THE RAINFALL—FLOOD AND DROUGHT TWO GREAT FACTORS IN THE MISSISSIPPI VALLEY, EACH THE CAUSE OF THE LOSS OF MILLIONS OF DOLLARS ANNUALLY.

The song of the flood waters was heard in the land last year and many years heretofore—water, water everywhere. Damage to property, loss of lives, millions of dollars in property lost and thousands of lives destroyed. And later the drought, drought everywhere, and crops are withered, well streams and rivers are dried up, thousands of cattle are marketed, business is vitally affected. In many States for a great many it was a serious problem to provide the necessaries of life.

Yet there is a big, practical solution of the entire difficulty, a regulator of drought and floods. It is national, yet individual; by national the Government can direct, the individual can accomplish. The Government superintends, engineers the project, the individual accomplishes the task. The Government policy to conserve the timber, the mineral, the water power, and assist agriculture with big irrigation projects, with immense outlay of money, is all right, and the individual and company irrigation plans, whether by wells, reservoirs, and ditches, are good; but over and above all, and for all, is a plan that will unite the Government and individual in a task that will immeasurably outclass any world's work ever attempted, without issuance of bonds, levy of taxes, or other means, except to pay Government employees, viz, conserving the rainfall will avoid the damage from both drought and flood. Not by condemning large areas for big reservoirs, but without condemning a single acre for reservoir purposes.

In Missouri for many years—fifteen or more—a farmer has been reclaiming the rocky ravines on his farm by damming up the ravine at the line of his field; a sewer pipe through the dam with an elbow at the upper end holds back the flood water from rains and allows the wash from the soil to settle in the bottom of the ravine, the excess water flowing through the sewer pipe. Two things are accomplished, the wash from the fields is saved to make a new meadow in a waste place and the flood waters are retarded in their flow. The task is accomplished by the cost of a few lengths of sewer pipe and the labor with team and scraper to be found on every farm.

Now, this little task can be enlarged upon and a comprehensive plan developed to embrace every farm and ranch in the Mississippi Valley.

My father lived over 70 years on a farm in Illinois. This farm in my boyhood days was full of sloughs and ponds. We plowed as far as we could into these sloughs and ponds and planted to corn then; as the season progressed we plowed further and sowed to millet. My grandfather first made mole drains through the soil to drain wet places. Very few will understand what these mole drains are. The instrument was a simple round piece of iron attached to a thin strip of iron dragged through the soil about 2½ or three feet under the surface with ox teams. At that time this round iron made a hole only 2 or 3 inches in diameter, and, no doubt, helped some to drain the subsoil. In later years my father placed tile drains throughout the farm, which had increased to 48 acres, and when my father sold this farm only a few years ago there was not a slough or pond on the entire farm and no open ditches and less than half a mile of rocky ravine, which could not be improved by a tile drain; but this rocky ravine can be dammed at a very nominal cost to hold thousands of tons of flood water, as the ravine crosses the line of the farm between narrow perpendicular walls of solid rock. This same ravine is already dammed below this farm for park and boating purposes.

Throughout Illinois and adjacent States a well-tiled farm will absorb an immense amount of rainfall, and the ravines will hold untold tons of water without damage, but rather a benefit to the farm, as the wash will build new meadows in the ravines.

But take Nebraska, with her boundless prairies, hills, and canyon lands. For years every effort has been made to ditch the swamps and low places, straighten out the creeks and rivers, until one-half to three-fourths of the rain water runs off like a shot to swell the rising floods of the Missouri and Mississippi, causing millions of dollars' damage and loss of life, with thousands of acres of idle land in Mississippi, for fear the levee may break and flood the crops. The wash from the farm is carried by creek and stream to the muddy Missouri and Mississippi, until the State of Mississippi has been filled in hundreds of feet in places with soil from all over the Mississippi Valley. And since levees were made to keep the great river within bounds, it has been a struggle on the part of the river to deposit sediment in its channel, and thus raise the bed of the river year by year faster than the people can build levees to outrise the stream. Thus the mighty river mounts higher and higher above the surrounding land. I do not have the figures to give the Government data regarding the height of flood water at New Orleans, but my recollection is that the height of the flood two years ago was eighty-some feet as against some 50 feet only 10 years ago.

Two years ago the Government spent (estimated) three million of dollars for levee work and aid to people along the Mississippi on account of flood, and this year, I am told, at the time of the great flood in Ohio, the Government ordered in Pittsburgh steel rails to be made to be transported to New Orleans by freight to be used in ripraping the levees before the flood waters should arrive; the course of the Mississippi being so tortuous and the fall so slight that it took the flood waters weeks to reach the Gulf. (The estimated damage in the town of Hamilton, Ohio, alone from flood water during 1913 was $10,000,000.)

But return to Nebraska. A small part of the money spent by the Government for protection and aid to flood sufferers would hire competent district engineers under a national bureau to plan and oversee the work of conserving the rainfall of the entire Mississippi Valley. I have in mind a Nebraska ranch of 680 acres from which there need not a single drop of water run off during any rain or flood season, and that, too, can be accomplished by the expenditure of material and labor and of a very few hundred dollars, and if you eliminate the labor, which this ranch owner will gladly furnish, the material (cement) for building culverts with headgates would be a very small item—very small, indeed—compared with the value that will accrue to the ranch.

This Nebraska ranch of 680 acres is about half smooth, nearly level farm land. The other half is rolling to rough grazing land. Three-fourths of this ranch is drained by a draw or canyon from 100 to 200 feet in width and averaging 10 to 12 feet in depth and nearly 1 mile long, with smooth farm land on either side. Another fine hay canyon crosses another part of the farm land that drains probably a section of hill and pasture land. A series of dams in these draws or canyons will hold all the water coming into them. These dams, of course, should be built with cement culverts and headgates, so that the water can be let out or held, to suit occasion. The water accumulating in the upper part of this draw can be brought down and distributed in ditches on the farm land, and thus the rainfall is made to supplement itself on the cultivated land; and, again, this draw, after emptied of water, either by the water flowing down on lower land or pumped for irrigating purposes, can be plowed and sown to cane or millet in July and an immense crop raised, three or four times greater than without the storage of water, hence no loss of land by reason of reservoir.

What would be the effect in central and western Nebraska alone if all the rain water that falls on the land was conserved as outlined on this ranch? And I am of the conviction that it can be done.

Now, we do not stop to look from whence comes the rainfall. Most people never look beyond the clouds, and very few follow the source to the Gulf of Mexico. What think you of a people that receive their rain from a thousand miles away, and when it is poured down in torrents on the land standing by and see one-half to three-fourths of it flow away to damage property and destroy life? And then in a few days wish it would rain again, and as weeks pass by they look anxiously for rain, and when the drought is severe they bewail their lot.

Now, we all know what goes up must come down, and when I said our rains come from the Gulf of Mexico I did not take into consideration water evaporated from the soil, lakes, streams, and irrigating ditches. All the vapor that rises must be condensed and fall in rain or snow somewhere, some time. And I maintain that if central and western Nebraska was filled with lakes the rainfall would be increased in accordance with the amount of evaporation. If the ground is damp and is giving off large quantities of vapor, it is easy to rain, but if the ground is dry and no appreciable vapor arising, very little rain falls.

I think the question of rainfall, its conservation and distribution, is the biggest and most practical problem the Government can engage in. It is not for infants, it is for master minds. The field for investigation is great and the avenues for the investigator are long. But no one thing, to my mind, can be made of greater material benefit than the conservation of water—the rainfall.

WILLIS CADWELL,
*Broken Bow, Nebr.*

Mr. DONOVAN. Mr. Chairman, the rightful committee that ought to have a hearing was defeated here this morning, and I think it is up to the successful committee to keep a quorum in this House. I make the point that there is no quorum present.

The CHAIRMAN. The gentleman from Connecticut [Mr. DONOVAN] makes the point of no quorum. The Chair will count. [After counting.] One hundred and one gentlemen are present—a quorum. The gentleman will proceed.

Mr. DONOVAN. Mr. Chairman, I want to give notice that I am going to insist on a quorum being here. They voted out the Claims Committee this morning, and they have got to keep a full attendance here. I am entitled to 15 minutes, Mr. Chairman?

The CHAIRMAN. Yes; the gentleman is recognized for 15 minutes.

Mr. DONOVAN. Mr. Chairman, we must say that for fair play and for an honorable way of doing, the Committee on Rivers and Harbors probably takes rank with no other committee of this House. [Laughter.] They arranged at the outset to divide the time entirely on one side. Surely, amongst fair men that was an unfair move. The opposition was to be left without a moment—another fair move from fair men. [Laughter.]

In my opinion there was a reason for the fact that the opposition should not have been allowed to have anything to say. I can see the reason why the leader of the committee minority [Mr. HUMPHREY of Washington], in having an hour to speak here, should say not a word about the measure under discussion, a measure carrying $40,000,000. As in the case of the framers of other measures of a similar character, they need elements of strength from both sides—entre nous; that is to say, they must secure the cooperation of the recipients of the benefits carried by the act in order to pass it. The most vicious bill that ever passed any legislative body passed with only 5 dissenting votes. Many measures that will not bear criticism are the same.

We spend, I think, about $20,000 to educate one of these Army engineers. After he is educated we give him a life position. At another period we retire him on a fine salary as a pensioner.

In the State of Connecticut two harbor projects were authorized by the act of July 25, 1912. Now, this Board of Engineers reported only one of these projects. In one of those harbors it is shown by Government reports that the Treasury collected half a million dollars receipts from commercial business. At the other harbor the total receipts were some $2,200, and the amount paid to officials for collection was $4,900, entailing a loss to the Government of $2,700. There is an authorization in the bill for both places, but this Committee on Rivers and Harbors and the Board of Engineers recommended the expenditure of $170,000 for improvements in the place that has no commerce, and the board and the committee recommended not one dollar for the other place where they were taking in half a million dollars of revenue. The place of no commerce is the rendezvous, yes, and to some extent, the home, of the idle rich. It is the harbor of the yachts of the rich and the summer residence of the idle rich. An appropriation of $170,000 is recommended for those.

The other place, which receives nothing, is a manufacturing city, with over 100,000 people, where not one of those manufacturers can sell a dollar's worth of his goods except in competition; they must excel in value, they must excel in texture, they must excel in their pliability. But to help the poor manufacturer or to help the working classes is not one of the dicta of the Board of Engineers, and, in the present circumstances, of the Rivers and Harbors Committee.

Now, let us see. In Connecticut we give this Government how much? We pay to the Federal Government a little over $4,000,000 annually. This great committee, in its wisdom, turned into Texas from this bill $3,675,000. The same committee existed last year; and the appropriation of last year used up and exceeded by $200,000 the total receipts from Texas; so that Texas to-day does not contribute a dollar toward the pay of the Army or the pay of the Navy or to the payment of any other administrative expenses of the Government, because the amount of her receipts is all given back to her in river and harbor improvements and $200,000 additional.

Now, Mr. Chairman, I submit in all fairness, where is your doctrine of fair play in collecting that money from one State and spending it in another?

Mr. SPARKMAN. Mr. Chairman, will the gentleman yield for a suggestion?

The CHAIRMAN. Does the gentleman from Connecticut yield to the gentleman from Florida?

Mr. DONOVAN. No; the gentleman would not give me a moment of time, and he is committing a crime if he takes away time from me now. [Laughter.]

Mr. SPARKMAN. Well, let it go.

Mr. DONOVAN. This explains the attitude of the gentleman from Washington [Mr. HUMPHREY], who, too, refused to give me any time. He represents a State not exceeding mine in population and wealth. What did they do for his State? The States of Oregon and Washington get in this bill $2,948,000.

Now, Oregon and Washington received last year—just think of it, gentlemen—$7,095,000. What did they pay into the Government Treasury? In the two years covering the life of this committee they paid $10,057,034, and in those two years they received half a hundred thousand dollars more than they paid into the United States Treasury, so that those two States received more for river and harbor appropriations than the total amount of taxes paid in customs duties, internal revenue, and corporation taxes by $50,000. If we all did the same, where would the Nation come out?

Now, I say that to take from the State of Connecticut over $3,500,000 for the benefit of that great State of Texas and for the benefit of the States of Washington and Oregon, Mr. Chairman, is unfair in the extreme. Is it any wonder that the gentleman from Washington [Mr. HUMPHREY]—and he is not here—should spend all his time in talking about shingles [laughter] and not say a word about rivers and harbors? He ought to have told you that the Washington shingle mills close down in the winter in order to make the poor fellows hungry, so that they will work cheap in the spring. [Laughter.] If he would tell you the truth, he would tell you that the factory owner in Bridgeport, Conn., when the winter comes, draws his check for 10 per cent of the workingmen's wages for the whole year and tosses it to them as a Christmas gift. That manufacturer or his city does not receive one dollar in this bill, but you give half a million to your country in Texas. That manufacturer did not appear before the Committee on Ways and Means and ask for duties that he might sell his wares. He sells his wares on the quality of the goods and sells them all over the world. From his ability to manufacture he employs thousands of people.

For a little arm of Long Island Sound it was asked this board of engineers that the channel be widened, so that it would have a depth of 12 feet for 200 feet in width instead of 100 feet, but it did not get an inch. But what do we do in Texas? Why, we widen it up to 1,200 feet and 30 feet in depth. Why not? It did not cost them anything. Connecticut pays for it.

Mr. HARDY. Will the gentleman yield?

Mr. DONOVAN. What did they do when they gave $170,000 to that society harbor, the harbor of the idle rich, which has already 25 feet of water?

Mr. HARDY. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Connecticut yield to the gentleman from Texas?

Mr. DONOVAN. I had hard work to get 15 minutes' time, and I say that if these legislative sharks try to take part of it away from me they are imposing on me. [Laughter.]

Mr. HARDY. I will say to the gentleman that I helped him to get his 15 minutes.

Mr. DONOVAN. If there is anybody who is fair it is the gentleman from Texas [Mr. HARDY], but he is a professional and I am an amateur. He will get time here and he will make me look like the proverbial 30 cents as an orator. [Laughter.]

Now, let me tell you why the shingle talker from Washington kept still. He had his hand in the pork barrel. Just think of it; on a bill carrying a shade less than $40,000,000, how much do you think three of them on the committee got? Just guess. Just guess how much they got.

Mr. CANTOR. Fifteen million dollars?

Mr. ANSBERRY. One-third?

Mr. DONOVAN. They did not go hungry. Our shingle friend from Washington got $2,500,000. Our friend from Washington, our friend from Florida, and our friend from Texas, together, the three of them, garnered $7,004,500.

Mr. HUMPHREY of Washington. I call the gentleman's attention to the fact that he has overlooked some of the Washington items.

Mr. DONOVAN. Mr. Chairman, our manufacturer of wooden shingles, to whom this country has been paying a tribute of from 50 cents to $1.50 per thousand for years, is bewailing the fact that that is not going to continue, but he continues in this bill all right. For the fiscal year 1911 he garnered $4,600,000; for the fiscal year 1912, $1,800,000; for 1913, $7,095,000. Pretty good for that district.

Now, Texas has done pretty well. Texas and Florida for the fiscal year 1913 got $7,671,000.

Mr. SPARKMAN. Let me ask the gentleman why he puts Florida in there?

Mr. DONOVAN. You New York people are not getting $1 for every $100 that you are putting into the Treasury.

Mr. GOULDEN. We know that.

Mr. DONOVAN. In order to be fair, I ought to tell how much little Oregon gets. She does pretty well—$827,000; and, taking all kinds of taxes, she pays $1,500,000. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. SPARKMAN. I yield 25 minutes to the gentleman from Mississippi [Mr. HUMPHREYS].

Mr. HUMPHREYS of Mississippi. Mr. Chairman and gentlemen of the House, I am sorry that my distinguished friend the gentleman from Texas [Mr. CALLAWAY] has not seen fit to remain here with us throughout this discussion. Like a good many other gentlemen he has gotten into his mind a number of unrelated, misunderstood, and thoroughly undigested facts, from which he draws the conclusion that the money spent in the improvement of our rivers and harbors is wasted.

Mr. Chairman, if I can have order I want to state some dry, though instructive, facts. I assume that the gentleman from Texas [Mr. CALLAWAY] is in favor of the construction of the Panama Canal. I assume that the gentleman is in favor of the appropriations we have expended in the improvement of the Great Lakes. It is estimated by Mr. Emory Johnson, the expert who appeared before the Committee on Interstate and Foreign Commerce and gave his testimony as to the probable amount of tonnage that would go through the Panama Canal—and it was upon his estimate that the tolls were fixed—that there will be 10,500,000 tons, coastwise and everything included, go through the canal the first year. Last year 18,000,000 tons went through the Suez Canal. The tonnage borne on the rivers provided for in this bill was last year 369,000,000 tons. Think of those figures, gentlemen. Ten and one-half million tons to go through the Panama Canal, 18,000,000 tons through the Suez Canal, and the rivers that are provided for in this bill floated 369,000,000 tons last year.

Mr. MURDOCK. What proportion of that is coastwise tonnage?

Mr. HUMPHREYS of Mississippi. I do not quite understand the gentleman's question.

Mr. MURDOCK. What proportion of the amount going through the rivers appropriated for in this bill is coastwise tonnage?

Mr. HUMPHREYS of Mississippi. That does not include coastwise tonnage. This is river tonnage. Including the harbors, the coastwise and foreign traffic handled in our harbors, the total tonnage carried by the projects appropriated for in this bill is more than 1,000,000,000 tons.

Mr. STEPHENS of Texas. Does that include the tonnage carried on the Lakes?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. STEPHENS of Texas. What would be the river tonnage alone, outside of the Great Lakes?

Mr. HUMPHREYS of Mississippi. The river tonnage, not including the rivers connecting the Great Lakes, is 204,000,000 tons. So when gentlemen take this floor, which gives them the country as an audience, and assail the committees of the House and assail Congress for its appropriations they ought at least to devote enough time beforehand to the study of the figures which they have collated to digest them properly. It is impossible to understand figures unless you compare them with other figures which you do understand. So I have stated this river tonnage in comparison with the tonnage which it is estimated will go through the Panama Canl. The total tonnage which it is estimated was carried from coast to coast by the railroads was 3,000,000 tons; that is, carried from points on the coast that would naturally use the canal. The traffic across the country on the railroads, as estimated by Mr. Emory Johnson, was 3,000,000 tons.

Mr. MOORE. That is not the total tonnage, that is the through tonnage.

Mr. HUMPHREYS of Mississippi. Through tonnage from coast to coast, 3,000,000 tons. The tonnage estimated to go through the canal from coast to coast is 1,250,000 tons. Now, think of that as compared with the tonnage borne on the rivers for which we provide in this bill, 369,000,000 tons, and you see how indefensible is a general assault.

Mr. MOORE. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. MOORE. When the gentleman speaks of 369,000,000 tons of river tonnage he means registered tonnage.

Mr. HUMPHREYS of Mississippi. No; actual freight carried.

Mr. MOORE. I want to call the gentleman's attention to what undoubtedly he is aware of but may not have brought out, that there is a tremendous unregistered tonnage, not recorded in any engineer's office or in any customhouse, of which we can obtain no account. That should be added.

Mr. SPARKMAN. If the gentleman will pardon me, I want to say that the engineers get up these statistics as best they can; they go into the community and get the amount of trade, and so forth, and make the best estimate they can.

Mr. MOORE. But on many tributaries and small rivers the tonnage is unaccounted for, and there is a tremendous volume of it of which there is no register. Therefore no account of it is kept, and it is not in the figures given by the gentleman from Mississippi.

Mr. HUMPHREYS of Mississippi. That is the observation of every Member here. Now listen. If we depend on the railroads to carry this freight, see what an equipment it would take. A freight train on an average consists of 30 loaded box cars of 60,000 pounds each, which is a big average. It would require 5,000 locomotives pulling 5,000 loaded trains 24 hours in the day, every day in the year, to move the tonnage floating on our rivers 100 miles. That is assuming that they can move 100 miles in a day, but we have the testimony before our committee by the highest expert traffic authority perhaps in this country, Mr. James J. Hill, who stated that they could not move on an average more than 20 miles a day. But multiply that by 5, and it would require 5,000 locomotives, each bearing 30 loaded box cars of 60,000 pounds capacity each, running every day in the year, 24 hours in the day, to move that tonnage 100 miles.

Now, that being true, how unjustifiable it is for gentlemen to make such assaults as we have heard made here to-day on our rivers and harbors and charge that we are distributing the public funds as a matter of pork.

That is a reflection on all your constituents. It is assuming that the people we represent have not more than half sense. How could you gain favor at home by spending the people's tax-raised money on little insignificant projects, where the money was being wasted? Who above all others would know that it was wasted but the people who live on the banks of the creek and the banks of the river? And yet it is their votes that we are supposed to be purchasing by the gentlemen who denounce this as a pork barrel.

The inland commerce of the United States exceeds in value the aggregate value of the international commerce of all the nations of the world combined. I am glad to see that the gentleman from Texas [Mr. CALLAWAY] has returned to the Chamber. I am sorry he has missed this instructive address; but he is in time, however, to hear this: Gentlemen who go out on the high seas and embark in the enterprise of destroying the commerce of the ocean are called pirates, and they are hung at the yardarm. What shall we say, then, of the distinguished gentlemen who come here on the floor of this House in an effort to destroy the inland commerce of the United States, or at least to seriously injure it?

Mr. CALLAWAY. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. CALLAWAY. All the robbers, if they could, would kill a policeman at every crack. I am sure these Treasury robbers will hang me if they can. [Laughter.]

Mr. HUMPHREYS of Mississippi. I do not say that my distinguished friend from Texas is a pirate. I would not say that, not because he is not guilty, but because I love him. [Laughter.] I would rather call him an angel, but a destroying angel, who stands with his sword of flame across the path to beat back progress and the industrial development of his own country.

Now, Mr. Chairman, I really took the floor to discuss an entirely different subject than the one to which I have addressed my remarks. I have said this much in reply to the criticism that has been offered, in justification of the Committee on Rivers and Harbors.

Mr. MURDOCK. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. I will.

Mr. MURDOCK. The gentleman from Mississippi has made one assertion and the gentleman from Texas [Mr. CALLAWAY] has made another. I want the gentleman to reconcile them. How does he explain the statement of the gentleman from Texas that the tonnage moved on the Ohio River would cost $23 a ton? The gentleman from Mississippi heard the gentleman from Texas make that statement; now, how does he reconcile it?

Mr. HUMPHREYS of Mississippi. I will have to answer that as the gentleman from Texas answered the suggestion of the gentleman from Massachusetts [Mr. MURRAY], who asked him to reconcile the speech of the gentleman from Massachusetts, Mr. ROGERS. It is irreconcilable; it is not the fact, in my opinion.

Mr. MURDOCK. Then what has the poor layman who has not a navigable river in his district to do?

Mr. HUMPHREYS of Mississippi. I will say this: I have seen one boat come down the Ohio River, pass my town——

Mr. SPARKMAN. Just let me say that the gentleman is correct in saying that the gentleman from Texas is mistaken, because the tonnage on the Ohio River from Pittsburgh to the mouth is 10,000,000 tons per annum.

Mr. HUMPHREYS of Mississippi. As I was saying, I have seen one boat bearing 58,000 tons in one cargo——

Mr. FREAR. Let me ask the gentleman from Mississippi if it is not the Ohio River that he has in mind instead of this system of locks and dams which was shown to be in existence only 54 days in the year, to which the gentleman from Texas alluded? Are not the figures of the engineer correct as given by the gentleman from Texas [Mr. CALLAWAY]?

Mr. HUMPHREYS of Mississippi. I must confess that I did not hear the figures given by the gentleman from Texas. I possibly may have been out of the Hall. I do not know what figures the gentleman refers to. I was going to say that this boat I speak of that passed my town had a cargo of 58,000 tons of coal, which was carried to New Orleans at a cost of $18,000, or about 30 cents a ton. The railroad freight rate from Pittsburgh to New Orleans on coal at that time was $3 a ton, which would have been $180,000 instead of $18,000. It is unreasonable for anyone to think you can carry freight as cheaply on a railroad as you can float it on a navigable stream. The purpose of the canalization of the Ohio River is to make that river navigable all the while. Of course under the situation now these barges come out only when the river is flowing at a high stage. What this improvement will result in I do not know. More than a hundred million tons of freight, however, are created at Pittsburgh every year. There is more tonnage created at Pittsburgh than in any other three places on the face of the earth. Think of Pittsburgh here being compelled to ship all of that freight to the seaboard by railroads without potential competition of the river, when it is possible by the expenditure of a very reasonable sum to secure navigable water from Pittsburgh down to the Gulf. Just look at the map I have here. I think it will convince anyone of the wisdom of the expenditure of that money. There is more tonnage on the Ohio River than it is estimated will be at the Panama Canal, and all of it is American tonnage—more American tonnage on the Ohio River to-day, in fact, than we estimate will go through the Panama Canal, domestic and foreign combined.

Mr. BARKLEY. Mr. Chairman, could it not be reasonably expected that if boats were assured of navigation in the Ohio River the year around that tonnage would double in a reasonable length of time?

Mr. HUMPHREYS of Mississippi. Personally, I think there is little doubt about that. Then we have now just secured a 9-foot depth from the mouth of the Ohio River out to the ocean. The old through traffic from the upper reaches of the Ohio River down the Mississippi to New Orleans has ceased. The only traffic along the lower Mississippi, south of Cairo, practically all of it now—or, at any rate, from Cincinnati down the Ohio and then down the Mississippi—is local traffic. There is very little through traffic left; but when this canalization is completed, which will be in a few years, the Ohio River, running through the busiest valley in the world, with more tonnage created than in any other equal territory on the face of the earth, it is not assuming too much to believe that that traffic will revive.

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. CALLAWAY. The Mississippi River now does not carry through tonnage between St. Louis and New Orleans.

Mr. HUMPHREYS of Mississippi. Not between St. Louis and New Orleans, but from Cairo.

Mr. CALLAWAY. Between Cairo and New Orleans it does not carry it now. There is no through freight boat on the Mississippi.

Mr. HUMPHREYS of Mississippi. No.

Mr. CALLAWAY. Is it not a fact that at Prophet Island, 140 miles from New Orleans, they take gravel out of the bed of the river to use in concrete work and other business in New Orleans, float it across the river, and load it onto railroad cars, and then carry it to New Orleans?

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I have heard that statement made; but there must be some special reason for it, if it is true. It is possible they take gravel out of the river at Prophet Island, just as they do at Greenville. I can testify to that. They take gravel out at Greenville with hydraulic pumps, which simply load it directly onto a freight car.

Mr. CALLAWAY. Instead of floating it down the river, it goes down on a railroad car?

Mr. HUMPHREYS of Mississippi. Yes; because you would first have to load it onto a barge, and then unload that and put it again onto a car. This way it is taken directly out of the

river and loaded onto a freight car, and then taken to New Orleans, which saves an extra loading. It is not contemplated that we are going to take very much tonnage out of the bottom of the river by hydraulic dredges.

Mr. CALLAWAY. One further question.

Mr. HUMPHREYS of Mississippi. Very well.

Mr. CALLAWAY. Is it not a fact that the Ohio River now is losing tonnage?

Mr. HUMPHREYS of Mississippi. I think not.

Mr. CALLAWAY. Do not the engineers' reports show that?

Mr. HUMPHREYS of Mississippi. No; the tendency is not that way. One year it may be a little lower than another, but that is all.

Mr. MURDOCK. Mr. Chairman, I would like to ask the gentleman a question or two about the map he has in front of him. What does the map pretend to show?

Mr. HUMPHREYS of Mississippi. This is a map of the navigable rivers of the United States.

Mr. MURDOCK. Is the Missouri River navigable up as far as that shows, to Fort Benton?

Mr. HUMPHREYS of Mississippi. Yes; theoretically.

Mr. MURDOCK. Do we appropriate for the Missouri River up that far?

Mr. HUMPHREYS of Mississippi. No; we are appropriating for the Missouri River up to Sioux City, but I will ask the gentleman from Missouri [Mr. BOOHER] to answer that.

Mr. BOOHER. Mr. Chairman, $150,000 is appropriated for the Missouri River from Kansas City to Sioux City, and $150,000 from Sioux City to Fort Benton.

Mr. MURDOCK. So we do appropriate money clear up to Fort Benton?

Mr. BOOHER. We do, for doing snagging work and some bank-protection work and things of that kind; but the river from Kansas City to the mouth is a separate project, and there is appropriated for that, under a 10 years' contract, $2,000,000.

Mr. HUMPHREYS of Mississippi. Mr. Chairman, I would like to refer for a moment to the Mississippi.

Mr. HARDY. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. HARDY. Is it not a fact that if the railroads are prohibited from cutthroat competition, reducing their rates below the cost at water-competitive points, the water-borne freight of inland waters will be greatly increased?

Mr. HUMPHREYS of Mississippi. Well, I understand that is true in other countries of the world. But now——

Mr. PLATT. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. I will.

Mr. PLATT. Then is it not almost necessary that railroads should have increased freight rates in order to allow more traffic——

Mr. HUMPHREYS of Mississippi. I have no information about that.

Mr. PLATT. Will the gentleman allow me to remark——

Mr. HUMPHREYS of Mississippi. Not right now.

Mr. PLATT. To make a remark in regard to the coal traffic?

Mr. HUMPHREYS of Mississippi. If the gentleman will pardon me, I would like very much to explain this map about the Mississippi River, and then I will yield to the gentleman. I have only a very few minutes left. The improvement of the Mississippi River as contemplated by this map, which has been in progress for a number of years, is by the construction of levees and work of bank revetment to prevent caving. Now, it is immaterial whether we favor the improvement of the Mississippi River for the purpose of facilitating interstate commerce or for the purpose of preventing overflows of riparian land. I say it is immaterial, for this reason: That the engineers, after a long series of years of full investigation—in fact, after having subjected the Mississippi River to a more critical study than any river in the history of the world has ever been subjected to—have all agreed that, whether we improve the river for the purpose of interstate commerce or whether we improve it for the purpose of protecting its own valley from overflows, we must adopt the same identical method—levees and revetment. It is a very common belief that the construction of levees causes the bed of the river to fill, and it is a very curious fact that so many people have that idea, and equally curious that when a man once gets it into his head it is practically impossible ever to induce him to abandon the belief; but it is not true. The Mississippi River Commission for 30 years have measured the bottom of the Mississippi River and compared the measurements with a fixed datum plane established in 1882. They have taken innumerable soundings. In one stretch of the river along the front of my district, 200 miles in length, they have taken 41,000 soundings in different years to establish the fact whether or not the bed of the river was rising, and they have concluded, as a matter of fact, it has been depressed on an average of something more than a foot. Now, I have drawn this map here without regard to any scale——

Mr. LAZARO. Will the gentleman yield for a question?

Mr. HUMPHREYS of Mississippi. I will.

Mr. LAZARO. Does the gentleman mean that the bottom does not fill up if the levee is broken?

Mr. HUMPHREYS of Mississippi. I mean to say, when the levee is not broken. Of course, if the levee is broken it will fill.

Mr. MURDOCK. It is at least built up higher than the surrounding country.

Mr. HUMPHREYS of Mississippi. It is not; it is just the opposite.

Mr. MURDOCK. It looks so when you are on the ground.

Mr. STEPHENS of Nebraska. Is not the bed of the river higher than the surrounding country?

Mr. HUMPHREYS of Mississippi. Oh, no; I do not think that is true of any river in the world.

Mr. STEPHENS of Nebraska. I refer to where the levees are, at the lower end.

Mr. HUMPHREYS of Mississippi. At the lower end in the neighborhood of New Orleans? At New Orleans the river is 200 feet deep. How can you have the bottom of the river 200 feet deep and yet higher than the adjacent country? Now, listen, there is no reason in the world why it should be true, it is not true of any other river in the world. No river on the face of the earth running through alluvial country which has been leveed has ever filled up its bottom on account of the levees. All the leveed rivers have been subjected to absolute tests and measurements by scientific engineers and the reports agree except as to one river, and that is the Yellow River in China, and the only reason we can not refute the statement in regard to the Yellow River is that it is so far out of the beaten path of the world that nobody knows anything about it.

Mr. MADDEN. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. Yes.

Mr. MADDEN. As a matter of fact, when you confine the water to a given area you then create a channel which cuts to a depth where the current will control itself.

Mr. HUMPHREYS of Mississippi. Undoubtedly. Now, I want the gentleman from Kansas to listen. Here is a section of the Mississippi River, with levees on either side. There is the low-water level, which is 40 feet deep, and the average spring rise is 40 feet, coming here to the top of the bank, but does not overflow. Now, in extremely high water it goes 12 feet above that, almost to the top of the levees. Now, I submit to the gentleman if a flood confined between banks were going to fill the bed of the river with silt, this spring rise which comes out of the Missouri River, which is the only tributary to the Mississippi that contributes any silt, would do it. We find, however, that in the course of the ages and cycles it has not filled it up. It is confined between the banks——

Mr. GRAHAM of Illinois. Will the gentleman yield?

Mr. HUMPHREYS of Mississippi. In a second. Now, why by building levees up 12 feet higher, why would that 12 feet additional cause the bed of the river to silt up when 40 does not?

Mr. MURDOCK. I want to say to the gentleman from Mississippi I do not believe the construction of the levees would do it, but it seems to me at places the Mississippi River has built itself up above the surrounding country. That is merely an observation from having traveled down the river.

Mr. HUMPHREYS of Mississippi. Now, the gentleman understands that from the low-water level to the top of the banks it is about 40 feet?

Mr. MURDOCK. I understand.

Mr. HUMPHREYS of Mississippi. And then the river averages about 40 feet deep. So that in order for the surrounding country to be lower than the river bed there must be a declivity here of more than 80 feet. Well, now, there is not any such thing existing there.

Mr. MURDOCK. Probably not where the river is 40 or 80 feet deep.

The CHAIRMAN. The time of the gentleman from Mississippi [Mr. HUMPHREYS] has expired.

Mr. SPARKMAN. Mr. Chairman, I yield five minutes more to the gentleman.

Mr. MURDOCK. I would like to have the gentleman go on and tell us about the flood relief there.

Mr. HUMPHREYS of Mississippi. Now, as to the subject of revetment—to revet the banks and keep them from caving. This [indicating] represents the cross section at a point right in here. Where the water runs around it digs deep on one side

and is shallow on this side. This bend begins to cave there. They take a willow mattress here at the low-water level, and it is floated out three or four hundred feet on the level of the river, and it sinks and conforms to the contour of the bank below low water. Now, that is made of willow trees and never is exposed to the air. The rule is that it is permanent and will last as long as any other human structure will last. That prevents the levees from caving in the river and prevents the banks from caving in and prevents these sand bars.

Another subject that I want to explain is the proposition to cut the bends out of the river. The river is very crooked. This [indicating] is a stretch just above the town in which I live in Mississippi which is one of the most tortuous sections of the river. From this point [indicating] down to the city of Greenville is about 8 miles in a direct line, and yet by river it is about 35 miles. Now, the river falls about 6 inches to the mile, so that in that 35 miles there is a fall of some 17½ feet. Now, if the river is permitted to cut the bend out and straighten it out, you will see exactly what will happen. We would have a fall of 17½ feet through this alluvial land in a distance of 8 miles, which means utter destruction. There is no work of man that could be placed there that could hold that current, and the result would be that it would accelerate the current for 40 or 50 miles above and 40 or 50 miles below, and would wash out any revetment work that could possibly be there, and tumble the levees in, and what would be the final result? It would eat into this bank here and eat in that way, and in the course of years would form another bend just as long as it is now. In other words, it would establish the equilibrium it has established through all the years of time.

Mr. BOOHER. Will the gentleman tell the gentleman from Kansas [Mr. MURDOCK] how much land passes into the Mississippi River from the Missouri each year from Sioux City, Iowa, to its mouth?

Mr. HUMPHREYS of Mississippi. Ten thousand four hundred and ninety acres cave into the Missouri River annually. There is enough land which caves into the Mississippi River every year to fill its banks full for a distance of 30 miles.

Mr. MURDOCK. That soil is not carried out to sea?

Mr. HUMPHREYS of Mississippi. Here is the bottom of the river [indicating].

Mr. MURDOCK. What becomes of that soil?

Mr. HUMPHREYS of Mississippi. It goes simply to the next bend below. It tumbles in and is carried down and forms these bars here [indicating]. This represents the bottom of the river. It is simply a series of hills. If you wanted to travel down the bottom of the Mississippi River you would travel between two high hills. I have discussed the matter in the report fully. These bars which are formed have run the steamboat traffic off of the river. Then, when the flood comes, it is controlled there by levees and revetments, and the current washes the top of this off [indicating], and it flows down that side, and the flood carries it down 20 miles maybe, and in the course of human events it goes out to sea. Five hundred million tons go into the sea every year, and about that much comes into the river from the Missouri River and its other tributaries.

So the great bars that are formed on the river, as a matter of fact, are formed by the caving in of the banks into the river. Now, if that can be prevented by revetment, we will have a navigable channel from Cairo down to the Gulf. No engineer, civil or military, has estimated less than 14 feet, and we have had the best in the country. Mr. Cooley thinks 20 feet would be right. Some engineers have estimated, among them Maj. Dabney, of my district, who is one of the most distinguished engineers in the country, 25 feet. If we could have a great channel from Cairo to the Gulf, 25 feet deep, that would maintain itself forever, and the work would be as permanent as any work of man can be made.

I am sorry I have not more time, but I suppose you are glad. At a later day I will have more to say on this project in its relation to flood control. However, I thank you very much indeed for the attention you have given me. [Loud applause.]

Mr. HUMPHREY of Washington. Mr. Chairman, I yield 25 minutes to the gentleman from Washington [Mr. LA FOLLETTE].

Mr. LA FOLLETTE. Mr. Chairman, public moneys appropriated for the improvement of rivers and harbors must be paid from taxes collected directly or indirectly from the producing citizenship of our country. All the moneys paid out for foreign products that come in competition with our own and which products would have been supplied at home is just so much economic waste and becomes a permanent loss to this Nation. Money so expended goes to benefit the people of foreign countries and contributes to the improvement of their rivers and harbors instead of our own.

Mr. Chairman, on February 25 this year the Secretary of Commerce, Mr. Redfield, in a speech before the Chamber of Commerce of Hamilton, Ohio, is reported as having said:

> The first and foremost influence of the new tariff law has been to add to our food supply. For example, take the last three months of 1912 and the last three months of 1913.
>
> In the former we imported 112,000 cattle; in the latter 341,000. In the former we brought in 253,000 bushels of corn; in the latter 4,450,000 bushels. In the former 13,600 bushels of oats; in the latter 13,230,000 bushels. In the same period of 1912, 41,000 bushels of potatoes; in 1913, 2,800,000 bushels.

Mr. Chairman, I am at a loss—in fact, I utterly fail—to grasp the angle from which the Secretary, Mr. Redfield, views this increased importation of foodstuffs. I am loath to believe that he was so mistaken in facts as to believe for one minute that there was a short supply in the United States of any of the articles he mentioned or that the increased importations were needed to take care of any shortage. On the contrary, we had a normal supply of all of the articles enumerated and have made exportations from this country during the period mentioned of some of all these commodities.

There can be but one interpretation placed upon the Secretary's remarks at Hamilton, and that is that he felt the country was to be congratulated on this increased food supply as a competitive method to reduce the price being paid to the American farmer for like products. The Democratic Party had promised reduced cost of living to the American people, and Secretary Redfield evidently tried to impress his audience that the increased importations he mentioned were proof positive that their promises were being kept, but alack and alas! Along comes the Department of Labor and very inconsiderately gives statistics that show a general increase in the cost of living in the United States since the passage of the act, the average increase per month for the three months mentioned by Mr. Redfield on 15 of the principal articles of consumption in the United States above that of the corresponding three months in 1912 being 8.1 per cent, a very substantial increase despite the increased supply of foodstuffs on which the Secretary dwelt so enthusiastically. The figures compiled by the Department of Labor go to prove absolutely the contention of gentlemen on this side of the Chamber when the tariff bill was under discussion that an increased importation would have the effect of lowering prices paid to the producer, but would not lower cost to the consumer until his purchasing power was reduced to a minimum, and then prices would be relatively higher to him than before, as the cheapest article is high, indeed, to those who have no money with which to buy.

Mr. Chairman, the purchasing abroad of the commodities enumerated by Mr. Redfield in his Hamilton speech drained from the purchasing power of our own people, conservatively estimated, not less than $15,000,000, gone to enrich the people of other lands, to make prosperous the foreign farmer and poorer the American farmer, to encourage the former and discourage the latter. I think our American farmers will soon appreciate to the full limit the "new freedom" they inherited with this administration.

Mr. Chairman, I wish again to emphasize what I have said before on this floor—woe to the country that tries to make its people prosperous and happy at the expense of its agricultural classes, because on their welfare depends the welfare of all. Reduce the purchasing power of the farmer and you immediately to that extent injure and decrease the purchasing power of every city, town, and village in the country.

Mr. Chairman, the Democratic Party in its platform at Baltimore had this to say of the high cost of living:

> The high cost of living is a serious problem in every American home. The Republican Party in its platform attempts to escape from responsibility for present conditions by denying that they are due to a protective tariff. We take issue with them on this subject and charge that excessive prices result in a large measure from the high-tariff laws enacted and maintained by the Republican Party, and from trusts and commercial conspiracies fostered and encouraged by such laws, and we assert that no substantial relief can be secured for the people without import duties on the necessaries of life are materially reduced and these criminal conspiracies are broken up.

Then, in conformity to your platform, you proceeded to materially reduce them by practically placing everything the farmer produces on the free list. The words "materially reduce" in your platform you construed as meaning total elimination in your bill, and passed your bill under that construction, placing the necessities of life produced by the farmer on the free list.

Your law has been on the statute books for almost six months. Imports of the necessities have largely increased, as you intended they should; prices paid to the American farmer have decreased at wholesale, as you evidently intended they should;

but where is the "saving in every American home" that you promised? The cost of living has steadily increased. Your own Department of Labor admits it by its statistics, thereby substantiating the Republican Party's claims that the high cost of living was not due to the tariff. Mr. Chairman, the American corn raisers, on account of the more than 7,000,000 bushels imported into this country since the enactment of your tariff law—followed by the importations of Argentina corn—have been compelled to take 10 cents a bushel less for their corn. Yet there has been no reduction in the prices of corn products to the American consumer.

Your tariff reductions on farm products have simply been used as a club to knock down the wholesale prices to the farmer, with no corresponding reduction to the consuming public. The same may be truthfully stated of most of the commodities affected by this tariff enactment.

It has led to increased importations, to the closing of American manufacturing establishments, and the curtailing of American production, decreasing the number of employed, and in many cases to a lower wage being paid. Yet the cost of living has steadily advanced or remained stationary. With our purchasing power reduced by exactly the amount of our increased imports, with a fast depleting Treasury, we are to-day paying as high or higher prices for everything we buy as at any time in our country's history. In the Spokesman-Review, a newspaper published in Spokane, which is in my district, there appeared on March 14 the following significant editorial:

UNITED STATES BUYS 95 PER CENT OF BRITISH COLUMBIA SHINGLES.

In this State 15,000 wage earners are dependent on the shingle industry of western Washington. Not many of them will vote the Democratic ticket next November.

Not grasping the economic effect of free trade in shingles, these men went on strike last January. Their employers told them they could not grant their demands; that free shingles from British Columbia had put them up against the hardest sort of competition, and the business simply could not bear the weight of better terms to labor. The employers said they would like to pay better wages and grant a shorter day, but could not go on operating their plants at a loss.

The hard facts have made an impression on the strikers' minds, for they have called off the strike and agreed to return to work on the open-shop conditions laid down by the mill operators immediately following the strike.

If any lingering doubt remained that the mill owners spoke the truth, it would disappear before the terse, uncolored news item in the Nelson (British Columbia) Daily News:

"VANCOUVER, BRITISH COLUMBIA, *March 8*.

"Most of the shingle mills in British Columbia are said to be shipping almost their entire output to the United States. Prominent shingle manufacturers say that 95 per cent of the shingles now made in British Columbia are being shipped across the border to meet demands which have been gradually increasing since the removal of the duty under the new United States tariff revision last autumn. Eighty per cent of the shingle mills in British Columbia are now in operation, and the provincial product is being given preference in all the United States. The spring trade has hardly opened yet, but the demand is looked upon as auguring well for the industry during the coming summer."

The British Columbia manufacturer enjoys now a double advantage in cheaper stumpage and low-priced Hindu, Chinese, and Japanese labor. He will have another advantage if the canal is opened to British coastwise ships on the same terms given to American ships, for the British ships can carry British Columbia shingles to the markets of the United States at lower freight rates than the American ships, required to carry larger crews, pay higher wages, and higher port charges, can quote.

Mr. Chairman, the shingle factories of my State put out more than $18,000,000 worth of shingles in 1913, selling them f. o. b. manufacturing points at an average price of $1.81 per thousand, a price, I submit, that should not impress anybody as being excessive and that gave only a fair return above the cost of production. The shingle industry was formerly protected at the rate of 50 cents per thousand, and even then Canada shipped quite a number of shingles into this country. Under the present law shingles are free, and prominent shingle manufacturers of British Columbia say that 95 per cent of their output is being shipped across the border into the United States. Like on all other tariff-reduced articles the British Columbia shipper and his consignee in this country will divide the profits, and the consumer will pay the same old prices. With this difference there will be several millions of dollars that formerly were put into circulation in my State to pay labor, help build our schoolhouses and roads, and contribute to our general welfare, including our rivers and harbors improvements, will go to a foreign country that contributes not 1 cent to our institutions.

Mr. Chairman, I think it can be truthfully said of all commodities affected by this tariff law that the general public has as yet received no benefits in lower prices nor will they, as I said before, until their purchasing power has been reduced to the lowest ebb, and their benefit will only be the aftermath of what has been a curse to them, brought on through tariff tinkering followed by lack of confidence, shrinkage of values, and nation-wide depression, a disease fittingly described by the words "too much paralysis Democraticus." [Applause.]

Mr. HUMPHREY of Washington. Mr. Chairman, how much time did the gentleman consume?

The CHAIRMAN. Fifteen minutes.

Mr. SPARKMAN. Will the gentleman from Washington use some of his time?

Mr. HUMPHREY of Washington. I will yield some time to the gentleman from Illinois [Mr. MANN].

Mr. SPARKMAN. Mr. Chairman, how much time have I?

The CHAIRMAN. The gentleman has 15 minutes.

Mr. SPARKMAN. Then I will yield 15 minutes, Mr. Chairman, to the gentleman from Massachusetts [Mr. MURRAY]. The gentleman from Washington [Mr. HUMPHREY] yields five minutes in addition.

The CHAIRMAN. The gentleman from Washington yields to the gentleman from Massachusetts [Mr. MURRAY] 5 minutes and the gentleman from Florida yields him 10 minutes?

Mr. SPARKMAN. Yes.

Mr. HUMPHREY of Washington. I will give the gentleman five minutes of my time.

The CHAIRMAN. Very well. The gentleman from Massachusetts [Mr. MURRAY] is recognized for 15 minutes.

Mr. MURRAY of Massachusetts. Mr. Chairman, I suppose it is needless for me to say as one of the men whose privilege it was to make up this bill that I, of course, shall vote for it to final passage.

I have been referred to, Mr. Chairman, by the gentleman from Texas [Mr. CALLAWAY] as one of the interested parties who make up the jury that has compiled this report for submission to the House of Representatives. I am glad to say that I am one of the members of the Committee on Rivers and Harbors, but the extent of my interest, I hope, will not be measured by the extent of the appropriations recommended in this bill for that section of the country from which I come. Surely, Mr. Chairman, I should be ashamed of myself if my interest in this bill were determined by the extent of the appropriations recommended in it for the New England States.

I supposed it was my duty as the only Democratic member on the committee from New England to give attention to the claims of my colleagues from New England for appropriations for rivers and harbors in that section. But let me assert, Mr. Chairman, in the beginning of my remarks that no member of that committee, from the chairman down to the newest member of it, has shown any consideration of sectionalism during any meeting of the committee which I was permitted to attend.

Mr. Chairman, let me assert the further fact that in the consideration of this measure there was no difference of party and there was no difference of members from different sections of the country, but Republicans and Democrats alike were invited to come to every meeting, both open and executive, of the committee. This bill does not come in to-day as the result of any collusion on the part of a few men on the committee nor on the part of a few men who represent a particular section or a particular party, but it comes in here as the result of the intelligence, the application, and the wisdom of 21 men who were designated by this House of Representatives to attend to the business of making up a river and harbor appropriation bill.

Mr. Chairman, these are familiar truths to the men who compose this committee and to the men who compose the House of Representatives; but in view of a speech that was made, I regret to say, by a colleague of mine from Massachusetts [Mr. ROGERS] on the 10th day of February in this Chamber, it is pertinent to set these things forth with clear and unmistakable emphasis. My colleague of Massachusetts [Mr. ROGERS] said in a speech that he delivered in this House under date of February 10, 1914, that two Southern States, Texas and Florida, were getting an inordinate share of the appropriation for river and harbor work. I paid but little attention to the speech at the time it was made, because it was largely a compilation of figures that are familiar to most of us who served in the Sixty-second Congress. But since I have seen that speech under a cleverly set forth caption, published in great numbers, with the legend upon it, "The South is in the Saddle," it has occurred to me that it was made not for the purpose of presenting facts that we all know but rather for the purpose of circularizing in the close districts in Massachusetts and other parts of the country during the coming congressional campaign.

Mr. Chairman, it is not true that the South is in the saddle in any wrongful sense, either in this Congress or in the executive departments of this Government. The South is in the saddle, perhaps, in the Navy Department of the Government, because there is, I am happy to say, a splendid southern gentleman who presides as Secretary of the Navy. There was a clear-cut issue presented a short time ago as to whether a southern shipbuilding company or a northern navy yard should be given a contract for a great amount of work. There was a clear-cut issue over the building of a supply ship by the navy yard under a contract involving an expenditure of probably a million

and a half dollars of the money of the people of the United States. The navy yard in the district which I have the honor to represent was a competitor for that work. A southern shipbuilding company, at Newport News, Va., was also a competitor for that work.

The State of Virginia is ably represented at the other end of this Capitol by two Senators of great weight and long experience. The State of Virginia is represented in the House, as you all know, by many men of great ability, long experience, and great worth, and of the same political party as the gentleman who is Secretary of the Navy.. We of Massachusetts have no Democratic Senators. We of Massachusetts have no delegation of Representatives in Congress who have served long terms here, who could go unitedly to that Secretary of the Navy with our appeal for that work for the Boston Navy Yard. But, Mr. Chairman, the South was in the saddle, and with characteristic Southern fairness and with characteristic Southern decency, the Secretary of the Navy took action whereby the navy yard at Boston will build that supply ship for the Navy of the United States. [Applause.]

Let me remind my colleague [Mr. ROGERS] that for several years we had a Massachusetts man as Secretary of the Navy. No one likes him personally more than I do. No one has greater respect for his gentlemanly qualities than I have; but, Mr. Chairman, our appeal to equip the Boston Navy Yard for shipbuilding purposes fell upon deaf ears when we addressed that appeal to the Republican Secretary of the Navy, a Massachusetts citizen, George von Lengerke Meyer. It remained for a Democratic Secretary of the Navy, and it remained for a Democratic Committee on Naval Affairs, to frame an item in the naval appropriation bill that is pending to equip the Boston Navy Yard for shipbuilding purposes.

So much, then, for that department. I might go on if I had the time and cite other instances where thoroughly Southern-controlled executive departments have not practiced discrimination against us of the North.

Now, is it true that we have been unfairly treated in the matter of appropriations for river and harbor work?

Mr. Chairman, my colleague [Mr. ROGERS] took the appropriations of the Sixty-second Congress. I think it was terribly unfair to take the appropriations of any single Congress, whether the Sixty-second, the Fifty-second, or the Forty-second, or any other single Congress, for the purpose of making any criticism of the sort that he made. I cite his attention to Senate Document 382 of the Sixty-second Congress, second session, which is a comprehensive report of expenditures on rivers and harbors, a letter from the Secretary of the Treasury transmitting information in response to a Senate resolution of December 7, 1911, relative to expenditures for rivers and harbors. Mr. Chairman, that document was compiled, not by a Democratic Secretary of the Treasury, but by Mr. Franklin MacVeagh, the honorable gentleman who was the Secretary of the Treasury under the administration of former President Taft. That compilation shows that three States received more money than Massachusetts from the Federal Government. Michigan leads the list with $43,494,495.87, New York is second with $41,925,351.80, Texas is third with $24,382,529.60, and Massachusetts is next with $17,284,638.53. It is interesting to note that Ohio is close behind Massachusetts. And from this compilation it is clear that the millions have gone from the Federal Treasury for river and harbor improvement not to Texas and Florida but to Michigan and New York in the first instance and to Texas after these. And even Georgia and Wisconsin come before Florida in the list.

Mr. Chairman, it was pointed out to-day by a gentleman who criticizes this bill that Texas is a State great in extent and of very great area. I have been told by Members from Texas who are serving in this Congress that single congressional districts in that State have almost as much acreage in them as the entire area of the Commonwealth which I, in part, represent. We are a small State, so far as area goes, and while we prize our rivers and harbors and think our claims are worthy of the consideration of the National Government, our streams are not so numerous nor so great in the extent over which they flow as the rivers and harbors of the great State of Texas. I have been in Florida twice—first in 1898, when I was in the Army of the United States, and again in 1911–12, when I was privileged to go with the Committee on Rivers and Harbors to be present at the dedication of the over-sea railroad down to Key West. There were rivers and harbors on every side. In fact, it was frequently pointed out that one trouble with the great State of Florida is that much of its land is under water. And so it goes. When any comparison is made as to appropriations for these States it seems to me to be fair and just and right to include in the estimate something of the character of the States in question, and something of the extent of the rivers, harbors, and tidal waters that may require appropriations of this kind.

Mr. Chairman, I have said these things, not because they seem to me to be especially important in the consideration of this bill, but in order that there may be some answer made in the place where the charge was made, which answer can be refuted if it is not sound, if it is not based on the facts in the case.

I regret very much, Mr. Chairman, that there is no appropriation in this bill for the improvement of Boston Harbor to the depth of 40 feet. There are those, on the one hand, who say that this bill is made up by a committee of interested parties. What will those persons who make that charge say when I point to the fact that the State of Massachusetts is represented on this Rivers and Harbors Committee not by one man of one party but is represented by two members. Out of the 21 members of the Committee on Rivers and Harbors who made up this bill 2 are from the State of Massachusetts, because my worthy colleague [Mr. TREADWAY] and myself have each had an equal share with any other member in the make-up of this report. If it were a matter of favor, if it were a matter of influence, if it were a matter of distribution of "pork," as is frequently charged, do you suppose that we should have failed to receive a large share for the meritorious proposition of deepening Boston Harbor? Certainly we could have done so, and in doing so we should not have obtained appropriations for any wrongful purpose, because, measured by every test, the harbor of Boston may well be improved. Men say that some places are improved that have no commerce. Certainly no such statement can be made as to Boston Harbor, because the value of the commerce of Boston of foreign imports and exports is fixed at $216,310,889.

The men who have preceded us in this Congress knew it was wise to make appropriations for the development of the port of Boston, and they passed more than one measure for its improvement.

More than 20 years ago they put through the project of 1892 for a 27-foot channel; in the year after the Spanish War they fixed the project of 1899 for a 30-foot channel; and in a few years after that time they established the project of 1902 for a 35-foot channel.

The total of Federal appropriations for Boston Harbor up to June 30, 1913, was $12,187,947, more for a single harbor than half the total for all Texas.

Let me say a word right here in appreciation of the work of a Massachusetts man, who is not now a Member of this House, but who served for many years on the Rivers and Harbors Committee and surely did not neglect the interests and the welfare of his native State. I refer to my former colleague, Hon. George P. Lawrence. [Applause.]

Mr. Lawrence lived not in Boston, but he led the progressive movement to develop Boston Harbor, and I am most anxious to carry on the splendid work he did during his service in this House.

I had been hopeful right up to the minute when this bill was reported that we might include in it an item for a 40-foot channel in Boston Harbor.

Everybody will concede that the amount of commerce flowing into Boston Harbor certainly would justify any generous appropriation that could be made at this time; yet we have no such appropriation, and the only item in this bill with respect to Boston Harbor is an item of $200,000 for maintenance, not for any new improvements, but simply for maintenance of the 35-foot channel which was authorized long ago.

Mr. Chairman, the reason why we have not any large appropriation in this bill for Boston Harbor is clear to any man who is familiar with the methods by which this committee does its work. Men seem to think that all one needs to do to get a large appropriation for his home district is to have membership on the Committee on Rivers and Harbors, and to have friendship and fellowship with his colleagues on that committee. Mr. Chairman, it is not so.

Mr. GORDON. Mr. Chairman——

The CHAIRMAN. Will the gentleman yield?

Mr. MURRAY of Massachusetts. Let me develop this thought for a moment. When the survey is authorized the district engineer officer in the district where the river or harbor may be located is charged with the duty and responsibility of making a report upon the proposition. After that report of his investigation is made by him it is reviewed by a division engineer officer who is usually of higher rank than the district officer and whose responsibility extends not only over a single district but over such districts as may be included in the division whose engineer officer he is. And after the division engineer has passed upon the report of his district officer he sends it forward with an indorsement, giving his opinion as an expert on the propo-

sition that may be in contemplation. That report goes forward to the Chief Engineer, and, under the law, must be referred to the Board of Engineers for River and Harbor Improvements. Now, that Board of Engineers for River and Harbor Improvements is a board that sits here in Washington, no member of which is less in grade than a lieutenant colonel of Engineers, and a board presided over by a colonel of Engineers of the United States Army; and when that Board of Engineers has passed upon the thing it is reviewed by the Chief of Engineers, and then it is submitted to Congress through the proper military channels and finds its way to the Committee on Rivers and Harbors of the House or to the Committee on Commerce of the Senate.

Mr. MANN. Will the gentleman yield?

Mr. MURRAY of Massachusetts. Yes; but I will first yield to the gentleman from Ohio [Mr. GORDON].

Mr. GORDON. The gentleman does not undertake to say that the engineers are responsible for the appropriations in this bill?

Mr. MURRAY of Massachusetts. In the first instance, I say I do not know how you could get any appropriation through the committee except with a favorable report from the Engineer officers, and the members of this committee will bear me out. You can not walk in and get the money; you must have a favorable report from the engineers, whom I have outlined to you, in order to have a standing before the committee, because it is a fixed rule of the committee that no consideration will be given to appeals for appropriations unless there is first a favorable report from the United States engineers.

Mr. GORDON. But you have to vote for the other fellow's appropriation, so that he will vote for yours.

Mr. MURRAY of Massachusetts. Oh, no; that is all wrong; and if the gentleman analyzes it a minute he will see that it is. Of what committee is the gentleman a member?

Mr. GORDON. The Committee on Military Affairs.

Mr. MURRAY of Massachusetts. Well, you are appropriating twice as much money as the Committee on Rivers and Harbors.

Mr. GORDON. But not as much as they did last year.

Mr. MURRAY of Massachusetts. Neither are we. I am not entirely certain of that; but how are you spending your hundred million dollars? You are appropriating it on reports of men charged with the responsibility under the law to make estimates and reports. It is the custom of your committee, which has the force of law, and to all intents and purposes has the binding of law. I suppose some men might say that you and your colleagues on the Military Affairs Committee are terribly extravagant because you spend a lot of money on Cavalry regiments. I remember that we had a fight here to reduce the number of Cavalry regiments on the theory and with the idea that Cavalry regiments were no longer useful in time of war and that they had gone by. The arguments were made that any expenditure of money on a Cavalry regiment was a useless appropriation. Now, how did the appropriation for Cavalry regiments and other things get in? On the word of an individual Congressman? Not at all. On the word of men supposed to be, and who in fact were, experts on the given proposition that was under contemplation by your committee, namely, the men of the General Staff of the Army, whose sworn duty it was to present estimates, and your committee and Congress considered it solely upon those representations and estimates. In the same way the Engineer officers are called upon, not only by the law but by the custom of the committee, to give their estimates and report upon different projects.

I asked the Chief of Engineers to give me a statement in regard to the Boston Harbor appropriation. I have received a statement saying:

> With regard to the survey of Boston Harbor authorized by the act of July 25, 1912, I have to inform you that the district officer submitted a partial report on the survey under date of February 12, 1914, which, in accordance with law, was referred to the Board of Engineers for Rivers and Harbors. Under date of the 11th instant the board returned this report with a statement to the effect that it did not consider it advisable to submit a partial report on the broad subject of the improvement of the entrance to Boston Harbor, as the improvement determined upon at any part of the harbor must necessarily have a bearing upon that which may be needed in another. You will understand that the survey referred to calls for an investigation, not only of the broad sound channel but also with a view to providing deep-water connection, with such suitable terminals as may be established by the directors of the port of Boston. The question of the depth in broad sound channel bears such an intimate relation to the facilities to be provided in the inner harbor that I consider the board was fully justified in not acting upon the partial report.
>
> It will hardly be possible to complete the survey of the inner harbor and give to this subject the consideration which a project of this character must have in time for submission of the report to Congress with a view to the inclusion of the new project in the pending river and harbor bill.

That is signed by Dan C. Kingman, Chief of Engineers of the United States Army.

Mr. Chairman, let me say one word in regard to this appropriation and in regard to the desire and the hope of the people of Massachusetts that a 40-foot channel may be speedily established in Boston Harbor. The surest indication that the people of the State are interested is the fact that the officers of the State, acting for the people, have already made large appropriations for the development of Boston Harbor.

The Commonwealth of Massachusetts, from 1870 to December 1, 1913—the end of the fiscal year—has actually expended in Boston main harbor $7,929,876.44, not including $336,313.44 spent by the State in improving small harbors and secondary channels within the limits of the port of Boston.

On December 1, 1913, there were balances of appropriations available for immediate expenditure of $7,285,098.99, all of which is in actual process of expenditure under projects which are all expected to be complete in three years.

The total amount expended by the State plus the amount available for immediate expenditure is $15,214,975.43. Recent improvements include the following:

Commonwealth Pier 5: The largest and best-equipped terminal that exists for large passenger and freight steamships; 1,200 feet long, 400 feet wide, costing, with appurtenances, over $3,000,000; the approaches and docks are dredged by the State to 40 feet; half of this terminal has been in operation since May, 1913; to be fully completed this summer.

Commonwealth Pier 6 (the fish pier): Representing an investment of $3,000,000, of which $1,000,000 is furnished by the State, supplemented by private investment of $2,000,000; 1,200 feet long by 300 feet wide; without an equal in the world.

The largest dry dock yet projected; 1,200 feet long; designed under the supervision of a Navy engineer detailed by the Navy Department; to cost over $3,000,000. The work of preparing the site begun in September last and is well under way. It is designed to take the largest warships or merchant vessels built or likely to be built for many years to come.

Another large pier has been started; to be 900 feet long, with 40 feet of water in the docks and approaches.

Two and one-half million feet of flats have recently been acquired to supplement some 25,000,000 feet already owned by the State; to be reclaimed as required for future terminal development.

Mr. Chairman, I mention these things in order that it may be seen that the people of Massachusetts and Boston are active and alert in the matter of taking advantage of the harbor we have at the port of Boston, and I hope to point during the course of the debate on this bill to some of the results of appropriation and authorization that have been made by the Federal and the State Governments; some of the plans we have for the development of our port. [Applause.]

Mr. HUMPHREY of Washington. Mr. Chairman, I believe I have 25 minutes remaining?

The CHAIRMAN. Yes.

Mr. HUMPHREY of Washington. Mr. Chairman, I ask leave to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Washington asks leave to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. HUMPHREY of Washington. Mr. Chairman, I just wanted to say this, that what I wish to put in the RECORD is a list of Democrats who are Members of the present House who voted for the present Panama Canal act. I asked unanimous consent twice for permission to do this, and on each occasion some of my Democratic friends objected to this being done. But I shall not only put in the RECORD the names of the Democrats of the House who voted for the present law, but I shall supplement that by putting in the RECORD the names of the Democratic Senators who so voted. The question in regard to the Panama Canal tolls in the Senate came up on an amendment offered by Senator BURTON on August 7, 1912. That amendment was to strike from the bill the provision for free tolls that the President now asks to have stricken out. Upon a roll call not a single Democratic Senator voted for that amendment. Every Democrat who voted, voted against it, and I will put a list of those who voted against the Burton amendment in the RECORD and a list of those who are recorded as not voting at all. I think this becomes very interesting at this time. I believe that the country wishes to know the list of Democrats who have been requested by the President of the United States to repudiate the Democratic platform declarations and to surrender their judgment, their conscience, their patriotism, and their intellectual integrity into his care and keeping.

Mr. CANTOR. Mr. Chairman, will the gentleman yield? I understand the gentleman desires to introduce that as a part of his remarks in the RECORD?

Mr. HUMPHREY of Washington. Yes.

Mr. CANTOR. I reserve the right to object, in order that I may ask him a question.

Mr. HUMPHREY of Washington. It is too late to object now.

Mr. CANTOR. I do not think so. The gentleman asked an opportunity to extend his remarks in the RECORD, and I now object.

The CHAIRMAN. The gentleman from Washington asked unanimous consent to extend his remarks in the RECORD. The Chair put the request, and there was no objection.

Mr. CANTOR. But I object to his incorporating that in his statement.

Mr. HUMPHREY of Washington. But it is too late, because I would have read it in any way. I well understand why some gentlemen on that side do not desire this to be done.

Mr. CANTOR. I do not understand why he does not print the Republican list as well, and, further than that, may I ask the gentleman this question?

The CHAIRMAN. The gentleman declines to yield.

Mr. HUMPHREY of Washington. Mr. Chairman, it is a strange performance by that side of the House in objecting to the publication of this list. I wonder if anyone can tell why? I never knew a man who did a thing of which he was proud that he especially wished to conceal it. I never knew a man who did a thing of which he was ashamed that he desired it given wide publicity. Why do the Democrats want to keep from the public their record on this question? Are they ashamed of what they have done or ashamed of what they expect to do?

The names of the Democrats who are Members of the present House who voted for the present law permitting American ships engaged in the coastwise trade to pass through the Panama Canal without the payment of tolls, and the names of those who were paired in favor of it, and also the attitude of the three members of the President's Cabinet upon the proposition is shown by the following list:

| | | | |
|---|---|---|---|
| Alexander | Fitzgerald | Linthicum | Stone |
| Borland | Garner | Lloyd | Taggart |
| Broussard | George | Lobeck | Talbott, Md. |
| Burnett | Goldfogle | McGillicuddy | Talcott, N. Y. |
| Clayton | Gregg | Maher | Taylor, Ala. |
| Connell | Hamill | Murray | Taylor, Colo. |
| Conry | Hammond | Neeley, Kans. | Tribble |
| Covington | Harrison | Padgett | Tuttle |
| Difenderfer | Hayden | Patten, N. Y. | Underhill |
| Donohoe | Heflin | Peters | Underwood |
| Doremus | Hobson | Raker | Watkins |
| Dupré | Kinkead, N. J. | Rothermel | Wilson, N. Y. |
| Estopinal | Lee, Pa | Small | |
| Fergusson | Lewis, Md. | Smith, N. Y. | |

Paired for the present law:

Mr. Saunders.
Mr. Scully.

Cabinet members, attitude on the present law:

Mr. Burleson (against).
Mr. Wilson of Pennsylvania (for).
Mr. Redfield (paired for).

This is the attitude of the present Democratic Members of the House and the members of the Cabinet who were then Members of the House. On roll call 54 Members of the present House and two members of the present Cabinet voted for the present law.

What of the record of the Democratic Senators who are now asked to support the President in the repeal of the present law. The last record vote on the tolls question in the Senate was on August 7, 1912. Senator BURTON offered an amendment to the canal bill, which was then pending, to strike out the free-toll provision, exactly what the President now proposes to do. Upon roll call not a single Democrat voted to eliminate this proposition that gave American ships in the coastwise trade the right to pass through the canal without the payment of tolls. The Democrats who voted against the Burton amendment and against the present proposition of the President are:

| | | | |
|---|---|---|---|
| Ashurst | Martin, Va. | Shively | Swanson |
| Bryan | Martine, N. J. | Simmons | Thornton |
| Chamberlain | Newlands | Smith, Ariz. | Williams |
| Fletcher | Overman | Smith, Ga. | |
| Johnson | Pomerene | Smith, S. C. | |
| Kern | Reed | Stone | |

The following Democrats are recorded as not voting:

| | | | |
|---|---|---|---|
| Bankhead | Culberson | Lea, Tenn. | Tillman |
| Chilton | Gore | Myers | |
| Clarke, Ark. | Hitchcock | Owen | |

The Burton amendment was overwhelmingly beaten, not a single Democrat recording his vote in favor of it.

It might be well to call attention to the members of the present Cabinet who were then Members of Congress.

Mr. Wilson, Secretary of Labor, voted for the present law. Mr. Burleson, Postmaster General, voted against it. Mr. Redfield, Secretary of Commerce, was paired in favor of the present law.

The list of names of the men who voted for the present law is a list of the men of highest courage and intelligence and patriotism. This list is a roll of honor. It contains the names of those who placed their country's interests first, above prejudice and above party. It is my pleasure to know most of these men well. I have served in Congress with them all. I do not believe that many of these men will vote according to Executive order. The country will be surprised and humiliated if many of these distinguished Members of this body now change their votes on this great question. The fact should be emphasized that not a single Democratic Senator on roll call voted to sustain the exact position now urged by the President. Can it be possible that Senators and Representatives change their opinions on great public questions completely within a few days owing to a mere statement from the White House that their former position was a mistaken economic policy and that some unmentioned situation of "nearer consequence" demands that it be done.

With whatever arguments the gentlemen who change their views may use as a solace and comfort to themselves, the plain fact is that the people of the country will believe that every man who changes his vote now was either influenced by the hope of patronage or by political fear if he opposed the President.

The people will never believe that Members of Congress change their political convictions on great public questions in a few days from patriotic motives alone. The people of the country are intensely interested in the way that the men named in these lists will now vote. The people will look upon that vote as a fair measure of the courage and patriotism of this body. The people will believe that their votes will largely measure the power of patronage; that their votes will largely measure the triumph of partisanship over patriotism. The people of this country will never believe that the men who voted in favor of the present law will repudiate their political platform and follow the President entirely from conscientious convictions.

Mr. MANN. Mr. Chairman, the gentleman from Massachusetts [Mr. MURRAY] a moment ago, in stating the precautions which were exercised with reference to items in the river and harbor bill, stated that first there was the district officer reporting, then the division officer reporting, and then the Army Board of Engineers reporting. I am under the impression that there is still a fourth step, namely, that the Chief of Engineers has to again report, and that under the law, even where Congress directs a survey to be made of a project, that does not mean that the survey will be made. Preliminary to the survey there must be an investigation and report as to the probable value of the survey and the commerce. Every precaution, as it seems to me, which human ingenuity in a legislative sense can devise has been used to prevent the river and harbor bill being made a pork-barrel bill, so long as it is made up in the present manner. Yet the city of Chicago, which has a commerce second only to that of New York City, and which has great need of river and harbor improvements, was left off the map when this bill was made up. I do not criticize the committee in regard to that. It was not the fault of the committee and not the fault of the member from Chicago on the committee, Mr. GALLAGHER, a Member of great ability and high standing in the House. We ordered a comprehensive survey of the Chicago lake front made a few years ago. In the course of time the district engineer made an elaborate report, which was only recently available, because it was delayed on account of the maps. The subject was too exhaustive for the division engineer, and so it was easier to turn it down than to pass it. It was too complicated for the Board of Engineers, and so it was easier to say they thought that was not the thing instead of determining what was the thing. It was too complicated for anyone else connected with the engineers, and I do not know whether we are any further along now after having directed the engineers to make the survey, after having the survey and the report made by the district engineer, than we were before we began, but I suppose the committee could not do otherwise than leave us to stew in our own juice until we find out what we are going to do.

Mr. Chairman, I do not feel called upon to defend the Committee on Rivers and Harbors, especially in view of the fact that Chicago has nothing in this bill. The biennial river and harbor appropriation bills a few years ago were considered very large if they got up to thirty or forty millions of dollars, even when they carried items for the city of Chicago. Now they are considered very small when they carry an amount of over

$40,000,000 a year in the House, which will mean $50,000,000 or more in the law, without Chicago items in it. So I do not feel under any obligation to defend the Committee on Rivers and Harbors, and yet it is inevitable that the Committee on Rivers and Harbors will be made up in the main of gentlemen who desire improvements for their districts. Where would you select the committee from? I helped to make up the committee in this Congress and in the last Congress. Does anyone suppose that you can get to serve on the Committee on Rivers and Harbors Members from South Dakota, from Wyoming, from Montana, from Utah, from Colorado, and several other States which are not interested in the subject of river and harbor improvements within their own boundaries? Manifestly gentlemen do not undertake such work. So what is the natural result? The distinguished chairman of this committee comes from the State where you can put some kind of a river and harbor improvement in almost every square mile. That may be a slight exaggeration, and yet not very much. The ranking member on the Democratic side comes from a State which is so immense that you could spend all of the money in the Treasury making improvements in rivers and harbors and then have some unimproved left over. And the ranking Republican comes from a State—which in this case means he represents the coast, so far as the minority is concerned—on the Pacific coast with a great commerce and great commercial possibilities and with great need for improvement. So that we are spending now, through the aid of those gentlemen, very large sums of money annually. And what for? What good does it do? Everybody knows that the amount of freight carried by water in itself does not justify the river and harbor improvements of the United States. But what is the best reason for improving the rivers and harbors?

The best regulator of freight rates that can be found within or without the law is competition. [Applause.] And the best competition is water competition. The New York Central Railroad parallels the water competition between Buffalo and New York. It carries the most freight. It will always carry the most freight, in my judgment, but it has benefited itself by the enormous amount of business it does because it has been compelled to build up the commerce along its line by the cheap rates caused by the Erie Canal. It made the city of New York, which otherwise now would be second in size and importance to Boston or Philadelphia. This kind of competition has made many places in the country. It has made the West, because of the water competition of the Great Lakes and the Erie Canal carrying freight from Chicago and other lake points to New York and the East, compelling reasonable, fair railroad rates, and without this water competition we never would have had rates nor the development. And yet what are we confronted with now? A proposition that the Government of the United States, having spent $400,000,000 in the construction of a canal, the only economical value of which is in the main regulation of railroad rates across the continent, we are confronted with the proposition that it is economically wrong for us to allow water competition to compete with railroad rates. Those gentlemen who voted for tolls on the Panama Canal put themselves on record as against deep-water competition to regulate railroad rates, and they ought to vote against the river and harbor bill. No conscientious Member of this House ought to vote for the river and harbor bill and against free tolls on the Panama Canal. [Applause on the Republican side.]

Mr. McKENZIE. Will my colleague yield?

Mr. MANN. Certainly.

Mr. McKENZIE. There has been a good deal said about the freight rates on the Panama Canal and the transcontinental railroad lines. Now, the gentleman knows I voted against free tolls on the Panama Canal, and I would like to have my colleague or some one submit some facts on the question of transcontinental rates to show whether or not there is any competition.

Mr. MANN. If my colleague had been in the House with his present attitude of mind, I take it he would have voted against the construction of the Panama Canal at all. First, the construction of the Panama Canal and the opening of it will itself largely reduce the railroad rates or control the transcontinental railroad rates in the United States, and without that being true we ought to fill it up instead of opening it up, and if it be true it is a disgrace. A dollar and a half or a dollar and a quarter a ton makes that much more in the regulation of railroad rates.

Mr. HARDY. Will the gentleman yield just for a question?

Mr. MANN. For a brief question. There is another matter I desire to submit.

Mr. HARDY. I know the gentleman does not intentionally mean anything discourteous, but I think the gentleman is wrong in saying no conscientious Member will vote for this bill.

Mr. MANN. I did not say that. My language is better chosen. I said no conscientious Member "ought" to.

Mr. HARDY. I thought the gentleman said "will."

Mr. MANN. Well, I did not. The gentleman ought to be listening more carefully.

Mr. HARDY. I believe the reporter's notes will show I am right.

Mr. MANN. I do not know what the reporter's report will show, but I do not wish to stop and bandy words about it.

Mr. HARDY. I do not think the gentleman intended to say it

Mr. MANN. I did not say it, and there is no need of consuming any more time.

Mr. HARDY. The gentleman should not be so contradictory. I thought the gentleman did.

Mr. MANN. Well, I have said that I did not say it, and I think the gentleman ought to be willing to take my word for it.

Mr. HARDY. I do not take the gentleman's word.

Mr. MANN. The gentleman is very discourteous to myself, although I have exercised great courtesy toward him.

Mr. HARDY. I want to say——

Mr. MANN. I do not want the gentleman to take up any more of my time. Having expressed himself so very discourteously to me, I do not intend that he shall take up any more of my time.

Mr. HARDY. I just simply wanted to express regret if I have been discourteous.

Mr. MANN. I do not care whether the gentleman expresses regret or not.

Mr. HARDY. Well, I do not care either. [Laughter.]

Mr. MANN. Now, Mr. Chairman, when I was a boy it was not an uncommon thing for boys to say—and I suppose that is still true—that some one thing reminded one of another because it was so different.

Now, I am reminded by recent events in connection with Mexico of an event that took place 10 years ago, about, because it was "so different." I think it may not be a misuse of time to call the attention of the House to a little situation which in its development excited the patriotic pride, I believe, of every American.

On May 19, 1904, the United States consul general at Tangier, Africa, Mr. Gummere, reported to the State Department that on the night of the 18th of May, about 8.30 o'clock, a band of natives, headed by a bandit named Raisuli, who kidnaped Mr. Walter Harris the year previous, broke into the country house of Mr. Perdicaris, a prominent American citizen, and carried away Mr. Perdicaris and his stepson, Mr. Varley, a British subject. On the same day the State Department, through Mr. Loomis—and I quote from the official record as published—informed Mr. Gummere that a war vessel had been ordered to Tangier, but that it might not arrive there for three or four days.

On May 25 Mr. Gummere reports that the negotiations for the release of the captives were most unsatisfactory and the situation at Tangier not reassuring. The arrival of the warship, from which he has so far received no intelligence, is anxiously awaited. On May 29 Mr. Gummere reports that the lives of the captives have been threatened unless Raisuli's terms are granted, and adds that every hour's delay may be serious. On May 30 Mr. Gummere reports the arrival of the American man-of-war *Brooklyn*, and that there have been no further developments. On June 1 Mr. Gummere reports the arrival of Admiral Jewell with the Mediterranean Squadron. On June 9 Mr. Hay, Secretary of State, informs Mr. Gummere that while the President desires everything possible to be done to secure the release of Mr. Perdicaris the United States is not to be put into the position of guaranteeing any concessions made by the Sultan to the bandits. It should be clearly understood that if Mr. Perdicaris should be murdered, the life of the murderer will be demanded, and in no case will the United States be a party to any promise of immunity for his crime. Anything which may be regarded as an encouragement to brigandage or blackmail should be avoided in the negotiations.

On June 21 Mr. Gummere reports that the release of the captives is being delayed and that his position is becoming humiliating. He urges that, in the event of the failure of the effort reported yesterday for an exchange of captives, he may be empowered to present an ultimatum immediately claiming a large indemnity for each day's further delay and threatening to land marines and seize the customs. Such action appears to be necessary to secure the release of the captives and prevent further delay.

On the next day, June 22, Mr. Hay states to Mr. Gummere that this Government "wants Perdicaris alive or Raisuli dead." [Applause.] Further than this, the least possible complications

with Morocco or other powers is desired. On the next day Mr. Perdicaris returned home. [Applause.]

"This Government wants Perdicaris alive or Raisuli dead." If we had Andrew Jackson in the White House, that is what he would have said. We did have Theodore Roosevelt in the White House, and that is what he said. [Applause on the Republican side.] Would to God we had either one of them in the White House dealing with the present Mexican situation. [Applause on the Republican side.]

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] has one minute remaining.

Mr. SPARKMAN. How much time have I remaining?

The CHAIRMAN. Five minutes.

Mr. SPARKMAN. Mr. Chairman, I yield to the gentleman from Oklahoma [Mr. WEAVER].

[Mr. WEAVER addressed the committee. See Appendix.]

Mr. SPARKMAN. Mr. Chairman, I desire in closing to say only a very few words. After the very courteous remarks made by my friend from Illinois [Mr. MANN], I dislike to contradict, or to seemingly contradict, any statement he may have made. But there is one I can not let go unchallenged, and that is the statement that the improvement of rivers and harbors in this country is not justified by the amount of freight carried on them. I do not know, of course, how much freight would be required as a justification for the expenditures we have made, but as I said the other day, according to the engineer's reports, the tonnage of our water-borne commerce of last year, 1913, was more than a billion tons. If that is not a justification of the money we are expending, for even the forty or fifty millions of dollars we are appropriating every year, I do not know what you would consider a justification.

Why, Mr. Chairman, this tonnage is more than one-half of the entire amount carried by the railroads of the country, and when we consider that the railroads have cost billions, where the rivers and harbors of this country have cost millions, I believe anyone will agree with me that we are abundantly justified in the expenditures we are making for waterway improvement.

Now, a word or two with reference to the remarks made by my friend from Connecticut [Mr. DONOVAN]. He seemed to proceed upon the theory that the money for river and harbor work is expended in accordance with State lines, or for the several States as such. Nothing is further from the truth. Money is not expended nor appropriations made for the improvement of our rivers and harbors on the theory that a single State is to be benefited, nor are the taxes collected for the support of the Government paid on that theory. Federal taxes are levied for the benefit of all the people. That money is collected at a single port or in a given State makes it none the less the money of the whole people, and when we expend it we presumably use it for the whole country. Why, sir, in river and harbor work we justify the expenditure on the constitutional provision which gives Congress power to deal with interstate and foreign commerce. The expenditure is not made in the interest of any State.

Another remark—or perhaps I should say an insinuation—was a very unfair one, and yet I am responsible to the extent of one vote, at least, on the Rivers and Harbors Committee for the action of the committee. He undertook to link my State up with the State of Texas, and the reason was very obvious. Of the appropriations made in the bill, more will be expended in the State of Texas than in the State of Florida. There are few States, Mr. Chairman, if State lines are to be considered, that have received less in this river and harbor bill than the State of Florida. The district that I represent gets $75,200 for the river and harbors wholly within the district.

In addition to those there is a river, the Oklawaha, partly in my district and partly in the district represented by my colleague [Mr. CLARK of Florida], which receives $175,000. Half of it is properly chargeable to the district which I have the honor to represent here, making the amount altogether only $162,700 for the entire district. The entire State of Florida has in the bill only about $800,000, of which the St. Johns River and the western part of the State receive the bulk. In other words, by far the greater part goes to the districts represented by other gentlemen than myself.

I desire to call attention to only one other matter, Mr. Chairman. The gentleman from Texas [Mr. CALLAWAY] referred, among other things, to the Ohio River, and commented on the small amount of freight, as he intended to express it, I suppose, accommodated by that stream. Why, Mr. Chairman, there are 10,000,000 tons of commerce floated up and down that river every year; and it is expected when this great work is completed and a 9-foot stage is furnished the year round that the amount will grow to much greater proportions. I have no doubt of this. And when we consider that a 9-foot stage will be given every day in the year from Pittsburgh to New Orleans, I consider the expenditure is abundantly justifiable, even though it reach the sum of $63,000,000.

Mr. TOWNSEND. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from New Jersey [Mr. TOWNSEND] moves to strike out the last word.

Mr. TOWNSEND. Mr. Chairman, with the indulgence of the committee, I frankly rise to hark back to a proceeding that occurred just before the delivery of the remarks of the gentleman from Illinois [Mr. MANN]. The gentleman from Washington [Mr. HUMPHREY] was on the floor and asked, in accordance with the usual formula, permission to extend his remarks in the RECORD. The Chair, by the ordinary process, discovered that the House did not object to his extending his remarks in the RECORD, and then the gentleman from Washington proceeded to make a statement, violating several of the rules, mentioning, for instance, occurrences in the Senate, which the rules direct him not to mention; but the Chair, in his discretion and good nature, did not call the gentleman from Washington to order on that. Then the gentleman from Washington declared, after having received unanimous consent to extend his remarks, that he was going to print certain portions of a vote, and thereupon my colleague from New York [Mr. CANTOR] arose and objected.

Now, Mr. Chairman, frankly, I turn this into a parliamentary inquiry. The gentleman from Washington, having secured unanimous consent to insert something in the RECORD through the usual formula, to which no one pays attention, then proceeds to state his intention of turning into the RECORD certain garbled or unfinished or partial reports of a vote. Why was not the gentleman from New York [Mr. CANTOR] entitled to object to this unexpected development of the request of the gentleman from Washington?

I will say, Mr. Chairman, with some feeling of regret, that this side of the House has been without a certain amount of watchful care of our interests for some time. It has been manifest to everyone here who has been on the floor of this House during the last two or three weeks that the very able gentleman from Illinois [Mr. MANN] has conducted, to his own entire satisfaction, all the proceedings of this House. [Applause on the Republican side.]

Mr. Chairman, I led up with great care to that period, because I anticipated and hoped to have that applause [laughter], which emphasizes exactly what I wanted to emphasize, namely, that for some time gentlemen on this side, modest Members, young Members in terms, have been endeavoring to procure opportunity to forward legitimate legislation and have been without that care and protection and guidance which they were entitled to expect.

Now I return, Mr. Chairman, if you please, to my parliamentary inquiry: Why the gentleman from New York [Mr. CANTOR] was not entitled to object to the proposal of the gentleman from Washington to insert something in the RECORD under the circumstances that I have detailed?

The CHAIRMAN. Does the gentleman ask the Chair that question?

Mr. TOWNSEND. I inquire of the Chair.

The CHAIRMAN. The committee gave the gentleman from Washington leave to extend his remarks in the RECORD. There was no limitation on the leave granted. He did not advise the committee of what he intended to extend in the RECORD. He then proceeded to read a memorandum of a vote in the House and Senate on some proposition which he had the right to read in his own time, and it was not for the Chair to say that he was not in order in doing so.

Mr. CANTOR. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CANTOR. The gentleman from Washington [Mr. HUMPHREY] did make a statement, asking leave of the House to extend his remarks in the RECORD, and then proceeded to state what those remarks were. It was then that I made my objection.

The CHAIRMAN. The leave had already been granted, and the gentleman from Washington had the right to read in his own time what he proposed to put in the RECORD if he chose to do so.

Mr. CANTOR. Then the gentleman from Washington took advantage of the opportunity?

The CHAIRMAN. It is not for the Chair to say as to that.

Mr. MANN. It was not so.

Mr. CAMPBELL rose.

The CHAIRMAN. The gentleman from Kansas is recognized.

Mr. CAMPBELL. Mr. Chairman, before proceeding, I yield to the gentleman from Washington [Mr. HUMPHREY] for a moment.

The CHAIRMAN. The time of the gentleman has expired. All time has expired. The Clerk will read.

The Clerk read as follows:

*Be it enacted, etc.*, That the following sums of money be, and are hereby, appropriated, to be paid out of any money in the Treasury not otherwise appropriated, to be immediately available, and to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers, for the construction, completion, repair, and preservation of the public works hereinafter named.

Mr. HUMPHREY of Washington. Mr. Chairman, I just wish to say in reply to the gentleman from New Jersey [Mr. TOWNSEND] that I was proceeding perfectly in order. I am very sorry if I disturbed the gentleman from New Jersey. I had my own time, I was proceeding in my own time, and it was perfectly in order for me to state whatever I might desire.

Now, I am very sorry, indeed, that my Democratic friends are so much disturbed because I have seen fit to place in the RECORD the names of the gentlemen who voted for the exemption of American coastwise shipping from the payment of tolls through the Panama Canal—those who voted for the present law. If they are ashamed of it, that is not my fault. I did not make that record. If they want to crawl away from that record, they themselves are entirely to blame for its making.

Mr. TOWNSEND. I will say to the gentleman that I voted against free Panama Canal tolls, so that I am not interested in concealing my vote.

Mr. HUMPHREY of Washington. Yes; and that is why I can not understand why the gentleman is so much agitated on this question. I had endeavored twice before to insert the vote in the RECORD by unanimous consent, and gentlemen on that side, very much to my pleasure, objected. But that is what I expected them to do. In fact, that is what I wanted them to do. After that I proceeded to put it in the RECORD. It is a very good thing to put that in the RECORD. I think the people throughout the country ought to know the names of the gentlemen who a short time ago voted upon that tolls question. The country wants to know how many men on that side of the House are going to change their votes now and repudiate their platform—the platform upon which they were elected—simply because the mandate comes from the White House to do so.

I have been asked by the newspapers to furnish this record in a convenient form. I received two letters yesterday asking me to furnish that record. The people are interested in it. We want to know and the country wants to know how many Democrats there are upon that side who still control their own vote, and I should think that every man upon that side of the House who voted that way in the interest of his own country would be proud of the fact and would want the country to know it.

Mr. TOWNSEND. Mr. Chairman, the gentleman will understand that I have no objection whatever to his printing in the RECORD, and I think the gentleman fully understands the purpose for which I have risen.

Mr. HUMPHREY of Washington. Certainly; but the gentleman attempted to criticize me for proceeding out of order, when he was entirely wrong himself.

Mr. CAMPBELL. Mr. Chairman, if it is necessary in order to obtain the floor, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Kansas moves to strike out the last two words.

Mr. CAMPBELL. Mr. Chairman, within the next few days gentlemen upon that side of the aisle will be arguing against the free use of the Panama Canal by American ships in the coastwise trade upon the ground that it is economically wrong and that it is in the nature of a subsidy to permit American coastwise vessels to use an American canal without paying the same tolls that the ships of other nations pay. These gentlemen, in order to be consistent, I submit, ought to argue against the bill now under consideration and to vote against it, because if it is in the nature of a subsidy to make a canal and to permit American vessels to use it free, it is in the nature of a subsidy to improve our rivers and harbors and to permit American vessels to use them under similar circumstances. Every dollar that has been appropriated for the improvement of our rivers and harbors has been appropriated for the purpose of making easier the navigation of our rivers and making terminal facilities for the ships carrying our coastwise trade and over-sea commerce of the country. The railroads have to furnish their own terminal facilities in all cities of the country, but the United States furnishes terminal facilities at New York, Boston, Philadelphia, Charleston, New Orleans, and all harbors of the country for every ton of freight that is carried upon ships. But gentlemen do not use the same argument against that sort of subsidy that they will use next week to show that it is a subsidy of $1.25 a ton to permit the coastwise commerce of the United States to be carried in our own ships through our own canal.

Mr. WILSON of Florida. Will the gentleman from Kansas yield for a question?

Mr. CAMPBELL. Yes.

Mr. WILSON of Florida. Does not the gentleman make a distinction between the improvements of our rivers and harbors and the building of the Panama Canal, because of our treaty obligations?

Mr. CAMPBELL. Not at all. We have a canal on our north that is free to the commerce of the country. Our canal on the south ought to be free to the commerce of our country. The canal on the south is on our own soil under our own flag. We built it. We own it. It ought to be under our control, and I submit to the gentleman that the treaty which we shall discuss next week does not prevent the use of that canal by American coastwise trade, as we may direct.

Mr. WILSON of Florida. We improve our rivers and harbors without making a treaty with a foreign nation, do we not?

Mr. CAMPBELL. We do; and while we have entered into treaties with foreign countries with regard to the use of our harbors, and notwithstanding those treaties, American coastwise ships use these harbors practically free, and foreign nations do not object. We have the same rights to the use of the canal that we have to the use of our harbors at Charleston and New Orleans and other seaports.

Mr. HARDY. Will the gentleman yield for a question?

Mr. CAMPBELL. No; I have only just a moment. I am sorry I can not. I beg the gentleman's pardon. Gentlemen will argue that there is a distinction, but they will fail to convince the country where that distinction lies, or what is the difference between giving to the coastwise shipping of the United States the harbors of the United States on the mainland and the use of the canal on the Canal Zone, all being American territory, all being under the control of the American Congress and American laws. I say the gentleman will have considerable difficulty in convincing the country that there is an economic question involved that rises high enough or is of sufficient importance to deprive the American people of the right to control their own canal and fix such reasonable rates of charges as they shall think proper to impose on the commerce of the rest of the world for the use of that canal. Every man in the United States who gives the subject a single moment's consideration knows that there is no difference in principle between the use of the harbors of the mainland for our coastwise trade and the use of the Panama Canal in our coastwise trade.

Mr. FREAR. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend by striking out from line 5, page 1, the words "to be immediately available," and to further add to line 9, page 1, the following: "*Provided*, That one half of each separate appropriation hereinafter specifically named shall be available whenever there shall be contributed by any State, county, city, or locality, or localities an amount equal to one half of such appropriation, which amount so raised shall be placed to the order of the Secretary of War and shall be expended by him pursuant to the report of the United States engineers on such project: *Provided further*, That the remaining half of each appropriation hereinafter provided shall be retained in the Treasury, subject to the order of the Secretary of War, and to be used by him whenever needed in the completion of the project for which such appropriation is made."

Mr. FREAR. Mr. Chairman, during the general debate I endeavored to get 15 minutes' time in which to make some inquiries, but failed to get the time because the 9 hours were consumed in the discussion of various other subjects.

It occurs to me there are many things in this bill that ought to be understood by the Members, and it is for that reason I desire to make some inquiries.

I find that the only way to ascertain the facts is by the introduction of amendments. This amendment meets a crying need at this time, judging from the remarks of men who are far more familiar with the subject than I am. The suggestion contained in the proposed amendment is not new with me, and it seems to me if you have any project that deserves aid, it ought to call for some return service from those who are receiving the particular aid. I wish briefly to call attention to the fact that this report contains only 7 pages and pretends to cover a bill of 66 pages, appropriating $43,289,000. This is a very large amount, and we should know the facts in regard to these separate items of appropriation. The chairman of the committee made a short speech, but he withholds it from the RECORD, and we have nothing but 7 small pages of this report to indicate what the facts are.

That being true, Mr. Chairman, I ask permission to read briefly from the report a statement, because it is of interest to every Member here to know what these proposed projects are. I have heard inquiry from different Members as to what is covered by the report and what are its recommendations. I read from page 5:

The new projects were selected from a list of 93 reported by the engineers mainly within the last two years, and requiring for completion about $92,500,000. But the committee, feeling that it could not take care of all of them in the present bill, selected what it deemed the most urgent, expecting, of course, to give consideration to the remaining projects, and others which may be reported later, in the next and subsequent bills. These additions make the aggregate of the adopted projects, including those in the present bill, about $305,500,000.

If the Members of the House have read this understandingly, there is no further suggestion to be had. It occurs to me, however, that we all ought to know what is contained in every one of the different projects, and this ought to be set forth in a report of 70 pages, or 700 pages if need be, instead of in this brief leaflet, which contains no information whatever.

On page 9 there are two suggestions which seem to me are very valuable. One is in regard to Oyster Channel, Va., where it says:

That local interests contribute one-half of the cost of the original work, $11,250, prior to the commencement of operations by the United States.

Again, in reference to Northeast Cape Fear River, N. C.:

That local or other interests contribute one-half the cost of first construction.

Now, why is not that a good, reasonable proposition to present as a condition for any project we have here. I am asking for information, because I desire some further information in regard to the bill before we get through. Why is it not advisable to ask aid from every community where we are considering a proposition that is for their particular benefit? That is the reason of the amendment offered, which provides that before any of the appropriation is used one-half shall be contributed by the various communities especially benefited.

Mr. SPARKMAN. Mr. Chairman, I take it that the gentleman offering the amendment has asked his questions in good faith, and in the same spirit I desire to reply. Of course the House, in my judgment, should not adopt any such amendment, because, while the proposition in reality might be good in some cases, it could not apply to all. Some places and localities on account of special benefits accruing to them not shared by the public should contribute in one way or another to the work, but it is impossible to lay down a hard and fast rule. We could not in every case require local aid, and it ought not to be done in the majority of cases. Some go so far as to say it ought not to be done in any case; that if the Government should do the work at all it ought to pay for the whole of it. In some instances the locality makes the offer. Finding or fearing that the engineers will turn the proposition down, they say to them, "If you will recommend the work, we will put up so much money." I can give an illustration in my own district. The people of the locality, or some of them, appeared before the engineers and said, "If you will recommend the project—which was in that case to cost about $20,000—we will put up half of the money." And the report was made with that condition attached. That is done in many cases and in many places. Sometimes there is no proposition at all, and the engineers, considering the special advantages that may accrue to a locality, perhaps to only two or three individuals and not entirely for the general commerce of the country, say to those especially favored, if you will put up so much money—50 or 75 per cent, as the case may be—or do certain other things, we will recommend the project.

Mr. FREAR. Will the gentleman yield?

Mr. SPARKMAN. Certainly.

Mr. FREAR. Why is it not a fair proposition when you are proposing to benefit a limited community, and they are the only ones to receive the direct benefit, to ask them for some aid?

Mr. SPARKMAN. We do that in this bill in many instances.

Mr. FREAR. In only the two instances that I have referred to.

Mr. MURRAY of Massachusetts. Oh, yes; Beverly, Mass., is another.

Mr. FREAR. I was referring to rivers.

Mr. STAFFORD. If the gentleman will pardon me, I would like to ask the gentleman from Massachusetts if he will inform the committee how much contribution is carried for the dredging of the Connecticut River?

Mr. MURRAY of Massachusetts. I will refer the gentleman to my colleague [Mr. TREADWAY], who is on the committee.

Mr. SPARKMAN. I will yield to the gentleman from Massachusetts [Mr. TREADWAY] to answer the question.

Mr. TREADWAY. What is the gentleman's question?

Mr. STAFFORD. I notice that the bill makes available the fund heretofore appropriated and not expended for dredging the Connecticut River. Can the gentleman inform us how much of that amount is unexpended?

Mr. TREADWAY. Twenty-five thousand dollars.

Mr. STAFFORD. My direct query is, How much was contributed by the State, either Massachusetts or Connecticut, for the maintenance of the river?

Mr. TREADWAY. Does the gentleman refer to the direct item on page 5?

Mr. STAFFORD. Yes.

Mr. TREADWAY. There has been nothing contributed by the State of Connecticut or Massachusetts, so far as I know, under that special item. That item was included in the river and harbor bill of 1912 in order to remove certain wing walls from the river which had been constructed some years previous and now interfere with navigation. That was the idea of the appropriation of the meager amount of $25,000. Last year an effort was made to let contracts under that appropriation, but it was found that it did not accomplish the direct purpose which was desired by those interested in the project of navigation. The actual work that we wanted to have accomplished was clearing the channel for the small amount of navigation that now uses the river. So that under that appropriation no money has ever been expended.

The CHAIRMAN. The time of the gentleman from Florida has expired.

Mr. SPARKMAN. I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Florida asks unanimous consent for five minutes more. Is there objection?

There was no objection.

Mr. STAFFORD. Now, will the gentleman permit me to finish my inquiry?

Mr. SPARKMAN. Certainly.

Mr. STAFFORD. I can understand how Congress and the committee could approve of the removal of permanent obstructions in a navigable stream, but I would like to have some explanation to justify the keeping of a stream entirely in a State in a navigable condition by dredging. There are many rivers in the State of Wisconsin that carry interstate traffic, but the maintenance of those streams is borne by the municipalities and localities and not by the National Government. Why should the National Government undertake the burden of maintaining this stream in a navigable condition? Why should not that be borne by the localities themselves?

Mr. HUMPHREY of Washington. Mr. Chairman, I wish the gentleman would name some of those rivers in Wisconsin of which he speaks.

Mr. STAFFORD. Why, the Milwaukee River, the Racine, the Menominee, the Manitowoc, the Sheboygan—any number of them.

Mr. SPARKMAN. Mr. Chairman, I understand the question to be why the National Government should improve a stream wholly within one State?

Mr. STAFFORD. Oh, no; my question was not for the purpose of improving the streams, but why should the Government seek to maintain navigable a stream after the Government has put it into a condition of navigability, as in the case of the Connecticut River?

Mr. SPARKMAN. Mr. Chairman, it seems to me that anyone who is at all familiar with this class of work would understand why that is done. When the Government puts up any amount of money, no matter what it is, for any stream, it certainly ought not to let the work deteriorate. It ought to maintain it, so that the work will not have to be done over again. That is why we have this maintenance account running into something like $4,000,000 in this bill.

Mr. STAFFORD. Is not that maintenance account limited to streams which are interstate; that is, a stream between two or more States, and over which the States themselves have no jurisdiction?

Mr. SPARKMAN. No; it makes no difference whether it is interstate or entirely in one State, the principle is exactly the same. I want to say, Mr. Chairman, there are many streams we are improving that are wholly within a State, wholly within one county. I know some in Florida, for instance—and they are typical—wholly within one county, and yet a commerce originates on the banks of those streams which is carried on their waters to railroad wharves or steamship landings, and carried thence coastwise by water or by railroad to all parts of the country, some to foreign countries. These streams come just as much under the commerce clause of the Constitution as if they ran through half a dozen States.

Mr. FREAR. Mr. Chairman, will the gentleman yield?

Mr. SPARKMAN. Yes.

Mr. FREAR. Mr. Chairman, I was going to suggest, would it not be more economical for the Government to build a railroad and operate it than to carry on some of the projects the gentleman has named?

Mr. SPARKMAN. I would not think so. I know that suggestion has been often made, but there is little in it.

Mr. FREAR. I mean as a matter of dollars and cents and cost of maintenance?

Mr. SPARKMAN. I will say I believe that in days gone by some money—not a great deal, relatively speaking—has been thrown away on a few rivers and perhaps a few harbors. It would be very strange if in the improvement of hundreds of rivers and harbors, with the expenditure of more than $700,000,000, extending over a period of 100 years, mistakes had not been made; but there have been very few, in my judgment.

Mr. FREAR. Does the gentleman believe it is a proper thing to endeavor to create a commerce in navigation where it does not now exist?

Mr. SPARKMAN. Oh, most assuredly, at times. That is the theory, for instance, on which we build canals.

Mr. FREAR. Then where will be the limit, in the gentleman's judgment, in making these extensions?

Mr. SPARKMAN. The people can place a limit on it whenever they desire.

Mr. FREAR. Is it not the committee that places the limit?

Mr. SPARKMAN. No; not finally.

Mr. FREAR. Is it not true, as the gentleman from Illinois said, that it is impossible to secure the addition of an amendment to this bill?

Mr. SPARKMAN. That is for the House to say. So far as we are concerned, we might curtail or stop the work at any time, but if we came into this House with a measure that did not take care of the commercial demands of the country, I do not think we would get very far with it, and if Congress should pass such a measure I believe the people would resent the action.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

Mr. SPARKMAN. Yes.

Mr. MOORE. Mr. Chairman, this House recently voted to make an appropriation for the improvement of good roads and for the maintenance of good roads. If a good road is once constructed under the auspices of the Government, would the gentleman think it the duty of the Government to keep that road in repair and otherwise provide for its maintenance from year to year?

Mr. SPARKMAN. I should think it ought to be kept in repair by somebody.

Mr. MOORE. Does not the same principle apply to a waterway? Does not a waterway need repair just as a good road?

The CHAIRMAN. The time of the gentleman from Florida has expired. The question is on the amendment offered by the gentleman from Wisconsin.

The question was taken, and the amendment was rejected.

Mr. FREAR. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amend by striking out from line 5, page 1, the words "to be immediately available," and, further, add to line 5, page 1, the following:

"*Provided*, That if the President and Secretary of War shall upon investigation ascertain and determine that any project or projects hereinafter provided for are not of material value to the public they may, in their discretion, withhold such specific appropriation until further action by Congress."

Mr. FREAR. Mr. Chairman, this amendment follows the other in natural sequence. I took it for granted that the House would not support the other, although I believe eventually it will become the law in years to come. As far as my investigation goes, these engineer reports, as was stated by the gentleman from Illinois, begin first with the district and division engineers and then a board passes upon their recommendations, and eventually the Chief of Engineers determines everything, and the reports show that the chief himself frequently overturns his subordinates' reports.

As was well said a few moments ago by the gentleman from Illinois, there is a grave doubt whether many of these appropriations are justified so far as their effect on the navigability of waters is concerned. In fact, my interest was first aroused when I recently read an exhaustive speech in which it was stated by an eminent authority at the other end of the Capitol that only one dollar out of ten is wisely expended for rivers and harbors.

Mr. MADDEN. Yet they increase these appropriations when the bill gets over there.

Mr. FREAR. Undoubtedly they will do so, because they always have a majority in favor of the bill large enough to do it. There is no doubt about that. I agree with the gentleman. In view of the uncertainty as to the determination of the judgment of engineers and the criticisms that have been urged against a committee that has a personal interest in the bill as a whole I believe this amendment should be agreed to. Why would it not be well to allow the President of the United States, a man whom we all trust, no matter who he may be, together with the Secretary of War, to withhold the appropriation, providing they should believe a project ought not to be advanced because it is of purely local interest? Why would it not be well to allow them some control, acting together, with some latitude after knowing what the facts are?

Mr. BOOHER. Does not the gentleman know that now the Secretary of War has approved every single project in this bill?

Mr. FREAR. I know this, that the Secretary of War in many of these projects knows little more than we do, and that he is largely obliged to depend upon the reports of engineers, which are often contradictory in terms, as the gentleman knows. There comes in a report from the division following the district report, and they often contradict each other. Now, the probability is, in every case, I presume, that the Secretary of War would follow the report of the district engineers——

Mr. BOOHER. Oh, no; the gentleman is mistaken.

Mr. FREAR. Pardon me for a moment. And the district engineer and other engineers have been influenced no doubt by the same sentiments that have been expressed here by Members themselves.

Mr. BOOHER. Allow me to say to the gentleman that the Secretary of War frequently turns down the Chief of Engineers, and he frequently turns down the engineering board.

Mr. FREAR. That may be true, but there is not a particle of danger that any abuse will result from this amendment——

Mr. GARNER. Would the gentleman invoke the principle here that this House yield our power and right to appropriate money to do a certain work to the President of the United States and the Secretary of War?

Mr. FREAR. Not by any means, but I would try to meet the declaration that this is purely a pork-barrel appropriation, an opinion which is spread abroad throughout the country year after year and which comes from Members themselves upon this floor and at the other end of the Capitol.

Mr. GARNER. Will the gentleman permit one other question? That same declaration has been made in reference to public buildings. Would the gentleman put on the same clause in reference to public buildings?

Mr. FREAR. Not necessarily. There is a great distinction, in my judgment. You are securing a permanent establishment when you have a public building. You are securing a building that is eventually going to serve many useful purposes in years to come. It is a permanent investment. The projects in this bill are changing year after year and constantly costing the Government more and more money for maintenance, and, as I stated before, it would seem there ought to be some supervision and check against waste or mistaken information in addition to that which already exists.

Mr. POWERS. Mr. Chairman, if I correctly understood the force of the gentleman's argument, it is to the effect that after this Congress has passed a law appropriating certain moneys for the canalization of certain rivers and certain harbors, then that is to be left to the discretion of the Secretary of War as to whether or not that money should be expended. The gentleman in one breath made the statement that neither the President nor the Secretary of War could possibly know anything about the merits of any particular proposition and that they would have to depend upon the Engineers of the Army for information, just exactly as it is done now.

Mr. FREAR. There is this to be considered, Mr. Chairman: Any question raised would be raised after the bill became a law, and the Secretary of War and the President's attention being then called to the specific items, they could then make an investigation in the specific case. For instance, take the gentleman's own district. The gentleman congratulated himself yesterday upon what he had secured for his district. It would be well that the Government should have supervision of projects by gentlemen who are disinterested and avoid criticism otherwise invited apart from the protection thus afforded public interests.

Mr. POWERS. I do not yield for a speech.

It is the business of this House, Mr. Chairman, to determine whether or not a certain appropriation is meritorious, and if it is not meritorious it is the business of this House to defeat it and not to surrender the powers of this House to legislate into the hands of the President or the Secretary of War.

Mr. HARDY. Mr. Chairman——

Mr. FREAR. Will the gentleman yield just a moment?

Mr. POWERS. I yield.

Mr. HARDY. Mr. Chairman, there has been some wandering from the bill, and I therefore ask indulgence of the committee to permit me to wander a little.

I want to say, in reference to the colloquy between myself and the gentleman from Illinois [Mr. MANN] a few minutes ago, that I started out with the endeavor to be in the utmost degree courteous. I wish to say now that there is one expression in that colloquy that I want to explain, because I still desire to be courteous. This language was used:

I do not take the gentleman's word.

That was said in reply to a statement from the gentleman that I ought to take his word as to what he said. I want to say I did not intend or mean by that statement to impugn the gentleman's veracity or to say that I doubted his truthfulness, but I did mean to say that I thought he was mistaken about what he said, and that my recollection of what he said was correct. The fact is, I am unable just to swallow, contrary to my own recollection, somebody else's statement of an event which occurred in my hearing, and that was the extent of what I intended to say, for I endeavored to be very courteous to the gentleman. Now, I want to say, furthermore, as to what was said, as furnished by the Reporter's notes, that perhaps I was not so far wrong as to its substance, although the word "will" was not used and the word "ought" was used by the gentleman, as he declared in our colloquy. According to the notes, the gentleman made this statement:

Those gentlemen who voted for tolls on the Panama Canal put themselves on record as against deep-water competition to regulate railroad rates, and they ought to vote against the river and harbor bill. No conscientious Member of this House ought to vote for the river and harbor bill and against free tolls on the Panama Canal.

Emphasizing the word "conscientious," if you put that sentence in that way, it will mean almost the same as if you said "will." It impressed me as a statement that no conscientious Member would vote for this bill and against the other. If the statement had been that no Member ought to vote for this bill and against free tolls there would have been no inference that conscience should determine one's vote against this bill and free tolls both, or for this bill and for free tolls both. The truth is the insertion of that word makes the sentence mean nearly the same as if the word "ought" had been "will."

Now, Mr. Chairman, I want to call attention further to the fact that this is the skirmish line of the fighting on free tolls. Every opponent of tolls for the coastwise trade uses every opportunity to inject into this debate all that he can against the charging of our coastwise ships tolls for going through the canal. Another reason for my interpretation of the remarks of the gentleman from Illinois was that it seems to me every advocate of free tolls is vociferous and active, attempting to browbeat, to intimidate men into voting for free tolls for our coastwise ships. They charge men with a want of conscientious performance of their duty because they may vote against free tolls. By insinuation and by direct statement they are repeatedly saying, as has been said here to-day, that men will bury their conscience and bow to the weight of authority of somebody higher up.

Now, I want to say that this free-tolls question can be argued on its merit, if there is any merit in it, and that it will not be determined by innuendo or insinuation. And I do not believe the gentlemen on the other side will make one vote for free tolls to the coastwise trade by any attempted intimidations or by any insinuations against the honesty, the integrity, the manliness, or courage of any man on this side. I have enough respect for the Members of the House to believe that 95 per cent of them vote their convictions on all public questions. But I want to say one thing in reference to all these charges, namely, that they are the cheap change of petty politics. The man who can not argue a question without impugning the motives of somebody or attacking the courage of somebody as being intimidated by somebody else has not a good case to present.

Now, if I may have a little more time I want to just answer my friend from Kansas [Mr. CAMPBELL], because those of us who are opposed to free tolls have sat silent.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. HARDY. May I ask for the indulgence of five minutes more?

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman have five minutes more.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the gentleman from Texas may have five minutes more. Is there objection?

There was no objection.

Mr. HARDY. Mr. Chairman, I want to say something in reference to free tolls. The gentleman from Kansas [Mr. CAMPBELL] made an argument which I apprehend he thought was of great force, that because, forsooth, we deepen the waters of our harbors and pay immense sums to clean out our rivers, therefore we ought to make a discriminating rule in favor of our coastwise trade going through the canal. He forgot that every harbor on our coast is open upon exactly the same terms to the ships of every nation of the earth as they are to ours. Does any vessel from England pay toll or any tonnage dues that our vessels do not pay when they enter the harbor of New York, or San Francisco, or Seattle, or New Orleans? Does any vessel plying the waters of the Mississippi have any advantage over any other vessel plying those waters? Why, gentlemen, I leave out the question of treaty. I say that when you start into this question of discriminating duties by levying a tonnage upon foreign vessels and not upon our own——

Mr. CAMPBELL. Will the gentleman yield?

Mr. HARDY. I will.

Mr. CAMPBELL. Does not the gentleman know that the State of Texas makes pilotage charges against foreign vessels which it does not make against vessels plying in the coastwise trade?

Mr. HARDY. Not that I ever heard of.

Mr. CAMPBELL. I think if the gentleman will look up the pilotage laws of his own State, he will find that they provide for a pilotage charge against vessels doing an over-seas business and make no such charges for American vessels in the coastwise trade.

Mr. HARDY. I want to say that the pilotage question is a question regulated by State laws, and I am not familiar with all of them; but if you find in the Code of the United States any law that makes a discrimination between our vessels and vessels of other nations as to tonnage duties——

Mr. CAMPBELL. I was asking the gentleman about his own harbors.

Mr. HARDY. The gentleman was referring to something that I was not discussing. I am discussing discriminating duties levied by the United States.

Now, if the gentleman will allow me—I have but five minutes—I want to take care of that matter regarding discriminating duties just a little now, although I intend to discuss it later at greater length. I want to say that the history of this country shows that discriminatory duties were a practice adopted by all nations in years gone by, and that discriminatory duties have now been abandoned by all the great nations of the earth, and therefore for us now to start with the Panama Canal to levy discriminating duties upon the vessels of foreign countries would be going back to a practice that has been discredited and antiquated for more than a generation.

Our country under former administrations found that discriminating duties were a species of commercial warfare, and commercial warfare, like any other warfare, is an injury to both nations concerned in it. They adopted a system of free ports and equal duties to the vessels of all nations as tending toward the forwarding of commerce for the benefit of all nations, and we have only lately developed a few people in this country who are disposed to go back to the old system.

Mr. SWITZER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Texas yield to the gentleman from Ohio?

Mr. HARDY. Yes.

Mr. SWITZER. How about the discriminating duty under the recent Democratic tariff bill?

Mr. HARDY. It was wrong.

Mr. GORDON. And it was knocked out, too.

Mr. SWITZER. The gentleman from Texas says it was wrong?

Mr. HARDY. Surely it was wrong. But I will say that no party is perfect. There was a little 5 per cent wee baby of discriminating duty in it, and it died early, thank the Lord. [Laughter.]

Mr. Chairman, I want to say that no thorough student of the history of this country in its early struggles to strengthen its merchant marine and in its levying of discriminating duties on foreign shipping will ever for one moment want to go back again to that policy of discriminating duties. But recently some people who have not studied the former situation and have not studied the early history of our country have begun to hanker after discriminating duties in order to build up our merchant marine. Why, if we want to build up our merchant marine, and believe we can do it by discriminating duties, then we ought to give the free tolls, not to our coastwise ships but to our foreign-trade ships, because our coastwise ships and our coastwise trade are all ours under our law, that absolutely excludes all foreign ships from that trade.

Mr. SWITZER. Mr. Chairman, will the gentleman yield again?

The CHAIRMAN. Does the gentleman yield?

Mr. HARDY. No; I am sorry I have not the time. I say our coastwise ships are all ours, anyway. Let me finish this statement. If we were going to give favor for the benefit of our merchant marine to any part of our shipping, it ought to be to those ships engaged in the foreign trade, because they meet the foreign competition. But as for our coastwise trade, it is a monopoly and can not be participated in by foreign nations. It is not only a monopoly, but a powerful one, that needs no aid and deserves no favor.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. HUMPHREY of Washington. Mr. Chairman, I think I ought to occupy a moment or two to correct the impression that I think the gentleman from Texas [Mr. HARDY] may have made when he made the statement that our harbors are used by foreign ships on the same terms as our own. In that statement he is mistaken. Our harbors do not as a general proposition charge our vessels engaged in the coastwise trade for coming into them or using them. They do charge foreign vessels for that privilege. To make absolutely certain about the matter, I had an argument a few moments ago with one of the distinguished gentlemen on this side of the House, and it has not been over eight minutes since I talked with the Commissioner of Navigation, in order to make sure that I was right about it.

Mr. GARDNER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Washington yield to the gentleman from Massachusetts?

Mr. HUMPHREY of Washington. Certainly.

Mr. GARDNER. The gentleman is referring to a conversation that he and I just had with the Commissioner of Navigation?

Mr. HUMPHREY of Washington. Yes.

Mr. GARDNER. The gentleman is right in his statement, except that American vessels in the foreign trade pay the same as foreign vessels in the foreign trade but not in the coastwise trade.

Mr. HUMPHREY of Washington. Yes. The coastwise vessels using our rivers and harbors as a general proposition pay nothing, and exactly the same principle would apply to the Panama Canal.

Mr. HARDY. Mr. Chairman, will the gentleman yield to me for a question?

The CHAIRMAN. Does the gentleman from Washington yield to the gentleman from Texas?

Mr. HUMPHREY of Washington. Yes.

Mr. HARDY. The gentleman says our coastwise vessels pay nothing for the use of our harbors?

Mr. HUMPHREY of Washington. As a rule.

Mr. HARDY. Do our own vessels, flying our own flag, though engaged in the foreign trade, pay something where the coastwise vessels do not?

Mr. HUMPHREY of Washington. Yes.

Mr. HARDY. Then the gentleman has a distinction that is new to me. I shall have to investigate it. I do not doubt the gentleman's good faith in making the statement.

Mr. HUMPHREY of Washingon. You take a vessel engaged in the foreign trade, so far as Government regulations are concerned, and it pays the same as foreign vessels; but American vessels engaged in the coastwise trade do not pay for the use of our rivers and harbors as a general rule. There may be an exception here and there.

Mr. LENROOT. The Federal Government makes no discrimination?

Mr. HUMPHREY of Washington. The Federal Government makes no discrimination. And that principle applies, so far as the Panama Canal is concerned, in my judgment. We have attempted there to apply the same rule with respect to coastwise vessels of the United States as we do in other American waters, and I am unable to understand that there is any difference, under the decision of the Supreme Court of the United States, in a case that came up from the State of Texas—from the State of the gentleman who has just been speaking [Mr. HARDY]. Chief Justice White decided in that case that Texas had the right to levy a different pilotage duty against a foreign vessel from that charged an American vessel in the coastwise trade, and that it in no wise violated our treaty with foreign countries. It was based on this theory, that the foreign vessel could not engage in the domestic trade under any circumstances, and, not being permitted to engage in the domestic trade, it was impossible for it to be discriminated against, no matter what the Government might do. The Supreme Court therefore held that it was no violation of the treaty to favor American coasting vessels.

That is all I wish to say, Mr. Chairman. I did not think the statement of the gentleman from Texas [Mr. HARDY] ought to go uncontradicted.

Mr. BURGESS. I will suggest, Mr. Chairman, that we shall have plenty of time for debate on the Panama Canal later. Let us go on with this bill.

Mr. HUMPHREY of Washington. I doubt that.

Mr. BURGESS. I object to having the question debated on this bill, whether the gentleman doubts it or not.

Mr. GARDNER. Mr. Chairman, in order to have this matter correct in the RECORD, I want to say that, as I have been told, 6 cents a ton is charged on every vessel, American or foreign, in the way of tonnage dues, provided those vessels, American or foreign, come from a European or Asiatic port. Two cents a ton, I think, is charged on all vessels, American or foreign, if those vessels come from a Canadian port or from a port of the West Indies. Nothing per ton is charged upon any vessel, foreign or American, if it comes from a port of the United States; in other words, if it is engaged in our coastwise trade. Inasmuch as foreign vessels are not admitted into our coastwise trade, there is an apparent differentiation, which is not a differentiation in principle.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Wisconsin [Mr. FREAR].

Mr. MANN. Mr. Chairman, I can not let pass the statement of my distinguished friend from Texas [Mr. HARDY] without throwing a sweet kiss at him. He and I could not quarrel if we wanted to, and then we do not want to. I am sorry that after proving by the record of the Official Reporter, which he got and which I did not take the trouble to look up at all, that I was right in my statement, and that he was wrong in his, the gentleman should proceed to read a lecture, as though he was lecturing me for what I had said. I have always avoided making reflections upon the motives of Members of the House. I never undertake to determine how other honest men shall vote or to determine the honesty of a man by his opinions or his votes. Hence I knew that I had not used the language which the gentleman thought I had used. Perhaps I ought not to have used the word "conscientious," although I think adding the word "conscientious" to the description of a Member of Congress does not restrict the number at all. I think they are all conscientious.

Mr. BUTLER. He said 90 per cent.

Mr. HARDY. Will the gentleman yield for a very courteous interruption?

Mr. MANN. I always yield to the gentleman.

Mr. HARDY. I want to say that my knowledge of the gentleman's usual accuracy in the use of words made me inclined, when he asked me if I would take his recollection of what he had said, to say yes; but my recollection was so positive that I wanted to see which of us was right.

Mr. BUTLER. This is the most beautiful reconciliation I ever saw. [Laughter.]

Mr. MANN. I have great respect for the gentleman's recollection. One unfortunate thing I have is a very accurate memory. I sometimes wish I could forget. [Laughter.]

Mr. HARDY. It was not wrong in this case, anyhow.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin [Mr. FREAR].

Mr. FREAR. Mr. Chairman, I ask that the amendment be reported again. We have been discussing the Panama Canal and everything except my amendment.

The CHAIRMAN. If there be no objection, the amendment will be again reported.

The Clerk read as follows:

Amend, by striking out from line 5, page 1, the words "to be immediately available," and further, by adding to line 9, page 1, the following:

"*Provided*, That if the President and Secretary of War shall upon investigation ascertain and determine that any project or projects hereinafter provided for are not of material value to the public, they may in their discretion withhold such specific appropriation until further action by Congress."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Wisconsin.

The question was taken; and on a division (demanded by Mr. MURDOCK) there were—ayes 10, noes 77.

Accordingly the amendment was rejected.

The Clerk read as follows:

Improving Tenants Harbor, Me.: Completing improvement in accordance with the report submitted in Rivers and Harbors Committee document No. 12, Sixty-second Congress, third session, $12,500.

Mr. SPARKMAN. Mr. Chairman, I was desirous, and I am sure many other gentlemen on this floor were desirous, of going ahead until about 6 o'clock; but out of deference to the newspapers, there being a reception at the Press Club, which many

Members desire to attend, I move that the committee do now rise. [Applause.]

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 13811) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, and had come to no resolution thereon.

HOUR OF MEETING TO-MORROW.

Mr. SPARKMAN. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet to-morrow at 11 o'clock.

The CHAIRMAN. The gentleman from Florida asks unanimous consent that when the House adjourns to-day it adjourn to meet to-morrow at 11 o'clock. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, we will be reading the bill to-morrow under the five-minute rule. Certainly six hours of that is a long time. If we meet at 11 o'clock to-morrow, when does the gentleman expect to quit?

Mr. SPARKMAN. I had not thought anything about that, I will say frankly to the gentleman.

Mr. MANN. Then I object.

The SPEAKER. The gentleman from Illinois objects.

ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 13091. An act to provide for drainage of Indian allotments of the Five Civilized Tribes.

DANIEL THEW WRIGHT.

Mr. PARK. Mr. Speaker, I rise to a question of the highest privilege.

The SPEAKER. The gentleman from Georgia rises to a question of the highest privilege.

Mr. PARK. By virtue of my office as a Member of the House of Representatives, I impeach Daniel Thew Wright, an associate justice of the Supreme Court of the District of Columbia, of high crimes and misdemeanors.

Mr. MANN. I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Illinois makes the point or order that there is no quorum present.

Mr. BUCHANAN of Illinois. I move a call of the House, Mr. Speaker.

ADJOURNMENT.

Mr. SPARKMAN. I move that the House do now adjourn.

Mr. BUCHANAN of Illinois. Oh, no; let us get a quorum.

Mr. MANN. This ought not to be brought up so late at night.

The SPEAKER. The gentleman from Florida moves that the House do now adjourn.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. SPARKMAN. Division, Mr. Speaker.

The House divided; and there were—yeas 52, nays 22.

Mr. FOSTER. I ask for the yeas and nays, Mr. Speaker.

SEVERAL MEMBERS. Oh, no.

The SPEAKER. The gentleman from Illinois [Mr. FOSTER] demands the yeas and nays.

Mr. FOSTER. I withdraw the request.

The SPEAKER. The request is withdrawn. The motion to adjourn is agreed to.

Accordingly (at 5 o'clock and 10 minutes p. m.) the House adjourned until Saturday, March 21, 1914, at 12 o'clock noon.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. FERRIS, from the Committee on the Public Lands, to which was referred the bill (S. 3403) to abolish the office of receiver of public moneys at Springfield, Mo., and for other purposes, reported the same with amendment, accompanied by a report (No. 420), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. STOUT, from the Committee on the Public Lands, to which was referred the bill (S. 2316) authorizing leave of absence to homestead settlers upon unsurveyed lands, reported the same with amendment, accompanied by a report (No. 421), which said bill and report were referred to the House Calendar.

Mr. MILLER, from the Committee on Indian Affairs, to which was referred the bill (H. R. 10832) to amend section 2 of an act approved March 2, 1907, entitled "An act providing for the allotment and distribution of Indian tribal funds," reported the same with amendment, accompanied by a report (No. 422), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. DECKER, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 14189) to authorize the construction of a bridge across the Missouri River near Kansas City, reported the same with amendment, accompanied by a report (No. 424), which said bill and report were referred to the House Calendar.

Mr. STOUT, from the Committee on the Public Lands, to which was referred the bill (S. 656) granting to the trustees of the diocese of Montana of the Protestant Episcopal Church, for the benefit of "Christ Church on the Hill," at Poplar, Mont., lots 5, 6, and 7, in block 30, town site of Poplar, State of Montana, reported the same without amendment, accompanied by a report (No. 425), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (S. 657) to authorize the reservation of public lands for country parks and community centers within reclamation projects in the State of Montana, and for other purposes, reported the same with amendment, accompanied by a report (No. 426), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. MILLER, from the Committee on Indian Affairs, to which was referred the bill (H. R. 14229) for the relief of Henry La Roque, reported the same without amendment, accompanied by a report (No. 423), which said bill and report were referred to the Private Calendar.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. CAMPBELL: A bill (H. R. 14865) suspending the patent and copyright laws of the United States when a patent or copyright or any article or product protected by patent or copyright is wholly owned, used, or leased by any trust or monopoly in violation of the act of July 2, 1890, entitled "An act to protect trade and commerce against unlawful restraints and monopolies, and all acts amendatory thereto"; to the Committee on Patents.

By Mr. JONES: A bill (H. R. 14866) to provide a civil government for Porto Rico, and for other purposes; to the Committee on Insular Affairs.

By Mr. KINKAID of Nebraska: A bill (H. R. 14867) to increase the limit of cost of Federal building at Alliance, Nebr.; to the Committee on Public Buildings and Grounds.

By Mr. HAMILTON of New York: A bill (H. R. 14868) providing for the erection of a public building at the city of Dunkirk, in the State of New York; to the Committee on Public Buildings and Grounds.

By Mr. LOBECK: A bill (H. R. 14869) authorizing the Shoshone Tribe of Indians residing on the Wind River Reservation in Wyoming to submit claims to the Court of Claims; to the Committee on Indian Affairs.

By Mr. SABATH: A bill (H. R. 14870) to make effective the provisions of an act entitled "An act to protect trade and commerce against unlawful restraints and monopolies," approved July 2, 1890; to the Committee on the Judiciary.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BROWN of West Virginia: A bill (H. R. 14871) granting a pension to Jethrow Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14872) granting a pension to Bertha Young; to the Committee on Invalid Pensions.

By Mr. CLARK of Missouri: A bill (H. R. 14873) granting a pension to Caroline Bloom; to the Committee on Invalid Pensions.

By Mr. DONOHOE: A bill (H. R. 14874) granting a pension to Carson E. Newhard; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14875) granting a pension to Elizabeth W. Jones; to the Committee on Invalid Pensions.

By Mr. DRISCOLL: A bill (H. R. 14876) granting an increase of pension to Ada Collins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14877) granting an increase of pension to Mary Corcoran; to the Committee on Invalid Pensions.

By Mr. EAGAN: A bill (H. R. 14878) granting a pension to Herman W. Breuel; to the Committee on Pensions.

By Mr. GOEKE: A bill (H. R. 14879) granting an increase of pension to Thomas Shrider; to the Committee on Invalid Pensions.

By Mr. MILLER: A bill (H. R. 14880) granting a pension to Frank Bachmeyer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14881) granting a pension to John Gibbert; to the Committee on Invalid Pensions.

By Mr. O'HAIR: A bill (H. R. 14882) granting an increase of pension to Charles W. Nickles; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14883) granting an increase of pension to John F. Smith; to the Committee on Invalid Pensions.

By Mr. PETERS of Maine: A bill (H. R. 14884) granting an increase of pension to Madison B. Hayman; to the Committee on Invalid Pensions.

By Mr. SUTHERLAND: A bill (H. R. 14885) granting a pension to Allen R. Vickers; to the Committee on Invalid Pensions.

By Mr. WOODS: A bill (H. R. 14886) granting a pension to Roxiana Wells; to the Committee on Invalid Pensions.

---
